TE-SEM-2	Advanced Media Production – Television	MST3MPT
TE-SEM-2	Dilemmas in Journalism: legal and ethical issues	MST3DIJ
TE-SEM-2	Media Internship	MST3INT
TE-SEM-2	Media Project Development	MST3MPD

Key: ² Available only to Bachelor of Journalism students.**Honours in the Bachelor of Arts**

Students are selected into honours at the end of their third year. Prospective students should make their interest known to the Media Studies Honours Coordinator by early July or November so that a decision can be made and the student notified in time for re-enrolment in December. Mid-year enrolment is also available.

The principal requirement for selection is consistently high performance (normally at least a B average) in a media studies major and, in particular, distinction in third year level media units. Successful completion of more than the major of 130 credit points would be an advantage.

To complete the course a student must complete 60 credit points of coursework units at fourth year level and either a 12000 to 15000 word thesis or a media production with supporting analysis.

For full details of the fourth year offerings please see the *Postgraduate Handbook*.

Graduate Diploma in Journalism (AGJ), Graduate Certificate in Journalism (ACJ)

A Graduate Diploma in Journalism and a Graduate Certificate in Journalism are offered by the faculty. See the *Postgraduate Handbook*.

Graduate Diploma in Media Studies (AGMS), Graduate Certificate in Media Studies (ACMS)

A Graduate Diploma in Media Studies and a Graduate Certificate in Media Studies are offered by the faculty. See the *Postgraduate Handbook*.

A full description of these units (including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings) appears at the end of each discipline entry. A full description of MST units appears below. For the most recent descriptions of all units, please access the unit database at www.latrobe.edu.au/udb_public.

UNIT DESCRIPTIONS**MSTIAC AUDIENCES AND COMMUNICATION** (15. CPs Sem. TE-SEM-2 BU.) *Dr Sue Turnbull, Dr Lawrie Zion*

In this unit, students will examine the concept of 'audience' from a number of perspectives. Issues to be considered include, the 'creation' of audiences by the media, media audiences for popular culture, and the role of the media in the lives of individuals and groups. A component of this unit will include radio production experience.

Quota: 150. Selection is based on ENTER score or equivalent and an interview. Preference is given to students who plan to complete a major in media studies.

Class requirements: One 1-hour lecture and one 2-hour tutorial per week.

Assessment: One media audio production (50%), two 1000-word assignments (50%). Attendance at and participation in 80% of tutorials is required for students to pass the subject.

Preliminary Reading:

Cunningham, S. and Turner, G. (Eds) *The media in Australia: industries, texts, audiences* Allen and Unwin 1997.

Recommended Reading:

McQuail, D. *Audience analysis* Sage 1997.

Jenkins, H. *Textual poachers: television fans and participating culture* Routledge 1992

Lewis, L. (Ed) *The adoring audience: fan culture and popular media* Routledge 1992

MSTICO CONSTRUCTING COMMUNICATION (15. CPs Sem. TE-SEM-1 BU.) *Dr Terrie Waddell*

In this introductory unit students explore theories of communication and media studies in order to provide the basic theoretical framework for all undergraduate courses within the Media Studies Program. We begin by looking at the concept of a media text and from there, discuss the ways in which audience's experience, and interact with various forms of media – radio, print music, internet, and television. Over the semester, we will examine and critique the media using central concepts in media theory including ideology, intertextuality, semiotics, gender, and ethnic representation, theories of audience, globalisation, fandom, and genre studies.

Class requirements: One 1-hour lecture and one 2-hour tutorial per week.

Assessment: One reading presentation (20%), one 1500-word assignment (40%), one 2000-word essay (40%). Attendance at and participation in 80% of tutorials is required for students to pass the subject.

MST1MTN MAKING THE NEWS (15. CPs Sem. TE-SEM-1 BU.) *Mr John Benson*

Only available to students enrolled in the Bachelor of Media Studies and the Bachelor of Journalism.

In this unit students examine the nature of news and how events become 'newsworthy,' as well as analyse the news as a commercial and cultural institution. Issues covered include the news media and public agenda setting, the ethics of journalism, and the news production process. Students work in teams to produce a television news program both on location and in the studio. They also analyse their news production experience from the perspectives of media research and media theory. Attendance at and participation in 80% of tutorials is required for students to pass this subject.

Class requirements: One 1-hour lecture and one 2-hour studio workshop per week.

Assessment: One 1,250-word assignment (30%), collaborative media production including an 800-word account of their production experience (40%), including an 800-word account of their production experience. To be credited with production component students must attend 80% of the workshop tutorials, one 1,250-word assignment (30%)

Recommended Reading:

MST1WFM WRITING FOR THE MEDIA (15. CPs Sem. TE-SEM-2 BU.) *Dr*

Rachel Buchanan

Only available to students enrolled in the Bachelor of Media Studies and the Bachelor of Journalism.

In this unit, students will examine the fundamental skills of news writing and information gathering for the media, including press releases, daily news stories, and feature articles. The process of identifying and writing stories within these formats will be discussed and analysed. Students will write a range of short pieces for appraisal in weekly workshops.

Class requirements: One 1-hour lecture, one 2-hour workshop/tutorial per week.

Assessment: One 2000-word feature story (50%), two 500-word news stories (25%), and one 1000-word class exercise (25%). Attendance and participation in 80% of workshop tutorials is required.

Recommended Reading:

MST2CAJ COMPUTER-ASSISTED JOURNALISM (20 CPs Sem. TE-SEM-1

BU.) *Dr Rachel Buchanan*

This unit is offered at third year level also.

Only available to students enrolled in the Bachelor of Media Studies and the Bachelor of Journalism.

In this unit students are taught to research news and feature stories online and to think critically about how the internet and associated web technologies – such as wikis, social networking sites, audio and video sharing and blogs – changing the way news is gathered, written and read. Students learn to evaluate the information on the net, sorting the reliable from the unreliable. They will learn about search engines and search strategies, obtain public records and use databases and spreadsheets to research and write stories.

Prerequisite: MST2CAJ: 60 credit points of first year media studies or coordinator's approval. MST3CAJ: 20 credit points of second year media studies or coordinator's approval.

Class requirements: One 1-hour lecture and one 2-hour workshop per week.

Assessment: One 1000-word research report (20%), one 2000-word feature article (40%), one 1000-word story proposal (20%), two 500-word news stories (20%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

MST2DMC DIGITAL MEDIA CULTURES (20. CPs Sem. TE-SEM-2 BU.) *Dr*

Peter Hughes

This unit is offered at third year level also.

In this unit, students will be introduced to the range of new digital media; to cultural debates including those to do with technology, the production of meaning, and audience, raised by digital media cultures; and to some basic production techniques relevant to the production of new digital media. Topics will be chosen from

production of meaning in digital media cultures, interactions between new digital media forms and users, institutional contexts for construction of meaning in new digital media, and new understandings of the self and the body, time and space, and the domain of art. Attendance at and participation in 80% of tutorials is required for students to pass this subject.

Prerequisite: MST11CCO and MST12AAC or 30 credit points of first year cinema studies, together with basic computer skills.

Class requirements: One 3-hour seminar per week.

Assessment: One 2500-word essay (50%), one 2500-word assignment (50%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Recommended Reading:

Burnett, R., and Marshall, D. *Web theory: an introduction* Routledge 2003

MST2IAI IMAGE AND INDUSTRY: AUSTRALIAN TELEVISION (20. CPs

Sem. TE-SEM-1 BU.) *Dr Sue Turnbull*

This unit is offered at third year level also.

Students will consider the history and forms of Australian television in relation to questions of national identity and institutional contexts. A range of different television examples will be studied possibly including the lifestyle- infotainment show, soaps and drama, the crime series, comedy and Reality TV. The relationship of Australian television to new patterns in global television will also be considered.

Prerequisite: MST2IAI: 30 credit points of first year media studies or cinema studies, MST3IAI: 20 credit points of second year media studies.

Class requirements: One 2-hour lecture and one 1-hour seminar per week.

Assessment: Two 2000-word essays (80%) and one 1-hour class test (20%) or one 2000-word essay (40%) and one 3000-word journal (60%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

MST2JPW JOURNALISM PRODUCTION WORKSHOP (20. CPs Sem. TE-

SEM-2 BU.) *Coordinator TBA*

This unit is offered at third year level also.

Only available to students enrolled in the Bachelor of Media Studies and the Bachelor of Journalism.

In this unit students edit develop a website-based magazine. Management and production standards including style and formatting techniques for new media are covered in seminars. Seminars include discussions about common online writing styles, presentation of stories, basic technical aspects of web production and the role of the editor in both a traditional and digital environment. Attendance at and participation in 80% of tutorials is required for students to pass this unit. Students taking this unit as an Elective will only be enrolled subject to availability of places.

Prerequisite: MST2JPW: 30 credit points of first year media studies or coordinator's approval. MST3JPW: 20 credit points of second year media studies or coordinator's approval.

Quota: 80. Priority will be given to Bachelor of Journalism students or Bachelor of Media Studies students in the journalism stream.

Class requirements: One 1-hour lecture and one 2-hour workshop per week.

Assessment: One 1000-word web publication proposal (20%), one 2500-word prototype web site-based magazine (50%), articles for web publication (1500-words) (30%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Recommended Reading:

Whittaker, J. *Web production for writers and journalists*, Routledge 2002

MST2MAS MEDIA AND THE SPECTACULAR (20. CPs Sem. TE-SEM-2 BU.)

Dr Terrie Waddell

This unit is offered at third year level also.

In this unit students explore global media spectacles such as the coverage of sex scandals, wars and the behaviour of celebrities. Through an examination of the psychological (Jungian/post-Jungian) properties of the more 'sensational' aspects of the media, students consider whether these spectacles are passing fads or recurring events rich in mythical symbolism. The broadcast and print media's preoccupation with ecstasy, the carnivalesque, grotesqueries, conspiracy, self disclosure and physical/verbal excess is discussed from a number of theoretical perspectives, but primarily through the lens of analytical psychology. Attendance at and participation in 80% of tutorials is required for students to pass this subject.

Prerequisite: MST2MAS: 30 credit points of first year media studies or cinema studies or coordinator's approval. MST3MAS: 20 credit points of second year media studies or coordinator's approval.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week. 80% attendance at tutorials/workshops is required to pass the unit.

Assessment: Two 2000-word assignments (80%), one Final Test (1000-words equivalent) (20%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

Recommended Reading:Kellner, D. *Media spectacle* Routledge 2003Lull, J. and Hinerman, S. *Media spectacles: morality and desire in the popular marketplace* Columbia University Press 1997Waddell, T. *Mistakes: archetype, myth, and identity in screen fiction*, Routledge 2006Izod, J. *Myth, mind and the screen: understanding the heroes of our times* Cambridge University Press 2001Langer, J. *Tabloid television: popular journalism and the other news* Routledge 1998**MST2NMS NEW MEDIA AND SOCIETY** (20. CPs Sem. TE-SEM-1 BU.) Dr

Peter White

This unit is offered at third year level also.

Students explore current research and thinking about the future of new media such as the Internet and online services. With the growth of the Internet communication, information and entertainment industries are evolving. In this unit we examine how new media services are being integrated into social, political, and economic life. Attendance at and participation in 80% of tutorials is required for students to pass this subject.

Prerequisite: MST2NMS: 30 credit points of first year media studies or cinema studies or coordinator's approval. MST3NMS: 20 credit points of second year media studies or cinema studies or coordinator's approval.

Class requirements: One 3-hour seminar per week.

Assessment: One 1000-word annotated bibliography (20%), seminar presentation (1000-words equivalent) (20%), one 3000-word essay (60%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

CPs Sem. TE-SEM-1 BU.) Coordinator TBA*This unit is offered at third year level also.*

In this unit students examine selected aspects of newspapers and magazines from three perspectives. The first perspective allows for the examination of news by journalists and editors. The second perspective considers the role of newspapers and magazines in the lives of individuals, geographic communities, and communities of interest. The final perspective examines the Australian news media as an industry and considers issues such as patterns of ownership, government regulatory debates and the changing nature of newspaper

and magazine publishing brought about by new technologies and the growth of the electronic media. Attendance at and participation in 80% of tutorials is required for students to pass this subject.

Prerequisite: 30 credit points of first year media studies or coordinator's approval.

Quota: 50. Preference given to third year media studies students.

Class requirements: One 1-hour lecture and one 2-hour tutorial per week.

Assessment: One 1000-word annotated bibliography (20%), one 20-minute seminar presentation (30%), and one 2500-word essay (50%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Preliminary Reading:Henningham, J. *Issues in Australian journalism* Cheshire 1990**MST2PCM POPULAR CULTURE AND THE MEDIA** (20. CPs Sem. TE-SEM-2 BU.) Dr Sue Turnbull*This unit is offered at third year level also.*

Compulsory for all second year Bachelor of Media Studies students.

In this unit students cover the major approaches to media research involving audiences in different social and cultural contexts. Experimental, quantitative, and qualitative methodologies are explored. Students are required to reflect on their own research practices and to refine these as they critically examine a range of diverse approaches and examples. Students are provided with research methods and skills, which can then be applied in other media subjects, particularly journalism, and will be of use to those intending to proceed to honours. Attendance at and participation in 80% of tutorials is required for students to pass this subject.

Prerequisite: MST2RMA: 30 credit points of first year media studies or coordinator's approval. MST3RMA: 20 credit points of second year media studies or coordinator's approval.

Class requirements: One 1-hour lecture and one 2-hour tutorial per week.

Assessment: One 1500-word literature review (30%), one 2500-word project outline (50%), one 1-hour quiz (20%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Recommended Reading:Hansen, A. et. al. *Mass communication research methods* Macmillan 1998.Booth, W. C. et al. *The craft of research* University of Chicago Press 1995.**MST2RSP RADIO/SOUND PRODUCTION** (20. CPs Sem. TE-SEM-1 BU.) Dr John Tebbutt*This unit is offered at third year level also.*

In this unit students are introduced to a range of program making and production skills including digital editing and mixing. Students produce a radio documentary feature suitable for broadcast on community radio or material for use in other situations such as the school classroom or museum displays. Students are assessed on the programs they make and on their written evaluation of the production process. Attendance at and participation in 80% of tutorials is required for students to pass this subject.

Prerequisite: MST2RSP: 30 credit points of first year media studies or cinema studies or coordinator's approval. MST3RSP: 20 credit points of second year media studies or cinema studies or coordinator's approval.

Quota: 40. B. Media Studies students given first preference, then to third year B. Arts (media major) students.

Class requirements: One 3-hour seminar per week.

Assessment: One 20-minute documentary (40%), one 1000-word essay (20%), one 5-minute interview, and log sheet (20%), one 8-minute multi track production (20%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

MST2RTH RADIO THEORY AND HISTORY (20. CPs Sem. TE-SEM-1 BU.) *Dr*

John Tebbutt

This unit is offered at third year level also.

Students gain the opportunity to study the history of radio with a specific emphasis on the influence of the medium on Australian culture. Theories of communication and history are considered in the context of the social use of the medium. Students are introduced to documentary research resources for radio through site visits to archival holdings and demonstration of websites and databases. Students are encouraged to work on projects that contribute to a critical history of Australian radio. Research and presentation skills are developed through class assignments and discussions. Attendance at and participation in 80% of tutorials is required for students to pass this unit.

Prerequisite: MST2RTH: 30 credit points of first year media studies or cinema studies or coordinator's approval. MST3RTH: 20 credit points of second year media studies or cinema studies or coordinator's approval.

Class requirements: One 3-hour seminar per week.

Assessment: One 1500-word research report (30%), one 2500-word essay (50%), and one bibliographic research exercise (20%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

MST2RTM RESEARCHING THE MEDIA (20. CPs Sem. TE-SEM-1 BU.) *Dr*

Peter Hughes

This unit is offered at third year level also.

Compulsory for all second year Bachelor of Media Studies students. In this unit, students will cover the major approaches to the institutional and textual aspects of media research. Quantitative and qualitative methods are considered, as well as different models of textual analysis. Students will engage in their own research projects, implementing the methods and approaches they have considered. This unit provides students with a range of research skills, which will be useful in other media subjects and is particularly appropriate for those intending to proceed to honours. Attendance at and participation in 80% of tutorials is required for students to pass this subject.

Prerequisite: MST2RTM: 30 credit points of first year media studies or coordinator's approval. MST3RTM: 20 credit points of second year media studies or coordinator's approval.

Class requirements: One 2-hour lecture and one 2-hour tutorial.

Assessment: One 2500-word research project (50%), one 2500-word research project (50%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

MST2SAM SEX AND THE MEDIA (20. CPs Sem. TE-SEM-2 BU.) *Dr*

Terrie Waddell

This unit is offered at third year level also.

In this unit students consider how gender and sexuality have been represented in the media and how these representations have been theorised. Attention is paid to feminist interventions in media debates about gender and sexuality, as well as emerging developments in the theorisation of masculinity and representation. Some of the issues addressed include advertising and consumerism, the representation of the body, and the gendered appeal of popular culture, including wrestling, the action film, TV heroes, comedy, and pornography. Attendance at and participation in 80% of tutorials is required for students to pass this subject.

Prerequisite: MST2SAM: 30 credit points of first year Media Studies or coordinator's approval. MST3SAM: 20 credit points of second year Media Studies or coordinator's approval.

Class requirements: One 2-hour lecture and one 1-hour seminar per week.

Assessment: Two 2000-word essays (80%), one final test (20%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

MST2SCV SINGLE CAMERA VIDEO (20. CPs Sem. TE-SEM-1 BU.) *Ms*

Angie Black

This unit is offered at third year level also.

In this unit, students are introduced to single camera video production and will be provided with the opportunity to explore the production forms examined in theoretical media subjects. The major practical exercise involves working in small production teams, where students will be assessed in the areas of direction, camera, and editing or production management. Attendance at and participation in 80% of workshops is required for a pass in this unit.

Prerequisite: MST2SCV: 60 credit points of first year media studies for B.Media and 30 credit points of first year media studies for BA students or coordinator's approval. MST3SCV: 20 credit points of second year media studies or coordinator's approval.

Quota: 40. B. Media Studies students given first preference. Any places remaining are available to third year B. Arts (media major) students.

Class requirements: One 3-hour workshop per week.

Assessment: One 1500-word screenplay (30%), one major group practical production exercise (50%). Details of the assessment criteria used to assess the group production will be supplied in class., one 1000-word critical review (20%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Prescribed Reading:

Mollison, M. *Producing videos: a complete guide* AFTRS 1987.

MST2WFR WRITING FOR RADIO (20. CPs Sem. TE-SEM-2 BU.) *Dr*

John Tebbutt

This unit is offered at third year level also.

In this unit, students will study audio texts including radio plays, advertisements, and 'soundscapes'. Issues of production and performance will be critically related to the dramatic impact of sound and voices. Various radio genres will be explored with an emphasis on experimental forms and the relations between radio and performance art. Students will be introduced to studio recording, microphone techniques, performance and the work of professional writers and producers. Attendance at and participation in 80% of tutorials is required for students to pass this subject.

Prerequisite: MST2WFR: 30 credit points of first year media studies or cinema studies or coordinator's approval. MST3WFR: 20 credit points of second year media studies or cinema studies or coordinator's approval.

Quota: 30. B. Media Studies students given first preference then third year B. Arts (media major) students.

Class requirements: One 3-hour seminar per week.

Assessment: Two short production scripts (1500-words equivalent) (30%), one 10-minute script (equivalent to 2000-word assignment) (40%), one 1500-word class presentation (30%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

MST2WVF WRITING FOR VIDEO NON FICTION (20. CPs Sem. TE-SEM-2

BU.) *Dr*

Peter Hughes

This unit is offered at third year level also.

In this unit students examine the writing of 'documentary' and 'non

fiction' forms of contemporary Australian television and video. Students will develop a familiarity with the history and conventions of various non-fiction television forms. The unit will also cover the various processes of script development for non-fiction. In addition to the writing of an essay, students are required to produce video scripts based on industry conventions. Attendance at and participation in 80% of tutorials is required for students to pass this subject.

Prerequisite: MST2WFV: 30 credit points of first year media studies or coordinator's approval. MST3WFV: 20 credit points of second year media studies or coordinator's approval.

Quota: 35. Priority will be given to B. Media students in the video stream. Any places remaining will be available to third year B. Arts (media major) students.

Class requirements: One 3-hour seminar/workshop per week.

Assessment: Industry research (1000 words equivalent) (20%), one 1500-word essay (30%), one 2500-word screenplay (50%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

MST3AJD ADVANCED JOURNALISM AND DESIGN (20. CPs Sem. TE-SEM-2 BU.) *Coordinator TBA*

Only available to students enrolled in the Bachelor of Media Studies and the Bachelor of Journalism.

In this unit, students are introduced to the practical aspects of print journalism production: the business of writing in a range of formats, the editorial decision making process and the layout of text. Students are shown how editorial goals direct the process of selecting, writing, and the editing of text. Topics covered include research, writing, legal, and ethical consideration, editing and sub-editing, layout, print production and publishing. Attendance at and participation in 80% of tutorials is required for students to pass this subject. Students taking this unit as an Elective will only be enrolled subject to availability of places.

Prerequisite: MST2/3CAJ or coordinator's approval.

Class requirements: One 1-hour lecture and one 2-hour workshop per week.

Assessment: One 1000-word publishing proposal (20%), one 1500-word writing exercise (30%), development and production of a magazine prototype (2500-word equivalent) (50%)

Recommended Reading:

MST3AJP ADVANCED JOURNALISM PRACTICE (20 CPs Sem. TE-SEM-2 BU.) *Dr Lawrie Zion*

Available only to Bachelor of Journalism students

In this unit, journalism students will receive final preparation in professional media story creation and editing techniques. Students will examine and practice the research, analysis, and writing skills applied in the field of journalism. Students will be expected to multi-task in the workplace by being able to develop stories from original concept through to final production. In this unit, we will apply current industry methodology for the identification, design, research, and production of media stories across print and electronic platforms. By the conclusion of the unit, students should be able to demonstrate: an understanding of the publishing process; highly developed research skills; advanced interviewing skills; an appreciation of the communication process and the expected outcomes.

Prerequisite: MST1WFM and MST2/3CAJ.

Class requirements: One 1-hour lecture and one 2-hour tutorial per week.

This unit is not available for Study Abroad students.

Assessment: One 1000-word film review (20%), one 1000-word publishing proposal (20%), one 3000-word feature presentation & analysis (60%)

Prescribed Reading:

MST3BEJ BROADCAST AND ELECTRONIC JOURNALISM (20 CPs Sem. TE-SEM-1 BU.) *Dr Lawrie Zion*

Only available to students enrolled in the Bachelor of Media Studies and the Bachelor of Journalism.

Students will explore the reporter's role in factual production across broadcast and electronic media. Topics covered will include research for audiovisual media, writing for radio, television and the World Wide Web, interviewing techniques, script editing, and principles of presenting for radio and television. As part of the process, students will be expected to undertake story design and conception, research, script editing, review and analysis. The role of this unit is to give students an appreciation of the multi-skilling required by convergence of television, radio, press, and internet in the current media environment. Attendance at and participation in 80% of tutorials is required for students to pass this subject.

Prerequisite: 80 credit points of second year media studies.

Incompatible unit: MST31WAM

Class requirements: One 1-hour lecture and one 2-hour tutorial per week.

Assessment: One news script written for TV and the web (1500-words equivalent) (30%), two radio scripts (1500-words equivalent) (30%), one program proposal for radio 2000-word equivalent (40%)

Thompson, R. *Writing for broadcast journalists*, Routledge 2005

MST3DIJ DILEMMAS IN JOURNALISM: LEGAL AND ETHICAL ISSUES (20 CPs Sem. TE-SEM-2 BU.) *Dr Lawrie Zion*

Only available to students enrolled in Bachelor of Media Studies and Bachelor of Journalism degrees and Graduate Diplomas of Media Studies or Journalism

In this unit, students will investigate the ethical and legal questions that confront journalists on an everyday basis, and the new dilemmas forged by rapidly evolving media technologies. To what extent have the ground rules changed with the explosion of new kinds of media content and platforms? Students explore how privacy, freedom of information, professional liability, conflict of interest, copyright and fair dealing, defamation, and confidentiality are dealt with by the law, through journalist codes of practice, and by media institutions. In this unit, we will draw on the expertise of legal experts and media professionals.

Prerequisite: Completion of first and second year of the Bachelor of Media Studies or Bachelor of Journalism or coordinator's approval.

Class requirements: One 1-hour lecture and one 2-hour seminar per week.

Assessment: One 2000-word essay (40%), one 2000-word essay (40%), one seminar presentation (1000-words equivalent) (20%)

MST3INT MEDIA INTERNSHIP (20. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.)

Mr John Benson, Dr Lawrie Zion

Only available to students enrolled in the Bachelor of Media Studies and the Bachelor of Journalism.

In this unit, students will develop contacts with, and work in, a media organisation. Students will develop an understanding of issues internal to the organisation such as its goals, structure, management, and work practices. In addition, they will be expected to develop an understanding of the organisation's relationship to its clients, audience, and other parts of the media industry.

Prerequisite: completion of second year requirements for the Bachelor of Media Studies or Bachelor of Journalism completion of second year requirements for the Bachelor of Media Studies.

Quota: 60. Selection is based on academic merit.

Class requirements: Three 3-hour workshops and 120 hours attendance at an approved workplace.

This unit is not available for Study Abroad students.

Assessment: One 750-word work plan (15%), one 1500-word report (35%), one 3000-word essay (50%)

Recommended Reading:

Jurek, K. *Careers in communications* Focal Press 1998.

MST3MIN MEDIA INDUSTRIES (20. CPs Sem. TE-SEM-1 BU.) *Dr Mary Debre*

Only available to students enrolled in the Bachelor of Media Studies and the Bachelor of Journalism.

In this students are provided with an overview of existing and emerging media and communications industries. Attention will be paid to the implications of technological and organisational convergence for the evolving structure of those industries. Topics covered include: the internationalisation and regionalisation of the media and communication industries; multi-mode media content delivery; narrowcasting and the future of the mass audience; changing forms of news delivery; the implications of structural change within the media industries for employment and the creation of content; the role of governments in protecting national production industries, and the use of media by non-media organisations. Attendance at and participation in 80% of tutorials is required for students to pass this subject.

Prerequisite: MST2RTM and MST2RMA.

Class requirements: One 1-hour lecture and one 2-hour tutorial.

Assessment: One 1000-word annotated bibliography (20%), one 1000-word issues/tutorial paper (20%), and one 3000-word essay (60%)

Recommended Reading:

Given, J. *Turning off the television: broadcasting's uncertain future* UNSW Press 2003.

MST3MPD MEDIA PROJECT DEVELOPMENT (20. CPs Sem. TE-SEM-2 BU.)

Dr Mary Debre

Available only to Bachelor of Media Studies students.

Students acquire skills in the development of linear and non-linear media project proposals. Topics covered include concept development, program research, funding options scheduling, budgeting, and marketing. Students develop a project proposal, budget and production schedule and work in self-managing project teams.

Prerequisite: MST2RTM and MST2RMA.

Class requirements: One 1-hour lecture and one 2-hour workshop per week. Attendance at 80% of workshops is compulsory.

Assessment: One 4000-word project proposal (80%), one 1000-word group web-site production assignment (20%)

Recommended Reading:

Winston, B. *Lies, damn lies, and documentary* BFI 2000

MST3MPR ADVANCED MEDIA PRODUCTION – RADIO (20. CPs Sem. TE-SEM-2 BU.) *Dr John Tebbutt*

In this unit, students are provided with an opportunity to develop their work on radio and sound production and to undertake industry research at an advanced level. Students will be encouraged to engage with the radio industry in the course of their projects by exploring distribution avenues for completed projects including broadcasts and/or conducting research on current industry issues in radio. The unit will include regular presentations from professionals working in the medium. A program of production and research will be negotiated with the coordinator. Attendance at and participation in 80% of tutorials is required for students to pass this subject.

Prerequisite: MST2RSP or 30 credit points of first year cinema studies.

Quota: 20. B. Media Studies students in the Radio stream given first preference then third year B.Arts (media major) students.

Class requirements: One 3-hour seminar/workshop per week.

Assessment: One 1500-word written proposal and presentation (30%), one 1000-word project report (20%), a 25-minute radio production or a 2500-word research project (50%)

MST3MPT ADVANCED MEDIA PRODUCTION – TELEVISION (20. CPs Sem. TE-SEM-2 BU.) *Ms Angie Black*

Only available to Bachelor of Media Studies and Bachelor of Journalism students.

In this unit students build on their theoretical and practical understanding of production practices. In a series of participatory class demonstrations, screenings and seminars students explore a range of aesthetic approaches and production techniques relevant to documentary and factual programme production. Drawing on treatments prepared in MST2WFV students work in small crews on a factual production of their own choosing – a documentary and a pilot for a studio/magazine programme.

Prerequisite: 80 credit points of second year level media studies including MST2WFV and MST2SCV.

Quota: 40. Selection based on achievement in MST2SCV.

Class requirements: One 3-hour workshop per week. Attendance at 80% of workshops is required.

Assessment: Practical field exercises (1000-word equivalent) (20%), one 1000-word essay on the creative visualisation of the television production (20%), one 10-minute documentary production (2000-word equivalent) (40%), participation in one 30-minute television production of broadcast quality (20%)

Recommended Reading:

MST3PAE PUBLISHING AND EDITING (20. CPs Sem. TE-SEM-1 BU.) *Dr*

Lawrie Zion

In this unit, the Australian publishing industry is described; the creative and commercial relationships between the author, publisher, and editor are explored; the composition and operation of the book-publishing firm are explained, and a practical introduction to copy-editing is provided. We closely examine both established and new sectors of the publishing industry, including multimedia and the internet, and different fields of publishing, including children's books, general, educational, scholarly and reference books. The roles and skills of the publisher, commissioning editor and copy-editor are examined in detail. Attendance at and participation in 80% of tutorials is required for students to pass this subject.

Prerequisite: 40 credit points of English or Media Studies at 2nd Year level OR admission to the Graduate Certificate or Graduate Diploma of Creative Writing.

Incompatible unit: HUS31PAE

Class requirements: One 2-hour seminar and one 1-hour tutorial per week.

Assessment: One 2000-word essay (40%), two 1000-word assignments (40%), one 1-hour take-home examination (20%)

Prescribed Reading:

Flann, E. and Hill, B. *The Australian editing handbook*, Common Ground 2000

MST3RCA READING COURSE A (20. CPs Sem. TE-SEM-1 BU.) *Dr Peter*

Hughes, Dr Sue Turnbull

A limited number of students may be permitted to undertake an individual program of reading, discussion, and written work by arrangement with the coordinator.

Prerequisite: Approval of the coordinator.

Class requirements: Determined on an individual basis.

Assessment: Determined on an individual basis.

MST3RCB READING COURSE B (20. CPs Sem. TE-SEM-2 BU.) *Dr Peter*

Hughes, Dr Sue Turnbull

A limited number of students may be permitted to undertake an individual program of reading, discussion, and written work by arrangement with the coordinator.

Prerequisite: Approval of the coordinator.

Class requirements: Determined on an individual basis.

Assessment: Determined on an individual basis.

MST3WEM WRITING AND EDITING FOR MULTIMEDIA (20. CPs Sem. TE-SEM-2 BU.) *Dr Lawrie Zion*

This subject is not available to Bachelor of Media Studies students.

In this unit, the scope and techniques of writing for multimedia are described and explained, both generally and with special reference to business, educational and reference publications. The roles and skills of the writer and editor in the new publishing media are examined, and the differences between the writing and copy-editorial styles and methods traditionally employed in print publications and those styles that are now developing for electronic publications are identified and closely studied. The interactive capabilities of the new media are considered with the expectations and needs of the end-user in mind. Case studies are analysed, focusing on Australian products and industry initiatives. Attendance at and participation in 80% of tutorials is required for students to pass this subject.

Prerequisite: 80 credit points of Media Studies subjects or enrolment in one of the following: Graduate Diploma in Media Studies – Graduate Certificate or Graduate Diploma in Creative Writing.

Quota: 20. Places will be allocated according to academic merit, on lecturer's approval and subject to confirmation.

Class requirements: One 2-hour seminar and one 1-hour tutorial each week.

Assessment: One 2000-word essay (40%), two 1000-word assignments (40%), one 1-hour take-home examination (20%)

North American studies

Program Coordinator: Dr Diane Kirkby.

Students may qualify for a degree with a major in North American studies by completing at least 130 credit points, including 30 credit points at first year level, 40 credit points at second year level and 60 credit points at third year level, from the units listed below. A major is made up of approved combinations of units from the disciplines of art history, cinema studies, English, history, anthropology, sociology, and politics.

Important notice: Not all of the units listed below will be available every year. See the unit lists for the specific disciplines, where units unavailable in 2008 will be noted.

Programs of study

Unit title	Unit code
First year units (15 credit points)	
Art from Rembrandt to Warhol: constructing the modern	ARH1ARW
Conquest of the Americas	HIS1CAM
Culture and Globalisation: introduction to anthropology	ANT1CAG
Economy, Environment and Human Rights: world in transition	POL1EEH
States, Nations and Security: world in transition	POL1SNS
Second or third year units (20 credit points)	
America since 1945: pop art, politics and popular culture	HIS2AWA/HIS3AWA
American Literature of the Twentieth Century	ENG2ALT/ENG3ALT
America's War in Vietnam	HIS2AWV/HIS3AWV
Civil War to Civil Rights in the USA	HIS2CWU/HIS3CWU
Hollywood Cinema	CST2CLH/CST3CLH
Contemporary World Cinema	CST2CFI/CST3CFI
Film Noir: alienation and darkness in the cinema	CST2FNO/CST3FNO
Genre Studies: the western film	CST2GES/CST3GES
International Relations: the Cold War and the great powers	POL2INR/POL3INR
Introduction to American Politics	POL2IAP/POL3IAP
Making America: from Pocahontas to Jazz and Prohibition	HIS2MAM/HIS3MAM
Melodrama and Morality	CST2MEM/CST3MEM
Native American Endurance	HIS2NAE/HIS3NAE
US Civil Rights Movement 1954-1968	HIS2UCR/HIS3UCR

A full description of these units (including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings) appears at the end of each discipline entry. For the most recent descriptions of all units, please access the unit database at www.latrobe.edu.au/udb_public.

Peace studies

Program Coordinator: Dr Thomas Weber (Politics).

Students may qualify for a degree with a major in peace studies by taking approved combinations of units. These units focus on the study of peace and violence, causes of conflict and conflict resolution. Students intending to enrol for a major in peace studies should consult the coordinator of the area.

Programs of study

Students who wish to qualify for a degree by taking a major in peace studies must normally complete 130 credit points from those listed below, including the core unit POL2PAC/POL3PAC Peace and Change. Units other than those listed may be available for the major, by agreement with the coordinator of the area. At least 40 credit points of the 130 credit points must be at second year level and at least 60 credit points must be at third year level.

Important notice: Not all of the units listed below will be available every year. See the unit lists for the specific disciplines, where units unavailable in 2008 will be noted.

First year units

Students are advised to take POL1SNS States, Nations, and Security: World in Transition and POL1EEH Economy, Environment and Human Rights: World in Transition (see Politics entry) although any other first year units in politics, legal studies, sociology, history, or philosophy are acceptable. In choosing first year units, students should note the prerequisites for units which they plan to take at second and third year levels.

Second or third year units (20 credit points)

Unit title	Unit code
America's War in Vietnam: culture and politics	HIS2AW/HIS3AWV
Political Change and Development in the Third World	POL2DDA/POL3DDA
Development, Globalisation and Culture	ANT2DGC/ANT3DGC
Ecological Philosophies	PHI2ECP/PHI3ECP
Ethnic and Civil Conflict in Southern Europe and Cyprus	EST2ECC/EST3ECC
Genocides and the Holocaust: Europe, Asia, Africa	HIS2GAH/HIS3GAH
Human Rights Law	LAW2HRL
International Law and International Organisations	POL2ILO/POL3ILO
International Relations of the Middle East	POL2IME/POL3IME
International Relations: the Cold War and the great powers	POL2INR/POL3INR
Peace and Change ²	POL2PAC/POL3PAC
Peasants and Politics in Latin America	HIS2PPL/HIS3PPL
Philosophy of War and Peace	PHI2WAP/PHI3WAP
Politics of Non-violent Activism	POL2PNV/POL3PNV
Public International Law	LAW2PIL
Reconciliation	POL2REC/POL3REC
South-East Asian Politics: change and conflict	POL2SEA/POL3SEA
Theories of World Politics	POL2TWP/POL3TWP
Other units may be available, by agreement with the Program Coordinator.	

Key: ² Core unit.

A full description of these units (including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings) appears at the end of each discipline entry. For the most recent descriptions of all units, please access the unit database at www.latrobe.edu.au/udb_public.

Philosophy

Program Coordinator: Professor Andrew Brennan.

Philosophy is fun, useful, and as unavoidable as falling in love. It explores the fundamental questions that everyone asks some time or other. If you have ever been puzzled about why some actions are right and others are wrong, or about what makes belief in gravity more sensible than belief in Santa Claus, then you have already asked philosophical questions. Because complex and big questions often have more than one answer, philosophy is helpful to you no matter what your main area of study is. Whether your interests lie in history, psychology, biology, politics, literature, drama, computing, religion, media studies, or health sciences, you will find something in philosophy that is relevant, useful, and challenging.

By taking philosophy, you learn to think rationally, creatively and fairly about the problems that face human beings and the contemporary world. If you think your writing and analytical skills need to be improved, then there are units in critical thinking and logic that will develop your abilities in these areas. If you are interested in how the modern scientific worldview emerged, you can take introductory units in astronomy, biology, and philosophy. If you want to learn about human freedom, values, and God, then there are comprehensive introductory units on these topics. All these areas are also studies in detail at second and third year levels.

Programs of study

Students in the Faculty of Humanities and Social Sciences and in the disciplines of biological sciences and mathematical and statistical sciences may take a major in philosophy. In humanities and social sciences, philosophy units totalling up to 205 credit points may be taken. Students in other faculties should consult their own faculty's entry requirements, or their advisers of studies, to discover which units are available to them and in what degree combinations. It is possible to take some philosophy units in the third year of a course

without having taken any in the second year. Students qualifying for a degree by taking a major in philosophy must take at least 130 credit points, 40 credit points of which must be at second year level and 60 credit points of which must be at third year level or creditable as such. Up to 60 credit points of logic, units can be credited towards such a major. Certain other non-philosophy units, listed at the end of this section, may be credited up to a total of 40 credit points in a major. Enquiries concerning the crediting of such units should be made to the Philosophy Program Coordinator.

Teaching period	Unit title	Unit code
First year units (15 credit points)		
TE-SEM-1	Astronomy and Philosophy	PHI1AAP

LIN2SYN/LIN3SYN

Honours

Enquiries regarding the honours program are welcome from students at any time after completion of their first year. Students considering honours are strongly advised to consult the coordinator to plan a suitable major. Information about honours is available from the program office and the program website.

To be admitted to the honours year in philosophy, students are normally required to have taken at least a 130-credit point major in philosophy, have obtained at least a B average in their philosophy units (students who do not have a B average should consult the Honours Coordinator and may still be considered for admission) and have taken such units in their second and third years as will enable them to fulfil the prerequisites of at least three of the honours components offered. In addition to these requirements, students are strongly advised to have included in their second and third year units at least 20 credit points in each of the following areas: logic, ethics or political philosophy, epistemology and metaphysics, and philosophy of science. Any difficulties or queries should be referred to the Honours Coordinator.

Philosophy 4

Honours students enrol in Philosophy 4, which consists of three of the fourth year components plus an honours seminar and a research essay on an approved topic.

Information about the fourth year components is available from the Honours Coordinator. Students who are especially keen to take a given component and who have not fulfilled the prerequisites should consult the lecturer who may in certain circumstances waive the prerequisite, possibly setting additional vacation work in its place.

Class requirements

Classes in each component run as two hour weekly semester-length seminars.

Assessment

In general, students have the option of being assessed by examination, by essays and/or exercises, or by a combination of these. Compulsory examinations may sometimes be introduced and students concerned about this should consult the Honours Coordinator at the time of enrolment.

Research essay

An honours student is required to write a research essay on an approved topic. Students are encouraged to commence work on this topic during the long vacation. The research essay must be of 12500 to 15000 words and it is worth 50% of the final assessment. Full details regarding final deadlines for submission, presentation requirements, etc. are available from the Honours Coordinator.

Honours seminar

Honours students are required to attend a regular honours seminar to discuss questions related to long essay topics and articles and papers of general philosophical interest.

Selection of components and approval of thesis topic

Students enrolling for fourth year must see the Honours Coordinator to arrange the selection of their course components, to have their thesis topic approved, and to be assigned to a supervisor. The coordinator is available as an adviser of studies to honours (and potential honours) students. Any student at any level who is considering an honours course will find it useful to consult with the Honours Coordinator.

A full description of these units (including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings) appears at the end of each discipline entry. A full description of PHI units appears below. For the most recent descriptions of all units, please access the unit database at www.latrobe.edu.au/udb_public.

UNIT DESCRIPTIONS**PHI1AAP ASTRONOMY AND PHILOSOPHY** (15. CPs Sem. TE-SEM-1 BU.)

Mr John Fox

Science and technology are essential parts of contemporary human existence. No matter what your political or ethical perspective, your religion or worldview, it seems that nobody wants to be labelled as 'un-scientific'. Yet, few of us understand exactly what it is to be scientific. For example, what makes astronomy different from astrology? In this unit, we examine the development, and identify the essential characteristics, of the much valued but taken for granted modern scientific approach. We will look at a large range of ideas about the stars and the planets, and trace the advance to Newtonian physics from pre-scientific myths about the universe. When you take this unit, you will also get a chance to use astronomical instruments to observe 'heavenly bodies'! This unit forms a solid introduction to philosophy in general and to the history and philosophy of science in particular. No prior scientific study is presupposed.

Incompatible unit: PHI2HPA

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 1,200-word essay (30%), one 1-hour test (20%), one 1-hour examination (30%), weekly short answer exercises (800 words equivalent) (20%)

Prescribed Reading:

Kuhn, T. *The Copernican revolution* Harvard 1978

PHI1BAP BIOLOGY AND PHILOSOPHY (15. CPs Sem. TE-SEM-2 BU.)

Mr John Fox

Over most of history, nothing could be seen of what happened between sex and childbirth. Does all reproduction involve two sexes? How did knowledge about all this develop? In this unit we study these and connected questions, from early myths to the time of Darwin. We also consider what counts as science, through the ideas of Karl Popper, Imre Lakatos, and Thomas Kuhn. We study how over a long time what we now see as sound scientific theory, argument, and methodology developed together, and how fallible are the best guesses of any given epoch. This unit forms a solid introduction to philosophy in general and to the history and philosophy of science in particular. No prior scientific study is presupposed.

Incompatible unit: PHI2HPB

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Six short answer assignments (25%), one 2000-word essay (50%), one 1-hour examination (25%)

Prescribed Reading:

Gasking, E. *Investigations into generation 1651-1828*, Hutchinson 1967

PHI1CRT CRITICAL THINKING (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 AW, BU, ML.)

Dr Norva Y.S. Lo

PHI1CRT semester two is taught entirely on-line. There will be one 90-minute mediated on-line discussion per week plus learning activities as specified on-line (equivalent to 90-minutes attendance per week). For more information contact the unit coordinator or visit www.latrobe.edu.au/philosophy/resources_ug/handout_crt.html.

Thinking and reasoning are essential components of human life. Nevertheless, much of our thinking and reasoning is biased, distorted, and uninformed. Yet the quality of our life and that of what we produce, make, or build depends precisely on the quality of our thoughts and reasons. In this unit, you will learn how to reason well, to think clearly and independently, and to engage fairly with others in discussions and debates. Many students find the experience gained in this unit immensely valuable, both within the university and later in employment whatever their subsequent areas of specialization.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 3-hour examination (55%), three short exercises (2000-words equivalent) (45%)

Prescribed Reading:

Phillips, R. and Oakley, T. *Reason and argument* Monash 1996.

PHI1FMV FREEDOM, MIND AND HUMAN NATURE (15 CPs Sem. TE-SEM-1 AW, BU.) *Dr Toulia Nicolacopoulos*

In this unit, we explore three big questions: what am I? Am I free to make choices? How should justice figure in my life? We turn to Rene Descartes whose work is famously linked to the origins of the Enlightenment project. He ascribes to humans very special powers of mind on which we base a scientific understanding of the world. This raises questions about our relationship to deterministic physical reality. Are we as much slaves of physical causes and effects as other things in the universe? Might a genius at physics or a smart computer predict all our behaviours? If so, can we be said to be free? We address this intriguing question in the second part of the unit. The idea that we are self-directing and should live free of others' unjust interferences is central to western liberal democracies. What do we mean by 'justice'? The final part of the unit focuses on some major western thinkers like Mill, Marx, and Foucault to ask whether our human nature makes justice a universal value.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: one 550-word essay (15%), one 1,200-word essay (30%), one 1-hour essay exam (30%), one 1-hour short answer exam (20%), one 250-word exercise (5%)

Preliminary Reading:

PHI1TAS EXISTENCE, VALUE AND GOD (15 CPs Sem. TE-SEM-2 AW, BU.)

Dr Philipa Rothfield

Dostoevsky famously wrote, 'If God does not exist, then everything is permitted'. What are we to make of this? Jean-Paul Sartre stated that we are abandoned in the sense that there is no God to tell us what to do. Humans create their own sense of right and wrong through their actions, through exercising an inherent freedom. Some ethical theories would dispute this, suggesting that notions of right and wrong have an objective status independent of individuals. Upbringing or cultural background. Can we even ask these questions without determining whether there is a God who oversees issues of right and wrong, good and evil? In this unit, we will progress from questions of life and freedom, towards ethical responsibility, and the ultimate issue of whether or not God exists.

Class requirements: Two 2-hour lectures and one 1-hour tutorial per week.

Assessment: One 1,200-word essay (30%), one 800-word essay (20%), one 1-hour examination (30%), one 1-hour short answer exam (20%)

Not available in 2008

PHI2ECP ECOLOGICAL PHILOSOPHIES (20 CPs Sem. TE-SEM-2 BU.) *Dr*

Janna Thompson, Dr Norva Y S Lo

This unit is offered at third year level also.

Students identify the conceptions of nature that underpin modern industrial civilisation and explore their implications for contemporary attitudes to the environment. Ranges of ecological philosophies that

offer biocentric alternatives to the environmental presuppositions of modernity are canvassed. These ecological philosophies – which include deep ecology, ecofeminism, the land ethic, animal ethics, ecophenomenology, and bioregionalism – are compared with the nature philosophies emanating from Aboriginal Australia and the Taoist tradition of ancient China. The discussions are general in scope but also contextualised to the Australian environment. This is a core unit for the Environmental Enquiry major. Prescribed readings are available on the internet.

Prerequisite: 30 credit points of first year philosophy or coordinator's approval.

Class requirements: One 3-hour seminar per week.

Assessment: One 2500-word essay (45%), one 2000-word essay (40%), one forum presentation (15%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

Preliminary Reading:

PHI2HPA HISTORY AND PHILOSOPHY OF SCIENCE A (20. CPs Sem. TE-

SEM-1 BU.) *Mr John Fox*

Not available to students enrolled in the Faculty of Humanities and Social Sciences

This unit is designed to provide a second year entry point to philosophical study for students from faculties other than Humanities and Social Sciences. It should be of particular interest to Science students. The lectures and core syllabus are as for PHI1AAP.

Prerequisite: Any two units from any Faculty.

Incompatible unit: PHI1AAP

Class requirements: Two 1-hour lecture and one 1-hour tutorial per week.

Assessment: one 1-hour short answer test (20%), one 1-hour examination (30%), weekly short answer exercises (1000 words equivalent) (20%), one 2000-word essay (30%)

Prescribed Reading:

Kuhn, T.S. *The Copernican revolution*, Harvard UP 1978

PHI2HPB HISTORY AND PHILOSOPHY OF SCIENCE B (20. CPs Sem. TE-

SEM-2 BU.) *Mr John Fox*

Not available to students enrolled in the Faculty of Humanities and Social Sciences.

In this unit we study the development of human ideas about how biological reproduction takes place, up to the time of Darwin and on how ideas of counts as good evidence and good explanation developed too. We will also consider what counts as science, and as rational change of belief; on this we will look at the ideas of e.g., Karl Popper, Imre Lakatos, and Thomas Kuhn. PHI2HPA is not presupposed, but does form with this course a good introduction at second year level to the history and the philosophy of science and to philosophy generally. The lectures and core syllabus are as for PHI1BAP.

Prerequisite: Any two units from any Faculty.

Incompatible unit: PHI1BAP

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Six short answer assignments (1500-words equivalent) (30%), one 2500-word essay (50%), one 1-hour examination (20%)

Prescribed Reading:

Gasking, E. *Investigations into generation 1651-1828*, Hutchinson 1967

PHI2HUR HUMAN RIGHTS: FUNDAMENTAL ISSUES (20 CPs Sem. TE-SEM-1 BU, AW.) *Dr Janna Thompson*

This unit is offered at third year level also.

In this unit, we examine the philosophical issues raised by human rights. In the first part we look at the theory of rights and consider what sort of thing a right is; what it means to claim one's rights and have them protected; whether they should be justified by an appeal to agency, basic needs or human flourishing; and whether they can be adopted by people of non-Western cultures. In the second part of the unit we examine the meaning, justification and application of particular rights claims and consider what rights ought to be regarded as basic and whether some appeals to rights can be dismissed as illegitimate. We will investigate the controversies over the meaning of particular rights such as the right to liberty, free speech, privacy and the right to subsistence. We will discuss communitarian and feminist criticisms of human rights and problems of applying theories of rights to minority or disadvantaged groups.

Prerequisite: Any first year philosophy unit.

Class requirements: One 2-hour lecture/seminar and one 1-hour tutorial per week.

Assessment: One 2000-word essay (40%), one 2500-word essay (50%), one 500-word tutorial assignment (10%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

Preliminary Reading:

Waldron, J (Ed) *Theories of rights* Oxford University Press 1984.

PHI2LDM LOVE, DESIRE, AND THE MASTER-SLAVE DIALECTIC (20 CPs Sem. TE-SEM-1 BU.) *Dr Jack Reynolds, Dr George Vassilacopoulos*
This unit is offered at third year level also.

Beginning with Hegel, we will consider the master-slave dialectic and the conflicting account of relations with other people that it describes. We will then consider the Nietzschean adaptation of this position in his account of slave morality and resentment, before tracing the heritage of these two ideas (one ontological, the other 'moral') through their twentieth century developments in psychoanalysis (Lacan), existentialism (Sartre, de Beauvoir, and Merleau-Ponty), and in the (post)phenomenological work of Levinas, Deleuze, and Derrida. Themes to be considered include love, desire, hatred, friendship, shame, Bad Faith, authenticity, sadism, masochism, as well as solipsism (how can we know that other people exist?) and ontology. Ultimately we will seek to establish whether or not Sartre was right to describe love as a 'ruse', and relations with other people as 'hell', or whether we might still find merit in a Hegelian concept of love as the experience of a unity of one with another.

Prerequisite: 30 credit points of humanities and social science units.

Class requirements: One 2-hour seminar and one 1-hour tutorial per week.

Assessment: One 2500-word essay (50%) Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students, one 2500-word essay (50%)

Recommended Reading:

Sinnerbrink, R. *Understanding Hegelianism* Acumen 2007

PHI2LMU LANGUAGE, MEANING AND UNDERSTANDING (20. CPs Sem. TE-SEM-1 BU.) *Professor Andrew Brennan*

This unit is offered at third year level also.

In this unit students explore the nature of meaning and understanding

as well as raising topics of their own intrinsic interest. The study of language in this unit is expected to be of interest to anyone studying other areas of philosophy, especially thought relating to the human mind and its workings, and to the nature of reality. Topics studied include the nature of meaning; the relation of words and ideas; truth; whether language constrains the way we think and even what we believe; Wittgenstein's 'private language argument'; language of social interaction; Quine's indeterminacy of translation thesis; Quine's attack on the concept of meaning and necessity; and metaphor. These issues are central to 20th-century philosophy.

Prerequisite: 15 credit points of philosophy, logic, or linguistics.

Knowledge of linguistics is not presupposed.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 2000-word essay (40%), one 1.5-hour examination.

(35%), one 250-word exercise (5%), one 1,250-word essay (20%).

Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

This unit is offered at third year level also.

Not available in 2008

PHI2PAM PLATO AND THE MEANING OF BEING (20 CPs Sem. TE-SEM-2 AW, BU.) *Dr George Vassilacopoulos, Dr Toulia Nicolacopoulos*

This unit is offered at third year level also.

It has been said that all western philosophy is a footnote to Plato. In his masterpiece, *The Republic*, Plato addresses some of the most fundamental questions of human existence: what is it to be? What is the place of human beings in the world? What does it mean to know? What is the nature of reality? Surprisingly, Plato's strategy is to invite us to participate, along with his teacher Socrates, in a thought experiment aimed at designing a just society. In the process of asking what justice is we discover answers to the meaning and conditions of our being in the cosmos. In this unit we will follow Plato's philosophical journey and trace some connections between his ideas, contemporary feminist thought and the philosophies of Hegel, Heidegger and Derrida.

Prerequisites: 30 credit points of philosophy

Class Requirements: One 2-hour seminar and one 1-hour tutorial per week.

Assessment: One 2500-word essay (50%), one 2500-word essay or one 2.5-hour examination (50%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

Prescribed Reading:

Plato *The republic* Any edition.

PHI2PMP POSTMODERNISM: METAPHYSICS, POLITICS (20 CPs Sem. TE-SEM-2 BU.) *Dr Philipa Rothfield, Dr Jack Reynolds*

This unit is offered at third year level also.

Is reason outdated, a relic of outmoded Enlightenment thinking? Are we now dubious about philosophical claims to universal knowledge, and political promises of emancipation and human progress? Many postmodernists argue that rationality cannot fulfil its initial promise and suggest that we need to rethink our approach towards questions concerning knowledge, subjectivity, and politics. The aim of this unit is to review postmodernism, to acquaint students with the thought of Lyotard, Deleuze, Derrida, and Foucault, on their own terms, and in relation to questions of postcolonial politics. To that end, students will also discuss a selection of writings from R. Radhakrishnan, Homi Bhaba, Gayatri Spivak, Trinh Minh-ha, and Edward Said.

Prerequisite: Any philosophy subject.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2500-word essay (50%), one 2.5-hour examination or one 2500-word essay (50%). Third year students will be expected

to show a greater achievement of discipline-specific skills in their written work than second year students.

PHI2PSA PHILOSOPHY OF SCIENCE A (20. CPs Sem. TE-SEM-1 BU.) *Mr John Fox*

This unit is offered at third year level also.

Since the 17th century, thinkers have been impressed with the consensus, progress, and certainty displayed in mathematics and the physical sciences. Many were inspired to study their methods, in the hope of achieving similarly impressive results in all other areas; this 'philosophy of science' was a large part of the humanist vision of the enlightenment. The dominant picture was broadly positivistic, emphasizing the logical and empirical character of mathematical and scientific beliefs. However, developments in science and philosophy have seriously challenged not only the positivist picture but also the enlightenment vision. In this unit, we will study the rise of this philosophy, the reasons for its difficulties, and whether it can be salvaged and improved. Among 20th century figures studied will be Duhem, Hempel, Popper, Kuhn, Lakatos and Feyerabend.

Class requirements: One 3-hour seminar per week.

Assessment: One 2500-word essay (50%), one 2500-word essay or one 2.5-hour examination (50%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

PHI2WAP PHILOSOPHY OF WAR AND PEACE (20. CPs Sem. TE-SEM-2 BU.) *Mr John Fox*

This unit is offered at third year level also.

In this unit students examine questions of morality as they apply to war and peace. A variety of 'just war theories' will be considered. Are wars of aggression or pre-emption permissible? How certain must the grounds for war be? May civilians ever be targeted? Is collateral damage ever acceptable, and do intentions matter in this regard? Further topics include propaganda, revolutionary wars and wars of national liberation, terrorism, kinds of weapon, threats and deterrence. We will also consider the case for and against pacifism, Gandhi's philosophy of non-violence, and other solutions to problems that war has been used to address.

Prerequisite: Any first year philosophy or politics subject.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 2500-word essay (50%), one 2500-word essay or one 2.5-hour examination (50%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

PHI3RCA READING COURSE A (20. CPs Sem. TE-SEM-1 BU.) *Dr Ross*

Brady

A limited number of students may be permitted by the coordinator to undertake a research project on a subject of their own choosing, provided there is no substantial overlap between that subject and the subject matter of an existing unit. They will work on the project under the supervision of a member of staff throughout the semester. Students may not enrol in this unit without the permission of the coordinator, to whom they should apply in December. Students who are not in the third year of a philosophy sequence or major normally are not considered. Approval of an application depends on the student's past academic record, tutors' reports, the outline of the intended project and the availability of a member of staff to supervise the project.

Incompatible unit: Students may take a maximum of 40 credit points of philosophy reading courses towards their degree.

Class requirements: Supervision sessions and other requirements throughout the semester as arranged for each individual student.

Assessment: Essay (s) or a research report, as arranged for each individual student.

Politics

Program Coordinator: Professor Dennis Altman.

By its nature, politics is an argumentative discipline. Students of politics look at how power is used in different systems of government, at the way states relate to one another in the international system and at the relationships between local, national and global institutions.

Politics compares the various institutions, processes, beliefs and cultures that societies have developed for settling conflict, ordering priorities and distributing wealth. Students must weigh up competing accounts of what actually happens as well as competing accounts of what ought to happen. The study of politics may be illuminated by knowledge drawn from other disciplines such as anthropology, economics, history, sociology, law, psychology and philosophy.

Politics units are available to students enrolled in any faculty. The number of units that may be taken depends on the rules of the degree for which a student is enrolled.

Programs of study

Students who wish to satisfy the degree requirements by taking a major in politics must take 130 credit points of politics, of which at least 60 credit points must be at third year level. Potential honours students must include POL3POK Politics of Knowledge and/or

POL3HON Politics of the Twentieth Century and must have passed 130 credit points of politics or other appropriate units. Potential honours students are also strongly encouraged to take POL2HMP/POL3HMP History of Modern Political Thought. All units are offered subject to the availability of appropriate staffing and minimum enrolments.

Teaching period	Unit title	Unit code
First year units (15 credit points)		
TE-SEM-1	Australian Politics: government and society	POL1AUP
TE-SEM-1	Introduction to Asia: Japan and Indonesia	AST1IJI
TE-SEM-1	States, Nations and Security: world in transition	POL1SNS
TE-SEM-2	Economy, Environment and Human Rights: world in transition	POL1EEH
TE-SEM-2	Introduction to Asia: China and India	AST1ICI
TE-SEM-2	Representation and Participation in Australian Politics	POL1RAP
Second year units (20 credit points)		
TE-SEM-1	International Public Policy ²	POL2IPP
Second or third year units (20 credit points)		
TE-SEM-1	Contemporary Australian Politics	POL2CAP/POL3CAP
TE-SEM-1	Crises in South Asia: Weapons, Women, Well-being	POL2CSA/POL3CSA
TE-SEM-1	Critical Social Policy ¹	SOC2CSP/SOC3CSP

TE-SEM-2	Politics of the Twentieth Century	POL3HON
TE-SEM-2	Professional Competence – transition to the workplace ²	POL3PCW

Key: ¹ Not available in 2008.

² Available only to Bachelor of International Relations students.

³ New unit.

Specialised politics streams

Students wishing to construct a major around a particular interest or focus should consider the lists of units in the entries on Australian studies, the Bachelor of International Relations, the Bachelor of Social Sciences and the Bachelor of International Development elsewhere in this *Handbook*.

In choosing from politics units offered at second and third year level, students are recommended to attempt the following units at second year level, before other, more specialised units.

Unit title	Unit code
Australian Political Culture	POL2APC/POL3APC
Introduction to American Politics	POL2IAP/POL3IAP
International Relations: the Cold War and the great powers	POL2INR/POL3INR
Australian Foreign Policy	POL2AAW/POL3AAW
Nations and States	POL2NAS/POL3NAS

Honours

The School welcomes enquiries about honours. These may be directed to the Program Convenor or the Honours Coordinator. Honours students normally take at least 100 credit points in politics at second and third year levels, of which at least 60 credit points must be taken at third year level. In the third year, their enrolment must include POL3POK Politics of Knowledge and/or POL3HON Politics in the Twentieth Century, with admission to these units dependent on the achievement of good results in first and second years. Students who achieve sufficiently high results during their first three years and who have completed the requirements for a pass degree may be admitted to the fourth or honours year. The fourth year is intended to give students the opportunity to pursue their interests more deeply, through both unit work and a research thesis.

A list of fourth year units with full descriptions is available from the Politics Office; not all units are necessarily available every year. It should be noted that while these are semester-length units and taught in first semester, the commitment for honours students is for the full year, with their theses being researched and written throughout the year. Students must take two units from the list supplied or from seminars offered in sociology and anthropology. The fourth year thesis should be 12000 to 15000 words in length. Topics are to be approved after consultation with members of the Politics Program. A full description of these units (including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings) appears at the end of each discipline entry. A full description of POL units appears below. For the most recent descriptions of all units, please access the unit database at www.latrobe.edu.au/udb_public.

UNIT DESCRIPTIONS

POL1AUP AUSTRALIAN POLITICS: GOVERNMENT AND SOCIETY (15. CPs Sem. TE-SEM-1 BU.) *Dr Gwenda Tavan*

Students are introduced to the major institutions and processes of the Australian political system: the constitutional framework, federalism, the High Court, electoral system, parliament and executive government, and the party system. These are presented within the contexts of the historical development of the institutions of responsible parliamentary government and liberal democratic values and political systems.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 1000-word short assignment (25%), one 2000-word essay (50%), one 1-hour examination (25%)

Prescribed Reading:

Parkin, A., Summers, J. and Woodward, D. *Government, politics and power in Australia* 8th edn. Pearson 2006

Recommended Reading:

Maddox, G. *Australian democracy in theory and practice*, 5th edn. Longman 2005
Singleton, G. Aitkin, D. Jinks, B. and Warhurst, J. *Australian political institutions*, 8th edn. Prentice Hall 2006

POL1EEH ECONOMY, ENVIRONMENT AND HUMAN RIGHTS: WORLD IN TRANSITION (15. CPs Sem. TE-SEM-2 BU.) *Professor Joseph Camilleri*

This introduction to politics is set in the context of a rapidly globalising world and covers the effects of technological, economic and political change on international relations, including the organisation of the world economy. The roles of the industrialised West, the newly industrialising economies and the less developed economies are examined. Particular attention is drawn to such issues as economic growth, trade, the debt crisis, the role of transnational corporations and international organisations, environment, human rights and gender.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 400-word exercise (15%), one 1,200-word essay (35%), one 2-hour examination (40%), tutorial exercises (400-words equivalent) (10%)

Recommended Reading:

Synott, J. *Global and international studies: transdisciplinary perspectives* Social Science Press 2004

Baylis, J. and Smith, S. *The globalization of world politics*, 3rd edn. Oxford University Press 2005

Kegley, C. W. and Wittkopf, E. R. *World politics: trend and transformation* 9th edn. St Martins/Macmillan 2003.

POL1RAP REPRESENTATION AND PARTICIPATION IN AUSTRALIAN POLITICS (15 CPs Sem. TE-SEM-2 BU.) *Professor Judith Brett, Dr Gwenda Tavan*

Just how representative are Australia's political institutions? Moreover, what do we mean by representation anyway? Who participates in politics, and why? This subject focuses on the processes of representation and participation in Australian politics. Topics to be covered include the history and current performance of the major and minor political parties; the role of pressure and interest groups and of non-institutional forms of political action such as social movements; reasons for and forms of political activism; the representative functions of leadership; and the emergence of new forms of political participation in e-politics.

Class requirements: Two 1-hour lectures and one 1-hour tutorial.

Assessment: One 800-word assignment (15%), one 2000-word essay (50%), one 1-hour final examination (30%), tutorial assignments and quizzes (5%)

Prescribed Reading:

Parkin, A., Summers, J. & Woodward, D. *Government, politics, power and policy in Australia* 8th edn. Longman 2006

POL1SNS STATES, NATIONS AND SECURITY: WORLD IN TRANSITION (15. CPs Sem. TE-SEM-1 BU.) *Dr Anthony Jarvis*

This introduction to politics is set in the context of a rapidly changing world and covers the concepts of power, authority, legitimacy and political obligations, including the history and nature of the modern state, the theory and practice of state sovereignty and their implications for international society, security, conflict and peace and world society.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 1500-word essay (35%), one 1.5-hour examination (40%), one 1000-word essay (25%)

Preliminary Reading:

Hastedt, G and Knickrehm, K *International politics in a changing world* Longman 2003

Nossal, K. *The patterns of world politics* Prentice Hall 1998

Brown, C. and Ainley, K. *Understanding international relations* 3rd edn Palgrave/Macmillan 2005

Kegley, C. and Wittkopf, E. R. *World politics: trends and transformation*, 11th edn St Martin's Press/Macmillan 2007

POL2AAW AUSTRALIAN FOREIGN POLICY (20. CPs Sem. TE-SEM-2 BU.)

Dr Michael O'Keefe

This unit is offered at third year level also.

In this unit, we survey the development of Australian foreign policy. We begin with an historical overview of foreign policy, highlighting the core concepts and themes required to interpret and evaluate the conduct of foreign affairs. We then survey the key issues in foreign policy-making and Australia's major foreign relations. Issues include strategic culture, internationalism and dependence on 'great and powerful friends'. Relationships covered include the United States, Indonesia and the South Pacific. We conclude with an appraisal of recent opportunities and challenges, successes and failures, such as interventions in the South Pacific and active participation in the 'war of terror'.

Prerequisite: 30 credit points of first year politics, or AST1IJI and AST1ICI, or unit coordinator's approval.

Class requirements: One 1.5-hour lecture and one 1.5-hour tutorial per week.

Assessment: One 2500-word essay (50%), one 2.5-hour examination (50%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students

Prescribed Reading:

Cotton, J. and Ravenhill, J. (Eds) *Trading on alliance security: Australia in world affairs*, Oxford UP 2007

POL2APC AUSTRALIAN POLITICAL CULTURE (20 CPs Sem. TE-SEM-2 BU.)

Dr John Hirst, Professor Robert Manne

This unit is offered at third year level also.

In this unit students consider the development and nature of the Australian political culture during the nineteenth and twentieth centuries. They examine the political assumptions of the British settlers on their arrival in Australia; the evolving relations between these settlers and the indigenous peoples; the emergence of colonial self-government; the struggles and eventual success of the federation movement; the creation of a distinctive form of social contract, known as the Australian Settlement; Australia's relationship with Britain and the Empire from the First to the Second World War; and the role of the governments of Menzies, Whitlam, Hawke, Keating and Howard in the evolution of the Australian political culture. During this unit, students will become familiar with some of the central debates about Australian political development and with some of the writings that helped shape national political identity.

Prerequisite: 30 credit points of first year politics or history, or AST1IJI and AST1ICI, or unit coordinator's approval.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 3000-word essay (60%), one 2-hour examination (40%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Recommended Reading:

POL2CAP CONTEMPORARY AUSTRALIAN POLITICS AND PUBLIC

POLICY (20 CPs Sem. TE-SEM-1 AW, BU.) *Professor Judith Brett*

This unit is offered at third year level also.

In this unit, we focus on Australian politics and public policy since 1983, in particular the issues arising from changed ideas about the role of government and radical changes to the organisation of the economy. Topics covered will include the restructuring of the Australian economy; employment policy and welfare reform; the varying fates of the parties; the reform of the public sector and the new public management; regional and rural politics; federalism; and environmental politics. Tutorials and assessment focus on the development of skills in the research and analysis of policy issues and conflicts in contemporary Australian politics. While not all students will have done POL1RAP or POL1AUP, prior knowledge of the institutional structure of Australian politics is assumed. This unit is recommended for Honours students intending to research an Australian topic for their Honours thesis.

Prerequisite: 30 credit points from first year politics, AST1IJI, AST1ICI, or unit coordinator's approval.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 1500-word research assignment (30%), one 2000-word research essay (40%), one 1.5-hour examination (30%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students

Preliminary Reading:

POL2CSA CRISES IN SOUTH ASIA: WEAPONS, WOMEN, WELL-BEING

(20 CPs Sem. TE-SEM-1 BU.) *Dr Damien Bailey*

This unit is offered at third year level also.

In the context of India and Pakistan (South Asia), students are invited to consider three great issues of our time: nuclear weapons and the threat of war, the role of women in building prosperous societies and the effects of disease and environmental degradation on people's well-being.

Prerequisite: 30 credit points from first year politics, AST1IJI, AST1ICI, or unit coordinator's approval.

Class requirements: Two 1-hour lectures each week and one 2-hour workshop each fortnight.

Assessment: One 500-word short assignment (15%), 5 workshop quizzes (15%), one 1500-word essay (35%), one 2-hour examination (35%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Preliminary Reading:

Ghosh, A. *Countdown* Ravi Dayal 1999

Roy, A. *The cost of living* HarperCollins 1999

Varma, P. *The great Indian middle class* Penguin 1998

POL2DDA POLITICAL CHANGE AND DEVELOPMENT IN THE THIRD

WORLD (20 CPs Sem. TE-SEM-1 BU.) *Dr Michael Connors*

This unit is offered at third year level also.

In this unit, students are introduced to different approaches to Third World politics. Focusing on the theme of democratisation, students examine how different theorists have attempted to understand the processes of political change and development in the Third World. Topics include the nature of the state in developing countries; the role of culture in political change; the role of the military; how international factors shape political change and development; and the contested nature of democratic transition.

Class requirements: One 2-hour lecture and one 1-hour tutorial/workshop per week.

Assessment: One 1000-word democracy and development indices exercise (20%), one 3000-word research essay (60%), one 1-hour examination (20%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

POL2EIR ETHICS AND INTERNATIONAL RELATIONS (20 CPs Sem. TE-

SEM-1 BU.) *To be advised*

This unit is offered at third year level also. Not available in 2008

POL2HMP HISTORY OF MODERN POLITICAL THOUGHT (20 CPs Sem.

TE-SEM-2 BU.) *Dr Damien Bailey*

This unit is offered at third year level also.

In this unit students examine the writings of some important and influential modern political thinkers between the seventeenth and nineteenth centuries. Political theorists to be studied include the social contract theorists (Hobbes, Locke, Rousseau) and the two very different responses to nineteenth-century capitalism and the new era of mass politics embodied in the works of J. S. Mill and Karl Marx. Students are enabled to place some of the canonical texts of the Western tradition in their historical and political context. They also consider some general and thematic questions, to do with women in Western political thought and the notion that natural science should serve as a paradigm for political thinking, among others.

Prerequisite: 30 credit points of first year politics, or AST1IJI and AST1ICI, or unit coordinator's approval.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2-hour examination (40%), one 1500-word essay (30%), one 1500-word essay (30%). Third year students will be

expected to show a greater achievement of discipline specific skills in their written work than second year students.

Recommended Reading:

POL2IAP INTRODUCTION TO AMERICAN POLITICS (20. CPs Sem. TE-SEM-1 BU.) *Professor Dennis Altman*

This unit is offered at third year level also.

In this unit, students are introduced to the government and politics of the United States and engage in discussion of the institutions, political culture and recent history of the country. There is some concentration on recent events and the implications for American politics, and the changing role of the United States in the world. Students are encouraged to link current politics to American films, novels and music.

Prerequisite: 30 credit points of first year Politics or AST1IJI and AST1ICI, or permission of the unit coordinator.

Class requirements: One 1.5-hour lecture and one 1.5-hour tutorial per week.

Assessment: One 2000-word essay (40%), one 1000-word tutorial paper (10%), one 2-hour examination (50%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

POL2ILO INTERNATIONAL LAW AND INTERNATIONAL ORGANISATION

(20. CPs Sem. TE-SEM-1 BU.) *Professor Joseph Camilleri, Dr Anthony Jarvis*

This unit is offered at third year level also.

In an increasingly interdependent world, international law and international organisation are playing an important part in regulating human activity, both within and between states. In this unit students examine this trend, and its implications for the theory and practice of state sovereignty. The trend is then considered with reference to developments in international law and organisation since 1945. Special attention is directed to the law of the sea, international environmental law, war and international law, international humanitarian law, migration and refugees, and world trade. In each of these areas, emphasis is placed on the role of multilateral treaties and institutions, notably the United Nations system, although regional organisations, in particular the European Union are also considered.

Prerequisite: 30 credit points from first year politics, legal studies, AST1IJI, AST1ICI or permission of the unit coordinator.

Class requirements: One 1.5-hour lecture and one 1.5-hour seminar per week.

Assessment: One 30-minute class test (15%), one 2-hour examination (35%), one 2000-word essay (40%), class exercises (500-words equivalent) (10%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

POL2IME INTERNATIONAL RELATIONS OF THE MIDDLE EAST (20. CPs Sem. TE-SEM-2 BU.) *Dr John Chiddick*

This unit is offered at third year level also.

Not available in 2008

POL2INR INTERNATIONAL RELATIONS: THE COLD WAR AND THE GREAT POWERS (20. CPs Sem. TE-SEM-1 BU.) *Dr John Chiddick*

This unit is offered at third year level also.

In this unit, students are introduced to the history of international politics since 1945, with an emphasis on the relations between the major powers. They examine competing interpretations of the origins, development and outcome of the Cold War, and go on to consider the new pattern of international relations, which has developed since the collapse of the Soviet camp.

Prerequisite: 30 credit points of first year politics, or AST1IJI and AST1ICI, or unit coordinator's approval.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 2-hour examination (50%), one 2000-word essay (40%), one 1000-word assignment (10%). Third year students are expected to show a higher level of discipline-specific skills in their written work than second year students.

POL2IPP INTERNATIONAL PUBLIC POLICY (20 CPs Sem. TE-SEM-1 BU.)

Professor Joseph Camilleri

This subject is available only to students enrolled in the Bachelor of International Relations degree

The focus of our study in this unit is public policy in an international setting, particularly as it has developed since the Second World War. Key areas of policy to be considered may include trade, finance, science and technology, telecommunications, environment, health, migration and refugee flows, peace and security, transnational crime, and human rights. Public policy will be examined from a normative, organizational and political perspective. Particular attention will be given to the objectives, strategies, and functions of a range of actors, including states, transnational firms, knowledge communities, international governmental and non-governmental organizations.

Prerequisite: POL1SNS and POL1EEH.

Class requirements: One 3-hour lecture/seminar per week. Students will be required to write a fortnightly journal.

This unit is not available for Study Abroad students.

Assessment: One 2-hour examination (35%), one 1,750-word essay (35%), one 750-word class presentation (20%), one 30-minute class test (10%)

Recommended Reading:

POL2LAC LIBERALISM AND ITS CRITICS (20. CPs Sem. TE-SEM-2 BU.) *Dr*

Sanjay Seth

This unit is offered at third year level also.

Not available in 2008

POL2NAS NATIONS AND STATES (20. CPs Sem. TE-SEM-2 AW, BU.) *AW: Dr*

David Envall, BU: Professor Judith Brett, BU: Professor John

Fitzgerald, BU: Dr James Leibold, BU: Professor Robert Manne

This unit is offered at third year level also.

Students are introduced to fundamental questions in the study of politics. What is a state? What is a nation? What are the origins of nationalism? Students examine how state building and industrialisation have influenced the formation of national identity and how nationalist movements and international factors have influenced the formation of states. In this unit, we draw on at least two case studies, selected from European, Asian and Australian examples, and link the case studies to theoretical discussion of states and nationhood. This unit is particularly recommended for students in second year.

Prerequisite: 30 credit points from first year politics, AST1IJI, AST1ICI, or approval of the unit coordinator.

Class requirements: Two 1-hour lectures per week and one 1-hour tutorial per week.

Assessment: One 1000-word assignment (20%), one 2000-word research essay (40%), one 1.5-hour sighted examination (30%),

tutorial exercises (10%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Preliminary Reading:

POL2PAC PEACE AND CHANGE (20. CPs Sem. TE-SEM-2 BU.) *Dr Thomas Weber*

This unit is offered at third year level also.

In this unit, students are provided with an interdisciplinary survey of the major issues regarding peace and its correlates – conflict, violence and exploitation. Students critically review the ways that institutions, organisations and individuals have approached these problems. Topics covered include the causes and legacies of wars; peace actions through the World Court; peacekeeping by the United Nations and by peace groups; environmental security; Gandhian, feminist and religious approaches to war and violence; the impact of peace movements; peace actions by individuals; and conflict resolution.

Prerequisite: 30 credit points of first year politics, or AST1IJI and AST1ICI, or unit coordinator's approval.

Class requirements: One 1.5-hour lecture and one 1.5-hour seminar per week.

Assessment: One 1000-word seminar paper (20%), one 2500-word research essay (50%), one 1.5-hour examination (30%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

POL2PAE POLITICS AND THE ECONOMY (20. CPs Sem. TE-SEM-2 BU.) *Dr Leon Glezer*

This unit is offered at third year level also.

In this unit, we focus on the relationship between political processes and economic policy making in developed democratic societies. The discussion is comparative and examines distinctive approaches to the political management of economies in OECD countries, with emphasis on Australia. Topics include recent debates on the role of governments; assessments regarding the impact of markets; consequences of global economic integration; the role of economists; the influence of central banks; and the role of political parties and elections and institutional and ideological influences on economic policy choices. We discuss specific policy issues, such as developments in economic regulation, environmental policy debates, changing patterns of income distribution, taxation policies and, developments in employment and labour market policies.

Prerequisite: 30 credit points of first year politics, sociology, economics or AST1IJI or AST1ICI or permission of the unit coordinator.

Class requirements: One 1.5-hour lecture and one 1.5-hour tutorial per week.

Assessment: One 2-hour examination (45%), one 2000-word essay (40%), one 1000-word class paper (15%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students

Recommended Reading:

POL2PER THE POLITICS OF ECONOMIC REGIONS (20. CPs Sem. TE-SEM-2 BU.) *Dr Anthony Jarvis*

This unit is offered at third year level also.

In this unit, we offer an introduction to political economy and explore the impact of trading blocs, unions, communities or other forms of collective co-operation and the growing importance of the region in world politics. The political, economic and institutional dynamics of the three most significant regions, Europe, Asia-Pacific and North America, are examined. The origins and operation of the major institutional arrangements of these regions – the European Union, the Asia-Pacific Economic Co-operation grouping, and the North America Free Trade Agreement – are explained. The focus is particularly on a number of themes: the differing nature and objectives of these regional organisations; tensions within the regions especially on issues of membership, degree of integration, and objectives; tensions between the regions especially on issues of trade access, subsidy and exclusion; and the likely future development of these organizations in the context of regionalization and globalization.

Prerequisite: 30 credit points of first year politics, or AST1IJI and AST1ICI, or unit coordinator's approval.

Class requirements: One 1.5-hour lecture and one 1.5-hour seminar weekly.

Assessment: One 2000-word essay (40%), one 2-hour examination (40%), one 1000-word tutorial paper (20%). Third year students will be expected to show a greater achievement of discipline specific skill in their written work than second year students

Preliminary Reading:

POL2PNV POLITICS OF NONVIOLENT ACTIVISM (20 CPs Sem. TE-SEM-2 BU.) *Dr Thomas Weber*

This unit is offered at third year level also.

In this unit students examine the dynamics of political change that has been achieved through non-violent action. Since the non-violent revolutions in the 1980s, non-violence and non-violent action as a method of political change has become increasingly important. Students are introduced to the thought and campaigns of Mahatma Gandhi, and examine the judgement of his critics and consider his legacy. The theory of power on which most non-violent advocates base their actions, as well as the main contemporary arguments concerning the practical use of non-violence in social change activism are tackled. Does non-violent action work against social structures or only against governments and dictators? Does it work if the opponents are extremely ruthless? A critical assessment is made of the employment of non-violence in political activism in Australia and elsewhere in terms of its effectiveness.

Prerequisite: 30 credit points from first year politics or sociology or AST1IJI or AST1ICI.

Class requirements: One 1.5-hour lecture and one 1.5-hour seminar.

Assessment: One 1000-word seminar paper (20%), one 2500-word research essay (50%), one 1.5-hour examination (30%). Third year students are expected to show a higher level of discipline-specific skills in their written work than second year students.

POL2RCE REVOLUTIONS IN CENTRAL EUROPE (20 CPs Sem. TE-SEM-2 BU.) *Dr Stefan Auer*

This unit is offered at third year level also.

In this unit, we focus on the turbulent history of Central Europe after 1945. The emergence of communism and its demise both at the level of ideas and as a political system will be studied. While the primary focus will be on Czech, Hungarian, Polish and Slovak societies, the unit is relevant to Europe at large. In fact, Central Europe 'as an idea, a state of mind, a worldview' (Konrad) cannot be reduced to a geographic notion, and is better understood as a cultural and political project. We will study different formulations of this project, and see how the ideals of dissident intellectuals, such as Vaclav Havel, shaped the political development in Central Europe and beyond. The ideas developed in the specific context of peaceful resistance against communism in Central Europe, for example, inspired the protagonists of the Ukrainian 'Orange Revolution' in 2004. In addition to a set of essential reading, students will be encouraged to study literary works, films and TV-documentaries.

Prerequisite: 30 credit points of first year History or Politics.

Class requirements: One 1-hour lecture and one 2-hour tutorial per week.

Assessment: One 3000-word essay (60%), one 2-hour examination (40%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

Preliminary Reading:

Garton Ash, T. *We the people: the revolutions of '89 witnessed in Warsaw, Budapest, Berlin and Prague* Granta Books 1990

POL2REC RECONCILIATION (20 CPs Sem. TE-SEM-1 BU.) *Mr Gary*

Thomas

This unit is offered at third year level also.

Reconciliation is a topic of ongoing debate in Australia. For over 215 years, various institutions and groups have debated and decided how Australia should relate to its Indigenous peoples. Despite a formal reconciliation movement, Australia is still struggling with significant topics, such as Social Justice, Land Rights, Native Title, an Official Treaty and the disadvantages of Indigenous peoples in all levels of life. Lectures, films and readings will stimulate discussion in this unit. By the end of this unit, it is expected students will: be familiar with the key issues identified as important for reconciliation and the way they have been approached in Australia and overseas and how actions might contribute to reconciliation in the future; be able to articulate their personal position within the Australian reconciliation debate.

Prerequisite: 30 credit points from first year politics, sociology, anthropology, AST1IJI, AST1ICI.

Class requirements: One 2-hour lecture and one 1-hour seminar per week.

Assessment: One 2000-word essay (40%), one 3000-word essay (60%). Third year students are expected to show a higher level of discipline-specific skills in their written work than second year students.

POL2SEA SOUTHEAST ASIAN POLITICS: CHANGE AND CONFLICT (20.

CPs Sem. TE-SEM-2 BU.) *Dr Angus McIntyre*

This unit is offered at third year level also.

In this unit, we focus on the relationship between economic, social and political change in Indonesia, Malaysia and Thailand. In particular, we examine the connection in these three countries between the capitalist transformation of their previously subsistence economies, the changing character of religious devotion and the emergence of democratic forms of government. These three countries were selected, as they are eminently comparable in terms of these issues. Each has a Chinese minority with disproportionate economic power; each has experienced rapid economic growth in the last thirty

years; each has undergone a religious revival in the same period; and each has developed a democratic or quasi-democratic form of government. In other respects they are different – two were colonised, one was not; two are Islamic, the third Theravada Buddhist – but not so different as to preclude meaningful comparison.

Prerequisite: 30 credit points of first year politics, or AST1IJI and AST1ICI, or unit coordinator's approval.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Weekly tutorial-based tasks (10%), one 2500-word essay (50%); Country Report and Briefing Notes on a regional issue (20%), one 1-hour examination (20%). Third year students will be expected to show a greater achievement of discipline specific skill in their written work than second year students.

POL2TWP THEORIES OF WORLD POLITICS (20. CPs Sem. TE-SEM-2 BU.)

Coordinator to be advised

This unit is offered at third year level also.

In this unit students consider some of the recurring themes in the study of world society, in particular the implications of various conceptions of international relations (including realism and idealism), the significance of boundaries, and the role of values, norms, and institutions. We then examine the internationalisation of human affairs, sometimes loosely referred to as 'globalisation', and the various explanatory models that have emerged around such notions as interdependence, integration, world system, world economy and world order. Finally, we focus on recent developments in feminist, normative, critical and constructivist theories of international relations.

Prerequisite: 30 credit points of first year politics or sociology, or AST1IJI and AST1ICI, or unit coordinator's approval.

Class requirements: One 1.5-hour lecture and one 1.5-hour seminar each week.

Assessment: One 3000-word essay (60%), one 2-hour examination (40%). Third year students will be expected to show a greater achievement of discipline specific skill in their written work than second year students.

POL3FRA FREE READING A (20. CPs Sem. TE-SEM-1 BU.) *Coordinator to be advised*

Available to students taking 160 or more credit points of politics who wish to study an area of the discipline not covered by existing subjects. Prospective students must satisfy the Program convenor that they have a staff member's agreement to supervise the project, at least one B grade or better in a relevant subject, a referee to comment on their capacity for self-directed study and no more than one free reading component in their degree course. In general, free reading subjects are discouraged except where a strong case can be made that there are no other appropriate subjects available.

Prerequisite: Approval of the Head of Program.

Class requirements: Report to supervisor at least once each week.

Assessment: By essays and examination as arranged for each student.

POL3FRB FREE READING B (20. CPs Sem. TE-SEM-2 BU.) *Coordinator to be advised*

Available to students taking 160 or more credit points of politics who wish to study an area of the discipline not covered by existing subjects. Only available to Bachelor of International Relations students.

This unit is to be taken by all Bachelor of International Relations students. Its main purpose is to equip students to work with and for organisations that have a strong interest in international relations. The University will oversee the selection and design of projects and the selection of workplaces. After this process, each student is assigned to an organisation, which has agreed to provide the necessary supervision in the workplace. The selection and development of these projects is guided by a careful consideration of the educational and learning outcomes of each project. Each project is designed to develop research, educational or organisational skills, or some contribution of these. Throughout this unit, there will be regular contact with students and regular input into the conduct of the project and appropriate control of the assessment.

Prerequisite: Enrolment in Bachelor of International Relations and POL2IPP.

Class requirements: 150 hours attendance at an approved workplace plus three 3-hour workshops.

This unit is not available for Study Abroad students.

Assessment: One 750-word work plan (15%), one 1,250-word report (25%), one 3000-word assignment (60%)

Religion and spirituality studies

Program Coordinator: Dr Anne Gardner (History)

Religion and spirituality studies offer an academic study of various religions from two different perspectives. The first provides an understanding of some of the great religious traditions. The second perspective is the study of religions and/or spirituality in the context of various disciplinary approaches: historical, philosophical, sociological, anthropological, literary and linguistic.

The staff who teach the area belong to various programs and their offerings are listed accordingly: i.e., as anthropology, Asian studies, English, history, philosophy or sociology.

Languages

Students wishing to study Christianity may consider taking Ancient Greek. Those wishing to study Indian traditions should consider taking Sanskrit. See the entries under Greek studies and Sanskrit in this *Handbook*. For those wishing to study Judaism or the Tanak/Old Testament in the original language, a complementary course in classical Hebrew can be arranged at another institution. Hebrew units can be counted towards a Religion and Spirituality Studies major.

Programs of study

Students intending to qualify for the degree with a major in Religion and Spirituality Studies are normally required to take 130 credit points from the list below, 60 credit points of which must be taken at third year level. Those intending to proceed to honours level are encouraged to take additional units from the lists below.

Important notice: Not all of the units listed below will be available every year. See the unit lists for the specific disciplines, where units unavailable in 2008 will be noted.

Unit title	Unit code

Honours

The honours program in religion and spirituality studies requires intensive study in the third and fourth years of the degree. Students intending to do honours should consult the Honours Coordinator about their choice of units. A major in religion and spirituality studies is required of prospective honours students who must demonstrate their ability to cope with the honours program.

Fourth year students are required to write a minor thesis of between 12000 and 15000 words, undertake a special study normally related to the thesis topic and a methodology unit, and attend the honours seminar in the department of their thesis supervisor.

A full description of these units (including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings) appears at the end of each discipline entry. A full description of RST units appears below. For the most recent descriptions of all units, please access the unit database at www.latrobe.edu.au/udb_public.

UNIT DESCRIPTIONS

RST3RCA READING COURSE A (20. CPs Sem. TE-SEM-1 BU.) *Coordinator to be advised*

Individual reading subjects may be organised by arrangement with an appropriate member of staff and subject to approval of the coordinator of religion and spirituality studies. Approval is normally given only to students who have reached third year level in their course for a study program, which follows up some aspect of a subject already studied with a member of staff ready to support the proposed reading subject and to supervise and assess the work done in it. After consultation with the appropriate member of staff, students wishing to take this option should submit details of their proposed course, including a bibliography, and details of assessment to the coordinator.

RST3RCB READING COURSE B (20. CPs Sem. TE-SEM-2 BU.) *Coordinator to be advised*

See RST31RCA for description.

Sanskrit

Program Coordinator: Dr Greg Bailey

Sanskrit, the language of classical Indian civilisation and religions, is taught by staff of the Asian Studies Program and is available as a major. In first year Sanskrit, the emphasis is on the rapid acquisition of vocabulary and an appreciation of grammatical structures through exposure to straightforward textual material. On completion of the unit, students should be capable of reading Sanskrit with the aid of a dictionary.

Second year Sanskrit builds upon foundations laid in Sanskrit 1. Here the emphasis is on reading a wide range of literature relating to philosophy, religion, mythology, aesthetics and social and moral values.

Third year Sanskrit involves the reading of more advanced Sanskrit texts than those read in previous years and introduces students to composition in Sanskrit.

These units are valuable for students of linguistics, philosophy, religious studies and Asian studies.

Programs of study

To qualify for a degree with a major in Sanskrit, students must complete 110 credit points of Sanskrit 1, Sanskrit 2 and Sanskrit 3, and at least 20 credit points at third year level from the units listed below.

Teaching period	Unit title	Unit code
First year units (15 credit points)		
TE-SEM-1	Sanskrit Beginners 1A	SAN1BEA
TE-SEM-2	Sanskrit Beginners 1B ¹	SAN1BEB
Second year units (20 credit points)		
TE-SEM-1	Sanskrit Beginners 2A	SAN2BEA
TE-SEM-2	Sanskrit Beginners 2B ¹	SAN2BEB
Second or third year units (20 credit points)		
TE-SEM-1	Cross-cultural Communication	LIN2CCC/LIN3CCC
TE-SEM-1	Goddesses, Sexuality and Liberation: India and beyond	AST2GSL/AST3GSL
TE-SEM-1	Introduction to Buddhism	AST2INB/AST3INB
TE-SEM-1	Love and Eroticism in Asian Literature ¹	AST2LEA/AST3LEA
TE-SEM-2	Language in Asia	LIN2LIA/LIN3LIA
Third year units (20 credit points)		
TE-SEM-1	Sanskrit Beginners 3A	SAN3BEA
TE-SEM-2	Sanskrit Beginners 3B ¹	SAN3BEB

Key: ¹ Not available in 2008.

A full description of these units (including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings) appears at the end of each discipline entry. A full description of SAN units appears below. For the most recent descriptions of all units, please access the unit database at www.latrobe.edu.au/udb_public.

UNIT DESCRIPTIONS

SAN1BEA SANSKRIT BEGINNERS 1A (15. CPs Sem. TE-SEM-1 BU.) Dr Greg Bailey

Students receive a rapid introduction to the Sanskrit language, enabling them to read simple Sanskrit sentences. Although the primary focus is the acquisition of language, there is also an emphasis on interpreting textual material. No prior knowledge of the language is necessary.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

This unit is not available for Study Abroad students.

Assessment: Two 500-word translation tests (40%), one 1500-word translation test (60%)

Prescribed Reading:

Goldman, R. P. and Sutherland, S. *Devavanipravesika: introduction to the Sanskrit language* Berkeley 2000.

SAN1BEB SANSKRIT BEGINNERS 1B (15. CPs Sem. TE-SEM-2 BU.) Dr Greg Bailey

Not available in 2008

SAN2BEA SANSKRIT BEGINNERS 2A (20. CPs Sem. TE-SEM-1 BU.) Dr Greg Bailey

In this unit students who have completed first year Sanskrit work on texts composed in the Sanskrit language. Emphasis centres on the reading and analysis of a specific Sanskrit text. Students who take this unit not only gain further command of the Sanskrit language, but also gain a better grasp of Indian religious and philosophical ideas.

Prerequisites: SAN1BEB or coordinator's approval

Class requirements: Two 2-hour tutorials per week

Assessment: Two 2500-word translation tests (50% each)

Prescribed Reading:

MacDonnell, A *Sanskrit grammar for students* 3rd edn Oxford UP 1982

SAN2BEB SANSKRIT BEGINNERS 2B (20. CPs Sem. TE-SEM-2 BU.) Dr Greg Bailey

Not available in 2008

SAN3BEA SANSKRIT BEGINNERS 3A (20. CPs Sem. TE-SEM-1 BU.) Dr Greg Bailey

In this unit students deal with advanced Sanskrit language and literature. The unit is designed for those who have completed two years of Sanskrit and wish to undertake further work in ancient Indian

culture and religion. Students build on advances in grammar and vocabulary made in SAN2BEA and SAN2BEB. Texts to be read vary from year to year, but they are normally literary or religious texts. There is some translation from English to Sanskrit.

Prerequisites: SAN2BEB or coordinator's approval

Class requirements: Two 2-hour tutorials per week

Assessment: Two 2500-word translation tests (50% each)

Prescribed reading:

Monier-Williams, M A *Sanskrit-English dictionary* Any edition.

SAN3BEB SANSKRIT BEGINNERS 3B (20. CPs Sem. TE-SEM-2 BU.) Dr

Greg Bailey

Not available in 2008

Sociology

Program Coordinator Dr Alberto Gomes.

Sociology is concerned with the study of social life: the structural arrangements and cultural patterns that shape group behaviour at every level of social action whether local, national or global.

Sociologists work from a range of theoretical perspectives and adopt a variety of methodological approaches. The sociology units offered reflect this diversity and provide students with a wide range of choice. The program is structured to provide an understanding of core concepts and basic research methods. The Sociology Program offers a fourth year at honours level and a postgraduate degree by research.

Programs of study

In the first year of study, students are introduced to basic concepts in a range of topic areas and social processes. In the second and third years, students can select from a broad range of units covering topics such as gender, family, social policy, health and medicine, the environment, deviance, multiculturalism, the emotions, culture, everyday life, community studies, social theory, and many others.

A major in sociology consists of 130 credit points of sociology units or cross-listed units designated as being equivalent to sociology units (see list below). A major will consist of at least 30 credit points of sociology (or equivalent) at first year, and at least 60 credit points of sociology (or equivalent) at third year level.

Students taking 130 or more credit points in sociology, or wishing to proceed to honours, must complete at least 20 credit points of units classified as research methods, and SOC2CIS/SOC3CIS Current Issues in Sociology.

Students who have successfully completed a core unit in sociology prior to 1995 will be deemed to have completed the equivalent of SOC2CIS/SOC3CIS Current Issues in Sociology.

Students who wish to proceed to honours must have successfully completed at least 130 credit points in sociology; however, these students are encouraged to take additional sociology units.

Policy studies

Students who wish to pursue an interest in policy studies may consider the following second and third year units to develop a policy focus for their degree.

Unit title	Unit code
Critical Social Policy	SOC2CSP/SOC3CSP
Development, Globalisation and Culture	ANT2DGC/ANT3DGC
Deviance, Criminality and Social Control	SOC2DCS/SOC3DCS
Families and Change	SOC2FAC/SOC3FAC
Sociology of Health and Medicine	SOC2SHM/SOC3SHM
Social Policy, Welfare and the State	SOC2SWS/SOC3SWS
Social Theories of Deviance	SOC2STD/SOC3STD

All units are offered subject to the availability of appropriate staffing and minimum enrolments.

Teaching period	Unit title	Unit code

² Core unit for Sociology major

³ Only available to Bachelor of Development Studies and Bachelor of International Development students.

Honours

The course comprises a core unit, an Elective or internship, a second-semester research seminar and a research thesis. The length of the honours thesis is between 12000 and 15000 words. Research for the thesis extends through the honours year and is undertaken with the guidance of a supervisor.

The department welcomes enquiries about the structure of the course, the Elective units available, the internship program, and other aspects of the honours course.

Entry into the honours year is by application at the end of the student's third year of study. Students considered for admission will normally have at least a B average in units of sociology or anthropology up to a total of 130 credit points. These units will normally include 20 credit points of units classified as research methods, and SOC2CIS/SOC3CIS Current Issues in Sociology. Prospective honours students are encouraged to take additional sociology units to this minimum requirement, and to include SOC3PSS Practising Social Sciences in their major.

A full description of these units (including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements,

assessment, prerequisites and readings) appears at the end of each discipline entry. A full description of SOC units appears below. For the most recent descriptions of all units, please access the unit database at www.latrobe.edu.au/udb_public.

UNIT DESCRIPTIONS

SOC1AAB AUSTRALIA AND BEYOND: INTRODUCTION TO SOCIOLOGY

(15. CPs Sem. TE-SEM-2 BU, MI.) *Dr Trevor Hogan*

In this unit, students are introduced to the sociology of contemporary society. The focus is on Australia — a nation-state and society subject to global forces and expressions of local culture and power. We rethink social order and divisions in Australian society across place and time. We look at particular cities and regions across Australia and beyond. What are we to make of the way the larger global context impacts upon us? How can sociology help us to answer questions such as this?

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 2000-word written assignment (50%), one 1.5-hour multiple-choice examination (30%), one 500-word written assignment (20%)

Prescribed Reading:

Beilharz, P and Hogan, T (Eds) *Relocating sociology: place, time, division* Oxford UP 2006

SOC1SAC SELF AND COMMUNITY: INTRODUCTION TO SOCIOLOGY

(15. CPs Sem. TE-SEM-1 BU.) *Professor Evan Willis*

In this unit students are introduced to the study of contemporary society, how and why we live the way we do in the world today. Students explore the distinctiveness of a sociological way of viewing the world, before turning to examine the notions of self and society. The development and shaping of an individual's sense of self and identity are examined in the context of formative influences such as the family, gender and ethnicity. This is followed by an examination of the nature of modern society, particularly consumer society, work, religion and forms of community.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2000-word written assignment (50%), one 1.5-hour multiple-choice examination (30%), one 500-word written assignment (20%)

Recommended Reading:

Willis, E. *The sociological quest* 4th edn. Allen and Unwin 2004

SOC2ACR AUSTRALIAN CITIES AND REGIONS (20 CPs Sem. TE-SEM-1 BE,

BU.) *BE: Mr Trevor Budge, BE: Mr Andrew Butt, BU: Dr Trevor Hogan*

This unit is offered at third year level also. Not available in 2008

SOC2APC ASIAN-PACIFIC CITIES (20 CPs Sem. TE-SEM-2 BE, BU.) *BE: Mr*

Trevor Budge, BE: Mr Andrew Butt, BU: Dr Trevor Hogan

This unit is offered at third year level also.

In this unit, students are helped to think about urban challenges and innovation in contemporary cities of the Asia-Pacific. For the first time in world history, the majority of humankind now lives in cities, and in cities that are bigger and more complex than any previous historical epoch. The twenty-first century is the Asia-Pacific era and the cities of the region are the urban imaginaries and techno-industrial engines of the world. Our deepest nightmares and our utopian hopes for cities can be found in the cities of this region. Australian cities are closely modelled on North American cities, especially of the Pacific Rim and most of our trade and cultural traffic is with Asian and North American cities. A critical understanding of these cities, from LA to Vancouver, Tokyo to Shanghai, Hong Kong to Singapore, Bangkok to Manila, will help us to think about the spatial, built form, technological and cultural challenges of our own cities for long-term sustainability.

Prerequisite: Bendigo students: 30 credit points of first year sociology and politics or unit coordinator's approval

Bundoora students: 30 credit points of first year sociology, anthropology or AST1IJI or AST1ICI or unit coordinator's approval.

Class requirements: One 2-hour seminar and one hour on WebCT per week.

Assessment: One 1000-word presentation and essay (25%), one 2500-word research essay (45%), one group class presentation (1500-words equivalent) (30%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

SOC2CIS CURRENT ISSUES IN SOCIOLOGY (20 CPs Sem. TE-SEM-1 BU.)

Professor Peter Beilharz

This unit is offered at third year level also.

In this unit, we survey some of the critical issues current in sociology. Social division and exclusion have re-emerged as major problems the world around. Globalization accentuates existing patterns of inequality and individualization. These trends raise the issue of social solidarity, or what it is that holds societies or communities together. In this context, we examine problems of polarization, identity, work and consumption. In this unit, we employ some issues to establish something of the scope of sociology and the variety of theories, methods and approaches that constitute it.

Prerequisite: 30 credit points of first year sociology or anthropology, or AST1IJI and AST1ICI, or unit coordinator's approval.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2000-word essay (40%), one 3000-word essay (60%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

Recommended Reading:

SOC2CMS COMMUNITY STUDIES (20. CPs Sem. TE-SEM-1 BU, MI.) *Dr*

Anthony Moran

This unit is offered at third year level also.

In this unit the aims are, firstly, to explore the notion of 'community' both in an historical context and how it is used today. Secondly, by examining a range of contemporary communities, we link the study of community to broader theoretical debates within the sociological and anthropological traditions. These include debates around modernity and social change; universalism and particularism; individualism and group identity. Also considered are the impacts of globalisation on personal and social identity. Throughout, our central focus remains on the changing nature of the concept of community and on different forms of community in contemporary society.

Prerequisite: 30 credit points of first year sociology or anthropology, or AST1IJI and AST1ICI, or unit coordinator's approval.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 3000-word essay/research report (60%), one 2-hour examination (40%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Recommended Reading:

Delanty, G. *Community* Routledge 2003

SOC2CSM COMPARATIVE SOCIAL MOVEMENTS (20 CPs Sem. TE-SEM-1 BU.) *Dr Wendy Mee*

This unit is offered at third year level also.

Starting with an examination of the workers' movements in several countries, explanations of the genesis of social movements are explored. The new social movements of Australia and 'the North' are compared with movements of the poor in Latin America and 'the South'. Based on the comparisons, competing ideas about how movements work in complex societies and transnationally are tested. Particular attention is given to the role of social movements in development case studies. In workshop sessions, students are guided through research projects in which they evaluate a chosen social movement.

Prerequisite: 30 credit points of first year sociology or anthropology, or AST1IJI and AST1ICI, or unit coordinator's approval.

Class requirements: One 3-hour lecture/workshop per week.

Assessment: One 2000-word essay (40%), one 3000-word research essay (60%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Kerreen Reiger

This unit is offered at third year level also.

Not available in 2008

SOC2DAU DISCOVER AUSTRALIA: CURRENT ISSUES AND DEBATES (20 CPs Sem. TE-SEM-1 BU.) *Dr Gwenda Tavan*

This unit is offered at third year level also.

In this subject students are introduced to Australian society, its historical development, and the major issues and debates it is grappling with in the early 21st century. Analysis centres on six themes: Indigenous and non-Indigenous relations, settler societies, land and geography, politics and power, culture and nation, Australia in a globalising world. In this unit, we utilise various active learning methods and mediums: lectures, tutorials, fieldwork exercises, excursions, film, and web-based activities. This unit will be of interest to students seeking an introduction to contemporary Australian society.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: Tutorial exercises (1000-words equivalent) (20%), one 1500-word reflective exercise (30%), one 2500-word research essay (50%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

SOC2EAI ETHNICITY AND IDENTITY: SOCIAL AND POLITICAL APPROACHES (20. CPs Sem. TE-SEM-2 BU.) *Dr Raelene Wilding*

This unit is offered at third year level also.

In this unit, we examine the social, political and ideological consequences of the emergence of multicultural societies. Immigration has transformed the world, and has certainly transformed Australia. The nineteenth and early twentieth century idea of the state as composed of a homogeneous people with a common heritage has increasingly been challenged by the contemporary reality of an increasing number of plural multicultural societies. How and why has this happened? What social and political forces have driven these changes? What does it mean, today, to have an ethnicity, an identity, a

religion or race? Can nations, or even individuals, have more than one identity? These and other questions are addressed with a focus on Australia, but also including comparisons with other countries.

Prerequisite: 30 credit points of first year sociology or anthropology, or AST1IJ1 and AST1ICI, or unit coordinator's approval.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 1000-word assignment (20%), one 2000-word essay (40%), one 2-hour examination (40%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Preliminary Reading:

Jupp, J. *From white Australia to Woomera: the story of Australian immigration* Cambridge University Press 2002

SOC2FAC FAMILIES AND CHANGE (20. CPs Sem. TE-SEM-2 BU, MI.) Dr

Kerreen Reiger

This unit is offered at third year level also.

Several change processes in families are explored in this unit. First, we consider the changes in the institution of the family over time – those in collaborating and having children, patterns of divorce and remarriage, paid and unpaid work, gender roles and parenthood. Explanations for and the meaning of these changes will be considered. Second, we also consider changes in Australian families in terms of life stage transitions and emerging family models. Throughout the unit the diversity of family forms and how experiences differ according to age, gender, class and ethnicity are emphasised. Regular attendance at classes is essential to the research emphasis in this unit.

Prerequisite: 30 credit points of first year sociology or anthropology, or gender, sexuality and diversity studies, or AST1IJ1 and AST1ICI, or unit coordinator's approval.

Class requirements: One 2-hour lecture and one 1-hour seminar per week.

Assessment: One 2000-word research report (40%), one 1500-word essay (30%), one 1500-word literature review (30%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Recommended Reading:

Weeks, W. and Quinn, M. (Eds) *Issues facing Australian families*, Longman 2000

SOC2GAD GENDER AND DEVELOPMENT (20 CPs Sem. TE-SEM-2 BU.) Dr

Wendy Mee

Students will be introduced to gender and related critiques of development, now central to all contemporary development programs and activities. The unit is organised thematically to cover major gender-related critiques and issues. These may include feminist critiques of development economics; women, gender and sustainable development; gender-based forms of violence and exploitation; women's human rights; and sexuality and reproductive health. Through the consideration of case studies, students should become familiar with gender-related theories and practice in the context of contemporary development approaches.

