

what is OPAL?

Open@LaTrobe.

La Trobe University's Institutional Repository.

A place for collaboration, creativity and community, OPAL is custom-built for disseminating La Trobe's achievements and the work of our scholars.

With its user-friendly digital platform, it's never been easier to preserve, promote and provide worldwide access to your research and educational resources. In an increasingly digital world, it's never been more important.

"OPAL demonstrates La Trobe's commitment to the principles of Open Access and represents an opportunity for La Trobe to become a national leader in Open Access provision."

Susan Dodds, Deputy Vice-Chancellor & VP (Research and Industry Engagement)

in its
first year,
OPAL has
more than...

3,000 items

**100,000
publication
downloads**

**200,000 views of
journal articles**

benefits of using OPAL

- Increases the impact and citation rates of your publications by improving their visibility.
- Opens up opportunities for you to collaborate and share data.
- No more high fees for Open Access publishing.
- Meets Open Access requirements of major funders, including Australian Research Council.
- Makes your research available to potential industry partners.

"OPAL can help those outside of academia, in community, industry, non-profits, government, and the public, understand why you are worth partnering with."

"Historically, scholarship has sat behind paywalls and been written in opaque discipline specific language. At the heart of research impact is generating change outside of academia – change out there, in the world."

**Wade Kelly, Executive
Advisor, Research Impact**

where to start

Deposit your work in OPAL via **My Publications**.