Prerequisite: 30 credit points of first year anthropology, gender studies or sociology.

Class requirements: One 3-hour lecture/seminar per week.

Assessment: One group project (1000-words equivalent) (20%), one 1500-word literature review (30%), one 2500-word essay (50%)

SOC2GES GENDER AND SEXUALITY: CONTEMPORARY DEBATES (20.

CPs Sem. TE-SEM-1 BU.) Dr Lorraine Mortimer

This unit is offered at third year level also.

In this unit, we trace changes in feminist theory and explore contemporary arguments about masculinity and femininity, mind and body, the personal, and the social in relation to everyday life. Historical debates and political struggles are related to present-day ones, including controversies surrounding maternity, the family and the men's movement. We explore the ways in which social theory has been gendered, often disembodied and removed from a broader

ecological context. We ask questions about democratic alternatives for future relationships between women and men. Along with theoretical writing, we consider literature, discussions in the press, and popular representations in film and on television.

Prerequisite: 30 credit points of first year sociology or anthropology or politics or Asian studies or gender, sexuality and diversity studies, or subject coordinator's approval.

Class requirements: One 2-hour lecture and one 1-hour seminar per week.

Assessment: One 3000-word essay (60%), one 2-hour examination (40%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

SOC2LL LANDSCAPE AND THE HUMAN WORLD (20. CPs Sem. TE-SEM-2

BE, BU, SH.) Mr Gerry Gill

This unit is offered at third year level also.

In this unit, our studies are based on the areas of central Victoria, which were the estates of the Jaara and Daung Wurrung clans. Students will examine the contrasting Indigenous and European modes of imagining and shaping this landscape; the violence and clash of values on the frontier; the transformations of the landscape by successive generations of Europeans and the traces of their failed dreams and abandoned traditions. We will focus on specific stories and places, but also undertake aesthetic, ecological and theoretical reflection on the relationship of the human world to the Earth. Students will be introduced to the specific skills of interpreting physical landscapes, totemic landscapes, rituals, archival documents and maps. In addition to academic texts, a range of landscape-inspired art, music, film and poetry will be studied.

Prerequisite: 30 credit points of first year Humanities and Social Science or coordinator's approval.

Class requirements: Bendigo: one 2-hour lecture and one 1-hour tutorial for nine weeks and two 6-hour field trips.

Bundoora and Shepparton: equivalent of fifteen hours of lectures in the form of PowerPoint presentations accessible on the web supported by a DVD of readings, short films, music and images. Two 2-day blocks with 6-hours of lectures and seminars on day one and a six-hour field trip on the following day.

Assessment: One 2000-word essay (40%), one field-trip notebook and skills exercises (1000-words equivalent) (20%), one 2-hour examination (40%). Third year students will be expected to display a higher level of discipline-specific skills than second year students.

SOC2MQB INTRODUCTION TO QUALITATIVE RESEARCH METHODS

(20. CPs Sem. TE-SEM-2 BU.) Dr Raelene Wilding

This unit is offered at third year level also.

A key difference between qualitative and quantitative research is that quantitative research focuses on a few variables and many cases, while qualitative research relies on a few cases and many variables. In this unit, we immerse ourselves in the 'theory' and 'practice' of the qualitative research process. Students engage in the design, data collection, some analysis and report writing, and in so doing learn the necessary skills involved whilst gaining the 'hands on' experience.

Prerequisite: 30 credit points of first year sociology or anthropology, or AST1ICI and AST1IJ1, or unit coordinator's approval.

Class requirements: One 2-hour workshop and one 1-hour tutorial per week.

Assessment: One 1000-word assignment (20%), one 2000-word assignment (40%), one 2-hour examination (40%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Preliminary Reading:

Liamputtong, P & Ezzy, D *Qualitative research methods*, 2nd edn. OUP 2005

SOC2MSR INTRODUCTION TO SOCIAL RESEARCH METHODS (20. CPsSem. TE-SEM-1 AW, BU.) *Professor Evan Willis**This unit is offered at third year level also.*

Students are introduced to a range of current methods of social inquiry. These include both quantitative and qualitative research methods such as surveys, interviews, observation, content analysis, the analysis of historical and policy documents and records and other unobtrusive methods. The objective is for students to become familiar with these techniques and to gain some understanding of when best to employ particular strategies while being aware of strengths and weaknesses of each approach.

Prerequisite: 30 credit points of first year sociology or anthropology, or AST1IJI and AST1ICI, or unit coordinator's approval.

Class requirements: One 2-hour lecture per week and one 2-hour workshop per fortnight. A portion of the lecture material may be given in block mode.

Assessment: One 1500-word research exercise (25%), one 2000-word research proposal (50%), one 1.5-hour end of semester class test (25%). Third year students are expected to show a higher level of discipline-specific skills in their written work than second year students.

Prescribed Reading:

Bryman, A *Social research methods* 2nd edn., OUP 2004.

SOC2MTB QUANTITATIVE METHODS IN SOCIAL RESEARCH (20. CPsSem. TE-SEM-2 BU.) *Coordinator to be advised**This unit is offered at third year level also.*

This is a practical introduction to the use and interpretation of elementary quantitative methods in social research. As such, it provides students with basic skills required to analyse quantitative data and be critical consumers of such research. Students develop skills in key aspects of data analysis, such as univariate analysis, graphical displays, cross-tabulation, measures of association, correlations, group comparisons, inferential statistics and control variables. Students gain valuable experience in basic research design, data preparation, applied statistical analysis, interpretation of results and report writing, together with practical experience in the use of SPSS software on a desktop computer. No prior knowledge of statistics, data analysis or computers is required.

Class requirements: One 1-hour lecture and one 2-hour workshop per week.

Assessment: One computer exercise to the equivalent of 2500 words (50%), one 2500-word research assignment (50%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Prescribed Reading:

De Vaus, D.A. *Analysing social science data* Sage 2002

SOC2NRM NEW RELIGIOUS MOVEMENTS (20. CPs Sem. TE-SEM-1 BU.)*Dr Wendy Mee**This unit is offered at third year level also.*

New religious movements (NRMs) popularly known as 'cults', attract attention because of bizarre events and alleged destructive practices. In this unit students test stereotypes constructed from such events and practices by investigating similarities and differences across the full range of NRMs and other new forms of religious life in multicultural societies. Theories linking the proliferation of new forms of religious life to central processes in modern societies are explored. Questions addressed with case material include: Who is attracted to new forms of religious life? What is involved in becoming a participant? What are the social and personal consequences of participation? Theories and methods in the sociology of religion will be reviewed as these questions are addressed.

Prerequisite: 30 credit points of first year sociology or anthropology, or AST1IJI and AST1ICI, or unit coordinator's approval.

Class requirements: One 3-hour lecture or seminar per week.

Assessment: One 2000-word essay (40%), one 3000-word research report (60%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

SOC2SEL SOCIOLOGY AND EVERYDAY LIFE (20. CPs Sem. TE-SEM-1 BU.)*Dr Raelene Wilding**This unit is offered at third year level also.*

In this unit we on the routine understandings, rituals and practices through which people construct and are constructed by everyday life. We consider the connections between the daily experience of 'ordinary people' and the social and cultural structures of power that shape everyday life in modern capitalist societies. Attention is given to the ways in which social actors' experience of everyday life is shaped by gender, class and race/ethnicity, and to the collaboration of social actors in the production of meaning in a rationalized, mediated, and commodified social world.

Prerequisite: 30 credit points of first year sociology or anthropology, or AST1ICI and AST1IJI, or unit coordinator's approval.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2000-word essay (40%), one 3000-word essay (60%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

SOC2SGW SEX, GENDER AND WORK (20. CPs Sem. TE-SEM-2 BU.)*Professor Kerreen Reiger**This unit is offered at third year level also.**Not available in 2008***SOC2SHI SOCIOLOGY OF HEALTH AND ILLNESS** (20. CPs Sem. TE-SEM-2AW, BU.) *AW: Ms Pauline Savy, BU: Professor Evan Willis**This unit is offered at third year level also.*

In this unit, we aim to familiarise students with the sociological analysis of issues related to health and illness. We argue that health and health behaviour cannot be adequately explained by simply looking at individual, biological or environmental factors. Sociological questions about both mental and bodily health and illness concern not only the broad organisation of society but also how everyday human experience is given local and personal meaning.

Prerequisite: 30 credit points of first year sociology or anthropology or AST1IJI or AST1ICI or unit coordinator's approval.

Class requirements: One 2-hour lecture or equivalent per week and one 2-hour workshop per fortnight. A portion of the lectures may be given in block intensive mode.

Assessment: One 2000-word research essay (40%), one 2-hour examination (40%), one 1000-word tutorial presentation and paper (20%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

SOC2SHM SOCIOLOGY OF HEALTH AND MEDICINE (20. CPs Sem. TE-SEM-2 AW, BU.) *Professor Evan Willis**This unit is offered at third year level also.**Not available in 2008***SOC2SOC SOCIOLOGY OF CULTURE** (20. CPs Sem. TE-SEM-2 BU.)*Professor John Carroll**This unit is offered at third year level also.*

What makes a human being? What shapes character? What gives a person direction? Which laws are obeyed, and why? In which way does a society form, or alternatively, deform, its individuals? In this unit, we look at the central role 'culture' plays in all these issues. We consider repression and shame, authority and myth, initiation and psychic balance, transgression and forgiveness and attempts to show how such forces conspire to create culture and what culture therefore means – given the instinctual bog out of which it is born. Drawing upon Western literature, art and film we go on to examine cultural breakdown and its dire consequences for both individual and society. At the same time, we look at the nature of cultural restoration.

Prerequisite: 30 credit points of first year sociology or anthropology, or AST1IJI and AST1ICI, or unit coordinator's approval.

Class requirements: One 3-hour seminar per week. For a pass in this unit, students must attend at least 10 of the 12 seminars starting with Week 2.

Assessment: One 1500-word essay (30%), one 3500-word essay (70%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Preliminary Reading:

Conrad, J. *Heart of darkness* Any edition

Prescribed Reading:

James, H *Portrait of a lady* Any edition.
Nietzsche, F *The birth of tragedy* Any edition.

SOC2SOE SOCIOLOGY OF THE ENVIRONMENT (20. CPs Sem. TE-SEM-1 AW, BU.) *Dr Brian Furze*

This unit is offered at third year level also.

Students are introduced to the ways sociological knowledge can be used to understand contemporary environmental issues. In this unit, we explore the state of sociological debate about the environment, how it can be used to understand contemporary environmental issues and how it can be used to intervene in existing socio-economic and political relations to develop more socially and ecologically just outcomes. Students are offered a number of specific pathways within the unit to cater for a diversity of interests and applications: environment and development; global political ecology; European environmental issues; Asian environmental issues; environmental problems as social problems.

Prerequisite: 30 credit points of first year sociology, politics or anthropology.

Class requirements: Albury/Wodonga: one 2-hour lecture and one 1-hour tutorial per week. Bundoora: one 4-hour seminar per fortnight and additional classes as arranged within the group.

Assessment: One 1000-word tutorial paper (20%), one 2000-word major essay, (40%), one 2-hour examination (40%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

SOC2STD SOCIAL THEORIES OF DEVIANCE (20. CPs Sem. TE-SEM-2 BU.)

Coordinator to be advised

This unit is offered at third year level also.

Students discuss sociological theory in the context of traditional areas of deviance including suicide, delinquency, theft, murder, prostitution, drugs and mental illness and some aspects of social control, including prisons and the police. The classical sociologists Durkheim, Merton, Parsons had ideas about deviance and their ideas generated what is called consensus theory or functionalist theory. In addition to these classical sociologists, students also examine labelling theory, which derives from Mead, some Marxist and feminist approaches to deviance and social control, and Foucault's discussions of sexuality and penology. They explore the social construction of deviance through consideration of censure and stereotyping, fear and moral panic, vengeance, and reintegration.

Prerequisite: 30 credit points of first year sociology or anthropology, or AST1IJI and AST1ICI, or unit coordinator's approval.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2000-word essay (40%), one 3000-word written assignment (60%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

SOC2SWS SOCIAL POLICY, WELFARE AND THE STATE (20. CPs Sem. TE-SEM-2 BU.) *Dr Anthony Moran*

This unit is offered at third year level also.

Contemporary debates about the appropriate role of the state in the lives of its citizens form the focus of this unit. Why has privatisation of government services become so fashionable? When, how and why did welfare states develop in western countries including Australia, and how can we understand these changes in the context of community and the state. A comparative approach is taken to topics

such as poverty, social security (unemployment, disability, old age, etc.), education and the state's responsibilities in relation to society's vulnerable members (i.e., the homeless). The future of welfare states in an era of economic rationalism and globalisation is discussed. How is social policy formulated in Australian society? Who sets the agenda and in whose interests? This unit provides a framework for understanding these questions.

Prerequisite: 30 credit points from first year sociology, anthropology, politics, AST1IJI, AST1ICI, or unit coordinator's approval.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2000-word essay (40%), one 3000-word essay (60%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

SOC2TCS THEORY, CULTURE AND SOCIETY (20. CPs Sem. TE-SEM-1 BU.)

Professor Peter Beilharz

This unit is offered at third year level also.

Marx, Weber and Durkheim together generated classical social theory, whose tracks we still follow in the philosophical and sociological discourse of modernity. In this unit, we investigate their work as ways to read the classics and to interpret modernity. The object is both to clarify theoretical traditions and to help make sense of the world we inhabit today.

Prerequisite: 30 credit points from first year sociology, anthropology, AST1IJI, AST1ICI, or unit coordinator's approval.

Class requirements: One 3-hour lecture or seminar per week.

Assessment: One 2000-word review (40%), one 3000-word essay (60%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Only available to students enrolled in the Bachelor of Development Studies, Bachelor of International Development or Graduate Diploma in Development Studies

In this unit students focus on the practical skills used in development work. Guest speakers from various agencies share their experiences of the development field, providing students with an opportunity to draw on professional expertise. The unit is organised around the idea of the 'development project'. Students are introduced to key development tools, processes and debates surrounding the implementation of development projects. On completion students will be familiar with grant proposal writing, practical tools used in development intervention, and with debates about the best forms of development intervention.

Prerequisite: Enrolment in the third year of the Bachelor of Development Studies or the Graduate Diploma in Development Studies.

Class requirements: One 3-hour lecture/seminar per week.

This unit is not available for Study Abroad students.

Assessment: One 1500-word briefing report (30%), one 2500-word reflective essay (50%), one development project proposal (group-work equivalent to 1000-words per student) (20%)

CPs Sem. TE-SEM-2 BU, MI.) *Dr**Kerreen Reiger**See SOC2FAC for full unit description.***SOC3FRA FREE READING A** (20. CPs Sem. TE-SEM-1 BU.) *Dr Alberto**Gomes*

A student who wishes to do Free Reading A must fill in an application form available from the Sociology and Anthropology General Office. A 300-word summary of the proposed topic must be submitted with the application form. If a member of staff agrees to act as a supervisor and that the area of study is not covered by other subjects, the application to undertake one free reading unit will generally be approved if the student has obtained 150 credit points of Sociology and has an average of B in second or third year Sociology units. The primary purpose of a free reading unit is to enable a student to undertake a literature review and other written work on a topic which may lead to a fourth year honours thesis.

Prerequisite: 150 credit points of sociology.

Class requirements: As required by the supervisor.

This unit is not available for Study Abroad students.

SOC3FRB FREE READING B (20. CPs Sem. TE-SEM-2 BU.) *Dr Alberto**Gomes*

A student who wishes to do Free Reading B must fill in an application form available from the Sociology and Anthropology General Office. A 300-word summary of the proposed topic must be submitted with the application form. If a member of staff agrees to act as a supervisor and that the area of study is not covered by other subjects, the application to undertake one free reading unit will generally be approved if the student has obtained 150 credit points of Sociology and has an average of B in second or third year Sociology units. The primary purpose of a free reading unit is to enable a student to undertake a literature review and other written work on a topic which may lead to a fourth year honours thesis.

Prerequisite: 150 credit points of sociology.

Class requirements: As required by the supervisor.

This unit is not available for Study Abroad students.

Assessment: Normally written work totalling 5000-words.

SOC3GES GENDER AND SEXUALITY: CONTEMPORARY DEBATES (20.CPs Sem. TE-SEM-1 BU.) *Dr Lorraine Mortimer**See SOC2GES for full unit description.***SOC3LL LANDSCAPE AND THE HUMAN WORLD** (20. CPs Sem. TE-SEM-1 BU.)*Dr Wendy Mee**See SOC2NRM for full unit description.***SOC3PSS PRACTISING SOCIAL SCIENCE** (20 CPs Sem. TE-SEM-2 BU.) *Dr**Anthony Moran*

In this unit, we prepare for fourth year honours in Sociology and Anthropology, but it is not restricted to students intending honours. Students are introduced to some major themes and texts in post-war sociology and anthropology, inquiring into modes and traditions of argument, methods and styles employed. Texts covered may include major works by C.W. Mills, The Chicago School, Sennett, Gilligan, Bauman, Foucault, Said, Strathern and Appadurai, discussing themes such as modernity, culture, and power and how differently we can make sense of them. This unit is strongly recommended for students considering Anthropology or Sociology at 4th year Honours level.

Prerequisite: 30 credit points of first year sociology or anthropology, or AST1IJI and AST1ICI, and 40 credit points of second year sociology or anthropology, or unit coordinator's approval.

Class requirements: One 3-hour seminar per week.

This unit is not available for Study Abroad students.

Assessment: One 4000-word essay (80%), one 1000-word book review (20%)

Spanish (with Portuguese, Catalan and Galician)

Program Coordinator: Ms Ana Maria Ducasse.

In all-important senses—in terms of demography, the extent of its administrative use, and its cultural impact—Spanish is one of the world's major languages.

It is one of the two main languages of the Latin American countries, the principal one of Spain, and the most widely spoken language after English in the United States. It is used by more than 400 million people. It is the medium of such major works of literature as *Don Quixote* and *One Hundred Years of Solitude*, and such well-known film directors as Pedro Almodóvar and Luis Buñuel.

The Spanish Program provides a comprehensive range of units within the general area of Hispanic and Iberian studies: that is, Spanish language, literature and culture at a number of different levels, Portuguese language in both its forms (those of Portugal and Brazil, spoken by more than 150 million people), Catalan (some seven million speakers), and Galician, one of the three historic languages of Spain. Latin American literature and culture occupy an equally important place in the program's offerings.

Units fall into two types: core Spanish language units, which all students take, and Elective, specialised units, in which students can extend their particular interests.

Spanish language units cater separately for all levels of Spanish: from the complete beginner, to the student from a native-speaking background, to students with an advanced knowledge of Spanish. Catalan is available at the beginner's level while Portuguese is offered for both beginners and for students with an advanced knowledge of the language.

Unless indicated otherwise, the taught language is the principal medium of communication.

All core language units contain elements of general culture and civilisation analysed through the study of written, audio and visual material. A great deal of emphasis is placed on competence in the language (or languages) studied, but linguistic competence is not the sole aim of study.

Students are encouraged to develop an interest in a specific area of Hispanic studies (such as in the fields of literature and/or culture) that fall within the program's ambit, or in related disciplines taught in other programs and disciplines (for example, Latin American studies, European studies and linguistics).

Students may apply to do in-country study programs in Spanish (and in Catalan, Galician and Portuguese) through the university's exchange programs. These are available both in Spain and in various Latin American countries. Competitive La Trobe language study scholarships may be applied for to support such study. Students contemplating honours studies are particularly encouraged to pursue these opportunities.

Unit nomenclature

Throughout this section of the *Handbook*, the nomenclature Spanish Advanced 1 is used to denote the combination of Spanish Advanced 1A and 1B. Spanish Beginners 1 is used to denote the combination of Spanish Beginners 1A and 1B, and so on. When appropriate, the individual semester units are referred to specifically.

References to Spanish 1A, 1B, as incompatible units refer to those units offered in previous years.

Program of study

To meet the requirements for a major in the Spanish Program, students must take 130 credit points within the program, of which 60 credit points must be at third year level. Students undertaking a major

in Spanish are encouraged to include at least one semester of one of Catalan, Galician or Portuguese. Students will normally take one of the following programs of study after consultation with the program's unit coordinators:

Advanced students (those with VCE Spanish or an equivalent qualification): 30 credit points of Spanish Advanced 1, 40 credit points of Spanish Advanced 2, Spanish Advanced 3A (20 credit points) and a further 40 credit points of Spanish program units at third year level.

Beginner students (those who begin first year with no prior knowledge of Spanish): 30 credit points of Spanish Beginners 1, 40 credit points of Spanish Beginners 2 and of Spanish Beginners 3, and a further 20 credit points of Spanish program units at third year level. All students undertaking studies in the Spanish Program at third year level must enrol in Spanish Advanced 3A or Spanish Beginners 3, unless they have the approval of the Program Coordinator to do otherwise.

Teaching period	Unit title	Unit code

Honours

The Spanish fourth year honours program consists of a research essay of 15000 words on an approved topic and two units at fourth year level. Depending on staff availability and expertise, students may undertake an honours program in aspects of Hispanic, Portuguese, Catalan or Galician literature, language and/or culture.

Students wishing to enter fourth year honours in the Spanish Program will normally have completed a major in Spanish or equivalent and have at least a B-grade average in their Spanish units. Students are encouraged to include additional Spanish units, units that will broaden their knowledge of Spain and/or Latin America, and to consider in-country study during their undergraduate course.

Students considering honours should consult the Honours Coordinator before re-enrolling for their third year, in order to plan a suitable course structure on which to base an honours year. Towards the end of the third year, intending honours students should consult the Honours Coordinator concerning the composition of their honours year, the thesis topic and the supervisor.

A full description of these units (including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings) appears below. For the most recent descriptions of all units, please access the unit database at www.latrobe.edu.au/udb_public.

UNIT DESCRIPTIONS

SPA1ADA SPANISH ADVANCED 1A (15. CPs Sem. TE-SEM-1 BU.) *Mr Carlos Uxo*

In this unit students focus on practical Spanish language and grammar, and are introduced to modern Spanish and Latin American culture. Written texts, radio and TV material, films and literary texts will be used to sharpen and develop performance in speaking, listening, reading and writing, and to broaden the student's knowledge of Hispanic culture.

Prerequisite: VCE Spanish (or approved equivalent) or coordinator's approval.

Class requirements: Three hours of practical classes per week.

Assessment: One 1-hour end of semester test (30%), written work (2500-words equivalent) (55%), oral work (15%)

SPA1ADB SPANISH ADVANCED 1B (15. CPs Sem. TE-SEM-2 BU.) *Ms Ana Maria Ducasse*

This unit is a continuation of the program of language skills acquisition developed in SPA1ADA. Aspects of Hispanic culture are studied primarily through written and audio-visual material.

Prerequisite: SPA1ADA.

Class requirements: Three hours of practical classes per week.

Assessment: Written work (2500-words equivalent) (55%), one 1-hour end of semester test (30%), oral work (15%)

SPA1BEA SPANISH BEGINNERS 1A (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Mr Carlos Uxo*

Students receive a practical introduction to the Spanish language. They acquire the language largely in simulated real-life situations (a communicative approach to language learning) rather than through translation. Throughout the semester, cultural aspects of the Hispanic world are introduced through language classes.

Class requirements: Two 1.5-hour practical language classes and one 1-hour grammar class per week.

Assessment: Oral/aural work – short tests, exercises (1500-word equivalent) (40%), written work – short tests, exercises (1500-word equivalent) (40%), one 1-hour end of semester written test (20%), one 45-minute listening test (15%)

Prescribed Reading:

Corpas, J., Garmendia, A., Soriano, C. *Aula 1 Libro del alumno* Difusion, Barcelona

SPA1BEB SPANISH BEGINNERS 1B (15 CPs Sem. TE-SEM-2 BU.) *Mr Carlos Uxo*

Students continue to acquire Spanish through a communicative approach to language learning but on a more advanced level than SPA1BEA. Throughout the semester, cultural aspects of the Hispanic world continue to be incorporated into the language classes.

Prerequisite: SPA1BEA

Class requirements: Two 1.5-hour practical language classes and one 1-hour grammar class per week.

Assessment: Oral/aural work – short tests, exercises (1500-word equivalent) (40%), written work – short tests, exercises (1500-word equivalent) (40%), one 1-hour end of semester test (20%)

Prescribed Reading:

Corpas, J., Garmendia, A., Soriano, C. *Aula 2 Libro del alumno* Difusion, Barcelona

SPA2ADA SPANISH ADVANCED 2A (20. CPs Sem. TE-SEM-1 BU.) *Dr Isabel Moutinho*

In this unit, emphasis is placed on further developing the student's written, aural and oral skills, while more advanced aspects of grammar and vocabulary are also studied. Hispanic culture and

literature are examined and discussed, primarily through audiovisual and written material.

Prerequisite: A C grade pass in one of SPA1ADB or SPA1INB, or coordinator's approval.

Class requirements: One 1.5-hour practical language class and one 1.5-hour seminar per week.

Assessment: Written work (2500-words equivalent) (55%), one 1.5-hour end of semester test (30%), regular oral/aural exercises (15%)

SPA2ADB SPANISH ADVANCED 2B (20. CPs Sem. TE-SEM-2 BU.) *Mr Carlos Uxo*

In this unit, we combine emphasis on further development of reading, writing, listening, speaking and grammar skills with further study of Hispanic culture and literary texts. The latter are examined within their socio-historical context.

Prerequisite: SPA2ADA or coordinator's approval.

Class requirements: one 1.5-hour practical language class and one 1.5-hour seminar per week.

Assessment: written work (2500-words equivalent) (55%), regular oral/aural exercises (15%), one 1.5-hour end of semester test (30%)

SPA2BEA SPANISH BEGINNERS 2A (20. CPs Sem. TE-SEM-1 BU.) *Ms Ana Maria Ducasse*

This unit is a continuation of first year beginners Spanish. While emphasising the skills of speaking and listening, we attend to the development of reading and writing skills. The student is involved in a wide range of language acquisition activities and is exposed to the Spanish language and Hispanic culture.

Prerequisite: A C grade pass in SPA1BEB or coordinator's approval.

Incompatible unit: SPA1INA

Class requirements: Two 1.5-hour practical language classes and one 1-hour grammar class per week.

Assessment: Written work (2000-words equivalent) (40%), regular aural exercises (20%), one 1.5-hour end of semester test (30%), one 10-minute oral test (10%)

Prescribed Reading:

Corpas, J., Garmendia, A., Soriano, C. *Aula 3 Libro del alumno* Difusion, Barcelona

SPA2BEB SPANISH BEGINNERS 2B (20. CPs Sem. TE-SEM-2 BU.) *Ms Ana Maria Ducasse*

In this unit, we continue to emphasise performance in the skills of speaking, listening, reading and writing, but on a more advanced level than SPA2BEA. The unit contains elements relating to practical language acquisition and the study of Spanish and Latin American culture.

Prerequisite: SPA2BEA or coordinator's approval.

Incompatible unit: SPA1INB

Class requirements: Two 1.5-hour practical classes and one 1-hour grammar class per week.

Assessment: Written work (2000-word equivalent) (40%), regular oral/aural exercises (30%), one 1.5-hour end of semester written test (30%)

Prescribed Reading:

Borobio, V & Palencia, R *Curso de Espanol para extranjeros. Nuevo ele avanzado* Libro del Alumno, 2003.

SPA2INA SPANISH INTERMEDIATE 2A (20. CPs Sem. TE-SEM-1 BU.) *Dr Isabel Moutinho*

In this unit students combine the further development of language skills through a variety of activities, with the study of aspects of Spanish and Latin American culture and literary texts. Grammatical study is complemented by advanced practical oral work.

Prerequisite: A C grade pass in SPA1INB or coordinator's approval.

Incompatible unit: SPA3BEA

Class requirements: One 2-hour practical language class and one 2-hour seminar per week.

Assessment: Written work (2000-words equivalent) (40%), regular oral/aural exercises (20%), one 1.5-hour end of semester written test (30%), one 15-minute oral exam (10%)

Prescribed Reading:

Corpas, J., Garmendia, A., Soriano, C. *Aula 4 Libro del alumno*
Difusion, Barcelona

SPA2INB SPANISH INTERMEDIATE 2B (20. CPs Sem. TE-SEM-2 BU.) *Dr Isabel Moutinho*

In this unit students combine the further development of language skills through a variety of activities with further study of Spanish and Latin American culture and literary texts. Grammatical study is complemented by advanced practical oral work.

Prerequisite: SPA2INA or coordinator's approval.

Incompatible unit: SPA3BEB

Class requirements: One 2-hour practical language class and one 2-hour seminar per week.

Assessment: Written work (2000-word equivalent) (40%), one 10-minute oral presentation (15%), one 1-hour end of semester written test (30%), one 15-minute oral exam (15%)

SPA2LAT LATIN AMERICA TODAY (20. CPs Sem. TE-SEM-2 BU.) *Dr Isabel Moutinho*

This unit is offered at third year level also.

This unit is an introduction to the historical, political and cultural realities of Latin America through a number of case studies. Attention focuses on such topics as relations between Latin American countries and zones, the United States, Europe and other relevant areas and class, race and gender issues. In relation to these facets of Latin America, a range of written and audio-visual material is studied.

Prerequisite: A C grade pass in SPA1ADB or SPA1INB 1 or SPA2BEB or coordinator's approval.

Class requirements: One 1.5-hour lecture and one 1.5-hour seminar per week.

Assessment: Written work (4000-word equivalent) (80%), one 15-minute oral presentation (20%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

SPA2SPT SPAIN TODAY (20. CPs Sem. TE-SEM-1 BU.) *Coordinator to be advised*

This unit is offered at third year level also. Not available in 2008

SPA3ADA SPANISH ADVANCED 3A (20. CPs Sem. TE-SEM-2 BU.) *Dr Isabel Moutinho*

This is an advanced language unit, which focuses on: (i) aural, oral and written language skills at an advanced level; (ii) aspects of diverse registers of Spanish language and regional variations; (iii) aspects of Spanish and Latin American culture. Students work with a range of audio, audio-visual and written materials, drawn primarily from cinema, television, literature and press.

Prerequisite: A C grade pass in one of SPA2ADB, SPA2INB or coordinator's approval.

Class requirements: One 1.5-hour seminar and one 1.5-hour practical language class per week.

Assessment: Written work (2500-words equivalent) (50%), one 1.5-hour end of semester written test (35%) and one 15-minute oral presentation (15%)

SPA3BEA SPANISH BEGINNERS 3A (20. CPs Sem. TE-SEM-1 BU.) *Dr Isabel Moutinho*

In this unit students combine the further development of language skills through a variety of activities, with the study of aspects of Spanish and Latin American cultural texts. Grammatical study is complemented by advanced practical oral work.

Prerequisite: A C grade pass in SPA2BEB or coordinator's approval.

Incompatible unit: SPA2INA

Class requirements: One 2-hour practical language class and one 2-hour seminar per week.

Assessment: Written work (2000-word equivalent) (40%), regular oral/aural exercises (20%), one 1.5-hour end of semester written test (30%), one 15-minute oral exam (10%)

Prescribed Reading:

Corpas, J., Garmendia, A., Soriano, C. *Aula 4 Libro del alumno*
Difusion, Barcelona

SPA3BEB SPANISH BEGINNERS 3B (20. CPs Sem. TE-SEM-2 BU.) *Dr Isabel Moutinho*

In this unit students combine the further development of language skills through a variety of activities, with the study of aspects of Spanish and Latin American cultural and literary texts. Grammatical study is complemented by advanced practical oral work.

Prerequisite: SPA3BEA or coordinator's approval.

Incompatible unit: SPA2INB

Class requirements: one 2-hour practical language class and one 2-hour seminar per week.

Assessment: written work (2000-word equivalent) (40%), one 10-minute oral presentation (15%), one 1.5-hour end of semester written test (30%), one 15-minute oral exam (15%)

SPA3RCA READING COURSE A (20. CPs Sem. TE-SEM-1 BU.) *Dr Isabel Moutinho*

A limited number of students studying Spanish may be permitted to take an individual reading subject. After consultation with an appropriate member of staff who agrees to act as a supervisor, students wishing to take this unit must submit an outline of the proposed topic and a preliminary bibliography to the unit coordinator for approval. Students may normally enrol in this unit only if they have already completed all other optional subjects available. Students may normally take no more than one Spanish reading course towards their Spanish major.

Prerequisite: Coordinator's approval.

Class requirements: Regular meetings with supervisor.

Assessment: Essay(s) or a research report as arranged for each individual student (5000-words equivalent) (100%)

SPA3RCB READING COURSE B (20. CPs Sem. TE-SEM-2 BU.) *Dr Isabel Moutinho*

A limited number of students studying Spanish may be permitted to take an individual reading subject. After consultation with the appropriate member of staff who agrees to act as a supervisor, students wishing to take this unit must submit an outline of the proposed topic and a preliminary bibliography to the unit coordinator for approval. Students may normally enrol in this unit only if they have already completed all other optional units available. Students may normally take no more than one Spanish reading course towards their Spanish major.

Prerequisite: Coordinator's approval.

Class requirements: Regular meetings with supervisor.

Assessment: Essay(s) or a research report as arranged for each individual student (5000-words equivalent) (100%)

SPA3SCL CONTEMPORARY HISPANIC LITERATURE (20. CPs Sem. TE-SEM-1 BU.) *Coordinator to be advised*
Not available in 2008
SPA3SWW HISPANIC WOMEN'S WRITING (20. CPs Sem. TE-SEM-2 BU.)

To be advised

Not available in 2008

CAT2BEA CATALAN BEGINNERS 2A (20. CPs Sem. TE-SEM-1 BU.)

Coordinator to be advised

This unit is offered at third year level also.

Subject to availability of a Catalan lector and funding.

This is an introduction to the Catalan language and to the culture of that part of Spain in which Catalan is spoken. Regular work with video and audio tapes, written exercises and reading preparation are set. A wide spectrum of audio, video and written materials are available direct from Catalonia, which help to reinforce the everyday use of the language. Various aspects of Catalan civilisation are introduced and the problematic co-existence of Catalan alongside Spanish, especially in relation to Barcelona, is explored.

Prerequisite: Available to students who have passed another Romance language unit, such as first year Spanish or an approved equivalent, and coordinator's approval required.

Class requirements: Three hours of practical classes per week.

Students will be expected to do one hour of self-access language laboratory work per week.

This unit is not available for Study Abroad students.

Assessment: Written exercises (1500-words equivalent) (35%), regular written and oral tests (3500-words equivalent) (65%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

CAT2BEB CATALAN BEGINNERS 2B (20. CPs Sem. TE-SEM-2 BU.)

Coordinator to be advised

This unit is offered at third year level also.

Subject to availability of Catalan lector and funding

In this unit, we continue to emphasise performance in the skills of speaking, listening, reading and writing, but on a more advanced level than CAT2BEA/CAT3BEA. The rich literary and cultural tradition, valued in Catalan society, is discussed and studied.

Prerequisite: CAT2BEA/CAT3BEA or coordinator's approval.

Class requirements: Three hours of practical classes per week. Students will be expected to do one hour of self-access language laboratory work per week.

This unit is not available for Study Abroad students.

Assessment: Written work (1500-words equivalent (30%), one 10-minute oral presentation (10%), regular written and oral tests (3000-words equivalent (60%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

GAL2BEA GALICIAN BEGINNERS 2A (20 CPs Sem. TE-SEM-1 BU.)

Coordinator to be advised

This unit is offered at third year level also.

Subject to sufficient enrolments, staff and funding

This is an introduction to the Galician language and to the culture of that part of Spain in which Galician is spoken. Regular work with video and audio tapes, written exercises and reading preparation are set. A wide spectrum of audio, video and written materials available from Galicia, help to reinforce the everyday use of the language. Various aspects of Galician culture are introduced and the problematic co-existence of Galician alongside Spanish is explored.

Prerequisite: available to students who have passed another Romance language unit, such as first year Spanish or an approved equivalent, and coordinator's approval.

Class requirements: One 1-hour lecture, one 1-hour tutorial and one 1-hour practical class per week. Students will be expected to do one hour of self-access language laboratory work per week.

This unit is not available for Study Abroad students.

Assessment: One 1000-word essay (20%), weekly written exercises (1500-words equivalent) (30%), one 10-minute oral presentation (10%), one 2-hour final test (40%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

GAL2BEB GALICIAN BEGINNERS 2B (20 CPs Sem. TE-SEM-2 BU.)

Coordinator to be advised

This unit is offered at third year level also.

Subject to sufficient enrolments, staff and funding

In this unit we continue to emphasise performance in the skills of speaking, listening, reading and writing, but on a more advanced level than GAL2BEA. The rich literary and cultural tradition of Galicia will be discussed and studied.

Prerequisite: GAL2BEA.

Class requirements: One 1-hour lecture, one 1-hour tutorial and one 1-hour practical class per week. Students will be expected to do one hour of self-access language laboratory work per week.

This unit is not available for Study Abroad students.

Assessment: one 1000-word essay (20%), weekly written exercises (2000-words equivalent) (40%), two 10-minute oral presentations (1000-words equivalent) (20%), one 1-hour final test (20%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

PTG2ADA PORTUGUESE ADVANCED 2A (20. CPs Sem. TE-SEM-1 BU.) *Dr*

Isabel Moutinho

This unit is offered at third year level also.

Offered subject to enrolment numbers, staff and funding availability

In this unit, we aim to consolidate the skills learned in Portuguese Beginners or VCE Portuguese. Students continue to acquire and perfect knowledge of the language through a range of activities involving language laboratory and computer-aided exercises, practical work in small groups and pairs and through the study of Luso-Brazilian culture and society as represented in the news media, in cinema and in selected examples of Luso-Brazilian literature.

Prerequisite: For PTG2ADA: VCE Portuguese.

For PTG3ADA: VCE Portuguese, PTG2BEB or coordinator's approval.

Class requirements: One 1-hour seminar and two hours of practical language classes per week.

This unit is not available for Study Abroad students.

Assessment: 2500-words of written work (50%), regular oral/aural exercises (20%), one 1.5-hour examination (30%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

PTG2ADB PORTUGUESE ADVANCED 2B (20. CPs Sem. TE-SEM-2 BU.) *Dr*

Isabel Moutinho

This unit is offered at third year level also.

Offered subject to enrolment numbers, staff and funding availability

This unit is set at a higher level than first semester advanced Portuguese and aims at consolidating spoken and written skills by placing a greater emphasis on the socio-historical and cultural context of the Portuguese language in its Brazilian, Portuguese, African and Asian varieties. A wide range of materials will be studied, drawn from cinema, the news media, representative writings on Luso-Brazilian history and society and representative examples of literature from Portuguese-speaking countries.

Prerequisite: PTG2ADA/PTG3ADA or coordinator's approval.

Class requirements: One 1-hour seminar and two hours of practical language classes per week.

This unit is not available for Study Abroad students.

Assessment: 2500-words of written work (50%), regular oral/aural exercises (20%), one 1.5-hour examination (30%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

PTG2BEA PORTUGUESE BEGINNERS 2A (20. CPs Sem. TE-SEM-1 BU.) *Dr*

Isabel Moutinho

This unit is offered at third year level also.

Offered subject to enrolment numbers, staff and funding availability

This is a practical introduction to the Portuguese language and is particularly recommended to students who have a prior knowledge of another Romance language. It is an intensive unit in which the beginning student acquires the skills of speaking and listening, while developing abilities in reading and writing. Students acquire the language through participation in a range of activities (through language laboratory exercises, computer-aided tasks, role-play in pairs and small groups) and through the study of a wide spectrum of audio, video and written materials. Various aspects of Luso-Brazilian culture are studied throughout. Students may enrol in this unit at either second year level or third year level but not both.

Prerequisite: A C-level pass in first year French, Italian or Spanish and coordinator's approval.

Class requirements: One 1-hour seminar and two hours of practical language classes per week.

This unit is not available for Study Abroad students.

Assessment: One 1.5-hour written examination (20%), 2500 words of written exercises (50%), regular oral/aural exercises (30%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

PTG2BEB PORTUGUESE BEGINNERS 2B (20. CPs Sem. TE-SEM-2 BU.) *Dr*

Isabel Moutinho

This unit is offered at third year level also.

Offered subject to enrolment numbers, staff and funding availability

In this unit, we continue to emphasise performance in the skills of speaking, listening, reading and writing, but on a more advanced level than PTG2BEA/PTG3BEA. The unit contains elements related to

practical language acquisition and the study of Luso-Brazilian culture through film and text.

Prerequisite: PTG2BEA/PTG3BEA or coordinator's approval.

Class requirements: One 1-hour seminar and two hours of practical language classes per week.

This unit is not available for Study Abroad students.

Assessment: One 1.5-hour examination (20%), 2500-words of written work (50%), regular oral/aural exercises (30%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Theatre and drama

Program Coordinator: Mr Geoffrey Milne.

The Theatre and Drama Program offers two introductory first year units and a range of second- and third year units.

Theatre and drama units include a variety of disciplinary approaches, some of which are theatre theory, performance, theatre history, dramatic literature, genre studies, public speaking and criticism. There is some opportunity for performance making and theatre production.

While the program's offerings are not intended as theatre arts training, many of its units include a substantial component of practical work.

Play going is an important part of all drama units and reviews of performances seen are part of the required written work. Intending students should note that some additional expenditure is required for some four to five stipulated performances during the year.

Block bookings are sometimes arranged and accordingly prices are as low as possible. Further information about all aspects of theatre and drama units is available in theatre and drama course brochures obtainable from the program office.

Selection of students into the first year drama unit DRA1PBP

There is a quota on enrolments in the first year drama unit DRA1PBP with three basic criteria for selection. These are academic

competence, proven interest in and/or aptitude for theatre studies and commitment to the unit. Students are asked to complete a questionnaire at the time of enrolment. Final selection is based on tertiary entrance rank, the questionnaire and a short interview.

Applicants will be informed of their status as soon as possible after selection is completed. Unsuccessful applicants must formally vary their enrolment to delete the unit.

Although there is no quota on the other first year drama unit, students are asked to speak to a member of the drama staff to sign up for their seminar sessions.

Quotas in later year units

All enrolments are subject to quota. Unless otherwise stated in the unit descriptions, quota places are determined in consultation with students in late October each year, with preference being given to students completing their degrees in the year of enrolment.

Presentations

In DRA1PBP Process Based Performance and several other units, students are required to prepare, in small groups, selected scenes from plays or group-devised scripts for performance to, and subsequent discussion with, other students taking the unit. These non-public performances are called presentations and students can contribute to them in non-performing capacities if they wish, but the presentations are a required part of the class work. Owing to timetabling difficulties, it is normally necessary for students to attend on one or more evenings or weekend days during the semester for the presentations. Precise information will be given at the beginning of each unit.

Assessment

Assessment in drama maintains a balance between the reflective and practical aspects of the discipline. In all drama units, students must pass the written work component in order to pass the unit.

The balance between a range of assessment tasks varies from one unit to another. In seminar/workshop units written tasks will normally occupy a greater proportion of the assessment tasks than workshop presentations and exercises, while in production and performance units this is reversed.

Attendance at workshops and seminars is obligatory. Repeated absences without acceptable reasons will result in failure. There is always provision for special consideration and for consultation over the assessment of individual students.

Programs of study

Students who wish to satisfy the requirements for the degree with a major in drama must complete 130 credit points, with at least 60 credit points at third year level, as follows: DRA1TKP (15 credit points) and DRA1PBP (15 credit points) or approved equivalent, plus a minimum of 100 credit points from second/third year drama units. Students majoring in theatre and drama will normally need to take a combination of reflective academic and practical units.

Teaching period	Unit title	Unit code
First year units (15 credit points)		
TE-SEM-1	Theatre Knowledges and Practice	DRA1TKP
TE-SEM-2	Process Based Performance	DRA1PBP
Second year unit (20 credit points)		
TE-SEM-2	Performance Making	DRA2PEM
Second or third year units (20 credit points)		
TE-SEM-1	Australian Drama from 1955 to the Present Day	DRA2AUD/DRA3AUD
TE-SEM-1	Modern Drama and Acting Identity	DRA2MOA/DRA3MOA
TE-SEM-1	Persuasion and Public Speech	DRA2PPS/DRA3PPS
TE-SEM-1	Theatre Production ¹	DRA2TPR/DRA3TPR
TE-SEM-1	Theatre Spaces and Stages: architecture, production and community	DRA2TSS/DRA3TSS
TE-SEM-2	Intercultural Performance ¹	DRA2IPF/DRA3IPF
TE-SEM-2	Shakespeare in Performance	DRA2SIP/DRA3SIP
TE-SEM-2	Theatre and Theory ¹	DRA2TAT/DRA3TAT
TE-SEM-2	Writing, Internet, Performance	DRA2WIP/DRA3WIP
Third year units (20 credit points)		
TE-SEM-2	Advanced Performance Making	DRA3APM
TE-SEM-2	Drama Project: group production or individual research	DRA3PRO

Key: ¹ Not available in 2008.

Honours

Students are admitted into the honours program based on the completion of requirements for a major in Theatre and Drama. There are two options in the honours program:

- two coursework units and a dissertation of 12000 to 15000 words, and
- two coursework units and a studio performance/dissertation of 8000 words.

Interested students are encouraged to consult the coordinator. A pamphlet offering a detailed description of the honours course is available from the program office.

A full description of these units (including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings) appears below. For the most recent descriptions of all units, please access the unit database at www.latrobe.edu.au/udb_public.

DRA1PBP PROCESS BASED PERFORMANCE (15. CPs Sem. TE-SEM-2 AW, BU.) *Ms Meredith Rogers*

Students will engage in theatre practice and performance processes. These will involve the development of group presentations in a range of models, including group-devised performance and play script interpretation, leading to studio performance for an invited audience. This introduces foundation skills in performance, theatre production, performance- audience interactions, group-devised scripts, design and technical operation. Students will be expected to analyse and write about the elements of professional theatre productions that correspond with their own production work through theatre reviewing.

Recommended Prior Studies: DRA1TKP.

Quota: 100. Implementation based on assessment in DRA1TKP

Class requirements: Two 2-hour workshops.

Assessment: One group-devised performance (20 minutes) and two performed studio exercises (each 15 minutes) (80%), one 800-word review of professional productions (20%)

Preliminary Reading:

Oddey, A. *Devising theatre* Routledge 1994.

DRA1TKP THEATRE KNOWLEDGES AND PRACTICE (15. CPs Sem. TE-SEM-1 AW, BU.) *Professor Peta Tait*

In this unit, students are introduced to theatre and its knowledges, acting theory, theatre history and dramatic criticism. Studies of the actor, director, playwright, and critic and their work in theatre companies, will be approached using well-known examples from twentieth century theatre history and practice. Knowledges of theatre involve understanding its dynamic and interactive processes and the considerable changes in professional roles over time. While the focus is on the dominant forms of modern western theatre, consideration will be given to challenges from the innovative work of contemporary Australian and overseas practitioners.

Class requirements: One 1-hour lecture and one 2-hour seminar/workshop.

Assessment: One short written exercise (10%), one 2000-word essay (50%), contribution to practical class work (20%), one group research presentation (800-words equivalent) (20%)

Preliminary Reading:

Hodge, A. *Twentieth century actor training* Routledge 1999.

DRA2AUD AUSTRALIAN DRAMA FROM 1955 TO THE PRESENT DAY

(20. CPs Sem. TE-SEM-1 AW, BU.) *Mr Geoffrey Milne*

This unit is offered at third year level also.

This is a study of the development of Australian drama and theatre over the last 50 years, in the context of past and current policy and practice in the professional theatre. Students are engaged upon course-work based on a representative selection of texts from the period and Australian plays in performance.

Prerequisite: 30 credit points of first year drama.

Quota: 30. Places are allocated on academic merit, with preference being given to third year students majoring in Drama.

Class requirements: One 2-hour lecture or seminar and one 3-hour workshop per week. Students are expected to attend a number of theatre performances in Melbourne during the year.

Assessment: One 1500-word performance review exercise (30%), one

seminar presentation (2000-words equivalent) (40%), practical class work contributions (30%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Preliminary Reading:

Carroll, D. *Australian contemporary drama* (Revised edn) Currency 1995.

Holloway, P. (Ed) *Contemporary Australian drama* Currency 1987.

Radic, L. *The state of play* Penguin 1991.

DRA2IPF INTERCULTURAL PERFORMANCE (20 CPs Sem. TE-SEM-2 BU.)

Ms Meredith Rogers

This unit is offered at third year level also.

Not available in 2008

DRA2MOA MODERN DRAMA AND ACTING IDENTITY (20. CPs Sem. TE-SEM-1 BU.) *Professor Peta Tait*

This unit is offered at third year level also.

An introduction to the modern drama of realism, which dominated twentieth-century theatre. The plays of Ibsen and Chekhov dominated by emotions of love and fear are considered and their interpretation in Stanislavski's styles of acting. The theatrical realism of these two styles is compared with Brecht's plays and his ideas of acting in epic theatre. The unit is taught through a combination of theatre history, dramatic literature and some exercises in acting and staging. It investigates the social meanings of different approaches to emotions, realism, acting and staging identity.

Prerequisite: 30 credit points in first year.

Class requirements: One 3-hour lecture or seminar each week.

Assessment: One 2500-word essay (50%), one 1000-word exercise (20%), contributions to practical class work (10%), one 1000-word exercise or creative equivalent (20%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Preliminary Reading:

Garner, S *Bodied spaces* Cornell University Press 1994.

Styan, J L *Modern drama in theory and practice, Vol. 1* Cambridge UP 1983.

Prescribed Reading:

Brecht, B *Brecht on theatre* trans. J. Willett, Eyre Methuen 1964.

Chekhov, A. *Five plays* trans. Hingley, OUP 1998.

Ibsen, H *Four major plays* trans. Macfarlane and Arup, OUP 1981.

Brecht, B *Mother Courage and her children* Methuen student editions 1983.

Brecht, B *The good person of Szechwan* Methuen.

DRA2PEM PERFORMANCE MAKING (20. CPs Sem. TE-SEM-2 AW, BU.) *Ms Meredith Rogers*

Ms Meredith Rogers

In this unit students develop and enhance skills in performance and performance making. Class-work covers aspects of voice, movement and improvisation. Students generate performance text based on some of the following: music-theatre, visual and design-based performance work, physical transformational performance techniques and the study of a range of performance languages. There are public performances at the end of semester.

Prerequisite: 30 credit points of first year drama.

Quota: 20. Places will be allocated based on lecturers' recommendations and audition and interview in first semester.

Class requirements: Two 3-hour practical workshops per week.

Assessment: Logbook and 1500-word exercise (33%), Workshop and rehearsal toward group public performance (50 minutes maximum) (67%). The criteria used in assessing practical work are set out in the unit study guide

DRA2PPS PERSUASION AND PUBLIC SPEECH (20. CPs Sem. TE-SEM-1 BU.) *Coordinator to be advised*

This unit is offered at third year level also.

This is a workshop-based unit with three aims. Firstly we provide training in public speaking and for other situations, such as debate and discussion, which call for confident, organised, informed and persuasive speech. The techniques and principles are taught and the skills of critical listening developed. Students analyse examples of public speech, live, recorded and written. Material for analysis is drawn from a variety of discourses and periods and is chosen to engage with the particular disciplinary interests of the group. The third aim is to introduce some theoretical reflections on persuasive speech. There is a brief outline of classical rhetoric and some attention to recent theorists of what has been called 'the new rhetoric'.

Quota: 24. Places are allocated on academic merit, with preference being given to third year students majoring in Drama.

Class requirements: One 1-hour lecture and one 2-hour workshop per week.

Assessment: One 5 to 10-minute formal speech (20%), one 1500-word written exercise (25%), practical class exercises (15%), two 5 to 10-minute formal speeches (40%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Prescribed Reading:

MacArthur, B. (Ed) *The Penguin book of twentieth-century speeches* Penguin 1993.

DRA2SIP SHAKESPEARE PERFORMANCE (20. CPs Sem. TE-SEM-1 AW. TE-SEM-2 BU.) *Coordinator to be advised*

This unit is offered at third year level also.

It is intended that students develop both a critical and a practical understanding of Shakespeare in different performance contexts through intensive analysis of five Shakespeare plays and two plays by his contemporaries Marlowe and Webster. A range of special issues bearing on the performance of Shakespeare in different cultures are addressed. These include issues of actor-training (voice-cultivation, movement, use of stage) verse speaking, character building and issues of historical, cultural and intercultural contextualisation.

Prerequisite: 30 credit points of first year drama.

Quota: 30. Places are distributed evenly over the re-enrolment period, with preference on each day being given to students completing their degrees in the year of enrolment.

Class requirements: One 2-hour lecture/seminar and one 3-hour workshop per week.

Assessment: One 1500-word essay (30%), one 2500-word essay (40%), contributions to practical workshops (30%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Prescribed Reading:

Shakespeare W. *A midsummer night's dream* New Penguin Shakespeare.

Shakespeare W. *Hamlet* New Penguin Shakespeare 1980.

Shakespeare W. *Macbeth* New Cambridge 1989.

Shakespeare W. *Romeo and Juliet* New Penguin 1970.

This unit is offered at third year level also.

Not available in 2008

DRA2TSS THEATRE SPACES AND STAGES: ARCHITECTURE, PRODUCTION AND COMMUNITY (20 CPs Sem. TE-SEM-1 BU.) *Ms*

Meredith Rogers

This unit is offered at third year level also.

Western theatre began outdoors at the foot of the Acropolis. The management of exterior and interior spaces has been a major theme in the changing shapes of its performance places ever since. In this unit students will investigate theatre architectures; the ways in which theatre spaces interact with the kinds of performance produced in them and the spatial practices of the communities they embody and reflect. Stage and lighting design and the mechanics of theatre operation will also be examined.

Prerequisite: 30 credit points of first year drama.

Class requirements: One 1-hour lecture and one 2-hour seminar per week.

Assessment: One group presentation (1,250-words equivalent) (25%), one 1,250-word exercise (25%), one 2000-word essay (40%), class exercises and quizzes (500-words equivalent) (10%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

Prescribed Reading:

Wiles, D. *A short history of Western performance space* Cambridge University Press 2003

Recommended Reading:

Carlson, M. *Places of performance: the semiotics of theatre architecture* Cornell University Press 1989

McAuley, G. *Space in performance: making meaning in the theatre* University of Michigan Press 2000

DRA2WIP WRITING, INTERNET, PERFORMANCE (20 CPs Sem. TE-SEM-2 BU.) *Professor Peta Tait*

This unit is offered at third year level also.

Students are introduced to creative writing in the diverse styles used in spoken word performances. Students research the politics of cyberspace and electronic arts and investigate internet sites, which deliver on-line performances. Original writing will be interpreted for delivery as performance and some work chosen to be developed for broadcast on the internet towards the end of the semester. The creative writing styles could be dialogues or character monologues, fiction or non-fiction, poetic word assemblages or realism. The work of contemporary Australian writers involved in performance making over twenty-five years will be studied. These texts will be contextualised with an introduction to post-modern theories (Baudrillard, Lyotard, Jameson) and emphasis given to continuities with modernism.

Prerequisite: 120 credit points of first year units.

Class requirements: One 3-hour seminar/lecture per week.

Assessment: One 500-word assignment in a specified style (15%), one 1500-word assignment in an open style (30%), one 2500-word written text or development of performance text for the internet (40%), research and group demonstration (500-words equivalent) (15%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students

Allen, R & Pearlman, K (eds) *Performing the unnameable* Currency/Realtime 1999

DRA3APM ADVANCED PERFORMANCE MAKING (20. CPs Sem. TE-SEM-2 AW, BU.) *Ms Meredith Rogers*

This unit is aimed specifically at students interested in directing for the theatre and is intended to develop and extend the skills in performance making acquired through DRA2PEM by giving students the opportunity for individual, self-directed work. In this sense it is similar to an independent studies program. Students undertaking the unit research devise and present solo or small group performance pieces. Students wishing to take this unit must have demonstrated a capacity for independent creative work. A project proposal must be submitted in the last week of semester one and a contract negotiated with the coordinator before the commencement of the second

semester. There will be public performances at the end of semester.

Prerequisite: DRA2PEM or DRA2IPF or equivalent.

Quota: 10. Places will be allocated based on lecturers' recommendations and interview.

Class requirements: Three 2-hour practical workshops per week, plus weekly consultations with the coordinator.

Assessment: Log book and 1500-word exercise (33%), Workshop and rehearsal toward group public performance (30 minutes maximum) (67%). The criteria used in assessing practical and performance work are set out in the unit study guide.

DRA3PRO DRAMA PROJECT: GROUP PRODUCTION OR INDIVIDUAL RESEARCH (20 CPs Sem. TE-SEM-2 AW, BU.) *Mr Geoffrey Milne*

In this unit, students develop and complete a full-length group production based on an existing contemporary Australian drama script and assume the roles associated with the professional theatre industry. Students will perform for a public audience either on campus or in the community. Alternatively, students may undertake a research project into the work of one or more Australian dramatists.

Prerequisite: DRA2/3AUD.

Quota: 24. Selection based on academic merit and interview.

Class requirements: Two 3-hour workshops per week plus regular meetings with staff and public performances.

Assessment: Consistent, inventive and co-operative effort towards rehearsals and production tasks (35%), one 1500-word log-book and project report (30%), clarity, consistency and expressiveness in performance (35%). The criteria used in assessing the production work are outlined in the subject's handout.

Faculty of Law and Management

Introduction to the Faculty

The Faculty of Law and Management was established in 1997. The Faculty aims to perform at a world class level in teaching and research, supporting this vision through a commitment to continued improvement in quality and effectiveness.

The Faculty of Law and Management has an international perspective and actively encourages international exchanges for staff and students, cooperative arrangements with overseas universities and involvement in international research projects. The Faculty also has strong links with professions, industry, schools, community groups and local government.

With a staff of over 200, the Faculty's four schools: Law, Business, the Graduate School of Management, and Sport, Tourism and Hospitality Management offer a broad range of courses supported by comprehensive specialist subjects across the disciplines of law, business law, economics, accounting, marketing, finance, management, tourism and hospitality.

The Faculty currently has an enrolment of over 6000 undergraduate and 1400 post graduate students, across 5 metropolitan and regional campuses and a number of external sites. Approximately 35 per cent of these students are international from over 40 different countries.

Faculty Academic Services Office – enquiries

Location: Martin Building, Level 3, Room 349

The Faculty Academic Services Office provides overall coordination of academic services, in liaison with University and school offices.

Academic progress

The Faculty Board is responsible for reviewing the academic progress of students and ensures that students' academic progress is in accordance with the requirements of the degree. Students who do not maintain a satisfactory rate of academic progress will be required to 'show cause' (explain why their re-enrolment should be permitted) to the Faculty Academic Progress Committee (APC). The APC will take into account problems or circumstances which may have affected a student's performance throughout the year.

A student's academic progress is assessed after each progression period in line with the conditions set out in the University's Academic Progress Policy. All students should familiarise themselves with the policy, which can be found at www.latrobe.edu.au/policies/

Language and Academic Skills Unit (LASU)

Location: Martin Building Room 370

Tel: (03) 9479 2665

Email: r.thomas@latrobe.edu.au

The Faculty believes it is important to develop the language and academic skills (LAS) of all students early in their studies. The Language and Academic Skills Unit (LASU) in the Faculty of Law and Management assists undergraduate and postgraduate students to present university-standard work. Individual LASU support for undergraduate students is also provided at the school level; and honours and postgraduate students may make an appointment with the LASU coordinator. Non-native English-speakers should contact the Academic Skills (ESL) Unit on Level 4 of the Humanities 3 Building.

Courses and programs offered

Double degree courses

Double degrees allow students to undertake two courses at the same time, giving them a dual qualification after four or five years. By exploring two separate fields of study students enrich and widen their educational, personal and social experiences and may significantly enhance their employment prospects. The double degrees available through the Faculty are described under each school.

Double degree courses administered by other faculties

Faculty of Health Sciences

- Bachelor of Health Sciences/Bachelor of Business
- Bachelor of Health Science/Bachelor of Commerce
- Bachelor of Health Science/Bachelor of Economics

See the Faculty of Health Sciences chapter for full course details.

Faculty of Science, Technology and Engineering

- Bachelor of Agricultural Science/Bachelor of Business
- Bachelor of Information Technology /Bachelor of Business
- Bachelor of Civil Engineering/Bachelor of Business
- Bachelor of Commerce/Bachelor of Information Technology
- Bachelor of Computer Science/Bachelor of Commerce
- Bachelor of Finance/Bachelor of Science
- Bachelor of Information Systems/Bachelor of Business
- Bachelor of Science/Bachelor of Commerce

See the Faculty of Science, Technology and Engineering chapter for full course details.

External and offshore programs

The Faculty offers its Bachelor of Business degree through a number of external and offshore locations. These include Malaysia, Hanoi, and Sydney.

Offshore programs

Malaysia: Nilai International College

The University works closely with Nilai International College, in the heart of Malaysia's multi-media super corridor, 45 kilometres south of the capital, Kuala Lumpur.

La Trobe University offers a Bachelor of Business degree, as well as the La Trobe Pre-University Foundation Year. Students may complete a Bachelor of Business degree with a single or double major in any of the following:

- management
- marketing
- accounting
- human resource management, or
- financial management.

For complete course structures and admission requirements for each degree, please see the School of Business section of this chapter.

La Trobe University lecturers regularly visit the College to teach program units and to ensure quality.

For further information contact:

Nilai International College

Bandar Baru Nilai, Negri Sembilan
Malaysia

Email: enquiry@nilai.edu.my

Website: www.nilai.edu.my

Hanoi: Hanoi University

The University works closely with the Hanoi University (HANU) where it offers a Bachelor of Business degree as well as the La Trobe University Diploma of Business Administration.

Students wishing to undertake the Bachelor of Business program initially undertake the Diploma of Business Administration and, upon satisfactory completion of the program, may enter the second year of the Bachelor of Business. Students may complete a Bachelor of Business degree with a single or double major in any of the following:

- Financial management
- Management
- Marketing

La Trobe University staff regularly visit the University to teach program units and to ensure quality. The University follows the same teaching period schedule as that of La Trobe campuses in Victoria.

For further information contact:

Hanoi University
Tel: +84 4 8544 338
Email: hufs@netnam.vn
Website: www.hufs.edu.vn

External programs

Australian Campus Network (ACN)

In conjunction with the Australian Campus Network (ACN), La Trobe University offers the Bachelor of Business and the Bachelor of International Business in Sydney. These programs are open to international and Australian students.

Degree requirements

- Students must complete a course of units accumulating a minimum total of 360 credit points (24 units) including 7 first year core units, one or two eight unit majors, and elective units. These courses are designed to be completed within two or three years of full-time study, although part-time study is possible.
- Students may not take a second year or third year unit unless they have completed either their first year, or at least four first year units and are concurrently completing the remainder.
- Students should undertake 120 credit points at each year level.

For further information contact:

Australian Campus Network (ACN)
Tel: +61 2 9397 7600
Email: info@auscampus.net
Website: www.auscampus.net

William Blue International Hotel Management School

La Trobe University has entered into an agreement with the William Blue International Hotel Management School to offer the final year of the Bachelor of Business (Tourism and Hospitality) at the Sydney campus of the William Blue International Hotel Management School. This program is open to Australian and international students and is offered on a fee-paying basis only.

For further information contact:

William Blue International Hotel Management School
Tel: +61 2 9955 1122
Website: www.billyblue.com.au

Offshore and external students wishing to transfer to a La Trobe University Victorian campus

Students admitted to a Faculty of Law and Management course at an offshore or external location are able to apply to transfer to courses conducted at the Melbourne (Bundoora), Bendigo and Albury-Wodonga campuses of La Trobe University for part of their studies.

Academic requirements

When evaluating requests for transfer, the following information will be taken into account:

- Academic results:** To be considered for a transfer it is expected that students applying for a course within the Faculty of Law and Management will have a C+ average in their current course of study. Students applying to transfer to the Bachelor of Laws will require a B+ average to be considered.
- Length of time studying:** Students applying for transfer will normally have completed the equivalent of one full-time year of study before being considered.

In addition, international students must meet the following requirements:

- A minimum English language requirement of an IELTS (or equivalent) score of 6, with no band falling below 6. For entry into the Bachelor of Laws students must have met the minimum English language requirements of an IELTS (or equivalent) score of 6.5, with no band falling below 6.
- Students who wish to apply for transfer to a course in another faculty must contact that faculty directly for information on transfer conditions.

Additional information for international students

International students who transfer to a course conducted at a La Trobe University Victorian campus will be liable for the fees payable for that course in the year that they transfer.

For further information regarding visa requirements, fees and Australian government legislative requirements contact:

International Programs Office

Tel: +61 3 9479 1199

Email: international@latrobe.edu.au

Web: www.latrobe.edu.au/international/

Units offered by the Faculty

A full description of Law and Management units appears at the end of each section of this chapter, in alphabetical order by unit code.

Students should note that units published in the hardcopy *Handbook* are subject to change and should refer to the Unit Database for up-to-date information (www.latrobe.edu.au/udb_public).

School of Business

Department of Accounting:

Head of Department: Professor Kamran Ahmed

Department of Economics and Finance:

Head of Department: Professor Gary Magee

Department of Management and Marketing:

Head of Department: Professor David Brown

The School of Business provides high quality education and training across a broad range of disciplines including:

- accounting
- business
- economics
- electronic commerce
- finance
- human resource management
- international business
- management
- marketing.

The programs blend theoretical and applied knowledge and skills consistent with international best practice to prepare students for professional careers as accountants, bankers, economists, stockbrokers, and managers able to work in Australia or overseas. Graduates are expected to work effectively in a multidisciplinary team environment and be skilled communicators. They will learn independently, have sound problem-solving and decision-making skills, and have an understanding of ethical and social responsibilities.

Upon completion of professionally accredited courses and unit sequences, students may qualify for membership of CPA Australia, the Institute of Chartered Accountants in Australia, the Economic Society of Australia, the Financial Services Institute of Australasia, or the Australian Marketing Institute.

Students are responsible for meeting all unit and course requirements and may be refused admission to a final examination if all requirements have not been completed.

A unit of study includes attendance at lectures and tutorials, completion of assignments, essays, and demonstration of learning on the final examination. Performance on all assessments will be judged both on content and presentation.

Students may seek advice from course advisers in the school to resolve questions on these matters.

In addition to the regular teaching periods, the school conducts a Summer School each year over the January/February period. Information regarding Summer School is normally available by the beginning of teaching period 2.

Courses offered by the School of Business

Melbourne (Bundoora)

- Bachelor of Business
- Bachelor of Commerce
- Bachelor of Economics
- Bachelor of Finance
- Bachelor of International Business
- Bachelor of Arts/Bachelor of Commerce
- Bachelor of Arts/Bachelor of Economics
- Bachelor of Business/Bachelor of Asian Studies
- Bachelor of Commerce/Bachelor of Economics

Postgraduate programs¹

- Graduate Diploma in Accounting
- Graduate Diploma in Business Studies
- Graduate Diploma in Econometrics
- Graduate Diploma in Economics
- Graduate Diploma in Information Systems Management
- Postgraduate Diploma in Accounting
- Postgraduate Diploma in Economics
- Postgraduate Diploma in Human Resource Management
- Postgraduate Diploma in Marketing
- Master of Professional Accounting (Coursework)
- Master of Accounting and Financial Management (Coursework)
- Master of Financial Analysis (Coursework)
- Master of Financial Analysis/Master of Professional Accounting (Coursework)
- Master of Information Systems Management (Coursework)
- Master of Business Information Management and Systems
- Master of Business by Research
- Master of Commerce by Research
- Master of Economics by Research
- Doctor of Philosophy

Key: ¹ For full course descriptions, refer to the Postgraduate Handbook.

Albury-Wodonga

- Bachelor of Business¹
- Bachelor of Commerce¹
- Graduate Diploma in Accounting²
- Graduate Certificate in Management²
- Graduate Diploma in Management²
- Master of Business (Management)²

Key: ¹ For full course descriptions, refer to the Albury-Wodonga chapter in this Handbook.

² For full course descriptions, refer to the Albury-Wodonga chapter in the Postgraduate Handbook.

Bendigo

- Bachelor of Business¹
- Bachelor of Commerce¹
- Graduate Diploma in Accounting²
- Graduate Diploma in Business Studies²

Key: ¹ For full course descriptions, refer to the Bendigo chapter in this Handbook.

² For full course descriptions, refer to the Bendigo chapter in the Postgraduate Handbook.

Mildura

- Bachelor of Business¹
- Bachelor of Commerce¹
- Graduate Diploma in Accounting²

Key: ¹ For full course descriptions, refer to the Mildura chapter in this Handbook.

² For full course descriptions, refer to the Mildura chapter in the Postgraduate Handbook.

Shepparton

- Bachelor of Business¹
- Bachelor of Commerce¹
- Graduate Diploma in Accounting²
- Graduate Diploma in Business Studies²

Key: ¹ For full course descriptions, refer to the Shepparton chapter in this Handbook.

² For full course descriptions, refer to the Shepparton chapter in the Postgraduate Handbook.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this section. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public

Bachelor of Business (LBB)

Admission requirements

Admission requirements are completion of VCE units 3 and 4 of English (any) with a minimum study score of 20 and completion of units 1 and 2 of General Mathematics or Mathematical Methods. Applicants with comparable qualifications will be considered. A limited number of students may also be considered under Special Entry Schemes.

Course structure

The Bachelor of Business is offered at five of the Victorian campuses of La Trobe University: Albury-Wodonga, Bendigo, Melbourne (Bundoora), Mildura, and Shepparton. This course is also offered in association with partner organisations at other sites in Australia and overseas. In Australia, the Bachelor of Business is offered by the Australian Campus Network in Sydney. It is also offered in France, Malaysia and Vietnam (see below).

The structure of the 24-unit degree program enables students to complete a core of seven first year foundation units, followed by one or two eight-unit majors in subsequent years. The units that comprise the first year core and majors may vary slightly across sites. These minor variations reflect differences in specialised interests and expertise and the particular needs of students at different sites. Details of the specific units offered at the five Victorian campuses are listed in this *Handbook* under the respective campus entries. Details of programs offered at associated tertiary institutions are published separately by each institution.

Majors offered by campus

Majors/Campuses	BU	AW	BE	MI	SH
Accounting	BCom	BCom	BCom	BCom	BCom
Business Law			✓		
Economics/Business Economics	✓		✓		
Electronic Commerce		✓			
Financial Management	✓				
Human Resource Management	✓		✓		✓

Human Resource Management	✓		✓
International Business	B.IntBus		
Management	✓	✓	✓
Marketing	✓	✓	✓

Notes: Accounting at Albury-Wodonga, Bendigo, Melbourne (Bundoora), Mildura and Shepparton is offered as a separate degree: Bachelor of Commerce. International Business is offered at Melbourne (Bundoora) and ACN as a separate degree: Bachelor of International Business.

External programs are offered at the following campuses: Australian Campus Network; Sydney, Hanoi University, Vietnam (HANU); Nilai International College, Malaysia (Nilai).

Degree requirements

Students must complete a course of units accumulating a minimum total of 360 credit points, of which at least 255 must be units offered in the School of Business. The course is designed to be completed within three years of full-time study, although part-time study is possible. Maximum course duration is 10 years.

Students should undertake 120 credit points at each year level, and must undertake at least 120 credit points at third year level including 90 credit points at third year level from the School of Business. Variations to this structure are subject to approval by a School of Business course adviser.

The degree is designed to allow completion of two majors or one major and elective units. At least one major must be in a business discipline. A business major will consist of eight units. Outside majors may include a language specialisation or other pre-approved sequences. Details can be obtained from the School of Business.

Melbourne (Bundoora) Campus program

Students must pass compulsory and elective units listed below. All units are worth 15 credit points.

First year

Teaching Period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Accounting for Management Decisions	ACC1AMD
TE-SEM-1 or TE-SEM-2	Business Law	LST1BSL
TE-SEM-1 or TE-SEM-2	Compulsory unit in chosen major	
TE-SEM-1 or TE-SEM-2	Foundations of Management	MGT1FOM
TE-SEM-1 or TE-SEM-2	Introductory Statistics for Business	ECO1ISB
TE-SEM-1 or TE-SEM-2	Macroeconomics	ECO1IMA
TE-SEM-1 or TE-SEM-2	Management Information Systems	BUS1MIS
TE-SEM-1 or TE-SEM-2	Microeconomics	ECO1IMI

Second year

Teaching period	Unit title
TE-SEM-1 or TE-SEM-2	Three second year School of Business units according to chosen major
TE-SEM-1 or TE-SEM-2	Five second year elective units

Third year

Teaching period	Unit title
TE-SEM-1 or TE-SEM-2	Four third year School of Business units according to chosen major
TE-SEM-1 or TE-SEM-2	Two third year School of Business elective units
TE-SEM-1 or TE-SEM-2	Two third year elective units

Majors

Students can major in one or two of the following:

Human Resource Management

Unit title	Unit code
Human Resource Development	MGT2HRD
Human Resource Information Systems	MGT3HRI
Human Resource Management	MGT2HRM
Industrial Relations	ECO3IRE
Interpersonal Skills and Conflict Management	MGT2ISC
Organisational Behaviour	MGT2OBE
Organisational Change and Development	MGT3OCD
<i>plus one of:</i>	
Employment and Labour Relations Law	LAW3ELR
International Human Resource Management	MGT3IHR

Business Economics

Unit title	Unit code
Finance	FIN2FIN
Intermediate Statistics for Business	ECO2ISB
Introduction to Quantitative Analysis	ECO1IQA
Managerial Economics	ECO2MEC
<i>plus four of:</i>	
Business Analysis and Simulation	ECO3BAS
Corporate Finance	FIN3CFI
Cost-Benefit Analysis	ECO3CBA
Decision Analysis with Spreadsheets	ECO3DAS
Economics of Sport	ECO3EOS
Economics of the Internet	ECO3INT
Financial Risk Management	FIN3FRM
Industrial Organisation	ECO3IND
Industrial Relations	ECO3IRE
International Trade	ECO3ITR
Marketing Economics	ECO3MKE
Mergers and Acquisitions	FIN3MAQ

Management

Unit title	Unit code
Business Ethics	MGT2BET
Finance	FIN2FIN
Human Resource Management	MGT2HRM
International Management	MGT3IMG
Organisational Behaviour	MGT2OBE
Organisational Change and Development	MGT3OCD
Organisational Structure and Design	MGT3OSD
Strategic Management	MGT3SMG

Marketing

Unit title	Unit code
Consumer Behaviour	MKT2CBE
Marketing Communication	MKT3MCO
Marketing Law	LST2MAL

Marketing Principles and Practice	MKT2MPP
Marketing Research	MKT3MRE
Services Marketing	MKT2SMA
Strategic Marketing	MKT3SMK
<i>plus one of:</i>	
Electronic Marketing*	MKT3ELM
International Marketing	MKT3IMK

Key: * Offered online from the Albury-Wodonga Campus.

Financial Management

Unit title	Unit code
Corporate Finance	FIN3CFI
Finance	FIN2FIN
Financial Instruments	FIN2FII
International Financial Management	FIN3IFM
Introduction to Quantitative Analysis	ECO1IQA
Investment and Portfolio Management	FIN3IPM
<i>plus one of:</i>	
Intermediate Statistics for Business	ECO2ISB
Managerial Economics	ECO2MEC
<i>plus one of:</i>	
Financial Institutions Management	FIN3FIM
Financial Planning	FIN3FPL
Financial Risk Management	FIN3FRM
Security Valuation	FIN3SEV

Professional recognition

By successfully completing approved marketing units, graduates may apply for membership of the Australian Marketing Institute.

A full description of these units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this section. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public

Bachelor of Business Honours (LHB)**Admission requirements**

The entry requirements are successful completion of a bachelor degree with a major in marketing, management, human resource management, business economics, or financial management and a B (70%) or better average result in at least four third year core units from the designated major. Students must complete all requirements of their undergraduate degree before taking up honours.

Degree requirements

The honours program requires a year of full-time study or two years of part-time study following completion of the Bachelor degree.

Honours in business is not available at Shepparton, Mildura, or Albury-Wodonga campuses, but eligible students may apply to undertake honours at the Melbourne (Bundoora) Campus.

There is no mid-year intake available for this course.

Course structure

Students will be required to complete either:

- four coursework units and a thesis of 20,000 words, or
- five coursework units and a thesis of 15000 words.

The thesis will be completed under the direct supervision of an academic staff member. Approval of a research topic is subject to the availability of a supervisor in the designated discipline area. The major the student is studying will dictate the core units required.

Business Economics

Teaching period	Unit title	Unit code
TE-SEM-1	Business Honours Thesis Option A	BUS4HTA
TE-SEM-1	Macroeconomics	ECO4MAE
TE-SEM-1	Microeconomics	ECO4MIE
TE-SEM-2	Business Honours Thesis Option B	BUS4HTB
TE-SEM-1 or TE-SEM-2	Three approved fourth year units	

Financial Management

Teaching period	Unit title	Unit code
TE-SEM-1	Business Honours Thesis Option A	BUS4HTA
TE-SEM-1	Financial Management	FIN4FMA
TE-SEM-1	International Financial Management	FIN4IFM
TE-SEM-2	Business Honours Thesis Option B	BUS4HTB
TE-SEM-1 or TE-SEM-2	Three approved fourth year units	

Human Resource Management

Teaching period	Unit title	Unit code
TE-SEM-1	Leadership in Organisations	MGT4LED
TE-SEM-1	Remuneration and Performance Management	MGT4RPM
TE-SEM-1	Research Methodology	MGT4RMA
TE-SEM-1	One approved fourth year unit	
TE-SEM-2	20,000-word thesis	BUS4HTC

Management

Teaching period	Unit title	Unit code
TE-SEM-1	Contemporary Issues in Management	MGT4CIM
TE-SEM-1	Research Methodology	MGT4RMA
TE-SEM-1	Two approved fourth year units	
TE-SEM-2	20,000-word thesis	BUS4HTC

Marketing

Teaching period	Unit title	Unit code
TE-SEM-1	Relationships in Marketing or Social and Environmental Marketing	MKT4REM/MKT4SEM
TE-SEM-1	Research Methodology	MGT4RMA
TE-SEM-1	Theory in Marketing	MKT4TIM
TE-SEM-1	One approved fourth year unit	
TE-SEM-2	20,000-word thesis	BUS4HTC

A full description of these units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this section. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public

Bachelor of Commerce (LBC)**Admission requirements**

Admission requirements are VCE units 3 and 4 of English (any) and mathematics (any) with a minimum study score of at least 20 in each. Applicants with comparable qualifications will be considered. A limited number of students may also be considered under Special Entry Schemes.

Degree requirements

Students must complete a course of units accumulating a minimum of 360 credit points, at least 285 of which must be units offered by the school. The course is designed to be completed within three years of full-time study, although part-time study is possible. Maximum course duration is 10 years.

Students should undertake 120 credit points at each year level and must complete 120 credit points at third year level, including at least 90 credit points at third year level from the School of Business. Variations to this structure are subject to approval by a School of Business course adviser.

Course structure

Students completing the course structure listed below graduate with a major in accounting. The course is designed to allow for an optional second major in either Management or Financial Management (see Bachelor of Business course structure for a list of units required for these majors). Students who wish to undertake either the Management or Financial Management major must see a course adviser at the time of enrolment for advice regarding the scheduling of first year units to meet prerequisites for completion of a second major.

All units are worth 15 credit points.

First year

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Accounting for Management Decisions	ACC1AMD
TE-SEM-1 or TE-SEM-2	Business Law	LST1BSL
TE-SEM-1 or TE-SEM-2	Foundations of Management	MGT1FOM
TE-SEM-1 or TE-SEM-2	Introductory Financial Accounting	ACC1IFA
TE-SEM-1 or TE-SEM-2	Introductory Statistics for Business	ECO1ISB
TE-SEM-1 or TE-SEM-2	Macroeconomics	ECO1IMA
TE-SEM-1 or TE-SEM-2	Management Information Systems	BUS1MIS
TE-SEM-1 or TE-SEM-2	Microeconomics	ECO1IMI

Second year

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Corporate Reporting	ACC2CRE
TE-SEM-1 or TE-SEM-2	Finance	FIN2FIN

TE-SEM-1 or TE-SEM-2	Intermediate Management Accounting	ACC2IMB
TE-SEM-1 or TE-SEM-2	Introductory Management Accounting	ACC2IMA
TE-SEM-2	Law of Business Association	LST2LBA
TE-SEM-1 or TE-SEM-2	Three second year elective units	

Third year

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Advanced Financial Accounting	ACC3AFA
TE-SEM-1 or TE-SEM-2	Three third year accounting units*	
TE-SEM-1 or TE-SEM-2	Two third year School of Business elective units	
TE-SEM-1 or TE-SEM-2	Two third year elective units	

Key: * Taxation ACC3TAX and Auditing ACC3AUD are highly recommended.

Professional recognition

Taxation and Auditing are no longer part of the accreditation requirements for CPA Australia although both are required for membership of the Institute of Chartered Accountants (ICAA). Students who do not complete the Taxation and Auditing units as part of their degree will be admitted to membership of CPA Australia, but will be required to complete studies in both areas as part of their ongoing CPA training.

Majors offered**Financial Management**

The major in Financial Management addresses all issues concerning the different financial decisions made by individuals, corporations and governments, spanning decision-making relating to investments, financial structure and assets, treasury and risk management. Real-world focus is given to this decision-making process and the various activities associated with the management and functioning of both small and large business enterprises. These issues and others are evaluated using both theoretical and practical frameworks.

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Finance	FIN2FIN
TE-SEM-1	Corporate Finance	FIN3CFI
TE-SEM-1	International Financial Management	FIN3IFM
TE-SEM-2	Financial Instruments	FIN2FII
TE-SEM-2	Introduction to Quantitative Analysis	ECO1IQA
TE-SEM-2	Investment and Portfolio Management	FIN3IPM
plus one of:		
TE-SEM-1	Intermediate Statistics for Business	ECO2ISB
TE-SEM-2	Managerial Economics	ECO2MEC
plus one of:		
TE-SEM-1	Financial Planning	FIN3FPL
TE-SEM-1	Financial Institutions Management	FIN3FIM
TE-SEM-1	Security Valuation	FIN3SEV
TE-SEM-2	Financial Risk Management	FIN3FRM

Management

The Management major aims to equip people with a range of knowledge and skills that are important in managing an organisation in today's increasingly dynamic world. Areas studied include the core units of organisational behaviour, organisational structure and design, and business ethics.

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Finance	FIN2FIN
TE-SEM-1 or TE-SEM-2	Human Resource Management	MGT2HRM
TE-SEM-1 or TE-SEM-2	Organisational Behaviour	MGT2OBE
TE-SEM-1	International Management	MGT3IMG
TE-SEM-1	Strategic Management	MGT3SMG
TE-SEM-2	Business Ethics	MGT2BET
TE-SEM-2	Organisational Change and Development	MGT3OCD
TE-SEM-2	Organisational Structure and Design	MGT3OSD

A full description of these units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this section. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public

Bachelor of Commerce Honours (LHC)**Admission requirements**

The entry requirements are successful completion of a bachelor degree with a major in accounting and a B (70%) or better average result in at least four third year core units in accounting. Students

must complete all requirements of their undergraduate degree before taking up honours.

Degree requirements

The honours program requires a further year of full-time study or two years of part-time study following completion of the Bachelor degree. Honours in commerce is not available at the Mildura, Shepparton or Albury-Wodonga campuses, but Mildura, Shepparton and Albury-Wodonga students may apply to undertake honours at the Melbourne (Bundoora) Campus.

Course structure

Students will be required to complete four coursework units and a thesis of 20,000 words. Students are required to complete the thesis in an accounting topic under the direct supervision of an academic staff member. Approval of a research topic is subject to the availability of a supervisor in the designated discipline area.

Teaching period	Unit title	Unit code
TE-SEM-1	Issues in Financial Reporting*	ACC4IFR
TE-SEM-1	Issues in Management Accounting*	ACC4IMA
TE-SEM-1	Research Methodology	MGT4RMA
TE-SEM-1	One approved fourth year unit	
TE-SEM-2	20,000-word thesis	ACC4HTC

Key: * Another accounting unit at fourth year level may be substituted for ACC4IFR Issues in Financial Reporting or ACC4IMA Management Accounting with permission from the School of Business.

A full description of these units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this section. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public

Bachelor of Economics (LBE)

Admission requirements

Admission requirements are VCE units 3 and 4 of English (any) and mathematics (any) with a study score of at least 20 in each. Applicants with comparable qualifications will be considered. A limited number of students may also be considered under Special Entry Schemes.

Degree requirements

Students must complete a course of units accumulating at least 360 credit points, including units offered in business disciplines which total at least 270 credit points. The course is designed to be completed within three years of full-time study, although part-time study is possible. Maximum course duration is 10 years.

Students should undertake 120 credit points at each year level and must undertake at least 120 credit points at third year level including 90 credit points at third year level from the School of Business. Variations to this structure are subject to approval by a School of Business course advisor.

Course structure

Students must pass the compulsory and elective units listed below. All units are worth 15 credit points.

First year

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Introductory Statistics for Business	ECO1ISB
TE-SEM-1 or TE-SEM-2	Macroeconomics	ECO1IMA
TE-SEM-1 or TE-SEM-2	Management Information Systems	BUS1MIS
TE-SEM-1 or TE-SEM-2	Microeconomics	ECO1IMI
TE-SEM-1 or TE-SEM-2	Three first year elective units	
plus one of:		
TE-SEM-2	Introduction to Quantitative Analysis*	ECO1IQA
TE-SEM-1	Calculus and Functions for Economics*	MAT1CFE

Key: * Students with a strong background in mathematics, including VCE Mathematical Methods or Specialist Mathematics, are urged to consider taking MAT1CFE instead of ECO1IQA and to take MAT1CLA as a first year elective.

Second year

Teaching period	Unit title	Unit code
TE-SEM-1	Intermediate Statistics for Business	ECO2ISB

TE-SEM-1	Microeconomic Theory	ECO2MIT
TE-SEM-2	Macroeconomic Theory	ECO2MAT
TE-SEM-1 or TE-SEM-2	Three second or third year economics units*	
TE-SEM-1 or TE-SEM-2	One second year School of Business elective unit	
TE-SEM-1 or TE-SEM-2	One second year elective unit	

Third year

Teaching period	Unit title	Unit code
TE-SEM-1	Microeconomic Analysis	ECO3MIA
TE-SEM-2	Macroeconomic Analysis	ECO3MAA
TE-SEM-1 or TE-SEM-2	Three third year economics units*	
TE-SEM-1 or TE-SEM-2	One third year School of Business elective unit	
TE-SEM-1 or TE-SEM-2	Two third year elective units	

Key: * Economics units include any units required for the economics specialisations listed below.

Economics areas of specialisation

(See School of Business for details of units required for specialisations.)

- Macroeconomic Analysis and Policy
- Microeconomic Analysis and Policy
- Business Economics
- International Trade and Finance
- Business Models and Forecasting
- Resource and Environmental Economics

Students intending to undertake honours are advised to take either Time Series Econometrics ECO3ITE or Econometric Methods ECO3EME in their third year.

Professional recognition

By completing approved units, graduates may satisfy the educational requirements of the Financial Services Institute of Australasia (FINSIA). See School of Business for details.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this section. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public

Bachelor of Economics Honours (LHE)

Admission requirements

The entry requirements are successful completion of a bachelor degree with a major economics and a B (70%) or better average result in at least four third year core units in economics. Students must complete all requirements of their undergraduate degree before taking up honours.

Degree requirements

The honours program requires a further year of full-time study or two years of part-time study following completion of the Bachelor degree.

Course structure

Students will be required to complete five coursework units and a thesis of 15000 words. The thesis will be completed under the direct supervision of an academic staff member. Approval of a research topic is subject to the availability of a supervisor in the designated discipline area.

Teaching period	Unit title	Unit code

	International Financial Management	FIN4IFM
TE-SEM-1	Economics Honours Thesis Option A	ECO4HTA
TE-SEM-2	Economics Honours Thesis Option B	ECO4HTB
TE-SEM-1 or TE-SEM-2	Two approved fourth year units	

A full description of these units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this section. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public

Bachelor of Finance (LBF)

Admission requirements

Admission requirements are VCE units 3 and 4 of English (any) and mathematics (any) with a study score of at least 20 in each. Applicants with comparable qualifications will be considered. A limited number of students may also be considered under Special Entry Schemes.

Degree requirements

Students must complete a course of units accumulating at least 360 credit points, at least 300 of which must be units offered by the School of Business. The course is designed to be completed within three years of full-time study, although part-time study is possible. Maximum course duration is 10 years. Students should undertake 120 credit points at each year level and must undertake at least 120 credit points at third year level including 90 credit points at third year level from the School of Business. Variations to this structure are subject to approval by a School of Business course adviser.

Course structure

Students must pass the compulsory and elective units listed below. All units are worth 15 credit points.

First year

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Accounting for Management Decisions	ACC1AMD
TE-SEM-1 or TE-SEM-2	Introductory Financial Accounting	ACC1IFA
TE-SEM-1 or TE-SEM-2	Introductory Statistics for Business	ECO1ISB
TE-SEM-1 or TE-SEM-2	Macroeconomics	ECO1IMA
TE-SEM-1 or TE-SEM-2	Microeconomics	ECO1IMI
TE-SEM-1 or TE-SEM-2	Two first year elective units**	
<i>plus one of:</i>		
TE-SEM-2	Introduction to Quantitative Analysis*	ECO1IQA
TE-SEM-1	Calculus and Functions for Economics*	MAT1CFE

Key: * Students with a strong background in mathematics, including VCE Mathematical Methods or Specialist Mathematics, are urged to consider taking MAT1CFE instead of ECO1IQA and to take MAT1CLA as a first year elective.

** See section on Professional Recognition below.

Second year

Teaching period	Unit title	Unit code
TE-SEM-1	Intermediate Statistics for Business	ECO2ISB
TE-SEM-1	Microeconomic Theory	ECO2MIT
TE-SEM-2	Macroeconomic Theory	ECO2MAT
TE-SEM-1 or TE-SEM-2	Finance	FIN2FIN
TE-SEM-2	Financial Instruments	FIN2FII
TE-SEM-2	Banking and Finance Law***	LAW2BFL
TE-SEM-1 or TE-SEM-2	Two second year elective units	

Third year

Teaching period	Unit title	Unit code
TE-SEM-1	Corporate Finance	FIN3CFI
TE-SEM-1	International Financial Management	FIN3IFM
TE-SEM-2	Financial Risk Management	FIN3FRM
TE-SEM-2	Investment and Portfolio Management	FIN3IPM
<i>plus four of:</i>		
TE-SEM-1	Derivatives	FIN3DER
TE-SEM-1	Econometric Methods	ECO3EME
TE-SEM-1	Financial Institutions Management	FIN3FIM
TE-SEM-1	Financial Planning	FIN3FPL
TE-SEM-1	Microeconomic Analysis	ECO3MIA
TE-SEM-1 or TE-SEM-2	Taxation	ACC3TAX
TE-SEM-2	Case Studies in Finance	FIN3CSF
TE-SEM-2	Case Studies in Financial Planning	FIN3CFP
TE-SEM-2	Computational Finance	FIN3CLF
TE-SEM-2	Financial History	FIN3FHY
TE-SEM-2	Introduction to time series econometrics	ECO3ITE
TE-SEM-2	Macroeconomic Analysis	ECO3MAA
TE-SEM-2	Mergers and Acquisitions	FIN3MAQ
TE-SEM-2	Retirement and Estate Planning	FIN3REP
TE-SEM-2	Security Valuation	FIN3SEV

Key: *** Bachelor of Finance students are not required to complete the prerequisite, Business Law LST1BSL, but are encouraged to do so.

Professional recognition

In order to satisfy the educational requirements of Financial Services Institute of Australasia (FINSIA), Foundations of Management MGT1FOM and Marketing Principles and Practice MKT2MPP must be taken as elective units.

Students seeking employment in the finance industry or in a position which requires them to provide advice to retail clients about financial planning or financial products must complete an Australian Securities and Investment Commission (ASIC PS146) compliant course of study. This includes: ECO1IMA, FIN2FII, FIN3FPL, and FIN3CFP. NB: FIN3REP is a co-requisite for FIN3CFP

A full description of these units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this section. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public

Bachelor of Finance Honours (LHF)

Admission requirements

The entry requirements are successful completion of a bachelor degree with a major in finance and a B (70%) or better average result in at least four third year core units in finance. Students must complete all requirements of their undergraduate degree before taking up honours.

Degree requirements

The honours program requires a further year of full-time study or two years of part-time study following completion of the Bachelor degree.

Course structure

Students will be required to complete five coursework units and a thesis of 15000 words. The thesis will be completed under the direct supervision of an academic staff member. Approval of a research topic is subject to the availability of a supervisor in the designated discipline area.

Teaching period	Unit title	Unit code
TE-SEM-1	Financial Management	FIN4FMA
TE-SEM-1	International Financial Management	FIN4IFM
TE-SEM-1 one of	Micro econometrics	ECO4MEC
	Advanced Time-Series Econometrics	ECO4ATE
	Macroeconomics	ECO4MAE
	Microeconomics	ECO4MIE
TE-SEM-1	Finance Honours Thesis Option A	FIN4HTA
TE-SEM-2	Finance Honours Thesis Option B	FIN4HTB
TE-SEM-1 or TE-SEM-2	Two approved fourth year units	

A full description of these units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this section. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public

Bachelor of International Business – LBIB

Admission requirements

Admission requirements are completion of VCE units 3 and 4 of English (any) with a minimum study score of 20 and completion of units 1 and 2 of General Mathematics or Mathematical Methods. Applicants with comparable qualifications will be considered. A limited number of students may also be considered under Special Entry Schemes.

Degree requirements

Students must complete a course of units accumulating a minimum of 360 credit points, at least 255 of which must be units offered by the School of Business. The course is designed to be completed within a minimum of three years full-time study, although part-time study is possible. Maximum course duration is 10 years. Students should undertake 120 credit points at each year level and must undertake at least 120 credit points at third year level including 90 credit points at third year level from the School of Business. Variations to this structure are subject to approval by a School of Business course adviser. Students in their second year of study may be eligible to undertake an exchange program for a semester.

Course structure

Students must pass the compulsory and elective units listed below. All units are worth 15 credit points.

First year

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Accounting for Management Decisions	ACC1AMD
TE-SEM-1 or TE-SEM-2	Business Law	LST1BSL
TE-SEM-1 or TE-SEM-2	Foundations of Management	MGT1FOM
TE-SEM-1 or TE-SEM-2	Introductory Statistics for Business	ECO1ISB
TE-SEM-1 or TE-SEM-2	Macroeconomics	ECO1IMA
TE-SEM-1 or TE-SEM-2	Management Information Systems	BUS1MIS
TE-SEM-1 or TE-SEM-2	Microeconomics	ECO1IMI
TE-SEM-1 or TE-SEM-2	One first year elective unit*	

Second year

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Finance	FIN2FIN
TE-SEM-1 or TE-SEM-2	Marketing Principles and Practice	MKT2MPP
TE-SEM-1	Business Models	BUS2BMO
TE-SEM-1	International Business Environment	ECO2IBE
TE-SEM-1 or TE-SEM-2	Four second year elective units*	

Third year

Teaching period	Unit title	Unit code
TE-SEM-1	International Financial Management	FIN3IFM
TE-SEM-1	International Management	MGT3IMG
TE-SEM-2	Financial Risk Management	FIN3FRM
TE-SEM-2	International Marketing	MKT3IMK
TE-SEM-1 or TE-SEM-2	Two third year School of Business electives*	
TE-SEM-1 or TE-SEM-2	Two third year elective units*	

Key: * Students must seek advice from a course adviser regarding choice of elective units.

A full description of these units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this section. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public

Bachelor of International Business Honours (LHIB)

Admission requirements

The entry requirements are a successful completion of a bachelor degree with a major in international business and a B (70%) or better average result in at least four third year core units in international business. Students must complete all requirements of their undergraduate degree before taking up honours.

Degree requirements

The honours program requires a further year of full-time study or two years of part-time study following completion of the Bachelor degree.

Course structure

Students will be required to complete five coursework units and a thesis of 15000 words. The thesis will be completed under the direct supervision of an academic staff member. Approval of a research topic is subject to the availability of a supervisor in the designated discipline area.

Teaching period	Unit title	Unit code
TE-SEM-1	International Business Honours Thesis Option A	BUS4HTA
TE-SEM-2	International Business Honours Thesis Option B	BUS4HTB
TE-SEM-1 or TE-SEM-2	Six approved fourth year units	

A full description of these units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this section. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public

Bachelor of Arts/Bachelor of Commerce (LZAC)

Admission requirements

Admission requirements are VCE units 3 and 4 of English (any) and mathematics (any) with a study score of at least 25 in English and 20

in maths. Applicants with comparable qualifications will be considered. A limited number of students may also be considered under Special Entry Schemes.

Degree requirements

Students must complete units having a minimum value of 540 credit points. 300 credit points must be accumulated from units offered in the School of Business and 240 credit points from arts disciplines offered by the Faculty of Humanities and Social Sciences.

At least one major must be taken in an arts discipline where a major is 30 credit points at first year, 40 credit points at second year and 60 credit points at third year level. The course is designed to be completed in four years of full-time study, although part-time study is possible. Maximum course duration is 10 years.

Course structure

Students must pass the compulsory and elective units listed below. Business units are worth 15 credit points while arts units may be 15 or 20 credit points.

First year

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Accounting for Management Decisions	ACC1AMD
TE-SEM-1 or TE-SEM-2	Foundations of Management	MGT1FOM
TE-SEM-1 or TE-SEM-2	Macroeconomics	ECO1IMA
TE-SEM-1 or TE-SEM-2	Microeconomics	ECO1IMI
TE-SEM-1 or TE-SEM-2	Four first year arts units	

Second year

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Business Law	LST1BSL
TE-SEM-1 or TE-SEM-2	Introductory Financial Accounting	ACC1IFA
TE-SEM-1 or TE-SEM-2	Introductory Management Accounting	ACC2IMA
TE-SEM-1 or TE-SEM-2	Introductory Statistics for Business	ECO1ISB
TE-SEM-2	Law of Business Association	LST2LBA
TE-SEM-1 or TE-SEM-2	Three second year arts units (20cps each)	

Third year

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Corporate Reporting	ACC2CRE
TE-SEM-1 or TE-SEM-2	Finance	FIN2FIN
TE-SEM-1 or TE-SEM-2	Intermediate Management Accounting	ACC2IMB
TE-SEM-1 or TE-SEM-2	Management Information Systems	BUS1MIS
TE-SEM-1 or TE-SEM-2	One second year School of Business elective unit	
TE-SEM-1 or TE-SEM-2	One second year and two third year arts units (20cps each)	

Fourth year

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Advanced Financial Accounting	ACC3AFA
TE-SEM-1 or TE-SEM-2	Three third year accounting units*	
TE-SEM-1 or TE-SEM-2	One third year School of Business elective unit	
TE-SEM-1 or TE-SEM-2	Three third year arts units (20cps each)	

plus:

TE-SEM-1 or TE-SEM-2 One third year School of Business elective unit which may be taken in any year

Key: * Taxation ACC3TAX and Auditing ACC3AUD are highly recommended. These two units are no longer part of the accreditation requirements for CPA Australia although both are required for membership of ICAA.

Arts Disciplines

Arts units must be chosen from disciplines taught at the Bundoora campus. Please seek advice from the Faculty of Humanities and Social Sciences.

Professional recognition

This course is structured to meet the accreditation requirements of CPA Australia. In order to meet the accreditation requirements of the Institute of Chartered Accountants in Australia (ICAA), Taxation and Auditing must be completed.

Honours

The honours program requires a further year of full-time study or two years part-time study. Entry is by invitation only. Honours may be undertaken in either arts or commerce, or both with two years of additional study. As a guide, the usual minimum requirement is a B (70%) average result in at least four third year commerce or arts units, although a student's entire academic record is taken into account. Students must complete all requirements of their undergraduate degree before being invited to take up honours. For more information

on the Commerce Honours course see entry under the Bachelor of Commerce.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this section. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public

Bachelor of Arts/Bachelor of Economics (LZAE)

Admission requirements

Admission requirements are VCE units 3 and 4 of English (any) and mathematics (any) with a study score of at least 25 in English and 20 in maths. Applicants with comparable qualifications will be considered. A limited number of students may also be considered under Special Entry Schemes.

Degree requirements

Students must complete units having a minimum value of 540 credit points. A minimum of 270 credit points must be accumulated from units offered in the School of Business and a minimum of 255 credit points from units offered by the Faculty of Humanities and Social Sciences. The remaining 15 credit points may be taken from either discipline. At least one major must be taken in an arts discipline where a major is 30 credit points at first year, 40 credit points at second year and 60 credit points at third year level. The course is designed to be completed in four years of full-time study, although part-time study is possible. Maximum course duration is 10 years.

Course structure

Students must pass the compulsory and elective units listed below. Business units are worth 15 credit points while arts units may be 15 or 20 credit points.

First year

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Introductory Statistics for Business	ECO1ISB
TE-SEM-1 or TE-SEM-2	Macroeconomics	ECO1IMA
TE-SEM-1 or TE-SEM-2	Microeconomics	ECO1IMI
TE-SEM-1 or TE-SEM-2	Four first year arts units	
plus one of:		
TE-SEM-1	Calculus and Functions for Economics*	MAT1CFE
TE-SEM-2	Introduction to Quantitative Analysis*	ECO1IQA

Key: * Students with a strong background in mathematics, including VCE Mathematical Methods or Specialist Mathematics, are urged to consider taking MAT1CFE instead of ECO1IQA.

Second year

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Management Information Systems	BUS1MIS
TE-SEM-1	Microeconomic Theory	ECO2MIT
TE-SEM-2	Macroeconomic Theory	ECO2MAT
TE-SEM-1 or TE-SEM-2	One first year School of Business elective unit	
TE-SEM-1 or TE-SEM-2	One first year arts unit	
TE-SEM-1 or TE-SEM-2	Three second year arts units (20cps each)	

Third year

Teaching period	Unit title	Unit code
TE-SEM-1	Intermediate Statistics for Business	ECO2ISB
TE-SEM-1 or TE-SEM-2	Three second or third year economics units*	
TE-SEM-1 or TE-SEM-2	One third year School of Business elective unit	
TE-SEM-1 or TE-SEM-2	One second year and two third year arts units (20cps each)	

Fourth year

Teaching period	Unit title	Unit code
TE-SEM-2	Macroeconomic Analysis	ECO3MAA
TE-SEM-1	Microeconomic Analysis	ECO3MIA
TE-SEM-1 or TE-SEM-2	Three third year economics units*	
TE-SEM-1 or TE-SEM-2	Three third year arts units (20cps each)	

plus:
TE-SEM-1 or TE-SEM-2 One 15-credit point unit which may be selected from either discipline and taken in any year

Key: * Finance units may be used for economics units in order to meet the requirements of an economics specialisation.

Economics areas of specialisation

- Macroeconomic Analysis and Policy
- Microeconomic Analysis and Policy
- Business Economics
- International Trade and Finance
- Business Models and Forecasting
- Resource and Environmental Economics

Arts Disciplines

Arts units must be chosen from disciplines taught at the Bundoora campus. Please seek advice from the Faculty of Humanities and Social Sciences.

Professional recognition

The appropriate choice of elective units may lead to professional accreditation with the Australasian Institute of Banking and Finance. See School of Business for details.

Honours

The honours program requires a further year of full-time study or two years part-time study. Entry is by invitation only. Honours may be undertaken in either Arts or Economics, or both with two years of additional study. As a guide, the usual minimum requirement is a B (70%) average result in at least four third year economics or arts units although a student's entire academic record is taken into account. Students must complete all requirements of their undergraduate degree before being invited to take up honours. For more information on the Economics Honours program see the entry under the Bachelor of Economics course.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this section. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public

Bachelor of Business/Bachelor of Asian Studies (LZBAS)

Admission requirements

Admission requirements are VCE units 3 and 4 of English (any) with a study score of at least 20 and VCE units 1 and 2 General Maths or Maths Methods. Applicants with comparable qualifications will be considered. A limited number of students may also be considered under Special Entry Schemes.

Degree requirements

Students must complete units having a minimum value of 540 credit points. A minimum of 270 credit points must be accumulated from units offered in the School of Business and a minimum of 255 credit points in an Asian language and Asian studies. The remaining 15 credit points may be selected from either discipline at second or third year level. Students must complete in sequence the compulsory business units, including one business major, and the compulsory Asian language and Asian studies units. Students must also satisfy the requirements of the Bachelor of Asian Studies including:

- a minimum of 165 credit points in one of the following Asian languages: Chinese, Japanese or Indonesian/Malay, consisting of 45 credit points at first year, 60 credit points at second year and 60 credit points at third year level
- a minimum of 30 credit points at first year level in core Asian studies
- a minimum of 60 credit points in approved Asian studies elective units, comprising 20 credit points at second year and 40 credit points at third year level
- a selection of elective units from the list of interdisciplinary Asian studies electives.

This course is structured to be completed in four years of full-time study, although part-time study is possible. Maximum course duration is 10 years.

Course structure

Students must pass the compulsory and elective units listed below. Business units are worth 15 credit points while Asian studies units may be 15 or 20 credit points.

First year

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Accounting for Management Decisions	ACC1AMD
TE-SEM-1 or TE-SEM-2	Foundations of Management	MGT1FOM
TE-SEM-1 or TE-SEM-2	Macroeconomics	ECO1IMA
TE-SEM-1 or TE-SEM-2	Microeconomics	ECO1IMI
TE-SEM-1	Introduction to Asia: Japan and Indonesia	AST1IJ
TE-SEM-2	Introduction to Asia: China and India	AST1ICI
TE-SEM-1 or TE-SEM-2	Two first year Asian language units	

Second year

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Business Law	LST1BSL
TE-SEM-1 or TE-SEM-2	Introductory Statistics for Business	ECO1ISB
TE-SEM-1 or TE-SEM-2	Management Information Systems	BUS1MIS
TE-SEM-1 or TE-SEM-2	One first or second year School of Business unit (major study)	
TE-SEM-1	Intro to Asian Culture and Tradition	AST1BCE
TE-SEM-1 or TE-SEM-2	Three second year Asian language units (20cps each)	

Third year

Teaching period	Unit title
TE-SEM-1 or TE-SEM-2	Four second year and one third year School of Business units (major study)
TE-SEM-1 or TE-SEM-2	One second year Asian studies unit (20cps)
TE-SEM-1 or TE-SEM-2	Two third year Asian language units (20cps each)

Fourth year

Teaching period	Unit title
TE-SEM-1 or TE-SEM-2	Three third year School of Business units (major study)
TE-SEM-1 or TE-SEM-2	Two third year School of Business elective units
TE-SEM-1 or TE-SEM-2	One third year Asian language unit (20cps)
TE-SEM-1 or TE-SEM-2	Two third year Asian studies elective units (20cps each)
plus TE-SEM-1 or TE-SEM-2	One second or third first year 5-credit point unit from either discipline to be taken in any year

Asian Studies elective units

For further information please contact the Asian Studies Department in the Faculty of Humanities and Social Sciences.

Business majors

(See Bachelor of Business entry for details of required units.)

- Business Economics
- Financial Management
- Human Resource Management
- Management
- Marketing

Honours

The honours program requires a further year of full-time study or two years part-time study. Entry is by invitation only. Honours may be undertaken in either business or Asian studies, or both with two years of additional study. As a guide, the usual minimum requirement is a B (70%) average result in at least four third year business or Asian studies units, although a student's entire academic record is taken into account. Students must complete all requirements of their undergraduate degree before being invited to take up honours. For more information on the Business Honours program see the entry under the Bachelor of Business.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this section. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public

Bachelor of Commerce/Bachelor of Economics (LZCE)**Admission requirements**

Admission requirements are VCE units 3 and 4 of English (any) and mathematics (any) with a study score of at least 20 in English and 20 in maths. Applicants with comparable qualifications will be considered. A limited number of students may also be considered under Special Entry Schemes.

Degree requirements

Students must complete units having a minimum value of 540 credit points. A minimum of 450 credit points must be accumulated from units offered in the School of Business, plus six elective units of which three must be at third year level. No more than 150 credit points may be from first year level units. The course is designed to be completed in four years of full-time study, although part-time study is possible. Maximum course duration is 10 years.

Course structure

All compulsory units and School of Business elective units are worth 15 credit points. Students completing the course structure listed below graduate with majors in accounting and economics. The course is designed to allow for an optional third major in financial management. See Bachelor of Business entry for details of units required for the major.

First year

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Accounting for Management Decisions	ACC1AMD
TE-SEM-1 or TE-SEM-2	Foundations of Management	MGT1FOM
TE-SEM-1 or TE-SEM-2	Introductory Financial Accounting	ACC1IFA
TE-SEM-1 or TE-SEM-2	Introductory Statistics for Business	ECO1ISB
TE-SEM-1 or TE-SEM-2	Macroeconomics	ECO1IMA
TE-SEM-1 or TE-SEM-2	Management Information Systems	BUS1MIS
TE-SEM-1 or TE-SEM-2	Microeconomics	ECO1IMI
TE-SEM-1 or TE-SEM-2	One first year elective	

plus one of:

TE-SEM-2	Introduction to Quantitative Analysis*	ECO1IQA
TE-SEM-1	Calculus and Functions for Economics*	MAT1CFE

Key: * Students with a strong background in mathematics, including VCE Mathematical Methods or Specialist Mathematics, are urged to consider taking MAT1CFE instead of ECO1IQA.

Second year

Teaching period	Unit title	Unit code
TE-SEM-1	Intermediate Statistics for Business	ECO2ISB
TE-SEM-1 or TE-SEM-2	Business Law	LST1BSL
TE-SEM-1 or TE-SEM-2	Corporate Reporting	ACC2CRE
TE-SEM-1 or TE-SEM-2	Intermediate Management Accounting	ACC2IMB
TE-SEM-1 or TE-SEM-2	Introductory Management Accounting	ACC2IMA
TE-SEM-2	Law of Business Association	LST2LBA
TE-SEM-1 or TE-SEM-2	Finance	FIN2FIN
TE-SEM-1 or TE-SEM-2	One second year School of Business elective unit	
TE-SEM-1 or TE-SEM-2	One second year elective unit**	

Third year

Teaching period	Unit title	Unit code
TE-SEM-1	Microeconomic Theory	ECO2MIT
TE-SEM-1 or TE-SEM-2	Advanced Financial Accounting	ACC3AFA
TE-SEM-2	Macroeconomic Theory	ECO2MAT
TE-SEM-1 or TE-SEM-2	Two second year economics units**	
TE-SEM-1 or TE-SEM-2	Two second year elective units	
TE-SEM-1 or TE-SEM-2	Two third year elective units	

Fourth year

Teaching period	Unit title	Unit code
TE-SEM-2	Macroeconomic Analysis	ECO3MAA
TE-SEM-1	Microeconomic Analysis	ECO3MIA
TE-SEM-1 or TE-SEM-2	Three third year accounting units*	
TE-SEM-1 or TE-SEM-2	Three third year economics units**	
TE-SEM-1 or TE-SEM-2	One third year elective unit	

Key: * Taxation ACC3TAX and Auditing ACC3AUD are highly recommended. These two units are required for membership of the Institute of Chartered Accountants in Australia (ICAA).

** Economics units include any units required for the economics specialisations listed below

Economics areas of specialisation

(See School of Business for details of units required for each specialisation.)

- Business Economics
- Business Models and Forecasting
- International Trade and Finance
- Macroeconomic Analysis and Policy
- Microeconomic Analysis and Policy
- Resource and Environmental Economics

Professional recognition

This course is structured to meet the accreditation requirements of CPA Australia. In order to meet the accreditation requirements of the Institute of Chartered Accountants in Australia (ICAA), Taxation and Auditing must be completed.

By completing approved units, graduates may satisfy the educational requirements of the Financial Services Institute of Australasia (FINSIA). See School of Business for details.

Honours

The honours program requires a further year of full-time study or two years part-time study. Entry is by invitation only. Honours may be undertaken in either commerce or economics or both, with two years of additional study. As a guide, the usual minimum requirement is a B (70%) average result in at least four third year commerce or economics units, although a student's entire academic record is taken into account. Students must complete all requirements of their undergraduate degree before being invited to take up honours. For more information on either the Economics Honours or Commerce Honours programs see the entries under the single degrees.

Bachelor of Commerce/Bachelor of Finance

(This course has not had final approval – please contact the school for further information).

Admission requirements

Admission requirements are VCE Units 3 and 4: a study score of at least 20 in English and in mathematics (any). Applicants with comparable qualifications will be considered. A limited number of students may also be considered under Special Entry Schemes.

Degree requirements

Students must complete units having a minimum value of 540 credit points. A minimum of 450 credit points must be accumulated from units offered in the School of Business, plus six electives, three of which must be at third year level. Students are restricted to a maximum of 150 credit points at first year level. The course is designed to be completed in four years of full-time study, although part-time study is possible. Maximum course duration is 10 years.

Course structure

Students must pass the compulsory and elective units listed below. Business units are worth 15 credit points while arts units may be 15 or 20 credit points.

First year

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Accounting for Management Decisions	ACC1AMD
TE-SEM-1 or TE-SEM-2	Macroeconomics	ECO1IMA
TE-SEM-1 or TE-SEM-2	Microeconomics	ECO1IMI
TE-SEM-1 or TE-SEM-2	Foundations of Management	MGT1FOM
TE-SEM-1 or TE-SEM-2	Introductory Financial Accounting	ACC1IFA
TE-SEM-1 or TE-SEM-2	Introductory Statistics for Business	ECO1ISB
TE-SEM-1 or TE-SEM-2	Management Information Systems	BUS1MIS
TE-SEM-1 or TE-SEM-2	Business Law	LST1BSL
<i>plus one of:</i>		
TE-SEM-2	Introduction to Quantitative Analysis*	ECO1IQA
TE-SEM-1	Calculus and Functions for Economics*	MAT1CFE

Key: * Students with a strong background in mathematics, including VCE Mathematical Methods or Specialist Mathematics, are urged to consider taking MAT1CFE instead of ECO1IQA and to take MAT1CLA as a first year elective.

Second year

Teaching period	Unit title	Unit code
TE-SEM-1 or TE-SEM-2	Corporate Reporting	ACC2CRE

TE-SEM-1 or TE-SEM-2	Two third year Finance units	

Key: * Taxation ACC3TAX and Auditing ACC3AUD are highly recommended. These two units are no longer part of the accreditation requirements for CPA Australia although both are required for membership of ICAA.

Professional recognition

In order to satisfy the educational requirements of Financial Services Institute of Australasia (FINSIA), Foundations of Management MGT1FOM and Marketing Principles and Practice MKT2MPP must be taken as elective units.

Students seeking employment in the finance industry or in a position which requires you to provide advice to retail clients about financial planning or financial products must complete an Australian Securities and Investment Commission (**ASIC PS146**) compliant course of study. This includes: ECO1IMA, FIN2FII, FIN3FPL, and FIN3CFP.

NB: FIN3REP is a co-requisite for FIN3CFP

Taxation and Auditing are no longer part of the accreditation requirements for CPA Australia although both are required for membership of the Institute of Chartered Accountants (ICAA). Students who do not complete the Taxation and Auditing units as part of their degree will be admitted to membership of CPA Australia, but will be required to complete studies in both areas as part of their ongoing CPA training.

Honours

The honours program requires a further year of full-time study or two years part-time study. Honours may be undertaken in either commerce or finance, or both with two years of additional study. . See single course descriptions for honours year details.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this section. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public

UNIT DESCRIPTIONS

ACC1AMD ACCOUNTING FOR MANAGEMENT DECISIONS (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-1 AW, BE, BU, MI, SH. TE-SEM-2 BU. TE-SEM-S BU. TE-W13-26 NI. TE-W31-46 NI.) *Dr Liz Duncan, Mrs Selina Lim, Ms Kathie Stirling, Mr Petrus Usmanij, Mrs Susan Nalder*

This unit is designed to introduce under-graduate students from all disciplines to the nature of accounting and its role in business. Topics covered provide an overview of key financial and managerial accounting concepts and include: the recording of business transactions; the calculation and measurement of profit; the preparation of financial statements; the analysis and interpretation of financial statement data; cost accounting and reporting systems; and cost analysis for planning, control and decision making.

Class requirements: two 1-hour lecture and one 1-hour tutorial per week.

Assessment: tutorial assessment (10%), mid-semester test (20%), one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, Major assignment (30%). A-W: Comprising practical problem and report – 1000-word (equivalent), one 3-hour final examination (70%). A-W: Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass this unit.

ACC1AME ACCOUNTING AND MANAGEMENT FOR ENTREPRENEURS (15. CPs Sem. TE-SEM-1 BU, TE-SEM-2 BE, BU.) BE: Ms Diane Harvey, BU:

Ms Sarah Yang Spencer

Not available to students in the Bachelor of Commerce.

This unit is designed to give students a solid understanding of the important basics of starting and managing business ventures, especially the accounting theory and practice relating to entrepreneurs in managing a small business. The aim is to provide students with a guide to the fundamentals of good management in running their future business and to give students the ability to apply financial information and generate financial reports, which will enable them to control small business operations, make business decisions and apply problem-solving techniques. Attention will be directed to both short-term and long-term decision making including cost and financial control, pricing and current asset management.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One business planning project (30%) equivalent to 1500 words, one 3-hour final examination (70%)

Prescribed Reading:

BE: Jopling, R., Lucas, P. and Norton, G. *Accounting for business – a non accountant's guide* McGraw-Hill, 2nd edn

ACC1IFA INTRODUCTORY FINANCIAL ACCOUNTING (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TE-SEM-1 AW, BU, TE-SEM-2 BE, BU, MI, SH. TE-W13-26 NI. TE-W31-46 NI.) Mr Greg Ellis, Mr Glenn Hill, Ms Sue Nalder

This unit introduces students to accounting information systems which record financial events and provide information to management. The unit begins with the accounting equation, accounting cycle, accrual accounting concepts and the preparation of financial statements. Attention is then given to application of generally accepted accounting principles and selected accounting standards to specific financial elements and transactions.

Prerequisite: ACC1AMD.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One computerised practice set (10%), one manual practice set (20%), one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, one 1/2 hour take-home examination (10%). A-W: based on assignment tutorial questions, one 1-hour mid semester test (20%). A-W: one 3-hour final examination (70%). A-W: Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit.

ACC2CRE CORPORATE REPORTING (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TE-SEM-1 BE, BU, SH. TE-SEM-2 AW, BU, MI. TE-W13-26 NI. TE-W31-46 NI.) Dr Liz Duncan, Mr Greg Ellis, Dr Xu-Dong Ji

This unit covers corporate financial accounting and reporting at an intermediate level. It provides students with an understanding of the corporate reporting environment in Australia and the economic implications of accounting numbers. The unit incorporates evaluation and application of selected accounting standards, as well as the

preparation of corporate group financial reports which satisfy professional and regulatory requirements.

Prerequisite: ACC1IFA.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

This unit is not available for Study Abroad students.

Assessment: One 500-word assignment (15%), one 1-hour mid-semester test (15%), one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, one 1/2-hour mid semester test (30%). A-W and SH: one 3-Hour final examination (70%). A-W and SH: Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit

ACC2IMA INTRODUCTORY MANAGEMENT ACCOUNTING (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TE-SEM-1 AW, BE, BU, MI, SH. TE-SEM-2 BU. TE-W13-26 NI.) Mr Sunil Dahanayake, Mr Greg Ellis, Ms Dianne Harvey, Dr Prem Yapa

This unit is offered in another teaching period

Managerial accounting provides organisations with internal financial and non-financial information required for the three functions of planning, controlling and decision making. This unit enables students to develop an understanding of the elements of management accounting and the way in which cost information is used in undertaking these functions within the context of a modern business concern. The unit examines the nature and behaviour of product cost information and students should be able to apply their understanding of this to decision-making situations using both a quantitative and a qualitative approach.

Prerequisite: ACC1AMD.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One tutorial presentation (10%) equivalent to 1000 words, one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, one 45-minute mid-semester test (20%)

Prescribed Reading:

Langfield-Smith, Thorne, Hilton A-W: *Management Accounting* McGraw Hill

ACC2IMB INTERMEDIATE MANAGEMENT ACCOUNTING (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TE-SEM-1 BU. TE-SEM-2 AW, BE, BU, MI, SH. TE-W31-46 NI.) Mr Sunil Dahanayake, Ms Katherine Stirling, Ms Suzanne Salmon, Mr Petrus Usmanij

Intermediate Management Accounting further develops the concepts of management accounting and provides analytical methods for both short-term and long-term managerial decisions. Topics include budgeting standard costing and variance analysis, capital budgeting, inventory management, performance measurement and contemporary developments in management accounting.

Prerequisite: ACC2IMA / ACC21IMA/ACC22IMA.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 45-minute mid-semester test (20%), one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, one 10-minute class presentation (10%)

Prescribed Reading:

ACC3AFA ADVANCED FINANCIAL ACCOUNTING (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TE-SEM-1 AW, BU. TE-SEM-2 BE, BU, MI, SH. TE-W31-46 NI.) Dr Liz Duncan, Dr Jane Hamilton, Dr Kamran Ahmed

This unit aims to promote an understanding of some of the major contemporary issues associated with the measurement and reporting

of the operating results and financial position of modern reporting entities. Topics on foreign currency transaction and translation, superannuation, financial instruments, construction contracts and other topical issues will be covered within the context of recent recommendations of the Australian accounting profession. The role of theory in accounting will also be covered.

Prerequisite: ACC2CRE.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 45-minute mid-semester test (30%), one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, AW: and SH one 3-Hour Final Exam (70%). Hurdle requirement. Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit, AW: and SH:

One major practical problem (30%). Involving accounting for superannuation

Prescribed Reading:

CPA Australia *Accounting Handbook 2008* Pearson, Education Australia

ACC3AMA ADVANCED MANAGEMENT ACCOUNTING (15. CPs Sem. TE-SEM-2 BU.) *Professor Hoque Zahirul*

The purpose of this unit is to provide students with an understanding of contemporary management accounting issues such as direct and indirect management systems as they are used within organisational settings. A key aim will be to extend students' understanding of management accounting beyond the technical skills and competencies acquired in earlier management accounting studies to an understanding of how these are used within organisations.

Prerequisite: ACC21IMB/ACC22IMB.

Class requirements: One 3-hour seminar per week.

This unit is not available for Study Abroad students.

Assessment: One 20-minute group presentation (10-minutes per member) (10%), one 3000-word group assignment (1500 words per member) (25%), one 2-hour final examination (65%)

ACC3AUD AUDITING (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TE-SEM-1 BE, BU, SH. TE-SEM-2 AW, BU. TE-SEM-3 MI. TE-W13-26 NI.) *Ms Jane Hamilton, Ms Biserka Siladi, Mr Larry O'Connor*

This unit covers Auditing theory and practice and is designed to meet the preliminary requirements of the Institute of Chartered Accountants in Australia and CPA Australia. Auditing is designed to give students an understanding of the concepts involved in the auditing process. The unit aims to integrate these concepts with practical application including reference to appropriate accounting and auditing standards.

Prerequisite: ACC2CRE.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 3-hour final examination (70%) Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall 50% for the unit, one 1-hour mid semester test (20%), and tutorial exercises/assignment equivalent to 500 words (10%)

Prescribed Reading:

ACC3FOA FORENSIC ACCOUNTING (15. CPs Sem. TE-SEM-1 BU.) *Dr Julie Margaret*

Forensic accounting involves the use of auditing and investigative accounting techniques in conjunction with litigation support. Forensic accountants examine issues such as financial business failure and financial fraud, valuation of assets, contract disputes and liability claims; they provide accounting analyses to assist courts in discussion, debate and dispute resolution of civil and criminal matters. This unit explores and critically appraises the concept of

forensic accounting and its investigative processes in the context of a contemporary business environment and the forensic accountants' legal and social duties to stakeholders.

Prerequisite: ACC31AUD.

Co-requisite: ACC3AUD if not previously passed.

Class requirements: One 3-hour seminar.

Assessment: One class debate (15%) 10 minutes per student, one written review (25%), one 2-hour final examination (60%)

ACC3IAR ISSUES IN ACCOUNTING RESEARCH (15. CPs Sem. TE-SEM-2 BU.) *Professor Kamran Ahmed*

Not available in 2008

ACC3IAS INTERNATIONAL ACCOUNTING STUDY PROGRAM (15 CPs Sem. TE-SEM-3 BU. TE-W25-29 BU.) *Professor Les Nethercott*

This unit is conducted over summer and mid-year. It is based on an international study program visiting a number of countries. The unit comprises visits to companies, professional accounting firms, and regulatory bodies. It seeks to develop an understanding of the development and role of international accounting standards and their impact on business. It also examines the roles of the profession and government in the implementation and development of accounting standards and their relevance for business.

Prerequisite: ACC21CRE, ACC22CRE.

Quota: 16. Students unable to enrol without written permission of lecturer.

Class requirements: Three-week intensive study tour preceded by one 7-hour preparatory lecture in Melbourne.

This unit is not available for Study Abroad students.

Assessment: Participation in presentation (20%) Participation in presentation includes posing appropriate questions and relevant contributions to discussions, one 1500-word case study (30%), and one final 2-hour examination (50%)

Prescribed Reading:

CPA Australia *Accounting Handbook* Pearson Prentice Hall, 2006

Recommended Reading:

ACC4ATA ADVANCED TAXATION (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.)*Coordinator to be advised**Not available in 2008***ACC4HTC COMMERCE HONOURS THESIS OPTION C** (60. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BE, BU.) *BE: Dr Jane Hamilton, BU: Professor Zahirul Hoque*

Students undertake this unit as part of their Bachelor of Commerce (Honours). The research component of the program consists of 60 credit points. Students are required to complete a 20,000 word thesis in an accounting topic under the direct supervision of an academic staff member. Topics outside of accounting must be approved by Head of School in consultation with the Professor of Discipline.

Class requirements: There are no formal class requirements. Students are required to consult with their supervisor on a regular basis.

This unit is not available for Study Abroad students.

Assessment: One 20,000-word thesis (100%)

ACC4IFR ISSUES IN FINANCIAL REPORTING (15. CPs Sem. TE-SEM-1 BE, BU.) *Professor Kamran Ahmed*

The purpose of this unit is to examine financial reporting from a theoretical perspective and examines the role of accounting numbers in contractual and organisational arrangements for efficient operations of our economy. Several empirical and theoretical papers dealing with perspectives of financial reporting, usefulness of accounting numbers and disclosures, corporate governance and international harmonization are examined.

Class requirements: One two-hour seminar per week and self-directed learning activities equivalent to 1-hour class room contact per week.

This unit is not available for Study Abroad students.

Assessment: Two 10-minute individual class presentations and one 500-word written summary (15%), one 20-minute individual 1000-word class presentation (15%), one 3000-word take-home final examination (70%)

*Recommended Reading:**Journal Articles***ACC4IMA ISSUES IN MANAGEMENT ACCOUNTING** (15. CPs Sem. TE-SEM-1 BE, BU.) *Professor Zahirul Hoque*

The aim of this unit is to provide the student with an understanding of research in management accounting. This paper draws particularly on the research interests and publications of the teaching staff. Particular emphasis is placed on the social institutional and organisational context of management accounting. Students will be challenged to think about the nature and influence of management accounting.

Class requirements: One 2-hour seminar per week.

This unit is not available for Study Abroad students.

Assessment: Two 2,250-word essays (100%)

BUS1MIS MANAGEMENT INFORMATION SYSTEMS (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-1 AW, BE, BU, MI, SH. TE-SEM-2 BE, BU. TE-W13-26 NI. TE-W31-46 NI.) *Dr Liz Duncan, Dr John McCullagh, Mr Liam Lenten, Mrs Selena Lim*

This unit introduces students to some basic information systems (IS) ideas and concepts as IS are the key to business functions today. It will provide students with an overview of the entire IS discipline as well as a solid preparation for further study in information systems units. In addition, students will also gain an appreciation for business-related packages. This will give them a competitive edge in the job marketplace.

Incompatible unit: CSE111S

Class requirements: Two 1-hour lectures and one 2-hour computer laboratory session/tutorial per week.

Assessment: BU: SH: NI: lab exercises (15%) equal to 500 words, online quizzes (15%). equivalent to 1000 words over the semester, one 3-hour final examination (70%). Hurdle Requirement: Students must achieve at least 40% in the examination as well as an overall total of 50% to pass the unit, AW: presentation and report (15%). equivalent to 500 words, one excel spreadsheet assignment (15%). equal to 500 words, one 3-hour final exam (70%). Hurdle Requirement: Students must achieve at least 40% in the examination as well as an overall total of 50% to pass the unit, BE: online quizzes

(15%). equivalent to 1000 words over the semester, one practical assignment (15%). equivalent to 500 words, one 3-hour final exam (70%). Hurdle Requirement: Students must achieve at least 40% in the examination as well as an overall total of 50% to pass the unit

Prescribed Reading:

BUS2BAD BUSINESS APPLICATIONS ANALYSIS AND DESIGN (15. CPs Sem. TE-SEM-1 BU.) *Dr Rajiv Khosla*

Business information systems are an essential part of most organisational functions today including accounting, marketing, human resource management and finance. This unit provides students with skills in database and systems development considered essential for design of business information systems. The unit focuses on business information systems development based on systems development life cycle from a business professional's viewpoint. Students in this unit develop proficiency in database design and implementation using Microsoft Access. Lecture material is presented in the context of real world organisations and case studies. The assignments are based on real world projects and also may involve industry collaboration. Interactive laboratory sessions help students to gain hands on experience in the design of information systems. The unit also creates career opportunities (eg. business systems analyst, database analyst) for students and broadens their skill base.

Prerequisite: BUS11MIS/BUS12MIS.

Class requirements: One 2-hour lecture and one 2-hour computer laboratory session per week.

This unit is not available for Study Abroad students.

Assessment: One group assignment 2500 words per student (30%), one 2-hour final examination (70%)

BUS2BMO BUSINESS MODELS (15. CPs Sem. TE-SEM-1 BU.) *Dr John Kennedy*

Computer based spreadsheet modelling techniques are introduced for the analysis, planning and control of business operations. Techniques include forecasting using time series and causal methods, goal seeking and optimal decision making, capital budgeting and Monte Carlo simulation. The evaluation of firm performance through ratio analysis based on financial statements is covered. Three spreadsheet assignments are set for practising skills and techniques introduced in the subject. Familiarity with basic spreadsheet operations is assumed.

Prerequisite: BUS11MIS/BUS12MIS or equivalent.

Incompatible unit: BUS21BMO

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Three 700-word spreadsheet based assignments (45%), one 2-hour final examination (55%)

Prescribed Reading:

Mayes, T. R. and Shank, T. M. *Financial analysis with Microsoft Excel 2002* 4th edn Thomson South-Western, 2006

BUS3DRE DIRECTED READINGS (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.)*Coordinator to be advised*

An individual reading project. This unit will be available as necessary and at the discretion of the Head of School.

Class requirements: Students are required to discuss their reading project individually with their supervisors at weekly intervals.

This unit is not available for Study Abroad students.

Assessment: One 4000-word essay(s) or a research report, as arranged for each individual student (100%)

BUS3EBS E-BUSINESS SYSTEMS (15. CPs Sem. TE-SEM-2 BU.) *Dr Rajiv Khosla*

This unit examines business information systems from the perspective of e-business. An understanding of the way in which information systems require integration with business strategies is developed. E-business and business intelligence case studies are used to facilitate understanding of e-business concepts and e-business intelligence systems. Students are provided training in the analysis and design of e-business applications on the web. The assignments are based on real world projects and may involve industry collaboration. At the

conclusion of this unit students should be able to demonstrate an understanding of e-business applications, analysis and design of e-business applications, security and control of business information systems and computer networks. The unit also creates career opportunities for students (eg. e-business analyst, web designer) and broadens their skill base.

Prerequisite: BUS21BAD/BUS22BAD.

Class requirements: One 2-hour lecture and one 2-hour laboratory class.

This unit is not available for Study Abroad students.

Assessment: Two minor projects totalling 2500 words (50%), one 2-hour final examination (50%)

BUS3RPR RESEARCH PROJECT (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.)

Professor David Brown

Permission of the Head of Department of Accounting and Management

Provides students with the opportunity to analyse and synthesise an important area of research in accounting, finance or management. This unit is highly recommended for those students intending to study honours in commerce or business.

Class requirements: Students are required to discuss their project individually with their supervisors at weekly intervals.

Assessment: One 20-minute oral presentation (20%), one 3500-word research paper (80%)

BUS4CTB CONTEMPORARY TOPICS IN BUSINESS SYSTEMS (15. CPs

Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Rajiv Khosla*

In this unit students will develop their analytical and practical skills in contemporary areas of business information systems. There is a focus on human-computer interaction issues and their implications for management and organisations. Human and technological aspects of business information systems design and evaluation will be considered. Web design tools like Macromedia will be used to model aspects of human-computer interaction.

Class requirements: One 2-hour lecture and one 1-hour computer laboratory session per week.

Assessment: One 2000-word report and web based project (40%), one 2-hour final examination (60%)

BUS4DRE DIRECTED READINGS (15. CPs Sem. TE-SEM-1 BE, BU. TE-SEM-2 BE, BU.) *BE: Dr Jane Hamilton, BU: Dr Outi Niininen*

An individual reading project. This unit will be available as necessary and at the discretion of the Head of School.

Class requirements: Students are required to discuss their reading project individually with their supervisors at weekly intervals.

Assessment: Two essays/research reports equivalent in total to 4500 words. (100%) As arranged for each individual student

BUS4HIA BUSINESS HONOURS THESIS OPTION A (15 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Heidi Ryoo*

Students undertake this unit in their first semester of a Bachelor of International Business (Honours). Students are required to begin research on a topic under the direct supervision of an academic staff member. Approval of a research topic is subject to the availability of a supervisor in the designated discipline area.

Class requirements: There are no formal classes. Students are required to consult with their supervisor on a regular basis, and to give a 10-minute presentation of planned work on their thesis near the end of semester.

This unit is not available for Study Abroad students.

Assessment: One 10-minute presentation (100%) This unit is part one of their thesis, it is merely the preparatory work before writing the thesis. No mark is returned. It is a hurdle requirement

BUS4HIB INTERNATIONAL BUSINESS HONOURS THESIS B (30. CPs

Sem. TE-SEM-1 BE, BU. TE-SEM-2 BE, BU.) *Dr Heidi Ryoo*

Students undertake this unit as part of a Bachelor of International Business (Honours). Students are required to complete a 15000-word thesis under direct supervision of an academic staff member. Topics outside International Business must be approved by the Head of Department.

Prerequisite: BUS41HIA or BUS42HIA.

Class requirements: There are no formal class requirements. Students are required to consult with their supervisor on a regular basis.

This unit is not available for Study Abroad students.

Assessment: One 15000-word thesis (100%)

BUS4HTA BUSINESS HONOURS THESIS OPTION A (15 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Heidi Ryoo*

Students undertake this unit in their first semester of a Bachelor of Business (Honours) majoring in either Business Economics or Financial Management. Students are required to begin research on a topic under the direct supervision of an academic staff member.

Approval of a research topic is subject to the availability of a supervisor in the designated discipline area

Class requirements: There are no formal classes. Students are required to consult with their supervisor on a regular basis, and to give a 10-minute presentation of planned work on their thesis near the end of the semester. .

Assessment: One 10-minute presentation (100%) This unit is part one of their thesis, it is merely the preparatory work before writing the thesis. No mark is returned. It is a hurdle requirement

BUS4HTB BUSINESS HONOURS THESIS OPTION B (30. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BE, BU.) *Dr Heidi Ryoo*

Students undertake this unit as part of their Bachelor of Business (Honours) majoring in either Financial Management or Business Economics. The research component of the program consists of 45 credit points. Students are required to complete a 15000-word thesis under the direct supervision of an academic staff member. Approval of research topic is subject to availability of a supervisor in the designated discipline area.

Prerequisite: BUS41HTA OR BUS42HTA.

Class requirements: There are no formal class requirements. Students are required to consult with their supervisor on a regular basis.

This unit is not available for Study Abroad students.

Assessment: One 15000-word thesis (100%)

BUS4HTC BUSINESS HONOURS THESIS OPTION C (60. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BE, BU.) *Dr Outi Niininen*

Students undertake this unit as part of their Bachelor of Business (Honours) majoring in either Human Resource Management, Management or Marketing. The research component of the program consists of 60 credit points. Students are required to complete a 20,000 word thesis under the direct supervision of an academic staff member. Approval of research topic is subject to availability of a supervisor in the designated discipline area.

Class requirements: There are no formal class requirements. Students are required to consult with their supervisor on a regular basis.

This unit is not available for Study Abroad students.

Assessment: One 20,000-word thesis (100%)

ECO11MA MACROECONOMICS (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-1 BU, MI. TE-SEM-2 AW, BE, BU, SH. TE-W31-46 NI.)

Dr Jayanath Ananda, Mr David Reimers, Dr Jan Libich, Dr Jayanth Ananda

Introduces students to the study of the economy as a whole and to the economic way of thinking. Topics include: national income accounting, consumption and investment demand, government spending, exports and imports, aggregate demand and supply, money and banking, fiscal and monetary policy, alternative macroeconomic theories, the balance of payments, national and foreign debt, inflation, unemployment, productivity and economic growth.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: BU; SH; NI; MI; ACN; weekly problem sets/assignment (maximum 1000 words) (15%), BU; SH; NI; MI; ACN; one 1-hour mid-semester test (15%), BU; SH; NI; MI; ACN; one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, BE: in-term tests, assignments, tutorial performance (40%), BE: one 3-hour final examination (60%). Hurdle requirement: Students must achieve at least 40% in the final

examination as well as an overall total of 50% to pass the subject, AW: in-term tests, assignments, tutorial performance (40%), AW: one 2-hour final examination (60%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit.

Prescribed Reading:

BE: Coombes, T. and Reimers, D. *Contemporary Australian macroeconomics* Pearson.

ECO11MI MICROECONOMICS (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-1 AW, BE, BU, SH. TE-SEM-2 BU, MI. TE-W01-08 NI. TE-W13-26 NI.) *Dr Lin Crase, Mr Earl Jobling, Professor Gary Magee* Microeconomics implies a focus on the individual elements and components of an economy rather than on its aggregate nature. Students are introduced to the economic way of thinking in this context and to the broad subject matter of microeconomics. Topics include; consumer behaviour and demand, firm behaviour, costs and supply, price determination and the operation of markets, including imperfect markets. Analysis extends to the elementary theory of factor markets and distribution, the nature of the market system, and of microeconomic policy.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: BU: ACN: Nilai: in-term tests, assignments, tutorial performance (30%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, BE: one 3-hour final examination (60%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit, BE: in-term tests, assignments, tutorial performance (40%), AW: SH: one 2-hour final examination (60%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit, AW: SH: weekly tutorial papers (10%), AW: SH: two 40-minute tests (30%)

ECO11QA INTRODUCTION TO QUANTITATIVE ANALYSIS (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-2 BU, VI. TE-W01-08 NI. TE-W31-46 NI.) *Dr Ishaq Bhatti*

The aim of this unit is to provide a link between mathematical tools and their application in economics and finance. It focuses on certain areas of basic mathematics, linear algebra, mathematics of finance, and differential calculus that are of central importance in business and in economics. Topics to be discussed include how to set up and solve linear and nonlinear equations, systems of equations, unconstrained and constrained optimization problems. There is a strong emphasis on the application of these techniques to practical, real-world problems. This unit provides a solid foundation to further quantitative subjects.

Incompatible unit: MAT11CFE and MAT11CFN

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Tutorial work (15%), one 1-hour mid-semester examination (15%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

Preliminary Reading:

ECO11SB INTRODUCTORY STATISTICS FOR BUSINESS (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-1 AW, BE, BU. TE-SEM-2 AW, BE, BU, MI, SH. TE-W01-08 NI. TE-W31-46 NI.) *Dr Warren Paul, Dr Christopher Lenard, Dr Suzanne Sommer*

In this unit students consider how to communicate and interpret commercial and economic information in terms of statistical measures. The probability approach is introduced, with applications to inferential statistics and hypothesis testing using sampling distributions in the realms of economics and commerce. Simple linear regression and testing for various hypotheses in business, economics and finance is also covered.

Incompatible unit: ECO11IBS/ECO12IBS

Class requirements: Two 1-hour lectures, one 1-hour workshop and one 1-hour tutorial per week.

This unit is not available for Study Abroad students.

Assessment: Assignments and project (15%), tutorial participation (5%), one mid-semester test (10%), one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, Ten 100 word tutorials (15%). Albury-Wodonga

Submitted weekly, one 2-hour examination (55%). Albury-Wodonga: Open Book exam

Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit, two 750-word assignments (30%). Albury-Wodonga: SPSS based

ECOT1EC LONG-TERM ECONOMIC CHANGE (15. CPs Sem. TE-SEM-1 BU.)

Mr Michael Schneider

This unit explores the general processes by which economies have evolved, developed and changed over long periods of time. The analysis focuses principally on the relationship between government and the business sector as it affected economic development or decline in different systems up to 1914. Among topics studied are the development of successive economic systems in early times, the effect of politics and culture on economic life in various parts of the world, the rise of capitalism in Europe, the impact of European trade and colonisation on Asia and the Americas, the causes and consequences of industrialisation, political crises in European politics during the 18th and 19th centuries and their economic consequences, and the emergence of globalisation.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Tutorial assessment (20%) consisting of weekly 15-minute written exercises, one 1000-word essay (20%), one 2-hour final examination (60%)

Prescribed Reading:

Bentley, J.H., Ziegler, H.F. *Traditions and encounters; a brief global history* McGraw-Hill, 2008.

ECO2ABM AGRICULTURAL BUSINESS MANAGEMENT (20. CPs Sem. TE-SEM-2 BU.) *Coordinator to be advised*

Not available in 2008

ECO2AFE APPLIED FORECASTING FOR ECONOMICS AND FINANCE

(15. CPs Sem. TE-SEM-2 BU.) *Dr Ishaq Bhatti*

The unit will cover time series forecasting techniques widely used in economics, finance and other commercial areas such as marketing and management. The techniques will range from exponential smoothing methods to statistical models such as the ARIMA. Some issues in judgemental forecasting methods will also be covered. Strong emphasis will be given to applications of forecasting techniques. However, theoretical issues will also be dealt with. Real data sets from economics, finance, tourism, marketing and management will be used. The unit requires the use of statistical package Microfit.

Prerequisite: ECO11IBS/ECO12IBS or STA12SS.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2-hour final examination (60%), four applied assignments (40%). each equivalent to 500 words

Prescribed Reading:

Makridakis, S., Wheelwright, S.C. and Hyndman R.J. *Forecasting methods and applications* Wiley, 1998

Recommended Reading:

Diebold, F.X., *Elements of Forecasting* South-Western, 1998

ECO2EGD ECONOMIC GROWTH AND DEVELOPMENT (15. CPs Sem. TE-SEM-1 BU.) *Mr David Walker*

In this unit, students will be introduced to the factors that influence the process of economic growth and development, particularly in a developing country context. The main objective of this unit is for students to develop an understanding of the theories of economic growth and development and to analyse the potential policy solutions and strategies a country might adopt to improve human welfare. The topics covered include; technological change, trade and foreign investment, savings and financial markets, sustainable development and the environment, human resource development, population growth, poverty and inequality. An additional objective is for students to build on their analytical and problem-solving abilities more generally.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Tutorial assessment (10%), one 700-word assignment (10%), one 1-hour mid-semester test (20%), one 2-hour final examination (60%)

ECO2EHR ECONOMICS OF HUMAN RESOURCES (15. CPs Sem. TE-SEM-2 BU.) *Professor John King*

In this unit, students will explore the microeconomics of labour markets, including labour supply and demand, education and training, wage and salary determination, and labour turnover and mobility. The economic implications of trade union activity and/or government regulation and the decisions of arbitration tribunals are also considered. Problems of gender equity and the ageing of the labour force will be addressed. The unit concludes with discussion of major public policy issues related to these personnel questions.

Prerequisite: ECO11IMI/ECO12IMI.

Class requirements: Two 1-hour lectures per week and one 1-hour tutorial per week.

Assessment: One 2-hour written examination (15%), one 500-word essay, written in a tutorial under examination conditions (15%), one 2-hour final examination (70%)

Prescribed Reading:

Norris, K., Kelly, R., Giles, M. *Economics of Australian labour markets*. 6th edn Pearson, 2004.

ECO2EOF THE ECONOMICS OF THE FAMILY (15. CPs Sem. TE-SEM-2 BU.)

Dr Lan Li

In the Economics of the Family, students are introduced to the economic models that economists have developed to inform our understanding of family life. These models, which on occasion have produced controversial results, are based upon conventional microeconomic theory and have both descriptive and predictive power. The objective of this unit is to provide students with their first exposure to how economists use positive economic theory to construct and test models of human behaviour. In this case the focus of the analysis is upon a subject area of both societal and scholastic interest. Topics covered will include marriage and divorce, household production and labour force participation, fertility and the quality and quantity of children, and gender and racial discrimination in the labour market.

Prerequisite: ECO11IMI/ECO12IMI and ECO11ISB/ECO12ISB.

Class requirements: one 2-hour lecture per week and one 1-hour tutorial per week.

Assessment: Problem sets (30%) equivalent to 2000 words., one 2-hour final examination (70%)

Preliminary Reading:

TBA

ECO2GEI GLOBAL ENVIRONMENTAL ISSUES (15. CPs Sem. TE-SEM-1 BU.)

Dr John Kennedy

The following issues will be examined: world population trends in relation to the world's carrying capacity for provision of food and resources, and waste assimilation; land degradation; harvesting of forest and fish stocks, and sustainability; biodiversity and species preservation; water supply and quality; future energy sources,

including the nuclear fuel cycle and solar energy; greenhouse and CFC emissions; the role of technological change and trade; and the efficacy of global treaties. Students will be introduced to different views about the seriousness of the issues for the future of society, and to policy for dealing with identified problems. The different ways in which economists approach the diagnosis of environmental problems and offer prescriptions will be discussed.

Class requirements: two 1-hour lectures and one 1-hour tutorial per week.

Assessment: two 650-word tutorial papers (20%), one 1200-word essay (30%), one 2-hour final examination (50%)

Prescribed Reading:

Lomborg, B. *The Sceptical Environmentalist: Measuring the Real State of the World* Cambridge University Press, 2001

ECO2GLO GLOBALISATION (15 CPs Sem. TE-SEM-1 BU.) *Dr Wayne Geerling*

Students are introduced to the key issues and debates in the economics of globalisation. Topics may include the sources and impact of world market integration, emerging global capital markets, mass migrations and global trading issues. Issues such as whether globalisation fosters growth and who wins and loses from globalisation are addressed. 'Globalisation' blends concepts and models from international economics with historical analysis to provide an overview of: (i) the unfolding process of globalisation over the long-term and (ii) the economic and political factors underlying that evolution. Selected case studies from Australian perspective are presented to complement the understanding of globalisation.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2-hour final examination (60%), One 1-hour mid-semester test (20%), Tutorial attendance and participation (20%). assessment equivalent to 1500 words

Recommended Reading:

Geerling, Wayne ed. *Subject Reader*

ECO2IBE INTERNATIONAL BUSINESS ENVIRONMENT (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEMS SY. TE-SEM-1 BU. TE-SEM-S BU.) *Dr Wayne Geerling*

This unit examines the changing patterns of world trade and international business institutions and managerial responses of these institutions to their dynamic and complex environment. This framework forms the basis for analysis of the factors affecting international business decision-making. The multinational enterprise is a particular focus of study, while significant aspects of the environment such as financial, cultural, economic and political, are examined and their influence assessed in relation to current and future performance. Emphasis is also on discussion of current developments in the global economy.

Prerequisite: ECO11IMA/ECO12IMA and ECO11IMI/ECO12IMI.

Incompatible unit: ECO31IBC/ECO32IBC

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: Weekly 10-minute tutorial assessment tasks (10%) equivalent to 1500 words over the semester, one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, one 1-hour mid-semester exam (20%)

Prescribed Reading:

Hill, C. W. *International business: competing in the global marketplace* Chicago Irwin 6th edn

ECO2ILE INTRODUCTION TO THE ECONOMIC ANALYSIS OF LAW (15 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Mr Damien Eldridge*

In this unit, students are taught how to use microeconomic techniques to analyse various laws and legal principles. In particular, students will learn to distinguish between the legal incidence of a law and the economic incidence of a law. The set of topics that might be covered include issues in property law, contract law and tort law as well as punishment and the deterrence of crime, competition law, consumer protection law, intellectual property law and family law.

Prerequisite: ECO11IMI.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2-hour mid-semester exam (50%), one 2-hour final exam (50%)

Prescribed Reading:

Cooter, R and T. Ulen *Law and economics* (4th ed.) Addison Wesley, USA.

ECO2ISB INTERMEDIATE STATISTICS FOR BUSINESS (15. CPs Sem. TE-SEM-1 BU, VI. TE-W13-26 NI.) *Dr Laszlo Konya*

Building on Introductory Statistics for Business, this unit is an intermediate level statistical course for students specialised in business and economics. After a review of basic statistical inference the course works through topics like the comparison of two or more populations using parametric and nonparametric techniques, statistical tests for qualitative data, simple and multiple regression, factor analysis. The main emphasis is on the development of practical skills through the discussion of practical examples with special regard to the interpretation of the results.

Prerequisite: ECO11ISB/ECO12ISB.

Class requirements: two 1-hour lectures and one 1-hour tutorial or practical class per week.

Assessment: tutorial attendance and participation (5%), one 1500-word assignment (10%), one 1-hour test (15%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

Prescribed Reading:

ECO2MAT MACROECONOMIC THEORY (15. CPs Sem. TE-SEM-2 BU.) *Dr Shawn Leu*

This is an intermediate macroeconomic theory subject. It concentrates on the theory of aggregate demand, aggregate supply, unemployment and inflation, in an open as well as closed economy context and on basic business cycle. Connections are also made between macroeconomic illustrations and the performance of financial markets with forward-looking behaviour. It includes reference to the applicability of these theories to the Australian economy.

Prerequisite: ECO11IMA/ECO12IMA.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Tutorial work (10%), mid-semester test (20%), one 2-hour final examination (70%)

Prescribed Reading:

Blanchard, O. J., Sheen, J. *Macroeconomics* 2nd. Australasian edn Pearson, 2004.

ECO2MEC MANAGERIAL ECONOMICS (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEMS SY. TE-SEM-2 BU.) *Dr Robert Waschik*

This unit introduces the range of economic theory relating to the management of an enterprise, including theories relating to demand, production, organisation of the firm, the nature of an industry, pricing and investment policies, the economics of information and the impact of government policy. In particular it focuses on how theory can help a manager discover the solution to practical problems.

Prerequisite: ECO11IMI/ECO12IMI .

Class requirements: One 2-hour lecture and one 1-hour tutorial or seminar per week .

Assessment: Tutorial assessment (15%), one 1-hour mid-semester test (15%), one 2-hour examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

Prescribed Reading:

ECO2MIT MICROECONOMIC THEORY (15. CPs Sem. TE-SEM-1 BU.) *Ms*

Anke Leroux

This is an intermediate microeconomic theory unit which expounds demand theory, producer theory, price determination, industry structure, some game theory and some welfare economics.

Prerequisite: ECO11IMI/ECO12IMI.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Tutorial assessment (20%) equivalent to 1500 words, one 1-hour mid-semester test (20%), one 2-hour final examination (60%)

Prescribed Reading:

Varian, H.R. *Intermediate microeconomics*. Latest Edn

ECO2MWE MODERN WORLD ECONOMY (15. CPs Sem. TE-SEM-2 BU.)

Professor John King

In this unit students will focus on the major changes in the international economy since 1914, in the context of contemporary developments in economic theory and major political movements. Topics covered include the economic impact of the two World Wars; the Great Depression, Keynesian macroeconomics and the rise and fall of social democracy; the Russian Revolution, Stalinist industrialisation and the collapse of the Soviet Union; the reconstruction of the international monetary and trading systems after 1945; the economic development of the 'Third World'; the long post-war boom and the stagflation that ended it; world growth and the global environment; the 'roaring nineties'; and the issues facing the world economy in the 21st century.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: weekly 10-minute tutorial assessment tasks (20%) equivalent to 1500 words over the semester, one 1000-word essay written under examination conditions (20%), one 2-hour final examination (60%)

Prescribed Reading:

Hobsbawm, E. *Age of Extremes* Penguin, 1994

ECO2SBE STRATEGIC BEHAVIOUR IN BUSINESS AND ECONOMICS (15 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Mr Damien Eldridge*

Game theory is the study of strategic interaction. The focus is on situations in which individuals interact with one another in the knowledge that outcomes depend, at least in part, on each of their actions. Such situations arise naturally in the social sciences. In particular, game theory has had a significant impact in economics. Game theoretic models can now be found in most areas of economics. In this unit, students will learn the basic techniques that are used to model strategic interaction. They will also learn how to apply these techniques to a variety of problems that occur in business and economics. Some applications might also be drawn from the other social sciences.

Prerequisite: ECO1IMI.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2-hour mid-semester exam (50%), one 2-hour final exam (50%)

Preliminary Reading:

McMillan, J. *Games, strategies and managers: how managers can use game theory to make better business decisions*. Oxford University Press, USA

Dixit, A.K. and B.J. Nalebuff *Thinking strategically: the competitive edge in business politics and everyday life* WW Norton and Company, USA

Prescribed Reading:

Carmichael, F. *A guide to game theory* Financial Times/Prentice Hall, Great Britain

ECO3AQA ADVANCED QUANTITATIVE ANALYSIS (15. CPs Sem. TE-SEM-2 BU.) *Mr Damien Eldridge*

In this unit, students are exposed to many of the mathematical techniques that are employed in static economic analysis. These techniques include linear algebra, multivariate calculus and optimisation theory.

The emphasis throughout the course is on the application of these techniques to a variety of economic problems.

Prerequisite: ECO121QA and ECO21MIT.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 1-hour mid semester exam (25%), one 3-hour final examination (75%)

Prescribed Reading:

Simon, C.P and L. Blume *Mathematics for economists* WW Norton and Co, USA 1994

ECO3AWE ASIA IN THE WORLD ECONOMY (15. CPs Sem. TE-SEM-1 BU. TE-SEM-S BU.) *Mr David Walker*

The main aim of this unit is to describe and analyse the evolution of various Asian economies and their interaction with the global economy. The unit will focus on the rapid industrialisation of several East Asian economies, followed by a thorough analysis of the Asian financial crisis. There will also be a review of the market-oriented reforms applied to the Chinese economy since 1978. A brief outline and review of various topics in open economy macroeconomics will also be covered. The unit will cover patterns of trade and investment both within the region and between the region and the rest of the world. The various economic explanations for the high rates of economic growth and how this has affected various Asian countries will be analysed.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Tutorial attendance and participation (5%), one 10-minute tutorial presentation (10%), one 1000-word essay (15%), one 2.5-hour final examination (70%)

ECO3BAS BUSINESS ANALYSIS AND SIMULATION (15. CPs Sem. TE-SEM-2 BU.) *Coordinator to be advised*
Not available in 2008

ECO3CBA COST-BENEFIT ANALYSIS (15. CPs Sem. TE-SEM-2 BU.) *Dr John Kennedy*

In this unit the approaches and techniques for evaluating the introduction of projects and policy change are studied. Evaluation is considered in terms of both financial analysis and social cost benefit analysis. The relevant economic theory spans applied welfare economics, and partial and general equilibrium analysis. Particular topics covered include: the rate of discount; distributional consequences of projects; risk and uncertainty; valuing non-marketed goods; the value of life and health; and the value of travel time. The way in which spreadsheets can be used for calculation, analysis and presentation of project appraisals is explained. Practical experience is obtained through exercises and computer laboratory sessions.

Prerequisite: ECO21MIT or ECO22MEC.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: Two 200-word assignments (10%), one 1000-word project (20%), one 1-hour spreadsheet-based test (20%), one 2-hour final examination (50%)

Prescribed Reading:

Boardman, A. E., et al. *Cost-benefit analysis: concepts and practice* Prentice Hall, Upper Saddle River, NJ 2001. 2nd edn

ECO3CBP CENTRAL BANKS AND MONETARY POLICY (15 CPs Sem. TE-SEM-1 BU.) *Dr Jan Libich*

In this unit, students will get a better understanding of monetary policy – the most powerful economic tool available – as performed by leading central banks. This will combine theoretical modelling, data analysis and judgement in order to better understand how the central bank's decisions are made and how they affect the economy and the lives of individuals. The teaching method will be somewhat different from the usual one-way delivery; the topics are designed to be applied to thinking about real world policy issues so discussion will be an essential part of both lectures and tutorials. Further a representative of a major central bank will give a guest lecture to provide the student with an inside look into central banking.

Prerequisite: ECO11/12IMA.

Class requirements: Two 1-hour lectures and one 1-hour tutorial.

Assessment: Weekly tutorial problem sets (20%) maximum 1000

words, one 1-hour mid-semester exam (25%), one 2-hour final exam (55%)

Prescribed Reading:

Peter Bofinger *Monetary Policy: goals, institutions, strategies and instruments*. Oxford University Press, 2001

Recommended Reading:

Alan Blinder *Central banking in theory and practice* The MIT Press, 1998

ECO3CGE CHANGE AND GROWTH IN THE AUSTRALIAN ECONOMY (15 CPs Sem. TE-SEM-2 BU.) *Professor Gary Magee*

Students are provided with an overview of the development of the Australian economy. It pays particular attention to the roles played by geography, policy, technology, immigration and foreign investment. Topics covered include the origin of the modern Australian economy, the unique pattern of Australian economic development, the rise of living standards, agricultural development, the gold rushes, the impact of the world wars, the post-war boom and the Great Depression and other major economic downturns. The unit is designed to show how knowledge of history can shed light on current development in both the Australian and international economies.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One final 2-hour examination (60%), one 2000-word essay (30%), one 500-word tutorial paper (10%)

Prescribed Reading:

Rodney Maddock and Ian McLean *The Australian Economy* Cambridge UP

ECO3DAS DECISION ANALYSIS WITH SPREADSHEETS (15. CPs Sem. TE-SEM-1 BU.) *Dr Suren Bazov*

In this unit, students are provided with theories, modelling skills and computer techniques required for decision-making in business, and management. Quantitative analyses of practical problems confronted by management are emphasised, and students are introduced to the methods to solve these problems. The unit covers a wide range of decision-making techniques including various programming models, network analysis, decision trees, regression analysis, and simulation. Many typical management problems are illustrated to be amenable to these techniques.

Prerequisite: A first year quantitative subject.

Class requirements: One 2-hour lecture and one 1-hour tutorial or workshop per week.

Assessment: Weekly home assignments equivalent to 2000 words (30%), one 2-hour final examination (70%)

Prescribed Reading:

Ragsdale, C. *Spreadsheet modelling and decision analysis* 3rd edn, South-Western College Publishing, 2001

ECO3DRE DIRECTED READINGS (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Professor Harry Clarke*

An individual reading project. This unit will be available as necessary and at the discretion of the Head of Department. It may be taken only at third or fourth year levels.

Class requirements: Students are required to discuss their reading project individually with their supervisors at weekly intervals.

This unit is not available for Study Abroad students.

Assessment: One 4000-word essay or one 4000-word research report (100%)

ECO3EME ECONOMETRIC METHODS (15. CPs Sem. TE-SEM-1 BU.) *Dr Suzanne Sommer*

On successful completion, students will be equipped with the necessary skills in statistical and econometric techniques to carry out independent empirical studies. This unit presents theory of multiple regression used to estimate and test the validity of economic relationships. Objectives are to learn: (i) OLS estimation, (ii) Gauss-Markov Theorem, (iii) diagnostic tests, (iv) GLS estimation, (v) applications of these techniques to various empirical examples.

Prerequisite: ECO2ISB or equivalent.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: Assignments/ project totalling 1500 words (30%), one 2-hour final examination (70%)

Prescribed Reading:

Hill, R., Griffiths, W., and Judge, G. *Undergraduate Econometrics* Wiley

ECO3EOS SPORTS ECONOMICS (15. CPs Sem. TE-SEM-2 BU.) *Dr Liam Lenten*

The aim of this unit is to identify the constraints and opportunities that will affect the ability of sports to survive in an increasingly competitive, global marketplace. Particular emphasis will be placed on examinations of both North American and European professional sports, as well as indigenous games, such as Australian Rules football. Topics covered will include: labour markets in various sports, including the effectiveness of regulations such as player drafts and salary caps; the ways in which sports have coped with recent substantial increases in revenue and costs; the identification of the market for particular sports and the extent of competition within those markets; and the extent to which the commercialisation of sport is inconsistent with the traditions and cultures of individual sports.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Tutorial assessment (10%), one 2-hour final examination (70%), one 50-minute mid-semester test (20%)

Prescribed Reading:

Leeds, M. and von Allmen, P. *The economics of sports 2nd ed.* Addison-Wesley, Boston

ECO3ERE ENVIRONMENTAL AND RESOURCE ECONOMICS (15. CPs Sem. TE-SEM-1 BU.) *Dr Anke Leroux*

The causes of pressing environmental issues including global warming, deforestation, overfishing and biodiversity loss are explained using economic analysis. Alternative economic measures to rectify environmental degradation and to ensure the sustainable management of our natural resources are discussed and contrasted. In this unit, students learn how to apply the economics of pollution, climate change and natural resource allocation to current policy issues surrounding Australia's river basin, water catchments, old growth forests as well as the current debates on genetically modified crops, carbon trading and renewable energy.

Prerequisite: ECO21MIT or ECO22MEC.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 1500-word assignment (30%), tutorial work equivalent to 1000 words. (20%), one 2-hour final examination (50%)

Prescribed Reading:

ECO3GDE GROWTH AND DECLINE IN THE GLOBAL ECONOMY (15 CPs Sem. TE-SEM-2 BU.) *Gary Magee*

The purpose of this unit is to introduce students to the field of long-run economic growth and performance. Two key questions are addressed: why do certain economies persistently perform more successfully than others, and how is leadership in the global economy achieved and maintained? Students completing this unit will be able to explain and describe the pattern of long-term economic growth, leadership and decline in the world economy since the industrial revolution; evaluate the role of culture, institutions and the environment in economic change; and apply the methods of historical economics to contemporary economic debates.

Class requirements: One 3-hour seminar per week.

Assessment: One 2000-word essay (30%), one 500-word seminar paper (10%), one 2-hour examination (60%)

Recommended Reading:

Douglass North *Understanding the process of economic change* Princeton University Press

ECO3HEC HEALTH ECONOMICS (15. CPs Sem. TE-SEM-2 BU.) *Mr Damien Eldridge*

In this unit, student will learn how to use microeconomic techniques to analyse various issues related to health and health care. These techniques will be used to analyse some of the major issues confronting the Australian health care system. The topics that might be covered include trends in population health and expenditure on health care, the nature of the commodity health care, health care as an input in the production of good health, the demand for health care and its relationship with the demand for health insurance, the supply of health care, the financing of health care, agency issues in health care and the regulation of health care, as well as the use of cost-benefit analysis and cost-effectiveness analysis in health economics.

Prerequisite: ECO11IMI/ECO12IMI.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 1-hour mid-semester test (25%), one 1500-word essay (25%), one 2-hour final examination (50%)

Prescribed Reading:

Course Reading *Brick Folland, S, A.C. Goodman, and M. Stano The economics of health and health care 5th ed.* Prentice Hall, USA 2006

ECO3IME INTERNATIONAL MONETARY ECONOMICS (15. CPs Sem. TE-SEM-2 BU.) *Dr Shawn Leu*

This unit treats the theoretical and policy issues of international monetary relations at the intermediate level. After introducing the structure and functions of the foreign exchange market, the unit deals with issues such as the balance of payments adjustment mechanism, the process of exchange rate determination, the operation of the international monetary system and international economic integration.

Prerequisite: ECO11IMA/ECO12IMA.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One mid-semester test (20%), One 2-hour final examination (70%), Tutorials (10%)

Prescribed Reading:

Paul R. Krugman and Maurice Obstfeld *International Economics: Theory and Policy* Pearson Publishing

ECO3IND INDUSTRIAL ORGANISATION (15. CPs Sem. TE-SEM-1 BU.) *Mr James Bugden*

In Industrial Organisation, students study firm behaviour, market structure and performance, and government regulation. The basic questions the unit covers are: How are companies organised? How do they make pricing and other strategic decisions? Is a more competitive market better than a more monopolistic market? How can government regulation reduce the harmful effects of non-competitive behaviour of companies? The unit emphasises the application of economic theory to practical business problems. A feature of the unit is to learn practical knowledge of business and markets through cases studies and classroom practice.

Prerequisite: ECO21MIT or ECO22MEC.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: Tutorial participation (10%), one 2-hour mid-term exam (30%), one 2.5-hour final examination (60%)

Prescribed Reading:

Carlton and Perloff *Modern Industrial Organisation* Pearson

ECO3IRE INDUSTRIAL RELATIONS (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEMS SY. TE-SEM-1 BE, BU, SH. TE-W13-26 NI.) *Mr John Griffiths, Dr Apollo Nsubuga-Kyobe*

Three inter-related areas are covered. The first is economic aspects of wages and industrial relations, the second is the sociological study of workers and managers, and the third is the major institutions of Australian industrial relations, including trade unions, employers' organisations, industrial tribunals and enterprise bargaining. Further

topics include the evolution of wages policy, women at work and current controversies over the reform of the industrial relations system together with comparative insights into other countries' industrial relations systems.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: BU: ACN: tutorial assessment (15%), one 50-minute essay written in tutorial time (15%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, SH: tutorial assessment (10%), one 2500-word report (20%), and one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, BE: Nilai: one 2-hour examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, one 1500-word assignment (30%)

Prescribed Reading:
TBA

ECO3ITE INTRODUCTION TO TIME-SERIES ECONOMETRICS (15 CPs Sem. TE-SEM-2 BU.) *Dr John Shannon*

The purpose of this unit is to introduce students to the theoretical and applied aspects of univariate time series modelling in Economics and Finance. The topics to be discussed include the motivation for a time series methodology, difference equations, exponential smoothing, and the Box-Jenkins approach to modelling, testing for non-stationary and the theoretical and applied aspect of ARCH-GARCH models in Economics and Finance. There will be a strong focus on applications and on the use of the EViews time series package

Prerequisite: ECO21ISB or ECO22AFE.

Class requirements: Two 1-hour lectures and one 1-hour workshop per week.

Assessment: Three 500-word practical assignments (30%), one 3-hour final examination (70%)

Prescribed Reading:
TBA Recommended Reading:

Patterson, K. *An introduction to applied econometrics: A time series approach* Palgrave Macmillan, UK Academic, 2000
Diebold, F. *Elements of forecasting (4th ed)* South-Western College Publishing, Cincinnati, 2003

ECO3ITR INTERNATIONAL TRADE (15 CPs Sem. TE-SEM-1 BU.) *Dr Robert Waschik*

In this unit topics in international trade theory are covered, such as determinants and patterns of trade and international competitiveness. Selected topics in international trade policy, including distortions such as import tariffs and export subsidies, and Australia's relationship with Regional Trade Agreements and the World Trade Organisation, are also explored.

Prerequisite: ECO11IMI/ECO12IMI.

Class requirements: Two 1-hour lecture and one 1-hour tutorial per week.

Assessment: One 1.5-hour mid-semester test (30%), one 2-hour final examination (70%)

ECO3MAA MACROECONOMIC ANALYSIS (15 CPs Sem. TE-SEM-2 BU.) *Dr Heidi Ryoo*

This unit builds on the basic macroeconomic theory examined in Macroeconomic Theory to develop a range of alternative approaches. A number of these are developed and used to examine macroeconomic problems of closed and open economies. Australian policy issues and debates are emphasised.

Prerequisite: ECO22MAT.

Class requirements: One 2-hour lectures and one 1-hour seminar per week.

Assessment: Weekly problem set/assignment of 1000 words (10%), one 1-hour mid-semester test (30%), one 2-hour final examination (60%)

Prescribed Reading:
Abel, A., Bernanke, B. *Macroeconomics* Latest edn Pearson/Addison Wesley

ECO3MIA MICROECONOMIC ANALYSIS (15 CPs Sem. TE-SEM-1 BU.) *Dr Buly Cardak*

This unit complements Microeconomic Theory, so that students completing both units have a thorough grounding in microeconomics. Topics include inter-temporal choice, risk and decision theory, welfare economics and market failure, game theory, and information.

Prerequisite: ECO21MIT.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Tutorial assessments (10%), one mid-semester test (20%), one 3-hour final examination (70%)

ECO3MKE MARKETING ECONOMICS (15 CPs Sem. TE-SEM-1 BU.) *Dr David Prentice*

In this unit, students learn tools from recent developments in economics for marketing. Topics covered include strategic pricing and product differentiation, economics of advertising, innovation, diffusion and product life-cycles, hedonics and marketing under imperfect information. Analytical and problem-solving skills are developed.

Prerequisite: ECO11IMI/ECO12IMI.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Tutorial problem sets, equivalent to 1500 words (10%), one 1-hour mid-semester test (20%), one 2-hour final examination (70%)

Prescribed Reading:
Lynne Pepall, Daniel J, Richard and George Norman *Industrial Organisation* Thomson, Third edn

ECO3OEI ORGANISATIONS, ECONOMICS AND INCENTIVES (15 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Suren Basov*

In this unit, students consider the economics of asymmetric information, when agents may have private knowledge, take hidden actions and attempt to manipulate the knowledge information and incentives of others. Using game theory and information economics, the main techniques and results of general equilibrium theory, principal-agent theory and contract theory are covered. Students are introduced to the principles of economic design in asymmetric information environments. These tools are applied to performance incentives, economics of education, and structure of insurance markets, property rights, privatisation and comparison of economic systems, asset pricing and corporate finance.

Prerequisite: ECO2MIT or ECO2MEC.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: 5 assignments equivalent to 2000 words (20%), one 2-hour final exam (80%)

Prescribed Reading:
Paul Milgrom and John Roberts *Economics, Organisation and Management* TBA

ECO3PUB PUBLIC ECONOMICS (15 CPs Sem. TE-SEM-2 BU.) *Mr James Bugden*

In this unit, students examine the public sector of a mixed economy, to understand how government can help to meet efficiency and equity objectives using tax and public spending policies. Issues of social choice are addressed and applied to health, defence and social welfare system analysis.

Prerequisite: ECO21MIT or ECO22MEC.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 2-hour and 45-min final examination (60%), Tutorial participation (10%), one 2-hour mid semester exam (30%)

Prescribed Reading:
Stiglitz *Economics of the public sector* Norton

ECO3RAE THE RISE OF THE AMERICAN ECONOMY (15 CPs Sem. TE-SEM-2 BU.) *Dr David Prentice*

In this unit, students analyse the growth of the economy of the United States, from settlement to the Second World War. The central question

is what economic factors shaped the rise of the United States to economic leadership? Specific questions analysed include: what caused American industrialisation: what were the effects of monetary and financial regulation on development and macroeconomic stability; what role did canals, railroads and communication improvement play; what were the economic aspects of slavery and the civil war; what caused the rise of big business; what were the causes and effects of the great depression; and, how did government influence all of these?

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 2-hour final examination (70%), one 1-hour mid-semester test (20%), weekly tutorial assignments totalling 1500 words (10%).

Prescribed Reading:

Jonathan Hughes and Louis Cain *American economic history* Addison Wesley.

ECO3RED REGIONAL ECONOMIC DEVELOPMENT (15. CPs Sem. TE-SEM-1 BU.) *Coordinator to be advised*
Not available in 2008

ECO4AMP AGRICULTURAL MARKETING AND POLICY (20. CPs Sem. TE-SEM-1 BU.) *Coordinator to be advised*
Not available in 2008

ECO4AQA ADVANCED QUANTITATIVE ANALYSIS (15 CPs Sem. TE-SEM-2 BU.) *Mr Damien Eldridge*

In this unit, students are exposed to a review of the tools in linear algebra and differential calculus necessary for a mathematical treatment of economic theory at the intermediate/advanced undergraduate level. These tools are then applied to several optimization problems which will be familiar to student who have completed second year economic theory courses. The unit finishes with an introduction to differential equations and dynamics used in macroeconomics and finance.

Incompatible unit: Students who have completed ECO3AQA cannot take this unit

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: Four honours level problem sets (20%), one 1-hour mid-semester exam (20%), and one 2-hour final exam (60%)

Recommended Reading:

Chiang, Alpha C. *Fundamental methods of mathematical economics*, 3rd ed. McGraw-Hill

ECO4ATE ADVANCED TIME-SERIES ECONOMETRICS (15 CPs Sem. TE-SEM-1 BU.) *Dr Laszlo Konya*

The purpose of this unit is to introduce students to the theoretical and applied aspects of multivariate time series modelling in Economics and Finance. This unit provides students with a basic understanding of the linear algebra, multivariate calculus and simultaneous-equation models needed to work in this area. Topics covered include VAR modelling, Granger causality analysis, error correction models, co integration, impulse response functions and variance decompositions. There will be a strong focus on applications from both Finance and Economics and on the use of the EViews time series package.

Prerequisite: ECO32ITE or ECO31EME or ECO32AEC or permission of the lecturer.

Class requirements: Two 1-hour lectures and one 1-hour workshop per week.

This unit is not available for Study Abroad students.

Assessment: One 1500-word case studie (30%).

Prescribed Reading:

Enders, W. *Applied Econometric Time Series* Wiley, Hoboken 2004, 2nd edn.

Recommended Reading:

ECO4DRE DIRECTED READINGS (15. CPs Sem. TE-SEM-1 BE, BU. TE-SEM-2 AW, BE, BU.) *AW: Dr Lin Crase, BU: Professor Gary Magee*

An individual reading project. This unit will be available as necessary and at the discretion of the Head of Department. It may be taken only at fourth year levels.

Class requirements: Students are required to discuss their reading project individually with their supervisors at weekly intervals.

This unit is not available for Study Abroad students.

Assessment: One 4000-word research report (100%)

ECO4EEP ENVIRONMENTAL ECONOMICS AND POLICY (15. CPs Sem. TE-SEM-2 BU.) *Dr John Kennedy*

This unit analyses the optimal management of the environment as a source of material, biological and recreational resources and as a sink for wastes generated from production and consumption. The efficacy of alternative policies for controlling pollution is examined, using the theory of externalities. Management of exhaustible resources, fisheries and forestry is considered, with applications to the international harvesting of southern blue fin tuna, and to management of mountain ash stands in the Central Highlands of Victoria. Additional topics such as the precautionary principle and the preservation of biodiversity may also be treated.

Class requirements: Two hours of lectures per week.

Assessment: One 1-hour mid-semester test (20%), one 1500-word review essay (20%), one 2-hour final examination (60%)

Prescribed Reading:

Perman, R., Ma, Y., McGilvray, J., and Common, M. *Natural Resource and Environmental Economics*. 3rd ed. 3rd ed., Pearson, 2003

ECO4HET HISTORY OF ECONOMIC THEORY (15. CPs Sem. TE-SEM-2 BU.)

Coordinator to be advised

Not available in 2008

ECO4HTA ECONOMICS HONOURS THESIS OPTION A (15 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Heidi Ryoo*

Students undertake this unit in the first semester of their Bachelor of Economics (Honours). Students are required to begin research on an economics topic under the direct supervision of an academic staff member. Topics outside of economics must be approved by the Head of Department.

Class requirements: There are no formal classes. Students are required to consult with their supervisor on a regular basis and to give a 10-minute presentation of planned work on their thesis near the end of semester.

Assessment: One 10-minute presentation (100%) This unit is part one of their thesis, it is merely the preparatory work before writing the thesis. No mark is returned. It is a hurdle requirement

ECO4HTB ECONOMICS HONOURS THESIS OPTION B (30. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Heidi Ryoo*

Students undertake this unit as part of a Bachelor of Economics (Honours). Students are required to complete a 15000 word thesis in an economics topic under the direct supervision of an academic staff member. Topics outside of economics must be approved by Head of Department.

Prerequisite: ECO41HTA or ECO42HTA.

Class requirements: There are no formal classes. Students are required to consult with their supervisor on a regular basis.

This unit is not available for Study Abroad students.

Assessment: One 15,000-word thesis (100%)

ECO4IME INTERNATIONAL MONETARY ECONOMICS (15. CPs Sem. TE-SEM-2 BU.) *Coordinator to be advised*

Not available in 2008

ECO4ITA INDUSTRIAL ORGANISATION: THEORY AND APPLICATIONS (15. CPs Sem. TE-SEM-2 BU.) *Dr David Prentice*

This unit applies economic theory, econometric and game theory to analysing markets. Topics covered may include strategic pricing and investment, analysing entry/exit and similar moves by competitors, competition through innovation and product differentiation, market

power and empirical methods for analysis.

Class requirements: One 2-hour seminar per week.

Assessment: Four assignments equivalent to 2500 words (40%), one 2-hour final examination (60%)

Recommended Reading:

Shy, Oz *Industrial Organisation: theory and applications*. MIT Press

ECO4ITR INTERNATIONAL TRADE (15. CPs Sem. TE-SEM-2 BU.) *Dr Hayat Khan*

In this unit students will learn the fundamentals of trade theory and how it is used to analyse public policy questions. Topics of international trade, such as patterns and determinants of trade, protection and new trade theory are covered in this unit; as well as topics in trade policy, including regional trade agreements and the World Trade Organisation.

Class requirements: Two hours of lectures per week.

This unit is not available for Study Abroad students.

Assessment: One 500-word term assignment (10%), one 1-hour mid-semester examination (15%), one 2-hour final examination (60%), Three problem-based assignments (15%). equivalent to 1000 words

Prescribed Reading:

Markusen, J., Melvin, J., Kaempfer, W. and Maskus, K. *International trade: theory and evidence* McGraw-Hill 1995.

ECO4LEC LABOUR ECONOMICS (15. CPs Sem. TE-SEM-2 BU.) *Professor*

John King

Not available in 2008

ECO4MAE MACROECONOMICS (15. CPs Sem. TE-SEM-1 BU.) *Dr Shawn Leu*

This unit deals with the main topics of modern macroeconomic theory at an advanced level and is designed to provide students with the theory, tools and techniques relevant to macroeconomic analysis. The unit covers issues on business cycles and fiscal and monetary policy. Students are made aware of the application of these theories in the Australian context.

Class requirements: One 2-hour lecture per week.

This unit is not available for Study Abroad students.

Assessment: One empirical project (50%) equivalent to 2000 words, one 1-hour take-home exam (30%), one 1500-word assignment (20%)

ECO4MES MICRO ECONOMETRICS (15. CPs Sem. TE-SEM-1 BU.) *Dr Ishaq Bhatti*

Not available in 2008

ECO4MIE MICROECONOMICS (15. CPs Sem. TE-SEM-1 BU.) *Mr Damien Eldridge*

This is a course in formal microeconomic theory. the topics to be covered might include consumer theory, producer theory-decision theory, game theory, partial equilibrium models of competitive markets, general equilibrium models of competitive markets, welfare economics and market failures, asymmetric information, externalities and public goods, imperfect competition, social choice and mechanism design.

Class requirements: One 2-hour lectures and one 1-hour tutorial per week.

Assessment: One 1-hour mid-semester exam (25%), one 3-hour final examination (75%)

Prescribed Reading:

Jehle, G.A. and P.J. Reny *Advanced microeconomic theory 2nd ed* Addison Wesley Longman, USA 2001

ECO4MNE MONETARY ECONOMICS (15. CPs Sem. TE-SEM-2 BU.)

Coordinator to be advised

This unit is about the relationship, in theory and in practice, between the financial and the real sectors of modern economies. We examine how disturbances in the financial sector impacts on employment, investment, output and other outcomes in the real sector using a range of theoretical models as well as case studies, such as the Asian financial crisis.

Class requirements: One 2-hour lecture per week.

Assessment: Internal assessment (50%), one 2-hour final examination (50%)

ECO4PPO PUBLIC POLICY (15. CPs Sem. TE-SEM-2 BU.) *Professor Harry Clarke*

This unit deals with public economic issues. The implications of externalities, public goods and non-convexities for public policy are examined, and issues of collective choice and implementation are presented. The central topic of the course is the rationale for public intervention in decentralised economies. Case studies from Australia and other economies dealing with topics such as income distribution, microeconomic reform, taxation, the environment, health, education and social services illustrate the main theoretical ideas.

Class requirements: Two 1-hour lectures per week.

This unit is not available for Study Abroad students.

Assessment: Assignments (40%), one 2-hour final examination (60%)

FIN2FII FINANCIAL INSTRUMENTS (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TE-SEM-2 BU, VI. TE-W01-08 NI. TE-W31-46 NI.) *Dr Larry Li*

This unit is focussed on the operation of financial markets and the pricing of the instruments. A particular focus is given to the money market and the bond, futures, and options markets. The instruments examined range from simple deposits, CDs, bills, FRAs, futures, options and bonds. The market background and use for each instrument is given as a structure within which to see the financial calculations used to price each instrument. Interest rate swaps and options are also introduced with examples of their application, trading strategies and pricing concepts considered.

Prerequisite: ECO121QA.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Five 100-word tutorial tasks (20%), one 1-hour mid-semester test (20%), one 3-hour final examination (60%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject.

Prescribed Reading:

Steiner, Robert *Mastering financial calculations* London. FT Pitman Publishing, 1998

FIN2FIN FINANCE (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-1 BU, SH, VI. TE-SEM-2 AW, BU. TE-SEM-S BU. TE-W13-26 NI. TE-W31-46 NI.) *Dr Liz Duncan, Ms Sue Nalder*

This is the foundation unit in finance on which all later studies depend, and covers financial decisions, valuation and the capital market. In this unit students will also cover an introduction to portfolio theory and the capital asset pricing model, interest rates and the mathematics of finance, efficient market hypotheses, investment evaluation and option pricing.

Prerequisite: ECO111MI/ECO121MI.

Incompatible unit: FIN21BPF

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 3-hour final examination (70%) Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit, short weekly assessment tasks (10%). Equivalent to 1000 words over the semester, one 50-minute mid-semester multiple choice test (20%), AW: one 1000-word major assignment (30%). involves practical problem and 1000 word report, AW: one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit

Prescribed Reading:

Ross, Thomson, Christensen, Westerfield, Jordon AW: *Fundamentals of Corporate Finance* McGraw-Hill 2007
Bishop, S. (et al.) *Corporate finance* 5th edn Pearson/Prentice Hall, 2004.

FIN3CFI CORPORATE FINANCE (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEMS SY. TE-SEM-1 BU, VI. TE-W13-26 NI.) *Dr Darren Henry*

This is an analytical unit that deals with the financial behaviour of firms, and examines finance theory, practice and financial management within the context of Australian companies. The methods by which financing and investments opportunities are evaluated by firms are discussed. Emphasis is placed on the ways in which the financial policies of companies, such as policies concerning

investment, capital structure, cost of capital and dividend decision-making, are determined so as to maximise the value of the firm to its owners. The effect of various tax regimes on such decision-making is evaluated in detail. Corporate acquisitions and other specialist areas of corporate finance, such as the use of share repurchase programs and corporate restructuring, are also considered.

Prerequisite: FIN21FIN/FIN22FIN/FIN23FIN.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Five short tutorial tasks/quizzes (10%), one 1-hour mid-semester test (20%), one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

Prescribed Reading:

Ross, S. *Fundamentals of corporate finance* McGraw-Hill Australia, 3rd edn, 2004

FIN3CFP CASE STUDIES IN FINANCIAL PLANNING (15. CPs Sem. TE-SEM-2 BU.) *Mr Marc Olynky*

This unit is designed to give students an insight into the type of tasks they may undertake through employment in the financial planning industry. The unit is focused on developing both the analytical and the interpersonal skills required to advise individuals on how best to achieve their financial objectives. This unit is focused on extending and applying the knowledge and skills introduced in other related subjects such as Financial Planning, Taxation and Retirement and Estate Planning to practical problems presented via a case study methodology. The students' knowledge and financial planning skills will be extended by applying them to the analysis of more complex problems involving associated entities, small family businesses and diverse family structures.

Prerequisite: FIN3FPL and FIN3REP.

Co-requisite: FIN3REP.

Class requirements: One 3-hour seminar per week.

Assessment: Five 900-word financial planning case-studies (100%)

Recommended Reading:

CCH. *Australian master financial planning guide*. Sydney CCH Australia Ltd 2006

FIN3CLF COMPUTATIONAL FINANCE (15. CPs Sem. TE-SEM-2 BU.) *Dr Suren Bazov*

Computational Finance aims to provide practical relevance and real-world application to finance concepts. Adopting a problem-solving approach, it focuses on computational issues in corporate finance, asset portfolios and stock options. The areas covered by the unit include capital cost estimation, asset and option pricing and risk analysis, portfolio optimisation, and simulation of financial outcomes.

Prerequisite: FIN21FIN/FIN22FIN/FIN23FIN.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: Tutorial exercises (20%) equivalent to 1000 words, one 2-hour practice test (30%), and one 2-hour final examination (50%)

Prescribed Reading:

Benninga, S. *Financial Modelling 2nd ed.* MIT Press, 2000

FIN3CSF CASE STUDIES IN FINANCE (15. CPs Sem. TE-SEM-2 BU.) *Mr Tony Martin*

Comprises an examination of real-life and practical case studies in various fields of finance. The objectives are to gain an understanding of how theoretical concepts are applied in a practical setting, to develop the ability to analyse real life situations and to develop the communication skills required in a business environment.

Prerequisite: FIN21FIN/FIN22FIN/FIN23FIN.

Class requirements: 3-hours per week of finance case studies.

Assessment: Weekly case studies (100%) equivalent to 4500 words

FIN3DER DERIVATIVES (15. CPs Sem. TE-SEM-1 BU.) *Mr John Williams*

This unit focuses on commodity derivatives with specific emphasis on commodity risk analyses, futures market characteristics, forward market analyses, price risk management and issues such as basis risk, production variability and Value-at-Risk. Various strategies will be evaluated including forward contracts, futures and options hedging

and over-the-counter banking products (including commodities, weather and inputs such as fuel and fertiliser). Commodities studied will include minerals, metals, resources, agriculturals and utilities such as electricity and gas. Concepts such as optimal hedging ratios and hedging effectiveness will be examined together with some advanced risk management strategies.

Prerequisite: FIN21FII, FIN22FII, FIN23FII.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2-hour final examination (60%), one 1500-word assignment (20%), one 1000-word research project (20%)

Prescribed Reading:

German, Helyette *Commodities and commodity derivatives*. 2005 John Wiley and Son, UK 2005

FIN3FHY FINANCIAL HISTORY (15 CPs Sem. TE-SEM-2 BU.) *Mr Liam Lenten*

Not available in 2008

FIN3FIM FINANCIAL INSTITUTIONS MANAGEMENT (15. CPs Sem. TE-SEM-1 BU.) *Mr Tony Martin*

This unit focuses on the risks faced by financial institutions in a deregulated environment and the means by which these risks are taken on, identified, measured and managed. Prudential supervision of the financial system is also covered.

Prerequisite: FIN21FIN/FIN22FIN/FIN23FIN.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Tutorial assessment (30%) consisting of weekly pre-set tutorial questions and tutorial exercises of approximately 300-400 words, one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

Prescribed Reading:

Hogan, Warren et al. *Management of Financial Institutions* Wiley, 2000.

FIN3FPL FINANCIAL PLANNING (15. CPs Sem. TE-SEM-1 BU.) *Mr Marc Olynky*

In this unit, students are provided with the knowledge and skills to prepare, present and monitor a basic financial plan for individuals. Students will be introduced to the financial planning process. They will learn how to gather information concerning client attitudes, behavioural characteristics and financial circumstances. They will gain experience in identifying a client's goals and profiling a client's attitude towards risk. Students will then examine how to determine a client's financial status by analysing and evaluating income and expenditure as well as cash flow, assets and liabilities. Students will learn how to prepare a financial plan and budget. Special financial needs are considered, including saving for education and retirement and dealing with particular circumstances such as illness, job loss and dependents with special needs. Consideration is then given to the steps required to implement and monitor the plan.

Prerequisite: FIN21FIN/FIN22FIN/FIN23FIN.

Class requirements: One 2-hour lectures and one 1-hour tutorial per week.

This unit is not available for Study Abroad students.

Assessment: One 30-minute tutorial quiz (10%), two 500-word analytical case studies (20%), one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject.

FIN3FRM FINANCIAL RISK MANAGEMENT (15. CPs Sem. TA-ACNSEM2 SY. TE-SEM-2 BU, VI. TE-W31-46 NI.) *Mr Greg Jamieson*

This unit is designed to be an introduction to the concepts, theories and practical applications associated with the measurement and management of financial risk in general, and interest rate and equity risks in particular. The measurement and management of financial risk is important to firms for two reasons. Firstly, due to the existence

of market imperfections, firms are able to increase their value by managing their exposure to financial risk. Secondly, firms that manage their exposure to financial risk well are better able to take advantage of growth opportunities. Derivatives offer firms a relatively low cost and highly flexible means of managing their financial risk, hence derivative strategies are a core topic of interest in the study of financial risk management.

Prerequisite: FIN21FIN/FIN22FIN/FIN23FIN/FIN2FIN.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: Three short tutorial quizzes (10%), two 500-word case-studies (20%), one 3-hour final examination (70%). Hurdle

Requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

FIN3IFM INTERNATIONAL FINANCIAL MANAGEMENT (15. CPs Sem. TA-ACNSEM2 SY. TE-SEM-1 BU, VI. TE-W13-26 NI.) *Mr Tony Martin*

In this unit students are introduced to the financial operations of firms operating in an environment of open and integrated financial markets. The effect of open and integrated financial markets on local firms is pervasive. Local farmers and miners may seek to sell their products abroad. Domestic manufacturers may compete in the local market against imports, or their suppliers may be importers or import competing firms. Local firms may find it cheaper to borrow funds offshore. Individuals may suffer higher mortgage rates or inflation rates as a result of movements in the domestic currency. In undertaking this unit students will be asked to examine the theoretical and empirical explanations of such effects and to analyse the institutional and practical issues firms must consider in deciding whether to borrow, or invest, funds denominated in the domestic currency or in a foreign currency.

Prerequisite: FIN21FIN/FIN22FIN/FIN23FIN.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: five short tutorial quizzes (10%) of the five quizzes only the best four marks are included in the final result, three 500-word case-studies (20%). of the three case studies only the best two marks are included in the final mark, one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject.

FIN3IPM INVESTMENT AND PORTFOLIO MANAGEMENT (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEMS SY. TE-SEM-2 BU, VI. TE-W01-08 NI. TE-W31-46 NI.) *Dr Bully Cardak*

This unit focuses on the principles of investment. The key components of the unit include portfolio theory and the application of risk and return concepts to portfolio construction. The unit looks at equilibrium in equity markets, including CAPM. A theory of asset pricing. This leads to the study of the market model and multi-factor models of security returns. The valuation of equity securities is introduced. Portfolio theory and its practical application to portfolio evaluation and management is examined in relation to both equity and bond portfolios.

Prerequisite: FIN21FIN/FIN22FIN/FIN23FIN.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Tutorial assessment tasks (10%) equivalent to 500 words, one 1-hour mid-semester test (20%), and one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

FIN3MAQ MERGERS AND ACQUISITIONS (15. CPs Sem. TE-SEM-2 BU.) *Dr Darren Henry*

In this unit, students examine the strategies and options available to companies to expand or contract their operating activities through the

reconstruction of their asset or business frameworks or modifications to their financial and ownership structures. This begins with a consideration of the types of mergers and acquisitions and the underlying theories and motives encouraging companies to undertake acquisitions. This will lead to a consideration of regulatory issues, the structuring and decision-making involved in formulating acquisition strategies and details, the timing of merger activity and the link with share market activity, takeover defence strategies and the valuation of takeover targets and gains from takeover activity. Applications will extend to the evaluation of cross-border acquisition activity and empirical evidence regarding the motives for and benefits of mergers and acquisitions for companies and factors determining takeover likelihood and outcome.

Prerequisite: FIN31CFI or ECO21MIT.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: Four short tests in tutorial class equivalent to 500 words (15%), one 2000-word analytical assignment (25%), and one 2-hour final examination (60%)

FIN3REP RETIREMENT AND ESTATE PLANNING (15. CPs Sem. TE-SEM-2 BU.) *Mr Marc Olynyk*

Students will study the Australian superannuation and social security industry with the aim of being able to develop the knowledge and skills required to devise optimal strategies for clients in both the accumulation phase and the retirement phase of life. Students will learn to estimate the future financial needs of individuals in retirement, based on their stated goals. Various types of retirement plans will be evaluated, including superannuation funds, pensions, annuities and other insurance based products. Consideration will be given to the suitability of these products for clients with different needs. Methods of property transfer at death will be examined. The role of wills, powers-of-attorney, trusts and gifting strategies will be studied. The taxation of retirement income and estates will also be considered. Finally, compliance and regulatory responsibilities will be defined.

Prerequisite: fin31fpl, fin3fpl.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 1500-word analytical case study (20%), one 1-hour mid-semester test (10%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

Prescribed Reading:

FIN3SEV SECURITY VALUATION (15. CPs Sem. TE-SEM-1 BU.) *Dr Larry Li*

In this unit students will be introduced to the importance of effective analysis of financial statement information and the application of analysis techniques to financial decision-making. This extends beyond simply determining financial health, to using this information for investment and security valuation and corporate strategy applications. Common ratio and index analysis tools are revisited, as well as the usage of more advanced modelling and multivariate techniques that are applied in the auditing and stock-broking/fund management professions. Students are introduced to the various models used by stockbrokers to value firms, and apply this knowledge by developing a spreadsheet-based full forecasting and valuation model for a real-life company.

Prerequisite: FIN21FIN/FIN22FIN/FIN23FIN.

Class requirements: One 2-hour lecture/seminar and one 1-hour tutorial per week.

Assessment: One 2000-word modelling assignment (20%), one 500-word analytical assignment (20%), one 2-hour final examination (60%)

FIN4FIE FINANCIAL ECONOMICS (15. CPs Sem. TE-SEM-2 BU.) *Dr**Xiangkang Yin**Not available in 2008***FIN4FMA FINANCIAL MANAGEMENT** (15. CPs Sem. TE-SEM-1 BU.) *Dr**Darren Henry*

This unit is concentrated around an examination of the theoretical and empirical aspects of financial management, and focuses on using empirical research and other anecdotal evidence to evaluate theoretical and practical applications of financial management issues. Specific topics covered in the unit include market efficiency and capital market anomalies, capital raisings and the IPO process, capital structure and dividend policy decision-making, mergers and acquisitions, corporate and financial restructuring, and issues relating to corporate governance and control. The unit also has a research methodology focus, providing students with an appreciation and understanding of the various research methodologies and statistical analysis techniques employed in finance-related research.

Class requirements: One 2-hour seminar per week.

This unit is not available for Study Abroad students.

Assessment: One 500-word statistical analysis assignment (20%), one 2-hour final examination (50%), one 2000-word literature review (30%)

FIN4FRM FINANCIAL RISK MANAGEMENT (15. CPs Sem. TE-SEM-2 BU.)*Coordinator to be advised*

This unit deals with the instruments and techniques of financial risk management. The starting point is an overview of risk management as a function in which business firms indulge, including a discussion of risk management products and process, the state of the underlying markets, and the relationship between risk management and the value of the firm. This is followed by a description of the procedures used to measure exposure to financial risk. The core of the unit consists of a description of the instruments that are used for financial risk management and the procedures used to execute this function.

Class requirements: One 2-hour lecture per week.

Assessment: One 2000-word assignment (10%), one 30-minute mid-semester examination (20%), one 3-hour final examination (70%)

FIN4HTA FINANCE HONOURS THESIS OPTION A (15 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Heidi Ryoo*

Students undertake this unit in their first semester of a Bachelor of Finance (Honours). Students are required to begin research on a finance topic under the direct supervision of an academic staff member. Topics outside of finance must be approved by the Head of Department.

Class requirements: There are no formal classes. Students are required to consult with their supervisor on a regular basis, and to give a 10 minute presentation of planned work on their thesis near the end of the semester.

Assessment: One 10-minute presentation (100%) This unit is part one of their thesis, it is merely the preparatory work before writing the thesis. No mark is returned. It is a hurdle requirement

FIN4HTB FINANCE HONOURS THESIS OPTION B (30. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Heidi Ryoo*

Students undertake this unit as part of a Bachelor of Finance (Honours). Students are required to complete a 15,000-word thesis in a Finance topic under the direct supervision of an academic member of staff. Topics outside of Finance must be approved by the Head of Department.

Prerequisite: FIN41HTA or FIN42HTA.

Class requirements: There are no formal class requirements. Students are required to consult with their supervisor on a regular basis.

This unit is not available for Study Abroad students.

Assessment: One 15,000-word thesis (100%)

FIN4IFM INTERNATIONAL FINANCIAL MANAGEMENT (15. CPs Sem. TE-SEM-1 BU.) *Dr Heidi Ryoo*

Multinational firms and firms that indulge in cross-border transactions take part in a variety of international financial operations, including arbitrage, hedging, speculation, financing and investment. The focus of this unit, building on the introduction provided in International Financial Management 3, is on arbitrage, hedging and speculation in the foreign exchange market. Two-currency, three-currency and multi-currency arbitrage are examined along with covered, uncovered and real interest arbitrage activities. Foreign exchange hedging is then examined with a specific focus on the optimal hedge ratio. Both financial and operational hedging strategies are considered. This is followed by a study of speculation in which the focus is on methods used to speculate in the foreign exchange market.

Class requirements: One 2-hour lecture per week.

Assessment: One 1500-word assignment (30%), one 3-hour final examination (70%)

MGT2BCO BUSINESS COMMUNICATIONS (15. CPs Sem. TE-SEM-1 BU.)*Dr Lynne Leveson*

This unit provides an introduction to the elements of effective communication within the modern business environment at both a theoretical and practical level. The unit aims to provide an understanding of the fundamental concepts and relevant issues relating to business communication, and provides an opportunity for students to develop a range of skills and techniques for effective communication in both formal and informal situations. The theoretical framework developed in the unit will focus upon the major components of the communication process and the relationship that these practices form with the other key elements of an organisation. Topics include written and spoken communication, interpersonal communication, intercultural communication, e-communication, conflict management and negotiation. The practical aspects of business communications are covered in lectures. These include effective letter-writing, effective presentation skills and report-writing.

Class requirements: One 2-hour lecture and one 2-hour tutorial per week.

Assessment: one group presentation (10%) 10 minutes per student, one 1500-2000-word case study or report (10%), one 45-minute tutorial test (10%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

MGT2HRD HUMAN RESOURCE DEVELOPMENT (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEMS SY. TE-SEM-1 BE, BU, SH. TE-W13-26 NI.) *Ms Cindy Taylor,*

Dr Tim Bartram, Dr Apollo Nsubuga-Kyobe

This unit available at Shepparton campus in 2007

The unit introduces students to the theory and practice of human resource development of people in the workplace and assists students in developing some basic skills which practising professionals use in their craft. Topics include behaviourist and cognitive theories of learning, with particular emphasis regarding the learning of adults (a systems approach to training incorporating training needs analysis, development of learning outcomes, design, delivery and evaluation of training), the key issues and approaches to management development, organisational learning and unstructured learning in the work place, the vocational training system with particular reference to the implementation of the National Training System, plus other current issues impacting on human resource development.

Prerequisite: MGT2HRM.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2000-word essay (30%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

The unit explores the operational and strategic issues of managing staff in the workplace. It examines the challenges facing human resource managers in contemporary Australian organisations and seeks to develop an understanding of human resource management practices in our continually changing social, economic, industrial relations and organisational environments.

Prerequisite: MGT1FOM.

Class requirements: Onshore students: one 2-hour lecture and one 1-hour tutorial per week

Offshore students: This unit is offered as a 3 or 4 month distance education program. Students are provided with text and study guide, and are supported by email, telephone and web. .

Assessment: Tutorial participation (5%), one 20-minute individual presentation (10%), one 1200-word essay (15%), one 2-hour final

examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, BE: one 2000-word assignment (30%), BE: one 2.5-hour final examination (70%). MGT2ISC INTERPERSONAL SKILLS AND CONFLICT MANAGEMENT (15 CPs Sem. TA-ACNSEM2 SY. TE-SEM-2 BE, BU, SH. TE-SEM-3 BU. TE-W31-46 NI.)

Dr John Pacher, Dr Lynne Leveson

This unit integrates material from the disciplines of communication and organisational behaviour. It brings together theoretical models, empirical research, and practice on various aspects of interpersonal communication (such as, nonverbal behaviour, assertion, listening skills and conflict resolution), and their relationship to conflict – personally and in context of the workplace. In tutorials the emphasis is placed on group and experiential work. At an individual level, students will be encouraged to develop self-awareness of their own interpersonal styles and the skills necessary to develop effective working relationships.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 15-minute presentation (10%), one 1500-word assignment (20%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, BE: 2000-word assignment (30%) BE: one 2.5 hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit

MGT2OBE ORGANISATIONAL BEHAVIOUR (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-1 AW, BE, BU, MI. TE-SEM-2 BU, SH. TE-W13-26 NI.) *Dr Sue O'Keefe, Mr Max Mollard, Dr Nick Djurkovic, Dr George Sansbury, Dr Apollo Nsubuga-Kyobe*

Organisational behaviour aims at understanding the management of people at work in order to improve an organisation's effectiveness. It is a multidisciplinary examination of what people do in organisations and has four levels of analysis: Individual, group, organisation and culture. This unit explores all four levels of analysis and emphasises the psychological aspects of organisational behaviour.

Prerequisite: MGT1FOM.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 1500-word essay (20%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, one class presentation (10%). equivalent to 1000 words, BE: one 2000-word essay (30%), BE: one 2-hour final examination (60%), submission of sample examination answers (equivalent to 200 words) (10%), AW: one 1500-word essay (25%), AW: one 2-hour final examination (60%). MGT3HRI HUMAN RESOURCE INFORMATION SYSTEMS (15. CPs Sem. TE-SEM-2 BE, BU, SH. TE-W31-46 NI.) *Professor David Brown*

The unit introduces students to the theory and practice of human resource information systems. Human resource information is central to the strategic planning and running of organisations, and the

collection and use of human resource information is seen to be a potential source of added value to the organisation. This unit focuses on organisational human resource (HR) functions and how human resource information systems (HRIS) can be developed to support HR activities. While the unit content views the relationship between HR and HRIS using models from socio-technical theory, the primary emphasis is on the collection of HR information, data interpretation and communication of this information to management.

Prerequisite: MGT2HRM.

Class requirements: One 2-hour lecture per week and one 2-hour lab class per fortnight.

Assessment: Two written reports totalling 2500 words (30%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

Not available in 2008

MGT3HRT HRM INTERNATIONAL STUDY TOUR (15 CPs Sem. TE-W26-28 BU.) *Dr Darcy McCormack*

In this unit students will spend a period of approximately three weeks based in one or more foreign countries where they will receive academic instruction, undertake site visits and meet with management of organisations. The unit will normally be conducted during La Trobe's non-instruction weeks. The focus of the unit will be on exploring challenges that are particular to the environment of the host country. It is anticipated that this exposure will increase awareness among students of the importance of developing HR policies and practices that are effective across cultural and environmental barriers.

Prerequisite: At least 120 credit points including MGT2HRM.

Quota: 30. Need written approval of lecturer before being able to enrol

Class requirements: Three-week intensive study tour preceded by one 6-hour preparatory lecture in Melbourne.

Assessment: One 2500-word assignment (60%), one 2000-word assignment (40%)

Preliminary Reading:

MGT3IHR INTERNATIONAL HUMAN RESOURCE MANAGEMENT (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEMS SY. TE-SEM-1 FR. TE-SEM-2 BE, BU, FR, SH. TE-W31-46 NI.) *Dr Timothy Bartram, Dr Apollo Nsubuga-Kyobe*

In this unit students' understanding of the theories of human resource management will be extended to incorporate the international dimension. This perspective underlies each of the topics to be examined. These will include the organisational context, international recruitment and selection, performance management, training and development, compensation, repatriation and labour relations. Underlying themes will be drawn and likely future challenges predicted.

Prerequisite: MGT2HRM.

Class requirements: Onshore students: one 2-hour lecture and one 1-hour tutorial per week

Offshore students: France – This unit is offered as a semester-long online program, with email, telephone and chat room support provided by staff.

Assessment: One 10-minute seminar presentation (10%), one 2000-word essay (20%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

MGT3IMG INTERNATIONAL MANAGEMENT (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEMS SY. TE-SEM-1 BU, SH. TE-W01-08 NI. TE-W13-26 NI.) *Dr Terri Joiner*

Globalisation stemming from reduced trade barriers, technological advancements, and the proliferation of multinational organisations has changed the nature of business management today. Successful international managers increasingly need a global mindset to understand and succeed in this rapidly changing business environment. This course primarily focuses on developing students' understanding of national cultural differences and how these differences influence management practice. Topics include the meanings and dimensions of culture, intercultural communication, motivation and leadership across cultures, comparative organisational design, and managing ethical and social responsibility in multinational companies.

Prerequisite: MGT1FOM.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 750-word essay (10%), one group presentation (20%). 10 minutes per member, plus a 2-page summary, one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

For the past decade or so, organisations have been subjected to enormous change. One of the major challenges facing managers (and consultants) in this climate is how to achieve greater organisational effectiveness, including increased financial performance as well as improved quality of work life. This unit attempts to address this question by examining the process (contracting, diagnoses, intervention strategies and change management) and practice (strategic, technological, structural and human resources) of organisation development.

Prerequisite: MGT1FOM.

Class requirements: One 2-hour lecture per week and one 2-hour tutorial per fortnight.

Assessment: One 5-minute class presentation (10%) based on analysis of specific readings, one 1500-word assignment (20%), and one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

MGT3OSD ORGANISATIONAL STRUCTURE AND DESIGN (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEMS SY. TE-SEM-2 BU, SH. TE-W01-08 NI. TE-W31-46 NI.) *Dr Terri Joiner*

Organisation theory, the essence of this unit, is a discipline that examines the structure and design on organisations in the pursuit of (improved) organisational effectiveness. Theoretical models, academic research and current business practice are used to provide the basis for understanding organisational phenomena, analysing problems, and responding with well-formulated solutions. Case studies are used throughout as a means of illustrating the application of organisational theory principles. Case studies also provide a means whereby students can improve their analytical skills and learn to deal with some level of uncertainty and ambiguity in their work.

Prerequisite: MGT11FOM/MGT12FOM/MGT13FOM is strongly recommended.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: SH: BU: two 300-word work book assignments (10%), one 20-minute case study presentation (20%), and one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit, ACN; Nilai; Hanoi: three 600-word work book assignments (30%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit.

MGT3SMG STRATEGIC MANAGEMENT (15. CPs Sem. TA-ACNSEM2 SY. TE-SEM-1 BU, CH, MI, SH. TE-SEM-2 BE. TE-W01-15 FR. TE-W13-26 NI. TE-W48-09 FR.) *Dr Findlay Johnston, Dr Rosaria Burchielli*

Strategic management focuses on the underlying determinants of business success. It dwells on the techniques applied by top management to gain competitive advantage, and the patterns of decisions and actions taken to guide the firm in competitive environments. Key topics in strategic management include industry and competitor analysis, generic strategies, core competency, manufacturing competitiveness, diversification and integration, international business strategy, organisational structure and controls, and re-engineering. Students of strategic management will apply concepts in strategic management to the solution of the problems presented in case studies involving real firms.

Prerequisite: MGT1FOM.

Class requirements: Onshore students: one 2-hour lecture and one 1-hour tutorial per week

Offshore students: China – This unit is offered as a five month program of study in conjunction with Jiangsu University of Science and Technology. Lecture support by staff from the Bendigo campus covers 30 hours of this period. France – This unit is offered as a semester-long online program, with email, telephone and chat room support provided by staff.

Assessment: One 5-minute class presentation (10%) based on analysis of specific readings, one 1500-word assignment (20%), and one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

MGT4CIM CONTEMPORARY ISSUES IN MANAGEMENT (15. CPs Sem. TE-SEM-1 BU.) *Mr Nick Djurkovic*

This unit addresses a diversity of issues of relevance to modern management theory and practice. Management theories and concepts are used to explain the effects of environment, culture, technology, strategy and human factors on decision-making in organisations. A central learning objective of the unit is the development of analytical skills necessary to evaluate research literature.

Class requirements: One 2-hour seminar per week.

This unit is not available for Study Abroad students.

Assessment: one 20-minute seminar presentation (15%) or 10-minute per member if a group of 3 students., one 1500-word research essay (25%), one 2-hour final examination (60%)

MGT4LED LEADERSHIP IN ORGANISATIONS (15. CPs Sem. TE-SEM-1 BU.)

Dr Lynne Leveson

The focus of this unit is on the major theories and the current trends in the area of leadership. Some of these theories will have been introduced in the undergraduate subject MGT21OBE and MGT22OBE whilst others will be new. The course provides students with a historical overview of the development of leadership theory and practice as well as knowledge of some of the research methods commonly used by researchers. The application of these theories to the work place will be explored. Students will be expected to become familiar with the leadership literature and to be able to interpret and critique this in relation to the Australian business context. Students are also expected to develop an analytical approach to the literature and to demonstrate this skill in the internal assessment tasks – the research essay and presentation.

Class requirements: One 2-hour seminar per week.

This unit is not available for Study Abroad students.

Assessment: One 1500-word assignment (30%), one 20-minute class presentation (20%), one 2-hour final examination (50%)

MGT4RMA RESEARCH METHODOLOGY (15. CPs Sem. TE-SEM-1 BE, BU.)

Ms Nicola McNeil

The goal of this unit is to equip fourth year students with the skills to successfully undertake a piece of independent research. The unit includes lectures on the selection and definition of a research problem, the preparation and evaluation of a research plan, sampling and measurement, data analysis and qualitative research methods.

Class requirements: One 2-hour seminar per week.

This unit is not available for Study Abroad students.

Assessment: Progressive assessment (40%) equivalent to 2000 words, one 3000-word research proposal (60%)

MGT4RPM REMUNERATION AND PERFORMANCE MANAGEMENT (15. CPs Sem. TE-SEM-1 BU.) *Dr Darcy McCormack*

Students gain an appreciation of some of the key challenges facing contemporary Human Resource Management. Various approaches to remuneration and performance management decisions are examined and reasons behind managerial decisions are analysed in the context of the employment relationship.

Class requirements: One 2-hour lecture per week.

Assessment: One 2000-word research essay (25%), one 20-30 minute seminar presentation (15%), and one 2-hour final examination (60%)

MKT2CBE CONSUMER BEHAVIOUR (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-1 BE, BU, SH, VI. TE-SEM-2 AW. TE-W13-26 NI. TE-W16-29 SI.) *Dr Lin Crase, Dr Wenbin Guo, Dr Clare D'Souza*

This unit provides an understanding of the role of consumer behaviour in development of the total marketing mix. The contribution of psychological and social knowledge relevant to both consumer and organisational marketing is evaluated, with an emphasis on practical skills of analysis and the writing of effective positioning statements.

Prerequisite: MKT2MPP or THS2IMT.

Incompatible unit: MKT32CBC

Class requirements: Onshore students: two 1-hour lectures and one 1-hour tutorial

Offshore students: This unit is offered as a 3-or 4-month distance education program. Students are provided with text and study guide, and are supported by email, telephone and web. .

Assessment: One 1-hour mid-semester multiple choice test (15%), one 2000-word assignment (15%), one 2-hour final examination (70%).

Hurdle requirement: Students must achieve at least 40% in the final examination as well as an over all total of 50% to pass the subject

MKT2MPP MARKETING PRINCIPLES AND PRACTICE (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-1 AW, BU, MI. TE-SEM-2 BE, BU, SH. TE-W31-46 NI.) *Mr Peter Lamb, Dr Marthin Nanere, Dr Outi Niininen, Ms Elaine Plant*

This is an introductory unit to marketing principles and practice as applied to mainly fast moving consumer goods. The unit is designed to give you a broad understanding of the formal discipline of marketing and of the key marketing activities in business. Topics cover the marketing concept, the marketing environment, buying behaviour in consumer and organisational markets, customer segmentation, targeting and positioning, developing the marketing mix (product, price, promotion and distribution) and the implementation and control of marketing programs. As a pre-requisite

to further study in marketing, it is intended to provide a sound foundation upon which more advanced skills and applications can be built.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: BU: ACN: one team oral presentation (05%), one individual assignment/test (10%). equivalent to a 1000-word assignment, one group assignment (15%). 1500 words per student, one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, Wo: tutorial exercises and case studies totalling 500 words (10%), one group assignment (40%). 1500 words per student, one 2-hour final examination (50%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, BE: one 3-hour examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, BE: one 1500-word case assignment (30%)

MKT2SMA SERVICES MARKETING (15. CPs Sem. TA-ACNSEM2 SY. TE-SEM-1 VI. TE-SEM-2 BE, BU, SH. TE-W28-41 OS.) *Professor Rhett Walker, Dr Sandra Gountas*

Service industries are rapidly emerging as the most dominant force in most world economies, including Australia. In developed economies up to 70% of the labour force, 75% of the GNP and 45% of an average family's budget are accounted for by services. Services (both commercial and not-for-profit) possess several unique characteristics that require a distinctive approach to marketing strategy – both in its development and execution. This unit expands upon and adapts the marketing management concepts covered in the unit 'Marketing Principles and Practice'. Topics include: how to improve service quality, increase and maintain customer satisfaction levels, generate customer loyalty and create a healthy service culture within the firm.

Prerequisite: MKT2MPP or THS2IMT.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: BE: one 1500-word major assignment (30%), BE: one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit, tutorial test (20%), one 6000-word team research project (20%). 1500 words per student
Students will be working in groups of four, one 2-hour final examination (60%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

MKT3IMK INTERNATIONAL MARKETING (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEMS SY. TE-SEM-1 FR, SH. TE-SEM-2 AW, BE, BU, FR. TE-SEM-S AW. TE-W31-46 NI.) *Mr Peter Lamb, Dr Wenbing Guo, Dr Clare D'Souza*

This unit focuses on the nature of the international marketplace and the problems and decisions facing managers of international marketing. It is comprehensive and practical: covering marketing goods and services across national boundaries, as well as within different national markets. Major topic areas covered are the international marketing imperative, analysis of foreign environments, development of international marketing strategies and the implementation of marketing programs across different nations and within nations.

Prerequisite: MKT2MPP OR THS2THM OR THS2IMT.

Class requirements: Onshore students: one 2-hour lecture and one 1-hour tutorial per week

Offshore students: France – This unit is offered as a semester-long online program, with email, telephone and chat room support provided by staff.

Assessment: Class participation (10%) AW: one 20-minute seminar presentation (10%). AW: one 1-hour mid-semester test (10%), one 2000-word individual assignment (20%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an over all total of 50% to pass the subject, one group assignment (30%). AW: 1000 words per student, one 2- hour final examination (50%). AW: Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass this unit.

MKT3MRE MARKETING RESEARCH (15. CPs Sem. TA-ACNSEM1 SY. TA-ACNSEMS SY. TE-SEM-1 BE. TE-SEM-2 AW, BU, SH, VI. TE-W13-26 NI.) *Dr Marthin Nanere, Professor Geoffrey Crouch*

Business managers request, assess, purchase and use marketing research to make a wide number of informed decisions. To be able to do this competently, they need to know what marketing research can provide, what research methods are appropriate for different types of problems, and how results should be interpreted. The aim of this unit is to give you the knowledge and skills, as either a future business manager or a marketing research practitioner, to make intelligent decisions in your specification, evaluation, and application of marketing research.

Prerequisite: MKT2MPP or THS2IMT and either ECO1ISB or ECO1IBS (or equivalent first year statistics unit)

Incompatible unit: MKT2MRB

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 1500-word major case study assignment (30%), one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

MKT3SMK STRATEGIC MARKETING (15. CPs Sem. TA-ACNSEM2 SY. TE-SEM-2 AW, BU, SH, VI. TE-W31-46 NI.) *Mr Peter Lamb, Dr John Gountas*

This unit available at Shepparton campus in 2007

This is the final unit in the marketing major sequence. The unit provides a comprehensive and practical understanding of strategic management of the marketing process in a competitive environment. A central focus is the preparation of a marketing plan for a specific product or service and/or alternatively, a detailed marketing audit. Skills of strategy formulation, implementation and control, as well as reporting and presentation of marketing initiatives are developed in this unit. A review of advanced issues in marketing, including the current state of the discipline, is a further focus.

Prerequisite: MKT2MPP.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 1-hour mid-semester test (10%), one group project equivalent to 1500 words per student (20%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, AW: class participation (8%), AW: one 20-minute group presentation (12%), AW: one group assignment (30%). 1000 words per student, AW: one 2-Hour final examination (50%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit.

MKT4REM RELATIONSHIP MARKETING (15. CPs Sem. TE-SEM-1 BU.) *Dr Sandra Gountas*

Relationship Marketing is one of the most important issues facing marketing today. Seen as a key to developing loyal customers, understanding how to build and maintain relationships is fundamental to efficiency and subsequently to achieving organisational outcomes. This unit involves an analysis of the key antecedents to strong relationships in marketing as well as the outcomes this achieves. The initial focus is on a critique of the traditional trust and commitment model of relationship marketing. However, attention is then drawn to the many evolving perspectives in this area.

Class requirements: One 2-hour seminar per week.

Assessment: Two 1500-word essays (50%), one 2-hour final examination (50%)

Recommended Reading:

MKT4TIM THEORY IN MARKETING (15. CPs Sem. TE-SEM-1 BU.) *Dr John Gountas*

This unit develops in students an advanced level of knowledge and skills in marketing theory and its application to marketing practice, and the further development of marketing theory through research. The unit examines contemporary philosophy of marketing science and the state of the marketing theory in a variety of selected key areas. Students develop knowledge and skills which enable them to undertake postgraduate research in marketing.

Class requirements: One 2-hour seminar per week and self-directed learning activities equivalent to 1-hour class room contact per week.

This unit is not available for Study Abroad students.

Assessment: One 1500-word essay (20%) A Theory of Marketing

topic to be selected, one 2-hour final examination (60%). Hurdle requirement – student must pass 50% of the exam to pass the unit, one 1500-word assignment (20%). A special topic will be selected.

The Bachelor of Laws program provides students with an innovative legal education that combines technical excellence with the insights and methods needed to appreciate the diverse contexts of law.

Entry into the Bachelor of Laws is possible either from secondary school or following previous tertiary studies. The law course is available in a three-year graduate version or a four-year undergraduate version; and it can also be combined with a number of other degrees at La Trobe which take five years (see list below).

The School has a strong research culture and has expertise in each of the core areas of the curriculum. It is well placed to provide professional and practical insights in teaching and supervision of research. Many staff members have extensive legal experience, with a number still practising at the Victorian Bar or in legal clinics, sitting on tribunals and boards and consulting to governments both nationally and internationally.

Honours

Students may be permitted to undertake Honours in the law program in the final year of their law studies. Normally a grade of B average over two full-time years of law study is required. Students must complete a 10,000-word thesis (which takes the place of two law electives) on a topic to be approved by the Honours Research and Graduate Studies Committee. Honours comprises a research component and a compulsory research seminar. The compulsory research seminar is conducted throughout the year. Students must attend at least six of the sessions and are required to present a paper on their individual research project.

Those students undertaking a double degree will also need to refer to the other School's entry in the *Handbook* for information on Honours.

Profession recognition

All La Trobe University Law courses include those units approved by the Victorian Council of Legal Education, which must be completed successfully to qualify for admission to legal practice. Admission to practice as a barrister and solicitor of the Supreme Court of Victoria usually requires the completion of articles of clerkship or a practical legal training course conducted by the Leo Cussen Institute, the College of Law Victoria or Monash University.

Those students undertaking a double degree will also need to refer to the other School's entry in the *Handbook* for information on accreditation.

Further information

For information on law courses, electives, part-time study, advanced standing and honours, please consult the entry for the Bachelor of Laws (Graduate Entry) or contact the School of Law on (03) 9479 2284.

Law and legal studies within other Schools and Faculties

The School of Law no longer offers the Bachelor of Legal Studies. However, this degree is now offered by the Faculty of Humanities; please see this section in the *Handbook*.

Law courses

The Faculty's undergraduate law programs are taught in a range of degrees:

Melbourne (Bundoora)

- Bachelor of Laws (3 year, graduate entry)
- Bachelor of Laws (4 year, undergraduate entry)
- Bachelor of Laws/Bachelor of Arts
- Bachelor of Laws/Bachelor of Business
- Bachelor of Laws/Bachelor of Commerce
- Bachelor of Laws/Bachelor of Economics
- Bachelor of Laws/Bachelor of Finance
- Bachelor of Laws/Bachelor of International Relations
- Bachelor of Laws/Bachelor of Media Studies
- Bachelor of Laws/Bachelor of Psychological Science
- Bachelor of Laws/Bachelor of Science

Postgraduate Programs¹

- Conflict Resolution, Negotiation and Mediation – Professional Development Workshops¹
- Global Business Law – Professional Development Workshops¹
- Graduate Certificate in Conflict Resolution¹
- Graduate Certificate in Global Business Law¹
- Graduate Certificate in Fraud Investigation¹
- Graduate Diploma in Conflict Resolution¹
- Graduate Diploma in Family Law Mediation¹
- Graduate Diploma in Law and Legal Studies (*but university approval for new Graduate Diploma in Law pending*)¹
- Graduate Diploma in Fraud Investigation¹
- Master of Arts (by research)¹
- Master of Commercial Law (available only to students without an LLB)¹
- Master of Global Business Law ((available only to students without an LLB)¹
- Master of Laws (by coursework)¹
- Master of Laws (by research)¹
- Master of Laws (International) (*available only to students with an overseas LLB*)¹
- Master of Laws in Global Business Law¹
- Master of International Business and Law (*in conjunction with the Graduate School of Management*)¹
- Master of Conflict Resolution¹
- Doctor of Philosophy¹
- Doctor of Conflict Resolution¹
- Doctor of Juridical Science¹

Bendigo

Three five-year undergraduate combined law programs are offered at the Bendigo Campus. Students complete only two years of the program at Bendigo and then transfer to the Melbourne (Bundoora) Campus.

- Bachelor of Laws/Bachelor of Arts²
- Bachelor of Laws/Bachelor of Business²
- Bachelor of Laws/Bachelor of Science²

Key: ¹ For full course descriptions, refer to the Postgraduate Handbook.

² For full course descriptions, refer to the Bendigo chapter in this Handbook

A business law major is also offered within the Bachelor of Business. See School of Business entry for Bendigo details.

Bachelor of Laws (Graduate Entry) (LBLE)

The Bachelor of Laws (Graduate Entry) is a three-year degree which provides graduates with an accredited professional qualification in law without having to complete the additional non-law units required in the four-year undergraduate law degree. It includes all the

compulsory units required by the Council of Legal Education for admission to legal practice in Victoria, as well as a broad range of electives, many with a practical skills component, such as clinical legal education, communication and advocacy skills, and negotiation. Students who receive advanced standing for prior law-related tertiary study may, by taking some summer and/or winter School units, be able to complete the degree in two and a half years full-time. The first year of the program provides students with a strong theoretical and practical foundation for their future law studies through a combination of skills-based and public law units including Dispute Resolution, Criminal Law and Principles of Public Law. The second year introduces students to the law of private obligations including property law, but also addresses key aspects of statutory regulation, which impact on the common law. The third year deals with corporate regulation, principles of administrative review, and additional practice-related requirements such as Civil Procedure and Legal Ethics.

Admission requirements

Successful completion of an Australian Bachelor's degree or equivalent. Applicants who have completed an undergraduate degree in a language other than English must submit an IELTS (or equivalent) test result with a minimum overall band score of 6.5 with no individual score less than 6.0. Applicants may apply through Victorian Tertiary Admissions Centre (VTAC).

Degree requirements

Students must:

- complete a total of at least three years' full-time study or its equivalent
- complete in sequence the compulsory law units
- complete a total of 375 credit points in law units
- complete a total of 22 law units (15 compulsory units and 7 electives).

Course structure

First year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Dispute Resolution	LAW1DR	15
TE-SEM-1	Legal Institutions and Methods ¹	LAW1LIM	15
either			
TE-SEM-1	Law of Torts ²	LAW2TOR	20
or			
TE-SEM-1	One law elective ³		15
TE-SEM-2	Constitutional Law	LAW2CNL	20
TE-SEM-2	Criminal Law	LAW2CRM	20
TE-SEM-2	Principles of Public Law ⁴	LAW2PPL	15

Second year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Law of Contracts ⁵	LAW2CNT	20
either			
TE-SEM-1	Law of Torts	LAW2TOR	20
or			
TE-SEM-1	One law elective ⁶		15
TE-SEM-1	Criminal Procedure and Evidence	LAW3CPE	20
TE-SEM-1	One law elective ⁷		15
TE-SEM-2	Commercial and Consumer Contracts	LAW2CCC	15
TE-SEM-2	Property Law	LAW3PRP	20
TE-SEM-2	One law elective ⁷		15

Third year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Corporations Law	LAW4COR	20
TE-SEM-1	Law of Equity and Trusts	LAW3EQT	20
TE-SEM-1	Two law electives ^{7,10}		30
TE-SEM-2	Administrative Law	LAW3ADM	20
TE-SEM-2	Civil Procedure ⁸	LAW3CIV	15
TE-SEM-2	Legal Practice and Conduct ^{8,9}	LAW4LPC	15
TE-SEM-2	Two law electives ¹⁰		30

Key: ¹ This program is designed for full-time students. Part-time students should attempt to complete core units in first and second years before attempting law electives. Part-time students must complete Legal Institutions and Methods (LAW1LIM) before Dispute Resolution (LAW1DR); and Criminal Law (LAW2CRM) before Principles of Public Law (LAW2PPL), if they cannot be undertaken concurrently.

- ² Only full-time students are permitted to enrol in LAW2TOR in lieu of an elective. Part-time students must normally complete LAW1LIM and LAW1DR.
- ³ Graduate students may be able to take a unit from the Master of Laws in Global Business Law in winter school in lieu of this elective.
- ⁴ Part-time students should complete the introductory unit, Principles of Public Law (LAW2PPL), before Constitutional Law (LAW2CNL) if they cannot be undertaken concurrently.
- ⁵ Part-time students, if required to make a choice in second year, should complete Law of Contracts (LAW2CNT) in preference to Criminal Procedure and Evidence (LAW3CPE); they should complete Commercial and Consumer Contracts (LAW2CCC) immediately after Law of Contracts; and must complete Law of Contracts before Property Law (LAW3PRP).
- ⁶ Only students who have taken LAW2TOR in first year should take this elective.
- ⁷ It is recommended that students take some of these electives in summer or winter school to reduce the workload during teaching periods 1 and 2.
- ⁸ Students wishing to fast track their degree may be able to take units equivalent to LAW3CIV and LAW4LPC in summer school at Monash University on a cross-institutional basis, but this may be on a fee-paying basis only.
- ⁹ Alternatively, students may apply for a place in the 30-credit point unit, Legal Practice and Conduct Clinical Placement (LAW4LPP), which counts as one law elective, as well as the core unit, LAW4LPC. LAW4LPP can be taken in teaching periods 1 or 2, but is subject to quota. LAW3CPE is a prerequisite or co-requisite.
- ¹⁰ Honours students enrol in LAW4THA Law Honours Thesis Part A in teaching period 1 and LAW4THB Law Honours Thesis Part B in teaching period 2, which count as two electives.

Law electives

Students wishing to study part-time are encouraged to complete core units before elective units in the early years of the program so they complete the prerequisites for future core and elective units. This will give greater choice and flexibility in later years and will permit students to cluster their electives in an area of interest or specialisation. Although law electives carry a year-level code, students can undertake electives at any stage of their degree, subject to compliance with any prerequisites. Students can specialise in areas such as alternative dispute resolution, corporations and commercial law, criminal law and criminal justice, international law and human rights, public interest law, and rights and justice.

Subject to quota and pre-requisites, students are also permitted to take up to four of the units offered in the Master of Laws in Global Business Law as law electives and can expect to receive advanced standing for two of these units should they later enrol in this LLM coursework program at La Trobe. Students in the graduate law program can take the GBL units from first year. Undergraduate law students can normally take these units only in the penultimate or final year of their law studies. These units are offered in block release mode in summer or winter school. Alternatively, final-year students may be permitted to enrol in up to four Public Interest Law units within the Masters in Law. The School also offers many units with a practical skills component, such as clinical legal education, communication and advocacy and mooting. Students can, if they wish, undertake a placement at the West Heidelberg Community Legal Service or within a legal aid environment. Opportunities also exist for judicial mentoring and to work under supervision in government and non-government legal organisations both within Australia and overseas (through an externship program). The School also offers other opportunities for students to study overseas, including semester-long exchanges, intensive winter school programs run by Duke University School of Law in Hong Kong and Geneva, and a new Introduction to Chinese Law summer school unit run in Shanghai. Subject to sufficient interest, suitably qualified and successful students can also participate in the Willem C Vis (Far East) International Commercial Arbitration mooting competition in Hong Kong.

Bachelor of Laws (Undergraduate Entry) (LBL)

This four-year law course provides an accredited professional qualification in law, but also requires students to complete units in another non-law discipline such as science, media studies or marketing, without having to complete a separate degree in that discipline. The program includes all the compulsory law units required by the Council of Legal Education for admission to practice

in Victoria and a wide range of law electives. It is designed for school leavers and tertiary students who have not yet completed an undergraduate degree. Students may apply to transfer into a five-year combined degree at the end of their first year, should they wish to complete a second degree such as a Bachelor of Arts or a Bachelor of Science.

Admission requirements

Admission requirements are VCE units 3 and 4, and a study score of at least 30 in English (any).

Degree requirements

Students admitted to the undergraduate degree of Bachelor of Laws must:

- complete a total of four years of full-time study or its equivalent
- complete in sequence the compulsory law units
- complete a minimum of 480 credit points (375 credit points in law and a minimum of 105 credit points in other non-law disciplines)
- complete a total of 22 units in law (15 compulsory units and 7 electives)
- complete no more than 135 credit points at first year level overall.

Course structure

First year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Dispute Resolution	LAW1DR	15
TE-SEM-1	Legal Institutions and Methods	LAW1LIM	15
TE-SEM-1	Two first year non-law electives ^{1,2}		30
TE-SEM-2	Criminal Law	LAW2CRM	20
TE-SEM-2	Principles of Public Law	LAW2PPL	15
TE-SEM-2	Two first year non-law electives ^{1,2}		30

Second year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Law of Contracts	LAW2CNT	20
TE-SEM-1	Law of Torts	LAW2TOR	20
TE-SEM-1	One first, second or third year non-law elective ^{1,2}		15–20
TE-SEM-2	Commercial and Consumer Contracts	LAW2CCC	15
TE-SEM-2	Constitutional Law	LAW2CNL	20
TE-SEM-2	One law elective		15
TE-SEM-2	One first, second or third year non-law elective ^{1,2}		15–20

Third year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Criminal Procedure and Evidence	LAW3CPE	20
TE-SEM-1	Two law electives		30
TE-SEM-1	One non-law elective (only required if non-law elective credit points still total fewer than 105) ^{1,2}		15–20
TE-SEM-2	Civil Procedure	LAW3CIV	15
TE-SEM-2	Property Law	LAW3PRP	20
TE-SEM-2	One law elective		15

Fourth year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Corporations Law	LAW4COR	20
TE-SEM-1	Law of Equity and Trusts	LAW3EQT	20
TE-SEM-1	One law elective		15
TE-SEM-2	Administrative Law	LAW3ADM	20
TE-SEM-2	Legal Practice and Conduct	LAW4LPC	15
TE-SEM-2	Two law electives		30

Key: ¹ Students may take non-law units from any other area offered by the university, subject to the approval of the School of Law and the other area concerned. As non-law units vary in credit-point value, the number of units undertaken will vary. For example, if undertaking all 15-credit point units, an additional unit in third year may be required to bring the total non-law studies to 105 credit points. Where possible, students are encouraged to take a sequence in one discipline. Students should also note that they can enrol in French or German as a non-law unit within the four-year law degree, but should they later transfer into a Bachelor of Laws/Bachelor of Arts degree, they will not receive advanced standing for this as neither

French nor German is a permitted discipline in the latter degree.

² Students who have transferred into the Bachelor of Laws after at least a year of prior tertiary study at an accredited institution should apply for advanced standing for these non-law electives at the start of teaching period 1.

Bachelor of Laws/Bachelor of Arts (LZLA) – Melbourne (Bundoora)

The Bachelor of Laws/Bachelor of Arts is a five-year combined degree providing an accredited professional qualification in law as well as a degree in arts. The program includes all the compulsory law units required by the Council of Legal Education for admission to practice in Victoria and a wide range of law electives. Students can select a major or a double major from amongst a wide range of disciplines offered by the Faculty of Humanities and Social Sciences, but it is not possible to enrol in French or German within this degree. If they wish, students can also complete law electives which complement their arts specialisation. For example, a student who majors in politics might complete law electives such as Public International Law, Human Rights Law or Legal Change, Legislation and Law Reform. The course is available at both Melbourne (Bundoora) and Bendigo campuses, but students commencing their studies at Bendigo transfer to Melbourne (Bundoora) after two full-time years of study where they complete the remainder of their course.

Admission requirements

Admission requirements are VCE units 3 and 4, and a study score of at least 30 in English (any).

Degree requirements

Students must:

- complete a total of at least five years of full-time study or its equivalent
- complete in sequence the compulsory law units
- complete a total of 645 credit points (375 credit points in law and a minimum of 270 credit points in arts)
- complete a total of 22 units in law (15 compulsory units and 7 electives)
- satisfy the requirements of the Bachelor of Arts by completing: – either one major study of 130 credit points in one arts discipline, consisting of two electives at first year, two electives at second year and three electives at third year level – or a double major of 260 credit points in two separate arts disciplines, each consisting of two electives at first year, two electives at second year and three electives at third year level
- complete a minimum of 60 and a maximum of 90 credit points at first year level in arts, with no more than 45 credit points in one discipline
- complete a minimum of 80 credit points at third year level in arts (with a minimum of 60 credit points in a major arts discipline)
- complete no more than 180 credit points at first year overall.

Course structure

First year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Dispute Resolution	LAW1DR	15
TE-SEM-1	Legal Institutions and Methods	LAW1LIM	15
TE-SEM-1	Two first year arts electives		30
TE-SEM-2	Criminal Law	LAW2CRM	20
TE-SEM-2	Principles of Public Law	LAW2PPL	15
TE-SEM-2	Two first year arts electives ¹		30

Second year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Law of Contracts	LAW2CNT	20
TE-SEM-1	Law of Torts	LAW2TOR	20
TE-SEM-1	One first or second year arts elective ²		15–20
TE-SEM-2	Commercial and Consumer Contracts	LAW2CCC	15
TE-SEM-2	Constitutional Law	LAW2CNL	20
TE-SEM-2	One first or second year arts elective ²		15–20
TE-SEM-2	One second year arts elective		20

Third year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Criminal Procedure and Evidence	LAW3CPE	20
TE-SEM-1	Two law electives		30
TE-SEM-1	One second year arts elective		20
TE-SEM-2	Civil Procedure	LAW3CIV	15
TE-SEM-2	Property Law	LAW3PRP	20
TE-SEM-2	One law elective		15
TE-SEM-2	One second year arts elective		20

Fourth year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Law of Equity and Trusts	LAW3EQT	20
TE-SEM-1	One law elective		15
TE-SEM-1	Two second or third year arts electives ³		40
TE-SEM-2	Administrative Law	LAW3ADM	20
TE-SEM-2	One law elective		15
TE-SEM-2	Two third year arts electives		40

Fifth year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Corporations Law	LAW4COR	20
TE-SEM-1	One law elective		15
TE-SEM-1	One third year arts elective		20
TE-SEM-2	Legal Practice and Conduct	LAW4LPC	15
TE-SEM-2	One law elective		15
TE-SEM-2	One third year arts elective		20

Key: ¹ Arts units may be chosen from Aboriginal studies, anthropology, archaeology, art history, Asian studies, Australian studies, Chinese, cinema studies, development studies, English, European cultures, gender, sexuality and diversity studies, Greek studies, history, Indonesian studies, Italian studies, Japanese, Latin American studies, legal studies, linguistics, media studies, North American studies, peace studies, philosophy, politics, religion and spirituality studies, sociology, Spanish, and theatre and drama. Students are not permitted to take units taught outside of the Faculty of Humanities and Social Sciences. Although French and German are not available within this combined degree, students wishing to undertake Advanced French (post-VCE) are advised to enrol in a Diploma of Languages through the Faculty of Humanities and Social Sciences. Students are also not permitted to enrol into legal studies units offered by the School of Law such as Business Law (LSTIBSL), Law of Business Associations (LST1LBA), Marketing Law (LST2MAL/LST3MAL), Sports Law (LST2SLA) and Tourism and Hospitality Law (LST2THL). Choice of arts units should be discussed with an adviser from the Faculty of Humanities and Social Sciences (Tel: (03) 9479 2023). Cross-institutional enrolments in arts will only be permitted in special circumstances.

² Students wishing to take a double major should take these units at a second year level.

³ Students wishing to take a double major should take these units at a third year level.

Bachelor of Laws/Bachelor of Business (LZLB) – Melbourne (Bundoora)

The Bachelor of Laws/Bachelor of Business is a new five-year combined degree at Melbourne (Bundoora) campus providing an accredited professional qualification in law as well as a degree in business. The program includes all the compulsory law units required by the Council of Legal Education for admission to practice in Victoria and a wide range of law electives, including units complementary to business such as banking and finance law, income taxation law and international business law. Students can complete a business major in business economics, financial management, human resource management, management or marketing. The course is also available at Bendigo campus (with slightly different business majors), but students commencing their studies at Bendigo transfer to Melbourne (Bundoora) after two full-time years of study where they complete the remainder of their course.

Admission requirements

Admission requirements are VCE units 1 and 2 of one of general mathematics or mathematical methods, and VCE units 3 and 4 of English, with a study score of at least 30.

Degree requirements

Students must:

- complete a total of at least five years of full-time study or equivalent;
- complete in sequence the compulsory law units;
- complete in sequence the compulsory business units;
- complete a total of 645 credit points (375 credit points in law and 270 credit points in business);
- complete a total of 22 units in law (15 compulsory units and 7 electives);
- complete a total of 18 units in business (6 core units, 8 units from a permissible business major and 4 School of Business electives);
- complete 90 credit points at first year in core School of Business units;
- complete 120 credit points in a permissible business major, comprising 0–15 credit points at first year, 45–60 credit points at second year and 60 credit points at third year (depending on the major chosen);
- complete 60 credit points in School of Business electives, with a maximum of 15 credit points at first year level and a minimum of 30 credit points at third year level;
- complete a minimum of 90 credit points at third year in School of Business units;
- complete no more than 180 credit points at first year level overall;
- if commencing at Melbourne (Bundoora) are not permitted to major in accounting or international business

In lieu of 30 credit points of School of Business electives, students may complete up to 30 credit points in other free electives with the permission of the Director of Undergraduate Studies in the School of Law at Melbourne (Bundoora) in consultation with the Head of the School of Business at Melbourne (Bundoora).

Course structure

First year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Dispute Resolution	LAW1DR	15
TE-SEM-1	Legal Institutions and Methods	LAW1LIM	15
TE-SEM-1 or TE-SEM-2	Accounting for Management Decisions	ACC1AMD	15
TE-SEM-1 or TE-SEM-2	Microeconomics	ECO1IMI	15
TE-SEM-2	Criminal Law	LAW2CRM	20
TE-SEM-2	Principles of Public Law	LAW2PPL	15
TE-SEM-1 or TE-SEM-2	Foundations of Management ¹	MGT1FOM	15
TE-SEM-1 or TE-SEM-2	Macroeconomics	ECO1IMA	15

Second year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Law of Contracts	LAW2CNT	20
TE-SEM-1	Law of Torts	LAW2TOR	20
TE-SEM-1 or TE-SEM-2	Management Information Systems	BUS1MIS	15
TE-SEM-1	One second year business major unit ²		15
TE-SEM-2	Commercial and Consumer Contracts	LAW2CCC	15
TE-SEM-2	Constitutional Law	LAW2CNL	20
TE-SEM-1 or TE-SEM-2	Introductory Statistics for Business	ECO1ISB	15
TE-SEM-2	One first or second year business major unit (depending on the business major) ²		15

Third year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Criminal Procedure and Evidence	LAW3CPE	20
TE-SEM-1	One second year business major unit		15
TE-SEM-1	One second year business major unit		15
TE-SEM-1	One third year business major unit		15
TE-SEM-2	Civil Procedure	LAW3CIV	15
TE-SEM-2	Property Law	LAW3PRP	20
TE-SEM-2	One third year business major unit		15
TE-SEM-2	One third year business major unit		15

Fourth year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Law of Equity and Trusts	LAW3EQT	20
TE-SEM-1	One law elective		15
TE-SEM-1	One third year business major unit		15
TE-SEM-1	One second or third year School of Business elective		15
TE-SEM-2	Administrative Law	LAW3ADM	15
TE-SEM-2	One law elective		15
TE-SEM-2	One law elective		15
TE-SEM-2	One second or third year School of Business elective		15

Fifth year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Corporations Law	LAW4COR	20
TE-SEM-1	One law elective		15
TE-SEM-1	One law elective		15
TE-SEM-1	One third year School of Business elective		15
TE-SEM-2	Legal Practice and Conduct	LAW4LPC	15
TE-SEM-2	One law elective		15
TE-SEM-2	One law elective		15
TE-SEM-2	One third year School of Business elective		15

Key: ¹ Students wishing to major in business economics should enrol in Introductory Statistics for Business (ECO1ISB) in place of Foundations of Management (MGT1FOM) and should enrol in Foundations of Management in semester 2, second year. This will enable them to access more second year economics units in second year. Students wishing to major in marketing should take their first business major unit, Marketing Principles and Practice (MKT2MPP), and defer Foundations of Management until semester 2, second year.
² Some majors require first year core units: for example, business economics and financial management majors must complete ECO1IQA at Melbourne (Bundoora).

Legal studies in Bachelor of Business

Students are not permitted to take legal studies or business law units as business electives within this degree, unless they have the prior permission of Heather King, Director of Undergraduate Studies, School of Law, Melbourne (Bundoora) on (03) 9479 1524; email: heather.king@latrobe.edu.au.

Bachelor of Laws/Bachelor of Commerce (LZLC)

The Bachelor of Laws/Bachelor of Commerce is a five-year combined degree providing accredited professional qualifications in both law and accounting. The program includes all the compulsory law units required by the Council of Legal Education for admission to practice in Victoria and a wide range of electives. It also includes compulsory specialised units relevant to business such as Banking and Finance Law, Competition Policy and Law, or an approved unit from the Master of Laws in Global Business Law. The accounting component provides the skills and knowledge that are directly concerned with the accounting practice and management of large and small enterprises in the government and private sectors. Students can also undertake studies in financial management or management.

Admission requirements

Admission requirements are VCE units 3 and 4, and a study score of at least 30 in English (any) and at least 20 in mathematics (any).

Degree requirements

Students admitted to the combined degree of Bachelor of Laws/Bachelor of Commerce must:

- complete a total of at least five years full-time study or its equivalent
- complete in sequence the compulsory accounting units
- complete in sequence the compulsory law units
- complete a total of 645 credit points (375 credit points in law and 270 credit points in accounting and other School of Business units)
- complete a total of 22 units in law (17 compulsory units and 5 electives)
- complete a total of 18 School of Business units (12 compulsory units and 6 electives)

- complete a maximum of 105 credit points at first year, 75 credit points at second year and a minimum of 90 credit points at third year in School of Business units
- complete no more than 180 credit points at first year level overall.

Course structure

First year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Dispute Resolution	LAW1DR	15
TE-SEM-1	Legal Institutions and Methods	LAW1LIM	15
TE-SEM-1 or TE-SEM-2	Accounting for Management Decisions	ACC1AMD	15
TE-SEM-1 or TE-SEM-2	Microeconomics	ECO1IMI	15
TE-SEM-2	Criminal Law	LAW2CRM	20
TE-SEM-2	Principles of Public Law	LAW2PPL	15
TE-SEM-1 or TE-SEM-2	Management Information Systems	BUS1MIS	15
TE-SEM-1 or TE-SEM-2	Macroeconomics	ECO1IMA	15

Second year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Law of Contracts	LAW2CNT	20
TE-SEM-1	Law of Torts	LAW2TOR	20
TE-SEM-1 or TE-SEM-2	Macroeconomics	ECO1IMA	15
TE-SEM-1 or TE-SEM-2	Foundations of Management	MGT1FOM	15
TE-SEM-2	Commercial and Consumer Contracts	LAW2CCC	15
TE-SEM-2	Constitutional Law	LAW2CNL	20

TE-SEM-1 or TE-SEM-2	Introductory Statistics for Business	ECO1ISB	15

Third year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Criminal Procedure and Evidence	LAW3CPE	20
TE-SEM-1 or TE-SEM-2	Finance	FIN2FIN	15
TE-SEM-1 or TE-SEM-2	Introductory Management Accounting	ACC2IMA	15
TE-SEM-1	One second year School of Business elective		15
TE-SEM-2	Civil Procedure	LAW3CIV	15
TE-SEM-2	Property Law	LAW3PRP	20
TE-SEM-1 or TE-SEM-2	Advanced Financial Accounting	ACC3AFA	15
TE-SEM-1 or TE-SEM-2	Intermediate Management Accounting	ACC2IMB	15

Fourth year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Law of Equity and Trusts	LAW3EQT	20
TE-SEM-1	One law elective		15
TE-SEM-1	Auditing ¹	ACC3AUD	15
TE-SEM-1	One third year accounting elective		15
TE-SEM-1 or TE-SEM-2	Taxation ¹	ACC3TAX	15
TE-SEM-1	One third year accounting elective		15
TE-SEM-2	Administrative Law	LAW3ADM	20
TE-SEM-2	Competition Policy and Law ³	LAW2CPL/ LAW3CPL	15
TE-SEM-2	One law elective		15
TE-SEM-1 or TE-SEM-2	One third year accounting elective ²		15

Fifth year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Corporations Law	LAW4COR	20
TE-SEM-1	Two law electives		30
TE-SEM-1	One third year School of Business elective		15
TE-SEM-2	Banking and Finance Law	LAW2BFL/ LAW3BFL	15
TE-SEM-2	Legal Practice and Conduct	LAW4LPC	15
TE-SEM-2	One law elective		15
TE-SEM-2	One third year School of Business elective		15

Key: ¹ ACC3TAX and ACC3AUD are no longer required for CPA Australia accreditation, but are required for membership of the Institute of Chartered Accountants (ICAA). Students who do not complete the Taxation and Auditing units as part of their degree will be admitted to membership of CPA Australia, but will be required to complete studies in both areas as part of their ongoing CPA training.

² It is no longer necessary to take either Corporate Finance (FIN3CFI) or Investment and Portfolio Management (FIN3IPM).

³ Students may substitute a unit from the LLM in Global Business Law with permission of the Director of Undergraduate Studies.

Bachelor of Laws/Bachelor of Economics (LZLE)

The Bachelor of Laws/Bachelor of Economics is a five-year combined degree providing an accredited professional qualification in law as well as a degree in economics. The program includes all the compulsory law units required by the Council of Legal Education for admission to practice in Victoria and a wide range of law electives. It also includes compulsory specialised units relevant to economics such as Banking and Finance Law, Competition Law and Policy, or an approved unit from the Master of Laws in Global Business Law. Students can specialise in macroeconomics analysis and policy, microeconomics and policy, business economics, international trade and finance, business models and forecasting, or resource and environmental economics.

Admission requirements

Admission requirements are VCE units 3 and 4, and a study score of at least 30 in English (any) and a study score of at least 20 in mathematics (any).

Degree requirements

Students must:

- complete a total of at least five years full-time study or its equivalent
- complete in sequence the compulsory law units
- complete in sequence the compulsory economics units
- complete a total of 645 credit points (375 credit points in law and 270 credit points in economics and other School of Business units)
- complete a total of 22 units in law (17 compulsory units and 5 electives)
- complete a total of 18 School of Business units (10 compulsory units and 8 electives)
- complete a maximum of 90 credit points at first year and a minimum of 90 credit points at third year in School of Business units
- complete no more than 180 credit points at first year level overall.

Course structure

First year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Dispute Resolution	LAW1DR	15
TE-SEM-1	Legal Institutions and Methods	LAW1LIM	15
TE-SEM-2	Introduction to Quantitative Analysis (teaching period 2)	ECO1IQA	15
or

TE-SEM-1	One law elective		15
TE-SEM-1	Two third year economics electives ^{2,3}		30
TE-SEM-2	Banking and Finance Law	LAW2BFL/ LAW3BFL	15
TE-SEM-2	Legal Practice and Conduct	LAW4LPC	15
TE-SEM-2	One law elective		15
TE-SEM-2	One third year economics elective ^{2,3}		15

Key: ¹ Students with a strong background in mathematics, including VCE Mathematical Methods or Specialist Mathematics, are urged to consider taking MAT1CFE instead of ECO1IQA, and to take MAT1CLA as a first year School of Business elective in teaching period 1, second year.

² Economics units include any units required for the six economics specialisations listed in foot note 3.

³ Students may specialise in any of the following areas: microeconomic analysis and policy, macroeconomic analysis and policy, business economics, international trade and finance, business models and forecasting, and resource and environmental economics. It is not possible to major in money and banking. See School of Business for details of units required for specialisations. Students intending to undertake honours in economics are advised to take either Introduction to Time-series Econometrics (ECO3ITE) or Econometric Methods (ECO3EME) in their final year of economics studies. By completing approved units, graduates may satisfy the educational requirements of the Financial Services Institute of Australasia (FINSIA). See School of Business for details.

⁴ Students may substitute a unit from the Master of Laws in Global Business Law with permission of the Director of Undergraduate Studies.

Bachelor of Laws/Bachelor of Finance (LZLF)

The Bachelor of Laws/Bachelor of Finance is a five-year combined degree providing an accredited professional qualification in law, as well as a degree in finance. The program includes all the compulsory law units required by the Council of Legal Education for admission to practice in Victoria and compulsory specialised units relevant to finance such as Banking and Finance Law, Competition Law and Policy or an approved unit from the Master of Laws in Global Business Law. It is a largely fixed-content program. Students are trained in four major areas of finance: corporate finance, international finance, investment and portfolio management and risk management.

Admission requirements

Admission requirements are VCE units 3 and 4, and a study score of at least 30 in English (any) and at least 20 in mathematics (any).

Degree requirements

Students must:

- complete a total of at least five years full-time study or its equivalent
- complete in sequence the compulsory law units
- complete in sequence the compulsory finance units
- complete a total of 645 credit points (360 credit points in law and 285 credit points in finance)
- complete a total of 21 units in law (18 compulsory units and 3 electives)
- complete a total of 19 units in finance
- complete no more than 180 credit points at first year level overall.

Course structure**First year**

TE-SEM-2	One law elective ⁵		15
TE-SEM-2	Investment and Portfolio Management	FIN3IPM	15
TE-SEM-2	One third year finance elective		15

- Key:
- Students with a strong background in mathematics, including VCE Mathematical Methods or Specialist Mathematics, are urged to consider taking MAT1CFE instead of ECO1IQA.
 - Students must have completed ECO1IMA prior to enrolling in this unit.
 - Foundations of Management (MGT1FOM) and Marketing Principles and Practice (MKT2MPP) must be taken if students wish to satisfy the educational requirements of Financial Services Institute of Australasia (FINSIA). Students seeking employment in the finance industry or in a position which requires them to provide advice to retail clients about financial planning or financial products must complete an Australian Securities and Investment Commission (ASIC PS146) compliant course of study. This includes ECO1IMA, FIN2FII, FIN3FPL and FIN3CFP. [NB: FIN3REP is a co-requisite for FIN3CFP].
 - Students may substitute a unit from the Master of Laws in Global Business Law with permission of the Director of Undergraduate Studies.
 - Students must enrol in either Electronic Commerce and Cyberspace Law (LAW2ECL/LAW3ECL) (not on offer in 2008) or a unit from the Master of Laws in Global Business Law (subject to the approval of the Director of Undergraduate Studies). Honours students can substitute Law Honours Thesis Part B (LAW4THB) if necessary.

Finance electives**Financial Planning**

FIN3FPL	Financial Planning
ACC3TAX	Taxation
FIN3REP	Retirement and Estate Planning
FIN3CFP	Case Studies in Financial Planning

Corporate Finance

FIN3DER	Derivatives
FIN3MAQ	Mergers and Acquisitions
FIN3SEV	Security Valuation
FIN3CSF	Case Studies in Finance

Other

FIN3FIM	Financial Institutions Management
ECO3EME	Econometric Methods
ECO3MIA	Microeconomic Analysis
FIN3CLF	Computational Finance
ECO3ITE	Introduction to Time-series Econometrics
ECO3MAA	Macroeconomic Analysis
FIN3FHY	Financial History

Bachelor of Laws/Bachelor of International Relations (LZLIR)

The Bachelor of Laws/Bachelor of International Relations is a five-year combined degree providing an accredited professional qualification in law as well as a degree in international relations. The program includes all the compulsory law units required by the Council of Legal Education for admission to practice in Victoria and a wide range of law electives, including units complementary to international relations such as human rights law, international business law, law of the European Community and public international law. The international relations course combines core units in politics, international public policy and professional competency in transition to the workplace, with electives from politics and other disciplines including economics, history, sociology, anthropology and sociology. This combined degree will provide students with the skills to work with and for the main organisations within international politics or as a lawyer in the public, private or community sector.

Admission requirements

Admission requirements are VCE units 3 and 4, and a study score of at least 30 in English (any).

Degree requirements

Students must:

- complete a total of at least five years of full-time study or its equivalent
- complete in sequence the compulsory law units and international relations units
- complete a total of 645 credit points (375 credit points in law and a minimum of 270 credit points in international relations units)
- complete a total of 22 units in law (15 compulsory units and 7 electives, including at least 2 electives from a specified list)
- satisfy the requirements of the Bachelor of International Relations including:
 - completion of core units at each year level (70 credit points in total)
 - completion of elective units as stated from List A (130 credit points in total)
 - completion of elective units as stated from List B (45–50 credit points in total)
 - completion of additional electives as stated from either List A or List B (15–30 credit points) to bring the total to 270 credit points in international relations
- complete no more than 180 credit points at first year level overall.

Course structure**First year**

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Dispute Resolution	LAW1DR	15
TE-SEM-1	Legal Institutions and Methods	LAW1LIM	15
TE-SEM-1	States, Nations and Security: world in transition	POL1SNS	15
TE-SEM-1	One first year unit from List A		15
TE-SEM-2	Criminal Law	LAW2CRM	20
TE-SEM-2	Principles of Public Law	LAW2PPL	15
TE-SEM-2	Economy Environment and Human Rights: world in transition	POL1EEH	15
TE-SEM-2	One first year unit from List A		15

Second year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Law of Contracts	LAW2CNT	20
TE-SEM-1	Law of Torts	LAW2TOR	20
TE-SEM-1	One second year unit from List A		20
TE-SEM-1	One first year unit from List B		15
TE-SEM-2	Commercial and Consumer Contracts	LAW2CCC	15
TE-SEM-2	Constitutional Law	LAW2CNL	20
TE-SEM-2	One law elective		15
TE-SEM-2	One first year unit from List B		15

Third year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Criminal Procedure and Evidence	LAW3CPE	20
TE-SEM-1	International Public Policy	POL2IPP	20
TE-SEM-1	One second year unit from List A		20
TE-SEM-2	Civil Procedure	LAW3CIV	15
TE-SEM-2	Property Law	LAW3PRP	20
TE-SEM-2	One law elective		15
TE-SEM-2	One second year unit from List A		20

Fourth year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Law of Equity and Trusts	LAW3EQT	20
TE-SEM-1	Two law electives		30
TE-SEM-1	One third year unit from List A		20
TE-SEM-2	Administrative Law	LAW3ADM	20
TE-SEM-2	One law elective		15
TE-SEM-2	Professional Competence: transition to workplace	POL3PCW	20
TE-SEM-2	One third year unit from List A		20

Fifth year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Corporations Law	LAW4COR	20
TE-SEM-1	One law elective		15
TE-SEM-1	One third year unit from List B		15-20
TE-SEM-2	Legal Practice and Conduct	LAW4LPC	15
TE-SEM-2	One law elective		15
TE-SEM-2	One third year unit from List A or B		15-20
TE-SEM-2	One third year unit from List A or B1		15-20

Key: ¹ This elective is only required if the total number of completed credit points in international relations falls short of the required 270 credit points. This may occur where students have completed electives from List B worth 15 rather than 20 credit points. In such cases, students may need to complete up to 280 credit points.

For course information on international relations, please contact an adviser from the Faculty of Humanities and Social Sciences or visit their website at www.latrobe.edu.au/humanities

Bachelor of International Relations electives – Lists A and B

Students complete a minimum of 200 credit points in electives from List A and List B, as specified in the course structure. For information on names and relevant credit points for units in List A and List B, please refer to *Handbook* entry for Bachelor of International Relations, under the Faculty of Humanities and Social Sciences, or you may visit their Faculty Office on the 3rd level of the Humanities 3 Building, Melbourne (Bundoora) Campus. Although some of the units available as second/third year List B international relations electives are law units, students wishing to take any of these units should attempt to complete them as law electives and choose other non-law units as their international relations electives.

In addition to these electives, students are expected to participate in six workshops in the first year, five workshops in the second year, and six workshops in the third year. Each workshop will be of two to three hours duration.

Law electives

Students must choose at least two law electives from the following list:

Teaching period	Unit title	Unit code
TE-SEM-1	Human Rights Law	LAW2HRL/LAW3HRL
TE-SEM-1	Public International Law	LAW2PIL/LAW3PIL
TE-SEM-1	Law of the European Community	LAW2LEC/LAW3LEC
TE-SEM-2	Employment and Labour Relations Law	LAW2ELR/LAW3ELR
TE-SEM-2	International Business Law	LAW2IBL/LAW3IBL

A unit or units from the Master of Laws in Global Business Law can be substituted with permission of Director of Undergraduate Studies.

Bachelor of Laws/Bachelor of Media Studies (LZLMS)

The Bachelor of Laws/Bachelor of Media Studies is a five-year combined degree providing an accredited professional qualification in law, as well as a vocationally oriented degree in media studies chosen

from print journalism, video production and radio/audio production streams. The program includes all the compulsory law units required by the Council of Legal Education for admission to practice in Victoria and a wide range of law electives, including compulsory specialised units relevant to media studies such as Intellectual Property Law, Competition Policy and Law, or an approved unit from the Master of Laws in Global Business Law. There is a media internship program and new production facilities with 24-hour access.

Admission requirements

Admission requirements are VCE units 3 and 4, and a study score of at least 30 in English (any).

Degree requirements

Students admitted to the combined degree of Bachelor of Laws/Bachelor of Media Studies must:

- complete a total of at least five years full-time study or its equivalent
- complete in sequence the compulsory law units
- complete in sequence the compulsory media studies units
- complete a total of 655 credit points (375 credit points in law and 280 credit points in media studies)
- complete a total of 22 units in law (17 compulsory units and 5 electives)
- complete a total of 15 units in media studies
- complete no more than 180 credit points at first year level overall.

Course structure**First year**

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Dispute Resolution	LAW1DR	15
TE-SEM-1	Legal Institutions and Methods	LAW1LIM	15
TE-SEM-1	Constructing Communication	MST1CCO	15
TE-SEM-1	Making the News	MST1MTN	15
TE-SEM-2	Criminal Law	LAW2CRM	20
TE-SEM-2	Principles of Public Law	LAW2PPL	15
TE-SEM-2	Audiences and Communication	MST1AAC	15
TE-SEM-2	Writing for the Media	MST1WFM	15

Second year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Law of Contracts	LAW2CNT	20
TE-SEM-1	Law of Torts	LAW2TOR	20
TE-SEM-1	One second year media studies stream unit ¹		20
TE-SEM-2	Commercial and Consumer Contracts	LAW2CCC	15
TE-SEM-2	Constitutional Law	LAW2CNL	20
TE-SEM-2	Researching Media Audiences	MST2RMA/MST3RMA	20
TE-SEM-2	One second year media studies elective		20

Third year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Criminal Procedure and Evidence	LAW3CPE	20
TE-SEM-1	Researching the Media	MST2RTM/MST3RTM	20
TE-SEM-1	One second year media studies elective		20
TE-SEM-2	Civil Procedure	LAW3CIV	15
TE-SEM-2	Property Law	LAW3PRP	20
TE-SEM-2	Intellectual Property Law	LAW2IPL	15
TE-SEM-2	One second year media studies stream unit ¹		20

Fourth year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Law of Equity and Trusts	LAW3EQT	20
TE-SEM-1	Two law electives		30
TE-SEM-1 or TE-SEM-2	One third year media studies elective		20
TE-SEM-2	Administrative Law	LAW3ADM	20
TE-SEM-2	Competition Policy and Law ³	LAW2CPL	15
TE-SEM-2	One law elective		15
TE-SEM-1 or TE-SEM-2	One third year media studies stream unit ⁴		20

Fifth year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Corporations Law	LAW4COR	20
TE-SEM-1	One law elective		15

TE-SEM-1	Broadcast and Electronic Journalism	MST3BEJ	20
TE-SEM-1	Media Industries	MST3MIN	20
TE-SEM-2	Legal Practice and Conduct	LAW4LPC	15
TE-SEM-2	One law elective		15
TE-SEM-2	Media Project Development	MST3MPD	20

- Key: ¹ In second year, in teaching period 1, students must complete one of the following stream units at second year level: Computer Assisted Journalism (MST2CAJ/MST3CAJ); or Radio Sound Production (MST2RSP/MST3RSP); or Single Camera Video (MST2SCV/MST3SCV). Students must choose a unit from the same stream selected in second year.
- ² In third year, teaching period 2, students must complete one of the following stream units at second year level: Journalism Production Workshop (MST2JPW/MST3JPW); or Writing for Radio (MST2WFR/MST3WFR); or Writing for Video: Non-fiction (MST2WFV/MST3WFV).
- ³ Students may substitute an elective from the Master of Laws in Global Business Law with permission of the Director of Undergraduate Studies.
- ⁴ In teaching period 2, students must complete one of the following stream units at third year level: Advanced Journalism and Design (MST3AJD); or Advanced Media Production-Radio (MST3MPR); or Advanced Media Production-Television (MST3MPT). Students must choose a unit from the same stream selected at second and third year.

For course information on Media Studies, please contact an adviser from the Faculty of Humanities and Social Sciences or visit their website at www.latrobe.edu.au/humanities

Bachelor of Media Studies Stream units

Students must choose to follow one media studies stream: streams offered are print journalism, radio/audio production and video/television production. Students complete 40 credit points at second year and 20 credit points at third year level drawn from one of these streams. In addition, they complete a 20-credit point compulsory unit from the journalism stream in their final year, Broadcast and Electronic Journalism (MST3BEJ).

Bachelor of Media Studies electives

For information on units available as media studies electives, please refer to the Bachelor of Media Studies entry in the Faculty of Humanities and Social Sciences section of this *Handbook*. Or you may visit their Faculty office on the 3rd level of the Humanities 3 Building, Melbourne (Bundoora) Campus. Students should however complete no more than 60 credit points, as specified in the course structure.

Bachelor of Laws/Bachelor of Psychological Science (LZLBS)

The Bachelor of Laws/Bachelor of Psychological Science is a five-year combined degree providing an accredited professional qualification in law as well as a degree in psychology. The program includes all the compulsory law units required by the Council of Legal Education for admission to practice in Victoria and a wide range of law electives, including compulsory law and legal studies units related to psychology such as Psychology and Law, and Mental Disorder and Criminal Responsibility. The Bachelor of Psychological Science degree does not qualify a graduate to work as a psychologist. Further education, training and supervised experience is required for registration as a professional psychologist with the Psychologists' Registration Board of Victoria and also for membership of the Australian Psychological Society (APS).

Admission requirements

Admission requirements are VCE units 3 and 4, and a study score of at least 30 in English (any).

Degree requirements

Students must:

- complete a total of at least five years of full-time study or its equivalent
- complete in sequence the compulsory law units
- complete in sequence the compulsory psychology units
- complete a total of 650 credit points (375 credit points in law, 235 credit points in psychology and 40 credit points in legal studies)
- complete a total of 22 units in law (16 compulsory units and 6 elective units), 2 legal studies units including LST3MDC and one unit from LST3CAP, LST3RPS or LST3DRL, and 13 psychology units

- complete no more than 180 credit points at first year overall.

Course structure

First year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Dispute Resolution	LAW1DR	15
TE-SEM-1	Legal Institutions and Methods	LAW1LIM	15
TE-SEM-1	One law elective		15
TE-SEM-1	Psychology A	PSY1PYA	15
TE-SEM-2	Criminal Law	LAW2CRM	20
TE-SEM-2	Principles of Public Law	LAW2PPL	15
TE-SEM-2	Psychology B	PSY1PYB	15
TE-SEM-2	Statistics for Psychology	STA1PSY	15

Second year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Law of Contracts	LAW2CNT	20
TE-SEM-1	Law of Torts	LAW2TOR	20
TE-SEM-1	Introduction to Behavioural Neuroscience A	PSY1BNA	15
TE-SEM-2	Commercial and Consumer Contracts	LAW2CCC	15
TE-SEM-2	Constitutional Law	LAW2CNL	20
TE-SEM-2	One law elective		15
TE-SEM-2	Introduction to Behavioural Neuroscience B	PSY1BNB	15

Third year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Criminal Procedure and Evidence	LAW3CPE	20
TE-SEM-1	Mental Disorder and Criminal Responsibility	LST3MDC	20
TE-SEM-1	Psychology A	PSY2PYA	20
TE-SEM-2	Civil Procedure	LAW3CIV	15
TE-SEM-2	Property Law	LAW3PRP	20
TE-SEM-2	One law elective ¹		15
TE-SEM-2	Psychology B	PSY2PYB	20

Fourth year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Law of Equity and Trusts	LAW3EQT	20
TE-SEM-1	Psychology and Law ²	LAW3PAL	15
TE-SEM-1	Psychology A	PSY3PYA	20
TE-SEM-1	Psychology Research Project A	PSY3RSA	20
TE-SEM-2	Administrative Law	LAW3ADM	20
TE-SEM-2	One law elective ¹		15
TE-SEM-2	Psychology B	PSY3PYB	20
TE-SEM-2	Psychology Research Project B ³	PSY3RSB	20

Fifth year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Corporations Law	LAW4COR	20
TE-SEM-1	One law elective ⁴		15
TE-SEM-1	Counselling and Family Psychology A ⁵	PSY3CFA	20
TE-SEM-2	Legal Practice and Conduct	LAW4LPC	15
TE-SEM-2	Crime and Psychology (teaching period 2)	LST3CAP	20
TE-SEM-1	Legal Rights, Poverty and Legal Services (teaching period 1)	LST3RPS	20
TE-SEM-1	Disability Rights and the Law (teaching period 1)	LST3DRL	20
TE-SEM-2	One law elective		15
TE-SEM-2	Social and Community Psychology B ⁶	PSY3SCB	20

Key: ¹ Students are encouraged to take this elective in summer or winter school to spread work load.

² LAW3PAL is a summer school unit which counts towards the credit points in teaching period 1 of fourth year. It can however be taken at any time after first year.

³ Students must complete this unit in the same year as Psychology Research Project A (PSY3RSA).

⁴ Students who choose LST3RPS or LST3DRL in teaching period 1 in fourth year will have to take this elective in teaching period 2 unless doing Honours.

⁵ This unit alternates every other year with Applied Neuroscience A (PSY3ANA).

⁶ This unit alternates every other year with Cognitive and Developmental Psychology B (PSY3CDB).

Bachelor of Laws/Bachelor of Science (LZLS) – Melbourne (Bundoora)

The Bachelor of Laws/Bachelor of Science is a five-year combined degree providing an accredited professional qualification in law, as well as a degree in science. The program includes all the compulsory law units required by the Council of Legal Education for admission to practice in Victoria and a wide range of law electives, including units relevant to science such as Intellectual Property Law, Law and Medicine, and Psychology and Law. Students may choose science units from a wide range of disciplines including chemistry, computer science, electronics, genetics, psychology, and mathematics. The course is available at both Melbourne (Bundoora) and Bendigo campuses, but students commencing their studies at Bendigo transfer to Melbourne (Bundoora) after two full-time years of study where they complete the remainder of their course.

Since science majors at Bendigo differ from those at Melbourne (Bundoora) in some instances, Bendigo students are only permitted to undertake units leading to major studies in biological sciences, chemistry, computer science, mathematics, physics, psychological science and statistics.

Admission requirements

Admission requirements are VCE units 3 and 4, and a study score of at least 30 in English (any) and a study score of at least 20 in mathematical methods or specialist mathematics.

Degree requirements

Students must:

- complete a total of at least five years full-time study or its equivalent
- complete in sequence the compulsory law units
- satisfy the requirements of the Bachelor of Science
- complete a total of 630 credit points (375 credit points in law and 255 credit points in science)
- complete a total of 22 units in law (15 compulsory units and 7 electives)
- complete a minimum of 60 and a maximum of 90 credit points at first year level, a minimum of 80 credit points at second year level and a minimum of 90 credit points at third year level in science electives.
- complete no more than 180 credit points at first year level overall. Students will usually be enrolled in between 120 and 135 credit points each year, but may enrol in up to 145 credit points without special approval.

Course structure

First year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Dispute Resolution	LAW1DR	15
TE-SEM-1	Legal Institutions and Methods	LAW1LIM	15
TE-SEM-1	Two first year science electives		30
TE-SEM-2	Criminal Law	LAW2CRM	20
TE-SEM-2	Principles of Public Law	LAW2PPL	15
TE-SEM-2	Two first year science electives		30

Second year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Law of Contracts	LAW2CNT	20
TE-SEM-1	Law of Torts	LAW2TOR	20
TE-SEM-1	First or second year science elective (s) ¹		15–20
TE-SEM-2	Commercial and Consumer Contracts	LAW2CCC	15
TE-SEM-2	Constitutional Law	LAW2CNL	20
TE-SEM-2	One law elective		15
TE-SEM-2	First or second year science elective(s) ¹ (subject to 1st-year maximum of 90 credit points)		15–20

Third year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Criminal Procedure and Evidence	LAW3CPE	20
TE-SEM-1	Two law electives		30
TE-SEM-1	Second year science elective(s) ²		20
TE-SEM-2	Civil Procedure	LAW3CIV	15

TE-SEM-2	Property Law	LAW3PRP	20
TE-SEM-2	One law elective		15
TE-SEM-2	Second year science elective(s) (only necessary if second year science credit points otherwise fewer than 80 by end of course)		20

Fourth year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Corporations Law	LAW4COR	20
TE-SEM-1	Law of Equity and Trusts	LAW3EQT	20
TE-SEM-1	Two law electives		30
TE-SEM-2	Administrative Law	LAW3ADM	20
TE-SEM-2	Legal Practice and Conduct	LAW4LPC	15
TE-SEM-2	One law elective		15
TE-SEM-2	Second year science elective(s) (only necessary if second year science credit points otherwise are fewer than 80 by end of course)		20

Fifth year

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1 or TE-SEM-2	Second or third year science elective(s)		30
TE-SEM-1 or TE-SEM-2	Third year science electives		90

Key: ¹ Students who take more than 60 credit points at first year must ensure that they still complete at least 80 credit points at second year by the end of their degree. But with permission it may be possible to take more than 90 credit points at third year to offset a shortfall in second year credit points.
² Students who transfer from Bendigo and wish to major in biology may need to take additional first year units (subject to the overall maximum of 90 credit points at first year) before they can take 2nd year units.

Science disciplines

The selection and arrangement of the science units within the program is up to the student in consultation with an adviser from the Faculty of Science, Technology and Engineering. Units may be chosen from any of the following areas:

- biology (agricultural science, biochemistry, botany, genetics, microbiology, zoology)
- chemistry
- computer science and computer engineering
- electronics
- mathematics
- physics
- psychology (subject to minimum entry requirements)
- statistics

From 2008, students who complete the necessary core units for a specialisation will be able to have their academic record and testament annotated accordingly, e.g., Bachelor of Science with a specialisation in Viticulture.

Refer to Faculty of Science, Technology and Engineering section in this *Handbook* for full unit details and specialisation requirements.

Bachelor of Laws compulsory units

Compulsory law units are only available to undergraduate students with a current enrolment in the Bachelor of Laws or relevant combined double degree program or as an approved unit within the Bachelor of Legal Studies offered by the Faculty of Law and Management (currently being phased out) or with the permission of the Director of Undergraduate Studies. In 2008, Legal Institutions and Methods (LAW1LIM) is not available to students enrolled in the Bachelor of Legal Studies offered by the Faculty of Humanities and Social Sciences. With the permission of the Director of Undergraduate Studies, students enrolled in the Bachelor of Legal Studies offered by the School of Law may in second year enrol in Principles of Public Law (LAW2PPL/LAW3PPL) and/or LAW2CRM/LAW3CRM in lieu of a second or third year legal studies unit.

Unit title	Unit code
Dispute Resolution	LAW1DR
Legal Institutions and Methods	LAW1LIM

Criminal Law	LAW2CRM/LAW3CRM
Principles of Public Law	LAW2PPL/LAW3PPL
Law of Contracts	LAW2CNT
Law of Torts	LAW2TOR
Commercial and Consumer Contracts	LAW2CCC
Constitutional Law	LAW2CNL
Criminal Procedure and Evidence	LAW3CPE
Law of Equity and Trusts	LAW3EQT
Administrative Law	LAW3ADM
Civil Procedure	LAW3CIV
Property Law	LAW3PRP
Corporations Law	LAW4COR
Legal Practice and Conduct or	LAW4LPC
Legal Practice and Conduct (clinical placement)	LAW4LPP

Bachelor of Laws electives

In order to provide a variety of areas for study, the school offers a range of elective law units, with a LAW code. However, it is not possible to offer all of these units every year. Certain units will therefore only be available every second year, subject to sufficient enrolments. Usually those units that are not available in 2008 will be offered in 2009.

Law electives are normally only available to undergraduate students enrolled in the Bachelor of Laws or relevant combined degree program. However, a limited number of Bachelor of Laws electives are open to non-Bachelor of Laws students. These units attract a Level 3 HECS banding. Please see further entries below for eligibility and lists of approved units. Legal studies units are not available to Bachelor of Laws students as law electives.

Subject to prerequisites and quota, law students may also take up to four of the units offered in the Master of Laws in Global Business Law as law electives and may receive advanced standing for two of these units should they later enrol in a Master of Laws coursework program at Melbourne (Bundoora). These units are usually offered in summer or winter school in block release mode. In 2008, approximately fifteen units will be available in this way. Alternatively, law students may enrol in the public interest law units offered within the Master of Laws with the permission of the Director of Undergraduate Studies. For further information, refer to the *Postgraduate Handbook*.

Law and legal studies units available as law electives to Bachelor of Laws students

Semester 1

Unit title	Unit code
Advanced Criminal Law	LAW3ACL
Clinical Legal Education	LAW2CLE
Disability Rights and the Law	LAW3DRL (approval pending)
Family, Society and Law	LAW2FSL
Human Rights Law	LAW2HRL/LAW3HRL
Indigenous Australians and the Law	LAW1IAL
International Arbitration Moot	LAW3IAM (summer school)
Introduction to Chinese Law	LAW2ICL (summer school)
Law and Medicine	LAW2LAM (summer school)
Law of the European Community	LAW2LEC
Legal Change, Legislation and Law Reform	LAW2LCL/LAW3LCL
Legal Rights, Poverty and Legal Services	LAW2RPS/LAW3RPS
Mediation: Skills and Theory	LAW2MST/LAW3MST
Psychology and Law	LAW2PAL/LAW3PAL (summer school)
Public Interest Law Practice	LAW2PLP/LAW3PLP
Public International Law	LAW2PIL/LAW3PIL
Legal Internship ²	LAW4INT
Legal Practice and Conduct (Clinical Placement)	LAW4LPP
Law Honours Thesis Part A	LAW4THA
Mental Disorder and Criminal Responsibility	LAW2MDC/LAW3MDC

Semester 2

Unit title	Unit code
Advanced Tax Law	LAW3ATL (summer school)
Banking and Finance Law	LAW2BFL/LAW3BFL

Law electives available within Bachelor of Legal Studies (School of Law) and Graduate Diploma in Law and Legal Studies

Subject to prerequisites, students currently enrolled in the Bachelor of Legal Studies offered by the School of Law (currently being phased out) are permitted to enrol in the following core units and law electives.

Students enrolled in the Graduate Diploma in Law and Legal Studies may be permitted to enrol in the following law electives but only with the permission of the Director of Undergraduate Studies.

Semester 1

Unit title	Unit code
Electronic Commerce and Cyberspace Law ¹	LAW2ECL/LAW3ECL
Human Rights Law	LAW2HRL/LAW3HRL
Legal Change, Legislation and Law Reform	LAW2LCL/LAW3LCL
Public International Law	LAW2PIL/LAW3PIL

Semester 2

Unit title	Unit code
Banking and Finance Law	LAW2BFL/LAW3BFL
Competition Policy and Law ¹	LAW2CPL/LAW3CPL
Criminal Justice	LAW2CJU/LAW3CJU
Employment and Labour Relations Law	LAW2ELR/LAW3ELR
International Business Law	LAW2IBL/LAW3IBL
Jurisprudence	LAW2JUR/LAW3JUR

Key: ¹ Not offered in 2008.

All these units are worth 15 credit points each and are to count as legal studies credit points for the purposes of the Bachelor of Legal Studies offered by the School of Law.

Law electives available to School of Business students

Students currently enrolled in the Bachelor of Business, Bachelor of Commerce, Bachelor of Economics or Bachelor of Finance are permitted to enrol in the following law electives subject to prerequisites.

Unit title	Unit code
Human Rights Law	LAW2HRL/LAW3HRL
Banking and Finance Law	LAW2BFL/LAW3BFL
Competition Policy and Law ¹	LAW2CPL/LAW3CPL
Employment and Labour Relations	LAW2ELR/LAW3ELR
International Business Law	LAW2IBL/LAW3IBL
Introduction to Chinese Law	LAW2ICL/LAW3ICL

Key: ¹ Not offered in 2008.

These units are worth 15 credit points each and are to count as legal studies credit points. Students wishing to major in business law are also permitted to enrol in LST2SLA, LST2THL and LST2MAL/LST3MAL.

Law electives available to students outside the Faculty of Law and Management

Students currently taking legal studies in degrees outside the Faculty of Law and Management such as the Bachelor of Arts, Bachelor of Legal Studies (Humanities and Social Sciences), Bachelor of International Relations, Bachelor of Behavioural Science, Bachelor of Health Sciences and Bachelor of Science are permitted to enrol in the following law electives subject to prerequisites.

Teaching period	Unit title	Unit code
TE-SEM-1	Disability Rights and the Law	LAW3DRL
TE-SEM-1	Human Rights Law	LAW2HRL/LAW3HRL
TE-SEM-1	Law of the European Community	LAW2LEC
TE-SEM-1	Legal Rights Poverty and Legal Services	LAW2RPS/LAW3RPS
TE-SEM-1	Mental Disorder and Criminal Responsibility	LAW2MDC/LAW3MDC

TE-SEM-2	International Business Law	LAW2IBL/LAW3BL
TE-W47-06	Negotiation	LAW3NEG
TE-SEM-2	Organised and International Crime	LAW2OIC/LAW3OIC
TE-SEM-1	Public International Law	LAW2PIL/LAW3PIL

These units are worth 15 credit points each.

Legal studies units

The School of Law no longer offers a Bachelor of Legal Studies, although there are some students still completing this program within the school. The Faculty of Humanities and Social Sciences now offers a Bachelor of Legal Studies, but students in this course follow a different degree structure to students still enrolled in the Bachelor of Legal Studies offered by the School of Law. The School of Law still offers a limited range of legal studies units, which can (unless otherwise indicated and subject to prerequisites and the approval of the relevant School or Faculty) be taken by students currently enrolled in the following degrees: Bachelor of Legal Studies offered by the School of Law, Bachelor of Legal Studies offered by the Faculty of Humanities and Social Sciences, Graduate Diploma in Law and Legal Studies, Bachelor of Arts, Bachelor of Psychological Science, Bachelor of Business, Bachelor of Commerce, Bachelor of Economics, Bachelor of Finance, Bachelor of Health Sciences, Bachelor of International Relations, and Bachelor of Science. Legal studies units are not available to Bachelor of Laws students as law electives.

First year units

Teaching period	Unit title	Unit code
TE-SEM-1/ TE-SEM-2	Business Law	LST1BSL (prerequisite or co-requisite for LST2LBA/LST3LBA)

Second and third year units

Law and economic relations

Teaching period	Unit title	Unit code
TE-SEM-1/ TE-SEM-2	Law of Business Association	LST2LBA/LST3LBA
TE-SEM-2	Marketing Law	LST2MAL/LST3MAL
TE-SEM-2	Sport Law	LST2SLA
TE-SEM 2	Tourism and Hospitality Law	LST2THL

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this section. For the most recent descriptions of units students should access the unit database at www.latrobe.edu.au/udb_public.

UNIT DESCRIPTIONS

LAW1DR DISPUTE RESOLUTION (15. CPs Sem. TE-SEM-1 BE, BU.) *BE: Ms Frances Gibson, BU: Ms Judy Gutman, BU: Ms Mary Anne Noone*

A significant aspect of lawyers work is helping people resolve disputes. In this unit students will be provided with a general introduction to the theoretical and practical aspects of dispute resolution. The processes of arbitration, conciliation, mediation and negotiation are described and evaluated. A range of issues, including power imbalances between disputants, rights vs. interest-based approaches, bargaining in the shadow of the law and lawyers as mediators, are analysed. Skills-based training in negotiation and mediation is a major and compulsory component of the unit.

Prerequisite: Only available to LLB students and BLS students commencing prior to 2006 who may undertake this unit with permission from Director of Undergraduate Studies.

Incompatible unit: LST3DRE, LAW2/3DRE

Class requirements: One 2-hour lecture per week and 6 x 2 hours skills seminars.

This unit is not available for Study Abroad students.

Assessment: One 2-hour examination (70%), Skills Assessment (30%)

Recommended Reading:

LAW1IAL INDIGENOUS AUSTRALIANS AND THE LAW (15. CPs Sem. TE-SEM-1 BU.) *Dr Mark Harris*

Current enrolment in Bachelor of Laws

Issues relevant to the involvement and interaction of indigenous Australians with the law are addressed in this unit, with content reflecting the most topical or challenging legal issues relevant to indigenous Australians. The focus may vary from issues particularly relevant to criminal law (issues of evidence, the recognition of Aboriginal customary law), and property law (the questions raised by the 'Mabo' and 'Wik' decisions, the Native Title Act 1993 and their implications for resource and planning law). In addition to these main area of study issues relevant to domestic constitutional law (the issue of sovereignty and the status of Aboriginal law), and international treaty law and its relevance for indigenous people in Australia, along with the operation of human rights and cultural heritage legislation may also be considered.

Prerequisite: Completion of LAW11LIM and LAW11/12CRM and LAW12CNM or LAW2/3PPL or permission of Director of Law Program.

Incompatible unit: LST2/3ALA, LAW10IAL

Class requirements: One 2-hour seminar and one 1-hour lecture or workshop per week.

Assessment: One 2000-word essay (40%), one 2500-word essay (60%)

Prescribed Reading:

LAW1LIM LEGAL INSTITUTIONS AND METHODS (15. CPs Sem. TE-SEM-1 BE, BU.) *BE: Ms Frances Gibson, BU: Ms Judy Gutman, BU: Dr Emma Henderson, BU: Mr Keith Kendall*

Current enrolment in Bachelor of Laws or permission of the Head of Undergraduate Studies

Basic legal concepts and skills are examined. The institutions of law – the court and parliament structures – are examined, along with introductions to concepts such as International Law, Corporate Law and Access to Justice. The main skills examined are the conduct of legal research, the use of primary sources of law, and the employment of legal modes of analysis, especially problem-solving. The tasks which students are assigned include: finding primary and secondary sources in the library, analysing and assessing cases, examining court structures through a court visit exercise, preparing case briefs, interpreting legislation and legal writing. Ethical aspects of legal advising are also examined.

Incompatible unit: LAW11LSC

Class requirements: One 1-hour lecture and one 2-hour seminar per week.

Assessment: 1500-word Court Report (30%), one 2-hour examination (50%), compulsory library practical research skills exercises (online) (5%), Case Brief and Presentation (group exercise) (15%)

LAW2BFL BANKING AND FINANCE LAW (15. CPs Sem. TE-SEM-2 BU.) *Ms Ann Wardrop*

This unit is offered at third-year level also.

This subject is no longer available with a Legal Studies code

(LST21/31BFL) but is available with a LAW code for students enrolled in the Bachelor of Legal Studies, Economics, Commerce, Finance, Business or current students enrolled in the Bachelor of Laws. Bachelor of Finance students who have not completed LST11/12LCC must attend six extra tutorials.

This unit is required for students seeking to satisfy the educational requirements of the Financial Services Institute of Australasia. A general introduction to many aspects of banking law and practice is provided. A broad overview of the law relating to negotiable instruments, securities, electronic banking, credit and charge cards and the banker/financial institution-customer relationship also is provided. Students examine the manner in which the law has been used as a facilitator of social and economic policy in the field of banking and finance. Also considered is the role of non-judicial forms of conciliation and mediation in the resolution of disputes over aspects of banking practice. In particular, the effectiveness of and prospects for, codes of conduct, conciliation bodies and non-legal means of dispute resolution in the banking and finance industry are considered.

Prerequisite: LLB: LAW21/22CNT. BLS and BUS: LST11/12LCC or LST11/12IBL or LST11/12BSL and LST12LBA or LST22/32BFL, or FIN21FIN.

Incompatible unit: L2BLP, LST20BFL, LST30BFL, LAWBLP

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week. Bachelor of Finance students will take six extra tutorials.

Assessment: One 1500-word assignment (30%), one 3-hour final exam (70%)

Prescribed Reading:

LAW2CAS COMMUNICATION AND ADVOCACY SKILLS (15. CPs Sem. TE-SEM-2 BU.) *Dr Chris Corns, Mr John Willis*

Current enrolment in Bachelor of Laws. Interested students must submit a written application by the end of April Application forms are available from the General Office, School of Law and Legal Studies, Room SS229 or can be downloaded from the School's website.

Legal work frequently entails the communication of information, the presentation of material and participation in some form of mediation of issues, either formal or informal. Students obtain practical experience in these skills in a number of settings, such as appellate courts, Magistrates' Court and tribunal hearings, conciliation conferences and settlement negotiations. There is an analysis and discussion of ethical issues and of broad questions of policy that surround these practices. Students receive grounding in the use of such skills as interviewing, advocacy and negotiation

Prerequisite: Completion of LAW11/12/22/32CRM, and LAW12CNM or LAW11/2/3PPL or permission of Director of Law Program.

Incompatible unit: LST20CAS, LST22CAS, LST30CAS, LST32CAS
Quota: 18.

Class requirements: One 2-hour seminar/workshop per week. Participation outside normal university hours may be required to meet with the schedules of legal bodies and practitioners. This unit is not available for Study Abroad students.

Assessment: One 3000-word research exercise (40%), Up to six 10-minute practical exercises (60%)

LAW2CCC COMMERCIAL AND CONSUMER CONTRACTS (15. CPs Sem. TE-SEM-2 BE, BU.) *BE: Dr Francine Rochford, BU: Dr Gonzalo Villalta Puig*

Current enrolment in Bachelor of Law

In Law of Contracts (LAW2CNT), students examined voluntarily assumed obligations at common law and in equity, including formation, breach and construction, and termination of contract.

In this unit, students will resume their examination of voluntarily assumed obligations subject to the statutory distinction between commercial contracts and consumer contracts. Thus, they will examine the doctrine of privity of contract, exclusion clauses,

statutory implied terms, remedies for breach of contract, and vitiating factors involving selected types of unfair conduct in conjunction with the statutory remedies available for such conduct.

In combination with Law of Contracts (LAW2CNT), the unit has been endorsed by the Council of Legal Education as providing understanding of and competence in the area contracts under the Legal Practice (Admission) Rules 1999 (Vic). Successful completion of both units is required for admission to legal practice in Victoria.

Prerequisite: LAW21TOR and LAW21/22CNT.

Incompatible unit: LAW2CCL

Class requirements: One 2-hour lecture per week and one 2-hour seminar per fortnight.

Assessment: One 2-hour examination (50%) 40% Hurdle (i.e., minimum of 20 marks out of 50), one 2500-word essay (50%)

Prescribed Reading:

Paterson, J., Robertson, A. and Heffey, P. *Principles of Contract Law* Thomson Lawbook Co, 2nd edn, 2005

Villalta Puig, G. *Principles of Personal Property Securities and the Law of Sale* Pearson, 2nd edn, 2007

LAW2CJU CRIMINAL JUSTICE (15. CPs Sem. TE-SEM-2 BU.) *Dr Chris Corns*

This unit is offered at third unit level also.

Current enrolment in Bachelor of Laws or Bachelor of Legal Studies. Students who have already completed units in criminal justice at another institution cannot enrol in this unit unless they have the permission of the Director of Undergraduate Studies

The way in which the state, through its relevant institutions (courts, Office of Public Prosecutions) and personnel (the police, criminal investigators, prosecutors and judiciary), 'deal with' persons suspected of committing a criminal offence and the victim is examined. The focus is on the rules, principles and procedures which govern the investigation and 'processing' of criminal cases and accused persons. Relevant case law and legislative provisions provide the legal framework. Within this legal context, the way in which the law attempts to balance competing rights and interests is a recurrent theme. Amongst the key 'balancing' mechanisms considered are relevant judicial discretions, such as the power to exclude illegally or unfairly obtained evidence, to direct juries to acquit and to issue particular 'warnings' to the jury. Students gain a working knowledge of the processes of the administration of criminal justice and an understanding of the way in which key decisions are made.

Prerequisite: LLB: Completion of or concurrent enrolment in LAW1LIM or permission of Director of Law Program BLS: Completion of LAW1LIM, LST12/22/32CLS recommended.

Incompatible unit: LST20/30CJB, LST22/32PCJ, LAW10/11CJU
Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2000-word essay, (40%) As an alternative to the essay, a practical skills based advocacy exercise (worth 40%) will be offered, subject to staff availability., one final examination of 2 hours 15 minutes (50%), short answer test (10%)

Recommended Reading:

Findlay, M. and Yeo, S. eds. *Australian Criminal Justice* 2nd edn, OUP 1999.

LAW2CLE CLINICAL LEGAL EDUCATION (30. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Ms Liz Curran*

Current enrolment in Bachelor of Laws. This unit is offered both semesters. Knowledge of MSWord, World Wide Web, internet and email required. Entrance into the course is BY APPLICATION ONLY. Application forms are available from the General Office, School of Law, room SS229 or can be downloaded from the internet on the Law School link to Clinical Programs.

The focus of this course is to learn about real life practice of law in an area of Melbourne where there is a high proportion of disadvantage and poverty. Students participate in the provision of legal services and perform legal work under supervision at the West Heidelberg Community Legal Service. Students are encouraged to reflect on the practice of law; the value, dynamics and effectiveness of the legal system, ethics, and legal professionalism, the role of lawyers in society, the relevance of human rights law and the potential of law to achieve justice for the economically and socially disadvantaged. The

course is taught in a human rights context and with an emphasis on ethical legal practice. Students enhance their practical legal skills of communication, interviewing, providing legal advice, writing, legal research, negotiation, advocacy and a law reform project. The course involves one full day of legal placement work each week in addition to classroom and assessment requirements.

Prerequisite: Completion of LAW11/12CRM and LAW12CNM/LAW2PPL.

Co-requisite: LAW31CPE.

Incompatible unit: LST20/30CLE

Quota: 12.

Class requirements: One 2-hour seminar and a full day's placement per week.

This unit is not available for Study Abroad students.

Assessment: Class participation (10%), placement (45%), 1500-word interview report (15%), 3000-word written assignment (30%)

LAW2CNL CONSTITUTIONAL LAW (20. CPs Sem. TE-SEM-2 BE, BU.) *BE:*

Ms Frances Gibson, BU: Dr Spencer Zifcak

Current enrolment in Bachelor of Laws. Undergraduate students should not attempt this subject until the second year of the law program.

An exposition of the Australian Constitution through its historical development and present character is undertaken in this unit. Attention is paid to the nature of constitutional doctrine, and an effort is made to locate the Constitution in its functioning political and administrative context. Federalism, for example, is treated as both legal doctrine and a system for sharing political power. Topics include federalism, grants and taxation, freedom of interstate trade, the corporations' power, the external affairs power and express and implied constitutional rights. This unit in conjunction with Principles of Public Law meets the requirements of the Council of Legal Education for admission to practice in Victoria in the area of Federal and State Constitutional Law.

Prerequisite: Completion of LAW11LSC or LAW11LIM, LAW11/12CRM and completion of or concurrent enrolment in LAW12CNM or LAW12PPL permission of Director of Law Program.

Class requirements: One 2-hour lecture and one 2-hour seminar per week.

Assessment: One 3-hour examination, (70%), one take-home examination (30%)

Prescribed Reading:

Blackshield, A. and Williams, G. *Australian Constitutional Law and Theory; Commentaries and Materials* 3rd edn, Federation Press 2002.

LAW2CNT LAW OF CONTRACTS (20. CPs Sem. TE-SEM-1 BE, BU.) *BE:* *Dr*

Francine Rochford, BU: Ms Alison King, BU: Mr Anthony O'Donnell, BU: Mr Terry Reid

Current enrolment in Bachelor of Laws

In this unit students examine the law of contract, but within the broader framework of the law of obligations. The focus is the principles for the recognition of obligations in contracts and the award of remedies in the event of their breach. An important theme is the shift from freedom of contract towards a model demanding heightened standards of fair dealing in contractual relationships. Topics include the requirements for contract formation and enforceability, the sources and construction of contract terms, provision for alteration of contracts, including bona fide settlements of disputes, grounds for terminating contracts, excuses for non-performance and common law rights and remedies for breach including restitutionary actions and enforcement of debts following termination. This unit, in combination with Commercial and Consumer Contracts (LAW2CCC), meets the requirements of the

Council of Legal Education for admission to practice in Victoria in the area of Law of Contracts.

Prerequisite: Completion of LAW11/1LIM and LAW22/32/2/3PPL and LAW22/32/2/3CRM.

Co-requisite: LAW2TOR.

Incompatible unit: LAW21/22CNT

Class requirements: Two 2-hour lectures in alternate weeks and one 2-hour lecture and one 2-hour seminar every other week.

Assessment: 2-hour mid-semester test (34%), 3-hour examination (66%)

Prescribed Reading:

Ellinghaus, M. P. *Australian Cases on Contract* Code Press, 2008 Edn Paterson, M., Robertson, A. and Heffey, P. *Principles of Contract Law* Law Book Co 2nd edn, 2005

LAW2CPL COMPETITION POLICY AND LAW (15. CPs Sem. TE-SEM-2 BU.)

Mr David Wishart

Not available in 2008. This unit is offered at third year level also.

LAW2CRM CRIMINAL LAW (20. CPs Sem. TE-SEM-2 BE, BU.) *BE:* *Ms*

Frances Gibson, BU: Ms Judy Gutman, BU: Dr Emma Henderson,

BU: Ms Marilyn McMahon, BU: Mr John Willis

This unit is offered at third unit level also.

Current enrolment in Bachelor of Laws

Key aspects of the substantive criminal law are examined in this unit. The initial focus is on an analysis of basic concepts and principles in the criminal law, such as the onus and standard of proof, evidentiary and persuasive burdens, objective and subjective tests and principles of offence classification. Substantive topics dealt with are homicide, non-fatal offences against the person, sexual offences, offences against property and complicity. This unit, in conjunction with Criminal Procedure and Evidence, meets the requirements of the Council of Legal Education for admission to practice in Victoria in the area of Criminal Law and Procedure.

Prerequisite: Completion of LAW11LIM.

Class requirements: One 2-hour lecture and one 2-hour seminar per week.

Assessment: One 2-hour class test (30%), one 3-hour end of semester exam (70%)

Preliminary Reading:

LAW2ELR EMPLOYMENT AND LABOR RELATIONS LAW (15 CPs Sem. TE-

SEM-2 BU.) *Dr Jill Murray*

This unit is offered at third-year level also.

This unit is no longer available with a Legal Studies code but is available with a LAW code to students currently enrolled in Bachelor of Legal Studies or Bachelor of Economics, Bachelor of Commerce, Bachelor of Finance. Alternatively, current enrolment in Bachelor of Laws.

In this unit students are provided with an introduction to the law of employment and labor relations. They study the principles and practices relating to the creation, categorisation, conduct and termination of the employment relationship. They also examine the roles of common law, awards, legislation, tribunals, collective bargaining and personnel practices in regulating the relationship. The unit is designed to develop awareness of legal obligations and options relevant to the management of employment and labor relations, and is taught in the context of contemporary issues in labour regulation.

Prerequisite: LLB students: completion of LAW21/22CNT; Bachelor of Legal Studies students: completion of LAW11LIM and LST11/12LCC or LST11/12IBL or LST11/12BSL: School of Business students: completion of LST11/12LCC or LST11/12IBL or LST11/12BSL; LST12LBA or LST22/32LBA highly recommended.

Incompatible unit: LAW30ELR

Class requirements: One 1-hour lecture and one 2-hour seminar.

Assessment: 2000-word essay (50%), 2-hour examination (50%)

Prescribed Reading:

Owens, R. and Riley, J. *The Law of Work* Oxford University Press, Melbourne, 2006

LAW2ERL ENVIRONMENTAL AND NATURAL RESOURCES LAW (15 CPs Sem. TE-SEM-2 BU.)

Dr Mark Harris

This unit is offered at third unit level also. Not available in 2008

LAW2FSL FAMILY SOCIETY AND LAW (15. CPs Sem. TE-SEM-1 BU.)

Ms Lee Ann Basser

Current enrolment in Bachelor of Laws program

The focus of this unit is family law in Australia. The role of the state and of traditional legal forms in the regulation, maintenance and control of family and personal relationships is considered. The impact of the changing role of women within the family, in family law and in state policies is also considered. Specific issues canvassed in this unit include the legal regulation of family formation and breakdown; the financial consequences of family formation and breakdown; parental responsibility and children's rights. This unit aims to provide students with an overview of the key issues in contemporary family law.

Prerequisite: Completion of LAW11/12CRM and LAW12CNM or LAW12PPL.

Incompatible unit: LST20/30FSL.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2750-word essay (60%), one 1750-word take-home examination (40%)

Prescribed Reading:

Parkinson, P. and Behrens, J. *Australian family law in context: commentary and materials* 3rd edn, Thomson Lawbook, 2004

LAW2HRL HUMAN RIGHTS LAW (15. CPs Sem. TE-SEM-1 BU.)

Professor Jianfu Chen

This unit is offered at third unit level also.

This unit is no longer available with a Legal Studies code (LST21/31HRL) but is still available with a LAW code to Legal Studies students from any Faculty. Alternatively current enrolment in Bachelor of Laws.

This unit begins with an introductory review of the influence which culture and ideology bring to bear on the notion of human rights. Students then trace the development of human rights protection under international law. This leads into a study of the international conventions and legal processes associated with the recognition and protection of human rights by the United Nations, the Council of Europe and the European Union, the Organisation of American States and the African Union. The protection of rights available under the Canadian Charter of Rights and Freedoms and the Bill of Rights of the United States Constitution are considered and compared with the protection offered by the legal systems in Australia, New Zealand and the United Kingdom. Finally there will be a broad discussion of Australian federal and state anti-discrimination legislation and the question of a bill of rights for Australia, and other contemporary issues

Prerequisite: LLB students: completion of or concurrent enrolment in LAW11LIM. Non LLB students: completion of any first year history, philosophy, legal studies, politics or sociology unit or permission of coordinator.

Incompatible unit: LST21/31HRL

Class requirements: One 2-hour seminar and one 1-hour lecture per week.

Assessment: (a) One 3000-word essay and one 20-minute seminar presentation OR (b) two 2000-word essays (100%) Students may choose between the two types of assessment. (a) is 80% and 20% and (b) is 50% and 50%

Prescribed Reading:

LAW2IBL INTERNATIONAL BUSINESS LAW (15. CPs Sem. TE-SEM-2 BU.)

This unit is offered at third unit level also.

LAW2IPL INTELLECTUAL PROPERTY LAW (15. CPs Sem. TE-SEM-2 BU.)

Michelle Harper

Current enrolment in Bachelor of Laws

In this unit students examine the commercial application of intellectual property laws including trade marks law, the tort of passing off and S.52 of the TRADE PRACTICE ACT 1974 (Cth), copyright, patents, designs and the protection of trade secrets by the action for breach of confidence in equity. In addition to examining each discrete area of intellectual property law, students will explore the interrelationships between these laws in order to develop their ability to obtain and maintain maximum intellectual property protection while avoiding the pitfalls common in the practice of intellectual property law.

Prerequisite: Completion of or concurrent enrolment in LAW21CNT and LAW21TOR.

Incompatible unit: LAWIP

Class requirements: one 2-hour lecture per week and one 1-hour tutorial per week.

Assessment: one 1000-word assignment (25%), one 3-hour final examination (75%)

Prescribed Reading:

Ricketson, S., and Richardson, M. *Intellectual Property: Cases, Materials and Commentary* 3rd edn, Butterworths

LAW2ICL INTRODUCTION TO CHINESE LAW (15. CPs Sem. TE-W02-04 BU.)

Professor Jianfu Chen

This unit is offered at third-year level also.

This unit is only offered in China. In this unit students will be introduced to the basic concepts and structures of Chinese law and their political and administrative context. It starts by a general introduction to the legal system/institutions of the PRC. Structures and principles of the Chinese constitutional, administrative, civil, and criminal laws are then explained. Law-making and sources of law, methods of rights protection, roles of law in social and economic development, and mechanisms for dispute resolution etc are carefully examined throughout the unit.

Class requirements: 5 hours per day for 8 days; visits to Chinese courts, procuratorates and government organisations. Unit to be taught in English.

Assessment: Class participation (10%) and one research essay of 4000 words (90%)

Prescribed Reading:

Jianfu, C Printed Materials 2007

LAW2JUR JURISPRUDENCE (15. CPs Sem. TE-SEM-2 BU.)

Dr Steven Tudor, Mr Kenneth Warner

This unit is offered at third unit level also.

Current enrolment in Bachelor of Laws or Bachelor of Legal Studies
Jurisprudence critically examines fundamental legal concepts and ideas. It is not, however, merely an intellectual diversion, like a puzzle lifted from the cupboard to occupy a rainy Sunday. How we understand legal concepts and ideas fundamentally shapes what law is in practice, and so critical examination of them can play a key role in improving what law can be. This unit explores a range of central jurisprudential topics, including: rights; compensatory justice; civil disobedience; the relationship between morality and law; whether law is at base only an exercise of power, or whether 'law' connotes legitimacy and authority.

Prerequisite: LAW11LIM.

Incompatible unit: LST20/30JPL.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

This unit is not available for Study Abroad students.

Assessment: One 2500-word essay (60%), one 2000-word take-home exam (40%)

Prescribed Reading:

Study materials available from the La Trobe Bookshop

LAW2LAM LAW AND MEDICINE (15. CPs Sem. TE-W05-07 BU.) *Dr Kerry Petersen*

Current enrolment in Bachelor of Laws

Medical law is an internationally recognised intellectual discipline and a field of legal practice which is founded on ethical theories, common law doctrines and human rights principles. It spans other areas of law (eg torts, criminal, family and administrative law) and must satisfy social policy developments, principles of governance, regulatory mechanisms and dispute resolution processes. In this Unit, medico-legal issues are discussed and evaluated in the context of a range of topics which include: ethical duties, consent to medical treatment (adults and children), legal competence and medical treatment (adults), human reproduction law and technologies, professional liability and medical malpractice, regulation of health professionals and end of life decision-making. Informed analysis of law is promoted by examining the case law and legislation together with group discussion. Students are equipped with skills relevant to policy developments and law reform.

Prerequisite: Completion of LAW11/12/22/2CRM and completion of or concurrent enrolment in LAW2TOR.

Incompatible unit: LST22/32HLM

Class requirements: Attendance and participation in five 7-hour block classes. Prerequisite readings before the commencement of the unit.

Assessment: One 4000-word Take-home assignment (100%)

Prescribed Reading:

Freckleton, I. and Petersen, K. *Disputes and Dilemmas in Health Law* Federation Press, 2006

McIlwraith, J. and Madden, B. *Health Care and the Law* 4th edn, Thomson Lawbook Company, 2006

LAW2LCL LEGAL CHANGE, LEGISLATION AND LAW REFORM (15. CPs Sem. TE-SEM-1 BU.) *Mr Jeffrey Barnes*

This unit is offered at third unit level also.

Current enrolment in Bachelor of Laws, or the permission of the Director of Undergraduate Studies

The chief tool for implementing legal change is legislation. This unit critically examines the technique of parliamentary legislation as an ongoing process of achieving social change. The 'life cycle' of legislation is fully examined – from its emergence, drafting and parliamentary phases to its post-enactment phases: its interpretation, implementation and impact. The strengths and limitations of legislation as an instrument of public policy and law reform are examined through the literature, case studies and research.

Prerequisite: Completion of LAW11LIM, or permission of the Director of Undergraduate Studies.

Incompatible unit: LAW10LCL

Class requirements: One 3-hour seminar per week.

Assessment: One 2700-word research essay (70%), one 1800-word tutorial workbook assignment. (30%)

Preliminary Reading:

Cranston, R. *Law, government and public policy* OUP, 1987

Prescribed Reading:

Barnes, J. *Legal change, legislation and law reform* La Trobe University current edn

LAW2LEC LAW OF THE EUROPEAN COMMUNITY (15 CPs Sem. TE-SEM-1 BU.) *Dr Gonzalo Villalta Puig*

In this unit, students will examine the legal system of the European Community (EC). The EC is the most important pillar of the European Union (EU).

In the first part of the unit, students will consider the constitutional, institutional and procedural law of the EC. Topics covered will include the origins and development of European integration; the institutions; the instruments, form and legal basis of EC powers; EC legislation and policy-making; the nature and effect of EC law; the relationship between EC law and national law and, general principles of EC law.

In the second part of the unit, students will consider the substantive law of the EC. Topics covered will include the 'four freedoms' guaranteed by the EC Treaty and on which the common market is based: the free movement of goods, free movement of workers,

freedom of establishment and to provide services, and free movement of capital.

Prerequisite: LLB Students: Completion of LAW11LIM and LAW12/22/32PPL, or HIS21/31EUU, or permission of Unit Coordinator.

Non-LLB Students: Completion of HIS21/31EUU, or any first year legal studies or politics unit, or permission of Unit Coordinator.

Class requirements: One 2-hour lecture and one 1-hour seminar per week, for 13 weeks.

Assessment: One 2500-word essay (50%), One 2-hour examination (50%). 40% hurdle (i.e., minimum of 20 marks out of 50)

Prescribed Reading:

Chalmers, Damian, Hadjiemmanuil, Christos, Monti, Giorgio and Tomkins, Adam. *European Union Law* Cambridge University Press, 1st edn, 2006

LAW2MDC MENTAL DISORDER AND CRIMINAL RESPONSIBILITY (20. CPs Sem. TE-SEM-1 BU.) *Ms Marilyn McMahon*

This unit is offered at third unit level also.

Mental disorder is disproportionately high in offenders and this presents special issues in relation to the criminal defences and sentencing. This unit builds upon Criminal Law and comprises study of selected mental state defences (insanity/mental impairment; diminished responsibility; infanticide) and the defences of marital coercion and automatism. Principles of sentencing relevant to assessing the criminal culpability of mentally disordered offenders will also be considered. Attention is focused on the intersection of the criminal law and psychiatry/psychology and relevant issues are explored through discussion of leading cases. Students who undertake the subject will be encouraged to become familiar with contemporary approaches to mental disorder and to develop an understanding of current law and proposals for reform.

Prerequisite: Bachelor of Law Students: completion of LAW1LIM; Non LLB Students completion of psychology unit. Any second year legal studies or psychology subject.

Incompatible unit: LST30FPS

Class requirements: A three-hour lecture and case discussion each week.

Assessment: One 2000-word research problem (25%), one 3-hour final exam (75%)

LAW2MST MEDIATION: SKILLS AND THEORY (15 CPs Sem. TE-SEM-1 BU.)

Ms Clare Coburn, Ms Alikki Vernon

This unit is offered at third year level also.

In LAW11DRE Dispute Resolution, students were introduced to a staged, facilitative model of mediation that is fairly generic to the field. In this unit students will study a number of important issues confronting mediators, such as ethics, cultural issues and conflict theories, through selected reading and discussion. A particular focus will be on the theory and concepts underpinning an approach known as Transformative Mediation. In the transformative view, conflict is primarily about human interaction rather than 'violation of rights' or 'conflicts of interest'. The focus of this form of mediation is to support change in the human interaction between parties in conflict to enable clearer decisions and greater connection. Students will acquire competence in the particular micro-skills used in Transformative Mediation, which will also enhance their general communication skills and personal and professional self-awareness.

Prerequisite: LAW1DRE.

Class requirements: Attendance and participation at five 7-hour block workshops and prerequisite readings before first workshop.

Assessment: Journal of 1000 words (30%), 2000 word essay (40%), Skills video and 1000 word commentary (30%)

Prescribed Reading:

Bush, R.A.B. & Folger, J.P. *The Promise of Mediation: The Transformative Approach to Conflict* Jossey-Bass Inc. San Francisco 2004

LAW20IC ORGANISED AND INTERNATIONAL CRIME (20. CPs Sem. TE-SEM-2 BU.) *Dr Chris Corns*

This unit is offered at third unit level also.

In this unit students will cover subject matter relating to 'organised' crime in the domestic context and 'international' crimes in a global context. These categories of crime can be described as 'extra-ordinary' and pose significant difficulties for traditional law enforcement models and in terms of cooperative arrangements between jurisdictions. Students examine how States (within Australia and internationally) are developing new legislative (and other) strategies to overcome jurisdictional and political difficulties in responding to these forms of crime. Students will examine the genealogy, structure and jurisdiction of the new International Criminal Court in relation to universal crimes such as genocide, acts against humanity and war crimes. Students also consider implications of international developments in these areas for Australia. In conclusion, students will compare common law, non-common law and international 'models' of criminal investigation, prosecution and adjudication

Prerequisite: Bachelor of Laws students: completion of LAW1LIM

Bachelor of Legal Studies students: completion of LST12CLS.

Class requirements: One 2-hour lecture per week and one 2-hour seminar per fortnight.

Assessment: One 30-minute class presentation (30%), one 350-word paper proposal (10%), one 2500-2650 word essay (60%)

Recommended Reading:

LAW2PAL PSYCHOLOGY AND LAW (15. CPs Sem. TE-W48-S1 BU.) *Ms Marilyn McMahon*

This unit is offered at third unit level also.

Current enrolment in Bachelor of Laws

A bridge between psychology and the criminal law is provided through discussion and evaluation of the ways in which social and behavioural researchers have investigated and analysed legal phenomena. The processes of investigating a criminal event, bringing the matter to trial, and decision-making regarding guilt and disposition, are explored from a psychological perspective. Relevant literature regarding eyewitness testimony, interviewing of witnesses, interrogation of suspects, confessions, lie detection, forensic hypnosis, expert testimony, and jury decision-making is utilised. Pertinent case law and statutes are also considered.

Prerequisite: Completion of LAW1LIM and LAW11/12/22/32CRM.

Incompatible unit: LST20/30PAL, L3PAL.

Class requirements: One 2-hour lecture and one 1-hour seminar per week.

Assessment: One 1000-word research assignment (25%), one 3-hour open book final exam (75%)

Prescribed Reading:

Kapardis, A. *Psychology and law: a critical appraisal* Cambridge UP 2002.

LAW2PIL PUBLIC INTERNATIONAL LAW (15. CPs Sem. TE-SEM-1 BU.) *Dr Savitri Taylor*

This unit is offered at third unit level also.

Offered subject to sufficient enrolments. This unit is no longer available with a Legal Studies code (LST22/32PIL) but is still available with a LAW code to Legal Studies students who meet the prerequisites from any Faculty. Alternatively, current enrolment in Bachelor of Laws.

Offered subject to sufficient enrolments. This subject is no longer available with a Legal Studies code (LST22/32PIL). In this unit students will be introduced to the basic concepts and doctrines of international law. Students will be given an understanding of how international law impacts upon the domestic legal system. They also will be equipped to reflect on domestic and international political events from an 'international rule of law' perspective. Substantive

topics covered in lectures and seminars include the creation and recognition of states, state responsibility for actions which impact on other states, the peaceful resolution of international disputes and the use of force under international law.

Prerequisite: Completion of any first year law or legal studies or politics unit, or permission of coordinator

LLB students: completion of LAW11LSC, LAW11CRM,

LAW12CNM and LAW12ILR. Non LLB students: completion of any first year legal studies or politics subject or permission of coordinator.

Incompatible unit: LAW10PIL, LST22/32PIL

Class requirements: One 1-hour lecture and one 2-hour seminar per week.

Assessment: Two 2,250-word essays (100%)

Preliminary Reading:

Triggs, G. *International Law: Contemporary Principles and Practices* Lexis Nexis Butterworths, 2006

LAW2PLP PUBLIC INTEREST LAW PRACTICE (15. CPs Sem. TE-SEM-1 BU.)

Ms Judith Dickson, Ms Mary Anne Noone

This unit is offered at third unit level also.

Current enrolment in Bachelor of Laws: Entrance into the course is by application only. Application forms are available from the General Office School of Law, Social Sciences Room 229. They can also be downloaded from the School's home page

In this unit students experience public interest law in practice and reflect critically on the work and obligations of lawyers and the operation of the legal system. Students spend 12 days at the placement site (normally one day a week), have a designated site supervisor and have regular meetings with an academic supervisor. In the seminars the scope, practice and ethical aspects of public interest lawyering is explored. In the supervised tutorials students reflect on, compare and contrast their placement experiences

Prerequisite: Completion of 120 credit points of LAW units for Graduate LLB students; completion of 240 credit points of LAW units for Undergraduate LLB students.

Quota: 20. Ballot with preference to final year students.

Class requirements: One 2-hour seminar and one 1-hour supervision tutorial per fortnight, plus 12 days on placement.

This unit is not available for Study Abroad students.

Assessment: One 3000-word written assignment (50%), five reflective journals approximately 250 words each. (10%), performance according to criteria provided to student and host organisation prior to placement (35%), class participation (5%)

LAW2PPL PRINCIPLES OF PUBLIC LAW (15 CPs Sem. TE-SEM-2 BE, BU.)

BE: Ms Frances Gibson, BU: Dr Oliver Mendelsohn, BU: Dr Steven Tudor

This unit is offered at third unit level also.

Current enrolment in Bachelor of Laws

Students explore the principles of Australian public law. It provides a general foundation for particular units in public law as well as private law. The main topics are rights, the rule of law, separation of powers and checks and balances, federalism, parliamentary supremacy, representative government, responsible government and governmental conventions, accountability of the executive to the law, republicanism and the Victorian Constitution. These are studied against the background of English and Australian constitutional history, and other legal systems. This unit, in conjunction with Constitutional Law, meets the requirements of the Council of Legal Education in the area of Federal and State Constitutional Law.

Prerequisite: Completion of LAW1LIM or permission of the Director of the Law program.

Incompatible unit: LAWCONM, LAW10CNM, LAW12CNM

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

This unit is not available for Study Abroad students.

Assessment: One 2.5-hour examination (60%), Tutorial workbook (40%)

Prescribed Reading:

 Waugh, J. *The rules: an introduction to the Australian constitutions* Melbourne University Press, 1996

LAW2RPS LEGAL RIGHTS, POVERTY AND LEGAL SERVICES (15. CPs Sem. TE-SEM-1 BU.) *Ms Mary Anne Noone*

Available to Bachelor of Laws students as a law elective

The scope and limits of improving access to justice are explored in this unit. The capacity of individuals to enjoy their rights is examined. The various approaches to delivering legal services for the poor and disadvantaged are critically analysed. A major focus is the development of Australia's community legal centres within the context of the Australian legal aid system. The current trends in the provision of legal aid services are examined and evaluated. Comparisons are made with developments in the USA, UK and Canada.

Prerequisite: LLB students: completion of first-year law; Non LLB students: completion of second-year and at least two second-year legal studies units.

Incompatible unit: L2RPS, L3RPS

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 1000-word tutorial paper (30%), one 2500-word take-home exam (50%), one 1000-word tutorial presentation (20%)

Prescribed Reading:

Noone M.A and Tomsen S. *Lawyers in Conflict Australian Lawyers and Legal Aid* Federation Press 2006

LAW2TOR LAW OF TORTS (20. CPs Sem. TE-SEM-1 BE, BU.) *BE: Dr*

Francine Rochford, BU: Mr Kenneth Warner

Current enrolment in Bachelor of Laws

In this unit students will be concerned primarily with the civil action in negligence through which the law provides for compensation in respect of injuries suffered of a physical and an economic nature. The working operations of the torts of nuisance, strict liability, trespass and defamation as well as the social interests affected by them are also examined. This unit meets the requirements of the Council of Legal Education for admission to practice in Victoria in the area of Torts.

Prerequisite: Completion of LAW11/22/32CRM and LAW12CNM or LAW12/22/32PPL or permission of the Director of Law Program.

Co-requisite: LAW21CNT.

Incompatible unit: LAW20TOR

Class requirements: Three hours of lectures and one 1-hour tutorial per week.

Assessment: One 1.5-hour take-home examination (25%), one 3-hour final examination (75%)

Prescribed Reading:

Anderson, R., Leo, S., McDonald, B., and Swanston, J. *Cases on Torts* Federation Press, 3rd edn, 2007

LAW3ACL ADVANCED CRIMINAL LAW (15 CPs Sem. TE-SEM-1 BU.) *Ms Marilyn McMahon*

Students in this unit will build on studies from Criminal Law and will study selected doctrines of the criminal law (strict liability; mistake; doctrines relevant to inchoate offences) and the substantive law relating to certain offences. The following offences are studied in detail: sex offences; public offences; and crimes of strict liability. Students will be encouraged to develop an understanding of current law and contemporary proposals for reform.

Prerequisite: LAW2CRM.

Recommended Prior Studies: LAW1LIM.

Class requirements: One three-hour lecture per week.

Assessment: One 2000-word essay (50%), one 2-hour final examination (50%)

LAW3ADM ADMINISTRATIVE LAW (20. CPs Sem. TE-SEM-2 BU.) *Mr*

Jeffrey Barnes, Dr Roger Douglas

Current enrolment in Bachelor of Laws.

In this unit students examine the legal limits on the exercise of power by public administrative agencies and the remedies available to aggrieved persons for challenging the decisions and conduct of such agencies. The review mechanisms include federal and state courts, the Administrative Appeals Tribunal, the Victorian Civil and Administrative Tribunal, and federal and state ombudsmen. Related rights which are examined are rights to access government information under freedom of information laws and the right to require the giving of reasons for decisions. Legal controls on the making of instruments of a legislative character are also examined. The unit has the further purpose of developing student proficiency in understanding and interpreting statute law. This unit, in conjunction with Principles of Public Law, meets the requirements of the Council of Legal Education for admission to practice in Victoria in the area of Administrative Law.

Prerequisite: Completion of either LAW21CNT, LAW21TOR or LAW31CPE or permission of the Director of Undergraduate Studies.

Class requirements: One 2-hour lecture and one 2-hour seminar per week.

Assessment: One 2500-word assignment (25%), one 3-hour examination (75%)

Prescribed Reading:

Douglas, R. *Administrative law*, Butterworths, current edn
 Douglas, R. *Douglas and Jones's Administrative Law*, Federation Press, current edn

LAW3ATL ADVANCED TAX LAW (15 CPs Sem. TE-W46-50 BU.) *Mr Keith Kendall*

Students in this unit will build upon the knowledge and skills developed in LAW3ITL Income Tax Law. Topics covered include goods and services tax (GST) and an introduction to Australia's international tax rules. The second half will cover special issues of current interest to practitioners.

Prerequisite: LAW3ITL.

Class requirements: One 2-hour lecture and one 1-hour workshop per week.

Assessment: One 2250-word essay (50%), one 2-hour examination (50%)

Prescribed Reading:

Ann Wardrop

See LAW2BFL for full unit description.

LAW3CIV CIVIL PROCEDURE (15. CPs Sem. TE-SEM-2 BU.) *Dr Roger*

Douglas

Current enrolment in Bachelor of Laws

An understanding of civil procedure is essential for those who want to rely on the authority of the courts to enforce legal claims. It is also essential for those who wish to resist such attempts, or for those who wish to understand the role of the judicial system in the delivery and non-delivery, of justice. This course ensures that students understand the processes whereby a legal claim is asserted or resisted in the civil courts and the relationship between these processes and the ease with which legal claims can be enforced through the courts. Students will gain knowledge of the Supreme Court (General Civil Procedure) Rules 2005 (Vic.), and of the way in which these rules are interpreted and applied. This unit meets the requirements of the Council of Legal Education for admission to practice in Victoria in the area of Civil Procedure.

Prerequisite: LAW1CRM, LAW2TOR and either LAW1CNM or LAW1PPL or permission of the Director of Undergraduate Studies.

Incompatible unit: LAW3CIVP, LAW30CIV

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 1500-word essay (30%), one 3-hour final examination (70%)

Prescribed Reading:

LAW3CPE CRIMINAL PROCEDURE AND EVIDENCE (20. CPs Sem. TE-SEM-

1 BU.) *Dr Chris Corns, Mr John Willis*

Current enrolment in Bachelor of Laws program

This unit examines the common law and statutory principles and technical rules which govern the proof of facts in issue in both civil and criminal adversarial proceedings. Evidentiary aspects of police investigation, including gathering of evidence and the power to arrest and interrogate suspects are considered. The course of evidence (examination-in-chief, cross-examination and re-examination), and the position of witnesses (the accused, experts and those in special relationships) is considered. The evidentiary aspects of curial proceedings including exclusionary rules, such as hearsay and privilege, inclusionary rules and their exceptions are considered in their forensic context. This unit in conjunction with Criminal Law meets the requirements of the Council of Legal Education for admission to practice in Victoria in the area of Criminal Law and Procedure. It also meets the requirements in the area of Evidence.

Prerequisite: LAW11/12/22/32CRM and LAW12CNM or LAW1/2/3PPL or permission of Director of Undergraduate Studies.

Class requirements: One 2-hour lecture and one 2-hour seminar per week.

Assessment: One 2-hour final examination (50%), one 2-hour oral (moot court) test (50%)

Prescribed Reading:

LAW3EQT LAW OF EQUITY AND TRUSTS (20. CPs Sem. TE-SEM-1 BU.)

Professor Roger Douglas, Ms Ann Wardrop

Current enrolment in Bachelor of Laws

Students are introduced to the doctrines and institutions of equity. Topics include the relationship between equity and common law, the nature of equitable rights, trusts (including their creation and variation, the duties and powers of trustees and the consequences of breach of trust), fiduciary obligations, confidential information and equitable remedies. This unit meets the requirements of the Council of Legal Education for admission to practice in Victoria in the area of Equity.

Prerequisite: Completion of LAW21/22CNT and LAW31/32PRP.

Incompatible unit: LAW30EQT

Class requirements: One 2-hour lecture and one 2-hour seminar per week.

Assessment: One 2000-word assignment (40%), one 3-hour final examination (60%)

Prescribed Reading:

LAW3IAM INTERNATIONAL ARBITRATION MOOT (15 CPs Sem. TE-W48-

09 BU.) *Professor Gordon Walker*

Upon completion of this unit, students will (1) have an exposure to aspects of international sale of goods, private international law, and comparative law; (2) develop a familiarity with and practice in arbitration; (3) develop oral skills of presentation of legal material before a panel of experts from different legal systems; (4) gain an appreciation of their own legal system, its limitations, and an appreciation of other legal systems and their limitation; (5) experience the thorough preparation of a particular case and the opportunity to match their preparation with that of other equally prepared students.

Class requirements: 3 hours seminars/workshops per week.

Assessment: Mooting (minimum 10 moots) (60%), Writing one (1) Respondent's Memorandum (Team) (40%)

LAW3IBL INTERNATIONAL BUSINESS LAW (15. CPs Sem. TE-SEM-2 BU.)

Dr Jianfu Chen

See *LAW2IBL* for full unit description.

LAW3ITL INCOME TAXATION LAW (15. CPs Sem. TE-SEM-2 BU.) *Mr Keith*

Kendall

Current enrolment in Bachelor of Laws or permission of the Director of Law Program

The aim is to provide students with an understanding of income taxation in Australia. Topics covered include the concept of income, assessable income, allowable deductions, taxation of entities, (companies, partnerships and trusts), timing issues and tax planning and anti-avoidance. The emphasis will be on the practical application of principles via a problem-focused approach, with broad policy issues also covered

Prerequisite: LLB students: completion of LAW21CNT or with approval from the unit coordinator.

Incompatible unit: LST20/30ITL.

Class requirements: One 2-hour lecture per week, one 1-hour seminar per week.

This unit is not available for Study Abroad students.

Assessment: 2500-word essay (40%), 2-hour open book examination (60%)

Prescribed Reading:

Fundamental tax legislation Australian Tax Practice, current edn Cooper, G. S., Deutsch, R. L. and Krever, R.E. *Income taxation: commentary and materials* 5th edn, Australian Tax Practice 2005

LAW3NEG NEGOTIATION (Subject to Approval) (20. CPs Sem. TE-W47-06 BU.) *Professor Tania Sourdin*

The emphasis for this unit will be on the theory and practice of negotiation, with some consideration given to how what is learned also is applicable to mediation. Students will devote about half of class time to specific case studies and related exercises in negotiation. The remainder will be spent on skills exercises, consideration of theoretical issues and discussion of class reading.

Prerequisite: LLB and BLS Students: completion of LAW11LIM and LST31DRE or LAW11DRE.

Special conditions: Bachelor of Laws students are permitted to enrol in this subject as a law elective. Alternatively current enrolment in Bachelor of Legal Studies.

Incompatible rules: LAW32NAM, LST2/3NEG

Class requirements: Attendance and participation at five 7-hour block workshops (9.30 am–4.30 pm) and prerequisite readings before the first workshop

Assessment: Completion of two journals totalling 4500 words (55%), skills examination (35%) and class participation (10%)

Prescribed Reading:

LAW3PRP PROPERTY LAW (20. CPs Sem. TE-SEM-2 BU.) *Professor Lee*

Ann Bassar, Mr Anthony O'Donnell, Dr Savitri Taylor

Current enrolment in Bachelor of Laws

Private property is a key concept of all western political and legal systems. Students examine the way the Australian legal system uses the concept of property to resolve disputes about access to and allocation of resources. Students study the rules and principles relating to the creation and enforceability of proprietary interests. Themes include: the nature of property interests, the support afforded proprietary interests by law and the ordering of interests within and beyond property law. Topics covered are the development of the concept of private property, the fragmentation of proprietary interests by reference to time, space, nature of the interest, nature of title, sphere of enforceability, the acquisition and transfer of proprietary interests, statutory schemes of registration, concurrent ownership, leases, and mortgages and securities. This unit meets the requirements of the Council of Legal Education for admission to practice in Victoria in the area of Property.

Prerequisite: Completion of LAW21/22CNT.

Incompatible unit: LAW30PRP

Class requirements: Two 1.5-hour lectures and one 1-hour tutorial per week.

Assessment: One 2000-word assignment (40%), one 3-hour examination (60%)

Prescribed Reading:

Bradbrook, A., MacCallum, C. & Moore, A., *Australian Real Property Law* 4th edn Thomson LBC, 2007.

Recommended Reading:

LAW4COR CORPORATIONS LAW (20. CPs Sem. TE-SEM-1 BU.) *Professor*

Vivien Goldwasser, Professor Gordon Walker, Mr David Wishart

Current enrolment in Bachelor of Laws

Students are introduced to the fundamentals of this unit through an examination of some of the principal incidents of modern

corporations and securities law. There is a concern both to situate the law contextually and to emphasise the practical operation of the law in its social setting. Topics include the constitutional and administrative context of the Corporations Act, incorporation and its effects, corporate governance, various methods of financing including equity and debt, and external administration. This unit meets the requirements of the Council of Legal Education for admission to practice in Victoria in the area of Company Law.

Prerequisite: LAW31/32PRP and completion of or concurrent enrolment in LAW31EQT or permission of Director of Undergraduate Studies.

Incompatible unit: LAW40COR

Class requirements: One 2-hour lecture and one 2-hour seminar per week.

Assessment: One 2000-word assignment (30%), one 3-hour examination (70%)

Prescribed Reading:

LAW4INT LEGAL INTERNSHIP (15 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU. TE-W21-25 BU. TE-W48-09 BU.) *Professor Gordon Walker*

Approval from Head, School of Law

Legal Internship allows students to complete a critical piece of legal research and analysis under academic supervision based on an approved internship.

Class requirements: The research will be conducted under the direction of an approved academic supervisor.

Assessment: Research paper 4500 words (100%)

LAW4LPC LEGAL PRACTICE AND CONDUCT (15. CPs Sem. TE-SEM-2 BU.)

Ms Mary Anne Noone

Current enrolment in Bachelor of Laws.

Ethical legal practice and conduct are the primary focus of this unit. This includes examining the legal practitioner's duty to the administration of law, the courts, clients and fellow practitioners, issues of personal and professional conduct and basic trust accounting. The context for this study is the issue of access to justice and recent reforms in the legal profession. Students are encouraged to reflect on how a legal practitioner's duties and ethics are relevant to daily legal practice, as well as on the efficacy of law, the legal system, the legal profession and the nature of justice. This unit meets the requirements of the Council of Legal Education for admission to practice in Victoria in the area Professional Conduct.

Prerequisite: Completion of this unit in the penultimate or final year of the law programme is desirable.

Incompatible unit: LAW40LPC, LAW41/42LPP

Class requirements: One 1-hour lecture and one 2-hour seminar per week.

Assessment: One 2000-word assignment (40%), one 2500-word take-home exam (60%)

LAW4LPP LEGAL PRACTICE AND CONDUCT CLINICAL PLACEMENT (30.

CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Ms Judith Dickson*

Entrance into the course is by application only. Application forms are available from The General Office, School of Law, Social Sciences Building room 229 or can be downloaded from the School's homepage.

Ethical legal practice and conduct are the primary focus of this unit. This includes examining the legal practitioner's duty to the administration of law, the courts, clients and fellow practitioners, issues of personal and professional conduct and basic trust accounting. The context for this study is the issue of access to justice and recent reform to the legal system, in particular the legal profession. Additionally, students are placed in a legal aid environment where they have the opportunity to be practically involved in legal practice under supervision. Students are encouraged to reflect on how a legal practitioner's duties and ethics are relevant

to daily legal practice, as well as on the efficacy of law, the legal system, the legal profession and the nature of justice. This unit meets the requirements of the Council of Legal Education for admission to practice in Victoria in the area Professional Conduct.

Prerequisite: Completion of LAW1LIM, LAW1DRE, LAW2CRM and completion of or concurrent enrolment in LAW31CPE.

Co-requisite: LAW31CPE.

Incompatible unit: LAW40LPC, LAW41/42LPC.

Quota: 12.

Class requirements: One 2-hour seminar, one 1-hour tutorial and clinical placement (minimum eight hours) per week.

This unit is not available for Study Abroad students.

Assessment: One 2000-word assignment (20%), One 2500-word case study (25%), One trust accounting exercise (5%), Supervised performance in clinical placement (50%). For more detailed information please refer to subject outline provided in first lecture.

LAW4THA LAW HONOURS THESIS PART A (15 CPs Sem. TE-SEM-1 BU.)

Professor Jianfu Chen

This unit is offered in another semester. Current enrolment in Bachelor of Laws Program and invitation to undertake Honours in Law.

Within the Bachelor of Laws program, Honours is generally undertaken as part of the final year of law studies. It is not an additional year, as in the case of most other degrees such as the Bachelor of Arts or Bachelor of Science. The honours year is by application and is usually determined after completion of the second year of studies. It includes the research and writing of a 10,000 word thesis (which counts as two law electives) on a topic to be approved by the Honours Research and Graduate Studies Committee. Students enrol in Law Thesis Part A (LAW4THA) in Semester one and Law Thesis Part B (LAW4THB) in Semester two.

Prerequisite: Enrolment in Bachelor of Laws Honours Program.

Class requirements: N/A.

Assessment: Thesis (100%)

LAW4THB LAW HONOURS THESIS PART B (15 CPs Sem. TE-SEM-2 BU.) *Dr*

Roger Douglas

This unit is offered in another semester. Current enrolment in Bachelor of Laws Program and invitation to undertake Honours in Law.

Within the Bachelor of Laws program, honours is generally undertaken as part of the final year of law studies. It is not an additional year, as in the case of most other degrees such as the Bachelor of Arts or Bachelor of Science. The honours year is by application and is usually determined after completion of the second year of studies. It includes the research and writing of a 10,000 word thesis (which counts as two law electives) on a topic to be approved by the Honours Research and Graduate Studies Committee. Students enrol in Law Thesis Part A (LAW4THA) in Semester one and Law Thesis Part B (LAW4THB) in Semester two.

Prerequisite: Enrolment in Bachelor of Laws Honours Program.

Class requirements: N/A.

Assessment: Thesis (100%)

LST1BSL BUSINESS LAW (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEM3 SY. TE-SEM-1 BE, BU, MI, SH. TE-SEM-2 AW, BU, CH. TE-W31-46 NI.)

Dr Chris Chadien, Professor Vivien Goldwasser, Mr Keith Kendall, Mr Terry Reid

This unit is not available to Bachelor of Laws students as a law elective or to students who have completed LAW21/22CNT.

This unit is offered in another semester.

Bachelor of Business Students should enrol in this subject.

In this unit students examine legal institutions and practices such as law making and interpretation of laws. The law of contract and its place in commercial law, notably the law of the sale of goods, comprise the body of the unit. Other kinds of civil liability such as

fault liability are compared. Students examine the economic and political factors which have influenced the development of this law and assesses the impact of the law on business and industrial activity.

Incompatible unit: LAW21/22CNT, LST11/12LCC, LST11/12IBL

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 1500-word essay (30%), one 3-hour examination (70%). Students must achieve at least a mark of 40% for the final examination.

LST2LBA LAW OF BUSINESS ASSOCIATION (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TE-SEM-1 AW. TE-SEM-2 BE, BU, MI, SH. TE-W31-46 NI.) *Dr*

Chris Chadien, Mr David Wishart

This unit is offered at third unit level also.

Not available to Bachelor of Laws students as a law elective

In this unit students deal with the key features of the legislation and cases which govern the formation and regulation of business associations (particularly corporations) and the operation of securities markets in Australia. There is an explanation of how these laws operate on the economy and society at large and on persons and institutions within society, along with how persons and institutions may best utilise these laws. Students completing the unit should be able to apply rules and principles extracted from the legislation and cases to resolve disputes arising from the operations and functioning of business associations and the workings of securities markets.

Prerequisite: Completion of LST11/12LCC or LST11/12IBL or LST11/12BSL.

Incompatible unit: LST12LBA, LAW41COR

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: 1000-word assignment (20%), 3-hour open book examination (70%), tutor's assessment (10%). AW: 500-word assignment

Prescribed Reading:

LST2MAL MARKETING LAW (15 CPs Sem. TA-ACNSEM2 SY. TE-SEM-2 BE, BU, OS.) *BE: Dr Francine Rochford, BU: Ms Michelle Harper*

This unit is offered at third unit level also.

Not available to Bachelor of Laws students as a law elective.

Bachelor of Business students are encouraged to enrol in this unit at third year.

The ways in which the law affects marketing activities are examined. A number of specific legal issues relevant to the marketing of goods and services are identified such as various selling techniques, intellectual property, restrictive trade practices, privacy, electronic commerce and anti-spam laws. The unit is designed to raise students' awareness of the issues and develop their skills to achieve compliance with the law.

Prerequisite: Completion of LST11/12LCC or LST11/12IBL or LST11/12BSL or LST2THL or LAW21/22CNT. Completion of LST12/22/32LBA or another first or second year legal studies subject is highly recommended.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: BE: one 2500-word essay (55%) and one 2000-word essay (45%) (100%), BU: one 1500-word assignment (25%) and one 2-hour final examination (75%) OR one 3-hour final exam (100%). Bundoora students may choose between the two assessment options: (a) is 25% and 75% and (b) is 100%. , ACN: one 1500-word assignment (30%) and one 2-hour final examination (70%) (100%)

LST2SLA SPORT LAW (15. CPs Sem. TE-SEM-2 BU.) *Dr TBA by Law*

In this unit students will examine those aspects of the law that specifically affect sport and leisure management. Specific areas of law that apply to sport and leisure to be covered include the law of non-profit sporting organisations, liability for sporting injury and damage, sport and media law, and sport and leisure marketing. The Trade Practices Act as well as other relevant legislation will be studied especially with regard to the implications for professional sport and community based leisure activities.

Prerequisite: Nil.

Co-requisite: Nil.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

This unit is not available for Study Abroad students.

Assessment: Tutorial activities (20%), One 1500-word assignment (30%), one 2-hour examination (50%)

The school offers a broad curriculum in the fields of business, hospitality, tourism, and sport and leisure. Some units are taught in conjunction with other disciplines of the university.

The courses have been designed to produce future leaders and managers for the sport, tourism, leisure and hospitality industries. Students are provided with a range of skills giving them practical skills and theoretical knowledge covering aspects of leisure-related services.

The school offers a diverse postgraduate program. Enquiries regarding the availability of postgraduate diploma, masters by research and PhD studies should be directed to the school, or the Postgraduate Handbook.

Before enrolling or re-enrolling, students should consult any supplementary information issued by the school. The school has appointed members of the academic and general staff as student advisers. They are available throughout the year to advise students on problems that may arise concerning their studies. Details of student advisers may be obtained from the school. Courses offered by the school are described below.

Sport, Tourism and Hospitality Management courses

Note: All courses in the School of Sport, Tourism and Hospitality Management are currently under review.

Bendigo

- Bachelor of Business (Tourism and Hospitality)¹
- Honours Year (Bundoora)

Key: ¹ Please refer to the Bendigo chapter in this Handbook..

Bachelor of Business (Sport and Leisure Management) – Bundoora (LBBSL)

Admission requirements

Prerequisite requirements are VCE Units 3 and 4 and a study score of at least 20 in English.

Degree requirements

Students must complete a course of units accumulating a minimum of 360 credit points (24 units). All core units are worth 15 credit points each. The course is designed to be completed in three years of full-time study, although part-time study is possible. Part-time study is encouraged for students working more than 15 hours per week.

Course structure

This course provides professional education in sport and leisure management. The course comprises core units, school electives and free electives. The specialisation available in this degree is Sport Management. The following course structure applies to students enrolling for the first time in 2008. Students progressing to second and third year must consult the school for details of their progression requirements. Unless noted, all units are worth 15 credit points.

Note: Students who commenced prior to 2005 or who enter with significant advanced standing should consult the school for further details regarding their course structure.

Bachelor of Business (Tourism and Hospitality) – Bundoora (LBBTH)

Admission requirements

Prerequisite requirements are VCE Units 3 and 4 and a study score of at least 20 in English.

Degree requirements

Students must complete a course of units accumulating a minimum of 360 credit points (24 units). All core units are worth 15 credit points each. The course is designed to be completed in three years of full-time study, although part-time study is possible. Part-time study is encouraged for students working more than 15 hours per week.

Course structure

The course comprises core units, school electives and free electives. The third year specialisation available in this degree is Event Management. The tourism and hospitality courses seek to blend vocational training with a broad education for the industry's future leaders. The Bachelor of Business (Tourism and Hospitality) combines the skills needed for hospitality and tourism supervision with business management and an understanding of the dynamics of the tourism industry.

The following course structure applies to students enrolling for the first time in 2008. Unless noted, all units are worth 15 credit points.

Note: Students who commenced prior to 2003 or who enter with significant advanced standing should consult the school for further details regarding their course structure.

UNIT DESCRIPTIONS**THS1AOM ACCOMMODATION OPERATIONS MANAGEMENT** (15 CPs

Sem. TE-SEM-2 BU.) *Ms Meg Houghton*

Available to B.Bus (Tourism and Hospitality) and B.Bus (Hospitality Management) students only. All students are required to buy/provide and wear the following to all practical classes: *Black shoes and socks/tights, *Black trousers/skirt, *Black shirt (long or 3/4 sleeves), *La Trobe University name badge, *White polo shirt (no insignia). Note: * also required for students completing THS1FBS.

This unit builds on the professional skills required for the hospitality industry that were introduced in THS1FBS. It provides students with an introduction to the skills, knowledge and techniques required to manage and maintain an accommodation department in all types and sizes of hospitality operations, both public and private. Students will gain an understanding of front office and accommodation reservation systems including an introduction to a computerised reservation system. Additionally there is a strong emphasis on acquiring practical operational skills provided by the requirement to undertake work placement experience at a commercial property.

Prerequisite: THS1FBS.

Co-requisite: THS1FBS.

Incompatible unit: THS10IAM or THS11IAM

Class requirements: One 2-hour lecture per week, five 2-hour tutorials, 21 hours work placements, and one 3-hour practical laboratory. All students must achieve at least 40% of the total marks available in the final examination. All assessment tasks must be undertaken to obtain a final assessment result with an overall final score of at least 50% obtained.

Assessment: One 2500-word group assignment (25%), one 2-hour examination (50%), one placement participation journal and report (10%), Software application test (15%)

THS1FBB FOOD AND BEVERAGE SERVICES 1B (15. CPs Sem. TE-SEM-1

BU.) *Coordinator to be advised*

Not available in 2008

THS1FBS FOOD AND BEVERAGE SERVICE (15 CPs Sem. TE-SEM-1 BE, BU.)

BE: Dr Garry Price, BU: Mr Paul Strickland

Students are required to wear clothing as directed to all practical classes.

This unit introduces students to all areas of restaurant and 'front-of-house' operations, ensuring that the students have the knowledge and skills needed to identify and provide high quality service to clients. The unit introduces students to relevant industry issues including product promotions, hygiene, health and safety, responsible service of alcohol, current product knowledge and customer relations. Students are required to obtain a reasonable competence in food service techniques, along with the ability to operate a food and beverage outlet.

Prerequisite: None.

Class requirements: One 2-hour lecture, one 4-hour tutorial and practical per week. Minimum of 30 hours work experience at set locations.

Assessment: One 1800-word assignment (20%), one 3-hour practical skill assessment exercise (30%), one 2-hour final examination (50%)

THS1ILS INTRODUCTION TO LEISURE INDUSTRY STUDIES (15 CPs Sem. TE-SEM-1 BE, BU.) *BE: Dr Clare Lade, BU: Ms Sonia Francis, BU: Dr Elspeth Frew*

In this unit students develop a comprehensive overview of the leisure, tourism and hospitality industries in Australia. The primary objective is to create an awareness of the breadth and diversity of the industry, and the social, cultural, political and economic interests and activities it encompasses. The course is designed to ensure that students can: analyse the various components which form the leisure industry; appreciate the interlinkage of the major sector, locate and utilise leisure industry resources; examine the organisation, management and structure of the industry, and assess and understand the various impacts which result from leisure, tourism and hospitality.

Prerequisite: None.

Co-requisite: None.

Incompatible unit: THS10ITH

Class requirements: One 2-hour lecture and one 1-hour seminar per week.

Assessment: One 10-minute class presentation (15%), one 1500-word report (20%), assessment exercises (15%), one 2-hour examination (50%)

Prescribed Reading:

School of Sport, Tourism and Hospitality Management *THS1ILS, Introduction to Leisure Industry Studies Readings*, 2008 La Trobe University

THS1ISB INTRODUCTION TO SPORT BUSINESS (15 CPs Sem. TE-SEM-1 BU.) *Mr Paul Emery*

In this unit students will explore different ways of conceptualising sport, and describe and explain patterns of sport and leisure participation and consumption in Australia and around the world. Students will be taken from appreciating the impact of globalisation on business and the business of sport in particular to applying this knowledge at a domestic level. In the unit students will examine a three sector model of the Australian sport industry (private, public and non-profit), examine the relationship between the sport industry and different levels of government, and consider the implications of this relationship for sport provision in a mixed economy.

Prerequisite: Nil.

Co-requisite: Nil.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: Two 750-word tutorial exercises (50%), one 2500-word assignment (50%)

Prescribed Reading:

Westerbeek, H. and Smith A. *Sport business in the global marketplace* (2002) Palgrave Macmillan: London

THS1ISM INTRODUCTION TO SPORT MANAGEMENT (15 CPs Sem. TE-SEM-2 BU.) *Dr Matthew Nicholson*

This unit provides students with a comprehensive introduction to the practical application of core sport management principles, including strategic sport management, organisational structures, human resource management, leadership, organisational cultures, governance and performance management. These principles and their application are contextualised within a discussion of the role of the state, non-profit management and professional sport.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 1000-word assignment (20%), ten 150-word tutorial exercises and participation (30%), one 2-hour examination (50%)

Prescribed Reading:

Hoye, R., Smith, A., Westerbeek, H., Stewart, B., Nicholson, M. (2006) *Sport Management: Principles and Applications* Butterworth-Heinemann, London.

THS1ITH INTRODUCTION TO TOURISM AND HOSPITALITY STUDIES (15 CPs Sem. TE-SEM-2 BU.) *Dr Elspeth Frew*

Not available in 2008

THS1LEM LEISURE INDUSTRY ENTERPRISE MANAGEMENT (15 CPs Sem. TE-SEM-2 BU.) *Mr Gary Best*

In this unit students are introduced to management concepts and investigate a range of management issues in the leisure industry enterprise context, exploring whenever possible an entrepreneurial approach to such issues. Students will explore topics such as the principles of organisation theory, planning and establishment of operational procedures (such as health and safety systems), risk management, management of service quality within the context of leisure industry needs and customer expectations.

Prerequisite: None.

Co-requisite: None.

Incompatible unit: MGT10FOM

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 10-minute tutorial presentation and assessment (10%), one 1250-word essay (20%), one 2-hour final examination (60%), one 250-word case study (10%)

Prescribed Reading:

Lashley, C. and Lee-Ross, D. (2003) *Organisation Behaviour for Leisure Services* Butterworth Heinemann, London.

THS1LFO LEISURE FACILITIES OPS (15 CPs Sem. TE-SEM-1 BU.) *Dr Russell Hoye*

Not available in 2008

THS1LIS LEISURE INFORMATION SYSTEMS (15 CPs Sem. TE-SEM-1 BU.)

Ms Meg Houghton

All students must achieve at least 40% of the total marks available in the final examination. All assessments tasks must be undertaken to obtain a final assessment result with an overall final score of at least 50% obtained.

This unit will provide students with an understanding of the role of information systems in the management of organisations and in particular modern leisure businesses. It will develop students' understanding of the different tools available within a computer based information system and illustrate the importance of ethics for knowledge workers in the business environment. In addition this unit will familiarise students with the E-Commerce and disseminate the skills required to create and construct a Website.

Prerequisite: None.

Co-requisite: None.

Incompatible unit: BUS20CRS or BUS21CRS

Class requirements: One 2-hour lecture per week and one 2-hour tutorial per week for six weeks.

Assessment: One 2-hour in class mid-semester assessment (30%), one 1200-word major project (25%), one 2-hour final examination (45%)

THS1LTM LEISURE AND TOURISM MARKETING (15 CPs Sem. TE-SEM-2 BU.) *Dr Sue Beeton*

Students are introduced to the principles of marketing and their application to the unique characteristics of the leisure, tourism and hospitality industry. The unit will emphasise an understanding of leisure and tourism consumer behaviour, the role of the travel trade, the distinguishing features of the leisure, tourism and hospitality product, the pivotal role of the destination, and the importance of a strategic planning perspective to leisure and tourism marketing operations.

Prerequisite: None.

Co-requisite: None.

Incompatible unit: MKT20MPP, THS21THM

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2-hour examination (50%), One group assignment * (requires individuals to contribute the equivalent to a 2000 word report) (40%), Tutorial assessment exercises (10%)

THS1MCO MANAGEMENT COMMUNICATIONS (15 CPs Sem. TE-SEM-1 BE, BU.) *BE: Dr Garry Price, BU: Dr Caroline Winter*

This unit is offered at another campus and in another semester.

This unit provides students with a foundation in communication theory and its application to business and management contexts. On completion of this unit students should be able to: understand the principles of effective communication both written and oral and to apply those principles in a range of contexts; reflect on their own communication skills and the underlying values which shape them; understand the importance of sensitivity and awareness in intercultural communication; demonstrate a capacity to make a professional presentation; demonstrate the ability to write fluently and in a style appropriate to the purpose of the writing and the intended audience and understand and demonstrate the ability to work in teams.

Incompatible unit: MGT21MCW, MGT21/22BCO

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: BU: One 2-hour examination (50%), BU: One group activity (10%), BU: One 1500-word research report (20%), BU: One 1000-word essay (10%), BU: Tutorial performance (10%), BE: one 2-hour examination (50%), BE: one group activity (15%), BE: one 1000-word research report (15%), BE: one 1000-word team task report (15%), BE: tutorial performance (5%)

Prescribed Reading:

THS1TCR TOURISM COMPUTER RESERVATION SYSTEMS (15 CPs Sem. TE-SEM-2 BU.) *Ms Meg Houghton*

Available to B.Bus. (Tourism Management) students only

This unit completes the introductory training in reservations and ticketing procedures for the travel industry using automated processes. The unit is designed to deliver both vocational skills in operating and managing global reservations and ticketing systems, along with a conceptual understanding of how the process works to maintain the information needed by travellers, travel retailers, travel operators and destination managers. An industry recognised certificate will be issued upon successful completion of the Global Reservation Systems Component.

Prerequisite: THS11ILS, THS11TTO.

Incompatible unit: THS10TRB

Class requirements: One 2-hour computer practical or tutorial and one 1-hour seminar per week.

Assessment: Seminar assessment exercises (20%), one 2-hour final examination (80%)

Prescribed Reading:

Tourism and Hospitality *Galileo Work Book* La Trobe University

THS1TRT TOURISM RESERVATIONS AND TICKETING (15 CPs Sem. TE-SEM-1 BU.) *Ms Meg Houghton*

Not available in 2008

THS1TTO TRAVEL AND TOUR OPERATIONS (15 CPs Sem. TE-SEM-1 BU.)

Ms Meg Houghton

Available to B.Bus. (Tourism Management) students only. All students must achieve at least 40% of the total marks available in the final examination. All assessment tasks must be undertaken to obtain a final assessment result with an overall final score of at least 50% obtained.

This unit introduces students to the travel industry and the operation and management of tours and their components.

It aims to provide the student with an understanding of the many business aspects of the travel industry including management issues relating to the establishment and conduct of travel agencies, tour operations and transport. Issues addressed include the management of travel operations, customer service, tourism geography, transport management and the development of travel products, packaging, regulatory requirements, technological sources of information and travel documentation procedures. Students will design and develop an itinerary for a tour within specified guidelines.

Prerequisite: None.

Co-requisite: None.

Incompatible unit: THS11TRT

Class requirements: One 1-hour lecture and one 2-hour tutorial/practical per week.

Assessment: One 2-hour examination (55%), one 20-minute presentation (15%), tutorial participation (10%), one 1000-word assignment (20%)

Prescribed Reading:

Frost, W. *Travel and Tour Management* Pearson Hospitality Press

THS2ELS ENTREPRENEURSHIP IN THE LEISURE SECTOR (15 CPs Sem. TE-SEM-1 BU, OS.) *Dr Elspeth Frew*

This unit examines the nature and process of entrepreneurship, characteristics of entrepreneurs in the leisure sector and focuses on creativity and innovation. Particular emphasis will be given to the entrepreneurial skills of exploiting opportunity and using creativity and innovation to provide a competitive advantage in the expanding leisure industry sector. The concepts of creativity lateral thinking, networks, innovation and factors relating specifically to the leisure industry that encourage change will be key components of the lectures and tutorials.

Prerequisite: None.

Co-requisite: None.

Incompatible unit: THS30EIT

THS30EIT, THS31/33EIT, OR THS23ELS

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2-hour final examination (50%), one 1000-word research essay (20%), Tutorial exercises (30%)

Prescribed Reading:

Lowe, R. and Marriott, S. (2006) *Enterprise: Entrepreneurship and innovation. Concepts, contexts and commercialization*. Elsevier Butterworth-Heinemann, Oxford

THS2ETI ECONOMICS FOR THE TOURISM AND LEISURE INDUSTRY

(15 CPs Sem. TE-SEM-1 BU, OS. TE-SEM-2 BU.) *Dr Ewen Michael*

This unit is offered in another semester. The curriculum for this unit is subject to substantial revision in 2008.

This unit provides students with an understanding of basic economic concepts and methods necessary for analysing issues specific to the wider tourism and leisure industries. The unit introduces key elements of macro and microeconomic theory for such concepts as demand and supply, consumer behaviour, market structures, costs and profits, aggregate analysis and the role of economic policy, particularly as it affects the tourism, hospitality and leisure industries. General macroeconomic concepts (such as the aggregate level of tourism demand, tourism exports, income and employment generation, multiplier effects) within which these industry sectors operates are also covered. This introductory unit integrates various branches of economic theory with the relevant analytical tools to better understand the economic organisation of the industry and the market system in which it operates.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Tutorial assignments (20%), one 2-hour final examination (60%), one 1-hour mid-semester test (20%)

Prescribed Reading:

Sloman, J. and Norris, K. (2005) *Principles of Economics* Pearson

THS2HEM HOSPITALITY ENTERPRISE MANAGEMENT (15 CPs Sem. TE-SEM-2 BU.) *Ms Sonia Francis*

Entry restricted to BBus (T&H) students.

The unit builds on the student's operational and management skills developed in the first year of the program. The student is provided with an opportunity to develop sound hospitality management principles through a structured industry placement program. Practical organisational management principles are applied to the specialist areas of hospitality and tourism. Topics include principles of hospitality management, planning and establishment of systems and procedures, implementation of health, safety and security procedures, development of operational plans, the management of workplace

relations, leadership and people management.

Prerequisite: THS11FBA, THS11FBB, THS12AMO/11AMO, THS11IAM

THS11FBS, THS12AOM, THS21THO, THS11ILS.

Class requirements: One 1-hour lecture and one 1-hour tutorial per week plus a structured industry placement program.

Assessment: One 1500-word assignment (30%), one 2-hour examination (30%), one 1500-word industry placement assignment (40%)

Prescribed Reading:

Miller, J.E., Walker, J.R., and Drummond, K. *Supervision in the hospitality industry*. 5th Edn Wiley and Sons (2007)

Not available in 2008

THS2SFE SPORT FACILITY AND EVENT MANAGEMENT (15. CPs Sem. TE-SEM-1 BU.) *Mr Paul Emery*

Students will be equipped with the theories and practices required for the effective management of sport and leisure facilities and events. In particular, students will be provided with the analytical skills needed to critically review potential best practices for the successful operation and management of sport and leisure facilities and events. Students will be expected to develop sound planning and management approaches for the diverse range of sport and leisure facilities and events in Australia.

Prerequisite: Nil.

Co-requisite: Nil.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: Tutorial activities (30%), one 3000-word assignment (70%)

Prescribed Reading:

Westerbeek, H., Smith, A., Turner, P., Emery, P. and Van Leeuwen, L. *Sport Facility and Event Management*. Allen and Unwin, Sydney. (2005)

THS2SLM SERVICE INDUSTRY LABOUR MANAGEMENT (15 CPs Sem. TE-SEM-2 BU.) *Mr Wiley Sims*

This course provides students with an understanding of, and an ability to apply the principles of labour management to service operations with a particular emphasis on hospitality, tourism and leisure industry situations. This unit draws on knowledge and skills gained in first year programs and highlight the need to identify and develop the interpersonal skills of employees in the service industries. The topics covered include employee motivation, leadership and delegation, recruitment, training and development processes, succession planning and the management of labour turnover and absenteeism.

Prerequisite: THS11ILS or equivalent

THS11ILS or THS11ITH or equivalent.

Incompatible unit: None

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2000-word essay (40%), one 20-minute class presentation (20%), One 2-hour final examination (40%)

Prescribed Reading:

Stone, R.J. (2005) *Human Resource Management*, 5th edn Wiley and Sons, NY.

THS2SLO SPORT AND LEISURE OPERATIONS CO-ORDINATION (15 CPs Sem. TE-SEM-1 BU.) *Dr TBA TBA*
Not available in 2008

THS2SLP SPORT AND LEISURE INDUSTRY PRACTICUM (15. CPs Sem. TE-SEM-2 BU.) *Mr Paul Emery*

Enrolment in the unit will be capped at 40 students. Admission will be determined by student grades in first year, with preference going to those with a 70% or better average.

In this unit students will build upon operational and management material covered in previous aspects of the program. In particular it provides the opportunity to use the sport and leisure management workplace as a rich learning environment from which students can actually analyse current practices, appraise personal and professional competencies, as well as apply theory to a contemporary sport management issue.

Prerequisite: 12 units completed.

Quota: 40.

Class requirements: One 1-hour lecture and one 1-hour tutorial plus a structured industry experience of approximately 150 hours.

This unit is not available for Study Abroad students.

Assessment: One 3000-word industry placement report (80%), two 500-word tutorial exercises (20%)

Prescribed Reading:

School of Tourism and Hospitality *Subject Readings* La Trobe University

THS2TAO TOURISM ATTRACTION OPERATIONS (15 CPs Sem. TE-SEM-2 BU.) *Dr TBA*
Not available in 2008

THS2THO TOURISM AND HOSPITALITY MANAGEMENT (15. CPs Sem. TE-SEM-1 BU.) *Dr Dale Sanders*

Unit restricted to B.Bus (Tourism and Hospitality) and B.Bus (Tourism Management) students only.

In this unit students are introduced to management theory and how it applies to the functioning of tourism and hospitality businesses. Students develop an understanding of the wide ranging and ever changing number of managerial issues that the modern day manager faces within the tourism and hospitality industry. Students explore issues such as the nature of managerial work, understanding the dynamic new workplace, how organisational culture affects managers, strategies for managing in a global environment, diversity management, ethics and social responsibility.

Prerequisite: THS11ILS, THS11LEM.

Co-requisite: None.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: Tutorial exercises (10%), One 2000-word research report (30%), one 2-hour final examination (45%), one case study presentation (10 mins) and one 500-word case study report (15%)

Prescribed Reading:

Robbins, S., Bergmann, B., Stagg, I., and Coulter, M. (2006) *Foundations of Management*, Pearson Education, Frenchs Forest.

THS2TLA INTRODUCTION TO TOURISM AND LEISURE ANALYSIS (15 CPs Sem. TE-SEM-2 BU. TE-SEM-S OS.) *Dr Caroline Winter*

The unit introduces students to the concepts of research and analysis within tourism and its applicability to management decisions. It provides introductory information about the research process including questionnaire design, sampling, qualitative and quantitative approaches, data preparation and reporting. It provides information about the role and nature of consultancy based research. Elementary statistical analysis is addressed.

Prerequisite: None.

Co-requisite: None.

Incompatible unit: THS12ITA AND ECO11IBS

Class requirements: One 2-hour lecture, one 1-hour tutorial per week and one group presentation.

Assessment: One 2-hour final examination (50%), one 1200-word report (30%), one tutorial presentation (10%), one 300-word short answer paper (10%)

Prescribed Reading:

Jennings, G. (2001) *Tourism Research*, Wiley, Milton

THS2TPP TOURISM POLICY AND PLANNING (15. CPs Sem. TE-SEM-2 BU.)

Dr Ewen Michael

Not available in 2008

THS3CSE CATERING SERVICES (15. CPs Sem. TE-SEM-1 BU.) *Mr Wiley Sims*

Not available in 2008

THS3CTO REGIONAL CULTURE AND TOURISM (15. CPs Sem. TE-SEM-1 BU.) *Mr Gary Best*

You will consider tourism as a journey through a cultural landscape and explore the ways in which tourism interacts with Australian culture, history, heritage and perceptions of national identity. After a general introduction to cultural tourism, students study the tourism landscape of Australia through an examination of the major historical eras. The impacts of each era in terms of cultural memory, cultural resources and tourism product will be explored and supported by case studies and site visits. The unit's theoretical framework is multi-disciplinary and, through the assessment, students gain experience in researching and documenting cultural tourism sites.

Class requirements: One 2-hour lecture, one 1-hour tutorial per week and two site visits.

Assessment: One 2-hour final examination (50%), one 2000 word research report (30%), 10-minute research seminar presentation (10%), one site visit report (10%)

THS3CUI CULTURAL INTERACTIONS (15. CPs Sem. TE-SEM-2 BU.) *Mr Gary Best*

Students are provided with an insight into the host-community relationships in the tourism setting. It considers both the benefits and challenges of cultural interactions arising from tourism. The unit explores such benefits as the revival of local customs and traditions, demand for local products, and the preservation and restoration of historic landscapes and structures. Challenges can include the degradation of local cultures through commercialisation and bogus authenticity, enforced segregation and opposition to tourism initiatives. Finally, it explores mechanisms which may consolidate benefits and suggest possible means of dealing with challenges. A range of Australian and international case studies support the theoretical framework.

Prerequisite: None.

Co-requisite: None.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2-hour examination (60%), one 3000-word research report (30%), research seminar (10%)

THS3DMM DESTINATION MARKETING AND MANAGEMENT (15 CPs Sem. TE-SEM-2 BE, BU, OS.) *BE: Dr Clare Lade, BU: Dr Sue Beeton*

This unit examines the marketing of tourism destinations at supra-national, national, state, regional and local/city levels. It will cover a variety of topics such as destination image, destination choice, promotion, destination competitiveness, the role of Destination Marketing Organisations (Demos), the role of partnerships and alliances to sell the destination, target marketing and destination positioning, delivering the destination experience, sustainable tourism destination development, among others. The unit will emphasise the link between destination marketing and strategic planning for development.

Prerequisite: THS21THM OR THS12LTM or THS21MT.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One two-hour examination (30%), Tutorial contribution (10%), One 1000-word (groups of 2) project research report (20%), One 6,000-word (groups of 3 or 4) group project final report (40%)

Recommended Reading:

Ritchie, B. and Crouch, G. (2003) *The Competitive Destination: A Sustainable Tourism Perspective*. CABIN Publishing.

THS3DRT DIRECTED READINGS ON TOURISM, HOSPITALITY AND SPORT (15. CPs Sem. TE-SEM-1 BE, BU. TE-SEM-2 BE, BU.) *BE: Dr Garry Price, BU: Dr Hans Westerbeek*

Price, BU: Dr Hans Westerbeek

This unit is offered in another semester. Unit Attempt requires Head of School Approval

In this unit, students undertake a reading project in a specific topic of tourism or hospitality. This unit is available as necessary at the discretion of the Head of School.

Quota: 5.

Class requirements: As directed by the Head of School: students will be required to discuss their reading project with a supervisor on a weekly basis.

This unit is not available for Study Abroad students.

Assessment: (100%) 5000 word research assignment or equivalent as directed by Head of School.

THS3EAM ELITE ATHLETE MANAGEMENT (15 CPs Sem. TE-SEM-2 BU.) *Ms Sonia Francis*

Available to B.Bus. (Sport and Leisure Management) students only. Students must not undertake THS22SLP concurrently.

Students in this Unit will develop an understanding of the demands elite athletes face in pursuit of a successful career during and after their sporting activity. Students will also use a critical thinking approach to identify strategies and management practices that can be applied to manage the off-field demands placed on elite athletes. Students will experience the application of such strategies and or management practices through either an industry research based project or structured industry placement programme.

Prerequisite: THS31SMS.

Quota: 25. Admission will be determined by student grades, with preference going to those with a 70% or better average.

Class requirements: One 2-hour lecture plus structured half day industry based research or placement program per week. .

This unit is not available for Study Abroad students.

Assessment: One 1200-word case study report (30%), one 1500-word industry placement report (30%), one 1500-word examination (30%), One 10-minute class presentation (10%)

Prescribed Reading:

THS3EIT ENTREPRENEURSHIP IN TOURISM (15. CPs Sem. TE-SEM-S BU.)

Dr Elspeth Frew

This subject is offered in another semester.

This unit investigates the significance of entrepreneurship to the tourism industry, both in Australia and internationally. The features of entrepreneurship, particularly those of creativity and innovation to provide a competitive advantage, are explored. The characteristics and motivations of the entrepreneur and the intrapreneur are examined. Students are provided with the opportunity to think entrepreneurially by engaging in various activities, including the completion of a research essay.

Prerequisite: NONE.

Co-requisite: NONE.

Incompatible unit: THS21ELS or THS23ELS

THS21ELS, THS23ELS, THS30EIT, OR THS31EIT

Class requirements: One 2-hour lecture/seminar and one 1-hour tutorial per week.

Assessment: One 2-hour examination (50%), one 2000-word research essay (30%), tutorial exercises (20%)

Prescribed Reading:

Not available in 2008

THS3GBR GOVERNMENT BUSINESS RELATIONS (15 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU, OS.) *Dr Ewen Michael*

This unit introduces students to the development of public policy, with particular reference to the tourism, hospitality and leisure industries. It examines the interaction between society, public institutions and the economy in the development of public decisions that affect these industries. It explores a market-based approach to the analysis of public policy to explain the interaction between communities, business firms and government in the process of public decision-making. The unit focuses on the structural mechanisms (the economy, the state and society) normally invoked in the analysis of the policy process, and builds an explanatory model to help guide

students understanding of the relationship that exists between the public sector and business. The unit takes up a number of contemporary issues including the significance of externalities, private use of public goods, and government funding for the industry.

Prerequisite: THS2ETI or ECO11IMA

THS20ETI, THS21ETI, THS22ETI or ECO10IMA.

Co-requisite: NONE.

Incompatible unit: THS22TPP

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: Tutorial assessment exercises (10%), one 45-minute tutorial test (10%), one 1500-word essay (30%), one 2-hour final examination (50%)

THS3HSD HOSPITALITY SERVICE DELIVERY STRATEGIES (15 CPs Sem. TE-

SEM-2 BU, OS.) *Mr Wiley Sims*

A service operations management approach is used to explore strategies appropriate to the management of limited capacity service enterprises. By the use of a computer-based simulation, a reflective experimental learning approach is used in this unit. A knowledge of the principles of service marketing are assumed and are integrated into the delivery of the unit in order to understand the special nature of the marketing of hospitality services and the high quality nature of service provision necessary to effectively compete in hospitality industry. Students investigate the interrelationship of operations and marketing in the management of a service-based enterprise.

Prerequisite: THS12LTM or equivalent.

Co-requisite: THS31SML recommended.

Incompatible unit: THS31HSM

Class requirements: One 1-hour lecture, one 1-hour computer laboratory and one 1-hour tutorial per week.

This unit is not available for Study Abroad students.

Assessment: One 2000-word essay (40%), One group report* (individual contribution to the group will be equivalent to 1500 words). (30%), one class 15-minute presentation and 1500-word report (15%), one computer simulation exercise (15%)

THS3INT INTERNATIONAL TOURISM (15. CPs Sem. TE-SEM-1 BU. TE-SEM-S

BU.) *Dr Elspeth Frew*

This unit is offered in another semester.

Students develop a thorough understanding of tourism as a force for economic development and of the problems inherent in a cross-cultural context. Students are shown the size and scope of international tourism and analyse its business potential from an Australian perspective. The unit examines political factors (trade partnerships and government stability), economic factors (balance of trade, multiplier effect), transportation (particularly air links), cultural factors (historic links and cultural differences) and climatic and health factors. It focuses on the conditions and opportunities within the Asia-Pacific region.

Prerequisite: THS11ITH or THS11ILS

CPs Sem. TE-SEM-1 AW. TE-SEM-2 AW, BU, OS.) *AW: Dr TBA, BU: Dr Aaron Smith*

Assessment may differ between campuses. Please check with a course adviser

This unit builds on core skills in marketing in first and second year and is designed to complement the other units in the entrepreneurship specialisation. A major element of the unit involves developing skills in the conduct of marketing research to support the development of new tourism business ideas. In addition, the unit examines the tourism and leisure marketing process with a particular emphasis on the technology associated with promotional methods suited to the needs of small tourism, hospitality or sport enterprises.

Prerequisite: THS21ETI/22ETI, THS21THM, THS12LTM or equivalents.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 2-hour final examination (50%), Tutorial participation (10%), one 4000-word project (40%)

THS3SEM SPECIAL EVENT AND MEETING INDUSTRY MANAGEMENT

(15 CPs Sem. TE-SEM-1 BU, OS.) *Mr Wiley Sims*

This unit aims to provide participants with an understanding of and an ability to apply the principles of management, logistics and marketing to a range of events with an emphasis on meetings, conventions, exhibitions and special events such as sporting events. The special short-term nature of events and the specific business skills to effectively manage their operations will be investigated. The topics covered include trends in the MICE sector, the bidding process, event planning and operations, convention markets, event scheduling, budgeting and sponsorship, pre and post event activities.

Prerequisite: THS11ILS or equivalent.

Co-requisite: *Incompatible unit:* THS30ECM, THS32ECM

Quota: 80

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 3000-word essay (50%), One class presentation and 1500-word report (10%), One 2-hour final examination (40%)

Prescribed Reading:

Allen, J. (2004) *Festival and Special Event Management* 3rd. Edn. John Wiley

V. McCabe *The Business and Management of Conventions* John Wiley 2000

THS3SGV SPORT GOVERNANCE (15. CPs Sem. TE-SEM-2 BU.) *Dr Russell*

Hoye

In this unit students will be provided with a comprehensive guide to the practical application of governance principles to sport and leisure organisations operating at the community, state/provincial, and national/professional levels in club based sporting systems. Students will compare and contrast accepted practice and research evidence in regard to a range of governance principles and practices. Specific

topics to be covered include: the difference between governance and management, governance models, governance roles and responsibilities, structures, processes, board leadership, board performance, board culture, managing governance change and future governance challenges.

Recommended Prior Studies: LST22SLA or equivalent introductory law subject.

Co-requisite: Nil.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

This unit is not available for Study Abroad students.

Assessment: One mid semester test (20%), one final exam (40%), 2000-word tutorial activities (40%)

Prescribed Reading:

School of Tourism and Hospitality *Subject Readings* La Trobe University

THS3SML STRATEGIC MANAGEMENT FOR LEISURE INDUSTRIES (15 CPs Sem. TE-SEM-1 BU, OS.) *Dr Dale Sanders*

This unit provides students with the opportunity to study strategic management principles and practice in the service sectors of tourism, hospitality, leisure and sport. It provides an assessment of key management concepts for destinations, firms and individuals in the leisure industry. Key topics include competitor analysis, service analysis and recovery, time management, portfolio analysis and personnel development paths related to leisure management. Students will be able to apply such concepts to their particular degree interests.

Prerequisite: Students must have completed second year of degree studies or obtained Head of School's approval.

Co-requisite: None.

Incompatible unit: THS30STM AND THS31STM

Quota: 220.

Class requirements: Three 1-hour lectures and two 1-hour tutorials at middle and end of semester.

Assessment: One 2500-word take-home examination (50%), two 300-word case study reports (20%), one 2000-word essay (30%)

Prescribed Reading:

Viljoen, J. and Dam, S. *Strategic Management*, 4th Edn Pearson, 2003

Recommended Reading:

Murphy, P. and Murphy, A. *Strategic Management for Tourism communities: Bridging the Gaps*. Channel View Publications. Clevedon, England (2004).

THS3SMS SPORT MARKETING AND SPONSORSHIP (15 CPs Sem. TE-SEM-1 BU.) *Dr Aaron Smith*

This unit examines the marketing of sporting organisations (professional and amateur), sport codes and sports events. The unit covers a variety of topics including dealing with the special nature of sport organisations, understanding sports consumers (fans) and their needs, and the experiential nature of sport from both a participation and spectator perspective. Sport Marketing and Sponsorship emphasises the role of sponsorship in the continued survival of both professional and amateur sporting codes, how sponsorship benefits the sponsor and how sporting codes must maintain relationships with their sponsors. Students will gain skills in the preparation of sponsorship proposals.

Prerequisite: THS21THM or equivalent.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 1500-word essay (30%), one 2500-word project (40%), One 1.5-hour final examination (30%)

Prescribed Reading:

D. Shilbury, S. Quick and H. Westerbeek (2003) *Strategic Sport Marketing*. 2nd Edn. Allen and Unwin.

Recommended Reading:

B. J. Mullin, S. Hardy and W.A., Sutton *Sport Marketing 2nd Edn* Human Kinetics 2000

THS3SOM SERVICES OPERATION MANAGEMENT (15. CPs Sem. TE-SEM-1 BU.) *Mr Wiley Sims*

This unit aims to investigate and apply the principles of food and beverage management to a wide range of catering outlets. An operations management approach is applied to food service. The learner is provided with opportunities to apply the principles of operations management theory to a range of food service operations. Topics cover include food service systems, quality management and control systems, food safety and HACCP analysis, capacity management, location analysis, plant maintenance, layout and design, inventory management, cost control, forecasting food service activity, operating standards and menu planning. This unit is recommended for students with on-going aspirations to work in the hospitality and food service industry.

Prerequisite: THS11FBS or equivalent THS21THO or equivalent

Co-requisite: Nil.

Incompatible: THS30CSE, THS31CSE, THS31FSM, THS3FSM

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2000-word essay (40%), One class presentation and 1500-word report (20%), One 2-hour final examination(40%)

Prescribed Reading:

Heizer, J. & Render, B *Principles of Operations Management*, 6th edition Prentice Hall, 2006

THS3SPF SPORT POLICY FORMULATION AND MANAGEMENT (15. CPs Sem. TE-SEM-1 BU.) *Dr Matthew Nicholson*

In this unit students focus on Commonwealth Government sport policy in contrast to systems employed in the United Kingdom, New Zealand, North America and Europe. They will explore the ways in which sport policy impacts upon the development and management of Australian sport. In the first part of the unit students will consider historical issues and the political, economic and cultural context in which past policies were introduced. As part of this analysis, students will be required to become familiar with the key turning points that have produced significant policy directions in Australian sport management.

Prerequisite: Nil.

Co-requisite: Nil.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

This unit is not available for Study Abroad students.

Assessment: One 2000 policy analysis (35%), Ten weekly 1500-word tasks (30%), One 1000-word reflective journal (20%), One half-hour mid-semester test (15%)

Prescribed Reading:

Stewart, B., Nicholson, M., Smith, A. and Westerbeek, H. *Better by Design: Sport Policy in Australia*. Routledge, London. (2004)

THS3STM STRATEGIC TOURISM MANAGEMENT (15. CPs Sem. TE-SEM-2 BU.) *Coordinator to be advised*

Not available in 2008

THS3TCB TOURISM AND LEISURE PSYCHOLOGY AND CONSUMER BEHAVIOUR (15 CPs Sem. TE-SEM-1 BU. TE-SEM-2 OS.) *Dr Aaron Smith*

This unit examines the ways in which tourism and leisure consumers think, feel and behave. It does so by examining each stage of the consumption experience, de-constructing what consumers do and the motivations underpinning their behaviour and choices. Topics covered include: travel and tourism motivations, destination choice; personality and psychographics; social and group influences; destination image and perceptions; expectations and anticipation, and identity, motivation and culture and recollection. The unit emphasises how knowledge of tourism and leisure consumer behaviour can be used by marketers, entrepreneurs and managers to better target potential consumer and to satisfy their needs.

Prerequisite: THS21THM OR THS12LTM.

Incompatible unit: MKT21CB/22CB/23CB, MKT32CBW

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2-hour examination (30%), one 1000-word report (20%), one 2000-word report (50%)

Recommended Reading:

THS3TCO TICKETING AND CONFERENCE ORGANISATION 3 (15 CPs Sem. TE-SEM-1 BU.) *TBA*
Not available in 2008

THS3TEN TOURISM AND THE ENVIRONMENT (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BE.) *Dr Garry Price, Dr Caroline Winter*

In this unit the nexus between tourism and the environment, both physical and socio-cultural, is examined from economic, ecological, historical, philosophical and socio-cultural perspectives. The relationship between environmentally responsible tourism and sustainable development, in theory and practice, is critically examined. Both Australian and international case studies are used.

Prerequisite: None.

Co-requisite: None.

Class requirements: One 2-hour lecture/seminar per week and one 1-hour tutorial per week.

Assessment: BE: tutorial performance (10%), tutorial performance (10%), one 3000-word written assignment (40%), one 2-hour final examination (50%), BE: one 2,050-word written assignment (40%), BE: one 2-hour final examination (50%)

THS3TTH SPECIAL TOPICS IN TOURISM, HOSPITALITY AND SPORT (15 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU. TE-SEM-S BU, OS.) *Dr Hans Westerbeek*
 This unit is offered in another semester.

The curriculum and content for this unit will be different each time it is offered. Full details concerning the unit will be available from the School of Sport, Tourism and Hospitality Management prior to each enrolment period. The unit will normally be taught by a distinguished visiting scholar in a sport, tourism or hospitality field of their own expertise, based on courses they teach in their home institution. On occasion the unit may be offered as a special course based on current or contemporary research by La Trobe staff. The unit will provide content and material not available in the School's normal delivery program and will usually have a strong research focus.

Prerequisite: THS11ITH or THS11ILS

Co-requisite: None.

Class requirements: Variable, but equivalent to 3 hours contact per week per semester.

Assessment: Variable, but equivalent to one 5000-word research essay (100%)

THS3TVP TOURISM VENTURE PLANNING (15. CPs Sem. TE-SEM-2 BU.) *Dr TBA*

This examines the process of developing a strategic plan for creating a new venture or special event, and marketing its services, or designing and marketing a new tour. It aims to provide students with a detailed knowledge of the requirements for running and establishing a new tourism venture. Topics include: concepts of competitive advantage, statutory requirements, business planning, company structures, finance, location, cash flow planning and marketing.

Students will find that the knowledge developed from earlier subjects including Accounting for Management Decisions, Tourism Enterprise Management, Marketing, Human Resource Management and Economics for the Tourism Industry will be invaluable in this course.

Prerequisite: ACC12AMB, THS21/22ETI

ACC12AMB, THS21ETI/22ETI

ACC12AMB, THS21ETI/22ETI or equivalents.

Quota: 60.

Class requirements: One 1-hour lecture and one 2-hour seminar per week.

Assessment: Class participation (10%), two 1500-word written reports consisting of a project brief and final report (60%), one 20-minute seminar presentation (30%)

Recommended Reading:

D. Kuratko *Entrepreneurship – 4th Edn* Dryden Press

THS3WKO WINE KNOWLEDGE AND WINERY OPERATIONS (15. CPs Sem. TE-SEM-2 BU.) *TBA*
Not available in 2008

THS3WTM WINE TOURISM AND MARKETING (15 CPs Sem. TE-SEM-2 BU.)

Ms Meg Houghton

Quota size due to field trips and wine tastings size restrictions. This unit will include a choice of one of two field trips and two wine tasting workshops. There will be a charge (subsidised) for some of these events

This subject aims to equip students with a basic knowledge of grape growing, wine making and the marketing of wine (especially from the cellar door). The unit will place a particular emphasis on the role of tourism and winery. It will focus on the special requirements of cellar door sales and integrate these with a retail management and regional tourism perspective giving students the competence, confidence and customer service skills to promote the industry.

Prerequisite: THS11ILS, THS12LTM or equivalent.

Co-requisite: None.

Incompatible unit: None

Quota: 80. Preference to B.Bus (Sport, Tourism and Hospitality Management) students

Class requirements: One 2-hour lecture per week, one one-day field trip, six 2-hour seminars.

Assessment: One 1800-word assignment (40%), one 20-minute tutorial presentation (20%), one 2-hour final examination (40%)

Recommended Reading:

THS4ATH ADVANCED TOPICS IN TOURISM AND HOSPITALITY (15 CPs Sem. TE-SEM-1 BU.) *Coordinator to be advised*
Not available in 2008

THS4CIS CONTEMPORARY ISSUES IN SPORT, TOURISM AND HOSPITALITY (15. CPs Sem. TE-SEM-1 BU.) *Mr Gary Best, Dr Ewen Michael*

Offered subject to sufficient enrolment.

Students explore specific contemporary sport, tourism and hospitality issues in detail. Specific topics change each year in accordance with industry experience and needs and the School will provide notice regarding the selected topics. The unit is delivered via a seminar, which includes presentations from staff, industry leaders and students.

Prerequisite: Qualified for admission to fourth year.

Class requirements: Three 2-day blocks, Mondays and Tuesdays.

This unit is not available for Study Abroad students.

Assessment: 1500-word research paper (20%), 3000-word research paper (40%), one 2-hour examination (40%)

THS4RME RESEARCH METHODS IN SPORT, TOURISM AND HOSPITALITY (15. CPs Sem. TE-SEM-1 BU.) *Dr Caroline Winter*

Offered subject to sufficient enrolment.

Students build on earlier thematic technique subjects to develop consultant and management level skills in developing and interpreting research designs and methods. Students are taken through the principles of scientific research, explore qualitative and quantitative approaches.

Class requirements: Six 1-day blocks, Mondays and Tuesdays.

This unit is not available for Study Abroad students.

Assessment: One 500-word minor assignment (10%), one 3000-word research proposal (50%), one 2000-word research paper critique (40%)

THS4RTD REGIONAL TOURISM DEVELOPMENT 4 (15. CPs Sem. TE-SEM-1 BU.) *Dr Sue Beeton*

Offered subject to sufficient enrolment.

Tourism may be used as an agent for sustaining and assisting regional development. Using the State of Victoria as your prime resource base, students are expected to investigate and critically analyse a regional (or shire) tourism strategy/plan in the light of contemporary development theory. This unit is designed to assist the student in preparing for the honours year thesis. It uses a series of modules utilising key management theories, concepts and techniques in the lecture program and is supported by a selection of relevant journal articles.

Co-requisite: THS40RME.

Class requirements: 3-hour seminar blocks.

This unit is not available for Study Abroad students.

Assessment: One 3000-word research project (40%), one 15-minute seminar presentation (10%), and one 2.5-hour examination (50%)

THS4RTH READINGS IN SPORT, TOURISM AND HOSPITALITY (15. CPs Sem. TE-SEM-1 BU.) *Dr Russell Hoyer*

This unit directly supports the thesis component in the honours year. The unit examines the functions and mechanics of literature reviews and guides students in undertaking an intensive and focused survey of the literature pertinent to their topic. In the process, students gain a detailed and in-depth knowledge of current research for their topic, reflect on the implications of the research and gain ideas for methodology and analysis. In addition, the unit covers the standard thesis structure, information sourcing skills, researching skills (including reading, note-taking and writing), referencing systems and time management. The content, exercises and assessment pieces in this unit all contribute to the literature review, methodology and analysis sections of the thesis.

Co-requisite: THS40RME.

Class requirements: 3-hour seminar blocks.

This unit is not available for Study Abroad students.

Assessment: One 1500-word draft literature review (20%), one 30-minute seminar presentation on research paper (20%), one 3000-word literature review (60%)

THS4SPD SPORT DEVELOPMENT (15 CPs Sem. TE-SEM-1 BU.) *Dr Matthew Nicholson*

Offered subject to sufficient enrolment

In this unit students will focus on the processes and issues involved in sport development. A key focus will be the comparison between sport systems employed in the United Kingdom, New Zealand, North America and Europe. Students will explore the ways in which sport development policy impacts upon the development and management of Australian sport. Students are expected to investigate and critically analyse a sport development policy at the national or individual sport level. In this unit students are assisted in preparing for the honours year thesis by undertaking a series of modules that utilise key management theories, concepts and techniques in the lecture program and supported by a selection of relevant journal articles.

Quota: 15.

Class requirements: One three-hour seminar per week, which will include group based tutorial exercises and discussions.

Assessment: One 3000-word portfolio (40%), two 20-minute seminar presentations (40%), Seminar participation (20%)

Prescribed Reading:

School of Sport, Tourism and Hospitality Mgt Unit book of prescribed readings La Trobe University

THS4THS SPORT, TOURISM AND HOSPITALITY MINOR THESIS (30 CPs Sem. TE-SEM-2 BU.) *Dr Russell Hoyer*

Offered subject to sufficient enrolment

In this unit students are given the opportunity to identify and select a research problem and investigate it independently. Students learn to apply theory to, and /or analyse, a real problem, or to explore and analyse more general issues using secondary sources. Students are able to apply research procedures to illuminate the problem and contribute to a greater understanding of that problem, and even to identify potential solutions.

Quota: 10.

Class requirements: Production of thesis in consultation with Supervisor.

Assessment: One 8000-word thesis (100%)

THS4THT SPORT, TOURISM AND HOSPITALITY THESIS (60. CPs Sem. TE-SEM-2 BU.) *Dr Russell Hoyer*

A major component of the Honours year is the conduct of a research project and the presentation of this research in the form of a minor thesis. The research project gives students the opportunity to identify and select a research problem and investigate it independently. It allows you to apply theory to, and /or analyse, a real problem, or to explore and analyse more general issues using secondary sources. It also enables you to apply research procedures to illuminate the problem and contribute to a greater understanding of that problem, and even to identify potential solutions.

Class requirements: Production of thesis in consultation with honours supervisor.

This unit is not available for Study Abroad students.

Assessment: One 15000-word thesis (100%)

Faculty of Science, Technology and Engineering

Academic aims and objectives of the faculty

The Faculty of Science, Technology and Engineering is committed to the attainment of excellence in all its scholastic and scientific endeavours, and to the way in which it interacts with its students and with its community.

The objectives of the faculty include:

- to produce, from a diversified intake, graduates well grounded in science, technology and engineering, capable of meeting the needs of society
- to be an internationally and nationally recognised centre for quality teaching, scholarship, and research
- to ensure that the quality and range of the faculty's activities are recognised by prospective students.

Graduates of the faculty will be expected to possess knowledge and skills in, and an understanding of, the broad conceptual and theoretical elements of their fields of specialisation. It is expected that a graduate will possess a technical competence in the application of skills required for practice in the discipline, be able to stay abreast of theoretical developments in the discipline, and have the ability to integrate theory and practice.

Admission requirements for undergraduate degrees

For full details, refer to the 2008 VTAC Guide.

Any person offered a place in an undergraduate course at La Trobe University may be required to sit an English language test. Applicants whose principal language of educational instruction was other than English must provide evidence of their proficiency in English. This is achieved by a satisfactory result in VCE English (any) or by achieving a minimum IELTS (International English language Testing System) score of 6.0 or its equivalent.

Entry to Honours programs

For entrance to an Honours degree following a three-year pass degree, students must obtain a minimum average of 60% across all of their third year and obtain at least 65% in 60 credit points of units germane to the Honours discipline. Some departments may set higher entrance standards than these.

Faculty and course regulations

Completion of a unit includes attendance at such lectures and tutorial classes as are prescribed and completion of such exercises and laboratory work as shall satisfy the department concerned. Students who have not complied with the prescribed requirements may be refused admission to the annual examination in that unit.

Reasonable notice of the prescribed requirements will be given. Students should ensure that their enrolment plan meets the rules associated with their course of enrolment, particularly all the core requirements. Students must pass prerequisite units before being permitted to enrol in relevant units at the next year level. Where the prerequisite unit requires the student to demonstrate competence in a set of procedures and/or practices, the unit must have been passed no more than three years prior to enrolling in the relevant units at the next year level.

Academic progress rules

The Faculty of Science, Technology and Engineering will consider a student's progress in a course at the end of each academic year.

Progress of a student enrolled in any coursework degree (undergraduate or postgraduate) at La Trobe University in a particular academic period is deemed to be unsatisfactory if:

- the student either:
 - fails to pass 50% of the units in which he/she is enrolled for that period of enrolment; or
 - having previously been deemed to have made unsatisfactory academic progress, fails to pass 60% of the units in which he/she is enrolled for that period of enrolment; or
- fails a unit in a course for a second time; or
- fails to meet conditions specified by the faculty at the commencement of the year of enrolment.

Language and Academic Skills assistance

The Language and Academic Skills (LAS) Unit in the faculty assists students at all levels to develop writing, reading, oral presentation and study skills. Students are encouraged to contact the unit located in the Physical Sciences 1 building, room 213, near the faculty office, or telephone (03) 9479 2432 to make an appointment for individual assistance or to enquire about resources.

International students from non-English speaking backgrounds who are enrolled in courses where there are free electives and who need to further develop their English language skills in an academic context, may enrol in the units EDU1ESL English as a Second Language 1 (15 credit points) and EDU4ESL English as a Second Language 2 (20 credit points).

The EDU units above may only be credited as first year level units towards any degree offered by the Faculty of Science, Technology and Engineering.

For further information, contact the Language and Academic Skills (ESL) Unit located in Building Humanities 3, Room 417, telephone (03) 9479 2788.

Proficiency in English

In order to graduate from a degree course at the Melbourne (Bundoora) Campus, students who commenced their undergraduate degree in the Faculty of Science, Technology and Engineering before 2005 are required to demonstrate proficiency in English by passing an English test devised by the faculty's Language and Academic Skills (LAS) unit. For students in the Bachelor of Psychological Science or an engineering, technology, computer science, information systems or a double degree (other than the Bachelor of Bioinformatics/Bachelor of Science and the Bachelor of Environmental Science/Bachelor of Biological Sciences), the requirement is tested within their course structure. Students in all other courses in the faculty at Melbourne (Bundoora) Campus and who commenced before 2005 are required to demonstrate this proficiency. The process of assessing students' proficiency in English from 2007 will be done on an individual basis. Students must contact the LAS unit to make an appointment. This can be done by telephone, email or in person. For students commencing their degree from 2005, the requirements have been met within the course structure.

Important reminder: students who have not met this English proficiency requirement will not qualify for their degree and will not be permitted to graduate.

Industry Cadetship Scheme

The faculty offers students the opportunity to apply for paid training and work programs in a wide range of industries and research institutes under the auspices of the Industry Cadetship Scheme. Cadetships are advertised each April and August and students can make applications for positions of interest. The winter and summer cadetship programs are during vacation periods. The winter program is for three weeks in July and the summer program is up to twelve weeks from December to February. Students wishing to increase their industry exposure are encouraged to consider the Year-in-Industry program and, as the name suggests, would complete a twelve-month placement. Interested students should contact the coordinator, Ms Jill Mullen in Room 228 of the RL Reid Building.

Health procedures and protective clothing

For laboratory classes, all students are expected to wear laboratory coats and shoes that adequately protect their feet. In chemistry laboratories, students must wear safety glasses. Students are expected to comply with appropriate laboratory safety rules. Smoking, eating or drinking is not allowed in lecture theatres, laboratories, or computer rooms.

The University recommends that agricultural science undergraduate and postgraduate students who will have contact with animals should be immunised against the following diseases:

- Tetanus – all students
- Q fever – as advised by the Department of Agricultural Sciences.

Organisation of the faculty

School of Engineering and Mathematical Sciences

Head of School: Professor Ian Robinson
 Location: Beth Gleeson Building, Room 242
 Tel: (03) 9479 2107
 Fax: (03) 9479 3060
 Email: i.robinson@latrobe.edu.au
 Web: www.latrobe.edu.au/sems

Department of Civil Engineering and Physical Sciences

Head of Department: Professor Joe Petrolito
 Location: Bendigo Campus
 Level 4, Applied Science 2 Building
 Enquiries: (03) 5444 7351
 Email: sems@latrobe.edu.au
 Web: www.latrobe.edu.au/ceps

The Department is based at the Bendigo Campus, offers engineering, geology, and physics units for the civil engineering, applied science, business, information technology and education courses. The Department also offers postgraduate degrees by research. Staff members are active in research and consulting, and details of their areas of expertise are given on the web pages.

Department of Computer Science and Computer Engineering

Melbourne (Bundoora) Section

Acting Head of Department: Associate Professor Ben Soh
 Location: Melbourne (Bundoora) Campus
 Level 2, Beth Gleeson Building
 Tel: (03) 9479 1107
 Email: info@cs.latrobe.edu.au
 Web: www.cs.latrobe.edu.au

The Department has particular strengths in artificial intelligence – fundamentals, computer networks, software engineering, data engineering and knowledge management, enterprise computing, games technology, information systems, mobile and ubiquitous computing.

It is the major provider for a wide range of challenging undergraduate courses:

- Bachelor of Computer Network Engineering
- Bachelor of Computer Science
- Bachelor of Computer Science in Games Technology
- Bachelor of Computer Systems Engineering
- Bachelor of Computer Technology.
- Bachelor of Information Systems
- Bachelor of Software Engineering.

Many relevant double degrees are also available. The Bachelor of Computer Science can be combined with degrees in commerce, science, cognitive science, mathematics and statistical science, or electronic engineering – while the Bachelor of Information Systems can be combined with degrees in business and law. Specialisations in computer science may also be undertaken in the Bachelor of Science, Bachelor of Arts, Bachelor of Arts/Bachelor of Science and Bachelor of Bioinformatics/Bachelor of Science degrees. Common to all courses is an emphasis on providing sound training in fundamental and theoretical issues, supported by industry-relevant practical applications. In all courses, a solid foundation is provided in programming using Java and C++ languages with an emphasis on object-oriented systems for solving problems, and students may complete a major year-long team-based software engineering project in their third year.

The opportunity also exists for students to specialise in any of the particular strengths of the Department.

Bendigo Section

Head of Section: Dr Pat Horan
 Location: Bendigo Campus
 Business Building
 Tel: (03) 54447276
 Email: p.horan@latrobe.edu.au

The Section offers undergraduate courses to Postgraduate level in generalist computing, and information technology.

Courses offered within the Section are:

- Bachelor of Information Technology
- Bachelor of Information Technology (Professional)

Double degrees are available with Science and Business.

The Department is committed to providing a friendly and supportive learning environment in which students can expect to experience a range of computer platforms, programming environments, and information systems approaches. The undergraduate courses include opportunities for participation in team-based information systems development projects, industry-based learning, and industry experience.

Department of Electronic Engineering

Head of Department: Professor John Devlin
 Location: Melbourne (Bundoora) Campus
 Level 4, Beth Gleeson Building
 Tel: (03) 9479 2036
 Email: info@ee.latrobe.edu.au
 Web: www.latrobe.edu.au/ee

The Department emphasises teaching and research in the fields of biomedical engineering, circuits and instrumentation, communications, computer networks and architectures, control systems, embedded systems, optical systems, microelectronics and signal processing. The Department offers the Bachelor of Electronic Engineering and Bachelor of Electronic Technology – as well as a five-year double degree comprising Bachelor of Computer Science (Honours) with the Bachelor of Electronic Engineering.

The Department also offers three five-year undergraduate/Masters double degrees in the specialisations of biomedical engineering, microelectronic engineering, and communication engineering. All courses prepare graduates for professional employment or further postgraduate research study and are accredited by Engineers Australia. Electronics units are also offered in the Bachelor of Science degree. The Department offers a number of scholarships and prizes for high-achieving students, including those starting first year of the single or combined degrees, and the Wanda Henry Scholarship for a student in any of the double degrees.

Department of Mathematics and Statistics

Head of Department: Associate Professor Grant Cairns

Mathematics Section – Bendigo Campus

Head of Section: Dr Christopher Lenard
 Location: Bendigo Campus
 Business Building
 Tel: (03) 5444 7350
 Email: maths.bendigo@latrobe.edu.au
 Web: www.latrobe.edu.au/maths

The Section at Bendigo pays particular attention to offering mathematical and statistical units for students in a wide range of courses such as science and engineering, business, information technology, education, arts, and psychology.

Students who take first year units in calculus or discrete mathematics can pursue mathematical streams that explore the theoretical and practical foundations of modern science, computing, and engineering. The statistics major within the Business degrees aims at training highly numerate business graduates for whom there are many opportunities in contemporary commerce and government.

Psychology students also find that a background in statistics is invaluable in understanding the empirical evidence that forms the basis of psychology. The Department also works closely with the Faculty of Education to offer a range of units for prospective teachers.

Research within the department is both pure and applied, with projects in analysis, geometry, health care management, and demography. As well, there is ongoing work in statistical consulting. More information on all the Department's activities can be found on the website.

Mathematics Section – Melbourne (Bundoora) Campus

Head of Department: Associate Professor Grant Cairns
 Location: Melbourne (Bundoora) Campus
 Levels 2 and 3, Physical Sciences 2 Building

Tel: (03) 9479 2600
Web: www.latrobe.edu.au/mathstats/math

Research activities strongly influence the Section's undergraduate units, particularly at the third and fourth year levels. Another distinctive feature of the Section is its strong emphasis on student participation in learning, with more practice classes and fewer lectures than is customary in other university mathematics courses. The gateway to a major study in mathematics is the combination of MAT1CNS (Calculus and Number Systems) and MAT1CLA (Calculus and Linear Algebra). Students wanting to keep their future options open are advised to take both units. Students interested in mathematics are also encouraged to study MAT1DM (Discrete Mathematics), which is a prerequisite for some computer science units. The Section's annual student *Handbook* gives full details of mathematics offerings from first to fourth year along with other useful information. It is available in printed form and on the Section's web pages.

Statistics Section – Melbourne (Bundoora) Campus

Head of Section: Associate Professor Paul Kabaila
Location: Melbourne (Bundoora) Campus
Level 2, Physical Sciences 2 Building
Tel: (03) 9479 2600
Web: www.latrobe.edu.au/mathstats/stats

Statistics plays an important role in many fields, making it suitable for combination with almost every other discipline. Statistical science embraces the design of studies and the analysis of data arising from these studies, making them efficient and credible. Its methods are based on reasoning and the mathematics of chance, and are implemented by the use of modern computer software. The major in statistics consists of the units STA2MAS, STA2MDA and STA2LM (from 2008, the major will consist of STA2AS and STA2MD) in second year and STA3BS, STA3LM, STA3AS and STA3SI in third year. Students wanting to take this major need to take one of the first year prerequisite statistics units, with STA1SS recommended. It is also recommended that these students take the mathematics units MAT1CNS, MAT1CLA, and MAT2LAL. This major in statistics is accredited by the Statistical Society of Australia Inc. and entitles the holder to Graduate Statistician status upon joining the society. The major in statistics opens the way to Honours, Masters by coursework, Masters by research and PhD studies in statistical science. A minor in statistical science requires the completion of 70 credit points in statistical science, with a minimum of 30 credit points at third year level. The Section offers service units such as STA1LS (Statistics for Life Sciences), STA1PSY (Statistics for Psychology), STA1OCT (Statistics for Occupational Therapy), STA2MS (Medical Statistics) and STA2BS (Biostatistics).

Department of Physics

Head of Department: TBA
Location: Melbourne (Bundoora) Campus
Physical Sciences 1 Building
Tel: (03) 9479 2622
Web: www.latrobe.edu.au/physics

The Department offers courses in physics for specialist physicists and in support of other sciences. All units aim to provide an understanding of the physical world appropriate to the level of the course and to the interests of the students with the expectation that students will be able to explain physical phenomena observed. Experimental investigation is important at all levels while mathematical representation is emphasised in the specialist stream.

The Department offers units that lead to a three-year major in physics as part of a Bachelor of Science, Specialisation in Space Science, and Bachelor of Nanotechnology/Bachelor of Science. Units leading to the major are – PHY1SCA and PHY1SCB, MAT1CNS, MAT1CLA, PHY2SCA and PHY2SCB and MAT2VCA, MAT2LAL, PHY3SCA and PHY3SCB. Specialised units are offered for the Specialisation in Space Science: PHY2SPI, PHY2ASA, PHY3REM; Bachelor of Environmental Science: PHY1LSA, PHY1LSB, PHY3GRE; Agriculture and Life Sciences: PHY1LSB; Engineering and Technology: PHY2EPB. The Department also offers nanotechnology units that are part of the core requirements for the completion of the four-year double degree in nanotechnology and science, including 'Issues in Nanotechnology' at first, second and third year levels.

School of Life Sciences

Head of School: Professor Roger Parish
Web: www.latrobe.edu.au/lifesciences

Department of Agricultural Sciences

Head of Department: Associate Professor Mark Sandeman
Location: Melbourne (Bundoora) Campus
Level 3, R. L. Reid Building
Tel: (03) 9479 2190
Email: agriculture@latrobe.edu.au
Web: www.latrobe.edu.au/agriculture

The Department offers units leading to the Bachelor of Agricultural Science, Bachelor of Agricultural Science/Bachelor of Business, Bachelor of Animal and Veterinary Biosciences, Bachelor of Viticultural Science and Wine Production (Bachelor of Science (Viticulture and Wine) from 2008), and the Bachelor of Agricultural Science/Bachelor of International Development degrees. Units offered provide a broad understanding of soils, plants, animals and business and how they interact and interrelate. Students' work placements and research projects provide real world experience. Students enrolled in other courses may undertake units offered by the Department.

The Department works closely with the regional campuses of La Trobe University in the delivery of the Bachelor of Agricultural Science and the Bachelor of Viticultural Science and Wine Production (see above). It has a 13-hectare agricultural reserve on the Melbourne (Bundoora) Campus, which is used for fieldwork and allows hands-on exposure to the applied aspects of crop and animal husbandry. The Department provides quality teaching and research and its degrees are recognised as among the best in Australia.

Department of Botany

Head of Department: Professor Roger Parish
Location: Melbourne (Bundoora) Campus
Level 4, Biological Sciences 1 Building
Tel: (03) 9479 2217
Email: botany@latrobe.edu.au
Web: www.latrobe.edu.au/botany

The Department contributes extensively to first year units in biology and offers units in botany, plant ecology, and plant biotechnology leading to pass and Honours degrees. At third year level, students have the option of pursuing specialisation at the molecular, whole plant or community level. Postgraduate training is available in a wide range of fields in the plant sciences.

Students can study botany in conjunction with a variety of the other science units, either in the general Bachelor of Science or in the Bachelor of Biological Sciences, or as part of more specialised courses, such as Bachelor of Biotechnology and Cell Biology or Bachelor of Conservation Biology and Ecology.

Department of Environmental Management and Ecology

Head of Department: Associate Professor Phillip Suter
Location: Albury-Wodonga Campus
Building 4, University Drive
Email address: deme.aw@latrobe.edu.au
Tel: (02) 6024 9885

The core programs of the Department are:

- The Bachelor of Science in Environmental Management and Ecology (three years plus one further year if Honours is undertaken), and
- One year of the Bachelor of Biological Science (for which students must transfer to the Melbourne (Bundoora) Campus to complete the second and third years).

First year studies are also offered in:

- Bachelor of Agricultural Science
- Bachelor of Chemical Sciences
- Bachelor of Science
- Bachelor of Science/Bachelor of Science Education.

Within the postgraduate area, the Department offers:

- Graduate Diploma in Environmental Management
- Postgraduate Diploma in Science.

And research leading to:

- Master of Science
- Doctor of Philosophy.

Department of Microbiology

Head of Department: Professor Paul R. Fisher
 Location: Melbourne (Bundoora) Campus
 Level 1, Thomas Cherry Building
 Tel: (03) 9479 1114
 Web: www.latrobe.edu.au/microbiology

The Department offers units at first, second and third year levels leading to a Bachelor of Science and at the fourth year level, leading to a Bachelor of Science (Honours) in Microbiology. Postgraduate training leading to Masters and Doctoral degrees is also available. The microbiology units are intended to provide a basic education and training in fundamental aspects of general microbiology and the necessary practical skills required for careers in such fields as research, industry, and teaching.

Department of Zoology

Head of Department: Professor Tim New
 Location: Melbourne (Bundoora) Campus
 Level 3, Biological Sciences 1 and 2 Buildings
 Tel: (03) 9479 2237
 Web: www.latrobe.edu.au/zoo

Zoology is the study of animals in all of their many facets. It includes the study of individual animals and populations of animals, their relationships with one another, with plants and with their physical environment. It encompasses many recognised sub-disciplines that fall broadly into two divisions: ecological zoology and physiological zoology. The Department offers units, which cover many sub-disciplines, which reflect the research interests of the staff, including systematics and taxonomy, cell biology, cell, general and comparative physiology, ecology and conservation, biogeography, palaeontology, evolution, behaviour, freshwater ecology, marine biology, morphology, entomology, ornithology, herpetology and economic ecology.

School of Molecular Sciences

Head of School: Professor Nick Hoogenraad
 Tel: (03) 9479 2196
 Fax: (03) 9479 2467
 Email: bioenquiries@latrobe.edu.au
 Web: www.latrobe.edu.au/biochemistry

Department of Biochemistry

Head of Department: Professor Nick Hoogenraad
 Location: Melbourne (Bundoora) Campus
 Level 3, Physical Sciences 4 Building
 Tel: (03) 9479 2196
 Web: www.latrobe.edu.au/biochemistry

The Department offers units that form part of the second and third years in a range of science degrees that may lead to an Honours degree in biochemistry. These units are BCH2BMA and BCH2BMB at second year level, and BCH3BMA and BCH3BMB at third year level. The Department also contributes to MED2IMM at second year level and core units in the Bachelor of Medical Science (MED3MSA and MED3MSB), the Bachelor of Human Nutrition (NUT3ATN and NUT3CPN), and the Bachelor of Bioinformatics/Bachelor of Science double degree (BNF3SEQ and BNF3MOL). These units provide instruction in both theoretical and practical aspects of biochemistry and may be taken with units offered by other departments in the faculty. It is thus possible to vary the course structure to obtain background experience suitable for different professional careers. Postgraduate training to Masters and Doctoral levels is available.

Department of Chemistry

Head of Department: Professor Bob Brownlee
 Location: Melbourne (Bundoora) Campus
 Level 2, Physical Sciences 3 Building
 Tel: (03) 9479 2569
 Web: www.latrobe.edu.au/chemistry

The Department offers units leading to the Bachelor of Science and the Bachelor of Chemical Sciences. These units are intended to provide a thorough and balanced training in chemistry that serves as an excellent prelude to postgraduate research, further courses in allied subjects, industrial appointments, or a career in teaching. Students may major solely in chemistry, or jointly in chemistry and another discipline.

Students intending to proceed to Honours in chemistry are selected based on their performance in the final year of the pass degree course.

Department of Genetics

Head of Department: Dr Neil Murray
 Location: Melbourne (Bundoora) Campus
 Level 2, Biological Sciences 1 Building
 Tel: (03) 9479 1861
 Web: www.latrobe.edu.au/genetics

In the area of Genetics, the Department offers units at first, second and third year levels as part of a number of science degrees. An Honours degree in genetics and a postgraduate diploma are available to graduates of La Trobe and other universities. Masters and Doctoral degrees by research are also available.

The units offered cover a wide range of topics in genetics, including molecular, ecological, conservation, human molecular, and genomics, as well as molecular and organismal evolution, especially of the Australian fauna. Also studied are human biology and human genetics, including the origins of modern humans, human behavioural genetics, immunogenetics, forensic genetics, life style and disease. All units include a significant practical component.

School of Pharmacy and Applied Science

Head of School: Professor Kenneth (Kenn) Raymond
 Location: Bendigo Campus
 Level 3, Applied Science 2 Building
 Tel: (03) 5444 7321
 Fax: (03) 5444 7464
 Email: pharmacy@latrobe.edu.au
 Web: www.latrobe.edu.au/pharmacy

The School of Pharmacy offers:

- Bachelor of Pharmacy
- Bachelor of Science (Both with Honours)
- Bachelor of Chemical Sciences.

And several associated double degrees for high achieving students.

The Department provides quality teaching and prides itself on its teaching methods, including using small classes for most units, which has associated advantages and allows a very personal approach to teaching and plenty of hands-on experience with instrumentation. Employment prospects of graduates for either pharmacy or science degrees are excellent. The Bachelor of Pharmacy is well regarded by the profession. The Biotechnology Research Centre and the Colloid and Environmental Science group within the School are first class research institutes. The Biotechnology Research Centre has a particular interest in the development and understanding of wastewater treatment processes and environmental health by using a wide range of advanced techniques, many of which are taught in the undergraduate program. The Colloid and Environmental Science group has expertise relating to the understanding and modelling the transport of toxic chemicals through soils and water systems. The School encourages good students into honours and PhD programs in pharmacy and science. Many of our PhD graduates have become extremely successful research scientists, with careers that have taken them all over the world.

School of Psychological Science

Head of School: Professor Susan Paxton
 Tel: (03) 9479 1590
 Fax: (03) 9479 1956
 Email: psychology@latrobe.edu.au
 Web: www.latrobe.edu.au/psy

Locations:
 Melbourne (Bundoora) Campus
 George Singer Building
 Tel: (03) 9479 1590
 Albury-Wodonga Campus
 Tel: (02) 6024 9895
 Bendigo Campus:
 Tel: (03) 5444 7440

The School offers a three-year major sequence in psychology that forms the core of the Bachelor of Psychological Science (BPsySc) on each of the three campuses. The sequence at Albury-Wodonga is taught through a combination of distance education lectures using video, conferencing and on-campus practical and tutorial classes. A fourth year Honours-level course that leads to the Bachelor of Psychological Science (Honours) is offered on the Melbourne (Bundoora) Campus. Both the Bachelor of Psychological Science and the Bachelor of Psychological Science (Honours) degrees are accredited by the Australian Psychology Accreditation Council (APAC) and the Australian Psychological Society (APS) with the four-year sequence of psychology units in these degrees providing the basis for provisional registration as a probationary psychologist with the Psychologists' Registration Board of Victoria. Further training and experience is required for full registration as a psychologist. The School also offers an APAC-accredited fourth year program, the Postgraduate Diploma in Psychology, however this Postgraduate Diploma in Psychology will not be offered in 2008.

Units offered by the faculty

A full description of undergraduate and Honours units offered by the Faculty of Science, Technology and Engineering at the Melbourne (Bundoora) Campus appear at the end of this chapter. The units are grouped by discipline and are listed in alphabetical order by unit code. Students should note that units published in the hard copy Handbook are subject to change and should refer to the University web page for up-to-date information www.latrobe.edu.au/udb_public.

Undergraduate courses offered by the faculty

Bachelor of Applied Science (RBAS) – Bendigo

This degree is being phased out. No new enrolments will be permitted from 2007. For full details of this degree structure, see the Bendigo section of this Handbook.

Bachelor of Science (STBSW) – Albury-Wodonga

Only the first year of this degree is offered at the Albury-Wodonga Campus. For details, see the Albury-Wodonga Campus section of this Handbook.

Bachelor of Science (SBSB) – Bendigo

For full details of this degree structure, see the Bendigo Campus section of this Handbook.

Bachelor of Science (SBS) – Melbourne (Bundoora)

The Bachelor of Science is a general degree program that provides students with flexibility to combine studies in their chosen areas of science (subject to satisfying the relevant prerequisites). Areas of study available in the faculty are:

- agricultural science
- biochemistry
- botany
- chemistry
- computer science
- electronics
- genetics
- mathematics
- microbiology
- physics
- psychology¹
- statistics
- zoology.

Key: ¹ Enrolment in psychology is subject to students achieving the minimum ENTER requirement for entry into the Bachelor of Psychological Science degree.

After a broad first year of study, students may take major studies in any of these areas through to third year. Students who qualify for entry are eligible to proceed to an Honours year in their relevant area of science.

Course structure

To qualify for the Bachelor of Science, students must complete units to the value of 360 credit points, normally 120 credit points at each of first, second and third year levels. Up to a total of 130 credit points may be taken outside the faculty. Specific requirements for each year level are given below. Students must establish at least one major area of study in science by taking a sequence of at least 30 credit points at first year level, 40 credit points at second year level and 60 credit points at third year level. Within these requirements, unit selection is limited only by timetable clashes, prerequisite and co-requisite needs, quotas, and specific exclusions relating to incompatible units.

Students who commenced this degree before 2005 must meet the English Language Proficiency requirement in order to graduate. To satisfy this requirement, students should contact the Language and Academic Skills unit to arrange an appointment for an individual assessment of their English proficiency. For students commencing their degree from 2005, the requirements have been met within the course structure.

First year

Students choose units to the value of 90 credit points from science units, with the remaining 30 credit points selected from first year units offered by the Faculty of Science, Technology and Engineering, or by other faculties of the University. Students must choose units at first year level that will lead to the completion of a major area of study in science (60 credit points) at third year level.

Second year

Students choose 80 credit points from units offered by the Faculty of Science, Technology and Engineering which should include 40 credit points from one area of study. The remaining 40 credit points are selected from second year units offered by this or other faculties.

Third year

Students choose units to the value of 60 credit points in one of the areas of study, with the remaining 60 credit points selected from third year units offered by this or other faculties.

Honours

Honours degree students are selected based on their performance in the final year of the pass degree course. Students must obtain a minimum average of 60% across all of their third year units and obtain at least 65% in units germane to the Honours discipline to the value of 60 credit points. Some departments may set higher entrance standards than these. An Honours year may be taken in any of the departments contributing to the pass degree course for which they have the appropriate prerequisites.

Specialisations

Students who include the compulsory units detailed below for one of the specialisations available within the Bachelor of Science, will have their academic record and testamur annotated accordingly, eg, Bachelor of Science with a specialisation in Viticulture.

Bachelor of Science with a specialisation in Environmental Science

This specialisation is based on the physical sciences and addresses environmental problems relating to air, water, land, and energy. The specialisation aims to develop a wide knowledge base, a multidisciplinary view of environmental problems, a critical assessment of scientific information, skills in the analysis of problems and an ability to report on environmental problems. The specialisation focuses on current environmental issues such as water pollution, waste disposal, soil degradation, salination, greenhouse, and teaches the science related to these issues. Seminar, workshop, and project components are included in second and third year and provide vehicles for application of the science in the course and a stimulus for wider investigation. They also encourage the development of skills required to work as an environmental scientist.

Structure:

The specialisation requires students to take 90 credit points at first year level, 70 credit at second year level and 60 credit points at third year levels respectively.

First year (90 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Processes that Shape the Earth	GEO1PRO	15
TE-SEM-1	Physics for Life Sciences A	PHY1LSA	15

Choose one first-semester chemistry unit. Students who have passed VCE Chemistry, Units 3 and 4 or equivalent, must choose CHE1GEN.

TE-SEM-1 or	Basic Chemistry	CHE1BAS	15
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15
TE-SEM-2	Physics for Life Sciences B	PHY1LSB	15
TE-SEM-2	Earth Structure, Resources and History of Life	GEO1ERS	15

Second year (70 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Environmental Enquiry A	ENV2ESA	5
TE-SEM-1	Surface/Groundwater Flow and Chemistry	GEO2EGW	20
TE-SEM-1	Statistics for Life Sciences	STA1LS	15
TE-SEM-2	Environmental Enquiry B	ENV2ESB	5
TE-SEM-2	Chemistry of Water Quality	CHE2CWQ	15
TE-SEM-2	Imaging and Materials Characterisation	PHY2IMC	10

Third year (60 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Advanced Environmental Analytical Chemistry A	CHE3EAA	10
TE-SEM-1	Water Resource Management	ENV3WRM	10
TE-SEM-1 or	Environmental Research	ENV3ENV	10
TE-SEM-2	Greenhouse Effect and Climate Change	PHY3GRE	10
TE-SEM-2	Landscape and Climate Change	GEO3EGL	10
TE-SEM-2	Remote Sensing and GIS	GEO3EGR	10

Honours

Honours degree students are selected based on their performance in the final year of the three-year degree. To be eligible, students must obtain a minimum average of 60% across their third year units and obtain at least 65% in the third year environmental science units. Students enrol in ENV4HNA and ENV4HNB.

Bachelor of Science with a specialisation in Space Science

This specialisation provides students with an understanding of basic principles in areas of space science, including astronomy, relevant to industries using space technology and prepares them for admission to higher degrees in space science and other areas of physical science and mathematics. Students are educated in a broad range of space sciences that includes astronomy, remote sensing, GPS techniques, space weather, and the geospace environment. The specialisation includes basic mathematics and physics, and students can take options from a wide range of units including computer science and electronics.

Structure:

The specialisation requires students to take 75 credit points at first year level, 100 credit points at second year level and 70 credit points at third year levels respectively. At second year level a further mathematics unit (MAT2MEC) is strongly recommended.

First year (75 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Calculus and Number Systems	MAT1CNS	15
TE-SEM-1	Principles of Physics A	PHY1SCA	15
TE-SEM-2	Astronomy and Space: The Infinite Frontier	PHY1AST	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Principles of Physics B	PHY1SCB	15

Second year (100 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Astronomy and Astrophysics	PHY2ASA	15
TE-SEM-1	Principles of Physics A	PHY2SCA	20
TE-SEM-1	Vector Calculus	MAT2VCA	15
TE-SEM-2	Linear Algebra	MAT2LAL	15
TE-SEM-2	Principles of Physics B	PHY2SCB	20
TE-SEM-2	Space Science Instruments	PHY2SPI	15

The following unit is highly recommended:

TE-SEM-2	Mechanics	MAT2MEC	15
----------	-----------	---------	----

Third year (70 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Principles of Physics A	PHY3SCA	30
TE-SEM-2	Principles of Physics B	PHY3SCB	30
TE-SEM-2	Remote Sensing	PHY3REM	10

Honours

Honours degree students are selected based on their performance in the final year of the three-year degree. To be eligible, students must obtain a minimum average of 60% across their third year units and obtain at least 65% in relevant third year units comprising at least 60 credit points. Students enrol in PHY4HNA and PHY4HNB and undertake a space physics project.

Bachelor of Science with a specialisation in Statistics

Statistics play a crucial role in providing the tools necessary for the understanding of scientific, engineering, and economic data. Demand for statisticians is currently high. This specialisation consists of the major in statistics accredited by the Statistical Society of Australia Inc. This major entitles the holder to Graduate Statistician status. The specialisation provides the opportunity to combine significant studies in other disciplines with statistics. Students should see a Statistics Adviser of Studies each year to see how their interests in other disciplines are best combined with statistics.

The specialisation requires the completion of 15 credit points at first year level, 30 credit points at second year level and 60 credit points at third year level. Students taking this specialisation need to have completed maths methods at VCE level. The first year mathematics unit MAT1CNS is recommended.

First year (15 credit points)

Students choose one unit from the following list:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1 or	Statistical Science	STA1SS	15
TE-SEM-1 or	Statistics for Life Sciences	STA1LS	15
TE-SEM-2 or	Statistics for Psychology	STA1PSY	15
The following unit is recommended:			
TE-SEM-1	Calculus and Number Systems	MAT1CNS	15

Second year (30 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Modern Applied Statistics	STA2AS	15
TE-SEM-2	Models for Data Analysis	STA2MD	15

Third year (60 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	Analysis Based on Linear Models	STA3LM	15
TE-SEM-1	Biostatistics	STA3BS	15
TE-SEM-2	Applied Statistics	STA3AS	15
TE-SEM-1	Statistical Inference	STA3SI	15

Honours

Suitably qualified students may be permitted to enrol in an Honours year in statistics. An Honours year consists of units with a total value of 120 credit points and must include a thesis. There is the flexibility to include coursework material from related disciplines and to select a thesis project reflecting a desired vocational orientation.

In a statistics Honours year, a limited number of third year units and/or a limited number of units in related disciplines may be taken subject to the approval of the Honours Coordinator.

Bachelor of Science with a specialisation in Viticulture

The three-year specialisation is designed to provide professional scientific training in all aspects of viticultural science plus practical experience in vineyard operations, with experience in commercial vineyards and wineries and a major placement with a commercial winemaker.

If an honours year is also undertaken, then wine production, winemaking and marketing and oenology are included.

It is expected that graduates will be employed within a wide range of positions in the grape and wine industries.

Industry experience

In the viticulture specialisation within the three-year Bachelor of Science, industry experience in viticulture is required in each of three different climatic regions. In the Honours year, if undertaken a major placement in one or two commercial wineries is required.

The first year of the specialisation covers the basic sciences microeconomics, management of grapevines and palate training. The second year of the specialisation covers advanced sciences, statistics, agribusiness, vineyard operations, and wine appraisal. The agribusiness unit MGF1240 is taught by Monash University and is taken during the winter break as a one-week residential unit. The third year of the specialisation covers advanced sciences plus specialist studies in viticultural science, case studies in viticulture and wine and wine appraisal. In the case studies, students solve problems on real issues in viticulture and winemaking. Entry to a fourth (Honours) year will be based on academic achievement in the prerequisite units AGR3WPT and AGR3VTS.

First year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Microeconomics	ECO1IMI	15
TE-SEM-1	Organisation and Function of Cells and Organisms	BIO1OF	15
TE-SEM-1	Vine Production, Propagation and Establishment	AGR1VPE	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15
TE-SEM-2	Physics for Life Sciences B	PHY1LSB	15
TE-SEM-2	Plant Science	BIO1PS	15
TE-SEM-2	Vineyard Cultivation and Maintenance	AGR1VCM	15

Choose one first-semester chemistry unit. Students who have passed VCE Chemistry, Units 3 and 4 or equivalent, must choose CHE1GEN.

TE-SEM-1 or	Basic Chemistry	CHE1BAS	15
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15

Second year (105 credit points)

Teaching period	Unit name	Unit code	Credit Points
Winter	Introduction to Agribusiness ¹	MGF1240	15
TE-SEM-1	Biochemistry for Agricultural Sciences	AGR2BAS	20
TE-SEM-1	Introduction to Land and Soil Management	AGR2ILM	20
TE-SEM-1	Plant Molecular Biology, Physiology and Nutrition	BOT2MPN	20
TE-SEM-1 or			
TE-SEM-2	Statistics for Life Sciences	STA1LS	15
TE-SEM-2	Vineyard Operations	AGR2VO	15

Third year (90 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Plant Pests and Diseases	AGR3PPD	10
TE-SEM-1	Wine Production Technology	AGR3WPT	20
TE-SEM-1	Viticulture and Wine Production Issues A	AGR3VWA	5
TE-SEM-2	Crop and Vine Agronomy	AGR3CVA	10
TE-SEM-2	Land and Soil Management	AGR3LSM	20
TE-SEM-2	Viticulture and Wine Production Issues B	AGR3VWB	5
TE-SEM-2	Viticultural Science	AGR3VTS	20

Fourth (Honours) year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Wine Making Issues and Marketing	AGR4WMM	15
TE-SEM-1	Wine Production Technology	AGR4WPT	15
TE-SEM-1	Wine Appreciation Project A ²	AGR4WAA	5
TE-SEM-1	Wine Industry /Oenology Project A ³	AGR4WIA	30
TE-SEM-2	Wine Appreciation Project B ²	AGR4WAB	5
TE-SEM-2	Wine Industry/Oenology Project B ³	AGR4WIB	35
TE-SEM-2	Oenology – Wine Science and Analysis	AGR4OEN	15

Key: ¹ Monash University subject. See structure above for full details.

² Linked units: normally taken in the one academic year.

³ Linked units: both units must be taken in the one academic year.

Bachelor of Agricultural Science (SBASW) – Albury-Wodonga

Only the first year of this degree is offered at the Albury-Wodonga Campus. For details, see the Albury-Wodonga Campus section of this Handbook.

Bachelor of Agricultural Science (SBASB) – Bendigo

Only the first year of this degree is offered at the Bendigo Campus. For details, see the Bendigo Campus section of this Handbook.

Bachelor of Agricultural Science (SBAS) – Melbourne (Bundoora)

This course is designed to encourage a basic understanding of the relationships between soils, plants, animals, economics, and the environment. It should be emphasised that the degree is in agricultural science, not in farming. Agriculture is not only an important component of our environment; it reacts with and affects the non-agricultural components. The emphasis in the course is, therefore, on the sciences relevant to an understanding of primary production, resource management and on agribusiness.

The course concentrates on the sciences concerned with soil productivity, plant, and animal production and on agribusiness and marketing. These include soil science, plant and animal nutrition, physiology and biochemistry, plant and animal health, pest ecology and management, agribusiness, statistics and experimental design, and case studies in agricultural production and its impact on the environment.

The applied science and agribusiness studies, which are the foundations of the Bachelor of Agricultural Science, have a highly successful record in leading to a wide variety of careers in agricultural, industrial research and commercial organisations. Professional recognition would apply for graduates, as they could be eligible to become members of the Australian Institute of Agricultural Science and Technology.

Industry experience

An essential requirement of the degree is twelve weeks of approved industry experience, taken during the vacations.

Course structure

The course requires the completion of 480 credit points over four years of full-time or equivalent part-time study. This is a fixed content course.

A new stream in agribusiness is taught in conjunction with Monash University and consists of four units (MGF1240, MKF2761, MGF3760, and MGF3960). This stream will be taken during the winter and summer semester breaks as one-week residential units. The units comprise a disciplinary stream in agribusiness and can be used as prerequisites for the Monash Master in Agribusiness program. Students who commenced this degree before 2005 must meet the English Language Proficiency requirement in order to graduate. To satisfy this requirement, students should contact the Language and Academic Skills unit to arrange an appointment for an individual assessment of their English proficiency. For students commencing their degree from 2005, the requirements have been met within the course structure.

First year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Agricultural Systems	AGR1SYS	15
TE-SEM-1	Organisation and Function of Cells and Organisms	BIO1OF	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15
TE-SEM-2	Genetics, Human Biology and Evolution	BIO1GEN	15
Winter	Introduction to Agribusiness ¹	MGF1240	15
TE-SEM-2	Physics for Life Sciences B	PHY1LSB	15
TE-SEM-2	Plant Science	BIO1PS	15

Choose one first-semester chemistry unit. Students who have passed VCE Chemistry, Units 3 and 4 or equivalent, must choose CHE1GEN.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1 or	Basic Chemistry	CHE1BAS	15
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15

Second year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Biochemistry for Agricultural Sciences	AGR2BAS	20
TE-SEM-1	Introduction to Land and Soil Management	AGR2ILM	20
TE-SEM-1	Plant Molecular Biology, Physiology and Nutrition	BOT2MPN	20
TE-SEM-2	Statistics for Life Sciences	STA1LS	15
Winter	Agribusiness Marketing ¹	MKF2761	15
TE-SEM-2	Landscape Management with GIS and Remote Sensing	AGR2LMG	10
TE-SEM-2	Physiology of Domestic Animals	AGR2PDA	20

Third year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
Summer	International Agribusiness ¹	MGF3760	15
TE-SEM-1	Accounting for Management Decisions	ACC1AMD	15
TE-SEM-1	Animal Health	AGR3ANH	20
TE-SEM-1	Plant Pests and Diseases	AGR3PPD	10
TE-SEM-2	Agriculture Environment Interactions	AGR3AEI	10
TE-SEM-2	Animal Nutrition	AGR3ANN	20
TE-SEM-2	Crop and Vine Agronomy	AGR3CVA	10
TE-SEM-2	Land and Soil Management	AGR3LSM	20

Fourth year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
Summer	Commodity Trading Management ¹	MGF3960	15
TE-SEM-1	Agricultural Case Studies	AGR4ACS	20
TE-SEM-1	Advanced Experimental Design	AGR4AED	10
TE-SEM-1	Communication and Critical Analysis	AGR4CCA	15
TE-SEM-2	Research Project	AGR4RPR	60

Key: ¹ Monash University subject. Refer to course structure above for full details.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Animal and Veterinary Biosciences (SBANS) – Melbourne (Bundoora)

The course is designed to attract students who wish to focus on animal issues, including health and welfare, ecology and behaviour, genetics and biotechnology in a professional degree course. The degree will produce graduates who can obtain employment in animal research, agricultural industries, animal care and welfare, biotechnology industries and the animal health industry. In addition, an animal science degree should allow a student with suitable grades to be eligible for entry into a veterinary science degree. The provision of electives allows a choice of at least five areas of interest within the course, including:

- animal biotechnology
- animal ecology
- animal genetics
- animal health
- animal physiology.

Course structure

The course is three years full-time or equivalent part-time study and requires the completion of 360 credit points. In all years, students may follow their particular interests by combining optional units with their core units.

Students should select elective units carefully to make sure that prerequisites for later year units are met.

Students who commenced this degree before 2005 must meet the English Language Proficiency requirement in order to graduate. To satisfy this requirement, students should contact the Language and Academic Skills unit to arrange an appointment for an individual assessment of their English proficiency. For students commencing their degree from 2005, the requirements have been met within the course structure.

First year (120 credit points)

Please note: those students wishing to be eligible for entry to the second year of the Veterinary Science option at The University of Melbourne, should choose:

- BIO1PS as their elective
- Delete the unit AGR1ANS
- Choose a full-year physics program.

Students who have completed year-12 physics should enrol in PHY1SCA and PHY1SCB (and drop PHY1LSB). Students who have not completed year-12 physics should enrol in PHY1LSA and retain the core unit PHY1LSB.

Core units (105 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Animal Diversity, Ecology and Behaviour	BIO1AD	15
TE-SEM-1	Animal Systems*	AGR1ANS	15
TE-SEM-1	Organisation and Function of Cells and Organisms	BIO1OF	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15
TE-SEM-2	Genetics, Human Biology and Evolution	BIO1GEN	15
TE-SEM-2	Physics for Life Sciences B	PHY1LSB	15

Choose one first-semester chemistry unit. Students who have passed VCE Chemistry, Units 3 and 4 or equivalent, must choose CHE1GEN.

TE-SEM-1 or	Basic Chemistry	CHE1BAS	15
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15

Elective (15 credit points)

Recommended units:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	Statistics for Life Sciences	STA1LS	15
TE-SEM-2	Mathematics and Computing for Biology	MAT1MCB	15
TE-SEM-2 or	Plant Science	BIO1PS	15
	another second-semester unit approved by the course adviser		15

Second year (120 credit points)

Students who pass either AGR2PDA or ZOO2VMP will be eligible for entry to both third year zoology units ZOO3EPA and ZOO3EPB.

Core units (100 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Animal Ecology	ZOO2AE	10
TE-SEM-1	Entomology	ZOO2ENT	10
TE-SEM-2	Animal Nutrition	AGR3ANN	20

Choose one of the following two units:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1 or	Human and Molecular Genetics	GEN2HMG	20
TE-SEM-1	Biochemistry and Molecular Biology A	BCH2BMA	20

Choose one of the following two units:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1 or	Animal Health	AGR3ANH	20
TE-SEM-1	Introductory Microbiology	MIC2IM	20

Choose one of the following two units:

TE-SEM-2 or	Physiology of Domestic Animals	AGR2PDA	20
TE-SEM-2	Vertebrate Morphology, Evolution and Comparative Physiology	ZOO2VMP	20

Elective (20 credit points)

BCH2BMB, GEN2EEG, MIC2MVM, or any other second-semester unit approved by the course adviser.

Third year (120 credit points)*Core units (60 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Zoology A	ZOO3EPA	30
TE-SEM-2	Animals and Mankind	AGR3ANM	30

Electives (60 credit points)

BCH3BMA, BCH3BMB, GEN3HMG, GEN3EEG, MIC3AMM, MIC3AGM, ZOO3EPB (first or second semester) or any other third year unit approved by the course adviser.

Honours

Students who achieve an average mark of 65% or more in 60 credit points of relevant units and a minimum average of 60% across all third year units are eligible for entry to an Honours year. This may be undertaken in any of the departments, which teach core units in the degree, depending on the units taken in third year. The Honours program will be that of the host department or a combination of studies from different departments to allow cross-discipline specialisations. Cross-discipline studies must conform to the faculty guidelines for Honours studies and will be jointly supervised by each of the departments involved.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Biological Sciences (STBBSW) – Albury-Wodonga

Only the first year of this degree is available on the Albury-Wodonga campus. For details, see the Albury-Wodonga Campus section of this Handbook.

Bachelor of Biological Sciences (SBBIS) – Melbourne (Bundoora)**Course structure**

The course is of three years full-time or equivalent part-time duration and requires the completion of 360 credit points. Students must complete units with a total value of at least 120 credit points in each of the first, second and third years of study, with a minimum of 60, 80 and 60 credit points in the first, second and third years respectively from units offered by the Biological Science departments (Biochemistry, Botany, Genetics, Microbiology and Zoology).

Students who commenced this degree before 2005 must meet the English Language Proficiency requirement in order to graduate. To satisfy this requirement, students should contact the Language and Academic Skills unit to arrange an appointment for an individual assessment of their English proficiency. For students commencing their degree from 2005, the requirements have been met within the course structure.

First year (120 credit points)

The first year consists of:

- 60 credit points of biology (see core units below)
- 30 credit points from the Faculty of Science, Technology and Engineering including at least 15 credit points of chemistry (see core units below) and
- 30 credit points of elective units (see recommended unit list below).

Core units (75 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Animal Diversity, Ecology and Behaviour	BIO1AD	15
TE-SEM-1	Organisation and Function of Cells and Organisms	BIO1OF	15
TE-SEM-2	Genetics, Human Biology and Evolution	BIO1GEN	15
TE-SEM-2	Plant Science	BIO1PS	15

Choose one first-semester chemistry unit. Students who have passed VCE Chemistry, Units 3 and 4 or equivalent, must choose CHE1GEN.

TE-SEM-1 or	Basic Chemistry	CHE1BAS	15
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15

Electives (45 credit points)

The remaining 45 credit points may be selected from other units offered by the faculty or, with the approval of the course adviser, from units offered by other faculties, but must include at least one 15-credit point science unit.

Recommended units

Please note: some unit combinations are not possible because of timetable clashes. Other units have prerequisite requirements; these requirements are listed in the full unit descriptions on the Web Database (see www.latrobe.edu.au/udb_public) and should be checked carefully. All units are worth 15 credit points.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Astronomy and Philosophy	PHI1AAP	15
TE-SEM-1	Calculus and Number Systems	MAT1CNS	15
TE-SEM-1	Culture and Globalisation: An Introduction to Anthropology	ANT1CAG	15
TE-SEM-1	Discovering Archaeology	ARC1DAR	15

TE-SEM-1	Psychology A ²	PSY1PYA	15
TE-SEM-1	Self and Community: Introduction to Sociology	SOC1SAC	15
TE-SEM-1	Statistical Science	STA1SS	15
TE-SEM-1	Statistics for Life Sciences	STA1LS	15
TE-SEM-2	Applications of Chemistry ¹	CHE1APL	15
TE-SEM-2	Astronomy and Space: The Infinite Frontier	PHY1AST	15
TE-SEM-2	Australia and Beyond: Introduction to Sociology	SOC1AAB	15
TE-SEM-2	Basic Electronic Circuits	ELE1CCT	15
TE-SEM-2	Biology and Philosophy	PHI1BAP	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Dawn of Humanity	ARC1DOH	15
TE-SEM-2	Earth Structure, Resources and History of Life	GEO1ERS	15
TE-SEM-2	Our Global Village: Introduction to Anthropology	ANT1FET	15
TE-SEM-2	Intermediate Object Oriented Programming	CSE1IOO	15
TE-SEM-2	Mathematics and Computing for Biology	MAT1MCB	15
TE-SEM-2	Physics for Life Sciences B	PHY1LSB	15
TE-SEM-2	Principles of Physics B ³	PHY1SCB	15
TE-SEM-2	Psychology B ²	PSY1PYB	15
TE-SEM-2	Statistics for Life Sciences	STA1LS	15
TE-SEM-2	Statistics for Psychology ²	STA1PSY	15
TE-SEM-2	The Archaeology of Ancient Civilisations	ARC1AAC	15
TE-SEM-2	Existence, Value and God	PHI1TAS	15

Key: ¹ In order to proceed to second year biochemistry or soil science, students must take CHE1APL in addition to either CHE1GEN or CHE1BAS.

² Enrolment in PSY1PYA and PSY1PYB is subject to students achieving the minimum ENTER required for entry into the Bachelor of Psychological Science program. Students wishing to proceed to second year level psychology must also include STA1PSY in their choice of units. Consult an adviser of studies in the School of Psychological Science.

³ Linked units, normally taken in the one academic year.

Second year (120 credit points)

The second year consists of:

- 80 credit points of biology (from the core units listed below) and
- 40 credit points from other units or further biology units (see list of recommended units below).

Core units (80 credit points)

Students must choose units to the value of 80 credit points from the list below. Unless a clearly defined three-year program of study has been organised, it is highly recommended that students complete a full year of study in at least two biological science disciplines in order to ensure flexibility of unit choice at the third year level.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Animal Ecology ¹	ZOO2AE	10
TE-SEM-1	Biochemistry and Molecular Biology A	BCH2BMA	20
TE-SEM-1	Entomology ¹	ZOO2ENT	10
TE-SEM-1	Human and Molecular Genetics	GEN2HMG	20
TE-SEM-1	Introductory Microbiology	MIC2IM	20
TE-SEM-1	Plant Molecular Biology, Physiology and Nutrition	BOT2MPN	20
TE-SEM-2	Australian Ecology and Systematics	BOT2AES	20
TE-SEM-2	Biochemistry and Molecular Biology B	BCH2BMB	20
TE-SEM-2	Ecological and Evolutionary Genetics	GEN2EEG	20
TE-SEM-2	Medical and Veterinary Microbiology	MIC2MVM	20
TE-SEM-2	Vertebrate Morphology, Evolution and Comparative Physiology ²	ZOO2VMP	20

Key: ¹ Linked units – must be taken together.

² ZOO2VMP and AGR2PDA cannot be taken together in the one year.

Electives (40 credit points)

The remaining 40 credit points must be selected from the above core units or from other second year units (see recommended list below) in the Faculty of Science, Technology and Engineering or, with the approval of the course adviser, from second year units offered by other faculties.

Recommended units include:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Anatomy: Lower Limb	HBS2ALL	20
TE-SEM-1	Biostatistics	STA2BS	20
TE-SEM-1	Fundamentals of Chemistry	CHE2FND	20
TE-SEM-1	History and Philosophy of Science A ¹	PHI2HPA	20
TE-SEM-1	Human Physiology A	HBS2HPA	20
TE-SEM-1	Introduction to Land and Soil Management	AGR2ILM	20
TE-SEM-1	Issues in Conservation	CBE2IC	20
TE-SEM-1	Principles of Nutrition	AGR2PNU	20
TE-SEM-1	Psychology A	PSY2PYA	20
TE-SEM-1 or			
TE-SEM-2	Statistics for Life Sciences ³	STA2LS	20
TE-SEM-2	Anatomy: Trunk and Upper Limb	HBS2ATL	20
TE-SEM-2	Chemistry of Water Quality	CHE2CWQ	15
TE-SEM-2	Developments in Chemistry	CHE2DEV	20
TE-SEM-2	History and Philosophy of Science B ²	PHI2HPB	20
TE-SEM-2	Human Physiology B	HBS2HPB	20
TE-SEM-2	Introduction to Atmospheric Science	ENV2AIR	20
TE-SEM-2	Physiology of Domestic Animals ⁴	AGR2PDA	20
TE-SEM-2	Psychology B	PSY2PYB	20

Key: ¹ Incompatible with PHI1AAP

² Incompatible with PHI1BAP

³ Incompatible with STA1LS

⁴ ZOO2VMP and AGR2PDA cannot be taken together in the same year.

Third year (120 credit points)

The third year consists of:

- 60 credit points of biology chosen from units offered by departments in the biological sciences (see core units below) and
- 60 credit points from other units or additional biology units, if no more than 60 credit points are taken from any one biological science discipline area. All units are worth 30 credit points.

Core units (60 credit points)

Students must choose units to the value of 60 credit points from the list below. All units are worth 30 credit points.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Advanced Medical and Veterinary Microbiology	MIC3AMM	30
TE-SEM-1	Biochemistry and Molecular Biology 3A	BCH3BMA	30
TE-SEM-1	Field and Environmental Botany	BOT3FEB	30
TE-SEM-1	Human and Molecular Genetics	GEN3HMG	30
TE-SEM-1	Zoology A	ZOO3EPA	30
TE-SEM-2	Ecological and Evolutionary Genetics	GEN3EEG	30
TE-SEM-2	Ecology, Systematics and Evolution	BOT3ESE	30
TE-SEM-2	Advanced General Microbiology	MIC3AGM	30
TE-SEM-2	Biochemistry and Molecular Biology 3B	BCH3BMB	30
TE-SEM-2	Plant Biotechnology	BOT3PB	30
TE-SEM-2	Zoology B	ZOO3EPB	30

Electives (60 credit points)

The remaining 60 credit points must be selected from the above core units or from other third year units in the Faculty of Science, Technology and Engineering or, with the approval of the course adviser, from third year units offered by other faculties.

Programs of study

Most students in biological sciences choose two major areas of study from the five subject areas available. For those who wish to tailor their courses in particular directions, the following table is designed to assist students planning their course of study at second and third year levels. Listed below are programs of study available with suitable combinations of units from the Biological Science Departments. Honours courses relevant to these programs are available in each of the five Biology Departments. Some units at second and third year levels have prerequisites. Units with one prerequisite are marked ¹ and units with more than one prerequisite are marked ². You should carefully check prerequisites when planning your course of study.

Ecology

To study in the area of ecology, students enrol in:

Second year		Third year	
Teaching period I	Teaching period II	Teaching period I	Teaching period II
Choose three of: ZOO2AE ¹ and ZOO2ENT ² BOT2MPN ² MIC2IM ¹ CBE2IC	Choose three of: GEN2EEG ¹ BOT2AES ¹ MIC2MVM ² ZOO2VMP ²	BOT3FEB ¹ ZOO3EPA ¹	Choose two of: BOT3ESE ¹ ZOO3EPB ¹ GEN3EEG ¹

Human biology

To study in the area of human biology, students enrol in:

Second year		Third year	
Teaching period I	Teaching period II	Teaching period I	Teaching period II
BCH2BMA ² GEN2HMG ¹ MIC2IM ¹	Choose three of: BCH2BMB ² GEN2EEG ¹ MIC2MVM ² ZOO2VMP ¹	Choose two of: BCH3BMA ² GEN3HMG ² MIC3AMM ² ZOO3EPA ¹	Choose two of: BCH3BMB ² GEN3EEG ¹ MIC3EPM ² ZOO3EPB ¹

Note: Third year zoology components are chosen from the physiology stream.

Cell and molecular biology

To study in the area of cell and molecular biology, students enrol in:

Second year		Third year	
Teaching period I	Teaching period II	Teaching period I	Teaching period II
Choose three of: BCH2BMA ² BOT2MPN ² GEN2HMG ¹ MIC2IM ¹	Choose three of: BCH2BMB ² GEN2EEG ¹ MIC2MVM ¹ ZOO2VMP	Choose two of: BCH3BMA ² GEN3HMG ¹ MIC3AMM ² ZOO3EPA ¹	Choose two of: BCH3BMB ² BOT3PB ¹ MIC3EPM ² ZOO3EPB ¹

Honours

Honours degree students are selected based on their performance in the final year of the pass degree course. Students must obtain a minimum average of 60% across all of their third year units and obtain at least 65% in units germane to the Honours discipline to the value of 60 credit points. Some departments may set higher entrance standards than these. An Honours year may be taken in any of the departments contributing to the pass degree course for which they have the appropriate prerequisites.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Biological Sciences (Advanced Science) (SBBAS) – Melbourne (Bundoora)

This course is aimed at high-achieving students interested in pursuing a career in biological research and development in Universities, government or commercial research institutions. Students will meet each semester with the course adviser to plan a course of study. Students will be involved in biological research throughout the course and so will have much greater knowledge and experience in this area than other graduates. In this way, they will benefit from the research partnerships of La Trobe University with government and semi-government research agencies.

Course structure

The course is of three years full-time or equivalent part-time duration and requires the completion of 360 credit points. Students must complete units with a total value of at least 120 credit points in each of the first, second and third years of study, with a minimum of 60, 40 and 60 credit points in the first, second and third years respectively from units offered by the Biological Science departments (Biochemistry, Botany, Genetics, Microbiology and Zoology).

At each year of the course, a specified proportion of the laboratory work will be undertaken in the research laboratories under the supervision of research staff.

In 2008, students will undertake two research laboratory practicals per semester in BIO1OF (first semester) and BIO1GEN (second semester).

Articulation

Students in the Bachelor of Biological Sciences who achieve an average grade of 80% or more in a year will be eligible to transfer to this Advanced Science degree.

Interested students should consult the Course Adviser.

First year (120 credit points)

The first year consists of:

- 60 credit points of biology (see core units below)
- at least 15 credit points of chemistry (see core units below)
- 45 credit points from the Faculty of Science, Technology and Engineering.

Core units (75 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Animal Diversity, Ecology and Behaviour	BIO1AD	15
TE-SEM-1	Organisation and Function of Cells and Organisms	BIO1OF	15
TE-SEM-2	Genetics, Human Biology and Evolution	BIO1GEN	15
TE-SEM-2	Plant Science	BIO1PS	15

Choose one first-semester chemistry unit. Students who have passed VCE Chemistry, Units 3 and 4 or equivalent, must choose CHE1GEN.

TE-SEM-1 or	Basic Chemistry	CHE1BAS	15
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15

Electives (45 credit points)

The remaining 45 credit points must be selected from other units offered by the Faculty of Science, Technology and Engineering. Students wishing to proceed to Biochemistry or Land and Soil Management at second year must include CHE1APL in their choice of units.

Recommended units

Please note: some unit combinations are not possible because of timetable clashes. Other units have prerequisite requirements; these requirements are listed in the full unit descriptions on the Unit Database (see www.latrobe.edu.au/udb_public) and should be checked carefully. All units are worth 15 credit points.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Calculus and Number Systems	MAT1CNS	15
TE-SEM-1	Discrete Mathematics	MAT1DM	15
TE-SEM-1	Information Technology Fundamentals	CSE1ITF	15
TE-SEM-1	Object Oriented Programming Fundamentals	CSE1OOF	15
TE-SEM-1	Introductory Electronics	ELE1IEL	15

TE-SEM-1	Physics for Life Sciences A	PHY1LSA	15
TE-SEM-1	Principles of Physics A ²	PHY1SCA	15
TE-SEM-1	Processes that Shape the Earth	GEO1PRO	15

TE-SEM-2	Psychology B	PSY1PYB	15
TE-SEM-2	Statistics for Life Sciences	STA1LS	15

Key: ¹ In order to proceed to second year biochemistry or Land and Soil Management, students must take CHE1APL in addition to either CHE1GEN or CHE1BAS.

² Linked units, normally taken in the one academic year.

Second year (120 credit points)

The second year consists of:

- 80 credit points of biology (from the core units listed below) and
- 40 credit points from further biology units or from other science units (see list of recommended units below).

Core units (80 credit points)

Students must choose units to the value of 80 credit points from the list below.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Animal Ecology ¹	ZOO2AE	10
TE-SEM-1	Biochemistry and Molecular Biology A	BCH2BMA	20
TE-SEM-1	Entomology ¹	ZOO2ENT	10
TE-SEM-1	Human and Molecular Genetics	GEN2HMG	20

TE-SEM-2	Medical and Veterinary Microbiology	MIC2MVM	20
TE-SEM-2	Vertebrate Morphology, Evolution and Comparative Physiology	ZOO2VMP	20

Key: ¹ Linked units – must be taken together.

Electives (40 credit points)

The remaining 40 credit points must be selected from the above core units or from other second year units (see recommended list below) in the Faculty of Science, Technology and Engineering.

Recommended units include:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Biostatistics	STA2BS	20
TE-SEM-1	Fundamentals of Chemistry	CHE2FND	20
TE-SEM-1	Introduction to Land and Soil Management	AGR2ILM	20
TE-SEM-1	Issues in Conservation	CBE2IC	20
TE-SEM-1	Principles of Nutrition	AGR2PNU	20
TE-SEM-1	Psychology A	PSY2PYA	20
TE-SEM-1 or			
TE-SEM-2	Statistics for Life Sciences ¹	STA2LS	20
TE-SEM-2	Chemistry of Water Quality	CHE2CWQ	15
TE-SEM-2	Developments in Chemistry	CHE2DEV	20
TE-SEM-2	Psychology B	PSY2PYB	20

Key: ¹ Incompatible with STA1LS

Third year (120 credit points)

The third year consists of:

- 60 credit points of biology chosen from units offered by departments in the biological sciences (see core units below) and
- 60 credit points from additional biology units or other science units, if no more than 60 credit points are taken from any one biological science discipline area.

Core units (60 credit points)

Students must choose units to the value of 60 credit points from the list below.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Advanced Medical and Veterinary Microbiology	MIC3AMM	30
TE-SEM-1	Biochemistry and Molecular Biology 3A	BCH3BMA	30
TE-SEM-1	Field and Environmental Botany	BOT3FEB	30
TE-SEM-1	Human and Molecular Genetics	GEN3HMG	30
TE-SEM-1	Zoology A	ZOO3EPA	30
TE-SEM-2	Ecological and Evolutionary Genetics	GEN3EEG	30
TE-SEM-2	Ecology, Systematics and Evolution	BOT3ESE	30
TE-SEM-2	Advanced General Microbiology	MIC3AGM	30
TE-SEM-2	Biochemistry and Molecular Biology 3B	BCH3BMB	30
TE-SEM-2	Plant Biotechnology	BOT3PB	30
TE-SEM-2	Zoology B	ZOO3EPB	30

Electives (60 credit points)

The remaining 60 credit points must be selected from the above core units or from other third year units in the Faculty of Science, Technology and Engineering.

Honours

Honours degree students are selected based on their performance in the final year of the pass degree course. Students must obtain a minimum average of 60% across all of their third year units and obtain at least 65% in units germane to the Honours discipline to the value of 60 credit points. An Honours year may be taken in any of the departments contributing to the pass degree course for which they have the appropriate prerequisites.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Biotechnology and Cell Biology (SBBCB) – Melbourne (Bundoora)

Biotechnology is the use or manipulation of living organisms or their components to perform tasks of practical benefit. It is making important contributions to medicine, waste technology, agriculture, food technology, and renewable resources technology.

The aim of the degree program is to:

- provide students with a multidisciplinary education in biotechnology and cell biology based on the core units of biochemistry, botany, chemistry, genetics, microbiology, and zoology
- lead to employment in industry and government
- provide a basis for postgraduate studies in any of the core disciplines covered in the course.

Seminar program

During the first and second year of the degree, students are required to attend a meeting and a seminar every few months during the semester. Seminar speakers are drawn from external bodies to present perspectives not otherwise strongly developed in the main course and to discuss applications of concepts in the course.

Course structure

The course is of three years full-time or equivalent part-time duration and requires the completion of 360 credit points overall.

Students who commenced this degree before 2005 must meet the English Language Proficiency requirement in order to graduate. To satisfy this requirement, students should contact the Language and Academic Skills unit to arrange an appointment for an individual assessment of their English proficiency. For students commencing their degree from 2005, the requirements have been met within the course structure.

First year (120 credit points)**Core units (105 credit points)**

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Animal Diversity, Ecology and Behaviour	BIO1AD	15
TE-SEM-1	Organisation and Function of Cells and Organisms	BIO1OF	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15
TE-SEM-2	Genetics, Human Biology and Evolution	BIO1GEN	15
TE-SEM-2	Plant Science	BIO1PS	15

Choose one first-semester chemistry unit. Students who have passed VCE Chemistry, Units 3 and 4 or equivalent, must choose CHE1GEN.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1 or	Basic Chemistry	CHE1BAS	15
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15

Choose at least one mathematics or statistics unit:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	Mathematics and Computing for Biology	MAT1MCB	15
TE-SEM-1 or			
TE-SEM-2	Statistics for Life Sciences	STA1LS	15

Electives (15 credit points)

The remaining 15 credit points may be selected from other units offered by the faculty or, with the approval of the course adviser, from units offered by other faculties.

Second year (120 credit points)

Students must choose six units to the value of 120 credit points from the list below. Unless a clearly defined three-year program of study has been organised, it is highly recommended that students complete a full year of study in at least two disciplines in order to ensure flexibility of unit choice at the third year level. Any variation from the units listed below requires the approval of the course adviser.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Biochemistry and Molecular Biology A	BCH2BMA	20
TE-SEM-1	Fundamentals of Chemistry	CHE2FND	20
TE-SEM-1	Human and Molecular Genetics	GEN2HMG	20
TE-SEM-1	Introductory Microbiology	MIC2IM	20
TE-SEM-1	Plant Molecular Biology, Physiology and Nutrition	BOT2MPN	20
TE-SEM-2	Biochemistry and Molecular Biology B	BCH2BMB	20
TE-SEM-2	Developments in Chemistry	CHE2DEV	20
TE-SEM-2	Ecological and Evolutionary Genetics	GEN2EEG	20
TE-SEM-2	Medical and Veterinary Microbiology	MIC2MVM	20
TE-SEM-2	Vertebrate Morphology, Evolution and Comparative Physiology	ZOO2VMP	20

Third year (120 credit points)

Students must choose units to the value of 120 credit points from the list below.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Selected Topics for Joint Chemistry Major	CHE3ADA	30
TE-SEM-1	Advanced Medical and Veterinary Microbiology	MIC3AMM	30
TE-SEM-1	Biochemistry and Molecular Biology 3A	BCH3BMA	30
TE-SEM-1	Human and Molecular Genetics	GEN3HMG	30
TE-SEM-2	Materials and Methods for a Joint Chemistry Majorsx	CHE3ADB	30
TE-SEM-2	Advanced General Microbiology	MIC3AGM	30
TE-SEM-2	Biochemistry and Molecular Biology 3B	BCH3BMB	30
TE-SEM-2	Plant Biotechnology	BOT3PB	30
TE-SEM-2	Zoology B (physiology components only)	ZOO3EPB	30

Honours

Students who achieve an average of 65% or more in 60 points of relevant third year units and 60% across all of their third year units are eligible to continue to an interdisciplinary Honours year in biotechnology and cell biology, or in appropriate departments according to the units taken in third year.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this

chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Chemical Sciences (SBCHSW) – Albury-Wodonga

Only the first year of this degree is offered at the Albury-Wodonga campus. For details, see the Albury-Wodonga Campus section of this Handbook.

Bachelor of Chemical Sciences (RBSCS) – Bendigo

For full details of this degree structure, see the Bendigo Campus section of this Handbook.

Bachelor of Chemical Sciences (SBCHS) – Melbourne (Bundoora)

This course will produce graduates trained in areas relevant to the needs of the chemical industry in Australia. It provides students with a modern education in chemistry and skills in areas where there is a high demand from industry, e.g., analytical chemistry, surface science and the synthesis of biologically active organic compounds. Consultation with industry confirms that there is a continuing demand for well-qualified chemistry graduates, particularly at the Honours level.

The course is accredited by the Royal Australian Chemical Institute. Accreditation means that it is an acceptable qualification for membership of the Institute, often required by employers.

Course structure

The course is of three years full-time or equivalent part-time duration and requires the completion of 360 credit points. Students complete units to the value of 120 credit points each year.

Students who commenced this degree before 2005 must meet the English Language Proficiency requirement in order to graduate. To satisfy this requirement, students should contact the Language and Academic Skills unit to arrange an appointment for an individual assessment of their English proficiency. For students commencing their degree from 2005, the requirements have been met within the course structure.

The table below summarises the credit point requirement

Year level	Chemistry	Science units	Other units	Total
1	30	60–90 ¹	0–30	120
2	60	20–60	0–40	120
3	60–120	0–60	0–40	120

Key: ¹ Including 15 credit points of mathematics or physics units.

First year (120 credit points)

Core units (30 credit points)

Choose one first-semester and one second-semester chemistry unit:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1 or	Basic Chemistry	CHE1BAS	15
TE-SEM-1 and	General Principles of Chemistry	CHE1GEN	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15

Electives (90 credit points)

Students must choose first year science units to the value of 60 points, which must include at least 15 credit points of mathematics or physics units. The remaining 30 credit points may be chosen from first year units offered by any faculty.

Second year (120 credit points)

Core units (60 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Fundamentals of Chemistry	CHE2FND	20
TE-SEM-2	Chemistry in the Real World	CHE2RWD	20
TE-SEM-2	Developments in Chemistry	CHE2DEV	20

Electives (60 credit points)

Students must choose second year science units to the value of 20 points. The remaining 40 points may be chosen from second year units offered by any faculty.

Third year (120 credit points)

Core units (60 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Selected Topics for a Joint Chemistry Major	CHE3ADA	30
TE-SEM-2	Materials and Methods for a Joint Chemistry Majors	CHE3ADB	30

Electives (60 credit points)

Recommended units:

TE-SEM-1	Complementary Topics for Pure Chemistry Majors	CHE3SPA	30
TE-SEM-2	Structures and Reactions for Pure Chemistry Majors	CHE3SPB	30

Or third year level units to the value of 60 credit points including at least 20 credit points of third year level science.

Honours

Honours degree students are selected based on their performance in the final year of the pass degree course. Students must obtain a minimum average of 60% across all of their third year units and obtain at least 65% in chemistry units to the value of 60 credit points. It may be possible to arrange for a student in the Honours year to undertake a chemical project jointly with other departments in the faculty.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Computer Network Engineering (SBCNE) – Melbourne (Bundoora)

The Bachelor of Computer Network Engineering was introduced in response to needs expressed by the Government and the ICT industry for more engineering professionals skilled in the area of computer networking. It is a four-year pass or Honours degree, and provides the opportunity to be a specialist network engineer who can provide a totally integrated solution for the design, installation, and operation of complex computer systems focusing on computer networks. A distinguishing feature of the course is the fourth year thesis, which provides students with research skills and the opportunity to study a current research area within the field of computer networking in great depth. Graduates of the course are eligible for membership of Engineers Australia and the Australian Computer Society.

Upon completion of this course, students should possess:

- a comprehensive knowledge and understanding of the core body of mathematics physics, electronics and computer science subject matter that forms the academic basis of computer engineering;
- in-depth knowledge and understanding of the digital circuitry constituting computer hardware, as evidenced through completion of a digital electronics design project in which this knowledge is applied;
- high level skills in developing software using high level languages, with a current emphasis on C++ and Java;
- proficiency in applying an object-oriented approach to software systems analysis, design and implementation;
- a sound knowledge of the basic engineering principles and methodologies underlying the analysis design and implementation of total systems composed of hardware, software, and an interface between the two;
- depending on electives chosen, advanced knowledge and skills in other areas of computer science including networks and communications, software engineering, intelligent systems, compilers and systems software, numerical computing ;
- skills in the management of resources and technology, as required of an engineering professional;
- skills and abilities necessary to function effectively in project teams as a manager, leader or team member;
- written and oral communication skills enabling effective

communication with professional colleagues and the wider community;

- ability to engage in lifelong learning, and
- an appreciation of pertinent social, legal, ethical, and environmental issues faced by today's engineering professional.

Articulation

Students who have completed the Bachelor of Computer Technology may apply for entry to the third year of this course.

Industry experience

Students are required to complete at least twelve weeks of certified practical experience before being deemed to have completed the course. This is usually undertaken during the annual vacation following the third year of the course.

Scholarships

First year scholarships are available for high achieving local students. Prospective candidates should contact the Department of Computer Science and Computer Engineering early in their year-12 studies for details.

CISCO Program

A CISCO certification training program is available for students who have passed the units CSE2/3NET, CSE3PPR, and CSE3LAN in their undergraduate studies. From 2008, students will be required to take CSE2NEF and CSE3INE. Any students interested in obtaining full details of this CISCO program should contact the Department of Computer Science and Computer Engineering at the beginning of first semester.

Course structure

Duration of the course is of four years full-time or equivalent part-time and requires the completion of 480 credit points overall.

In the first and second years, students study a fixed combination of units in computer science and electronics, together with mathematics, computer systems, physics, and engineering management. In the third and fourth years, there is a comprehensive specialisation in computer networks. A major industry-relevant project must be completed in third year and a research project in the student's final year.

First year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Calculus and Probability for Engineers	MAT1CPE	15
TE-SEM-1	Introductory Electronics	ELE1IEL	15
TE-SEM-1	Object Oriented Programming Fundamentals	CSE1OOF	15
TE-SEM-1	Discrete Mathematics	MAT1DM	15
TE-SEM-2	Basic Electronic Circuits	ELE1CCT	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Intermediate Object Oriented Programming	CSE1IOO	15
TE-SEM-2	Object Oriented Programming Using C++	CSE1CPP	15

Second year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Microprocessors and Digital Design	ELE2MDD	15
TE-SEM-1	Network Engineering Fundamentals	CSE2NEF	15
TE-SEM-1	Principles of Physics A	PHY1SCA	15
TE-SEM-1 or			
TE-SEM-2	Algorithms and Data Structures	CSE2ALG	15
TE-SEM-2	Artificial Intelligence Fundamentals	CSE2AIF	15
TE-SEM-2	Digital Design with Programmable Logic	ELE2DDP	15
TE-SEM-2	Mathematics Topics for Computer Science	MAT2MFC	15
TE-SEM-2	System Design Engineering Fundamentals	CSE2DES	15

Third year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Intermediate Network Engineering	CSE3INE	15
TE-SEM-1	Software Engineering Project A ¹	CSE3PRA	15
TE-SEM-1	System Design and Methodologies	CSE3SDM	15
TE-SEM-2	Applied Probability for Computer Systems Engineers	STA3AP	15
TE-SEM-2	Networks, Systems and Web Security	CSE3NSW	15
TE-SEM-2	Operating Systems	CSE3OSS	15
TE-SEM-2	Software Engineering Project B ¹	CSE3PRB	15

Plus a further 15 credit points of computer science units chosen from the following:

TE-SEM-1	Database Fundamentals	CSE2DBF	15
TE-SEM-1	Embedded Processors	ELE3EMB	15

Key: ¹ Linked units: both units must be taken in the one academic year

Fourth year (120 credit points)

Eligible students may choose either the Thesis (60 credit points) or the Engineering Project (45 credit points). Those students wishing to undertake the Engineering Project must have completed the required prerequisite units and have obtained approval from the fourth year coordinator in the Department of Computer Science and Computer Engineering and the Department of Electronic Engineering.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Applied Management for Engineers	ELE4EMT	15
TE-SEM-1	Thesis A	CSE4THA	30
TE-SEM-2	Wireless Network Engineering	CSE4WNE	15
TE-SEM-2	Thesis B	CSE4THB	30

Plus a further 30 credit points of computer science units chosen from the following:

TE-SEM-2	Mobile and Pervasive Computing	CSE4MPC	15
TE-SEM-2	Performance Analysis of Computer Systems	CSE4PCS	15
TE-SEM-2	Pervasive Network Design	CSE4PND	15

Honours

Students completing the degree will have their degree awarded with Honours provided they are accepted as Honours candidates at the beginning of their final year. Entry to the Honours course is based on academic performance in third year. Those students not eligible for entry to Honours are required to undertake the Major Computer Engineering Project units (CSE4CPA and CSE4CPB) (45 credit points) and an additional third or fourth year level computer science unit, in place of Thesis A (CSE4THA) and Thesis B (CSE4THB) (60 credit points).

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Computer Science (SBCE) – Melbourne (Bundoora)

The Bachelor of Computer Science offers a comprehensive and highly flexible program of study in the fields of hardware, software, and their underlying principles. The course offers an extensive range of topics with the opportunity to specialise in 'streams' in the areas of Artificial Intelligence, Data Engineering, Network or Software Engineering. Distinctive features of the course are its heavy emphasis on object-oriented systems, and its emphasis on practical work. The course also allows students to take some units from outside the Department of Computer Science and Computer Engineering. It is a three-year full-time course, and the Honours program requires a further year of study. The degree is accredited by the Australian Computer Society (ACS).

Upon completion of this course, students should possess:

- a comprehensive knowledge and understanding of the core body of mathematics and computer science required for the construction of information processing systems;
- a comprehensive understanding of the different types of information technology tools, and their role in managing knowledge and information
- an understanding of the role of modern information systems within organisations and familiarity with the business settings in which these systems are used;
- an ability to critically evaluate currently existing information technology systems and new developments
- familiarity with the latest developments in information technology
- skills in software engineering and object-oriented programming currently using Java;
- skills and abilities necessary to function effectively in project teams;

- written and oral communication skills enabling effective communication with professional colleagues and the wider community;
- ability to engage in lifelong learning, and
- an appreciation of pertinent social, legal, and ethical issues faced by today's computing professional.

Scholarships

First year scholarships are available for high achieving students. Prospective candidates should contact the Department of Computer Science and Computer Engineering early in their year-12 studies for details.

CISCO Program

A CISCO certification training program is available for students who have passed the units CSE2/3NET, CSE3PPR, and CSE3LAN in their undergraduate studies. From 2008, units required are CSE2NEF and CSE3INE. Any students interested in obtaining full details of this CISCO program should contact the Department of Computer Science and Computer Engineering at the beginning of first semester.

Course structure

The course is of three years full-time or equivalent part-time duration and requires the completion of 360 credit points. In the first year, students select units from a list of core and recommended units from within the disciplines of computer science and mathematics. Elective units may be chosen from units offered by any department. In the second and third years of the degree, students select available computer science and elective units. In the third year of the degree, students must include either the software engineering project, CSE3PRA and CSE3PRB (30 credit points) or the programming project, CSE3PRG (30 credit points) in their choice of units. Students may choose to take one of the 'streams' available in the second and third years.

Mid-year commencement

Students entering the course mid year with equivalent year-12 studies will commence second semester on 30th June 2008, three weeks earlier than the normal commencement date for that teaching period. Some students with prior tertiary studies may also be required to commence their course on 30th June. These students will be advised by the faculty office at the time of offer.

First year (120 credit points)

Core units (90 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Calculus and Number Systems	MAT1CNS	15
TE-SEM-1	Object Oriented Programming Fundamentals	CSE1OOF	15
TE-SEM-1	Discrete Mathematics	MAT1DM	15
TE-SEM-2	Intermediate Object Oriented Programming	CSE1IOO	15
TE-SEM-2	Mathematics Topics for Computer Science	MAT2MFC	15
TE-SEM-2	Object Oriented Programming Using C++	CSE1CPP	15

Electives (30 credit points)

The remaining 30 credit points may be chosen from first year units offered by any department, subject to meeting the prerequisites for those units. The unit BUS1MIS is not permitted.

Second year (120 credit points)

Core units (90 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Computer System Architecture	CSE2CSA	15
TE-SEM-1	Database Fundamentals	CSE2DBF	15
TE-SEM-1 or TE-SEM-2	Algorithms and Data Structures	CSE2ALG	15
TE-SEM-2	Artificial Intelligence Fundamentals	CSE2AIF	15
TE-SEM-2	Professional Environment	CSE3PE	15
TE-SEM-2	System Design Engineering Fundamentals	CSE2DES	15

Electives (30 credit points)

The remaining 30 credit points may be chosen from units offered by any department, subject to meeting the prerequisites for those units. The units BUS2BAD and MGT2BCO are not permitted.

Third year (120 credit points)

Students are required to take 90 credit points of third year level computer science units from the 'streams' or from the list below. Students must include either the software engineering project CSE3PRA and CSE3PRB (30 credit points) or CSE3PRG (30 credit points) in their choice of units.

Core units (90 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	System Design and Methodologies	CSE3SDM	15
TE-SEM-1 or TE-SEM-2	Third year level computer science units chosen from the lists below.		75

Electives (30 credit points)

The remaining 30 credit points may be chosen from units offered by any department and may include further computer science units from the list below or the business unit BUS3EBS.

Students may also choose to include one of the following computer science specialty 'streams' in their structure:

Software Engineering Stream:

Teaching period	Unit name	Unit code	Credit Points
Second year:			
TE-SEM-1	System Testing and Quality	CSE2STQ	15
Third year:			
TE-SEM-1	Metrics Quality and Reliability	CSE3MQR	15
TE-SEM-1	System Design and Methodologies	CSE3SDM	15

Data Engineering Stream:

Teaching period	Unit name	Unit code	Credit Points
Second year:			
TE-SEM-1	Internet Client Engineering	CSE2ICE	15
Third year:			
TE-SEM-1	Database Management Systems	CSE3DMS	15
TE-SEM-2	Web Applications Engineering	CSE3WAE	15

Artificial Intelligence Stream:

Teaching period	Unit name	Unit code	Credit Points
Third year:			
TE-SEM-1	Artificial Intelligence: Logic and Reasoning	CSE3ALR	15
TE-SEM-2	Computational Intelligence	CSE3CI	15

Network Engineering Stream:

Teaching period	Unit name	Unit code	Credit Points
Second year:			
TE-SEM-1 or SEM-2	Network Engineering Fundamentals	CSE2NEF	15
Third year:			
TE-SEM-1	Intermediate Network Engineering	CSE3INE	15
TE-SEM-2	Networks, Systems and Web Security	CSE3NSW	15

The remaining 15 credit points may be chosen from the list below:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Intelligent Multimedia Systems	CSE3IMS	15
TE-SEM-1	Intermediate Graphics Programming	CSE3IGR	15
TE-SEM-2	Intermediate Games Technology	CSE3IGT	15
TE-SEM-2	Object-Oriented Application Development	CSE3OAD	15
TE-SEM-2	Operating Systems	CSE3OSS	15

Honours

Honours degree students are selected based on their performance in the final year of the pass degree course. To qualify for entry to the Honours year in computer science students must obtain a minimum average of 60% across all of their third year units and obtain an average of at least 70% over their best 60 credit points of third year level computer science and computer engineering units (project included), the units CSE3PRA and CSE3PRB (30 credit points) and CSE3PRG (30 credit points) will count as 15 credit points only in this calculation. Meeting this requirement, however, does not guarantee a place in the Honours year as resources may limit the total number of places available, and students are expected to find a supervisor prior to re-enrolment.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Computer Science in Games Technology (SBCSGT) – Melbourne (Bundoora)

Accompanying the expansion of computer power and functionality in recent years has been a huge growth in the popularity and accessibility of increasingly realistic games and the establishment of a vibrant games development industry. In addition to specialist knowledge and skills in areas like computer software development, graphics, multimedia programming, and artificial intelligence – fundamentals, games developers also need a solid grounding in mathematics and physics. The Bachelor of Computer Science in Games Technology provides the necessary theoretical basis, plus practical training in games design and development, and prepares students for a career in the dynamic and rapidly transforming world of computer games production, as ICT professionals. It is a three-year, full-time course and the Honours program requires a further year of study. Graduates of the course are eligible for membership of the Australian Computer Society (ACS).

Upon completion of this course, students should possess:

- a comprehensive knowledge and understanding of the core body of mathematics and computer science required for the construction of information processing systems;
- a comprehensive understanding of the different types of information technology tools, and their role in managing knowledge and information;
- an understanding of the role of modern information systems within organisations and familiarity with the business settings in which these systems are used;
- an ability to critically evaluate currently existing information technology systems and new developments;
- familiarity with the latest developments in information technology;
- skills in software engineering and object-oriented programming currently using Java;
- skills and abilities necessary to function effectively in project teams;
- written and oral communication skills enabling effective communication with professional colleagues and the wider community;
- ability to engage in lifelong learning; and
- an appreciation of pertinent social, legal, and ethical issues faced by today's computing professional.

Scholarships

First year scholarships are available for high achieving students. Prospective candidates should contact the Department of Computer Science and Computer Engineering early in their year-12 studies for details.

Course structure

The course is of three years full-time or equivalent part-time duration and requires the completion of 360 credit points. In the first year, students take units designed to provide them with basic knowledge and skills in computer science, mathematics, and physics, including programming skills in Java and C++ programming languages. In the second year students concentrate on developing further knowledge in the areas of mathematics needed for games development and building on understanding of key computer science topics. The third year includes visual basic programming, games technology (using games development in, Direct X), multimedia systems for web games, network communication protocols for massive multi-player online games and control of input/output devices. Students also undertake a major industry-sponsored games technology project during this year. Students who meet entrance requirements for Honours may proceed to the Honours year and will have the opportunity to take specialised units at an advanced level.

Mid-year commencement

Some students with prior tertiary studies may be required to commence their course on 30th June 2008, three weeks earlier than the normal commencement for that teaching period. These students will be advised by the faculty office at the time of offer.

First year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Discrete Mathematics	MAT1DM	15
TE-SEM-1	Calculus and Number Systems	MAT1CNS	15
TE-SEM-1	Object Oriented Programming Fundamentals	CSE1OOF	15
TE-SEM-1	Principles of Physics A ¹	PHY1SCA	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Intermediate Object Oriented Programming	CSE1IOO	15
TE-SEM-2	Object Oriented Programming Using C++	CSE1CPP	15
TE-SEM-2	Principles of Physics B ¹	PHY1SCB	15

Key: ¹ PHY1SCA plus another 15-credit point, first year level unit from any faculty may be taken, if PHY1SCA and PHY1SCB are not appropriate.

Second year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Computer System Architecture	CSE2CSA	15
TE-SEM-1	Database Fundamentals	CSE2DBF	15
TE-SEM-1	Physics for Games Technology	PHY2GAM	15
TE-SEM-1 or			
TE-SEM-2	Algorithms and Data Structures	CSE2ALG	15
TE-SEM-2	Advanced C++ for Games Technology	CSE2ACG	15
CSE2AIF	15		
TE-SEM-2	Artificial Intelligence Fundamentals	CSE2AIF	15
TE-SEM-2	Mathematics Topics for Computer Science	MAT2MFC	15
TE-SEM-2	System Design Engineering Fundamentals	CSE2DES	15

Core units (105 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Intermediate Graphics Programming	CSE3IGR	15
TE-SEM-1	Network Engineering Fundamentals	CSE2NEF	15
TE-SEM-1	System Design and Methodologies	CSE3SDM	15
TE-SEM-1	Software Engineering Project A ¹	CSE3PRA	15
TE-SEM-2	Professional Environment	CSE3PE	15
TE-SEM-2	Intermediate Games Technology	CSE3IGT	15
TE-SEM-2	Software Engineering Project B ¹	CSE3PRB	15

Electives (15 credit points)

The remaining 15 credit points may be chosen from units offered by any department and may include further computer science units.

Key: ¹ Both units must be taken in the one academic year.

Honours

Honours degree students are selected based on their performance in the final year of the pass degree course. Students must obtain a minimum average of 60% across all of their third year units and obtain an average of at least 70% over their best third year level computer science units to the value of 60 credit points (project included) to qualify for entry to the Honours year. The units CSE3PRA and CSE3PRB will be counted as 15 credit points only in this calculation. Meeting this requirement, however, does not guarantee a place in the Honours year as resources may limit the total number of places available and students are expected to find a supervisor prior to enrolment.

Fourth (Honours) year (120 credit points)

Core units (105 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Thesis A	CSE4THA	30
TE-SEM-1	Advanced Games Programming Technology	CSE4AGT	15
TE-SEM-1	Pattern Recognition	CSE4PRN	15
TE-SEM-2	Advanced Graphics	CSE4AGR	15
TE-SEM-2	Thesis B	CSE4THB	30

Electives (15 credit points)

Plus a further computer science unit chosen from the following list:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Advanced Databases	CSE4ADB	15
TE-SEM-1	Advanced System Design	CSE4ASD	15
TE-SEM-1	Decision Support Systems	CSE4DSS	15
TE-SEM-1	Multi-Agent Systems	CSE4MAS	15
TE-SEM-1	Real-Time Fault Tolerant Systems	CSE4RFS	15
TE-SEM-1	Web Services Engineering	CSE4WSE	15
TE-SEM-2	Advanced Quality and Reliability	CSE4AQR	15
TE-SEM-2	Business Intelligence Engineering	CSE4BIE	15
TE-SEM-2	Communication Protocol Engineering	CSE4CPE	15
TE-SEM-2	Data Mining	CSE4DMI	15
TE-SEM-2	Entrepreneurship in IT	CSE4ENT	15
TE-SEM-2	Mobile and Pervasive Computing	CSE4MPC	15
TE-SEM-2	Performance Analysis of Computer Systems	CSE4PCS	15
TE-SEM-2	Pervasive Network Design	CSE4PND	15
TE-SEM-2	Wireless Network Engineering	CSE4WNE	15

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Computer Systems Engineering (SBCSE) – Melbourne (Bundoora)

The Bachelor of Computer Systems Engineering produces graduates skilled in the design of large systems, consisting of hardware and software. It is a four-year pass or Honours degree, and provides the opportunity to be an expert in the design of the computer and its digital components, large software systems, computer architecture, the design and analysis of embedded systems and design of large communication networks and associated software. Specialisations are available in Software Engineering and Network Engineering. A distinguishing feature of the course is the fourth year thesis, which provides students with research skills and the opportunity to study a current research area in great depth. The course is accredited by both Engineers Australia and the Australian Computer Society (ACS).

Upon completion of this course, students should possess:

- a comprehensive knowledge and understanding of the core body of mathematics physics, electronics and computer science subject matter that forms the academic basis of computer engineering;
- in-depth knowledge and understanding of the digital circuitry constituting computer hardware, as evidenced through completion of a digital electronics design project in which this knowledge is applied;
- high level skills in developing software using high level languages, with a current emphasis on C++ and Java;
- proficiency in applying an object-oriented approach to software systems analysis, design and implementation;
- a sound knowledge of the basic engineering principles and methodologies underlying the analysis design and implementation of total systems composed of hardware, software, and an interface between the two;
- depending on electives chosen, advanced knowledge and skills in other areas of computer science including networks and communications, software engineering, intelligent systems, compilers and systems software, numerical computing;
- skills in the management of resources and technology, as required of an engineering professional;
- skills and abilities necessary to function effectively in project teams as a manager, leader or team member;
- written and oral communication skills enabling effective communication with professional colleagues and the wider community;
- ability to engage in lifelong learning, and
- an appreciation of pertinent social, legal, ethical, and environmental issues faced by today's engineering professional.

Articulation

Students who have completed the Bachelor of Computer Technology may apply for entry to the third year of this course.

Industry experience

Students are required to complete at least twelve weeks of certified practical experience before being deemed to have completed the course. This is usually undertaken during the annual vacation following the third year of the course.

Scholarships

First year scholarships are available for high achieving local students. Prospective candidates should contact the Department of Computer Science and Computer Engineering early in their year-12 studies for details.

CISCO Program

A CISCO certification-training program is available for students who passed the units CSE2/3NET, CSE3PPR, and CSE3LAN in their undergraduate studies. From 2008, students will take CSE2NEF and CSE3INE. Any students interested in obtaining full details of this CISCO program should contact the Department of Computer Science and Computer Engineering at the beginning of first semester.

Course structure

The course is of four years full-time or equivalent part-time duration and requires the completion of 480 credit points. In the first and second years, students study a fixed combination of units in computer science and electronics, together with mathematics, computer systems, physics, and engineering management. In the third and fourth years, students may select from a range of units in software engineering (the design of large software systems) or network engineering (the design and implementation of computer networks). A major industry-relevant project must be completed in third year and a research project in the student's fourth year. A student may choose to take the Engineering Project (ELE4EPA and ELE4EPB) 45 points and an additional fourth year level computer science elective in place of the fourth year thesis (CSE4THA and CSE4THB) 60 points. Those students who choose to take the Engineering project must ensure they complete the required prerequisite units and obtain approval from the Department of Electronic Engineering.

First year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Calculus and Probability for Engineers	MAT1CPE	15
TE-SEM-1	Introductory Electronics	ELE1IEL	15
TE-SEM-1	Object Oriented Programming Fundamentals	CSE1OOF	15
TE-SEM-1	Discrete Mathematics	MAT1DM	15
TE-SEM-2	Basic Electronic Circuits	ELE1CCT	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Intermediate Object Oriented Programming	CSE1IOO	15
TE-SEM-2	Object Oriented Programming Using C++	CSE1CPP	15

Second year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Microprocessors and Digital Design	ELE2MDD	15
TE-SEM-1	Network Engineering Fundamentals	CSE2NEF	15
TE-SEM-1	Principles of Physics A	PHY1SCA	15
TE-SEM-1 or			
TE-SEM-2	Algorithms and Data Structures	CSE2ALG	15
TE-SEM-2	Artificial Intelligence Fundamentals	CSE2AIF	15
TE-SEM-2	Digital Design with Programmable Logic	ELE2DDP	15
TE-SEM-2	Mathematics Topics for Computer Science	MAT2MFC	15
TE-SEM-2	System Design Engineering Fundamentals	CSE2DES	15

Third year (120 credit points)

Core units (105 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	System Design and Methodologies	CSE3SDM	15
TE-SEM-1	Software Engineering Project A ²	CSE3PRA	15
TE-SEM-2	Software Engineering Project B ²	CSE3PRB	15
TE-SEM-2	Operating Systems	CSE3OSS	15
TE-SEM-2	Applied Probability for Computer Systems Engineers	STA3AP	15

Plus a further 30 credit points of computer science units chosen from the following:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Database Fundamentals	CSE2DBF	15
TE-SEM-1	Embedded Processors	ELE3EMB	15
TE-SEM-1	Intermediate Network Engineering	CSE3INE	15
TE-SEM-1	System Testing and Qualify	CSE2STQ	15

Electives (15 credit points)

The remaining 15 credit points may be chosen from the list below:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Artificial Intelligence: Logic and Reasoning	CSE3ALR	15
TE-SEM-1	Database Management Systems	CSE3DMS	15
TE-SEM-1	Intelligent Multimedia Systems	CSE3IMS	15
TE-SEM-1	Intermediate Graphics Programming	CSE3IGR	15
TE-SEM-2	Computational Intelligence	CSE3CI	15
TE-SEM-2	Professional Environment	CSE3PE	15
TE-SEM-2	Intermediate Games Technology	CSE3IGT	15
TE-SEM-2	Networks, Systems and Web Security	CSE3NSW	15
TE-SEM-2	Metrics Quality and Reliability	CSE3MQR	15
TE-SEM-2	Object-Oriented Application Development	CSE3OAD	15
TE-SEM-2	Operating Systems	CSE3OSS	15
TE-SEM-2	Web Applications Engineering	CSE3WAE	15

Fourth year (120 credit points)

Core units (90 credit points)

Eligible students may choose either the Thesis (60 credit points) or the Engineering Project (45 credit points). Those students wishing to undertake the Engineering Project must have completed the required prerequisite units and have obtained approval from the fourth year coordinator in the Department of Computer Science and Computer Engineering and the Department of Electronic Engineering.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Applied Management for Engineers	ELE4EMT	15
TE-SEM-1	Thesis A	CSE4THA	30
TE-SEM-2	Thesis B	CSE4THB	30
TE-SEM-2	Performance Analysis of Computer Systems	CSE4PCS	15

Electives (30 credit points)

30 credit points must be chosen from the list of units below.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Advanced Databases	CSE4ADB	15
TE-SEM-1	Advanced Games Programming Technology	CSE4AGT	15
TE-SEM-1	Advanced System Design	CSE4ASD	15
TE-SEM-1	Decision Support Systems	CSE4DSS	15
TE-SEM-1	Multi-Agent Systems	CSE4MAS	15
TE-SEM-1	Pattern Recognition	CSE4PRN	15
TE-SEM-1	Real-Time Fault Tolerant Systems	CSE4RFS	15
TE-SEM-1	Web Services Engineering	CSE4WSE	15
TE-SEM-2	Performance Analysis of Computer Systems	CSE4PCS	15
TE-SEM-2	Pervasive Network Design	CSE4PND	15
TE-SEM-2	Advanced Graphics	CSE4AGR	15
TE-SEM-2	Advanced Quality and Reliability	CSE4AQR	15
TE-SEM-2	Business Intelligence Engineering	CSE4BIE	15
TE-SEM-2	Communication Protocol Engineering	CSE4CPE	15
TE-SEM-2	Data Mining	CSE4DMI	15
TE-SEM-2	Entrepreneurship in IT	CSE4ENT	15
TE-SEM-2	Mobile and Pervasive Computing	CSE4MPC	15
TE-SEM-2	Wireless Network Engineering	CSE4WNE	15

Honours

Students completing the degree will have their degree awarded with Honours provided they are accepted as Honours candidates at the beginning of their final year. Entry to the Honours course is based on academic performance in third year. Those students not eligible for entry to Honours are required to undertake the Major Computer Engineering Project units (CSE4CPA and CSE4CPB) (45 credit points) and an additional third or fourth year level computer science unit, in place of Thesis A (CSE4THA) and Thesis B (CSE4THB) (60 credit points).

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Computer Technology (SBCT) – Melbourne (Bundoora)

This degree is being phased out. No new enrolments will be permitted from 2008.

The Bachelor of Computer Technology degree is a three-year, professionally oriented course designed to produce engineering technologists with the knowledge and skills in computer science and computer technology, which will enable them to work as computer engineering technologists. The course aims to develop students' communication and management skills and to develop their self-education skills and flexibility of mind in a world of rapid technological change. A distinguishing feature of the course is its emphasis on solving practical real-world problems.

Articulation

After successful completion of the course, students who have achieved sufficiently good results may apply to transfer to the Bachelor of Computer Systems Engineering course. Those admitted would be given credit equivalent to two years of study in units determined by the course adviser. Interested students should contact the Department of Computer Science and Computer Engineering for further details.

Industry experience

In accordance with the requirements of Engineers Australia, students must complete at least eight weeks of approved practical experience before being deemed to have completed the course. This is normally obtained during the vacation following the end of the second year of the course.

Scholarships

First year scholarships are available for high achieving students. Prospective candidates should contact the Department of Computer Science and Computer Engineering early in their year-12 studies for details.

CISCO Program

A CISCO certification program is available for students who pass the units CSE2/3NET, CSE3PPR, and CSE3LAN in their undergraduate studies. Any students interested in obtaining full details of this CISCO program should contact the Department of Computer Science and Computer Engineering at the beginning of first semester.

Course structure

The program combines studies in computer science, computer systems engineering, engineering management and computer technology, as well as electronics, physics and mathematics. The course content is fixed for the first two years. Electives in computer science allow students the opportunity to specialise in the areas of software systems, networking and expert systems in their final year of study.

First year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Calculus and Number Systems	MAT1CNS	15
TE-SEM-1	Discrete Mathematics	MAT1DM	15
TE-SEM-1	Object Oriented Programming Fundamentals	CSE1OOF	15
TE-SEM-1	Introductory Electronics	ELE1IEL	15
TE-SEM-2	Basic Electronic Circuits	ELE1CCT	15
TE-SEM-2	Mathematics Topics for Computer Science	MAT2MFC	15
TE-SEM-2	Intermediate Object Oriented Programming	CSE1IOO	15
TE-SEM-2	Object Oriented Programming Using C++	CSE1CPP	15

Second year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Algorithms and Data Structures	CSE2ALG	15
TE-SEM-1	Computer System Architecture	CSE2CSA	15

TE-SEM-1	Network Engineering Fundamentals	CSE2NEF	15
TE-SEM-1	Microprocessors and Digital Design	ELE2MDD	15
TE-SEM-2	Artificial Intelligence Fundamentals	CSE2AIF	15
TE-SEM-2	Digital Design with Programmable Logic	ELE2DDP	15
TE-SEM-2	Professional Environment	CSE3PE	15
TE-SEM-2	System Design Engineering Fundamentals	CSE2DES	15

Third year (120 credit points)*Core units (60 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Applied Management for Engineers	ELE4EMT	15
TE-SEM-1	Database Fundamentals	CSE2DBF	15
TE-SEM-1	System Design and Methodologies	CSE3SDM	15
TE-SEM-1	Intermediate Network Engineering	CSE3INE	15

Electives (60 credit points)

Students may include the unit ELE3EDA.

TE-SEM-1 or			
TE-SEM-2	Computer Science units		60

This must include either the software engineering project CSE3PRA¹ and CSE3PRB¹ (30 credit points) or the programming project CSE3PRG (30 credit points).

Key: ¹ Linked units: both units must be taken in the one academic year.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Conservation Biology and Ecology (SBCBE) – Melbourne (Bundoora)

Under the influence of the biodiversity crisis, the discipline of conservation biology and ecology has developed into an important field of study, drawing material from all areas of biology and from economics, law and management, and with its own conceptual and theoretical strengths. The aim of the degree program is therefore:

- to provide students with a multidisciplinary education in conservation biology and ecology based on the core units of botany, genetics, microbiology and zoology, plus appropriate areas from mathematics and statistics, management, and policy
- to lead to employment in conservation-based positions in local, state and federal government and in research in biology generally
- to provide a degree leading to postgraduate studies in any of the core disciplines covered in the course.

Seminar program

Students may be required to attend a meeting or a seminar each month of the semester. The seminar speakers are chosen to present perspectives not otherwise strongly developed in the main course and to discuss applications of concepts in the course.

Course structure

The course is of three years full-time or equivalent part-time duration and requires the completion of 360 credit points overall. In all years, students have freedom to follow their particular interests by the choice of optional units to combine with their core units. Students should select units carefully to make sure that prerequisites for later year units are met.

Students who commenced this degree before 2005 must meet the English Language Proficiency requirement in order to graduate. To satisfy this requirement, students should contact the Language and Academic Skills unit to arrange an appointment for an individual assessment of their English proficiency. For students commencing their degree from 2005, the requirements have been met within the course structure.

First year (120 credit points)*Core units (105 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Animal Diversity, Ecology and Behaviour	BIO1AD	15
TE-SEM-1	Organisation and Function of Cells and Organisms	BIO1OF	15
TE-SEM-1	Processes that Shape the Earth	GEO1PRO	15
TE-SEM-2	Statistics for Life Sciences	STAT1S	15
TE-SEM-2	Genetics, Human Biology and Evolution	BIO1GEN	15
TE-SEM-2	Plant Science	BIO1PS	15

Choose one first-semester chemistry unit. Students who have passed VCE Chemistry, Units 3 and 4 or equivalent, must choose CHE1GEN.

TE-SEM-1 or	Basic Chemistry	CHE1BAS	15
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15

Electives (15 credit points)

Any first year level science unit not already taken as a core unit.

Recommended unit options are:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	Earth Structure, Resources and History of Life	GEO1ERS	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15
TE-SEM-2	Mathematics and Computing for Biology	MAT1MCB	15

Second year (120 credit points)*Core units (80 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Animal Ecology ¹	ZOO2AE	10
TE-SEM-1	Entomology ¹	ZOO2ENT	10
TE-SEM-1	Issues in Conservation	CBE2IC	20
TE-SEM-2	Australian Ecology and Systematics	BOT2AES	20
TE-SEM-2	Ecological and Evolutionary Genetics	GEN2EEG	20

Key: ¹ Linked units. Normally taken in the one academic year.

Electives (40 credit points)

Science units to the value of 40 points subject to meeting the prerequisite requirements for those units. Recommended units:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Biostatistics	STA2BS	20
TE-SEM-1	Introduction to Land and Soil Management	AGR2ILM	20
TE-SEM-1	Introductory Microbiology	MIC2IM	20
TE-SEM-2	Landscape and Climate Change	GEO2EGL	10
TE-SEM-2	Remote Sensing and GIS	GEO2EGR	10

Third year (120 credit points)*Core unit (30 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Applications in Conservation	CBE3AC	30

Electives (90 credit points)

Units to the value of 90 credit points, chosen from the following list:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Field and Environmental Botany	BOT3FEB	30
TE-SEM-1	Zoology A	ZOO3EPA	30
TE-SEM-2	Ecological and Evolutionary Genetics	GEN3EEG	30
TE-SEM-2	Ecology, Systematics and Evolution	BOT3ESE	30
TE-SEM-2	Advanced General Microbiology	MIC3AGM	30
TE-SEM-2	Zoology B	ZOO3EPB	30

Other units may be substituted but only with the approval of the course adviser.

Honours

Students achieving an average mark of 65% in relevant third year units constituting at least 60 credit points and an overall average at third year level of 60 are eligible to continue to an inter-disciplinary Honours year in conservation biology and ecology, or in appropriate departments according to the units taken at third year level.

A full description of units, including the unit name, unit code, credit

points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Electronic Engineering (SBEE) – Melbourne (Bundoora)

The Bachelor of Electronic Engineering is a four-year (pass and Honours) course offering specialisations in biomedical, communication, electronic systems, and optical engineering. The course has a strong emphasis on project work as it introduces students to electronics related pure and engineering sciences, computing, mathematics and management practices. Students develop an appreciation of the role of engineers in the community and an awareness of the social and environmental effects of their decisions. Graduates may apply for membership of Engineers Australia at the grade of Professional Engineer and seek employment in industry as an electronic engineer. Graduates completing the biomedical engineering specialty can, after holding a position of professional responsibility in biomedical engineering, apply for registration with the College of Biomedical Engineers. This program is fully accredited by Engineers Australia.

Biomedical engineering

The provision of first-rate health care and the prevention of disease are priorities for the 21st century. Advances in medicine in recent years have been assisted by new technology, including the applications of advanced electronics.

Biomedical engineers are at the forefront of the rapidly expanding, high-technology provision of these health services, including such fields as patient monitoring systems for operating theatres and intensive care units, computerised medical imaging and monitoring, artificial organs, neural prostheses and life-support systems, hospital safety and equipment management, as well as all other aspects of technology applied to medicine.

Communication engineering

The communications engineer today is faced with many challenges because of the rapid advances in computer, internet, multimedia, and telecommunication technologies. For example, mobile phones have become readily available, the introduction of optical fibres has improved long distance communications, and the move to digital techniques has allowed many new features to be introduced to the telephone network. Communications is now of great importance to organisations of all sizes and to all people. As a result, communications is now the fastest growing industry sector in the world.

Electronic systems engineering

New developments in the field of electronics continue to appear at an ever-increasing rate and microelectronics has made an impact in nearly every aspect of our lives. An immense amount of computing power can now be provided by microprocessors for embedded systems and robotics. Modern scientific and industrial instrumentation relies heavily on electronic techniques of measurement, storage, processing, and display of information. Electronic control systems are an integral part of modern society in industrial, commercial, and domestic environments.

Optical engineering

The 21st century will be the age of photonics and optical engineering, when opto-electronics and light (photons) will replace electrons as the principal transmission carrier, as well as in some signal processing and sensing applications. Using optical engineering techniques, massive amounts of information (for example, telephone conversations, television signals and data communications) can be transmitted as light waves through an optical fibre that is thinner than a human hair. The main emphasis in the optical engineering specialisation is centred on fibre-optic systems and related optical devices.

Entry with advanced standing

Students who have completed or partially completed a Diploma or Certificate studies may be granted advanced standing.

Industry experience

Students are required to complete at least 12 weeks certified practical experience under the guidance of an experienced engineer before being deemed to have completed the course and therefore qualify to graduate. This is preferably undertaken during the annual vacation following the third year of the course but may be done at the conclusion of the final year.

Scholarships

First year scholarships are available for high achieving students. Prospective candidates should contact the Department of Electronic Engineering early in their Year-12 studies for details.

Course structure

The course consists of units with a total work value of 480 credit points, taken over four years or an equivalent part-time duration. For professional accreditation purposes, the syllabus is mostly fixed, with the first two years common to all students and a selection of specialised units available in the third and fourth years. Students may elect to specialise in biomedical, communication, electronic systems, or optical engineering. Practical work forms an important part of the course and is compulsory. The third and fourth years of the course comprise a common core, with specialty units and the final year engineering project taken according to the specialist stream chosen. The course comprises the following units:

First year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Introductory Electronics	ELE1IEL	15
TE-SEM-1	Calculus and Probability for Engineers	MAT1CPE	15
TE-SEM-1	C Programming for Engineers and Scientists	CSE1CES	15
TE-SEM-1	Principles of Physics A	PHY1SCA	15
TE-SEM-2	Basic Electronic Circuits	ELE1CCT	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Electronic Engineering Design Project	ELE1EDP	15
TE-SEM-2	Principles of Physics B	PHY1SCB	15

Second year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Electrical Systems and Design	ELE2ELE	15
TE-SEM-1	Linear Circuits and Signals	ELE2CIR	15
TE-SEM-1	Microprocessors and Digital Design	MAT2MDD	15
TE-SEM-1	Vector Calculus	MAT2VCA	15
TE-SEM-2	Digital Design with Programmable Logic	ELE2DDP	15
TE-SEM-2	Analogue Circuits and Interfacing	ELE2ANI	15
TE-SEM-2	Linear Algebra	MAT2LAL	15
TE-SEM-2	Physics for Engineering	PHY2EPB	15

Third year (120 credit points)

Core units (90 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Communication Systems	ELE3CMN	15
TE-SEM-1	Control Systems	ELE3CON	15
TE-SEM-1	Embedded Processors	ELE3EMB	15
TE-SEM-1	Instrumentation Electronics and Sensors	ELE3IES	15
TE-SEM-2	Digital Signal Processing	ELE3SIP	15
TE-SEM-2	Third Year Project	ELE3PRO	15

Specialty option (15 credit points)

Students must undertake a specialty unit from one of the following streams.

Biomedical Engineering Stream:

TE-SEM-2	Biomedical Engineering A	ELE3BIO	15
----------	--------------------------	---------	----

Optical and Communication Engineering Streams:

TE-SEM-2	Digital Communication Systems	ELE3DCS	15
----------	-------------------------------	---------	----

Electronic Systems Stream:

TE-SEM-2	Electronic Design Automation – Tools and Techniques	ELE3DDE	15
----------	---	---------	----

Elective unit (15 credit points)

Students may take 15 credit points of third year level units available in other electronic streams as listed above or from other units available in the School of Engineering and Mathematical Sciences, or the University, for which they are eligible to enrol.

Recommended electives from within the School:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	Applied Probability for Computer Systems Engineers	STA3AP	15
TE-SEM-2	Linear Programming and Game Theory	MAT3LPG	15

Fourth year (120 credit points)*Core units (60 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Applied Management for Engineers	ELE4EMT	15
TE-SEM-1	Engineering Project A ¹	ELE4EPA	15
TE-SEM-2	Engineering Project B ¹	ELE4EPB	30

Specialty options (30 credit points)

Students must undertake two specialty units from one of the following streams.

Biomedical Engineering Stream:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Biomedical Engineering	ELE4BME	15
TE-SEM-2	Clinical Engineering	ELE4CLN	15

Communication Engineering Stream:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	Advanced Communication Systems	ELE4ACS	15
TE-SEM-2	Communication Networks	ELE4NET	15

Electronic Systems Stream:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Advanced Digital Systems Design	ELE4ADD	15
TE-SEM-2	Digital Control Theory	ELE4DCT	15

Optical Engineering Stream:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	Optical Fibre Communication Systems	ELE4OFC	15
TE-SEM-2	Communication Networks	ELE4NET	15

Elective units (30 credit points)

Any other electronics units from the fourth year recommended list or other units as approved by the course adviser.

Recommended list of fourth year electronic units.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Advanced Digital Systems Design	ELE4ADD	15
TE-SEM-1	Advanced Signal Processing	ELE4ASP	15
TE-SEM-1	Advanced Topics A ²	ELE4ATA	15
TE-SEM-1	Biomedical Engineering	ELE4BME	15
TE-SEM-1	Reconfigurable Computing Hardware ²	ELE4RCH	15
TE-SEM-1	Radio Frequency Design	ELE4RFD	15
TE-SEM-1 or TE-SEM-2	Directed Study ³	ELE4DIR	15
TE-SEM-2	Advanced Communication Systems	ELE4ACS	15
TE-SEM-2	Advanced Instrumentation Electronics	ELE4AAE	15
TE-SEM-2	Advanced Topics B ²	ELE4ATB	15
TE-SEM-2	Antennas and Propagation	ELE4ANS	15
TE-SEM-2	Clinical Engineering	ELE4CLN	15
TE-SEM-2	Communication Networks	ELE4NET	15
TE-SEM-2	Digital Control Theory	ELE4DCT	15
TE-SEM-2	Image Processing and Coding ²	ELE4IPC	15
TE-SEM-2	Optical Fibre Communication Systems	ELE4OFC	15
TE-SEM-2	Optical Fibre Sensors ²	ELE4OFS	15

Key: ¹ Linked units: both units must be taken in the one academic year.

² Unit not available in 2008.

³ Enrolment in ELE4DIR requires the approval of the Bachelor of Electronic Engineering Course Adviser.

The recommended units available may vary from year to year according to staff availability and student demand. Details of the units available, and the teaching period in which they will run, will be finalised in February of each year.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Electronic Technology (SBET) – Melbourne (Bundoora)

The Bachelor of Electronic Technology is a three-year course that prepares students for the profession of engineering technology in the field of electronics and offers minor specialisations in biomedical, optical and communication and electronic systems engineering. It introduces students to electronic engineering technology and develops an understanding of the pure and engineering sciences, computing, mathematics and management practices needed in the profession of electronic technology. Students develop an appreciation of the role of engineering technologists in the community, and an awareness of the social and environmental effects of their decisions. Graduates may apply for membership of Engineers Australia at the grade of Affiliate and seek employment in industry as an engineering technologist. This program is fully accredited by Engineers Australia.

Biomedical engineering

The provision of first-rate health care and the prevention of disease are priorities for the 21st century. Advances in medicine in recent years have been assisted by new technology, including the applications of advanced electronics.

Biomedical engineers are at the forefront of the rapidly expanding, high-technology provision of these health services, including such fields as patient monitoring systems for operating theatres and intensive care units, computerised medical imaging and monitoring, artificial organs, neural prostheses and life-support systems, hospital safety and equipment management, as well as all other aspects of technology applied to medicine.

Optical and Communication engineering

Technologists working in the area of optical and communication engineering are faced with many challenges because of the rapid advances in computer, internet, multimedia, and telecommunications technologies. For example, mobile phones have become common and the move to digital techniques has allowed many new features to be introduced to the telephone network. The introduction and expansion of optical fibre networks has meant that massive amounts of information (for example telephone conversations, television signals and data communications) can be transmitted as light waves. This specialisation emphasises the digital communications techniques, which underpin many of these developments.

Electronic systems engineering

New developments in the field of electronics continue to appear at an ever-increasing rate and microelectronics has made an impact in nearly every aspect of our lives. An immense amount of computing power can now be provided by microprocessors for embedded systems and robotics. Modern scientific and industrial instrumentation relies heavily on electronic techniques of measurement, storage, processing, and display of information. Electronic control systems are an integral part of modern society in industrial, commercial, and domestic environments.

Entry with advanced standing

Students who have completed or partially completed a Diploma or Certificate studies may be granted advanced standing.

Articulation to Bachelor of Electronic Engineering

Students who have passed the Bachelor of Electronic Technology may apply to articulate to the Bachelor of Electronic Engineering degree. For such students it may be possible to complete the Bachelor of Electronic Engineering with a further 150 credit points of study over at least one year.

Industry experience

Students are required to complete at least 8 weeks certified practical experience under the guidance of an experienced engineer before being deemed to have completed the course and therefore qualify to graduate. This is preferably undertaken during the annual vacation following the second year of the course but may be done at the conclusion of the final year.

Scholarships

First year scholarships are available for high achieving students. Prospective candidates should contact the Department of Electronic Engineering early in their Year-12 studies for details.

Course structure

The course consists of units with a total work value of 360 credit points, taken over three years full-time or an equivalent part-time duration. It has many units in common with the first three years of the Bachelor of Electronic Engineering course.

First year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Introductory Electronics	ELE1IEL	15
TE-SEM-1	Calculus and Probability for Engineers	MAT1CPE	15
TE-SEM-1	C Programming for Engineers and Scientists	CSE1CES	15
TE-SEM-1	Principles of Physics A	PHY1SCA	15
TE-SEM-2	Basic Electronic Circuits	ELE1CCT	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Electronic Engineering Design Project	ELE1EDP	15
TE-SEM-2	Principles of Physics B	PHY1SCB	15

Second year (120 credit points)

Core units (105 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Electrical Systems and Design	ELE2ELE	15
TE-SEM-1	Linear Circuits and Signals	ELE2CIR	15
TE-SEM-1	Microprocessors and Digital Design	ELE2MDD	15
TE-SEM-1	Vector Calculus	MAT2VCA	15
TE-SEM-2	Digital Design with Programmable Logic	ELE2DDP	15
TE-SEM-2	Analogue Circuits and Interfacing	ELE2ANI	15
TE-SEM-2	Linear Algebra	MAT2LAL	15

Elective (15 credit points)

Fifteen credit points may be chosen from any discipline. Recommended unit: PHY2EPB.

Third year (120 credit points)

Core units (90 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Communication Systems	ELE3CMN	15
TE-SEM-1	Control Systems	ELE3CON	15
TE-SEM-1	Embedded Processors	ELE3EMB	15
TE-SEM-1	Instrumentation Electronics and Sensors	ELE3IES	15
TE-SEM-2	Electronics Technology Project	ELE3ETP	30

Specialty option (15 credit points)

Students must undertake a specialty unit from one of the following streams.

Biomedical Engineering Stream:

TE-SEM-2	Biomedical Engineering A	ELE3BIO	15
----------	--------------------------	---------	----

Optical and Communication Engineering Stream:

TE-SEM-2	Digital Communication Systems	ELE3DCS	15
----------	-------------------------------	---------	----

Electronic Systems Stream:

TE-SEM-2	Electronic Design Automation – Tools and Techniques	ELE3DDE	15
----------	---	---------	----

Elective unit (15 credit points)

Students may take 15 credit points from third year level electronic engineering, fourth year level electronic engineering, third year level mathematics, or any other unit approved by the undergraduate course adviser.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this

chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Civil Engineering (RBE) – Bendigo

For full details of this degree structure, see the Bendigo section of this Handbook.

Bachelor of Environmental Science (SBES) – Melbourne (Bundoora)

This degree is being phased out. No new enrolments will be permitted from 2008.

From 2008, students who wish to undertake a 'specialisation' in Environmental Science may do so under the Bachelor of Science (SBS) degree program.

This interdisciplinary degree is based in the physical sciences and addresses environmental problems relating to air, water, land, and energy. The course is broadly based and provides grounding in chemistry, geology, mathematics, and physics together with a biology component.

The course aims to develop a wide knowledge base, a multidisciplinary view of environmental problems, a critical assessment of scientific information, skills in the analysis of problems and an ability to report on environmental problems.

The course focuses on current environmental issues such as air pollution, water pollution, waste disposal, soil degradation, salination, greenhouse and ozone depletion, and teaches the science related to these issues.

Seminar, workshop, and project components are included in second and third year, and provide vehicles for application of the science in the course and a stimulus for wider investigation. They also encourage the development of skills required to work as an environmental scientist.

Course structure

The course is of three years full-time or equivalent part-time duration and requires the completion of 360 credit points. All students must complete a minimum of 90 credit points at third year level.

Students who commenced this degree before 2005 must meet the English Language Proficiency requirement in order to graduate. To satisfy this requirement, students should contact the Language and Academic Skills unit to arrange an appointment for an individual assessment of their English proficiency. For students commencing their degree from 2005, the requirements have been met within the course structure.

First year (120 credit points)

Core units: (105 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Calculus and Number Systems	MAT1CNS	15
TE-SEM-1	Physics for Life Sciences A	PHY1LSA	15
TE-SEM-1	Processes that Shape the Earth	GEO1PRO	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15
TE-SEM-2	Earth Structure, Resources and History of Life	GEO1ERS	15
TE-SEM-2	Physics for Life Sciences B	PHY1LSB	15

Choose one first-semester chemistry unit. Students who have passed VCE Chemistry, units 3 and 4 or equivalent, must choose GHE1GEN.

TE-SEM-1 or	Basic Chemistry	CHE1BAS	15
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15

Electives (15 credit points)

The remaining 15 credit points may be selected from any science units.

Recommended units:

TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Genetics, Human Biology and Evolution	BIO1GEN	15

Second year (120 credit points)*Core units (45 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1 or	Animal Diversity, Ecology and Behaviour	BIO1AD	15
TE-SEM-2	Plant Science	BIO1PS	15
TE-SEM-1	Environmental Enquiry A ¹	ENV2ESA	5
TE-SEM-1 or			
TE-SEM-2	Statistics for Life Sciences	STA2LS	20
TE-SEM-2	Environmental Enquiry B ¹	ENV2ESB	5

Electives (75 credit points)

Students must include a minimum of three units from the list below. The remaining credit points can be selected from those units not already taken or from any other second year level science units. Enrolment in units not listed below must be approved by the course adviser.

TE-SEM-1	Surface/Groundwater Flow and Chemistry	GEO2EGW	20
TE-SEM-2	Chemistry of Water Quality	CHE2CWQ	15
TE-SEM-1	Introduction to Land and Soil Management	AGR2ILM	20
TE-SEM-2	Imaging and Materials Characterisation	PHY2IMC	10

Third year (120 credit points)*Core unit (10 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1 or			
TE-SEM-2	Environmental Research	ENV3ENV	10

Electives (110 credit points)

Students must select units to the value of 80 credit points from those listed below. The remaining 30 credit points may be chosen from units in the list not already taken at second year level, or from other third year science units. Students must take at least 90 credit points of third year level units in total.

TE-SEM-1	Advanced Environmental Analytical Chemistry A ³	CHE3EAA	10
TE-SEM-1	Animal Ecology ²	ZOO2AE	10
TE-SEM-1	Entomology ²	ZOO2ENT	10
TE-SEM-1	Surface/Groundwater Flow and Chemistry	GEO3EGW	20
TE-SEM-1	Water Resource Management	ENV3WRM	10
TE-SEM-2	Advanced Environmental Analytical Chemistry B ¹	CHE3EAB	5
TE-SEM-2	Landscape and Climate Change	GEO3EGL	10
TE-SEM-2	Remote Sensing and GIS	GEO3EGR	10
TE-SEM-2	Greenhouse Effect and Climate Change	PHY3GRE	10
TE-SEM-2	Land and Soil Management	AGR3LSM	20
TE-SEM-2	Plant Ecology	BOT2PE	10
TE-SEM-2	Remote Sensing	PHY3REM	10

Key: ¹ Linked units, normally taken together.

² Linked units, normally taken together.

³ Linked units: both units must be taken in the one academic year.

Honours

Students who satisfy the requirements for Honours entry are eligible for the Honours programs in any unit stream offered by the departments involved in the undergraduate course. Those students who wish to undertake cross-disciplinary coursework will be permitted to do so with the permission of the course adviser. The possibility of supervision across the disciplines also exists. All environmental science Honours programs must be approved by the Honours coordinator in the particular discipline and the Environmental Science Course Adviser.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Human Nutrition (SBNS) – Melbourne (Bundoora)

The interdisciplinary nature of nutritional science is reflected in the units comprising this three-year degree course. The core nutrition units in the second and third years are strongly supported by the other core units in basic sciences, biochemistry, physiology and psychological sciences.

The course is designed to provide a structure which, in the third year, allows for specialisation in areas such as eating disorders, dietary management, advanced topics in nutrition and disease, nutrition and performance, management of dietary behaviour and anthropological and public health aspects of nutrition.

Graduates may apply to Nutrition Society of Australia for accreditation as a Registered Nutritionist.

Seminar program

Students in all three years are expected to attend the seminar programs arranged in both first and second semesters. Details will be provided during the year. Attendance at seminars and tutorials on library use and those given by the Language and Academic Skills Unit is a requirement of the course.

Course structure

The course is of three years duration and is taken on a full-time or equivalent part-time basis and requires the completion of 360 credit points. The course structure is summarised below. Elective units will normally be chosen from those listed, but permission to take alternative electives may be given by the course adviser prior to the start of the academic year.

Students who commenced this degree before 2005 must meet the English Language Proficiency requirement in order to graduate. To satisfy this requirement, students should contact the Language and Academic Skills unit to arrange an appointment for an individual assessment of their English proficiency. For students commencing their degree from 2005, the requirements are met within the course structure.

First year (120 credit points)*Core units (105 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15
TE-SEM-1	Organisation and Function of Cells and Organisms	BIO1OF	15
TE-SEM-1	Psychology A	PSY1PYA	15
TE-SEM-1 or			
TE-SEM-2	Statistics for Life Sciences	STA1LS	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15
TE-SEM-2	Genetics, Human Biology and Evolution	BIO1GEN	15
TE-SEM-2	Public Health for Nutrition Studies	PHE1BHN	15

The remaining 15 credit points must be chosen from the following units:

TE-SEM-1	Animal Diversity, Ecology and Behaviour	BIO1AD	15
TE-SEM-2	Mathematics and Computing for Biology	MAT1MCB	15
TE-SEM-2	Plant Science	BIO1PS	15
TE-SEM-2	Psychology B	PSY1PYB	15
TE-SEM-1 or			
TE-SEM-2	or an approved first year level elective		15

Second year (120 credit points)*Core units (100 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Biochemistry and Molecular Biology A	BCH2BMA	20
TE-SEM-1	Human Physiology A	HBS2HPA	20
TE-SEM-1	Principles of Nutrition	AGR2PNU	20
TE-SEM-2	Biochemistry and Molecular Biology B	BCH2BMB	20
TE-SEM-2	Human Physiology B	HBS2HPB	20

The remaining 20 credit points must be chosen from the following second-semester units:

TE-SEM-2	Animal Nutrition	AGR3ANN	20
TE-SEM-2	Australian Ecology and Systematics	BOT2AES	20
TE-SEM-2	Developments in Chemistry	CHE2DEV	20
TE-SEM-2	Ecological and Evolutionary Genetics	GEN2EEG	20
TE-SEM-2	Medical and Veterinary Microbiology	MIC2MVM	20
TE-SEM-2	Organisational Psychology of Health	PHE2OPH	20
TE-SEM-2	Vertebrate Morphology, Evolution and Comparative Physiology	ZOO2VMP	20
TE-SEM-2	or an approved elective		20

Third year (120 credit points)*Core units (60 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Advanced Topics in Nutrition	NUT3ATN	30
TE-SEM-2	Community and Cross Cultural Perspectives on Human Nutrition	NUT3CPN	30

The remaining 60 credit points must be chosen from the following units:

TE-SEM-1	Advanced Physiology A – Cell Communication Systems and Pharmacology	HBS3APA	30
TE-SEM-1	Biochemistry and Molecular Biology 3A	BCH3BMA	30
TE-SEM-1	Human and Molecular Genetics	GEN3HMG	30
TE-SEM-1	Zoology A	ZOO3EPA	30
TE-SEM-2	Advanced Physiology B – Normal Function, Drugs and Disease	HBS3APB	30
TE-SEM-2	Biochemistry and Molecular Biology 3B	BCH3BMB	30
TE-SEM-2	Plant Biotechnology	BOT3PB	30
TE-SEM-2	Zoology B	ZOO3EPB	30

Honours

Honours degree students are selected based on their performance in the final year of the pass degree course. Students must obtain a minimum average of 60% across all of their third year units and obtain at least 65% in units germane to the Honours discipline to the value of 60 credit points. An Honours year may be taken in any of the departments contributing to the third year of the pass degree course or in the interdisciplinary program, Nutrition Honours NUT4HNA and NUT4HNB. Students must consult the course coordinator prior to enrolment to obtain approval for the proposed program.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Information Systems (SBIS) – Melbourne (Bundoora)

The Bachelor of Information Systems course is designed to place a strong emphasis on the management and design of information systems, including the design and use of software and applications in business organisations. The course allows students the opportunity to select a variety of units from other areas of science, business, economics, and commerce, corresponding to areas of domain related knowledge. It is a three-year, full-time course, and the Honours program requires a further year of study. The course aims to train graduates to become ICT professionals. Graduates of the course are eligible for membership of the Australian Computer Society (ACS).

Upon completion of this course, students should possess:

- a comprehensive knowledge and understanding of the core body of mathematics and computer science required for the construction of information processing systems;
- a comprehensive understanding of the different types of information technology tools, and their role in managing knowledge and information
- an understanding of the role of modern information systems within organisations and familiarity with the business settings in which these systems are used;
- an ability to critically evaluate currently existing information technology systems and new developments
- familiarity with the latest developments in information technology
- skills in software engineering and object-oriented programming currently using Java;
- skills and abilities necessary to function effectively in project teams;
- written and oral communication skills enabling effective communication with professional colleagues and the wider community;
- ability to engage in lifelong learning, and
- an appreciation of pertinent social, legal, and ethical issues faced by today's computing professional

Scholarships

First year scholarships are available for high achieving students. Prospective candidates should contact the Department of Computer Science and Computer Engineering early in their Year-12 studies for details.

Course structure

In first year, students are required to take units from a list of core and recommended units from within the disciplines of computer science, information systems, and discrete mathematics.

Optional units from other disciplines offered by the University are also available. In second and third years, the course concentrates on computer science and information systems, together with optional units from other disciplines.

Mid-year commencement

Students entering the course mid year with equivalent year-12 studies will commence second semester on 30th June 2008, three weeks earlier than the normal commencement date for second semester. Some students with prior tertiary studies may also be required to commence their course on 30th June. These students will be advised by the faculty office at the time of offer.

First year (120 credit points)*Core units (75 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Information Technology Fundamentals	CSE1ITF	15
TE-SEM-1	Object Oriented Programming Fundamentals	CSE1OOF	15
TE-SEM-1	Discrete Mathematics	MAT1DM	15
TE-SEM-1 or			
TE-SEM-2	One first year level business elective ¹		15
TE-SEM-2	Intermediate Object Oriented Programming	CSE1IOO	15

Electives (45 credit points)

The remaining 45 credit points may be chosen from first year units offered by any department, subject to meeting the prerequisites for those units.

Second year (120 credit points)*Core units (105 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Database Fundamentals	CSE2DBF	15
TE-SEM-1 or			
TE-SEM-2	Algorithms and Data Structures	CSE2ALG	15
TE-SEM-1 or			
TE-SEM-2	One second year level business elective ²		15
TE-SEM-2	Artificial Intelligence Fundamentals	CSE2AIF	15
TE-SEM-2	System Design Engineering Fundamentals	CSE2DES	15
TE-SEM-2	Professional Environment	CSE3PE	15

Students must choose one of the following two units:

TE-SEM-1 or	System Testing and Quality	CSE2STQ	15
TE-SEM-1	Internet Client Engineering	CSE2ICE	15

Electives (15 credit points)

The remaining 15 credit points may be chosen from any units offered by any department for which the prerequisites are satisfied.

Third year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Database Management Systems	CSE3DMS	15
TE-SEM-1	System Design and Methodologies	CSE3SDM	15
TE-SEM-1 or			
TE-SEM-2	Third-year level computer science units chosen from the list below ³ .		60
TE-SEM-1 or			
TE-SEM-2	One business elective ²		15
TE-SEM-2	E-Business Systems	BUS3EBS	15

Third year level computer science electives must be chosen from the list below. Other units may be chosen in special cases, subject to prerequisites and the permission of the Course Adviser.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Artificial Intelligence: Logic and Reasoning	CSE3ALR	15

TE-SEM-1	Intelligent Multimedia Systems	CSE3IMS	15
TE-SEM-2	Web Applications Engineering	CSE3WAE	15
TE-SEM-2	Computational Intelligence	CSE3CI	15
TE-SEM-2	Networks, Systems and Web Security	CSE3NSW	15
TE-SEM-2	Object-Oriented Application Development	CSE3OAD	15

Key: ¹ the unit BUS1MIS is not permitted.

Key: ² the units BUS2BAD and MGT2BCO are not permitted

Key: ³ students must include either the software engineering project (CSE3PRA and CSE3PRB) (30 credit points) or the programming Project (CSE3PRG) (30 credit points) in their choice of units.

Honours

Honours degree students are selected based on their performance in the final year of the pass degree course. To qualify for entry to the Honours year in information systems students must obtain a minimum average of 60% across all of their third year units and obtain an average of at least 70% over their best third year level computer science and computer-engineering units (which must include a project) to the value of 60 credit points. The units CSE3PRA and CSE3PRB (30 credit points) and CSE3PRG (30 credit points) will count as 15 credit points only in this calculation. Meeting this requirement, however, does not guarantee a place in the Honours year as resources may limit the total number of places available, and students are expected to find a supervisor prior to re-enrolment.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Information Technology (RBC) – Bendigo

For full details of this degree structure, see the Bendigo section of this Handbook.

Bachelor of Information Technology (Computer Networks) (RBITCN) – Bendigo

For full details of this degree structure, see the Bendigo section of this Handbook.

Bachelor of Information Technology (Information Systems) (RBITIS) – Bendigo

For full details of this degree structure, see the Bendigo section of this Handbook.

Bachelor of Information Technology (Professional) (SBITL) – Bendigo

For full details of this degree structure, see the Bendigo section of this Handbook.

Bachelor of Information Technology (Software Development) (RBITSD) – Bendigo

For full details of this degree structure, see the Bendigo section of this Handbook.

Bachelor of Mathematical and Statistical Science (SBMSS) – Melbourne (Bundoora)

This degree program is being phased out. No new enrolments will be permitted from 2008.

In the last 50 years, mathematics has found widespread applications in areas as diverse as information technology, economics,

management, finance and biology, as well as deepening its traditional relationships with physics, chemistry, and engineering. Statistical science plays a crucial role in providing the tools necessary for the understanding of scientific, engineering, and economic data. Demand for mathematicians and statisticians is currently high. This degree course provides the opportunity for students to combine significant studies in mathematics and statistics with units from a wide variety of disciplines, including those with which mathematics and statistics have not traditionally been associated. In doing this, students have the opportunity to design their studies to meet their future employment needs: for example, Australian Computer Society membership is available to graduates with an approved computer science co-major (details available from the course adviser). Students can also specialise entirely in mathematics and statistics from second year onwards. Students completing the accredited major in statistical science are entitled to Graduate Statistician status upon joining the Statistical Society of Australia Inc. Students are advised to visit the web pages of the Mathematics or Statistical Science Sections for details of streams within the degree involving the study of computer science, finance, economics or applied statistics.

Graduates with a major in mathematics will be eligible for accreditation with the Australian Mathematical Society.

Course structure

The course is of three years full-time or equivalent part-time duration and requires the completion of 360 credit points. This degree is one of the most flexible in the faculty. To provide a broad base in mathematics and statistics, students are required to include 60 credit points of mathematics and statistics units in their first year. Then, to encourage the combination of mathematics and statistics with a wide range of units from other discipline areas at second and third year level, only 45 credit points at second year level and 60 credit points at third year level will be required to be taken from available mathematics and statistics units. This allows students to take a major study of almost any other discipline in the University within the total 360 credit points required for the degree.

Students who commenced this degree before 2005 must meet the English Language Proficiency requirement in order to graduate. To satisfy this requirement, students should contact the Language and Academic Skills unit to arrange an appointment for an individual assessment of their English proficiency. For students commencing their degree from 2005, the requirements have been met within the course structure.

First year (120 credit points)

Core units (60 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Calculus and Number Systems	MAT1CNS	15
TE-SEM-1	Statistical Science	STA1SS	15
TE-SEM-1	Discrete Mathematics	MAT1DM	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15

Electives (60 credit points)

The remaining 60 credit points may be chosen from any units offered by the University, as approved by the course adviser.

Second year (120 credit points)

A minimum of 45 credit points must be chosen from available second year mathematics or second year statistics units. The remaining 75 credit points may be chosen from any units offered by the University. All enrolments should be made after consultation with the course adviser.

Third year (120 credit points)

A minimum of 60 credit points must be chosen from available third year mathematics or third year statistics units. The remaining 60 credit points may be chosen from any units offered by the University. All enrolments should be made after consultation with the course adviser.

Honours

Suitably qualified students may be permitted to enrol in an Honours year in mathematics or statistics. An Honours year consists of units with a total value of 120 credit points and must include a thesis. There is the flexibility to include coursework material from related

disciplines and to select a thesis project reflecting a desired vocational orientation.

In a mathematics Honours year, coursework units are normally at fourth year level and students may take a limited number of units in a related discipline with the approval of the mathematics Honours coordinator. In a statistics Honours year, a limited number of third year units and/or a limited number of units in related disciplines may be taken subject to the approval of the Head of Statistical Science.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Medical Science (SBMS) – Melbourne (Bundoora)

This course is designed to provide a broad training in the medical sciences in order to lead to:

- employment in the biomedical research field (e.g., pharmaceutical companies, biomedical scientific instrument suppliers, medical research institutes, hospitals, public service departments dealing with health care)
- postgraduate studies in the medical sciences
- graduate entry to medicine.

The course is designed to provide a foundation year in science (with a focus on biology and chemistry), a choice of biomedical units in second year (biochemistry, human anatomy, human physiology, immunology, genetics, microbiology) and a specialised course in medical science in third year.

Seminar program

The seminar program is an integral part of the medical science course. Seminars are held regularly throughout both semesters and students in their final year must attend at least two thirds of the seminars.

Course structure

The course is of three years full-time or equivalent part-time duration and requires the completion of 360 credit points. The course structure is outlined below. Electives are normally selected from the list of recommended units provided for each year level, but other units may be taken with the approval of the course adviser.

As a guide, useful electives for those aiming at graduate entry to medicine are, in the first year, PSY1BNA (Introduction to Behavioural Neuroscience A), PSY1BNB (Introduction to Behavioural Neuroscience B) and STA1LS (Statistics for Life Sciences), and in the second year 80 credit points from human anatomy, human physiology, genetics, immunology or microbiology. For those considering a career in medical biotechnology, useful second year electives include chemistry, genetics, immunology, and microbiology.

Students should be careful in selecting second year units to ensure that the appropriate prerequisites have been met for the intended program of study at the third year and at Honours level.

Students who commenced this degree before 2005 must meet the English Language Proficiency requirement in order to graduate. To satisfy this requirement, students should contact the Language and Academic Skills unit to arrange an appointment for an individual assessment of their English proficiency. For students commencing their degree from 2005, the requirements have been met within the course structure.

First year (120 credit points)

Core units (60 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15
TE-SEM-1	Organisation and Function of Cells and Organisms	BIO1OF	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15
TE-SEM-2	Genetics, Human Biology and Evolution	BIO1GEN	15

Electives (60 credit points)

Students in this course are not permitted to enrol in HBS1API or HBS1HRB.

Recommended unit options are:

TE-SEM-1	Calculus and Number Systems	MAT1CNS	15
TE-SEM-1	Discrete Mathematics	MAT1DM	15
TE-SEM-1	Infections and Epidemics	MIC1IEP	15
TE-SEM-1	Information Technology Fundamentals	CSE1ITF	15
TE-SEM-1	Introduction to Public Health A	PHE1IBA	15
TE-SEM-1	Introduction to Behavioural Neuroscience A	PSY1BNA	15
TE-SEM-1	Psychology A ²	PSY1PYA	15
TE-SEM-1	Statistical Science	STA1SS	15
TE-SEM-1	Physics for Life Sciences A	PHY1LSA	15
TE-SEM-1	Principles of Physics A	PHY1SCA	15
TE-SEM-1 or			
TE-SEM-2	Statistics for Life Sciences ¹	STA1LS	15
TE-SEM-2	Australia's Health Care System	PHE1AHS	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Introduction to Public Health B ¹	PHE1IBB	15
TE-SEM-2	Introduction to Behavioural Neuroscience B	PSY1BNB	15
TE-SEM-2	Mathematics and Computing for Biology	MAT1MCB	15
TE-SEM-2	Physics for Life Sciences B	PHY1LSB	15
TE-SEM-2	Principles of Physics B	PHY1SCB	15
TE-SEM-2	Psychology B ²	PSY1PYB	15
TE-SEM-2	Public Health for Nutrition Studies ¹	PHE1BHN	15
TE-SEM-2	Statistics for Psychology ²	STA1PSY	15

Key: ¹ PHE1IBB is incompatible with STA1LS and PHE1BHN.

² Entry into PSY1PYA and PSY1PYB is subject to achieving the minimum ENTER required for entry into the Bachelor of Psychological Science program.

Students wishing to proceed to second year level psychology should include STA1PSY in their choice of units.

Second year (120 credit points)

Core units (80 credit points)

Students must choose the following biochemistry units:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Biochemistry and Molecular Biology A	BCH2BMA	20
TE-SEM-2	Biochemistry and Molecular Biology B	BCH2BMB	20

Plus a further 40 credit points must be selected from the following list:

TE-SEM-1	Anatomy: Lower Limbs	HBS2ALL	20
TE-SEM-1	Human and Molecular Genetics	GEN2HMG	20
TE-SEM-1	Human Physiology A	HBS2HPA	20
TE-SEM-1	Introductory Microbiology	MIC2IM	20
TE-SEM-2	Anatomy: Trunk and Upper Limbs	HBS2ATL	20
TE-SEM-2	Ecological and Evolutionary Genetics	GEN2EEG	20
TE-SEM-2	Human Physiology B	HBS2HPB	20
TE-SEM-2	Immunology	MED2IMM	20
TE-SEM-2	Medical and Veterinary Microbiology	MIC2MVM	20

Electives (40 credit points)

An additional 40 credit points may be selected either from the units listed above not already taken, from the following list, or from second year units in the following disciplines: chemistry (CHE2FND and CHE2DEV are particularly useful for those interested in Medicinal Chemistry), mathematics, public health, physics, psychology, statistical science (or other disciplines for which the appropriate prerequisites have been met).

TE-SEM-1	Medical Statistics	STA2MS	20
TE-SEM-1	Principles of Nutrition	AGR2PNU	20
TE-SEM-2	Vertebrate Morphology, Evolution and Comparative Physiology	ZOO2VMP	20

Third year (120 credit points)

Core units (60 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Advanced Topics in Medical Science A	MED3MSA	30
TE-SEM-2	Advanced Topics in Medical Science B	MED3MSB	30

Electives (60 credit points)

Students choose a total of 60 credit points from units for which prerequisites were obtained at the second year level.

Honours

Honours degree students are selected based on their performance in the final year of the pass degree course. Students must obtain a

minimum average of 60% across all of their third year units and obtain at least 65% in units germane to the Honours discipline to the value of 60 credit points. An Honours year may be taken in any of the departments contributing to the pass degree course for which they have the appropriate prerequisites, or in the interdisciplinary program Medical Science Honours (MED4HNA and MED4HNB).

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Medicinal Chemistry (SBMC) – Melbourne (Bundoora)

Medicinal chemistry is a strongly growing area within pharmaceutical and biotechnology companies and research organisations such as the CSIRO. It is well known that companies are moving to exploit emerging technologies in this post-genomic era and opportunities for employment are expanding rapidly as biotechnology and drug design-based companies begin to proliferate.

Graduates of the Bachelor of Medicinal Chemistry will graduate with majors in chemistry and biochemistry with an additional area of specialisation in drug design. With a cross-disciplinary background and enhanced skills at the boundaries of these traditional disciplines, graduates will be particularly sought after by the biotechnology industry.

Course structure

The course is of three years full-time or equivalent part-time duration and requires the completion of 360 credit points. Students complete units to the value of 120 credit points at each year level.

First year (120 credit points)

Core units (75 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Organisation and Function of Cells and Organisms	BIO1OF	15
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15
TE-SEM-2	Genetics, Human Biology and Evolution	BIO1GEN	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15
TE-SEM-2	Human Physiology for Medicinal Chemists	HBS1HPM	15

Electives (45 credit points)

The remaining 45 credit points may be chosen from first year level units offered by any department.

Recommended unit options are:

TE-SEM-1	Calculus and Number Systems	MAT1CNS	15
TE-SEM-1	Infections and Epidemics	MIC1IEP	15
TE-SEM-1	Physics for Life Sciences A	PHY1LSA	15
TE-SEM-1	Principles of Physics A	PHY1SCA	15
TE-SEM-1	Statistical Science	STA1SS	15
TE-SEM-1 or			
TE-SEM-2	Statistics for Life Sciences ¹	STA1LS	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Mathematics and Computing for Biology	MAT1MCB	15
TE-SEM-2	Physics for Life Sciences B	PHY1LSB	15
TE-SEM-2	Principles of Physics B	PHY1SCB	15

Second year (120 credit points)

Core units (100 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Biochemistry and Molecular Biology A	BCH2BMA	20
TE-SEM-1	Fundamentals of Chemistry	CHE2FND	20
TE-SEM-2	Biochemistry and Molecular Biology B	BCH2BMB	20
TE-SEM-2	Medicinal Chemistry	CHE2MEC	20
TE-SEM-2	Pharmacology for Medicinal Chemists	HBS2PMC	20

Electives (20 credit points)

The remaining 20 credit points may be chosen from second year level units offered by any department, subject to meeting the prerequisites for those units. Recommended unit options are:

TE-SEM-1	Introductory Microbiology	MIC2IM	20
TE-SEM-1	Human and Molecular Genetics	GEN2HMG	20
TE-SEM-1	Statistics for Life Sciences ¹	STA2LS	20

Third year (120 credit points)

Core units (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Biochemistry and Molecular Biology 3A	BCH3BMA	30
TE-SEM-1	Medicinal Chemistry C	CHE3MCC	30
TE-SEM-2	Biochemistry and Molecular Biology 3B	BCH3BMB	30
TE-SEM-2	Medicinal Chemistry D	CHE3MCD	30

Key: ¹ STA1LS and STA2LS are incompatible.

Honours

The Honours program will be taken in one of the Departments, Chemistry, or Biochemistry. The rules and organisation will be as for that department's Honours program. Honours degree students are selected based on their performance in the final year of the pass degree course. Students must obtain a minimum average of 60% across all of their third year units and obtain at least 65% in units germane to their Honours discipline to the value of 60 credit points.

Fourth (Honours) year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Honours Chemistry	CHE4HNA	60
TE-SEM-2 or	Honours Chemistry	CHE4HNB	60
TE-SEM-1	Honours in Biochemistry	BCH4HNA	60
TE-SEM-2	Honours in Biochemistry	BCH4HNB	60

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Pharmacy (RBP) – Bendigo

For full details of this degree structure, see the Bendigo section of this Handbook.

Bachelor of Psychological Science (BVBBWS) – Albury-Wodonga

For full details of this degree structure, see the Albury Wodonga section of this Handbook.

Bachelor of Psychological Science (RBBS) – Bendigo

For full details of this degree structure, see the Bendigo section of this Handbook.

Bachelor of Psychological Science (SBBS) – Melbourne (Bundoora)

The Bachelor of Psychological Science (BPsySc) is a coherent program of core areas of study in psychology that includes other units, such as biological and social aspects of behaviour deemed desirable to a broad education in behavioural science.

The course prepares students for careers in a range of settings including personnel, management, and mental health and human services.

It is important to emphasise that the Bachelor of Psychological Science does not qualify a graduate to work as a psychologist. Further education, training and supervised experience is required for registration as a professional psychologist with the Psychologists' Registration Board of Victoria and for membership of the Australian Psychological Society (APS).

Course structure

The BPsySc may be undertaken in three years of full-time or equivalent part-time study. Students intending to study part-time should note that this means enrolling in a lesser workload, rather than studying after hours, as BPsySc units are not available as evening classes.

The degree requires the completion of 360 credit points, consisting of 120 credit points accrued from units taken at each of the first, second and third year levels.

An additional requirement is that students must successfully complete a minimum of 150 credit points of psychology units across the three years of the degree, with no less than 120 credit points of psychology accrued from units at second and third year level.

Note that the four third year psychology units PSY3ANA, PSY3CDB, PSY3CFA, and PSY3SCB (each worth 20 credit points) will be available in alternate years. PSY3CFA and PSY3SCB will be available in 2008 and PSY3ANA and PSY3CDB will be available in 2009.

Units taught by the School of Psychological Science and which normally are components of the degree are PSY1PYA, PSY1PYB, PSY1BNA, PSY1BNB, PSY2PYA, PSY2PYB, PSY3PYA, PSY3PYB, PSY3RSA and PSY3RSB.

(Full details of the units offered by the School of Psychological Science are available in the unit handbooks produced by the School in February of each year and the School website at www.latrobe.edu.au/psy).

First year (120 credit points)

Core units (75 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Psychology A	PSY1PYA	15
TE-SEM-2	Psychology B	PSY1PYB	15
TE-SEM-2	Statistics for Psychology	STA1PSY	15
either			
TE-SEM-1	Introduction to Behavioural Neuroscience A	PSY1BNA	15
and			
TE-SEM-2	Introduction to Behavioural Neuroscience B	PSY1BNB	15

or
Any other first year biological science units totalling not less than 30 credit points.

Electives (45 credit points)

At least 15 credit points must be chosen from one of the following discipline areas: Business studies, legal studies, sociology and anthropology, politics, linguistics, Asian Studies, philosophy, computer science and computer engineering, mathematics or statistics.

At least 15 credit points must be selected from other science units. However, with the approval of the course adviser, students may choose units offered by other Faculties.

The remaining 15 credit points may be chosen from any first year level unit offered by any department.

Second year (120 credit points)

Core units (40 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Psychology A	PSY2PYA	20
TE-SEM-2	Psychology B	PSY2PYB	20

Electives (80 credit points)

Second/third year level units to the value of 80 credit points chosen from units offered by any department.

Highly Recommended units:

TE-SEM-1	Applied Neuroscience A ¹	PSY3ANA	20
TE-SEM-1	Counselling and Family Psychology A	PSY3CFA	20
TE-SEM-2	Cognitive and Developmental Psychology B ¹	PSY3CDB	20
TE-SEM-2	Social and Community Psychology B	PSY3SCB	20

Third year (120 credit points)

Core units (80 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Psychology A	PSY3PYA	20
TE-SEM-1	Research Project A	PSY3RSA	20
TE-SEM-2	Psychology B	PSY3PYB	20
TE-SEM-2	Research Project B	PSY3RSB	20

Electives (40 credit points)

Students choose third year level units for which prerequisite requirements have been met.

Highly Recommended units:

TE-SEM-1	Applied Neuroscience A ¹	PSY3ANA	20
TE-SEM-1	Counselling and Family Psychology A	PSY3CFA	20
TE-SEM-2	Cognitive and Developmental Psychology B ¹	PSY3CDB	20
TE-SEM-2	Social and Community Psychology B	PSY3SCB	20

Key: ¹ Not available in 2008.

Honours

Students who perform at a high standard may apply to undertake a further year of psychology study in Honours (PSY4HNA and PSY4HNB), which is a prerequisite for most postgraduate courses of study. Following the successful completion of the Honours year, these students will graduate with a Bachelor of Psychological Science (Honours). The Honours course is presently offered only at the Melbourne (Bundoora) campus although students from the Bendigo and Albury-Wodonga campus may apply.

Bachelor of Science in Environmental Management and Ecology (SBSEME) – Albury-Wodonga

For full details of this degree structure, see the Albury-Wodonga section of this Handbook.

Bachelor of Software Engineering (SBSE) – Melbourne (Bundoora)

The Bachelor of Software Engineering is a four-year pass or Honours degree, and provides the opportunity to be a specialist engineer who can provide a totally integrated operation of complex computer systems with a particular focus on software engineering. The course aims to produce engineering professionals and prepares students for work in all types of software from real-time to business systems, and emphasises communication and presentation skills, working in teams, management techniques, and entrepreneurship. A distinguishing feature of the course is the fourth year thesis, which provides students with research skills and the opportunity to study a current research area in the field of software engineering in great depth. Graduates of the course are eligible for membership of Engineers Australia and the Australian Computer Society.

Upon completion of this course, students should possess:

- a comprehensive knowledge and understanding of the core body of mathematics physics, electronics and computer science subject matter that forms the academic basis of computer engineering;
- in-depth knowledge and understanding of the digital circuitry constituting computer hardware, as evidenced through completion of a digital electronics design project in which this knowledge is applied;
- high level skills in developing software using high level languages, with a current emphasis on C++ and Java;
- proficiency in applying an object-oriented approach to software systems analysis, design and implementation;
- a sound knowledge of the basic engineering principles and methodologies underlying the analysis design and implementation of total systems composed of hardware, software, and an interface between the two;
- depending on electives chosen, advanced knowledge and skills in other areas of computer science including networks and communications, software engineering, intelligent systems, compilers and systems software, numerical computing ;
- skills in the management of resources and technology, as required of an engineering professional;
- skills and abilities necessary to function effectively in project teams as a manager, leader or team member;
- written and oral communication skills enabling effective communication with professional colleagues and the wider community;
- ability to engage in lifelong learning; and
- an appreciation of pertinent social, legal, ethical, and environmental issues faced by today's engineering professional.

Articulation

Students who have completed the Bachelor of Computer Technology may apply for entry to the third year of this course.

Industry experience

Students are required to complete at least 12 weeks of certified practical experience before being deemed to have completed the course. This usually is undertaken during the annual vacation following the third year of the course.

Scholarships

First year scholarships are available for high achieving local students. Prospective candidates should contact the Department of Computer Science and Computer Engineering early in their year-12 studies for details.

CISCO Program

A CISCO certification-training program is available for students who passed the units CSE2/3NET, CSE3PPR, and CSE3LAN in their undergraduate studies. From 2008, students will take CSE2NEF and CSE3INE. Any students interested in obtaining full details of this CISCO program should contact the Department of Computer Science and Computer Engineering at the beginning of first semester.

Course structure

The course is of four years full-time or equivalent part-time duration and requires the completion of 480 credit points. In the first and second years, students study a fixed combination of units in computer science and electronics, together with mathematics, computer systems, physics, and engineering management. A major industry-relevant project must be completed in third year and a research project in fourth year. The course structure offers a comprehensive specialisation in software engineering in the final two years.

First year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Calculus and Probability for Engineers	MAT1CPE	15
TE-SEM-1	Introductory Electronics	ELE1IEL	15
TE-SEM-1	Object Oriented Programming Fundamentals	CSE1OOF	15
TE-SEM-1	Discrete Mathematics	MAT1DM	15
TE-SEM-2	Basic Electronic Circuits	ELE1CCT	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Intermediate Object Oriented Programming	CSE1IOO	15
TE-SEM-2	Object Oriented Programming Using C++	CSE1CPP	15

Second year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Microprocessors and Digital Design	ELE2MDD	15
TE-SEM-1	Network Engineering Fundamentals	CSE2NEF	15
TE-SEM-1	Principles of Physics A	PHY1SCA	15
TE-SEM-1 or			
TE-SEM-2	Algorithms and Data Structures	CSE2ALG	15
TE-SEM-2	Artificial Intelligence Fundamentals	CSE2AIF	15
TE-SEM-2	Digital Design with Programmable Logic	ELE2DDP	15
TE-SEM-2	Mathematics Topics for Computer Science	MAT2MFC	15
TE-SEM-2	System Design Engineering Fundamentals	CSE2DES	15

Third year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Database Fundamentals	CSE2DBF	15
TE-SEM-1	System Design and Methodologies	CSE3SDM	15
TE-SEM-1	Software Engineering Project A ¹	CSE3PRA	15
TE-SEM-2	Metrics, Quality and Reliability	CSE3MQR	15
TE-SEM-2	Software Engineering Project B ¹	CSE3PRB	15
TE-SEM-2	Operating Systems	CSE3OSS	15
TE-SEM-2	Applied Probability for Computer Systems Engineers	STA3AP	15

Plus a further 15 credit points of computer science units chosen from the following:

TE-SEM-1	System Testing and Quality	CSE2STQ	15
TE-SEM-1	Embedded Processors	ELE3EMB	15

Key: ¹ Linked units: both units must be taken in the one academic year.

Fourth year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Advanced System Design	CSE4ASD	15
TE-SEM-1	Applied Management for Engineers	ELE4EMT	15
TE-SEM-1	Thesis A	CSE4THA	30
TE-SEM-2	Advanced Quality and Reliability	CSE4AQR	15
TE-SEM-2	Performance Analysis of Computer Systems	CSE4PCS	15
TE-SEM-2	Thesis B	CSE4THB	30

Honours

Students completing the degree will have their degree awarded with Honours provided they are accepted as Honours candidates at the beginning of their final year. Entry to the Honours course is based on academic performance in third year. Those students not eligible for entry to Honours are required to undertake the Major Computer Engineering Project units (CSE4CPA and CSE4CPB) (45 credit points) and an additional third or fourth year level computer science unit, in place of Thesis A (CSE4THA) and Thesis B (CSE4THB) (60 credit points).

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Space Science (SBSS) – Melbourne (Bundoora)

This degree is being phased out. No new enrolments will be permitted from 2008.

From 2008, students who wish to undertake a 'specialisation' in Space Science may do so under the Bachelor of Science (SBS) degree program.

This course provides students with an understanding of basic principles in areas of space science, including astronomy, relevant to industries using space technology and prepares them for admission to higher degrees in space science and other areas of physical science and mathematics. Students are educated in a broad range of space sciences that includes astronomy, remote sensing, GPS techniques, space weather, and the geospace environment. The course includes basic mathematics and physics, and students can take options from a wide range of units including computer science and electronics.

Course structure

The course requires three years of full-time study or the equivalent part-time enrolment. Units having a total work value of 360 credit points must be completed, including units with a total value of at least 120 credit points in each of the three years. Core units make up 75, 100 and 70 credit points at first, second and third year levels respectively. At second year level a further 15 credit points of mathematics units (MAT2MEC) are strongly recommended.

Students who commenced this degree before 2005 must meet the English Language Proficiency requirement in order to graduate. To satisfy this requirement, students should contact the Language and Academic Skills unit to arrange an appointment for an individual assessment of their English proficiency. For students commencing their degree from 2005, the requirements have been met within the course structure.

First year (120 credit points)

Core units (75 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Calculus and Number Systems	MAT1CNS	15
TE-SEM-1	Principles of Physics A	PHY1SCA	15
TE-SEM-2	Astronomy and Space: The Infinite Frontier	PHY1AST	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Principles of Physics B	PHY1SCB	15

Electives (45 credit points)

Students may choose first year units offered by the Faculty of Science, Technology and Engineering to the value of 45 credit points. Units may be chosen from other faculties provided they total no more than 30 credit points.

Second year (120 credit points)

Core units (100 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Astronomy and Astrophysics	PHY2ASA	15
TE-SEM-1	Principles of Physics A	PHY2SCA	20
TE-SEM-1	Vector Calculus	MAT2VCA	15
TE-SEM-2	Linear Algebra	MAT2LAL	15

TE-SEM-2	Principles of Physics B	PHY2SCB	20
TE-SEM-2	Space Science Instruments	PHY2SPI	15

Electives (20 credit points)

The remaining 20 credit points may be chosen from any second year level units offered by any department, subject to meeting the prerequisites for those units. Highly recommended unit:

TE-SEM-2	Mechanics	MAT2MEC	15
----------	-----------	---------	----

Third year (120 credit points)**Core units (70 credit points)**

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Principles of Physics A	PHY3SCA	30
TE-SEM-2	Principles of Physics B	PHY3SCB	30
TE-SEM-2	Remote Sensing	PHY3REM	10

Electives (50 credit points)

Students choose third year units offered by the Faculty of Science, Technology and Engineering or by other faculties.

Honours

Honours degree students are selected based on their performance in the final year of the pass degree. To be eligible, students must obtain a minimum average of 60% across their third year units and obtain at least 65% in relevant third year units comprising at least 60 credit points. Students enrol in PHY4HNA and PHY4HNB and undertake a space physics project.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Viticultural Science (STBVS) – Melbourne (Bundoora)

This degree has been phased out. Students will not be permitted to graduate in this degree unless they were enrolled initially in the Bachelor of Viticultural Science and Wine Production (SBVSWP)

Students enrolled initially in the Bachelor of Viticultural Science and Wine Production, but who do not wish to proceed to the fourth year may graduate at the end of the third year with the Bachelor of Viticultural Science.

Students who wish to graduate with a Bachelor of Viticultural Science must see the course adviser and advise the faculty office before completion of the final semester of their third year units.

Bachelor of Viticultural Science and Wine Production (SBVSWP) – Melbourne (Bundoora)

This degree is being phased out. No new enrolments will be permitted from 2008.

From 2008, students who wish to undertake a 'specialisation' in Viticultural Science may do so under the Bachelor of Science (SBS) degree program.

This course is designed to provide professional scientific training in all aspects of viticultural science and wine production plus practical experience in vineyard operations, viticultural science, winemaking and marketing, oenology and wine production, with experience in commercial vineyards and wineries and a major placement with a commercial winemaker.

It is expected that graduates will be employed within a wide range of positions in the grape and wine industries.

Industry experience

In the first three years of the degree, industry experience in viticulture is required in each of three different climatic regions. In the Honours (fourth) year, a major placement in one or two commercial wineries is required.

Course structure

The course requires the completion of 480 credit points over four years of full-time study or the part-time equivalent.

The first year of the course covers the basic sciences microeconomics, management of grapevines and palate training. Second year of the degree covers advanced sciences, statistics, agribusiness, vineyard operations, and wine appraisal plus one or two elective units. The agribusiness unit MGF1240 is taught by Monash University and is taken during the winter break as a one-week residential unit. The third year of the degree includes advanced sciences plus specialist studies in viticultural science, case studies in viticulture and wine, wine appraisal, plus one or two elective units. In the case studies, students solve problems on real issues in viticulture and winemaking.

The fourth year of the degree includes a major work placement in one or two approved commercial wineries, which may include wineries in the southern and/or northern hemisphere, three coursework units, wine appraisal, and a major research project. Entry to the fourth (Honours) year of the degree is based on academic achievement in the prerequisite units AGR3WPT and AGR3VTS. Students who pass the first three years of the degree but fail to obtain entry to the fourth year, or students who do not wish to proceed to the Honours year, will be awarded the degree of Bachelor of Viticultural Science.

Students who commenced this degree before 2005 must meet the English Language Proficiency requirement in order to graduate. To satisfy this requirement, students should contact the Language and Academic Skills unit to arrange an appointment for an individual assessment of their English proficiency. For students commencing their degree from 2005, the requirements have been met within the course structure.

First year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Microeconomics	ECO1MI	15
TE-SEM-1	Organisation and Function of Cells and Organisms	BIO1OF	15
TE-SEM-1	Vine Production, Propagation and Establishment	AGR1VPE	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15
TE-SEM-2	Physics for Life Sciences B	PHY1LSB	15
TE-SEM-2	Plant Science	BIO1PS	15
TE-SEM-2	Vineyard Cultivation and Maintenance	AGR1VCM	15

Choose one first-semester chemistry unit. Students who have passed VCE Chemistry, Units 3 and 4 or equivalent, must choose CHE1GEN.

TE-SEM-1 or	Basic Chemistry	CHE1BAS	15
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15

Second year (120 credit points)**Core units (105 credit points)**

Teaching period	Unit name	Unit code	Credit Points
Winter	Introduction to Agribusiness ¹	MGF1240	15
TE-SEM-1	Biochemistry for Agricultural Sciences	AGR2BAS	20
TE-SEM-1	Introduction to Land and Soil Management	AGR2ILM	20
TE-SEM-1	Plant Molecular Biology, Physiology and Nutrition	BOT2MPN	20
TE-SEM-1 or			
TE-SEM-2	Statistics for Life Sciences	STA1LS	15
TE-SEM-2	Vineyard Operations	AGR2VO	15

Electives (15 credit points)

Recommended unit options:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Environmental Enquiry A ²	ENV2ESA	5
TE-SEM-1	Globalisation	ECO2GLO	15
TE-SEM-1	Introductory Microbiology	MIC2IM	20
TE-SEM-1 or			
TE-SEM-2	Marketing Principles and Practice	MKT2MPP	15
TE-SEM-2	Australian Ecology and Systematics	BOT2AES	20
TE-SEM-2	Chemistry of Water Quality	CHE2CWQ	15
TE-SEM-2	Environmental Enquiry B ²	ENV2ESB	5
TE-SEM-2	Genetics, Human Biology and Evolution	BIO1GEN	15
TE-SEM-2	Mathematics and Computing for Biology	MAT1MCB	15
TE-SEM-2	Plant Ecology	BOT2PE	10

Third year (120 credit points)*Core units (90 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Plant Pests and Diseases	AGR3PPD	10
TE-SEM-1	Wine Production Technology	AGR3WPT	20
TE-SEM-1	Viticulture and Wine Production Issues A	AGR3VWA	5
TE-SEM-2	Crop and Vine Agronomy	AGR3CVA	10
TE-SEM-2	Land and Soil Management	AGR3LSM	20
TE-SEM-2	Viticulture and Wine Production Issues B	AGR3VWB	5
TE-SEM-2	Viticultural Science	AGR3VTS	20

Electives (30 credit points)

Any unit from the above second year list of recommended units, or units from the following:

Teaching period	Unit name	Unit code	Credit Points
Summer	International Agribusiness ¹	MGF3760	15
Winter	Agribusiness Marketing ¹	MKF2761	15
TE-SEM-1	Communication and Critical Analysis	AGR4CCA	15
TE-SEM-1	Field and Environmental Botany	BOT3FEB	30
TE-SEM-1	Human and Molecular Genetics	GEN2HMG	20
TE-SEM-1	Marketing Communication	MKT3MCO	15
TE-SEM-1	Water Resource Management	ENV3WRM	10
TE-SEM-2	Agriculture Environment Interactions	AGR3AEI	10
TE-SEM-2	Ecology, Systematics and Evolution	BOT3ESE	30
TE-SEM-2	International Marketing	MKT3IMK	15
TE-SEM-2	Landscape Management with GIS and Remote Sensing	AGR2LMG	10
TE-SEM-2	Plant Biotechnology	BOT3PB	30
TE-SEM-2	Strategic Marketing	MKT3SMK	15

Fourth year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Wine Making Issues and Marketing	AGR4WMM	15
TE-SEM-1	Wine Production Technology	AGR4WPT	15
TE-SEM-1	Wine Appreciation Project A ²	AGR4WAA	5
TE-SEM-1	Wine Industry /Oenology Project A ³	AGR4WIA	30
TE-SEM-2	Wine Appreciation Project B ²	AGR4WAB	5
TE-SEM-2	Wine Industry/Oenology Project B ³	AGR4WIB	35
TE-SEM-2	Oenology – Wine Science and Analysis	AGR4OEN	15

Key: ¹ Monash University subject. See course structure above for full details.

² Linked units: normally taken in the one academic year.

³ Linked units: both units must be taken in the one academic year.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Science Double Degree Program (SZSSB) – Bendigo

For full details of this degree structure, see the Bendigo Campus section of this Handbook.

Science Double Degree Program (SZSS) – Melbourne (Bundoora)

This four-year double degree program is designed to allow academically able students to combine any two of the three-year degrees offered by the Faculty of Science, Technology and Engineering. A course adviser will assist students in designing a program that will suit their individual interests.

If the core requirements for each degree are met, graduates will be awarded both selected degrees.

Eligible three-year degrees offered by the faculty are:

- Bachelor of Animal and Veterinary Biosciences
- Bachelor of Biological Sciences¹
- Bachelor of Biotechnology and Cell Biology
- Bachelor of Chemical Science
- Bachelor of Computer Science²
- Bachelor of Computer Science in Games Technology

- Bachelor of Conservation Biology and Ecology
- Bachelor of Human Nutrition
- Bachelor of Information Systems
- Bachelor of Medical Science
- Bachelor of Medicinal Chemistry
- Bachelor of Psychological Science²
- Bachelor of Science¹

Key: ¹ A course of study in Bioinformatics can be pursued by taking a specified sequence of units normally within the Bachelor of Biological Sciences and the Bachelor of Science or possibly within the Bachelor of Computer Science and the Bachelor of Science.

Key: ² A course of study in Cognitive Science can be pursued by taking a specified sequence of units within the Bachelor of Psychological Science and the Bachelor of Computer Science.

Contact details for obtaining advice about these two programs are available in the Faculty Office.

Course structure

This double degree is of four and a half years' full-time or equivalent part-time duration and requires the completion of 540 credit points. Students may complete this double degree in four years as part of an accelerated study program. The maximum number of first year level credit points to be taken is 180 and the minimum number of third year level credit points required is 180. Normally the maximum load permitted in any one semester is 80 credit points. Students are required to complete the core requirements for each of the two degrees. For new students an adviser will be available at the enrolment session to plan their individual course structure. Students who have trouble with the overloaded nature of the course may apply to transfer to either of the degrees.

Honours

Suitably qualified students may be eligible to undertake an Honours year, which will require an additional full-time or equivalent part-time year of study.

Bachelor of Agricultural Science/Bachelor of Business (SZASB) – Melbourne (Bundoora)

This double degree provides selected students with the opportunity to combine the practical career-orientated science of the agricultural sciences degree with the business and management skills of the Bachelor of Business. The course combines an agricultural science degree with Honours with a business degree, to provide a powerful set of skills for the multi-billion dollar a year agricultural and agribusiness industries.

Industry experience

An essential requirement of the agricultural science degree is twelve weeks of approved industry experience taken during vacations.

Course structure

This double degree is of five and a half years' full-time or equivalent part-time duration and requires the completion of 630 credit points overall. Students may complete this double degree in five years as part of an accelerated study program.

Students will take first year chemistry, biology and economics units, followed by units in the second and third year in soil management, animal nutrition, animal protection, plant pests and diseases, management, marketing, financial management and business economics. Electives are chosen from those available in the Bachelor of Business to extend interests in particular areas of business studies. Professional recognition would apply for graduates, as they could be eligible to become members of the Australian Institute of Agricultural Science and Technology.

First year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Agricultural Systems	AGR1SYS	15
TE-SEM-1	Macroeconomics	ECO1IMA	15
TE-SEM-1	Organisation and Function of Cells and Organisms	BIO1OF	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15

TE-SEM-2	Microeconomics	ECO1IMI	15
TE-SEM-2	Physics for Life Sciences B	PHY1LSB	15
TE-SEM-2	Plant Science	BIO1PS	15

Choose one first-semester chemistry unit. Students who have passed VCE chemistry, units 3 and 4 or equivalent, must choose CHEIGEN.

Either

TE-SEM-1 or	Basic Chemistry	CHE1BAS	15
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15

Second year (130 credit points)

Core units (115 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Biochemistry for Agricultural Sciences	AGR2BAS	20
TE-SEM-1	Plant Molecular Biology, Physiology and Nutrition	BOT2MPN	20
TE-SEM-1 or	Accounting for Management Decisions	ACC1AMD	15
TE-SEM-1 or	Foundations of Management	MGT1FOM	15
TE-SEM-1 or	Statistics for Life Sciences	STA1LS	15
TE-SEM-2	Business Law	LST1BSL	15
TE-SEM-2	Management Information Systems	BUS1MIS	15

Business elective (15 credit points)

One second year level business unit in keeping with the chosen major¹ 15

Third year (125 credit points)

Core units (80 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Introduction to Land and Soil Management	AGR2ILM	20
TE-SEM-1	Animal Health	AGR3ANH	20
TE-SEM-2	Physiology of Domestic Animals	AGR2PDA	20
TE-SEM-2	Land and Soil Management	AGR3LSM	20

Business electives (45 credit points)

Three second year level business units in keeping with the chosen major¹ 45

Fourth year (130 credit points)

Core units (40 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Plant Pests and Diseases	AGR3PPD	10
TE-SEM-2	Animal Nutrition	AGR3ANN	20
TE-SEM-2	Crop and Vine Agronomy	AGR3CVA	10

Business electives (90 credit points)

Four third year level business units in keeping with the chosen major¹ 60

Two second or third year level business units 30

Fifth year (125 credit points)

Core units (95 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Agricultural Case Studies	AGR4ACS	20
TE-SEM-1	Communication and Critical Analysis	AGR4CCA	15
TE-SEM-2	Research Project	AGR4RPR	60

Business electives (30 credit points)

Two third year level business units 30

Key: ¹ Business electives must be chosen to ensure that at least one of the following four majors is completed.

Majors offered by the School of Business

Business Economics

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	Introduction to Quantitative Analysis	ECO1IQA	15
TE-SEM-1	Intermediate Statistics for Business	ECO2ISB	15
TE-SEM-2	Managerial Economics	ECO2MEC	15
TE-SEM-1 or	Finance	FIN2FIN	15

Plus four units chosen from the following list:

TE-SEM-1	Corporate Finance	FIN3CFI	15
TE-SEM-1	Cost-Benefit Analysis	ECO3CBA	15
TE-SEM-1	Decision Analysis with Spreadsheets	ECO3DAS	15

TE-SEM-1	Economics of Sport	ECO3EOS	15
TE-SEM-1	Industrial Organisation	ECO3IND	15
TE-SEM-1	Industrial Relations	ECO3IRE	15
TE-SEM-1	International Trade	ECO3ITR	15
TE-SEM-1	Marketing Economics	ECO3MKE	15
TE-SEM-2	Economics of the Internet	ECO3INT	15
TE-SEM-2	Financial Risk Management	FIN3FRM	15
TE-SEM-2	Mergers and Acquisitions	FIN3MAQ	15

Financial Management

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	Introduction to Quantitative Analysis	ECO1IQA	15
TE-SEM-1 or	Finance	FIN2FIN	15
TE-SEM-2	Financial Instruments	FIN2FII	15
TE-SEM-1	Corporate Finance	FIN3CFI	15
TE-SEM-1	International Financial Management	FIN3IFM	15
TE-SEM-2	Investment and Portfolio Management	FIN3IPM	15

Plus one of the following two units:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Intermediate Statistics for Business	ECO2ISB	15
TE-SEM-2	Managerial Economics	ECO2MEC	15

Plus one of the following four units:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Financial Planning	FIN3FPL	15
TE-SEM-1	Financial Institutions Management	FIN3FIM	15
TE-SEM-1	Security Valuation	FIN3SEV	15
TE-SEM-2	Financial Risk Management	FIN3FRM	15

Management

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	International Management	MGT3IMG	15
TE-SEM-1	Strategic Management	MGT3SMG	15
TE-SEM-1 or	Human Resource Management	MGT2HRM	15
TE-SEM-2	Finance	FIN2FIN	15
TE-SEM-1 or	Organisational Behaviour	MGT2OBE	15
TE-SEM-2	Business Ethics	MGT2BET	15
TE-SEM-2	Organisational Change and Development	MGT3OCD	15
TE-SEM-2	Organisational Structure and Design	MGT3OSD	15

Marketing

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Consumer Behaviour	MKT2CBE	15
TE-SEM-1	Marketing Communication	MKT3MCO	15
TE-SEM-1 or	Marketing Principles and Practice	MKT2MPP	15
TE-SEM-2	Marketing Law	LST2MAL	15
TE-SEM-2	Marketing Research ¹	MKT3MRE	15
TE-SEM-2	Services Marketing	MKT2SMA	15
TE-SEM-2	Strategic Marketing ¹	MKT3SMK	15

Plus one of:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Electronic Marketing ²	MKT3ELM	15
TE-SEM-2	International Marketing	MKT3IMK	15

Key: ¹ It is highly recommended that students undertake these two units in the final year of their degree.

² Offered online at the Albury-Wodonga Campus.

Honours

An Honours degree in business is available to suitably qualified students and will require an additional year of full-time study. Honours units are part of the Bachelor of Agricultural Science program and those students achieving a sufficient standard in these units will be awarded an Honours degree. It is anticipated that in either case students may incorporate some material from the other area of study.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Agricultural Science/Bachelor of International Development (SZASID) – Melbourne (Bundoora)

This double degree program will provide graduates with understanding in two complementary discipline areas. The first is the scientific understanding of the processes in agriculture, while the second is an understanding of the political and social requirements for international development, when developing countries grapple with political, economic, and social constraints to alleviate poverty and participate in the global economy.

These challenges are among the most important that impact on global development. Frequently it is the agricultural sector, which is best able to assist the development process in these countries, as most of the population are involved in agriculture. Graduates who are aware of the human dimensions of development, and are skilled in the principles of agricultural science, would be versatile and be well equipped to find employment in the development assistance field. Professional recognition would apply for graduates, as they could be eligible to become members of the Australian Institute of Agricultural Science and Technology.

Industry experience

An essential requirement of the agricultural science degree is twelve weeks of approved industry experience taken during vacations.

Course structure

This double degree program is of five and a half years' full-time or equivalent part-time duration and requires the completion of 630 credit points overall. Students may complete the degree in five years as part of an accelerated study program.

Students will take core agricultural science units involving basic science units in first year, followed by soil, plant and animal science units without specialisation in any one area. Case study teaching allows for the integration of the earlier disciplinary knowledge using a problem-solving approach with real-life agricultural enterprises. The international development units are offered from a range of disciplines across the University, including anthropology, economics, history, linguistics, politics and sociology, with almost half of these being electives, allowing students to focus on areas of interest.

The table below summarises the credit point requirements from each faculty.

Year Level	Humanities and Social Sciences	Science, Technology and Engineering	Total
1	90	105	195
2	80	80	160
3	100	80	180
4	0	95	95

First year (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Agricultural Systems	AGR1SYS	15
TE-SEM-1	Culture and Globalisation: Introduction to Anthropology	ANT1CAG	15
TE-SEM-1	Organisation and Function of Cells and Organisms	BIO1OF	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15
TE-SEM-2	Globalisation: The Rise of the Modern World	HIS1DEV	15
TE-SEM-2	Physics for Life Sciences B	PHY1LSB	15
TE-SEM-2	Plant Science	BIO1PS	15

Choose one first-semester chemistry unit. Students who have passed VCE Chemistry, units 3 and 4 or equivalent, must choose CHEIGEN. Either:

TE-SEM-1 or	Basic Chemistry	CHE1BAS	15
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15

Second year (135 credit points)

Core units (90 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Biochemistry for Agricultural Sciences	AGR2BAS	20
TE-SEM-1	Conquest of the Americas: Aztecs, Incas, Mayans, Spaniards	HIS1CAM	15
TE-SEM-1	Plant Molecular Biology, Physiology and Nutrition	BOT2MPN	20
TE-SEM-2	Statistics for Life Sciences	STATLS	15
TE-SEM-2	The World Since 1945	HIS2WOR	20

Electives (45 credit points)

Students choose three first year level Humanities and Social Sciences units from the recommended list below.

Third year (120 credit points)

Core units (100 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Animal Health	AGR3ANH	20
TE-SEM-1	Development, Globalisation and Culture	ANT2DGC	20
TE-SEM-1	Introduction to Land and Soil Management	AGR2ILM	20
TE-SEM-2	Physiology of Domestic Animals	AGR2PDA	20
TE-SEM-2	Land and Soil Management	AGR3LSM	20

Electives (20 credit points)

Students choose a second year level Humanities and Social Sciences unit from the recommended list below.

Fourth year (140 credit points)

Core units (100 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Development in Practice	SOC3DIP	20
TE-SEM-1	Gender and Development	SOC2GAD	20
TE-SEM-1	Plant Pests and Diseases	AGR3PPD	10
TE-SEM-2	Animal Nutrition	AGR3ANN	20
TE-SEM-2	Crop and Vine Agronomy	AGR3CVA	10

Choose one of the following units:

TE-SEM-1	Introduction to Social Research Methods	SOC3MSR	20
TE-SEM-2	Introduction to Ethnographic Research	ANT3MQA	20

Electives (40 credit points)

Students must choose two third year level Humanities and Social Sciences units from the recommended list below.

Fifth year (115 credit points)

Core units (95 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Agricultural Case Studies	AGR4ACS	20
TE-SEM-1	Communication and Critical Analysis	AGR4CCA	15
TE-SEM-2	Research Project	AGR4RPR	60

Electives (20 credit points)

Students must choose one third year level Humanities and Social Sciences unit from the recommended list below.

Recommended units

Recommended elective unit options for first year are:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Introduction to Asia: Japan and Indonesia	AST1IJI	15
TE-SEM-1	Introduction to Aboriginal Australia	ANT1IIA	15
TE-SEM-1	Law and Society	LST1LAS	15
TE-SEM-1	Self and Community: Introduction to Sociology	SOC1SAC	15
TE-SEM-1	Sex, Gender and Identity	GSD1SGI	15
TE-SEM-1	States, Nations and Security: World in Transition	POL1SNS	15
TE-SEM-2	Australia and Beyond: Introduction to Sociology	SOC1AAB	15
TE-SEM-2	Economy, Environment and Human Rights: World in Transition	POL1EEH	15
TE-SEM-2	Our Global Village: Introduction to Anthropology	ANT1FET	15
TE-SEM-2	Introduction to Asia: China and India	AST1ICI	15
TE-SEM-2	Sex, Gender and Diversity	GSD1SGD	15
	First year Spanish		
	First year Chinese		
	First year Indonesian/Malay		

Recommended elective unit options for second and third year are:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Applied Anthropology	ANT2APA/ANT3APA	20
TE-SEM-1	Childhood and Culture	ANT2CAC/ANT3CAC	20
TE-SEM-1	Community Studies	SOC2CMS/SOC3CMS	20
TE-SEM-1	Comparative Social Movements	SOC2CSM/SOC3CSM	20
TE-SEM-1	Crises in South Asia:	POL2CSA/POL3CSA	20
	Weapons, Women, Well-Being		
TE-SEM-1	Critical Social Research:	GSD2CSR/GSD3CSR	20
TE-SEM-1	Critical Social Policy:	SOC2CSP/SOC3CSP	20
TE-SEM-1	Cross cultural Communication	LIN2CCC/LIN3CCC	20
TE-SEM-1	Economic Growth and Development	ECO2EGD	15
TE-SEM-1	Food and Drink and World History:	HIS2FDA/HIS3FDA	20
	Ancient to Modern Australia		
TE-SEM-1	Gender and Sexuality:	SOC2GES/SOC3GES	20
	Contemporary Debates		
TE-SEM-1	Global Environmental Issues	ECO2GEI	15
TE-SEM-2	International Law and	POL2ILO/POL3ILO	20
	International Organisation		
TE-SEM-1	International Relations:	POL2INR/POL3INR	20
	The Cold War and the Great Powers		
TE-SEM-1	Latin America Through Film	HIS2LFP/HIS3LFP	20
	and Popular Culture 1820–2000		
TE-SEM-1	Peasants and Politics in Latin America	HIS2PPL/HIS3PPL	20
TE-SEM-2	Political Change and Development	POL2DDA/POL3DDA	20
	in the Third World		
TE-SEM-1	Reconciliation	POL2REC/POL3REC	20
TE-SEM-1	Regional Economic Development	ECO3RED	15
TE-SEM-1	Research in Development	SOC3RID	20
TE-SEM-1	Sociology and Everyday Life	SOC2SEL/SOC3SEL	20
TE-SEM-1	Sociology of the Environment	SOC2SOE/SOC3SOE	20
TE-SEM-1	South African History	HIS2SAH/HIS3SAH	20
TE-SEM-2	Aboriginal Australia	ANT2ABA/ANT3ABA	20
TE-SEM-2	Visual Anthropology:	ANT2ASF/ANT3ASF	20
	Documenting Cultures		
TE-SEM-2	Australia, Asia and the World	POL2AAW/POL3AAW	20
TE-SEM-2	Australian Foreign Policy	HIS2AAH/HIS3AAH	20
TE-SEM-2	Culture, Race and Difference	ANT2CRD/ANT3CRD	20
TE-SEM-2	Ecological Philosophies	PHI2ECP/PHI3ECP	20
TE-SEM-2	Ecology, Democracy and Utopia	PHI2EDU/PHI3EDU	20
TE-SEM-2	Ethnicity and Identity:	SOC2EAI/SOC3EAI	20
	Social and Political Approaches		
TE-SEM-2	Language in Asia	LIN2LIA/LIN3LIA	20
TE-SEM-2	Modern World Economy	ECO2MWE	15
TE-SEM-2	Peace and Change	POL2PAC/POL3PAC	20
TE-SEM-2	Politics and the Economy	POL2PAE/POL3PAE	20
TE-SEM-2	Politics of Non-violent Activism	POL2PNV/POL3PNV	20
TE-SEM-2	Postcolonial Perspectives	ANT2PCP/ANT3PCP	20
TE-SEM-2	Social Policy, Welfare and the State	SOC2SWS/SOC3SWS	20
TE-SEM-2	Society and State in Japan and China	AST2EAS/AST3EAS	20
TE-SEM-2	South-East Asian Politics:	POL2SEA/POL3SEA	20
	Change and Conflict		
TE-SEM-2	The Politics of Economic Regions	POL2PER/POL3PER	20
	Second/Third year Chinese		
	Second/Third year Indonesian/Malay		
	Second/Third year Portuguese		
	Second/Third year Spanish		

Honours

An Honours degree in International Development / Development Studies is available to suitably qualified students and will require an additional year of full-time study. Honours units are part of the Bachelor of Agricultural Science program and those students achieving a sufficient standard in these units will be awarded the degree with Honours. It is anticipated that in either case students may incorporate some material from the other area of study.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Applied Science/Bachelor of Business (RZASB) – Bendigo

This degree is being phased out. No new enrolments will be permitted from 2007.

Bachelor of Applied Science/Bachelor of Computing (RZASC) – Bendigo

For full details of this course structure, see the Bendigo section of this Handbook.

Bachelor of Arts/Bachelor of Science (SZAS) – Melbourne (Bundoora)

This four-year double degree course is designed to allow students to pursue their areas of interest in both science and arts. Students select units from the Faculty of Science, Technology and Engineering and the Faculty of Humanities and Social Sciences. Course advisers are available to assist students in designing programs to meet their individual interests. If the course set out below is adhered to and there are no unreasonable timetable clashes, students are free to select any combination of science and arts units in which they are interested.

Course structure

This double degree is of four and a half years' full-time or equivalent part-time duration and requires the completion of 540 credit points overall. Students may complete this double degree in four years as part of an accelerated study program.

First year level

Core units (120 credit points)

60 credit points in arts

60 credit points in science

Second year level

Core units (160 credit points)

80 credit points in arts

80 credit points in science

Third year level

Core units (170 credit points)

80 credit points in arts

90 credit points in science

Elective units (90 credit points)

The 90 elective credit points can be chosen from units at any year level and in any discipline offered by the University, subject to the following restrictions:

- the maximum number of first year level credit points is 180, and the minimum number of third year level credit points is 180 and
- a minimum of one major in one arts discipline must be taken where a major is 30 credit points in first year, 40 in second year and 60 in third year and
- normally, the maximum load permitted in any one semester is 80 credit points.

Honours

Suitably qualified students may be eligible to undertake an Honours year, which will require an additional full-time year of study. Honours may be undertaken in either arts or science.

Definitions

Arts units are those taught by the Faculty of Humanities and Social Sciences for the Bachelor of Arts. Science units are those taught within the Faculty of Science, Technology and Engineering for any science degree offered by the faculty, including specialist science degrees such as the Bachelor of Psychological Science, Bachelor of Computer Science etc.

Bachelor of Bioinformatics/Bachelor of Science (SZBS) – Melbourne (Bundoora)

This double degree program is being phased out. No new enrolments will be permitted from 2008.

From 2008, students who wish to study Bioinformatics may do under the Science double degree program. Interested students should consult the Course Adviser for full details.

This double degree provides training in molecular biology and information technology. Students gain a multidisciplinary education in science, consisting of core units from areas of information technology and molecular biology, and achieve prerequisites for postgraduate studies in any one of the core units covered in the course. In addition to their specialist training, graduates are fully trained as molecular biologists and will therefore be competitive for a broad range of research jobs.

Course structure

This double degree is of four and a half years' full-time or equivalent part-time duration and requires the completion of 540 credit points overall. Students may complete this double degree in four years as part of an accelerated study program.

It is vital that all students obtain grounding in both the molecular biology and information technology arms of the double degree. The course is deliberately designed to provide maximum flexibility to students in the third and fourth years of study. The first year is therefore prescribed to provide all of the prerequisite units needed for later choices of study. An additional statistics unit is prescribed in second year and two bioinformatics units are available to inform students about the breadth of opportunities in the area of bioinformatics. Students are provided with a broad range of choices at the second, third and fourth years, and many second year level units are available in the third year of the degree to provide more breadth in student choice.

The maximum number of credit points permitted at first year level is 180 and the required minimum number of credit points at third year level is 180. Up to 125 credit points of units are optional and can be chosen either from the list of electives or from other units. Individual course plans should be designed in conjunction with the course adviser.

Students who commenced this degree before 2005 must meet the English Language Proficiency requirement in order to graduate. To satisfy this requirement, students should contact the Language and Academic Skills unit to arrange an appointment for an individual assessment of their English proficiency. For students commencing their degree from 2005, the requirements have been met within the course structure.

First year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Calculus and Number Systems	MAT1CNS	15
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15
TE-SEM-1	Object Oriented Programming Fundamentals	CSE1OOF	15
TE-SEM-1	Organisation and Function of Cells and Organisms	BIO1OF	15
TE-SEM-1 or			
TE-SEM-2	Discrete Mathematics	MAT1DM	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Genetics, Human Biology and Evolution	BIO1GEN	15
TE-SEM-2	Intermediate Object Oriented Programming	CSE1IOO	15

Second, third and fourth years (135 credit points each year)

Students must complete a minimum of 280 credit points of second and third year level science units over the second, third and fourth years of the degree.

Core units (40 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Statistics for Life Sciences ¹	STA2LS	20
TE-SEM-1	Sequence and Structure analysis	BNF3SEQ	10
TE-SEM-2	Molecular Structure and Modelling ^{3,4}	BNF3MOL	10

Second year level science electives (120 credit points)

120 credit points of science electives must be chosen from the following list and taken during the second or third year of the course. Students intending to take the major project CSE3PRA and CSE3PRB (30 points) must include CSE2ALG, CSE2DES, CSE2DBF, and CSE3SDM in their choice of units:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Biostatistics	STA2BS	20
TE-SEM-1	Database Fundamentals	CSE2DBF	15
TE-SEM-1	Fundamentals of Chemistry	CHE2FND	20
TE-SEM-1	Human and Molecular Genetics	GEN2HMG	20
TE-SEM-1	Modern Applied Statistics	STA2AS	15
TE-SEM-1	Network Engineering Fundamentals	CSE2NEF	15
TE-SEM-1	Vector Calculus	MAT2VCA	15
TE-SEM-1 or			
TE-SEM-2	Algorithms and Data Structures	CSE2ALG	15
TE-SEM-2	Applied Algebra	MAT2AAL	15
TE-SEM-2	Artificial Intelligence Fundamentals	CSE2AIF	15
TE-SEM-2	Biochemistry and Molecular Biology B	BCH2BMB	20
TE-SEM-2	Developments in Chemistry	CHE2DEV	20
TE-SEM-2	Ecological and Evolutionary Genetics	GEN2EEG	20
TE-SEM-2	Linear Algebra	MAT2LAL	15
TE-SEM-2	Mathematics Topics for Computer Science	MAT2MFC	15
TE-SEM-2	Mechanics	MAT2MEC	15
TE-SEM-2	Models for Data Analysis	STA2MD	15
TE-SEM-2	System Design Engineering Fundamentals	CSE2DES	15
TE-SEM-2	Object Oriented Programming Using C++	CSE1CPP	15

Third year level science electives (120 credit points)

A further 120 credit points of science electives must be chosen from the following list and taken during the third and fourth years of the course:

TE-SEM-1	Biochemistry and Molecular Biology 3A	BCH3BMA	30
TE-SEM-1	Biostatistics	STA3BS	15
TE-SEM-1	Human and Molecular Genetics	GEN3HMG	30
TE-SEM-1	Scientific Computing	MAT3SC	15
TE-SEM-1	Software Engineering Project A ^{5,6}	CSE3PRA	15
TE-SEM-1	Statistical Inference	STA3SI	15
TE-SEM-1	System Design and Methodologies	CSE3SDM	15
TE-SEM-2	Materials and Methods for a Joint Chemistry Majors	CHE3ADB	30
TE-SEM-2	Analyses Based on linear Models	STA3LM	15
TE-SEM-2	Applied Mathematics Project	MAT3AMP	15
TE-SEM-2	Applied Statistics	STA3AS	15
TE-SEM-2	Discrete Algebraic Structures	MAT3DS	15
TE-SEM-2	Ecological and Evolutionary Genetics	GEN3EEG	30
TE-SEM-2	Computational Intelligence	CSE3CI	15
TE-SEM-2	Biochemistry and Molecular Biology 3B	BCH3BMB	30
TE-SEM-2	Programming Project ⁵	CSE3PRG	30
TE-SEM-2	Software Engineering Project B ^{5,6}	CSE3PRB	15

Other units (125 credit points)

The remaining 125 credit points may be selected from units in the above lists, not already taken, or from other units offered by the Faculty of Science, Technology and Engineering or by other Faculties. At least 40 credit points must be chosen at third year level.

Key: ¹ This unit must be taken in the second year of the degree.

² Those students taking a biochemistry major must not take BNF3SEQ.

³ Those students taking a chemistry major must not take BNF3MOL.

⁴ These units must be taken in the third or fourth year of the degree.

⁵ Incompatible units. Enrolment in the major project CSE3PRA and CSE3PRB is subject to quota. Selection is based on academic merit.

⁶ Linked units: both units must be taken in the one academic year.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Business/Bachelor of Computing (RZBC) – Bendigo

For full details of this degree structure, see the Bendigo Campus section of this Handbook.

Bachelor of Civil Engineering/Bachelor of Applied Science (RZASE) – Bendigo

For full details of this degree structure, see the Bendigo Campus section of this Handbook.

Bachelor of Civil Engineering/Bachelor of Science (RZCES)– Bendigo

For full details of this degree structure, see the Bendigo Campus section of this Handbook.

Bachelor of Cognitive Science/Bachelor of Computer Science (SZCSCS) – Melbourne (Bundoora)

This double degree program is being phased out. No new enrolments will be permitted from 2008.

From 2008, students who wish to study Cognitive Science may do under the Science double degree program. Interested students should consult the Course Adviser for full details.

This course provides students with a good grounding in cognitive science and especially in computer science and psychology. It equips students with the skills and knowledge required to qualify them for employment as an ICT professional in a variety of businesses and industries.

Successful graduates will have an understanding of the nature of human intelligence processes, methods, and criteria for problem solving and computer simulations of information processing. They will be qualified to work in financial organisations in which information systems are designed and in government agencies and industries in which simulations of decision making and strategies are developed. Graduates are also likely to find employment in the design of expert systems, decision support and cooperative work systems, computer-aided instruction and learning, artificial communication systems, software design (data-based and knowledge-based), industrial and organisational psychology and human resources.

Graduates of this double degree, who have a strong academic performance, may be invited to undertake an Honours program in cognitive science, psychology, or computer science.

Course structure

This double degree is of four and a half years' full-time or equivalent part-time duration and requires the completion of 545 credit points overall. Students may complete this double degree in four years as part of an accelerated study program.

At first year level, students complete a set of core units from within the disciplines of psychological science, computer science, mathematics, and logic to a total of 180 credit points.

At second year level students take units to build on the knowledge gained in psychology and computer science, and the unit, COG2TOP (Topics in Cognitive Science), which integrates some of this knowledge. At third year level, students may undertake a research project in computer science that involves the design of software and a research project in psychology. Electives at second and third year level allow students to study some logic, philosophy, or linguistics.

Set out below is a suggested program of study. This is intended as a model only and may be varied to meet individual student's needs and is subject to prerequisite and timetabling constraints. Please note that 'Recommended electives' should be selected from the list of units at the end of this description. Students are advised to consult with an adviser of studies prior to finalising their programs.

Mid-year commencement

Students who commence the degree mid year will commence their studies on 30th June, three weeks earlier than the normal commencement date of semester. Psychology units would normally commence in first semester of the following year.

First year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Calculus and Number Systems	MAT1CNS	15
TE-SEM-1	Discrete Mathematics	MAT1DM	15

TE-SEM-1	Object Oriented Programming Fundamentals	CSE1OOF	15
TE-SEM-1	Psychology A	PSY1PYA	15
TE-SEM-2	Beginning Logic	LOG1BEL	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Intermediate Object Oriented Programming	CSE1IOO	15
TE-SEM-2	Psychology B	PSY1PYB	15
TE-SEM-2	Statistics for Psychology	STA1PSY	15

Second year (140 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Database Fundamentals	CSE2DBF	15
TE-SEM-1	Introduction to Behavioural Neuroscience A	PSY1BNA	15
TE-SEM-1	Psychology A	PSY2PYA	20
TE-SEM-1	System Design Engineering Fundamentals	CSE2DES	15
TE-SEM-1 or			
TE-SEM-2	Algorithms and Data Structures	CSE2ALG	15
TE-SEM-2	Introduction to Behavioural Neuroscience B	PSY1BNB	15
TE-SEM-2	Psychology B	PSY2PYB	20
TE-SEM-2	Object Oriented Programming Using C++	CSE1CPP	15
TE-SEM-2	Topics in Cognitive Science	COG2TOP	10

Third year (140 credit points)

Core units (60 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Network Engineering Fundamentals	CSE2NEF	15
TE-SEM-1	System Design and Methodologies ¹	CSE3SDM	15
TE-SEM-1	Computer System Architecture	CSE2CSA	15
TE-SEM-2	Artificial Intelligence Fundamentals	CSE2AIF	15

Recommended electives (80 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1 or			
TE-SEM-2	Second year level recommended electives		60
TE-SEM-1 or			
TE-SEM-2	Third year level recommended electives		20

Fourth year (130 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Psychology	PSY3PYA	20
TE-SEM-1	Research Project A	PSY3RSA	20
TE-SEM-2	Psychology	PSY3PYB	20
TE-SEM-2	Research Project B	PSY3RSB	20
TE-SEM-1 and/or			
TE-SEM-2	Third year level computer science project ¹		30
TE-SEM-1 or			
TE-SEM-2	One psychology unit chosen from the following list.		20
TE-SEM-1	Counselling and Family Psychology A	PSY3CFA	20
TE-SEM-1	Applied Neuroscience A ²	PSY3ANA	20
TE-SEM-2	Social and Community Psychology B	PSY3SCB	20
TE-SEM-2	Cognitive and Development Psychology B ²	PSY3CDB	20

Key: ¹ Must include either the Software Engineering Project (CSE3PRA and CSE3PRB) (30 credit points) or the Programming Project (CSE3PRG) (30 credit points). Students who undertake the software engineering project, must also take the third year computer science core unit CSE3SDM (System Design and Methodologies) in the same semester as CSE3PRA.

² Not available in 2008.

Recommended electives

Second year level

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Automated Reasoning ¹	LOG2AUR	20
TE-SEM-1	History and Philosophy of Science A ²	PHI2HPA	20
TE-SEM-1	Philosophy of Science A	PHI2PSA	20
TE-SEM-1	Phonetics and Phonology: The Sounds of Language	LIN2PHP	20
TE-SEM-1	Syntax	LIN2SYN	20
TE-SEM-2	Certainty and Subjectivity	PHI2CAS	20
TE-SEM-2	Frontiers of Logic ¹	LOG2FOL	20
TE-SEM-2	History and Philosophy of Science B 3	PHI2HPB	20
TE-SEM-2	Semantics	LIN2SEM	20

Third year level

TE-SEM-1	Automated Reasoning ¹	LOG3AUR	20
----------	----------------------------------	---------	----

TE-SEM-1	Philosophy of Science	PHI3PSA	20
TE-SEM-1	Phonetics and Phonology: The Sounds of Language	LIN3PHP	20
TE-SEM-1	Syntax	LIN3SYN	20
TE-SEM-2	Certainty and Subjectivity	PHI3CAS	20
TE-SEM-2	Computational Intelligence	CSE3CI	15
TE-SEM-2	Professional Environment	CSE3PE	15
TE-SEM-2	Frontiers and Logic ¹	LOG3FOL	20
TE-SEM-2	Semantics	LIN3SEM	20
TE-SEM-2	Web Applications Engineering	CSE3WAE	15
TE-SEM-2	Intermediate Games Technology	CSE3IGT	15

Key: ¹ Unavailable in 2008

² Incompatible with PHI1AAP

³ Incompatible with PHI1BAP

Honours

Admission to Honours in Cognitive Science is by application only, admission to computer science or other disciplines is by invitation only. All disciplines require qualifications and entry requirements that would admit the student into the Honours course in that discipline.

For Honours in cognitive science, students must complete 120 credit points comprising recommended fourth year units from two of the disciplines contributing to the Bachelor of Cognitive Science/Bachelor of Computer Science course and a research project in computer science or psychology.

Students selecting a computer science project (60 credit points) must also complete units to a total of 60 credit points. Students selecting a psychology project (60 credit points) must also complete units to 60 credit points. Units will be assessed by the department offering them. Meeting this requirement, however, does not guarantee a place in the Honours year as resources may limit the total number of places available and students are expected to find a supervisor prior to re-enrolment.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Computer Science/Bachelor of Commerce (SZCSC) – Melbourne (Bundoora)

This innovative double degree program offers a comprehensive program of study to meet the significant increase in demand for ICT professionals with a commerce background and leads to professional accreditation in the Australian Society of and the Institute of Chartered Accountants, Australia (ICAA) and the Australian Computer Society.

Course structure

This double degree is of four and a half years' full-time or equivalent part-time duration and requires the completion of 540 credit points overall. Students may complete this double degree in four years as part of an accelerated study program.

For professional accreditation purposes, the syllabus is mostly fixed, although electives constitute approximately 35% of the final two years. The workload in each year is equivalent to 12.5% more than that required in either single degree. The order in which students take the units may be varied to suit individual needs. Further, some prescribed units may be replaced by others in special circumstances. Students who have trouble with the overloaded nature of the course may apply to transfer to either a Bachelor of Computer Science or a Bachelor of Commerce.

Students should note that the units, BUS1MIS, BUS2BAD and MGT2BCO are not permitted. The unit MAT1CNS may be substituted for MAT1CFE if desired.

Mid-year commencement

Students entering the course mid year with equivalent year-12 studies may commence second semester on 30th June 2008, three weeks earlier than the normal commencement date for that teaching period. Some students with prior tertiary studies may also be required to commence their course on 30th June. These students will be advised by the faculty office at the time of offer.

Scholarships

First year scholarships are available for high achieving students.

Prospective candidates should contact the Department of Computer Science and Computer Engineering early in their year-12 studies.

First year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Accounting for Management Decisions	ACC1AMD	15
TE-SEM-1	Calculus and Functions for Economics	MAT1CFE	15
TE-SEM-1	Discrete Mathematics	MAT1DM	15
TE-SEM-1	Object Oriented Programming Fundamentals	CSE1OOF	15
TE-SEM-1 or			
TE-SEM-2	Introductory Statistics for Business	ECO1ISB	15
TE-SEM-2	Foundations of Management	MGT1FOM	15
TE-SEM-2	Introductory Financial Accounting	ACC1IFA	15
TE-SEM-2	Intermediate Object Oriented Programming	CSE1IOO	15
TE-SEM-2	Object Oriented Programming Using C++	CSE1CPP	15

Second year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Computer System Architecture	CSE2CSA	15
TE-SEM-1	Database Fundamentals	CSE2DBF	15
TE-SEM-1 or			
TE-SEM-2	Algorithms and Data Structures	CSE2ALG	15
TE-SEM-1 or			
TE-SEM-2	Introduction to Business Law	LST1BSL	15
TE-SEM-1 or			
TE-SEM-2	Macroeconomics	ECO1IMA	15
TE-SEM-1 or			
TE-SEM-2	Microeconomics	ECO1IMI	15
TE-SEM-2	Artificial Intelligence Fundamentals	CSE2AIF	15
TE-SEM-2	Law of Business Association	LST2LBA	15
TE-SEM-2	Mathematics Topics for Computer Science	MAT2MFC	15

Third year (135 credit points)

Core units (90 credit points)

Teaching period	Unit name	Unit code	Credit Points
3TE-SEM-1 or			
TE-SEM-2	Finance	FIN2FIN	15
TE-SEM-1 or			
TE-SEM-2	Corporate Reporting	ACC2CRE	15
TE-SEM-1 or			
TE-SEM-2	Introductory Management Accounting	ACC2IMA	15
TE-SEM-1 or			
TE-SEM-2	Intermediate Management Accounting	ACC2IMB	15
TE-SEM-2	System Design Engineering Fundamentals	CSE2DES	15
TE-SEM-2	Professional Environment	CSE3PE	15

Electives (45 credit points)

One second year level computer science unit chosen from a 'stream' list of units	15
One computer science elective	15
One third year level accounting unit ¹	15

Fourth year (135 credit points)

Core units (30 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	System Design and Methodologies	CSE3SDM	15
TE-SEM-1 or			
TE-SEM-2	Advanced Financial Accounting	ACC3AFA	15

Electives (105 credit points)

Third year level computer science project, either the Software Engineering Project (CSE3PRA and CSE3PRB) (30 credit points) or the Programming Project (CSE3PRG) (30 credit points).	30
One third year level computer science unit, which may be chosen from either the list of 'stream' units or other third year level list below	15
Two third year level accounting units ¹	30
General third year electives	30

Key: ¹ Taxation (ACC3TAX) and Auditing (ACC3AUD) are highly recommended. These two units are required for membership of the Institute of Chartered Accountants, Australia (ICAA) although they are no longer required for accreditation for CPA Australia. Those students who do not complete Taxation and Auditing as part of their undergraduate degree will be admitted to membership in CPA Australia, but will be required to complete further studies in both areas to maintain their accreditation.

*Computer Science Specialty Streams:**Software Engineering Stream:*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Second year: System Testing and Quality	CSE2STQ	15
TE-SEM-1	Third year: Metrics Quality and Reliability	CSE3MQR	15

Data Engineering Stream:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Second year: Internet Client Engineering	CSE2ICE	15
TE-SEM-1	Third year: Database Management Systems	CSE3DMS	15
TE-SEM-2	Web Applications Engineering	CSE3WAE	15

Artificial Intelligence Stream:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Third year: Artificial Intelligence: Logic and Reasoning	CSE3ALR	15
TE-SEM-2	Computational Intelligence	CSE3CI	15

Network Engineering Stream:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1 or SEM-2	Second year: Network Engineering Fundamentals	CSE2NEF	15
TE-SEM-1	Third year: Intermediate Network Engineering	CSE3INE	15
TE-SEM-2	Networks, Systems and Web Security	CSE3NSW	15

Other available third-year level computer science units:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Intelligent Multimedia Systems	CSE3IMS	15
TE-SEM-1	Intermediate Graphics Programming	CSE3IGR	15
TE-SEM-2	Intermediate Games Technology	CSE3IGT	15
TE-SEM-2	Object Oriented Application Development	CSE3OAD	15
TE-SEM-2	Operating Systems	CSE3OSS	15

Honours

An Honours degree in either computer science or commerce is available to suitably qualified students and will require an additional year of full-time study. It is anticipated that in either case, students may incorporate some material from the other area in their Honours program.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Computer Science (Honours)/Bachelor of Electronic Engineering (SZCSEE) – Melbourne (Bundoora)

This double degree course reflects the integration of electronic engineering and computer science in the rapidly expanding area of information technology. The course aims to produce engineering professionals who have core skills in hardware and software engineering.

Professional recognition

The course is fully accredited by Engineers Australia. Graduates are eligible for professional membership of the Australian Computer Society.

Industry experience

It is a requirement for graduate membership of Engineers Australia that students undertake 12 weeks of approved industry experience under the guidance of an experienced engineer before graduating.

This usually is obtained during the vacation following the end of either third or fourth year.

Scholarships

First year scholarships are available for high achieving students. Prospective candidates should contact the Department of Computer Science and Computer Engineering early in their Year-12 studies.

CISCO program

A CISCO certification training program is available for students who pass the units CSE2/3NET, CSE3PPR, and CSE3LAN in their undergraduate studies. From 2008, students take CSE2NEF and CSE3INE. Any students interested in obtaining full details of this CISCO program should contact the Department of Computer Science and Computer Engineering at the beginning of first semester.

Course structure

This double degree is of six years' full-time or equivalent part-time duration and requires the completion of 690 credit points overall. Students may complete this double degree in five years as part of an accelerated study program.

For professional accreditation purposes, the course is mostly fixed and is overloaded by approximately 15% each year compared with a normal BCompSc or BElectEng degree to allow students to complete the double degree in five years.

In the first year, all students study computer science, mathematics, electronics, and physics. At second and third year levels, students concentrate on computer science and electronics.

Honours work in computer science is undertaken in the fourth and fifth years of the course, in conjunction with components of the Bachelor of Engineering degree.

Progression to the fourth year Honours program in computer science is conditional upon completion of the first three years of the course at a satisfactory level, which is defined as a minimum mark of 70%, calculated over the best third year level computer science units. The units CSE3PRA and CSE3PRB (30 credit points) may be included, but will be calculated at 15 credit points only. Students are not permitted to include fourth year computer science or electronic engineering foundation units as part of the Honours years.

In addition, students who do not wish to undertake the computer science Honours program may complete a specified program of 630 credit points, taken over five years full-time or equivalent part-time studies, which will enable them to qualify with a Bachelor of Computer Science and a Bachelor of Electronic Engineering (pass or Honours). Students considering such an option require the approval of the relevant departments.

Mid-year commencement

Students who commence the degree in second semester will commence their studies on 30th June 2008, three weeks earlier than the normal commencement date for that semester. Some students with prior tertiary studies may also be required to commence on 30th June also. The students will be advised by the Faculty Office.

First year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Calculus and Probability for Engineers	MAT1CPE	15
TE-SEM-1	Discrete Mathematics	MAT1DM	15
TE-SEM-1	Introductory Electronics	ELE1IEL	15
TE-SEM-1	Object Oriented Programming Fundamentals	CSE1OOF	15
TE-SEM-1	Principles of Physics A	PHY1SCA	15
TE-SEM-2	Basic Electronic Circuits	ELE1CCT	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Intermediate Object Oriented Programming	CSE1IOO	15
TE-SEM-2	Principles of Physics B	PHY1SCB	15

Second year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Microprocessors and Digital Design	ELE2MDD	15
TE-SEM-1	Linear Circuits and Signals	ELE2CIR	15
TE-SEM-1	Vector Calculus	MAT2VCA	15
TE-SEM-1 or TE-SEM-2	Algorithms and Data Structures	CSE2ALG	15
TE-SEM-2	Digital Design with Programmable Logic	ELE2DDP	15

TE-SEM-2	Analogue Circuits and Interfacing	ELE2ANI	15
TE-SEM-2	Linear Algebra	MAT2LAL	15
TE-SEM-2	Physics for Engineering	PHY2EPB	15
TE-SEM-2	Object Oriented Programming Using C++	CSE1CPP	15

Third year (150 credit points)*Core unit (90 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Control Systems	ELE3CON	15
TE-SEM-1	Communication Systems	ELE3CMN	15
TE-SEM-1	System Design and Methodologies	CSE3SDM	15
TE-SEM-2	Digital Signal Processing	ELE3SIP	15

Students choose one of the following two computer science units:

TE-SEM-1 or	Network Engineering Fundamentals	CSE2NEF	15
TE-SEM-1	Database Fundamentals	CSE2DBF	15

Students choose one of the following two computer science units:

TE-SEM-2 or	Artificial Intelligence Fundamentals	CSE2AIF	15
TE-SEM-2	System Design Engineering Fundamentals	CSE2DES	15

Electives (60 credit points)

Computer science units¹ 60

Key: ¹ Students must include either the software engineering project CSE3PRA and CSE3PRB (30 credit points) or the programming project CSE3PRG (30 credit points) in their choice of units. Students who choose CSE3PRA must take CSE3SDM as co-requisite.

Fourth year (135 credit points)*Core units (90 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Embedded Processors	ELE3EMB	15
TE-SEM-1	Thesis A	CSE4THA	30
TE-SEM-2	Thesis B	CSE4THB	30
TE-SEM-2	Third Year Project	ELE3PRO	15

Electives (45 credit points)

Students must undertake one specialisation unit from their chosen stream.

Biomedical Engineering Stream:

TE-SEM-2	Biomedical Engineering A	ELE3BIO	15
----------	--------------------------	---------	----

Optical or Communication Engineering Streams:

TE-SEM-2	Digital Communication Systems	ELE3DCS	15
----------	-------------------------------	---------	----

Electronic Systems Stream:

TE-SEM-2	Electronic Design Automation – Tools and Techniques	ELE3DDE	15
----------	---	---------	----

Two third or fourth year level computer science units 30

Fifth year (135 credit points)*Core units (60 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Applied Management for Engineers	ELE4EMT	15
TE-SEM-1	Engineering Project A ²	ELE4EPA	15
TE-SEM-2	Engineering Project B ²	ELE4EPB	30

Specialty units (30 credit points)

Students must undertake two specialisation units from their chosen stream. All units are worth 15 credit points:

Biomedical Engineering Stream:

TE-SEM-1	Biomedical Engineering B	ELE4BME	15
TE-SEM-2	Clinical Engineering	ELE4CLN	15

Communication Engineering Stream:

TE-SEM-2	Advanced Communication Systems	ELE4ACS	15
TE-SEM-2	Communication Networks	ELE4NET	15

Electronic Systems Stream:

TE-SEM-1	Advanced Digital Systems Design	ELE4ADD	15
TE-SEM-2	Digital Control Theory	ELE4DCT	15

Optical Engineering Stream:

TE-SEM-2	Optical Fibre Communication Systems	ELE4OFC	15
TE-SEM-2	Communication Networks	ELE4NET	15

Electives (45 credit points)

Two fourth year level computer science units	30
One fourth year level engineering unit	15

Honours

The Honours thesis in the chosen area of computer science must be accepted as applicable to engineering. Successful students are awarded first class, second class (upper division), second class (lower division) or third class Honours.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Computer Science/Bachelor of Mathematical and Statistical Science (SZCSMS) – Melbourne (Bundoora)

This double degree program is being phased out. No new enrolments will be permitted from 2008.

This double degree program provides the opportunity for students to undertake major studies in mathematical and statistical science, while at the same time completing all the core material from the Bachelor of Computer Science. The course aims to produce ICT professionals. The double degree enables students with a vocational interest in mathematics, statistics, or computer science to enhance their employability by a major in two areas of study.

In particular, the double degree gives students an opportunity to combine major studies in mathematics or statistics with computer science, which addresses the frequent need to combine mathematical and statistical modelling of practical problems with a computer-implemented solution. Graduates are eligible for professional membership of the Australian Computer Society. Graduates may be eligible for accreditation with the Australian Mathematical Society and/or the Australian Statistical Society, depending on the units studied in the Bachelor of Mathematical and Statistical Science.

Course structure

This double degree is of four and a half years' full-time or equivalent part-time duration and requires the completion of 540 credit points overall. Students may complete this double degree in four years as part of an accelerated study program.

Certain computer science, mathematics, and statistics units are prescribed. Students may choose any other units for which they satisfy the prerequisites, subject to meeting the minimum credit point levels prescribed below.

Mid-year commencement

Students entering the course mid year with equivalent Year-12 studies will commence second semester on 30th June 2008, three weeks earlier than the normal commencement date for that teaching period. Some students with prior tertiary studies may also be required to commence their course on 30th June. These students will be advised by the faculty office at the time of offer.

First year (135 credit points)*Core units (105 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Calculus and Number Systems	MAT1CNS	15
TE-SEM-1	Discrete Mathematics	MAT1DM	15
TE-SEM-1	Object Oriented Programming Fundamentals	CSE1OOF	15
TE-SEM-1	Statistical Science	STA1SS	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Intermediate Object Oriented Programming	CSE1IOO	15
TE-SEM-2	Object Oriented Programming Using C++	CSE1CPP	15

Electives (30 credit points)

Students choose units to the value of 30 credit points from any first year level units. (The unit BUS1MIS is not permitted.)

Second year (135 credit points)*Core units (90 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Computer System Architecture	CSE2CSA	15
TE-SEM-1	Algorithms and Data Structures	CSE2ALG	15
TE-SEM-2	Applied Algebra	MAT2AAL	15
TE-SEM-2	Artificial Intelligence Fundamentals	CSE2AIF	15
TE-SEM-2	Professional Environment	CSE3PE	15
TE-SEM-2	Mathematics Topics for Computer Science	MAT2MFC	15

Electives (45 credit points)

One second year level mathematics or statistics unit	15
Two second year level computer science units, which may be chosen from the speciality streams below	30

Third year (135 credit points)

Unit name	Credit Points
Second year level units offered by any faculty (the unit MGT2BCO is not permitted)	30
Third year level mathematics or statistics units	45
Third year level computer science units which may be chosen from the list of speciality stream units:	60

*Computer Science Specialty Streams:**Software Engineering Stream:*

Teaching period	Unit name	Unit code	Credit Points
Second year:			
TE-SEM-1	System Testing and Quality	CSE2STQ	15
Third year:			
TE-SEM-1	Metrics Quality and Reliability	CSE3MQR	15
TE-SEM-1	System Design and Methodologies	CSE3SDM	15

Data Engineering Stream:

Teaching period	Unit name	Unit code	Credit Points
Second year:			
TE-SEM-1	Internet Client Engineering	CSE2ICE	15
Third year:			
TE-SEM-1	Database Management Systems	CSE3DMS	15
TE-SEM-2	Web Applications Engineering	CSE3WAE	15

Artificial Intelligence Stream:

Teaching period	Unit name	Unit code	Credit Points
Third year:			
TE-SEM-1	Artificial Intelligence: Logic and Reasoning	CSE3ALR	15
TE-SEM-2	Computational Intelligence	CSE3CI	15

Network Engineering Stream:

Teaching period	Unit name	Unit code	Credit Points
Second year:			
TE-SEM-1 or SEM-2	Network Engineering Fundamentals	CSE2NEF	15
Third year:			
TE-SEM-1	Intermediate Network Engineering	CSE3INE	15
TE-SEM-	Networks, Systems and Web Security	CSE3NSW	15

Fourth year (135 credit points)

Unit name	Credit Points
Third year level computer science project, either the software engineering project CSE3PRA and CSE3PRB (30 credit points) or the programming project CSE3PRG (30 credit points). If CSE3PRA and CSE3PRB are chosen, CSE3SDM must be chosen as co-requisite to CSE3PRA.	30
Third year level mathematics or statistics units, subject to there being a total of at least 60 credit points of third year level mathematics or statistics units in the overall enrolment.	30
Third year level units offered by any faculty (the unit BUS4CTB is not permitted).	75

The order in which students take the units may be varied to suit individual needs.

Honours

An Honours degree in mathematics, statistics, or computer science will be available to suitably qualified students and will require an additional year of full-time study. It is anticipated that, in any case, students may incorporate some material from the other area, in their Honours program.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Computer Science/Bachelor of Science (SZCSS) – Melbourne (Bundoora)

This degree is being phased out. No new enrolments have been permitted since 2005.

This double degree program provides the opportunity for students to undertake major studies in any area of science offered by the Faculty of Science, Technology and Engineering, while at the same time completing all the core material from the Bachelor of Computer Science.

The double degree enables students with a vocational interest in either computer science or science to enhance their employability by a major study of both areas.

In particular, the double degree gives students an opportunity to combine major studies in mathematics or statistics with computer science, which addresses the frequent need to combine mathematical and statistical modelling of practical problems with a computer-implemented solution. Graduates are eligible for professional membership of the Australian Computer Society.

Course structure

This course is of four years full-time or equivalent part-time duration and requires the completion of 540 credit points overall. Certain computer science, mathematics, and statistics units are prescribed. Students may choose any other units for which they satisfy the prerequisites, subject to meeting the minimum credit point levels prescribed below and subject to the limits, which apply in the general Bachelor of Science on the amount, which may be taken from one discipline area.

First year (135 credit points)*Core units (105 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Calculus and Number Systems	MAT1CNS	15
TE-SEM-1	Discrete Mathematics	MAT1DM	15
TE-SEM-1	Object Oriented Programming Fundamentals	CSE1OOF	15
TE-SEM-1	Statistical Science	STA1SS	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Intermediate Object Oriented Programming	CSE1IOO	15
TE-SEM-2	Object Oriented Programming Using C++	CSE1CPP	15

Electives (30 credit points)

Thirty credit points of electives may be chosen from any first year units, subject to meeting the prerequisites for those units. (The unit BUS1MIS is not permitted.)

Second year (135 credit points)*Core units (60 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Computer System Architecture	CSE2CSA	15
TE-SEM-1 or TE-SEM-2	Algorithms and Data Structures	CSE2ALG	15
TE-SEM-2	Artificial Intelligence Fundamentals	CSE2AIF	15
TE-SEM-2	Professional Environment	CSE3PE	15

Electives (75 credit points)

Any first or second year science units, subject to meeting the prerequisites for those units and subject to a maximum of 30 credit points at first year level. 60

One second year level computer science unit which may be chosen from the list of stream units below 15

*Computer Science Specialty Streams:**Software Engineering Stream:*

Teaching period	Unit name	Unit code	Credit Points
	Second year:		
TE-SEM-1	System Testing and Quality	CSE2STQ	15
	Third year:		
TE-SEM-1	Metrics Quality and Reliability	CSE3MQR	15
TE-SEM-1	System Design and Methodologies	CSE3SDM	15

Data Engineering Stream:

Teaching period	Unit name	Unit code	Credit Points
	Second year:		
TE-SEM-1	Internet Client Engineering	CSE2ICE	15
	Third year:		
TE-SEM-1	Database Management Systems	CSE3DMS	15
TE-SEM-2	Web Applications Engineering	CSE3WAE	15

Artificial Intelligence Stream:

Teaching period	Unit name	Unit code	Credit Points
	Third year:		
TE-SEM-1	Artificial Intelligence: Logic and Reasoning	CSE3ALR	15
TE-SEM-2	Computational Intelligence	CSE3CI	15

Network Engineering Stream:

Teaching period	Unit name	Unit code	Credit Points
	Second year:		
TE-SEM-1 or TE-SEM-2	Network Engineering Fundamentals	CSE2NEF	15
	Third year:		
TE-SEM-1	Intermediate Network Engineering	CSE3INE	15
TE-SEM-2	Networks, Systems and Web Security	CSE3NSW	15

Third year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
	Second year level units, subject to meeting required prerequisites (the units MGT2BCO and BUS4CTB are not permitted)		45
	Third year level science units		30
	Third year level computer science units chosen from the following list. Students must include either the software engineering project CSE3PRA and CSE3PRB (30 credit points) or the programming project CSE3PRG (30 credit points) in their third year units. Students who choose the PRA and PRB option must also choose CSE3SDM as co-requisite.		60

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Artificial Intelligence: Logic and Reasoning	CSE3ALR	15
TE-SEM-1	Database Management Systems	CSE3DMS	15
TE-SEM-1	Intelligent Multimedia Systems	CSE3IMS	15

TE-SEM-2	Web Applications Engineering	CSE3WAE	15

Key: ¹ This unit is co-requisite to the first semester of the Software Engineering Project (CSE3PRA)

Fourth year (135 credit points)

	Credit Points
Third year level computer science unit.	15
Third year level science units (subject to meeting the prerequisites for those units)	60
Third year level units offered by any faculty (subject to meeting the prerequisites for those units)	60

The order in which students take the units may be varied to suit individual needs. In addition, later year science units may be substituted for earlier year science units of the same value. Science units that may be taken as part of the Bachelor of Science degree are units offered by any department within the Faculty of Science,

Technology and Engineering, other than the Department of Computer Science and Computer Engineering.

Honours

An Honours degree in either science or computer science will be available to suitably qualified students and will require an additional year of full-time study. It is anticipated that in either case, students may incorporate some material from the other area in their Honours program.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Electronic Engineering/Master of Biomedical Engineering (SZEEBE) – Melbourne (Bundoora)

This is a double degree program offered by the Department of Electronic Engineering that enables completion of a Bachelor of Electronic Engineering degree in combination with a Masters level degree in biomedical engineering. This program is designed for people interested in the expanding discipline of biomedical engineering, leading to a career in the professional health sector. It will provide training in electronic engineering to graduate engineering level, as well as training in the specialty of biomedical engineering. Graduates may apply for membership of Engineers Australia at the grade of Professional Engineer and seek employment in industry as an electronic engineer or as a biomedical engineering specialist. Graduates can, after holding a position of professional responsibility in biomedical engineering, apply for registration with the College of Biomedical Engineers. This program is fully accredited by Engineers Australia.

Biomedical engineering

The provision of first-rate health care and the prevention of disease are priorities for the 21st century. Advances in medicine in recent years have been assisted by new technology, including the applications of advanced electronics.

Biomedical engineers are at the forefront of the rapidly expanding, high-technology provision of these health services, including such fields as patient monitoring systems for operating theatres and intensive care units, computerised medical imaging and monitoring, artificial organs, neural prostheses and life-support systems, hospital safety and equipment management, as well as all other aspects of technology applied to medicine.

Entry with advanced standing

Students who have completed or partially completed a Diploma or Certificate studies may be granted advanced standing.

Industry experience

Students are required to complete at least 12 weeks certified practical experience under the guidance of an experienced engineer before being deemed to have completed the course and therefore qualify to graduate. This is preferably undertaken during the annual vacation following either the third or the fourth years of the course but may be done at the conclusion of the final year.

Scholarships

First year scholarships are available for high achieving students. Prospective candidates should contact the Department of Electronic Engineering early in their Year-12 studies for details.

Course structure

This double degree program is of five and a half years full-time or equivalent part-time duration and requires the completion of 670 credit points. Students may complete the program in five years as part of an accelerated study program.

As well as meeting the requirements of the Bachelor of Electronic Engineering degree, the first two years of the concurrent program include the basic life science training required for a career in

biomedical engineering. The biomedical specialisation is commenced in the third year and continues through to the fifth year. In the third year, students combine physiology or anatomy studies with their engineering studies and in the fourth year students complete their engineering project. In the fifth and final year, students complete their thesis, along with specialist biomedical units. The first four years of the course are overloaded by 15 or 20 credit points to enable completion of the combined program in five years of full-time study. This course is structured to allow reversion to the single Bachelor of Electronic Engineering course at any time and students must perform at a level satisfactory to the Head of Department in the third and fourth years of the course to be permitted to continue in the double degree program. Practical work is an integral part of the course and is compulsory.

First year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Introductory Electronics	ELE1IEL	15
TE-SEM-1	Calculus and Probability for Engineers	MAT1CPE	15
TE-SEM-1	C Programming for Engineers and Scientists	CSE1CES	15
TE-SEM-1	Organisation and Function of Cells and Organisms	BIO1OF	15
TE-SEM-1	Principles of Physics A	PHY1SCA	15
TE-SEM-2	Basic Electronic Circuits	ELE1CCT	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Electronic Engineering Design Project	ELE1EDP	15
TE-SEM-2	Principles of Physics B	PHY1SCB	15

Second year (140 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Electrical Systems and Design	ELE2ELE	15
TE-SEM-1	Human Physiology A	HBS2HPA	20
TE-SEM-1	Linear Circuits and Signals	ELE2CIR	15
TE-SEM-1	Microprocessors and Digital Design	ELE2MDD	15
TE-SEM-1	Vector Calculus	MAT2VCA	15
TE-SEM-2	Digital Design with Programmable Logic	ELE2DDP	15
TE-SEM-2	Analogue Circuits and Interfacing	ELE2ANI	15
TE-SEM-2	Linear Algebra	MAT2LAL	15
TE-SEM-2	Physics for Engineering	PHY2EPB	15

Third year (140 credit points)

Core units (125 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Communication Systems	ELE3CMN	15
TE-SEM-1	Control Systems	ELE3CON	15
TE-SEM-1	Embedded Processors	ELE3EMB	15
TE-SEM-1	Instrumentation Electronics and Sensors	ELE3IES	15
TE-SEM-2	Digital Signal Processing	ELE3SIP	15
TE-SEM-2	Human Physiology B	HBS2HPB	20
TE-SEM-2	Statistics for Life Sciences	STA1LS	15
TE-SEM-2	Third Year Project	ELE3PRO	15

Elective unit (15 credit points)

Students may take a 15 credit point third year level electronic unit available as listed below or select from any third year units available in the School of Engineering and Mathematical Sciences, or from any other unit approved by the undergraduate course adviser. The elective can be taken in first or second semester.

Recommended electives from within the School:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	Digital Communication Systems	ELE3DCS	15
TE-SEM-2	Electronic Design Automation – Tools and Techniques	ELE3DDE	15

Fourth year (135 credit points)

Core units (120 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Applied Management for Engineers	ELE4EMT	15
TE-SEM-1	Biomedical Engineering	ELE4BME	15
TE-SEM-1	Engineering Project A ¹	ELE4EPA	15
TE-SEM-1	Modern Applied Statistics	STA2AS	15
TE-SEM-1	Database Fundamentals	CSE2DBF	15
TE-SEM-2	Clinical Engineering	ELE4CLN	15
TE-SEM-2	Engineering Project B ¹	ELE4EPB	30

Elective (15 credit points)

Students choose from fourth year level units offered by the Department of Electronic Engineering, or any other unit approved by the undergraduate course adviser.

Fifth year (120 credit points)

Core units (60 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Electronic Engineering Major Project A ¹	ELE5MPA	30
TE-SEM-2	Electronic Engineering Major Project B ¹	ELE5MPB	30

Electives (60 credit points)

Sixty credit points are chosen from available fourth or fifth year level electronic units, in keeping with the biomedical engineering specialty or other units approved by the postgraduate course adviser.

Key: ¹ Linked units: both units must be taken in the one academic year.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Electronic Engineering/Master of Microelectronic Engineering (SZEEME) – Melbourne (Bundoora)

This is a double degree program offered by the Department of Electronic Engineering that enables completion of a Bachelor of Electronic Engineering degree in combination with a Masters level degree in microelectronics. It provides electronic engineering students with a direct path from first year through to a Masters degree specialising in microelectronic design. Graduates may apply for membership of Engineers Australia at the grade of Professional Engineer and seek employment in industry as an electronic engineer or a microelectronic engineering specialist. This program is fully accredited by Engineers Australia.

Microelectronic engineering

The course is designed to produce graduates with specialist skills in microelectronic engineering, which is an area that has been recognised as a strategic business development requirement by the Victorian government. The course offers a unique concurrent program, combining undergraduate and Masters level studies in the one program.

Entry with advanced standing

Students who have completed or partially completed a Diploma or Certificate studies may be granted advanced standing.

Industry experience

Students are required to complete at least 12 weeks certified practical experience under the guidance of an experienced engineer before being deemed to have completed the course and therefore qualify to graduate. This is preferably undertaken during the annual vacation following either the third or the fourth years of the course but may be done at the conclusion of the final year.

Scholarships

First year scholarships are available for high achieving students. Prospective candidates should contact the Department of Electronic Engineering early in their Year-12 studies for details.

Course structure

This double degree program is of five and a half years full-time or equivalent part-time duration and requires the completion of 660 credit points. Students may complete the program in five years as part of an accelerated study program. The first two years encompass studies in electronics, mathematics, computer science, and physics. The microelectronics specialisation is commenced in the third year and continues through to the fifth year. Topics covered include digital system design, software tools and integrated circuit design. This course is structured to allow reversion to the single Bachelor of Electronic Engineering course at any time and students must perform at a level satisfactory to the Head of Department in the third and

fourth years of the course to continue in the double degree program. Practical work is an integral part of the course and is compulsory.

First year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Introductory Electronics	ELE1IEL	15
TE-SEM-1	Calculus and Probability for Engineers	MAT1CPE	15
TE-SEM-1	Object-Oriented Programming Fundamentals	CSE1OOF	15
TE-SEM-1	Principles of Physics A	PHY1SCA	15
TE-SEM-2	Basic Electronic Circuits	ELE1CCT	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Electronic Engineering Design Project	ELE1EDP	15
TE-SEM-2	Intermediate Object-Oriented Programming	CSE1IOO	15
TE-SEM-2	Principles of Physics B	PHY1SCB	15

Second year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Electrical Systems and Design	ELE2ELE	15
TE-SEM-1	Linear Circuits and Signals	ELE2CIR	15
TE-SEM-1	Microprocessors and Digital Design	ELE2MDD	15
TE-SEM-1	Vector Calculus	MAT2VCA	15
TE-SEM-2	Digital Design with Programmable Logic	ELE2DDP	15
TE-SEM-2	Analogue Circuits and Interfacing	ELE2ANI	15
TE-SEM-2	Linear Algebra	MAT2LAL	15
TE-SEM-2	Object-Oriented Programming Using C++	CSE1CPP	15
TE-SEM-2	Physics for Engineering	PHY2EPB	15

Third year (135 credit points)

Core units (105 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Communication Systems	ELE3CMN	15
TE-SEM-1	Control Systems	ELE3CON	15
TE-SEM-1	Embedded Processors	ELE3EMB	15
TE-SEM-1	Instrumentation Electronics and Sensors	ELE3IES	15
TE-SEM-2	Digital Signal Processing	ELE3SIP	15
TE-SEM-2	Electronic Design Automation – Tools and Techniques	ELE3DDE	15
TE-SEM-2	Third Year Project	ELE3PRO	15

Elective units (30 credit points)

Students may take 30 credit points of third year level electronics units as listed below or select from any third year units available in the School of Engineering and Mathematical Sciences, or any other unit approved by the undergraduate course adviser. One of the electives may be taken in the first semester.

Recommended electives from within the School:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	Biomedical Engineering A	ELE3BIO	15
TE-SEM-2	Digital Communication Systems	ELE3DCS	15

Fourth year (135 credit points)

Core units (105 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Advanced Digital Systems Design	ELE4ADD	15
TE-SEM-1	Applied Management for Engineers	ELE4EMT	15
TE-SEM-1	Engineering Project A ¹	ELE4EPA	15
TE-SEM-1	Semiconductor Materials and Devices ⁴	ELE5SDP	15
TE-SEM-2	EDA Tools and Design Methodology	ELE5TDM	15
TE-SEM-2	Engineering Project B ¹	ELE4EPB	30

Electives (30 credit points)

Students choose two units from the following list or other units approved by the undergraduate course adviser. The units available may vary from year to year according to staff availability and student demand. Details of the units available, and the teaching period in which they will run, are finalised in February of each year.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Advanced Signal Processing	ELE4ASP	15
TE-SEM-1	Biomedical Engineering	ELE4BME	15
TE-SEM-1	Reconfigurable Computing Hardware ²	ELE4RCH	15
TE-SEM-1	Radio Frequency Design	ELE4RFD	15

TE-SEM-1 or			
TE-SEM-2	Directed Study ³	ELE4DIR	15
TE-SEM-2	Advanced Communication Systems	ELE4ACS	15
TE-SEM-2	Advanced Instrumentation Electronics	ELE4AAE	15
TE-SEM-2	Advanced Management Information Systems ²	CSE4AMI	15
TE-SEM-2	Advanced Topics B ²	ELE4ATB	15
TE-SEM-2	Antennas and Propagation	ELE4ANS	15
TE-SEM-2	Clinical Engineering	ELE4CLN	15
TE-SEM-2	Communication Networks	ELE4NET	15
TE-SEM-2	Digital Control Theory	ELE4DCT	15
TE-SEM-2	Image Processing and Coding ²	ELE4IPC	15
TE-SEM-2	Optical Fibre Communication Systems	ELE4OFC	15
TE-SEM-2	Optical Fibre Sensors ²	ELE4OFS	15

Fifth year (120 credit points)

Core units (105 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Test and Verification ²	ELE5TAV	15
TE-SEM-1	Integrated Circuit Design	ELE5ICD	15
TE-SEM-2	Emerging Topics in IC Design	ELE5ETD	15
and either			
TE-SEM-1 or			
TE-SEM-2	Microelectronic Major Project ⁵	ELE5MAP	60
or			
TE-SEM-1	Microelectronic Major Project A ^{1,5}	ELE5MXA	30
and			
TE-SEM-2	Microelectronic Major Project B ^{1,5}	ELE5MXB	30

Elective unit (15 credit points)

Any other fifth year level electronics unit or other unit as approved by the postgraduate course adviser.

Key: ¹ Linked units: both units must be taken in the one academic year.

² Not available in 2008.

³ Enrolment in ELE4DIR requires the approval of the Bachelor of Electronic Engineering Course Adviser.

⁴ Available every second year, from and including 2008.

⁵ Students complete 60 credit points of major project work in the 5th year, either across two semesters (ELE5MXA and ELE5MXB) or in a single semester (ELE5MAP).

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Electronic Engineering/Master of Telecommunication Engineering (SZEETE) – Melbourne (Bundoora)

This is a double degree program offered by the Department of Electronic Engineering that enables completion of a Bachelor of Electronic Engineering degree in combination with a Masters level degree in telecommunications. This course is designed to produce graduates with specialist skills in telecommunication engineering who will be able to design telecommunication devices, circuits, and systems and therefore obtain employment in one of the many telecommunication companies now in Australia. It will provide training in electronic engineering to graduate engineer level, as well as training in the specialty of telecommunication engineering. Graduates may apply for membership of Engineers Australia at the grade of Professional Engineer and seek employment in industry as an electronic engineer or a telecommunication engineering specialist. This program is fully accredited by Engineers Australia.

Telecommunication engineering

The communications engineer today is faced with many challenges because of the rapid advances in computer, internet, multimedia, and telecommunication technologies. For example, mobile phones have become readily available, the introduction of optical fibres has improved long distance communications, and the move to digital techniques has allowed many new features to be introduced to the telephone network. Communications is now of great importance to

organisations of all sizes and to all people. As a result, communications is now the fastest growing industry sector in the world.

Entry with advanced standing

Students who have completed or partially completed a Diploma or Certificate studies may be granted advanced standing.

Industry experience

Students are required to complete at least 12 weeks certified practical experience under the guidance of an experienced engineer before being deemed to have completed the course and therefore qualify to graduate. This is preferably undertaken during the annual vacation following either the third or the fourth years of the course but may be done at the conclusion of the final year.

Scholarships

First year scholarships are available for high achieving students. Prospective candidates should contact the Department of Electronic Engineering early in their Year-12 studies for details.

Course structure

This double degree program is of five and a half years full-time or equivalent part-time duration and requires the completion of 660 credit points. Students may complete the program in five years as part of an accelerated study program.

The first two years encompass studies in electronics, mathematics, computer science, and physics. The telecommunications specialisation is commenced in the third year and continues through to the fifth year. Topics covered include mobile communications, optical fibre systems, computer networks, and satellite systems. This course is structured to allow reversion to the single Bachelor of Electronic Engineering course at any time and students must perform at a level satisfactory to the Head of Department in the third and fourth years of the course to continue in the double degree program. Practical work is an integral part of the course and is compulsory.

TE-SEM-2	Optical Fibre Communication Systems	ELE4OFC	15

Specialty options (30 credit points)

Students must undertake two specialty units from the following list.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	Advanced Communication Systems	ELE4ACS	15
TE-SEM-2	Communication Networks	ELE4NET	15
TE-SEM-2	Antennas and Propagation	ELE4ANS	15

Elective (15 credit points)

Students choose from fourth year level units offered by the Department of Electronic Engineering, or any other unit approved by the undergraduate course adviser.

Fifth year (120 credit points)

Core units (60 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Telecommunications Major Project A ¹	ELE5TPA	30
TE-SEM-2	Telecommunications Major Project B ¹	ELE5TPB	30

Specialty options (30 credit points)

Students must undertake two specialty units from the following list.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Broadband Digital Communications	ELE5BDC	15
TE-SEM-1	Personal Mobile Communication	ELE5PMC	15
TE-SEM-1	Telecommunications Systems Engineering	ELE5TSE	15

Electives (30 credit points)

Students choose from fifth year level units offered by the Department of Electronic Engineering, or select any other unit approved by the postgraduate course adviser. The units available may vary from year to year according to staff availability and student demand. Details of the units available, and the teaching period in which they will run, will be finalised in February of each year.

Key: ¹ Linked units: both units must be taken in the one academic year.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Engineering (Civil)/Bachelor of Business (RZBE) – Bendigo

For full details of this degree structure, see the Bendigo Campus section of this Handbook.

Bachelor of Environmental Science/Bachelor of Biological Sciences (SZESBS) – Melbourne (Bundoora)

This double degree program is being phased out. No new enrolments will be permitted from 2008.

From 2008, students who wish to study Environmental Science may do under the Science double degree program. Interested students should consult the Course Adviser for full details.

Environmental science is an area of great importance to the community. Government funding for research and problem solving (e.g., salinity, water resources) is being increased. The breadth of science required in such studies is considerable and the double degree structure will permit students to gain a background in all areas related to environmental problems, both the physical and biological.

Course structure

This double degree is of four and a half years' full-time or equivalent part-time duration and requires the completion of 540 credit points overall. Students may complete this double degree in four years as part of an accelerated study program.

The environmental science component considers issues related to the earth, to water and to the air. Thus, units are taken which cover the earth's surface, air chemistry, pollution, greenhouse and ozone depletion. Water chemistry and studies of soils lead to units on ground water, contaminant transfer, salinity, and hydrology. The biological sciences units cover the basics of botany, genetics, and zoology, which then lead to specialisations in human biology, microbiology, and biochemistry with the possibility of specialisation in ecology.

Career opportunities

Depending on the choice of units, graduates can expect to find career opportunities in areas such as hydrology, land conservation, pollution control, salination, clean production, ground water contamination, soil reclamation, radiation control, forestry, and conservation. These may be pursued under the auspices of various organisations, for example: government agencies, environmental consultancies, oil companies, mining companies, chemical manufacturing companies, food and pharmaceutical industries, forensic science laboratories, hospitals and research laboratories.

Students who commenced this degree before 2005 must meet the English Language Proficiency requirement in order to graduate. To satisfy this requirement, students should contact the Language and Academic Skills unit to arrange an appointment for an individual assessment of their English proficiency. For students commencing their degree from 2005, the requirements have been met within the course structure.

First year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Calculus and Number Systems	MAT1CNS	15
TE-SEM-1	Organisation and Function of Cells and Organisms	BIO1OF	15
TE-SEM-1	Physics for Life Sciences A	PHY1LSA	15
TE-SEM-1	Processes that Shape the Earth	GEO1PRO	15
Choose one first-semester chemistry unit: Students who have passed VCE Chemistry, units 3 and 4 or equivalent, must choose CHEIGEN.			
TE-SEM-1 or	Basic Chemistry	CHE1BAS	15
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Earth Structure, Resources and History of Life	GEO1ERS	15
TE-SEM-2	Physics for Life Sciences B	PHY1LSB	15

Second year (135 credit points)

For admission to second year, students would normally be expected to have completed the units prescribed for first year. Students wishing to transfer to this course are required to have completed units in chemistry, geology, mathematics, and physics with a C average.

Core units (65 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Animal Diversity, Ecology and Behaviour	BIO1AD	15
TE-SEM-1 or			
TE-SEM-2	Statistics for Life Sciences	STA2LS	20
TE-SEM-2	Genetics, Human Biology and Evolution	BIO1GEN	15
TE-SEM-2	Plant Science	BIO1PS	15

Environmental Science electives (70 credit points)

Students must include a minimum of three units from the list below. The remaining credit points can be selected from those units not already taken or from any other second year level science units. Enrolment in units not listed below must be approved by the course adviser.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Introduction to Land and Soil Management	AGR2ILM	20
TE-SEM-1	Surface/Groundwater Flow and Chemistry	GEO2EGW	20
TE-SEM-2	Chemistry of Water Quality	CHE2CWQ	15
TE-SEM-2	Imaging and Materials Characterisation	PHY2IMC	10

Third year (140 credit points)

Core unit (10 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Environmental Enquiry A ¹	ENV2ESA	5
TE-SEM-2	Environmental Enquiry B ¹	ENV2ESB	5

Environmental Science electives (40 credit points)

Students must select units to the value of 40 credit points from those listed below.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Advanced Environmental Analytical Chemistry A ²	CHE3EAA	10
TE-SEM-1	Water Resource Management	ENV3WRM	10
TE-SEM-2	Advanced Environmental Analytical Chemistry B ²	CHE3EAB	5
TE-SEM-2	Land and Soil Management	AGR3LSM	20
TE-SEM-2	Landscape and Climate Change	GEO3EGL	10
TE-SEM-2	Remote Sensing and GIS	GEO3EGR	10
TE-SEM-2	Greenhouse Effect and Climate Change	PHY3GRE	10
TE-SEM-2	Remote Sensing	PHY3REM	10

Biological Science electives (80 credit points)

Students choose units to the value of 80 credit points from the following list. It is highly recommended that students complete a full year of study in at least two biological science disciplines in order to ensure flexibility of unit choice at third year.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Animal Ecology ³	ZOO2AE	10
TE-SEM-1	Biochemistry and Molecular Biology A	BCH2BMA	20
TE-SEM-1	Entomology ³	ZOO2ENT	10
TE-SEM-1	Human and Molecular Genetics	GEN2HMG	20
TE-SEM-1	Introductory Microbiology	MIC2IM	20
TE-SEM-1	Issues in Conservation	CBE2IC	20
TE-SEM-1	Plant Molecular Biology, Physiology and Nutrition	BOT2MPN	20
TE-SEM-2	Australian Ecology and Systematics	BOT2AES	20
TE-SEM-2	Biochemistry and Molecular Biology B	BCH2BMB	20
TE-SEM-2	Ecological and Evolutionary Genetics	GEN2EEG	20
TE-SEM-2	Medical and Veterinary Microbiology	MIC2MVM	20
TE-SEM-2	Vertebrate Morphology, Evolution and Comparative Physiology	ZOO2VMP	20

Elective (10 credit points)

Second or third year level elective from any department subject to meeting prerequisite requirements

Fourth year (130 credit points)

Core unit (10 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1 or			
TE-SEM-2	Environmental Research	ENV3ENV	10

Environmental Science electives (30 credit points)

Students must select 30 credit points of third year level environmental science electives from those listed above.

Biological Science electives (60 credit points)

Students must select units to the value of 60 credit points from those listed below. All units are worth 30 credit points.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Advanced Medical and Veterinary Microbiology	MIC3AMM	30
TE-SEM-1	Applications in Conservation	CBE3AC	30

TE-SEM-1	Biochemistry and Molecular Biology 3A	BCH3BMA	30
TE-SEM-1	Field and Environmental Botany	BOT3FEB	30
TE-SEM-1	Human and Molecular Genetics	GEN3HMG	30
TE-SEM-1	Zoology A	ZOO3EPA	30
TE-SEM-2	Ecological and Evolutionary Genetics	GEN3EEG	30
TE-SEM-2	Ecology, Systematics and Evolution	BOT3ESE	30
TE-SEM-2	Advanced General Microbiology	MIC3AGM	30
TE-SEM-2	Biochemistry and Molecular Biology 3B	BCH3BMB	30
TE-SEM-2	Plant Biotechnology	BOT3PB	30
TE-SEM-2	Zoology B	ZOO3EPB	30

Electives (30 credit points)

Students choose third year level units from any department subject to meeting the prerequisite requirements for those units.

Key: ¹ Linked units, normally taken in the one academic year.

² Linked units, recommended to be taken in the one academic year.

³ Linked units, normally taken together.

Honours

Students who satisfy the requirements for Honours entry are eligible for the Honours programs offered by the departments involved. Those students who wish to undertake cross-disciplinary coursework will be permitted to do so with the permission of the course adviser. The possibility of supervision across the disciplines also exists. All Environmental Science Honours programs must be approved by the Honours coordinator in the particular discipline and the Environmental Science Course Adviser.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Finance/Bachelor of Mathematical and Statistical Science (SZFMS) – Melbourne (Bundoora)

This double degree program is being phased out. No new enrolments will be permitted from 2008.

This double degree program provides the opportunity for students to undertake major studies in mathematical and statistical science, while at the same time completing all the core material from the Bachelor of Finance.

The double degree enables students with a vocational interest in finance to enhance their employability in the sector with a strong background in mathematics and statistics while qualifying to apply for accreditation with the Australian Institute of Banking and Finance and either or both the Australian Mathematical Society and the Statistical Society of Australia Inc. The flexibility of the non-finance half of the degree will allow students to further enhance their employability by allowing them significant study in an elective from anywhere across the University or the ability to do additional mathematics, statistics and finance units.

Course structure

This double degree is of four and a half years' full-time or equivalent part-time duration and requires the completion of 540 credit points overall. Students may complete this double degree in four years as part of an accelerated study program.

It must include the following:

- all the prescribed units for finance (270 credit points) listed below including at least 90 credit points at third year level
- all the prescribed units for mathematics and statistics (165 credit points) including at least 45 credit points at second year level and at least 60 credit points at third year level
- the remaining 105 credit points may be taken as general electives
- a maximum of 180 credit points at first year level
- a minimum of 180 credit points at third year level.

Set out below is a suggested program of study. This is intended as a model only and may be varied to meet an individual student's needs and is subject to prerequisite and timetabling constraints. Students are advised to consult with the course adviser prior to finalising their programs.

First year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Accounting for Management Decisions	ACC1AMD	15
TE-SEM-1	Statistical Science	STA1SS	15
TE-SEM-1	Discrete Mathematics	MAT1DM	15
TE-SEM-1 or	Macroeconomics	ECO1IMA	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Introductory Financial Accounting	ACC1IFA	15
TE-SEM-2	Microeconomics	ECO1IMI	15

TE-SEM-1	First year level or above elective		15
or	Calculus and Functions for Economics	MAT1CFE	15
TE-SEM-1	Calculus and Number Systems	MAT1CNS	15

Second year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Information Technology Fundamentals	CSE1ITF	15
TE-SEM-1	Modern Applied Statistics	STA2AS	15
TE-SEM-2	Finance	FIN2FIN	15
TE-SEM-2	Financial Instruments	FIN2FII	15
TE-SEM-2	Linear Algebra	MAT2LAL	15
TE-SEM-2	Models for Data Analysis	STA2MD	15
	First year level or above elective		15
	Second year level elective		15
	First year level business elective		15

Third year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	International Financial Management	FIN3IFM	15
TE-SEM-1	Microeconomic Theory	ECO2MIT	15
TE-SEM-1	Scientific Computing	MAT3SCS	15
TE-SEM-2	Analyses Based on Linear Models	STA3LM	15
TE-SEM-2	Investment and Portfolio Management	FIN3IPM	15
TE-SEM-2	Macroeconomic Theory	ECO2MAT	15
	Second year level or above elective		15
	Third year level mathematics or statistics elective		15
	Second year level business elective		15

Fourth year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Corporate Finance	FIN3CFI	15
TE-SEM-1 or	Second year level or above elective		15
TE-SEM-1 or	Third year level or above mathematics or statistics elective		15
TE-SEM-2	Third year level or above elective		15
TE-SEM-2	Banking and Finance Law	LAW2BFL/LAW3BFL	15
TE-SEM-2	Financial Risk Management	FIN3FRM	15
	Third year level mathematics or statistics elective		15

Two finance electives from the School of Business to be chosen from the following list. All units are worth 15 credit points.

Teaching period	Unit name	Unit code
TE-SEM-1	Derivatives	FIN3DER
TE-SEM-1	Econometric Methods	ECO3EME
TE-SEM-1	Financial Institutions Management	FIN3FIM
TE-SEM-1	Financial Planning	FIN3FPL
TE-SEM-1	Microeconomic Analysis	ECO3MIA
TE-SEM-1	Security Valuation	FIN3SEV
TE-SEM-1 or	Taxation	ACC3TAX
TE-SEM-2	Applied Econometrics	ECO3AEC
TE-SEM-2	Case Studies in Finance	FIN3CSF
TE-SEM-2	Case Studies in Financial Planning	FIN3CFP
TE-SEM-2	Computational Finance	FIN3CLF
TE-SEM-2	Macroeconomic Analysis	ECO3MAA
TE-SEM-2	Mergers and Acquisitions	FIN3MAQ
TE-SEM-2	Retirement and Estate Planning	FIN3REP

Honours

An Honours degree in mathematics, statistics, or finance will be available to suitably qualified students and will require an additional year of full-time study. It is anticipated that in either case, students may incorporate some material from the other area in their Honours program.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Finance/Bachelor of Science (SZFS) – Melbourne (Bundoora)

This double degree program provides the opportunity for students to undertake major studies in any area of science offered by the Faculty of Science, Technology and Engineering, while at the same time completing all the core material from the Bachelor of Finance.

The double degree enables students with a vocational interest in finance to enhance their employability by completing a major study of germane areas of science such as mathematics, statistics, and computer science. Graduates may apply for accreditation with the Australian Institute of Banking and Finance.

Course structure

This degree is of four years full-time or equivalent part-time duration and requires the completion of 540 credit points overall and must include the following:

- All the core units for finance (255 credit points) including at least 90 credit points at third year level
- all the prescribed units for science (240 credit points) including at least 60 credit points at second year level and at least 90 credit points at third year level. To fulfil the requirements for a science major, students must take at least 30 credit points at first year level, 40 credit points at second year level, and 60 credit points at third year level in a single science discipline.
- the remaining 45 credit points may be taken as general electives
- a maximum of 180 credit points at first year level
- a minimum of 180 credit points at third year level.

Set out below is a suggested program of study. This is intended as a model only and may be varied to meet an individual student's needs and is subject to prerequisite and timetabling constraints. Students are advised to consult with an adviser of studies prior to finalising their programs.

First year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Accounting for Management Decisions	ACC1AMD	15
TE-SEM-1	Calculus and Functions for Economics	MAT1CFE	15
TE-SEM-1	Statistical Science	STA1SS	15
TE-SEM-1 or TE-SEM-2	First year level science major		30
TE-SEM-1 or TE-SEM-2	Macroeconomics	ECO1IMA	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Introductory Financial Accounting	ACC1IFA	15
TE-SEM-2	Microeconomics	ECO1IMI	15

Second year (135 credit points)

TE-SEM-1	Modern Applied Statistics	STA2AS	15
TE-SEM-1	Management Information Systems	BUS1MIS	15
TE-SEM-1 or TE-SEM-2	Information Technology Fundamentals	CSE1ITF	15
TE-SEM-1 or TE-SEM-2	Foundations of Management	MGT1FOM	15
TE-SEM-2	First year level or above science elective		15
TE-SEM-1 or TE-SEM-2	Second year level science major		20
TE-SEM-1 or TE-SEM-2	Second year level science major		20

TE-SEM-2	Statistics Projects	STA2PR	5
TE-SEM-2	Finance	FIN2FIN	15
TE-SEM-2	Financial Instruments	FIN2FII	15

Third year (135 credit points)

TE-SEM-1	International Financial Management	FIN3IFM	15
TE-SEM-1	Microeconomic Theory	ECO2MIT	15
TE-SEM-1 or TE-SEM-2	Marketing Principles and Practice	MKT2MPP	15
TE-SEM-1 or TE-SEM-2	Third year level science major		30
TE-SEM-1 or TE-SEM-2	Third year level science major		30
TE-SEM-2	Investment and Portfolio Management	FIN3IPM	15
TE-SEM-2	Macroeconomic Theory	ECO2MAT	15

Fourth year (135 credit points)

TE-SEM-1	Corporate Finance	FIN3CFI	15
TE-SEM-1 or TE-SEM-2	Second year level or above electives		30
TE-SEM-1 or TE-SEM-2	Third year level science elective		30
TE-SEM-2	Banking and Finance Law	LAW2BFL/ LAW3BFL	15
TE-SEM-2	Financial Risk Management	FIN3FRM	15
	Two electives from the School of Business to be chosen from the following list:		30
TE-SEM-1	Econometric Methods 3 ¹	ECO3EME	15
TE-SEM-2	Case Studies in Finance	FIN3CSF	15
TE-SEM-2	Computational Finance	FIN3CLF	15
TE-SEM-2	Introduction to Time-Series Econometrics	ECO3ITE	15
TE-SEM-2	Financial History	FIN3FHY	15
TE-SEM-2	Financial Planning	FIN3FPL	15

Key: ¹ Prospective Honours candidates should include at least one of these units.

Honours

An Honours degree in either science or finance will be available to suitably qualified students and will require an additional year of full-time study. It is anticipated that in either case, students may incorporate some material from the other area in their Honours program. Precise specification of this aspect of the program remains to be finalised.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Information Systems/Bachelor of Business (SZISB) – Melbourne (Bundoora)

Graduates gain skill in management information systems (including the design and use of software and applications in business organisations) together with the relevant expertise required for a career in business management as an ICT professional. An Honours degree in either information systems or business (with a specialisation in management) requires an additional year of study. The course aims to train graduates to become ICT professionals. Graduates of the course are eligible for membership of the Australian Computer Society (ACS).

Upon completion of this course, students should possess:

- a comprehensive knowledge and understanding of the core body of mathematics and computer science required for the construction of information processing systems;
- a comprehensive understanding of the different types of information technology tools, and their role in managing knowledge and information
- an understanding of the role of modern information systems within organisations and familiarity with the business settings in which these systems are used;
- an ability to critically evaluate currently existing information technology systems and new developments
- familiarity with the latest developments in information technology
- skills in software engineering and object-oriented programming currently using Java;

- skills and abilities necessary to function effectively in project teams;
- written and oral communication skills enabling effective communication with professional colleagues and the wider community;
- ability to engage in lifelong learning, and
- an appreciation of pertinent social, legal and ethical issues faced by today's computing professional.

Scholarships

First year scholarships are available for high achieving students. Prospective candidates should contact the Department of Computer Science and Computer Engineering early in their year-12 studies for details.

Course structure

This double degree is of four and a half years' full-time or equivalent part-time duration and requires the completion of 540 credit points overall. Students may complete this double degree in four years as part of an accelerated study program.

The syllabus is mostly fixed, although business and computer science electives constitute approximately 45% of the final two years. The workload in each of the first three years is equivalent to 12.5% more than that in either single degree. Students who have trouble with the overloaded nature of the course may apply to transfer to either a Bachelor of Information Systems or Bachelor of Business.

The order in which students take the units may be varied to suit individual needs. Further, some prescribed units may be replaced by others in special circumstances.

Set out below is a suggested program of study. This is intended as a model only and may be varied to meet an individual student's needs and is subject to prerequisite and timetabling constraints. Students are advised to consult with an adviser of studies prior to finalising their programs.

Mid-year commencement

Students entering the course mid-year with equivalent year 12 studies will commence second semester on 30th June 2008, three weeks earlier than the normal commencement date for that teaching period. Some students with prior tertiary studies may also be required to commence their course on 30th June. These students will be advised by the faculty office at the time of offer.

First year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Discrete Mathematics	MAT1DM	15
TE-SEM-1	Information Technology Fundamentals	CSE1ITF	15
TE-SEM-1	Macroeconomics	ECO1IMA	15
TE-SEM-1	Object Oriented Programming Fundamentals	CSE1OOF	15
TE-SEM-2	Accounting for Management Decisions	ACC1AMD	15
TE-SEM-2	Foundations of Management	MGT1FOM	15
TE-SEM-2	Intermediate Object Oriented Programming	CSE1IOO	15
TE-SEM-2	Introductory Statistics for Business	ECO1ISB	15
TE-SEM-2	Microeconomics	ECO1IMI	15

Second year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Database Fundamentals	CSE2DBF	15
TE-SEM-1	Internet Client Engineering	CSE2ICE	15
TE-SEM-1	Modern Applied Statistics	STA2AS	15
TE-SEM-1 or TE-SEM-2	Algorithms and Data Structures	CSE2ALG	15
TE-SEM-1 or TE-SEM-2	Introduction to Business Law	LST1BSL	15
TE-SEM-2	Artificial Intelligence Fundamentals	CSE2AIF	15
TE-SEM-2	System Design Engineering Fundamentals	CSE2DES	15
TE-SEM-1 or TE-SEM-2	Two business units, in keeping with the chosen major ¹		30

Third year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	E-Business Systems	BUS3EBS	15
TE-SEM-2	Web Applications Engineering	CSE3WAE	15

TE-SEM-2	Professional Environment	CSE3PE	15
Unit name			Credit Points
	Third year level computer science elective		15
	Three second or third year level business electives in keeping with the chosen major ¹		45
	Two third year level general business electives		30

Fourth year (135 credit points)

Core units (75 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Database Management Systems	CSE3DMS	15
TE-SEM-1	System Design and Methodologies	CSE3SDM	15

The remaining 45 credit points of core units must be taken from any third year level computer science units and must include either the Software Engineering Project (CSE3PRA and CSE3PRB) (30 credit points) or the Programming Project (CSE3PRG) (30 credit points). Students who choose CSE3PRA must also choose CSE3SDM as co-requisite.

Electives (60 credit points)

Unit name	Credit Points
Three second or third year level business electives in keeping with the chosen major ¹	45
One second or third year level general business elective	15

Key: ¹ Business electives must be chosen to ensure that at least one of the following majors is completed: business economics, human resource management, management, marketing or financial management (see below).
(The units BUS4CTB and MGT2BCO are not permitted.)

Majors offered by the School of Business

Financial Management

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	Introduction to Quantitative Analysis	ECO1IQA	15
TE-SEM-1 or TE-SEM-2	Finance	FIN2FIN	15
TE-SEM-2	Financial Instruments	FIN2FII	15
TE-SEM-1	Corporate Finance	FIN3CFI	15
TE-SEM-1	International Financial Management	FIN3IFM	15
TE-SEM-2	Investment and Portfolio Management	FIN3IPM	15

Plus one of the following two units:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Intermediate Statistics for Business	ECO2ISB	15
TE-SEM-2	Managerial Economics	ECO2MEC	15

Plus one of the following four units:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Financial Planning	FIN3FPL	15
TE-SEM-1	Financial Institutions Management	FIN3FIM	15
TE-SEM-1	Security Valuation	FIN3SEV	15
TE-SEM-2	Financial Risk Management	FIN3FRM	15

Human Resource Management

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Human Resource Development	MGT2HRD	15
TE-SEM-1	Industrial Relations	ECO3IRE	15
TE-SEM-2	Human Resource Information Systems	MGT3HRI	15
TE-SEM-1 or TE-SEM-2	Human Resource Management	MGT2HRM	15
TE-SEM-2	Interpersonal Skills and Conflict Management	MGT2ISC	15
TE-SEM-2	Organisational Change and Development	MGT3OCD	15
TE-SEM-1 or TE-SEM-2	Organisational Behaviour	MGT2OBE	15

Plus one unit from the following list:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	Employment and Labour Relations Law	LAW2ELR	15
TE-SEM-2	International Human Resource Management	MGT3IHR	15

Management

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	International Management	MGT3IMG	15
TE-SEM-1	Strategic Management	MGT3SMG	15
TE-SEM-1 or TE-SEM-2	Finance	FIN2FIN	15
TE-SEM-1 or TE-SEM-2	Human Resource Management	MGT2HRM	15
TE-SEM-1 or TE-SEM-2	Organisational Behaviour	MGT2OBE	15
TE-SEM-2	Business Ethics	MGT2BET	15
TE-SEM-2	Organisational Change and Development	MGT3OCD	15
TE-SEM-2	Organisational Structure and Design	MGT3OSD	15

Marketing

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Consumer Behaviour	MKT2CBE	15
TE-SEM-1	Marketing Communication	MKT3MCO	15
TE-SEM-1 or TE-SEM-2	Marketing Principles and Practice	MKT2MPP	15
TE-SEM-2	Marketing Law	LST2MAL	15
TE-SEM-2	Marketing Research ¹	MKT3MRE	15
TE-SEM-2	Services Marketing	MKT2SMA	15
TE-SEM-2	Strategic Marketing ¹	MKT3SMK	15

Plus one unit from the following list:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Electronic Marketing ²	MKT3ELM	15
TE-SEM-2	International Marketing	MKT3IMK	15

Business Economics

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	Introduction to Quantitative Analysis	ECO1IQA	15
TE-SEM-1	Intermediate Statistics for Business	ECO2ISB	15
TE-SEM-2	Managerial Economics	ECO2MEC	15
TE-SEM-1 or TE-SEM-2	Finance	FIN2FIN	15

Plus four units from the following list:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Corporate Finance	FIN3CFI	15
TE-SEM-1	Cost-Benefit Analysis	ECO3CBA	15
TE-SEM-1	Decision Analysis with Spreadsheets	ECO3DAS	15
TE-SEM-1	Industrial Organisation	ECO3IND	15
TE-SEM-1	Industrial Relations	ECO3RE	15
TE-SEM-1	International Trade	ECO3ITR	15
TE-SEM-1	Marketing Economics	ECO3MKE	15
TE-SEM-2	Economics of Sport	ECO3EOS	15
TE-SEM-2	Economics of the Internet	ECO3INT	15
TE-SEM-2	Financial Risk Management	FIN3FRM	15
TE-SEM-2	Mergers and Acquisitions	FIN3MAQ	15

Key: ¹ It is highly recommended that students undertake these two units in the final year of their degree.

² Offered online at Albury-Wodonga Campus.

Bachelor of Information Technology/Bachelor of Commerce (SZCITB) – Bendigo

For full details of this degree structure, see the Bendigo Campus section of this Handbook.

Bachelor of Laws/Bachelor of Science (LZLS) – Melbourne (Bundoora)

For full details of this degree structure, see the Faculty of Law and Management section of this Handbook.

Bachelor of Laws/Bachelor of Psychological Science (LZLBS) – Melbourne (Bundoora)

For full details of this degree structure, see the Faculty of Law and Management section of this Handbook.

Bachelor of Laws/Bachelor of Electronic Engineering (LZLEE) – Melbourne (Bundoora)

This degree is being phased out. No new enrolments will be permitted from 2007.

Bachelor of Laws/Bachelor of Information Systems (LZLIS) – Melbourne (Bundoora)

This degree is being phased out. No new enrolments will be permitted from 2007.

Bachelor of Nanotechnology/Bachelor of Science (SZNTS) – Melbourne (Bundoora)

Nanotechnology is an emerging field of endeavour, which aims to understand and exploit the science of the very small. It covers a wide range of areas including semiconductors where it is hoped that very small components will continue the increase in computational speed predicted by Moore's Law. Nanotechnology is expected to provide sophisticated sensors for the detection of chemicals at low concentrations with applications to biological systems. Biologists seek means of manipulating and sensing biological processes within cells. This double degree structure is chosen for the teaching of nanotechnology, as it requires knowledge of a broad range of supporting sciences and time to develop the required specialisation. Graduates from this degree will be eligible for accreditation with the Australian Institute of Physics. Those students completing the Nanostructure Materials Stream will also be eligible for accreditation with the Royal Australian Chemical Institute.

Course structure

This double degree is of four and a half years' full-time or equivalent part-time duration and requires the completion of 540 credit points overall. Students may complete this double degree in four years as part of an accelerated study program.

The course features streams in nanostructure materials and bionanotechnology. These incorporate core studies in physics, chemistry or biochemistry, biology and mathematics together with specialised studies in nanotechnology at all year levels; units include nanochemistry, scanning probe microscopies, synchrotron science and technology, imaging and materials characterisation, nanomaterials and fabrication, sensors and devices and a nanotechnology research project.

First year (130 credit points)

Core units (115 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Issues in Nanotechnology A	NAN1ISA	5
TE-SEM-1	Principles of Physics A	PHY1SCA	15
TE-SEM-1	Calculus and Number Systems	MAT1CNS	15
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15
TE-SEM-1	Organisation and Function of Cells and Organisms	BIO1OF	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Issues in Nanotechnology B	NAN1ISB	5
TE-SEM-2	Principles of Physics B	PHY1SCB	15

Elective (15 credit points)

An elective may be chosen from any first year unit offered by any discipline in the University.

Second year (130/140 credit points)

Students undertake one of the following specialised streams of study.

*Nanostructure Materials Stream:**Core units (140 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Issues in Nanotechnology A	NAN2ISA	5
TE-SEM-1	Principles of Physics A	PHY2SCA	20
TE-SEM-1	Fundamentals of Chemistry	CHE2FND	20
TE-SEM-1	Vector Calculus	MAT2VCA	15
TE-SEM-2	Developments in Chemistry	CHE2DEV	20
TE-SEM-2	Nanochemistry	CHE2NAN	10
TE-SEM-2	Imaging and Materials Characterisation	PHY2IMC	10
TE-SEM-2	Issues in Nanotechnology B	NAN2ISB	5
TE-SEM-2	Linear Algebra	MAT2LAL	15
TE-SEM-2	Principles of Physics B	PHY2SCB	20

*Bionanotechnology Stream:**Core units (130 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Biochemistry and Molecular Biology A	BCH2BMA	20
TE-SEM-1	Issues in Nanotechnology A	NAN2ISA	5
TE-SEM-1	Principles of Physics A	PHY2SCA	20
TE-SEM-1	Fundamentals of Chemistry	CHE2FND	20
TE-SEM-2	Biochemistry and Molecular Biology B	BCH2BMB	20
TE-SEM-2	Nanochemistry	CHE2NAN	10
TE-SEM-2	Imaging and Materials Characterisation	PHY2IMC	10
TE-SEM-2	Issues in Nanotechnology B	NAN2ISB	5
TE-SEM-2	Principles of Physics B	PHY2SCB	20

Third year (135/145 credit points)*Nanostructure Materials Stream:**Core units (135 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Issues in Nanotechnology A	NAN3ISA	5
TE-SEM-1	Biochemistry and Molecular Biology A	BCH2BMA	20
TE-SEM-1	Selected Topics for Joint Chemistry Major	CHE3ADA	30
TE-SEM-1	Synchrotron Science and Technology	PHY2SYN	15
TE-SEM-2	Issues in Nanotechnology B	NAN3ISB	5
TE-SEM-2	Scanning Probe Microscopy	PHY2SPM	15
TE-SEM-2	Materials and Methods for a Joint Chemistry Majors	CHE3ADB	30
TE-SEM-2	Mechanics	MAT2MEC	15

*Bionanotechnology Stream:**Core units (145 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Biochemistry and Molecular Biology 3A	BCH3BMA	30
TE-SEM-1	Issues in Nanotechnology A	NAN3ISA	5
TE-SEM-1	Synchrotron Science and Technology	PHY2SYN	15
TE-SEM-1	Vector Calculus	MAT2VCA	15
TE-SEM-2	Issues in Nanotechnology B	NAN3ISB	5
TE-SEM-2	Biochemistry and Molecular Biology 3B	BCH3BMB	30
TE-SEM-2	Linear Algebra	MAT2LAL	15
TE-SEM-2	Mechanics	MAT2MEC	15
TE-SEM-2	Scanning Probe Microscopy	PHY2SPM	15

Fourth year (135 credit points)*Core units (120 credit points)*

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Issues in Nanotechnology C	NAN3ISC	5
TE-SEM-1	Principles of Physics A	PHY3SCA	30
TE-SEM-1	Nanomaterials and Fabrication	PHY3NMF	15
TE-SEM-2	Issues in Nanotechnology D	NAN3ISD	5
TE-SEM-2	Nanotechnology Research Project ¹	NAN3PRJ	20
TE-SEM-2	Principles of Physics B	PHY3SCB	30
TE-SEM-2	Sensors and Devices	CHE3SEN	15

Elective (15 credit points)

Electives may be chosen from any unit offered by the University.

Key: ¹ Nanotechnology Research Project (NAN3PRJ) and the elective may be substituted with the Extended Nanotechnology Research Project (NAN3PRX) (40 credit points) or the Extended Nanotechnology Research Projects (NAN3PXA and NAN3PXB) (40 credit points) across two semesters.

Honours

Honours students are selected based on their performance in the final year of the pass degree. The Honours year and projects are carried out under the auspices of a department in the faculty but usually Chemistry, Physics, or Biochemistry. Approval must be given by the Supervising Department and the Nanotechnology Coordinator.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Occupational Therapy/Bachelor of Psychological Science (HZOTBB) – Melbourne (Bundoora)

For full details of this degree structure, see the Faculty of Health Sciences section of the Handbook.

Bachelor of Science/Bachelor of Commerce (SZSCB) – Bendigo

For full details of this degree structure, see the Bendigo Campus section of this Handbook.

Bachelor of Science/Bachelor of Commerce (SZSC) – Melbourne (Bundoora)

This double degree program provides the opportunity for students to undertake major studies in any area(s) of science offered by the faculty, while at the same time completing studies in commerce, economics, and legal studies, leading to accreditation with the Australian Society of CPAs and the Institute of Chartered Accountants in Australia. Depending on the choice of science units, accreditation with the relevant science professional association is also possible.

Course structure

This double degree is of four and a half years' full-time or equivalent part-time duration and requires the completion of 545 credit points overall. Students may complete this double degree in four years as part of an accelerated study program.

For professional accreditation purposes, 18 commerce, economics and legal studies units are prescribed. Students may choose any science units for which they satisfy the prerequisites, subject to meeting the minimum credit-point levels prescribed below and subject to the limits, which apply in the general Bachelor of Science on the amount, which may be taken from one discipline area. Students who have trouble with the overloaded nature of the course may apply to transfer to either a Bachelor of Science or a Bachelor of Commerce.

To satisfy the requirements for the Bachelor of Science/Bachelor of Commerce program, a student must complete the following units:

First year (135 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Accounting for Management Decisions	ACC1AMD	15
TE-SEM-1 or TE-SEM-2	Introductory Statistics for Business	ECO1ISB	15
TE-SEM-1 or TE-SEM-2	Macroeconomics	ECO1IMA	15
TE-SEM-1 or TE-SEM-2	Microeconomics	ECO1IMI	15
TE-SEM-1 or TE-SEM-2	Management Information Systems	BUS1MIS	15
TE-SEM-2	Introductory Financial Accounting	ACC1IFA	15
	First year level science units ¹		45

Second year (130 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1 or TE-SEM-2	Foundations of Management	MGT1FOM	15
TE-SEM-1 or TE-SEM-2	Introduction to Business Law	LST1BSL	15
TE-SEM-1 or TE-SEM-2	Introductory Management Accounting	ACC2IMA	15
TE-SEM-2	Law of Business Association	LST2LBA	15
	First year science units		30
	Second year level science units		40

Third year (130–140 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1 or TE-SEM-2	Finance	FIN2FIN	15
TE-SEM-1 or TE-SEM-2	Corporate Reporting	ACC2CRE	15
TE-SEM-1 or TE-SEM-2	Intermediate Management Accounting	ACC2IMB	15
	Second year level science units		40
	Third year level science units		30–40
	Third year level accounting unit		15

Fourth year (140–150 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1 or TE-SEM-2	Advanced Financial Accounting Second year level and/or third year level electives	ACC3AFA	15
	Third year level science units ¹		30
	Third year level accounting units ²		50–60
	Third year level business elective		30
			15

Key: ¹ For students with the appropriate prerequisites, STA1SS (Statistical Science) may be taken in place of ECO1ISB (Introductory Statistics for Business).

² Taxation (ACC3TAX) and Auditing (ACC3AUD) are highly recommended. These two units are required for membership of the Institute of Chartered Accountants, Australia (ICAA) although they are no longer required for accreditation for Credit Points A Australia. Those students who do not complete Taxation and Auditing as part of their undergraduate degree will be admitted to membership in Credit Points A Australia, but will be required to complete further studies in both areas to maintain their accreditation.

³ The total number of credit points required over the third and fourth years is 280.

⁴ A total of 90 credit points is required for the prescribed third year science units (normally either 30 and 60 or 40 and 50 in years 3 and 4, respectively).

The order in which students take the units may be varied to suit individual needs. Further, later year science units may be substituted for earlier year science units of the same value, while some prescribed business units may be replaced by others in special circumstances.

Honours

An Honours degree in either science or commerce is available to suitably qualified students and will require an additional year of full-time study. It is anticipated that in either case, students may incorporate some material from the other area in their Honours program.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Science (Honours)/Bachelor of Electronic Engineering (SZSEE) – Melbourne (Bundoora)

This double degree program is being phased out. No new enrolments will be permitted from 2008.

This double degree program enables students to complete an Honours degree in science in combination with a degree in electronic engineering. Students can choose to study any science discipline that is available in the faculty, subject to timetable constraints. The

program provides flexibility of choice so that students do not become locked into a science discipline early in their degree. In addition, students who do not wish to undertake the science Honours program may complete a specified program of 630 credit points, taken over five years full-time or equivalent part-time studies, which will enable them to qualify with pass degrees in both a Bachelor of Science and a Bachelor of Electronic Engineering (pass or Honours). Students considering such an option require the approval of the relevant departments. This program is fully accredited by Engineers Australia.

Entry with advanced standing

Students who have completed or partially completed a Diploma or Certificate studies may be granted advanced standing.

Industry experience

Students are required to complete at least 12 weeks certified practical experience under the guidance of an experienced engineer before being deemed to have completed the course and therefore qualify to graduate. This is preferably undertaken during the annual vacation following either the third or the fourth years of the course but may be done at the conclusion of the final year. Graduates may apply for membership of Engineers Australia at the grade of Professional Engineer and for employment in industry as an electronic engineer or as a scientist.

Scholarships

First year scholarships are available for high achieving students. Prospective candidates should contact the Department of Electronic Engineering early in their Year-12 studies for details.

Course structure

This double degree program is of five and a half years full-time or equivalent part-time duration and requires the completion of 680 credit points. Students may complete the program in five years as part of an accelerated study program.

The course pathways are designed to provide a variety of science specialisations with Honours to complete the double degree. The compaction of the course is accommodated by overloads of approximately 15% per year compared with a normal Bachelor of Science or Bachelor of Electronic Engineering program.

In the first year of the course students undertake studies in mathematics, physics, computer science, and electronic engineering and choose additional science units. The strong science base is maintained in the second year with elective science units. In years three to five, the chosen specialist units are combined with studies in engineering. The science Honours thesis is completed in the fourth year. The course is designed to permit students to terminate studies after three years with a Bachelor of Science degree, so that students are not disadvantaged if they decide not to complete the full five year program. Progression to the fourth year of the program is conditional on completion of the first three years at a level sufficient for entry into the Honours degree of the science major. Students who wish to complete the degree without Honours are required to complete a minimum of 630 credit points including all the compulsory units, with no more than 180 credit points of first year level units and a minimum of 180 credit points of third year level units. In addition, students must complete at least 180 credit points of science units with at least 60 credit points being at third year level. Note that 120 credit points of fourth year level electronic engineering units is required to fulfil the Honours component of the engineering degree.

First year (135 credit points)**Core units (105 credit points)**

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Introductory Electronics	ELE1IEL	15
TE-SEM-1	Calculus and Probability for Engineers	MAT1CPE	15
TE-SEM-1	Principles of Physics A	PHY1SCA	15
TE-SEM-2	Basic Electronic Circuits	ELE1CCT	15
TE-SEM-2	Calculus and Linear Algebra	MAT1CLA	15
TE-SEM-2	Object-Oriented Programming using C++	CSE1CPP	15
TE-SEM-2	Principles of Physics B	PHY1SCB	15

Electives (30 credit points)

Students will choose units worth 30 credit points from units offered by the faculty. Students must include sufficient prerequisites to lead to

60 points in the chosen science discipline at third year. If physics is chosen as the science major then CSE1100 is recommended as an elective.

Second year (130 credit points)

Core units (90 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Linear Circuits and Signals	ELE2CIR	15
TE-SEM-1	Microprocessors and Digital Design	ELE2MDD	15
TE-SEM-1	Vector Calculus	MAT2VCA	15
TE-SEM-2	Analogue Circuits and Interfacing	ELE2ANI	15
TE-SEM-2	Linear Algebra	MAT2LAL	15
TE-SEM-2	Physics for Engineering ¹	PHY2EPB	15

Key: ¹ PHY2EPB can be replaced by a 15 credit point elective if PHY2SCA and PHY2SCB are taken as the science major.

Electives (40 credit points)

Students choose units worth 40 credit points from units offered by the Faculty of Science, Technology and Engineering. Students must include sufficient prerequisites to lead to 60 credit points in the chosen science discipline at third year.

Third year (135 credit points)

Core units (45 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Control Systems	ELE3CON	15
TE-SEM-1	Embedded Processors	ELE3EMB	15
TE-SEM-2	Digital Signal Processing	ELE3SIP	15

Specialty options (30 credit points)

Students must undertake two specialty units from one of the following streams.

Biomedical Engineering Stream:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Instrumentation Electronics and Sensors	ELE3IES	15
TE-SEM-2	Biomedical Engineering A	ELE3BIO	15

Optical and Communication Engineering Stream:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Communication Systems	ELE3CMN	15
TE-SEM-2	Digital Communication Systems	ELE3DCS	15

Electronic Systems Stream:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Communication Systems	ELE3CMN	15
TE-SEM-2	Electronic Design Automation – Tools and Techniques	ELE3DDE	15

Science major (60 credit points)

Students must undertake 60 credit points of third year level units in the chosen science discipline.

Fourth year (145 credit points)

Core unit (15 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	Third Year Project	ELE3PRO	15

Science major (120 credit points)

Students must undertake 120 credit points of fourth year coursework and thesis units from the chosen science discipline.

Electives (10 credit points)

Students choose units worth 10 credit points from units offered by the Faculty of Science, Technology and Engineering.

Fifth year (135 credit points)

Core units (75 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Embedded Processors	ELE3EMB	15
TE-SEM-1	Engineering Project A ¹	ELE4EPA	15
TE-SEM-1	Applied Management for Engineers	ELE4EMT	15

TE-SEM-2	Engineering Project B ¹	ELE4EPB	30
----------	------------------------------------	---------	----

Specialty options (30 credit points)

Students must undertake two specialty units from one of the following streams.

Biomedical Engineering Stream:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Biomedical Engineering	ELE4BME	15
TE-SEM-2	Clinical Engineering	ELE4CLN	15

Communication Engineering Stream:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	Advanced Communication Systems	ELE4ACS	15
TE-SEM-2	Communication Networks	ELE4NET	15

Electronic Systems Stream:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Advanced Digital Systems Design	ELE4ADD	15
TE-SEM-2	Digital Control Theory	ELE4DCT	15

Optical Engineering Stream:

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-2	Optical Fibre Communication Systems	ELE4OFC	15
TE-SEM-2	Communication Networks	ELE4NET	15

Electives (30 credit points)

Approved fourth year level electronics units

Key: ¹ Linked units must be taken in the one academic year.

The fourth year level units available may vary from year to year according to staff availability and student demand. Details of the units available, and the teaching period in which they will run, will be finalised in February of each year.

Honours

The Honours thesis in the particular scientific discipline chosen must be approved by the discipline concerned and be accepted by the Department of Electronic Engineering as applicable to engineering. Students are awarded first class, second class (upper division), second class (lower division) or third class Honours depending on their performance.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Science/Bachelor of Science Education (STBSSW) – Albury-Wodonga

Only the first year of this degree is offered at the Albury-Wodonga campus. See the Albury-Wodonga Campus section of this Handbook.

Bachelor of Science/Bachelor of Science Education (SZSSEB) – Bendigo

For full details of this structure, see the Bendigo Campus section of this Handbook.

Bachelor of Science/Bachelor of Science Education (SZSSE) – Melbourne (Bundoora)

This innovative double degree has been developed in response to the Federal Government's 'Innovation Statement' and aims to integrate full science degree studies with a complete teaching qualification, with a particular emphasis on mathematics, statistics (taught as part of mathematics in secondary schools), physics, chemistry, and/or information technology. Graduates of this double degree will have a deepened understanding of their teaching units and will be equipped to adapt their teaching to engage with the needs of their teaching settings, including their own students and the nature of the areas of

knowledge and behaviour that constitute the discipline. In this program, emphasis is placed on the teacher's ability to adapt teaching to continuously changing circumstances while fostering deep understanding of relevant areas of scientific disciplines.

Please note: students must complete a 'Working with Children' check form, available from Australia Post offices. Students must provide a certified copy of their valid 'Working with Children' card prior to undertaking teaching placements in schools.

Scholarships

Some scholarships may be available for this degree. Prospective applicants should contact the Faculty of Science, Technology and Engineering Faculty office.

Course structure

This double degree is of four and a half years' full-time or equivalent part-time duration and requires the completion of 540 credit points overall. Students may complete this double degree in four years as part of an accelerated study program.

Students will gain a foundation in science in the first year. Combined studies in science and education will commence in the second year and continue during the third year. Two science disciplines must be studied through to third year: the 'major' discipline comprising units to the value of 60 credit points in the third year and the 'minor' discipline 30 credit points. The 'major' discipline must be one of mathematics, statistics, physics, and chemistry or computer science. (Note that the first year statistics discipline requirement may be satisfied by enrolling in STA1SS and one of STA1LS or MAT1DM.) The 'minor' discipline may also be chosen from among the 'major' discipline areas or from any other science discipline offered by the Faculty of Science, Technology and Engineering. The science disciplines are those defined for the Bachelor of Science degree. The final year will consist of full teacher training, including the practicum requirement and will include a combined science and education project. Normally, students would be expected to have satisfactorily completed all of the requirements for the first three years before progressing to the fourth year.

Notes:

- Your unit choices at first and second year must ensure that one of mathematics, physics, chemistry, statistics or computer science can be taken as a 'major' at third year level. You cannot have a major/minor combination of mathematics and statistics as double mathematics method is not offered in the fourth year.
- You will be qualified to teach subjects corresponding to your chosen major and minor disciplines, but not subjects corresponding to your terminating first year science discipline. If your major or minor is in physics or chemistry, you will also be qualified to teach secondary school general science. As general science also covers biology, such students should consider taking a first year biology unit as a first year level elective.
- The research project must relate to science education or mathematics education.
- All units must be chosen in consultation with, and approved by the course adviser.

First year (120 credit points)

Unit name	Credit Points
30 credit points in each of three different science disciplines	90
First year level electives (education units excluded)	30

Note: the maximum number of credit points in any one science discipline is 45.

Second year (140 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Teaching Practice A	EDU2TPA	20
	40 credit points in each of two different science disciplines		80
	20 credit points second year level elective(s) (chosen from any discipline and which may be a further science or education unit)		20
	20 credit point education unit (chosen from the list below)		20

Third year (140 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-S	Issues in Education	EDU4IIE	20
TE-SEM-1 or TE-SEM-2	Science Education Mentoring ²	EDU3SEM	10

TE-SEM-2	Teaching Practice B	EDU3TPB	20
	60 credit points chosen from one of the disciplines: mathematics, physics, chemistry, statistics, computer science		60
	30 credit points chosen from a single science discipline (which differs from that already chosen as the 'major' discipline)		30

Fourth year (140 credit points)

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1	Context of Learning	EDU4COL	20
TE-SEM-1	Teaching Practice and Skills	EDU4TPS	20
TE-SEM-1 or TE-SEM-2	Research Practicum	EDU4RP	20
TE-SEM-2	Issues in Secondary Education	EDU4SEI	20
TE-SEM-2	Teaching Practice and Models	EDU4TPM	20
	Plus two methods (A and B) units to be chosen from the following		40

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1 and TE-SEM-2	Chemistry Teaching Method A	EDU4CHA	10
TE-SEM-2	Chemistry Teaching Method B	EDU4CHB	10
TE-SEM-1 and TE-SEM-2	IT Teaching Method A	EDU4ITA	10
TE-SEM-2	IT Teaching Method B	EDU4ITB	10
TE-SEM-1 and TE-SEM-2	Mathematics Teaching Method A	EDU4MAA	10
TE-SEM-2	Mathematics Teaching Method B	EDU4MAB	10
TE-SEM-1 and TE-SEM-2	Physics Teaching Method A	EDU4PHA	10
TE-SEM-2	Physics Teaching Method B	EDU4PHB	10
TE-SEM-1 and TE-SEM-2	Science Teaching Method A	EDU4SCA	10
TE-SEM-2	Science Teaching Method B	EDU4SCB	10

List of education units

Note that units may vary from year to year according to availability.

Teaching period	Unit name	Unit code	Credit Points
TE-SEM-1 and TE-SEM-2	Issues in Science Education 1 ¹	EDU4SC1	15
TE-SEM-2	Issues in Science Education 2 ¹	EDU4SC2	15
TE-SEM-1	Approaches to Pastoral Care	EDU4APC	20

TE-SEM-S	Classroom Discipline	EDU4CSD	20

Key: ¹ Not available in 2008.

² Students taking EDU3SEM in first semester must be available to commence the training session mid-late February 2008.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites, and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public.

UNIT DESCRIPTIONS

AGR1ANS ANIMAL SYSTEMS (15. CPs Sem. TE-SEM-1 BU.) Dr Mark Jois

In this unit, students will gain an overview of animals in wild and domesticated situations, their management, welfare, and basic requirements. The unit will tie together the various basic sciences concerned with animals to provide an introduction to the issues and major topics that concern those interested in maintaining viable, healthy, and thriving animal populations in both managed and wild habitats. Specific topics may include animal handling and welfare, animal behaviour and animal management. These and other aspects of animal science will be illustrated by field trips and practical exercises.

Incompatible unit: AGR1SYS

Class requirements: Three 1-hour lectures and one 3-hour practical per week.

Assessment: Two 250 word excursion reports (10%), Practical exercises totalling 1500 words (30%), one 2-hour examination (60%)

AGRISYS AGRICULTURAL SYSTEMS (15. CPs Sem. TE-SEM-1 BU.) *Dr Peter Sale*

An introductory subject about agriculture and farming systems of Australia. The main areas covered are the history and current situation of agriculture in Australia, climate and its impact on agricultural ecosystems, contemporary agricultural issues, e.g., sustainability, the impact of global warming on agriculture and the impact of agriculture on the environment, cropping systems, horticulture, pastures and extensive and intensive animal systems.

Incompatible unit: AGR1ANS

Class requirements: Three 1-hour lectures and one 3-hour practical class per week.

Assessment: One 3-hour examination (65%), one 1000-word assignment (25%), two 250-word practical reports (10%)

Prescribed Reading:

Malcolm L. Sale P. W. and Egan A. *Agriculture in Australia* Oxford University Press, 1996.

AGRIVCM VINEYARD CULTIVATION AND MAINTENANCE (15. CPs Sem. TE-SEM-2 BU.) *Mr Lindsay Corby*

Students will be introduced to the principles underpinning the use of cultivation, irrigation, spraying, harvesting, and other equipment used for cultivation and maintenance of vineyards. The characteristics of the equipment and the principles underpinning use of the equipment will be described in lectures and experience with the use of the equipment will be gained during practical classes designed to complement the lectures.

Prerequisite: AGR11VPE.

Class requirements: Three 1-hour lectures and one 3-hour practical class per week or equivalent. Practical classes may be delivered at relevant TAFE Institutes.

Assessment: 4 x 300 word practical class reports (25%), one 3-hour examination (75%)

Prescribed Reading:

Smart, R. E. and Robinson, M. *Sunlight into wine*, Wine titles, Adelaide, 1991
Coombe, B. G. and Dry, P. R. (Eds.) *Viticulture*, Vol.2, (1992), Wine titles, Adelaide
Dry, P.R. and Coombe, B.G. *Viticulture, Volume 1* 2nd edn, Wine titles, Adelaide 2004

AGRIVPE VINE PRODUCTION, PROPAGATION AND ESTABLISHMENT (15. CPs Sem. TE-SEM-1 BU.) *Mr Lindsay Corby*

Students will be introduced to the principles of production and propagation of vines and the establishment of vineyards. The following topics will be covered in lectures; propagation and culture media; selection of suitable material for propagation; propagation procedures; varietal differences; preparation of soil for planting; planting of vines; irrigation and trellis systems; fertiliser requirements of young vines; protection of young vines. Lectures will be complemented by practical classes in which students will gain experience with the procedures described during lectures.

Class requirements: Three 1-hour lectures and one 3-hour practical class per week. Practical classes may be delivered at relevant TAFE Institutes.

Assessment: Practical class reports (10%), one 2-hour written examination (50%), two 750-word assignments (40%)

Prescribed Reading:

Smart, R. E. and Robinson, M. *Sunlight into wine*, Wine titles, Adelaide, 1991
Coombe, B. G. and Dry, P. R. (Eds.) *Viticulture*, Vol 2, (1992) Wine titles, Adelaide.
Dry, P.R. & Coombe, B.G. *Viticulture, Volume 1*, 2nd edn, Wine titles, Adelaide 2004

Recommended Reading:

Gladstones, J. *Viticulture and Environment* (Wine titles, Adelaide) 1992

AGR2BAS BIOCHEMISTRY FOR AGRICULTURAL SCIENCES (20 CPs Sem. TE-SEM-1 BU.) *Dr Richard Luke*

This unit is only available to students in Bachelor of Agricultural Science, Bachelor of Agricultural Science/Bachelor of Business, Bachelor of Agricultural Science/Bachelor of International Development, Bachelor of Viticultural Science, and Wine Production.

In this unit, students will be introduced to the biology and the metabolism of cells in living organisms. They will consider protein structure; enzymes; metabolism of carbohydrates, amino acids and lipids; photosynthesis; nitrogen fixation; nitrification and denitrification; nucleic acids, and their transcription and translation; fermentations of industrial and environmental significance; biocidal agents and selective toxicity.

Prerequisite: CHE11BAS or CHE11GEN, plus CHE12APL and BIO11OF.

Incompatible unit: BCH2BMA and BCH2BMB

Class requirements: Three 1-hour lectures and one 3-hour practical session per week.

Assessment: Computer/tutorial work (5%), one 3-hour examination (55%), two practical reports equivalent to 1000 words each (25%), four 10-minute tests (15%)

AGR2ILM INTRODUCTION TO LAND AND SOIL MANAGEMENT (20 CPs Sem. TE-SEM-1 BU.) *Dr Caixian Tang*

In this unit, students are introduced to the basics of land and soil management particularly in agricultural and environmental context. The physical, chemical, and biological processes in soils and landscapes are investigated. Important issues such as salinity, acidity, and fertiliser use and soil fertility will also be discussed.

Prerequisite: CHE1BAS or CHE1GEN and CHE1APL.

Incompatible unit: AGR2SS

Class requirements: Up to four lectures and 3-hours of laboratory practice per week.

Assessment: One 3-hour final examination (60%), eight 250-word practical reports (40%)

Preliminary Reading:

Charman PEV and Murphy BW *Soils: Their properties and management* 3rd edn, Oxford University Press, 2007

Recommended Reading:

Brady, NC. and Weil, R.R *The nature and properties of soils* 13th edn, Prentice Hall International, London 2002.

AGR2LMG LANDSCAPE MANAGEMENT WITH GIS AND REMOTE SENSING (10 CPs Sem. TE-SEM-2 BU.) *Dr John Webb*

This unit is only available to students enrolled in Bachelor of Agricultural Science, Bachelor of Agricultural Science/Bachelor of Business, Bachelor of Viticultural Science and Wine Production and Bachelor of Animal and Veterinary Biosciences.

In this unit students will be introduced to the two main ways in which remotely sensed data can be collected (satellites and air photos), basic techniques of processing and interpreting the data, and how this data (and all other spatial data) can be plotted onto maps using geographical information systems (GIS) computer programs. In addition, global positioning systems (GPS) are discussed. This course introduces the basic theory of remote sensing, DIS and GPS, but focuses on the practical applications of the techniques while the practical exercises cover a wide variety of topics.

Incompatible unit: GEO3EGR

Class requirements: Two 1-hour lectures and one 3-hour practical session each week for 11 weeks.

Assessment: One 2-hour examination (60%), assignments equivalent to 1000 words (40%)

Recommended Reading:

Lo, C.P. *Applied remote sensing* Longman Inc. 1986
Lilles and, T.M. and Keifer, R.W. *Remote sensing and image interpretation. 2nd Edition* John Wiley & Sons, 1987
Sabins Jnr, F.F. *Remote sensing; principles and interpretation.* W.H. Freeman and Co., 1987

AGR2PDA PHYSIOLOGY OF DOMESTIC ANIMALS (20. CPs Sem. TE-SEM-2 BU.) *Dr Richard Luke*

This unit is designed to provide an understanding of the principles of animal physiology. Students examine functions of the basic cell, and analyse the concept of the body's internal environment, the nature of biological control systems and properties of major specialised cell types. Coordination of body functions such as circulation, respiration, reproduction, regulation of water, electrolyte balance, digestion, and absorption of food are discussed in terms of the principles.

Prerequisite: BIO11OF and either CHE11BAS or CHE11GEN.

Recommended Prior Studies: CHE12APL.

Class requirements: Three 1-hour lectures and one 3-hour practical class per week.

Assessment: One 3-hour examination (60%), one 1.5-hour practical examination (20%), ten 150-word or equivalent practical assignments (20%)

AGR2PNU PRINCIPLES OF NUTRITION (20. CPs Sem. TE-SEM-1 BU.) *Dr Theresa Frankel*

The principles of nutrition and some aspects of applied and comparative nutrition are covered in this unit. Topics include chemical composition of foods, nutrient requirements, and recommended allowances, assessment of nutritional status, characteristics of specific nutrients, energy balance, and regulation of energy metabolism, consequences of deficiencies or excesses of specific nutrients, nutrition, and behaviour.

Prerequisite: CHE12APL or BIO11OF or equivalent.

Class requirements: Three 1-hour lectures and one 3-hour practical class a week.

Assessment: One 2.5-hour examination, one 1-hour multiple-choice quiz and one 1-hour practical examination (80%), four practical class reports (equiv. to 500 words each) (20%). Hurdle requirements: must attend 80% of practical classes

Prescribed Reading:

Department of Community Services and Health, *Nutritional values of Australian foods*, Australian Government Publishing Service, 1991.

Recommended Reading:

Gropper, S.S., Smith, J.L. and Groff, J.L. *Advanced nutrition and human metabolism*, 4th edn. Wadsworth Publishers 2005.

Geissler, C., Powers, H *Human nutrition* 11th edn. Elsevier 2005

AGR2VO VINEYARD OPERATIONS (15. CPs Sem. TE-SEM-2 BU.) *Mr Lindsay Corby*

The principles underpinning vineyard operations and the conduct of these operations will be covered in lectures and in practical classes complementing the lectures. Information introduced during first year studies will be enhanced during the course. Topics covered will include: timing of irrigation and fertiliser applications; procedures for applying water and fertiliser; control of pests, weeds and diseases; mitigation of adverse effects of climate; timing of harvesting; differences in practices adopted associated with varieties of grapes and climatic region.

Class requirements: Three 1-hour lectures and one 3-hour practical class per week or equivalent. Practical classes may be delivered at relevant TAFE Institutes.

Assessment: Practical class reports (10%), two assignments (15%), one 2.5-hour written examination (75%)

Prescribed Reading:

Smart, R. E. and Robinson, M. *Sunlight into wine*, Wine titles, Adelaide, 1991.

Coombe, B. G. and Dry, P. R. (Eds.) *Viticulture* Vol 2 (1992) Wine titles, Adelaide.

Dry, P.R., and Coombe, B.G. *Viticulture, Volume 1* 2nd edn, Wine titles, Adelaide, 2004

Gladstones, J. *Viticulture and Environment*, Wine titles, Adelaide, 1992.

AGR3AEI AGRICULTURE ENVIRONMENT INTERACTIONS (10 CPs Sem. TE-SEM-2 BU.) *Dr Peter Sale*

In this unit, students will be exposed to case studies in which agricultural activity has significantly impacted upon the environment. They will consider the causes and processes whereby this impact has occurred and how such impact might be managed or avoided. They will also be exposed to strategies that are being developed by farmers, industry and by local and state governments to minimise environmental damage from agricultural activity.

Incompatible unit: AGR4AEI

Class requirements: Two 1-hour lectures per week and eight 3-hour workshops.

Assessment: One 2-hour examination (70%), one 1000-word case study report (30%)

AGR3ANH ANIMAL HEALTH (20 CPs Sem. TE-SEM-1 BU.) *Dr Mark Sandeman*

This unit presents the principles of microbiology, parasitology, and immunology as they pertain to animal diseases. Major components include parasitic, bacterial, and viral diseases of animals, immunology of animal infections, and the diagnosis and control of infection and disease

Prerequisite: BIO11OF.

Incompatible unit: MIC2IM

Class requirements: Four 1-hour lectures and one 3-hour practical class per week.

Assessment: Two 2-hour examinations (60%), eight 250-word reports (40%)

AGR3ANM ANIMALS AND MANKIND (30. CPs Sem. TE-SEM-2 BU.) *Dr Mark Sandeman*

This unit considers the principles and problems of topical issues in the management of animal species by humans. Topics under discussion will vary from year to year but may include the loss of species and genetic diversity; animal welfare; genetic manipulation; population and pest control; animals and diseases. In addition, students will be expected to carry out a research project/work experience programme. This project will be undertaken on or off campus during one or two semester breaks preferably before the second semester of the third year of study. Students will be expected to complete a major report on their findings and experiences.

Prerequisite: ZOO31EPA or equivalent.

Incompatible unit: AGR4ACS

Class requirements: An average of 7 hours of seminars/lectures/discussions per week plus 21 days of work experience or research project.

Assessment: One 2-hour examination (25%), one 1500-word work experience project (20%), performance in seminars (5%), four 800-word executive summaries (35%), one 1500-word assignment (15%)

AGR3ANN ANIMAL NUTRITION (20. CPs Sem. TE-SEM-2 BU.) *Dr Theresa Frankel*

Nutrient requirements of domestic animals used for production of food and fibre are covered in this unit. Topics included are the interrelationships between dietary requirements and the physiological and biochemical aspects of digestion, absorption and metabolism of monogastric and ruminant animals and birds, the theoretical and practical aspects of the dietary supply of protein and energy to satisfy requirements for growth, pregnancy and the economic production of milk, wool and eggs, the metabolic and functional consequences of under-nutrition, the nutritional requirements for vitamins and minerals and the biochemical and clinical effects of dietary deficiencies or excesses of vitamins and minerals.

Prerequisite: CHE11BAS or CHE11GEN and CHE12APL.

Recommended Prior Studies: BCH21BMA, AGR22PDA or equivalent subject.

Incompatible unit: AGR4ATN

Class requirements: Four 1-hour lectures and one 3-hour practical per week.

Assessment: One 3-hour examination and one 1-hour practical examination (80%), one 500-word assignment and two 250-word practical assignments (20%). Must participate in 80% of practical classes.

Prescribed Reading:

McDonald, P., Edwards, R.A., Greenhalgh, J.F.D., and Morgan, C.A. *Animal nutrition* 6th edn, Prentice-Hall, 2002

AGR3CVA CROP AND VINE AGRONOMY (10. CPs Sem. TE-SEM-2 BU.) *Dr Peter Sale*

In this unit, the eco-physiological relationships between crop and vine plants growing in communities, their interactions with each other and competing species and with the physical environment will be examined. Topics will include the carbon economy of plants, and water use by plants, and how management might optimize these processes. Environmental stresses caused by too much or too little water, light, or extreme temperatures are also examined. A feature of the unit will be a series of field trips to see how eco-physiological principles are applied in field crops and vineyards and to interact with industry specialists in these areas.

Prerequisite: PHY12AGR or PHY1LSB and BOT21MPN.

Recommended Prior Studies: STA12SS or STA21LS.

Class requirements: Two 1-hour lectures per week, plus one 1-hour tutorial and one 3-hour practical class per fortnight.

Assessment: One 2-hour exam (70%), one 1000-word practical report (30%)

Prescribed Reading:

Larcher, W. *Physiological plant ecology*, 3rd edn, Springer Verlag, 1995.

AGR3LSM LAND AND SOIL MANAGEMENT (20 CPs Sem. TE-SEM-2 BU.)

Dr Caxian Tang

In this advanced unit of land and soil management, the importance of nutrient recycling, water movement and soil biology in sustainable land use is studied. Management of land degradation including salinity, soil acidification, and soil structure decline and soil contamination is a core component.

Prerequisite: AGR2ILM.

Incompatible unit: AGR3SS

Class requirements: Four 1-hour lectures and one 4-hour practical class per week.

Assessment: One 3-hour examination (50%), six 200-word practical reports (24%), a 5-minute oral presentation (6%), one 1500-word scientific paper (20%)

Recommended Reading:

Charman PEV and Murphy BW *Soils: Their properties and management* 3rd edn, Oxford University Press, 2007

Brady, N.C., and Weil, R. R *The nature and properties of soils* 13th edn, Prentice Hall International, London 2002

AGR3PPD PLANT PESTS AND DISEASES (10. CPs Sem. TE-SEM-1 BU.) *Dr Peter Sale*

Peter Sale

This unit provides an introduction to insects and plant diseases and the problems that they cause in agriculture, horticulture, and viticulture. The agricultural entomology component covers morphology and taxonomy, life histories, metamorphosis, kinds of insect larvae and pupae, seasonal regulation of development and feeding. The mycology and plant pathology component covers fungal growth and morphology, diversity and taxonomy, life cycles, dissemination, the nature of plant diseases, host-parasite relationships, biotrophic and necrotrophic pathogens and disease resistance and epidemiology. Agricultural case studies are used throughout to illustrate important principles.

Prerequisite: BIO11OF or BIO12PS.

Incompatible unit: ZOO2AE and BOT3FEB.

Class requirements: Three 1-hour lectures per week and one 3-hour practical per fortnight.

Assessment: One 2-hour examination (70%), two 500-word laboratory reports (30%)

Prescribed Reading:

New, T. R. *Introductory entomology for Australian students* NSW University Press, 1992.

AGR3VTS VITICULTURAL SCIENCE (20. CPs Sem. TE-SEM-2 BU.) *Dr Judy Tisdall*

In this unit, the physiology of the grapevine including water relations in the grapevine, growth, and development of the grapevine, flower initiation, fruit composition, and quality is covered. The unit also discusses the science behind factors in the vineyard that affect yield and quality of grapes, and of wine, including grape variety, climate, soils, irrigation and irrigation strategies, canopy management and light interception, vine balance, nutrition and plant pathogens.

Prerequisite: AGR22VO.

Recommended Prior Studies: AGR31WPT.

Class requirements: Four 1-hour lectures and 4 hours of practical work or excursions per week.

Assessment: One assignment (1500 words) (20%), one 3-hour examination (60%), ten practical exercises (equiv. to 1500 words) (20%)

Prescribed Reading:

Mullins, M.G., Bouquet, A., and Williams, L.E. *Biology of the grapevine* Cambridge University Press, Cambridge, 1992

Winkler, A.J., Cook, J.A., Kliewer, W.M. and Lider, L.A. *General viticulture*, University of California Press, Berkeley, 1974

AGR3VWA VITICULTURE AND WINE PRODUCTION ISSUES A (5.0 CPs Sem. TE-SEM-1 BU.) *Dr Judy Tisdall*

This unit is usually taken in conjunction with AGR3VWB. Students attend a series of case studies and seminars that will address topical issues in the wine and grape industries. The issues may vary from year to year and will be addressed through student reading, excursions, and by lectures/seminars from industry and research personnel.

Prerequisite: AGR22VO.

Incompatible unit: AGR30VWI, AGR31VWI

Class requirements: Two 1-hour lectures or seminars per fortnight plus one 2-hour discussion or excursion per fortnight.

This unit is not available for study abroad students.

Assessment: Six 10-minute case study presentations taken over AGR3VWA and AGR3VWB (50%), one 1500-word major report related to one case study (50%). which combines the assessment for AGR3VWA and AGR3VWB

AGR3VWB VITICULTURE AND WINE PRODUCTION ISSUES B (5.0 CPs Sem. TE-SEM-2 BU.) *Dr Judy Tisdall*

This unit is usually taken in conjunction with AGR3VWA. Students attend a series of case studies and seminars that will address topical issues in the wine and grape industries. The issues may vary from year to year and will be addressed through student reading, excursions, and by lectures/seminars from industry and research personnel.

Prerequisite: AGR22VO.

Incompatible unit: AGR30VWI, AGR32VWI

Class requirements: Two 1-hour lectures or seminars per fortnight plus one 2-hour discussion or excursion per fortnight.

This unit is not available for study abroad students.

Assessment: Six 10-minute case study presentations taken over AGR3VWA and AGR3VWB (50%), one 1500-word major report related to one case study (50%). which combines the assessment for AGR3VWA and AGR3VWB

AGR3WPT WINE PRODUCTION TECHNOLOGY (20. CPs Sem. TE-SEM-1 BU.) *Dr Judy Tisdall*

This unit covers the principles, which underpin the fermentation of grape sugars, the development of aroma, and flavours in wine, wine making, and introduction to sensory studies. Students will be introduced to the factors affecting fermentation, ageing, and wine quality. Theoretical aspects, including chemistry, biochemistry, and microbiology, will be covered in lectures and practical classes.

Recommended Prior Studies: AGR22VO.

Class requirements: Four 1-hour lectures or seminars/discussions and four hours of practical work or excursions per week.

Assessment: One assignment (1500 words) (20%), one 3-hour examination (60%), ten practical exercises (equiv. to 1500 words) (20%)

AGR4ACS AGRICULTURAL CASE STUDIES (20 CPs Sem. TE-SEM-1 BU.) *Dr**Peter Sale*

In this unit, students will participate in a series of case studies. They will work in groups and act as advisers to real clients who require information and advice on how best to manage their farm or agricultural business. Students will be required to integrate their understanding of biological and economic principles and processes as they address the complex management tasks in the case study. They will gain a range of teamwork and communication skills as they develop and present recommendations to the client in the case study.

Prerequisite: AGR32SS, AGR32ANN, and AGR31PPD.

Incompatible unit: AGR3ANM

Class requirements: Three 1-hour lectures and one 3-hour workshop on average per week. Three field trips during the semester.

Assessment: Three 10-minute short-answer tests (10%), three reports equivalent to 500 words each (20%), one 3-hour examination (60%), and study participation and performance (10%)

AGR4AED ADVANCED EXPERIMENTAL DESIGN (10. CPs Sem. TE-SEM-1*BU.) Dr Mark Sandeman*

This unit examines the statistical methodology used in the design and analysis of agricultural experiments. Includes non-parametric inference for one and two samples, multiple linear regression, analysis of variance and common experimental designs including randomised complete block, Latin squares and factorial designs. In addition, the design of experiments in the animal, plant and soil sciences will be considered with respect to achievable aims, suitable methods, the control of variables, and the reporting of results. Specific legislative requirements including animal and human ethics and welfare considerations will be addressed.

Recommended Prior Studies: STA21LS.

Incompatible unit: STA31BS

Class requirements: Two 1-hour lectures and two hours of tutorial or practical classes per week.

Assessment: One 2-hour examination (80%), two 250-word assignments (20%)

AGR4AHA HONOURS ANIMAL SCIENCE A (50 CPs Sem. TE-SEM-1 BU.) *Dr**Mark Sandeman*

Honours degree students are selected based on their performance in the final year of the pass degree.

This unit of study represents one semester of a year long Honours program. The Honours year will comprise a project related to Animal Science plus associated coursework. However, because there is no Department of Animal Science, students will be based in one of the participating departments. Overall assessment will be the same as for the existing Honours program offered by that Department (Dept of Agricultural Sciences assessment outlined below). Each Honours program requires approval by the potential supervisor and the relevant Departmental Honours Coordinator. The Animal Science Course Adviser may facilitate this process.

Incompatible unit: AGR40ANH

Class requirements: Two 1-hour lectures and one 2-hour tutorial per week.

This unit is not available for study abroad students.

Assessment: One 20,000-word thesis (70%), three 3500-word literature reviews (30%). Dept of Agricultural Sciences, combined assessment for AGR4AHA and AGR4AHB. Complete details are available in the Dept of Agriculture Handbook. Programs from other departments may be assessed differently.

AGR4AHB HONOURS ANIMAL SCIENCE B (60 CPs Sem. TE-SEM-2 BU.) *Dr**Mark Sandeman*

Honours degree students are selected based on their performance in the final year of the pass degree.

This unit of study represents one semester of a year long Honours program. The Honours year will comprise a project related to animal science plus associated coursework. However, because there is no Department of Animal Science, students will be based in one of the participating departments. Overall assessment will be the same as for the existing Honours program offered by that department (Department of Agricultural Sciences assessment outlined below). Each Honours

program requires approval by the potential supervisor and the relevant departmental Honours coordinator. The Animal Science course adviser may facilitate this process.

Incompatible unit: AGR42ANH

Class requirements: 30 hours per week of research.

This unit is not available for study abroad students.

Assessment: One 20,000-word thesis (70%), three 3500-word literature reviews (30%). Dept of Agricultural Sciences, combined assessment for AGR4AHA and AGR4AHB. Complete details are available in the Dept of Agriculture Handbook. Programs from other departments may be assessed differently.

AGR4CCA COMMUNICATION AND CRITICAL ANALYSIS (15 CPs Sem. TE-*SEM-1 BU.) Dr Mark Sandeman*

This unit is only available to students in Bachelor of Agricultural Science, Bachelor of Agricultural Science/Bachelor of Business, Bachelor of Agricultural Science/Bachelor of International Development and Bachelor of Viticultural Science and Wine Production.

In this unit, students will receive guidance in scientific communication in the written and spoken word. They will attend workshops in scientific writing of reviews, research papers, information retrieval skills in the library, CVs, in verbal presentation skills, and creative and critical thinking. A series of written assignments will be completed by each student, who will receive individual guidance from staff supervisors in the planning and the preparation of their written work

Incompatible unit: AGR5CCA

Class requirements: One 1-hour workshop participation, one 1-hour discussion session between individual student and staff supervisor, and a minimum of 10 hours non-contact hours per week.

Assessment: Evidence of work completed between staff/student meetings (5%), two written assignments equivalent to 250 words each (15%), two literature reviews equivalent to 2000 words each (80%)

AGR4HNA HONOURS AGRICULTURE A (50 CPs Sem. TE-SEM-1 BU.) *Dr**Peter Sale*

This unit of study represents one semester of a year long Honours program. Students who have completed a three-year Bachelor of Science degree with majors in fields relevant to studies on plants, soils, or animals are able to undertake an Honours year in the Department of Agricultural Sciences. This unit of study together with AGR4HNB consists of a research project under appropriate supervision with course-work and literature reviews to complement the research project. The research thesis is usually based on laboratory or field experiments, or both, but may, in appropriate cases be a theoretical treatise.

Incompatible unit: AGR40HON, AGR41HON

Class requirements: Two 1-hour lectures and one 2-hour tutorial per week.

This unit is not available for study abroad students.

Assessment: One 20,000-word thesis (70%), three 3500-word literature reviews (30%). This is the combined assessment for AGR4HNA and AGR4HNB. Full details available in the Dept of Agriculture Handbook.

AGR4HNB HONOURS AGRICULTURE B (60 CPs Sem. TE-SEM-2 BU.) *Dr**Peter Sale*

This unit of study represents one semester of a year long Honours program. Students who have completed a three-year Bachelor of Science degree with majors in fields relevant to studies on plants, soils, or animals are able to undertake an Honours year in the Department of Agricultural Sciences. This unit of study together with AGR4HNA consists of a research project under appropriate supervision with course-work and essays to complement the research project. The research thesis is usually based on laboratory or field experiments, or both, but may in appropriate cases, be a theoretical treatise.

Incompatible unit: AGR40HON, AGR42HON

Class requirements: Completion of 30 hours of research per week.

This unit is not available for study abroad students.

Assessment: One 20,000-word thesis (70%), three 3500-word

literature reviews (30%). This is the combined assessment for AGR4HNA and AGR4HNB. Full details available in the Dept of Agriculture Handbook.

AGR4OEN OENOLOGY- WINE SCIENCE AND ANALYSIS (15 CPs Sem. TE-SEM-2 BU.) *Mr Lindsay Corby*

This unit is taught as an intensive two-week unit of lectures and practicals at the Bundoora campus in July.

This unit covers the major issues involved in wine making including fermentation, oxidation, CO₂ and N₂ use, SO₂ and other anti-oxidants, must and wine additions and their effects and timing, phenolic in wine and a full range of analytical methods

Prerequisite: The completion of the third year of the Bachelor of Viticultural Science or the Bachelor of Viticultural Science and Wine Production or equivalent.

Class requirements: Up to 8 hours of lectures and/or practicals each day for two weeks (approximately 40 hours of lectures and 40 hours of practicals).

This unit is not available for study abroad students.

Assessment: One 2-hour examination (50%) To be held on the last day of the two-week lecture and practical period, 5500-word practical reports (50%). Practical reports to be written up as advised with a due date six weeks after the completion of the lecture and practical period

Prescribed Reading:

AGR4RPR RESEARCH PROJECT (60. CPs Sem. TE-SEM-2 BU.) *Dr Mark Sandeman*

Students undertaking the BAgScience, BAgScience/BBus, BAgScience/BInternational Development are required to complete a literature review and undertake a research project to be written up in thesis form. Students are able to develop their own particular interests to a considerable extent, with support from supervisors in the Department.

Prerequisite: AGR4ACS.

Class requirements: Twenty-four hours of research per week.

This unit is not available for study abroad students.

Assessment: One 12,000-word thesis (80%), one 3000-word literature review (20%)

AGR4VHA HONOURS VITICULTURAL SCIENCE A (50 CPs Sem. TE-SEM-1 BU.) *Dr Judy Tisdall*

To be eligible for consideration for Honours, candidates must achieve a minimum average of 60% in their third year level studies to the value of 120 credit points and 65% in 60 credit points of units germane to the Honours year.

This unit of study represents one semester of a year long Honours program. Students must complete both AGR4VHA and AGR4VHB in the one academic year. The Honours year consists of a project related to Viticultural Science and associated coursework. However, because there is no Department of Viticultural Science, students will be based in one of the participating departments and use that Department's system for determination of final results. With the approval of the Departmental Honours Coordinator, the coursework component may include work undertaken in another Department. Overall assessment will be the same as for the existing Honours program offered by that Department. A consolidated ranking of Honours students in the Department will be produced. Each fourth year program requires approval by the supervisor and the relevant Departmental Honours Coordinator. The Viticultural Science Course Adviser may facilitate this process.

Incompatible unit: AGR40VTH, AGR41VTH

Class requirements: Two 1-hour lectures and one 2-hour tutorial per week.

This unit is not available for study abroad students.

Assessment: One 20,000-word thesis (70%), three 3500-word literature reviews (30%). This is the combined assessment for AGR4VHA and AGR4VHB. Complete details are available in the Viticultural Science (Honours) manual.

AGR4VHB HONOURS VITICULTURAL SCIENCE B (60 CPs Sem. TE-SEM-2 BU.) *Dr Judy Tisdall*

To be eligible for consideration for Honours, candidates must achieve a minimum average of 60% in their third year level studies to the value of 120 credit points and 65% in 60 credit points of units germane to the Honours year.

This unit of study represents one semester of a year long Honours program. Students must complete both AGR4VHA and AGR4VHB in the one academic year. The Honours year consists of a project related to Viticultural Science and associated coursework. However, because there is no Department of Viticultural Science, students will be based in one of the participating departments and use that Department's system for determining final results. With the approval of the Departmental Honours Coordinator, the coursework component may include work undertaken in another Department. Overall assessment will be the same as for the existing Honours program offered by that Department. A consolidated ranking of Honours students in the Department will be produced. Each fourth year program requires approval by the supervisor and the relevant Departmental Honours Coordinator. The Viticultural Science Course Adviser may facilitate this process.

Incompatible unit: AGR40VTH, AGR41VTH

Class requirements: 30 hours of research per week.

This unit is not available for study abroad students.

Assessment: One 20,000-word thesis (70%), three 3500-word literature reviews (30%). This is the combined assessment for AGR4VHA and AGR4VHB. Complete details are available in the Viticultural Science (Honours) manual.

AGR4WAA WINE APPRECIATION PROJECT A (5.0 CPs Sem. TE-SEM-1 BU.) *Mr Lindsay Corby*

This unit of study represents the first semester of a year long program. Students MUST take both AGR4WAA and AGR4WAB in the one academic year. Building on previous wine appraisal skills this unit involves the self-directed organoleptic analysis of at least 100 wines through the year and the keeping of industry standard tasting and evaluation notes. Normal wine show descriptors, scoring, production style and if aims have been achieved, should be included in the diary. Students will undertake the tastings in their own time and might be expected to use their experience in the placement winery to provide a selection of wines at various stages of production

Prerequisite: Students must have successfully completed the third year of the Bachelor of Viticultural Science or the Bachelor of Viticultural Science and Wine Production or equivalent.

Co-requisite: AGR4WIA.

Incompatible unit: AGR40WAP, AGR41WAP

Class requirements: Over both AGR4WAA and AGR4WAB, students undertake twenty hours of wine tasting practice.

This unit is not available for study abroad students.

Assessment: One 2500-word diary evaluating the tasting of 100 wines (100%) One diary combines the assessment of both AGR4WAA and AGR4WAB. Due date for submission: completion of AGR4OEN.

Recommended Reading:

Iland, P. and Gago, P. *Australian Wine, Styles, and Tastes*. Patrick Iland Promotions, Adelaide. 2002

AGR4WAB WINE APPRECIATION PROJECT B (5.0 CPs Sem. TE-SEM-2 BU.) *Mr Lindsay Corby*

This unit of study represents the second semester of a year long program. Students MUST take both AGR41WAP and AGR42WAP in the one academic year. Building on previous wine appraisal skills this unit involves the self-directed organoleptic analysis of at least 100 wines through the year and the keeping of industry standard tasting and evaluation notes. Normal wine show descriptors, scoring, production style and if aims have been achieved, should be included

in the diary. Students will undertake the tastings in their own time and might be expected to use their experience in the placement winery to provide a selection of wines at various stages of production

Prerequisite: Students must have successfully completed the third year of the Bachelor of Viticultural Science or the Bachelor of Viticultural Science and Wine Production or equivalent.

Co-requisite: AGR4WIB.

Incompatible unit: AGR40WAP, AGR42WAP

Class requirements: Over both AGR4WAA and AGR4WAB, students undertake twenty hours of wine tasting practice.

This unit is not available for study abroad students.

Assessment: One 2500-word diary evaluating the tasting of 100 wines (100%) One diary combines the assessment of both AGR4WAA/AGR4WAB. Due date for submission: completion of AGR42OEN.

To Be Advised

AGR4WIA WINE INDUSTRY/OENOLOGY PROJECT A (30 CPs Sem. TE-SEM-1 BU.) *Mr Lindsay Corby*

This unit of study represents the first semester of a year long program. Students MUST take both AGR4WIA and AGR4WIB in the one academic year. The student must complete an Oenology research project on the wine industry or wine science. The project topic and scope will be defined during an individual interview at the start of the year. The project will be supervised by the unit coordinator and may be based on business or scientific research. The project may consider factors in either the success of the industry in terms of operational philosophy and business plan or specific research hypotheses.

Prerequisite: Must have completed the third year of the Bachelor of Viticultural Science or the Bachelor of Viticultural Science and Wine Production or equivalent.

Co-requisite: AGR4WAA.

Incompatible unit: AGR40WIP, AGR41WIP

Class requirements: Data collection and laboratory data and sample analysis sessions will be allocated as defined and agreed by the supervisor and student.

This unit is not available for study abroad students.

Assessment: One oenology project or thesis equivalent to 8000 words. Combined assessment for AGR4WIA and AGR4WIB (75%) This is a major thesis on an approved aspect of oenology or a critical assessment of a commercial winery as experienced and researched by the student. , wine operations journal (4000 words) (25%). A substantial record of previous or current wine industry experience

AGR4WIB WINE INDUSTRY/OENOLOGY PROJECT B (35 CPs Sem. TE-SEM-2 BU.) *Mr Lindsay Corby*

This unit of study represents the second semester of a year long program. Students MUST take both AGR4WIA and AGR4WIB in the one academic year. The student must complete an Oenology research project on the wine industry or wine science. The project topic and scope will be defined during an individual interview at the start of the year. This project will be supervised by the unit coordinator and may be based on business or scientific research. The project may consider factors in either the success of the industry in terms of operational philosophy and business plan or specific research hypotheses.

Prerequisite: Must have completed the third year of the Bachelor of Viticultural Science or the Bachelor of Viticultural Science and Wine Production or equivalent and AGR4WIA.

Co-requisite: AGR4WAB.

Incompatible unit: AGR40WIP, AGR42WIP

Class requirements: Data collection and laboratory data and sample analysis sessions will be allocated as defined and agreed by the supervisor and student.

This unit is not available for study abroad students.

Assessment: One Oenology project or thesis equivalent to 8000 words. Combined assessment for AGR4WIA and AGR4WIB (75%) This is a major thesis on an approved aspect of oenology or a critical assessment of a commercial winery, wine operations journal (4000 words) (25%). A substantial record of previous or current wine industry experience.

AGR4WMM WINE MAKING ISSUES AND MARKETING (15 CPs Sem. TE-SEM-1 BU.) *Mr Lindsay Corby*

This unit runs as a two-week intensive lecture and laboratory workshop. The location of the unit may vary from year to year but will usually include time in North Eastern Victoria and will be held in January or early February. This subject may be taken as part of a continuing education program.

This unit serves as an orientation for students entering the wine industry and introduces the wine industry, health, safety, and quality assurance issues, grape and wine quality, various wine production techniques, and wine marketing

Prerequisite: Completion of the third year of the Bachelor of Viticultural Science or the Bachelor of Viticultural Science and Wine Production or equivalent.

Class requirements: The class requirements will consist of up to eight hours of lectures and/or practicals per day for two weeks (approximately 40 hours of lectures and 40 hours of practicals).

This unit is not available for study abroad students.

Assessment: One 2-hour examination (40%) To be held on the final day of the lecture and practical period, a micro vinification process plan (500 words) (15%). Following this subject and using their own resources students will produce a batch of wine using micro vinification techniques. Four bottles are due on commencement of the subject AGR42OEN, A marketing plan for the wine (500 words) (10%). This is due on commencement of the subject AGR41WPT, A bottle of wine with details of the production process (1500 words) (25%). This is due on commencement and assessed during the subject AGR42OEN, Details of packaging and presentation, with a legal label design (500 words) (10%). This is due on commencement of the subject AGR41WPT

AGR4WPT WINE PRODUCTION TECHNOLOGY (15 CPs Sem. TE-SEM-1 BU.) *Mr Lindsay Corby*

At Mildura, this unit will be run as lectures and practicals taught intensively over a two-week period in May. This unit may be taken as part of a continuing education program.

This unit concentrates on the process of wine production including the issues of water use and waste management, materials handling, heat systems and loads, storage vessels, bottling procedures and packaging. The students will be expected to plan and cost a small winery considering all production, health and safety, waste and market issues

Prerequisite: Completion of the third year of the Bachelor of Viticultural Science or the Bachelor of Viticultural Science and Wine Production or equivalent.

Class requirements: Up to eight hours of lectures and/or practicals per day for two weeks (approximately 40 hours of lectures and 40 hours of practicals).

This unit is not available for study abroad students.

Assessment: One 2-hour examination (50%) To be held on the last day of the lecture and practical period, a 2500-word winery plan (50%). Plan a 500 tonne winery with cellar door facility, processing Sauvignon Blanc, Chardonnay, Pinot Noir, and Shiraz Include a floor plan, list and justify all equipment and machinery. Provide costings.

BCH2BMA BIOCHEMISTRY AND MOLECULAR BIOLOGY A (20. CPs Sem. TE-SEM-1 BU.) *Dr Peter Cartwright, Dr Elizabeth Johnson*

Students are introduced to nucleic acids, proteins, and their functions in cells. Discussion covers RNA, DNA, transcription, translation, and gene expression. Students also study the structure of proteins, the action of enzymes and bioenergetics. Students cover the foundation material for a discussion of cell biology and cell metabolism. The practical work allows hands-on experience in quantitative biochemical techniques including spectrophotometry, PCR, DNA electrophoresis and enzyme activity.

Prerequisite: CHE1GEN or CHE1BAS, plus CHE1APL and BIO1OF.

Quota: 200. Administered based on academic merit in prerequisite units, except where core unit for a degree program.

Class requirements: Three 1-hour lectures and one 3-hour practical session per week.

Assessment: computer/tutorial work (5%), one 3-hour examination, (55%), practical work as outlined in the unit guide (25%), one mid-semester, 45-minute open book examination (15%)

BCH2BMB BIOCHEMISTRY AND MOLECULAR BIOLOGY B (20. CPs Sem. TE-SEM-2 BU.) *Dr Peter Cartwright, Dr Elizabeth Johnson*

This unit introduces students to cell biology and cell metabolism. Students discuss the conversion of simple carbohydrates and lipids to ATP, the energy currency of cells via glycolysis, tricarboxylic acid cycle and oxidative phosphorylation and B-oxidation. Students also study cellular membrane, compartmentation, and cell biology (the co-ordination and regulation of cellular activity at a molecular level). Practical work allows hands-on experience in quantitative biochemical techniques including protein purification and organelle isolation.

Prerequisite: CHE1GEN or CHE1BAS, CHE1APL, BIO1OF, plus satisfactory performance in BCH2BMA.

Quota: 200. Administered based on academic merit in prerequisite subjects, except where core subject for a degree program.

Class requirements: Three 1-hour lectures and one 3-hour practical session per week.

Assessment: Computer/tutorial work (5%), one 3-hour examination (55%), Practical work (25%), one mid-semester, 45-minute open book examination (15%)

BCH3BMA BIOCHEMISTRY AND MOLECULAR BIOLOGY 3A (30. CPs Sem. TE-SEM-1 BU.) *Mr Steve Jones*

Topics: protein chemistry (protein structure and function; purification, sequencing, crystallisation; folding and molecular chaperones); cell membranes (structure, dynamics, isolation, visualisation; membrane fluidity, phospholipid asymmetry; protein organisation; membrane fusion in disease processes); biopolymer structure and function (spectroscopic procedures (fluorescence, ORD and CD); DNA secondary/tertiary structure, dynamics, flexibility; DNA topology; Z-DNA; RNA structure; DNA damage, detection and repair); bioinformatics (genome sequencing projects; databases; computer analyses to detect sequence homologies, open reading frames, protein structure/function; micro array technology to monitor gene expression); recombinant DNA technology (gene structure and function; cloning of cDNA and genes; restriction enzymes; DNA library construction and screening; southern/northern blot analysis; PCR for mRNA detection, diagnostics; genetic engineering, social/environmental/ethical issues).

Prerequisite: BCH2BMA and BCH2BMB.

Quota: 100. The quota for this unit will be administered based on marks in prerequisite subjects.

Class requirements: Four 1-hour lectures and an average of eight hours of practical work per week.

Assessment: Two x 3-hour written examinations (70%), Practical work assessments (30%)

BCH3BMB BIOCHEMISTRY AND MOLECULAR BIOLOGY 3B (30. CPs Sem. TE-SEM-2 BU.) *Mr Steve Jones*

Topics: life and death of the cell (mitosis, protein synthesis and targeting, cell and organelle biogenesis, apoptosis); cellular responses to stress and protein quality control (role of proteases and molecular chaperones, signalling pathways and gene regulation); immunology (generation of immunological diversity; B-cell and T-cell responses; action of lymphokines; immunochemistry; monoclonal antibody production and utilisation); plant and animal biotechnology; impact of biotechnology on agriculture and the pharmaceutical industry; signal transduction (role of receptors in receiving and transmitting signals from the environment to the cell, G-complex receptors, kinase/phosphatase pathways, signal amplification, activation of transcription factors); molecular basis of cancer resulting from perturbation of signalling pathways.

Prerequisite: BCH2BMA and BCH2BMB.

Quota: 100. The quota for this unit will be administered based on marks in prerequisite subjects.

Class requirements: Four 1-hour lectures and an average of eight hours of practical work per week.

Assessment: Two x 3-hour written examinations (70%), Practical work assessments (30%)

BCH4HNA HONOURS IN BIOCHEMISTRY (60 CPs Sem. TE-SEM-1 BU.) *Dr John Silke*

This unit of study represents the first semester of a year long program. Students must complete BCH4HNA and BCH4HNB in the one academic year.

The full program lasts approximately nine months and starts early February. This course is available to students who have fulfilled the requirements of a Bachelor of Science degree, if their previous academic record is of sufficient standard. The Honours year consists of an individual research project under supervision and a course-work component. Students should consult with potential supervisors during their final year to discuss placement and design of the research project. The course-work component includes written assignments based on a lecture course and a seminar.

Incompatible unit: BCH40HON, BCH41HON

Quota: 18. Academic merit

Class requirements: Over both BCH4HNA and BCH4HNB, students are required to attend a laboratory induction course and departmental seminars, prepare, and submit a literature review, three seminars and a research report, perform a satisfactory amount of laboratory work.

This unit is not available for study abroad students.

Assessment: Research component (70%) Literature review; seminar on research proposal; research report; seminar on research outcomes; oral examination; supervisor mark, course-work (30%). Composed of assignments and a seminar on a research paper. The assessment components listed are the combined assessment for BCH4HNA and BCH4HNB.

BCH4HNB HONOURS IN BIOCHEMISTRY (60 CPs Sem. TE-SEM-2 BU.) *Dr John Silke*

This unit of study represents the second semester of a year long program. Students must complete BCH4HNA and BCH4HNB in the one academic year.

The full program lasts approximately nine months and starts early February. This course is available to students who have fulfilled the requirements of a Bachelor of Science degree, if their previous academic record is of sufficient standard. The Honours year consists of an individual research project under supervision and a course-work component. Students should consult with potential supervisors during their final year to discuss placement and design of the research project. The course-work component includes written assignments based on a lecture course and a seminar.

Incompatible unit: BCH40HON, BCH42HON

Quota: 18. Academic merit

Class requirements: Over both BCH4HNB and BCH4HNB, students are required to attend a laboratory induction course and departmental seminars, prepare, and submit a literature review, three seminars and a research report, perform a satisfactory amount of laboratory work.

This unit is not available for study abroad students.

Assessment: Research component (70%) Literature review; seminar on research proposal; research report; seminar on research outcomes; oral examination; supervisor mark, course-work (30%). Composed of assignments and a seminar on a research paper. The assessment components listed are the combined assessment for BCH4HNA and BCH4HNB.

BIO1AD ANIMAL DIVERSITY, ECOLOGY AND BEHAVIOUR (15. CPs Sem.

TE-SEM-1 BU. TE-SEM-2 AW.) *AW: Dr Dennis Black, BU: Dr Brian Malone*

Students should obtain from the University Bookshop a copy of the Biology 1AD Unit Guide and Laboratory Manual, an A4 sketchpad, laboratory coat, and dissecting kit before the first practical, which is held during the first week of the semester.

This is an introductory unit for students wishing to pursue advanced studies in biology units in subsequent years. It may also serve as a one-semester terminal unit. It consists of an introduction to animal diversity, ecology, and behaviour. The unit provides an introduction to the biology of animals, including the origin of animals and an evolutionary approach to the study of the protozoa, sponges, cnidarians, and flatworms, as well as the two major lines of coelomata animals, the annelid-arthropod-mollusc line and the echinoderm-chordate line, including a treatment of the origin of our own phylum, the Chordate and of the vertebrate classes; and concepts in animal ecology, such as the ecosystem, community, food web, energy flow, predation, parasitism and competition. The study of animal behaviour covers instinctive behaviour, learning and memory, social behaviour and the development of behaviour in an individual.

Class requirements: Three 1-hour lectures per week and one 3-hour practical class per week. The practical component includes dissections of dead animals and experiments using live animals.

Assessment: One 3-hour examination (70%), practical work (15%), practical reports (15%)

Prescribed Reading:

Hickman, C. P. Roberts, L. S. and Larson, A. *Integrated principles of zoology* 13th edn, McGraw-Hill, 2006.

BIO1GEN GENETICS, HUMAN BIOLOGY AND EVOLUTION (15. CPs Sem.

TE-SEM-1 AW. TE-SEM-2 BU.) *AW: Dr Susan Lawler, BU: Ms Tania*

Blanksby

This is an introduction to general genetics and human biology suitable for students intending to pursue further studies in these areas or as a one-semester terminal subject. Included is the history and importance of genetics in understanding human nature and in improving quality of life. Topics include the nature and functioning of the genetic message, the mechanics of inheritance, developmental and quantitative genetics, genes in populations, conservation and ecological genetics, human behavioural genetics, and the significance of human genetic variation, genetics in larger evolutionary patterns, the origin of life, speciation, macroevolution, and the origins of modern humans.

Prerequisite: Students from other faculties require the approval of the unit coordinator.

Class requirements: Three 1-hour lectures and one 3-hour practical or workshop per week.

Assessment: One 3-hour examination (70%), practical reports (10%), two 300-word assignments (taken as tests) (10%), two scientific reports (equivalent to 800 words) (10%)

Prescribed Reading:

AW: Starr, C. & Taggart, R *Biology: The unity and diversity of life* 10th edition, Thomson Learning 2004

BU: Brooker, R.J., *Genetics: analysis and principles* 2nd edn. McGraw-Hill 2005

BIO1OF ORGANISATION AND FUNCTION OF CELLS AND ORGANISMS

(15. CPs Sem. TE-SEM-1 AW, BU.) *AW: Dr Peter Pridmore, BU: Dr Tony Gendall*

The practical component of this unit includes dissections of dead animals and working with live animals.

This unit comprises a study of cells and their molecular organisation, including methods for studying cells, cell structure, structure and function of sub-cellular organelles and components, features of prokaryotic and eukaryotic cells, the activities of cells, including production of energy, cell cycle, the role of proteins in cells, the role

of DNA and RNA in the synthesis of proteins, and gene control in prokaryotes and eukaryotes. Also studied is the structure and function of various systems and their co-ordination in animals, from cells to multicellular organisms, basic concepts underlying animal design and the interaction of animals with their environment.

Prerequisite: Students from other faculties require approval by a Subject Adviser.

Class requirements: Three 1-hour lectures per week and one three-hour practical class per week. Students are required to purchase a special manual for use in conjunction with practical work. The manual (and other equipment necessary for the practical classes) is available before the beginning of the academic year. Details will be made available to students at enrolment. Laboratory attendance is compulsory.

Assessment: One 3-hour examination (75%), pre-practical tests, and practical assignments. (25%)

Prescribed Reading:

Knox, R., Ladiges, P., Evans, B., and Saint, R. *Biology* 3rd edn. McGraw-Hill, Roseville NSW, 2004

Recommended Reading:

BIO1PS PLANT SCIENCE (15. CPs Sem. TE-SEM-2 AW, BU.) *AW: Dr Roger*

Croome, BU: Dr Philip Keane

Students are required to purchase a special manual for use in conjunction with practical work. The practical manual (and other equipment necessary for the practical component) is available before the beginning of the semester. Details will be made available to students at enrolment.

In this unit students will be introduced to the biology of plants, their role in natural landscapes and their use by human societies, with particular emphasis on the distribution and adaptation of vegetation, especially desert vegetation, grasslands and tropical rainforests; the origin and adaptation of the unique Australian flora; the structure and functioning of plants in the Australian environment and in agriculture; and the diversity, evolution and ecological importance of bacteria, fungi, algae and land plants. Two case studies are used to introduce students to plant biotechnology. Students are introduced to the diversity of plants through visits to the wildlife reserves of the university and the Botanic Gardens and the observation and experimental study of plants in practical classes.

Prerequisite: Students from other faculties require approval by a Subject Adviser.

Class requirements: Three 1-hour lectures per week and one 3-hour practical class per week.

Assessment: One 3-hour examination (70%), nine 15-minute pre-practical tests equivalent to 1500 words (30%). To pass the laboratory component, it is advisable that students attend every laboratory class

Prescribed Reading:

BNF3MOL MOLECULAR STRUCTURE AND MODELLING (10. CPs Sem. TE-

SEM-2 BU.) *Dr Bob Brownlee*

The primary aim of this unit is to gain an understanding of the processes of computer modelling of molecules. Both molecular mechanics and molecular orbital modelling will be covered. Research-based topics will be presented from the Department of Chemistry, including methods for structure determination, converting structures to molecular coordinates, and modelling drug binding to protein and DNA molecules.

Prerequisite: Completion of second year of the Bachelor of Bioinformatics/Bachelor of Science.

Incompatible unit: CHE30EAC, CHE31ADA, CHE31SPA, CHE32ADB, CHE32CLP, or CHE32SPB,

Class requirements: One 1-hour lecture per week and one 2.5-hour laboratory/workshop class per week.

Assessment: Assigned problems (1500 words) (60%), a major project assessment (1000 words) (40%)

BNF3SEQ SEQUENCE AND STRUCTURE ANALYSIS (10. CPs Sem. TE-SEM-1 BU.) *Dr Leann Tilley*

This subject is normally only available to students enrolled in the Bachelor of Bioinformatics/Bachelor of Science degree.

The unit provides both theoretical and practical experience in protein structure and function and in protein and DNA sequence analysis including the searching of protein and nucleic acid databases using homology-based and pattern-based search algorithms, as well as sequence comparisons and alignments and evolutionary analysis.

Prerequisite: Second year of the BBioinformatics/BScience degree.

Incompatible unit: BCH31MMB

Class requirements: Four 1-hour lectures for four and a half weeks and one 6-hour laboratory class per week for five weeks.

Assessment: One 1000-word assessment. (40%), one 2-hour examination (60%)

Prescribed Reading:

BOT2AES AUSTRALIAN ECOLOGY AND SYSTEMATICS (20. CPs Sem. TE-SEM-2 BU.) *Dr John Morgan*

The field trip is an essential part of the subject and reports based on it are used in the final assessment. It is not possible to set alternative work. All students must prepare a herbarium collection. Details will be provided at the beginning of the semester.

Important aspects of biodiversity and its conservation in Australia are covered in this unit and represent an introduction to plant ecology and plant systematics. In the component on plant ecology, the broad topic of the effects of environmental and biotic factors on the distribution of plant species is covered. Topics discussed include the effect of climate and competition on plant species, the nature of plant populations, fire ecology, and grazing, and the effects of climate change. In the component on plant systematics, the broad topic of the origin and evolution of the Australian flowering plant flora is covered. Topics discussed include an introduction to plant systematics, the evolution, and classification of flowering plants with particular reference to the Australian flora, plant geography of the Australian region and keys and identification of Australian flowering plants.

Prerequisite: BIO12PS, BIOIPS

Incompatible unit: BOT22PE, BOT22ES, BOT2PE, BOT2ES

Class requirements: Three 1-hour lectures, one 4-hour practical class per week, and a field trip of approximately four days duration during the mid-semester break.

Assessment: One 2-hour practical examination (10%), one 3-hour examination (60%), practical assignments and herbarium (20%), one 1000-word field trip report (10%)

Prescribed Reading:

BOT2MPN PLANT MOLECULAR BIOLOGY, PHYSIOLOGY AND NUTRITION (20 CPs Sem. TE-SEM-1 BU.) *Dr Tony Gendall*

The molecular biology lectures describe the contribution of the new technologies to an understanding of plant development, including fruit ripening and sexual incompatibility. The advances are presented in the context of the scientific method. Commercial applications are also discussed. The plant physiology component will consider light, carbon dioxide, water, and nutrients as key driving variables for vegetative growth responses. The studies will include the effects of environmental factors on managed and natural communities. The acquisition of nutrients from the soil solution by plants is examined in the plant nutrition section, together with the movement of nutrients through cells and tissues and their role in metabolism. Issues relating to the diagnosis of nutrient deficiency and how the requirements for nutrients are met in managed and natural communities will be discussed.

Prerequisite: BIO12PS and BIO11OF, or BIO1PS and BIO1OF

Class requirements: Three 1-hour lectures and one 4-hour practical class per week.

Assessment: One 3-hour examination (60%), practical assignments (25%), one 1-hour practical examination (15%)

Prescribed Reading:

Taiz, L. and Zeiger, E. *Plant physiology* 4th edn. Sinauer assoc Inc, 2006.

BOT2PE PLANT ECOLOGY (10. CPs Sem. TE-SEM-2 BU.) *Dr John Morgan*

Only available to students enrolled in Bachelor of Environmental Science or the Bachelor of Viticultural Science and Wine Production. All other students must obtain approval from the subject adviser.

In this unit, students will be given an introduction to plant ecology, which covers the broad topic of the effects of environmental and biotic factors on the distribution of plant species. Topics discussed include the effect of climate and competition on plant species, the nature of plant populations, fire ecology, and grazing, and the effects of climate change.

Prerequisite: BIO11AD or BIO12PS, or BIO1AD or BIO1PS

Incompatible unit: BOT22ES or BOT22AES, BOT2ES or BOT2AES

Class requirements: Three 1-hour lectures and one 4-hour practical class per week for half of the semester. A field trip of approximately four days duration during the mid-semester break. This is an essential part of the unit and reports based on it are used in the final assessment. It is not possible to set alternative work.

Assessment: One 1.5-hour examination (70%) and a field trip report. (30%)

BOT3ESE ECOLOGY, SYSTEMATICS AND EVOLUTION (30. CPs Sem. TE-SEM-2 BU.) *Dr Trevor Whiffin*

Students are expected to attend a field trip of approximately three days duration.

This unit is concerned with advanced aspects of plant ecology and systematics. In the component on plant ecology, the broad topic of community diversity and ecosystem function is covered. Concepts discussed include vegetation change, maintenance of species diversity, ecosystem disturbance, and conservation in fragmented ecosystems. In the component on plant systematics and biodiversity, students study patterns of variation and relationships in flowering plants, primarily at the species level. Examples are drawn from recent studies of Australian plant groups, showing the contribution of these studies to our knowledge of the origin, evolution, and phylogeography of the Australian flora. A component on biogeography covers the distribution of biodiversity within Australia, including patterns of species richness and species endemism.

Prerequisite: BOT22ES or BOT22AES, or BOT2ES or BOT2AES

Class requirements: Four 1-hour lectures, two 4-hour practical classes per week.

Assessment: Two 2-hour examinations (65%), practical assignments, and field trip reports. (35%)

BOT3FEB FIELD AND ENVIRONMENTAL BOTANY (30. CPs Sem. TE-SEM-1 BU.) *Dr John Morgan*

In this unit, the following topics will be explored: the diversity and ecology of Victorian ecosystems, including the effect of disturbance; the diversity and ecology of fungi in natural and managed ecosystems, particularly in relation to plant diseases and their biological control. There is a strong emphasis on methods of data collection and statistical analyses. An essential component of this unit is an extended field course prior to the start of semester that emphasises field methods in botany. All students must participate in one of the two topics offered. In addition, day-trips are conducted in prac-time during semester to a variety of sites near Melbourne, and there is at least one weekend field trip to study forest ecology and fungal diversity. The study of managed ecosystems includes plant domestication, the ecology of agriculture in relation to disease epidemics and biological control of weeds, pests, and pathogens.

Prerequisite: BOT22ES or BOT22AES, or BOT2ES or BOT2AES

Class requirements: Four 1-hour lectures per week, field trips, and laboratory classes equivalent to two 4-hour practical classes per week.

Assessment: Two 2-hour examinations (60%), practical assignments, and field trip reports equivalent to 3500 words (40%)

BOT3PB PLANT BIOTECHNOLOGY (30. CPs Sem. TE-SEM-2 BU.) *Dr Tony Gendall*

Plant biotechnology, based on cell and molecular biology, has become a central part of the biological revolution. This unit familiarises students with some of the latest developments and specific technologies. The advantages and problems associated with biotechnology are debated. Topics include the role of gene technology in the improvement of insect and disease resistance and specific technologies, including plant genome sequencing, RNA interference, functional genomics, and microarray analysis. Plant responses to hormones and environmental changes and herbicide resistance are discussed. A considerable portion of the unit involves working in small groups (two to four students) in the research laboratories, supervised by research staff, pursuing an original research project. Students are introduced to the scientific method and some of the formal lectures are replaced by informal discussions. Excursions to biotechnology companies are also organised.

Prerequisite: One of BCH21BMA, BCH22BMB, BOT21MPN, GEN21HMG, GEN22EEG, MIC21IM, MIC22MVM, BCH2BMA, BCH2BMB, BOT2MPN, GEN2HMG, GEN2EEG, MIC21M

Incompatible unit: AGR42ABT

Class requirements: Four 1-hour lectures per week and research projects equivalent to two 4-hour practical classes per week.

Assessment: One 3-hour examination (50%), practical assignments and laboratory notebooks equivalent to 3500 words (30%), two 5-minute oral presentations per student (10%), laboratory participation (10%)

BOT4HNA HONOURS BOTANY (60 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.)

Dr Peter Green

This unit of study represents one semester of a year long program. The course lasts approximately nine months and starts in either February or July. This fourth year course is available to students who have fulfilled the requirements of a Bachelor of Science, provided their previous academic record is of a sufficient standard. The course consists of a supervised research project, together with other prescribed work including essays, workshops, and seminars. Students should consult with potential supervisors during their final year.

Prerequisite: A grade average of at least 65% in at least 60 credit points of third year units germane to the discipline and a third year average of at least 60%.

Incompatible unit: BOT40HON, BOT41HON

Class requirements: Over this unit and BOT4HNB students, undertake an independent full-time research project plus three series of workshops.

This unit is not available for study abroad students.

Assessment: Research thesis (70%), workshop reports, and literature review (30%). The assessment components listed are the combined assessment for both BOT4HNA and BOT4HNB.

BOT4HNB HONOURS BOTANY (60 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.)

Dr Peter Green

This unit of study represents one semester of a year long program. The course lasts approximately nine months and starts in either February or July. This fourth year course is available to students who have fulfilled the requirements of a Bachelor of Science, provided their previous academic record is of a sufficient standard. The course consists of a supervised research project, together with other prescribed work including essays, workshops, and seminars. Students should consult with potential supervisors during their final year.

Prerequisite: A grade average of at least 65% in at least 60 credit points of third year units germane to the discipline and a third year average of at least 60%.

Incompatible unit: BOT40HON, BOT42HON

Class requirements: In this unit and BOT4HNA students, undertake an independent full-time research project plus three series of workshops.

This unit is not available for study abroad students.

Assessment: Research thesis (70%), workshop reports and literature review (30%). The assessment components listed are the combined assessment for both BOT4HNA and BOT4HNB.

CBE21C ISSUES IN CONSERVATION (20. CPs Sem. TE-SEM-1 BU.)

Professor Tim New

This unit is for Bachelor of Conservation Biology and Ecology students. Other students must seek the approval of the course adviser. The course may include exercises including trapping, preservation, and examination of invertebrates. Students are required to attend a field trip one week before the commencement of semester one.

This unit covers rationales for biodiversity conservation: moral, aesthetic and utilitarian. Biodiversity and its **Assessment:** measures of biodiversity, survey methods for bacteria, protists, plants and animals, surrogate groups, molecular assessment of biodiversity as genetic information content, rapid assessment methods, endemism, taxonomy, and phylogeny. Biodiversity in Australia: continental biogeography, characteristics of Australian ecosystems. Maximising retained biodiversity through optimal reserve selection. Threatening processes. Ecosystem services: relationship to biodiversity. Management of endangered species: status evaluation, life histories, captive maintenance, inbreeding avoidance, reintroduction, population viability analysis, and impact of introduced species. Restoration ecology. Use of computer programs for conservation biological analysis: reserve selection, evolutionary distinctiveness, and population viability analysis.

Prerequisite: BIO1AD, BIO1GEN, and BIO1PS.

Recommended Prior Studies: BIO1OF, STA1LS.

Quota: 40.

Class requirements: Three 1-hour lectures per week, and one 4-hour practical session per week. There will be a field course in the week before semester one.

Assessment: One 3-hour examination (70%), three 1000-word assignments (30%)

Prescribed Reading:

Recommended Reading:

New, T.R. *Conservation biology in Australia. An introduction*, Melbourne Oxford University Press. 2006

CBE3AC APPLICATIONS IN CONSERVATION (30. CPs Sem. TE-SEM-1 BU.)

Dr Trevor Whiffin

This is an advanced study of conservation biology and ecology in practice, relating in particular to biodiversity assessment, species, and ecosystem management and conservation law. Biodiversity assessment will consider the determination and mapping of biodiversity, the modelling of distribution and habitat and reserve area selection. Species management will consider aspects of the captive breeding of species, population viability analysis and species re-introduction. Ecosystem management will consider the aims, goals and monitoring of management, the meanings of 'sustainability' and the processes by which it can be achieved in ecosystems. Conservation policy will consider the legal framework of biodiversity and environmental protection, legislation in Australia and overseas, international treaties and the practical application of policy within Australia.

Prerequisite: CBE21IC.

Class requirements: Four 1-hour lectures and two 4-hour practicals (or equivalent fieldwork, tutorials or workshops) per week.

Assessment: Two 3-hour examinations (70%), practical assignments, and reports (equivalent to 2500 words). (30%)

Prescribed Reading:

CBE4HNA HONOURS CONSERVATION BIOLOGY AND ECOLOGY (60(CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Professor Tim New*

This unit of study represents the first semester of a two-semester program. Honours degree students are selected based on their performance in the final year of the pass degree.

The Honours year will comprise a project related to Conservation Biology and Ecology plus associated coursework. However, because there is no Department of Conservation Biology and Ecology, students will be based in one of the participating departments. With the approval of the CBE Honours Coordinator, the assignments component may include work undertaken in another Department. Hours of study are unlimited – workshop attendance as specified.

Incompatible unit: CBE40HON, CBE41HON

Class requirements: Independent research project: Unlimited hours over 38 weeks.

Three workshops as foundations of reports.

This unit is not available for study abroad students.

Assessment: One research thesis (70%), three 3000-word assignments/reports (30%). The assessment components listed are the combined assessment for both CBE41HON and CBE42HON

CBE4HNB HONOURS CONSERVATION BIOLOGY AND ECOLOGY (60(CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Professor Tim New*

This unit of study represents the second semester of a two-semester program. Honours degree students are selected based on their performance in the final year of the pass degree.

The Honours year will comprise a project related to Conservation Biology and Ecology plus associated coursework. However, because there is no Department of Conservation Biology and Ecology, students will be based in one of the participating departments. With the approval of the CBE Honours Coordinator, the assignments component may include work undertaken in another Department. Hours of study are unlimited – workshop attendance as specified.

Incompatible unit: CBE40HON, CBE41HON

Class requirements: Independent research project: Unlimited hours over 38 weeks.

Three workshops as foundations of reports.

This unit is not available for study abroad students.

Assessment: One research thesis (70%), three 3000-word assignments/reports (30%). The assessment components listed are the combined assessment for both CBE41HON and CBE42HON

CHE1APL APPLICATIONS OF CHEMISTRY (15 CPs Sem. TE-SEM-2 AW, BU.)AW: *Mr Martin Fussell*, BU: *Dr Jeff Rowe*

Subjects studied include chemistry of solutions, equilibrium, entropy and free energy, acid-base equilibria, electrochemistry and chemical kinetics. The unit also examines chemicals in our environment, such as soaps, detergents, cleaning agents, water treatment to remove hardness and bacteria, pesticides and their analysis using chromatography. Chemistry of life: acid derivatives; food chemistry, amino acids and proteins, carbohydrates and synthetic polymers are also covered, along with metals in our environment, coordination compounds and the analysis of the metallic elements using spectroscopy.

Prerequisite: CHE1GEN or CHE1BAS (previously CHE11GEN or CHE11BAS).

Class requirements: Three 1-hour lectures and one 3-hour laboratory or workshop class per week.

Assessment: One 2-hour examination (70%), laboratory reports (20%), and workshops (10%). The laboratory course is compulsory and an attendance requirement applies.

Prescribed Reading:

Chang, R. *Chemistry* 9th edn, McGraw-Hill, 2007.

CHE1BAS BASIC CHEMISTRY (15 CPs Sem. TE-SEM-1 AW, BU.) AW: *Mr*Martin Fussell, BU: *Dr Jeff Rowe*

This unit is for students who have not taken VCE Chemistry. Students study the chemistry of atoms and molecules, atoms, molecules and ions, quantum theory and the electronic structure of the atom, periodic relationships among the elements, chemical bonding, and molecular geometry. Also studied is the chemistry of carbon compounds, hydrocarbons, delocalised bonding and aromatics, alkyl

halides, hydroxyl compounds, aldehydes and ketones and acids. In addition, gases and liquids, the properties of gases, thermochemistry, intermolecular forces, physical properties of solutions and acids and bases.

Incompatible unit: CHE11GEN, CHE1GEN

Class requirements: Three 1-hour lectures and one 3-hour laboratory or workshop class per week.

Assessment: One 2-hour examination (64%), laboratory reports (20%), workshops, and class tests (16%). The laboratory course is compulsory and an attendance requirement applies as per study guide

Prescribed Reading:

Chang, R. *Chemistry* 9th edn, McGraw-Hill, 2007.

CHE1GEN GENERAL PRINCIPLES OF CHEMISTRY (15 CPs Sem. TE-SEM-1AW, BU.) AW: *Mr Martin Fussell*, BU: *Dr Jeff Rowe*

Students study the chemistry of atoms and molecules, atoms, molecules and ions, quantum theory and the electronic structure of the atom, periodic relationships among the elements, chemical bonding, and molecular geometry. Also studied is the chemistry of carbon compounds, hydrocarbons, delocalised bonding and aromatics, alkyl halides, hydroxyl compounds, aldehydes and ketones and acids. In addition, gases and liquids, the properties of gases, thermochemistry, intermolecular forces, physical properties of solutions and acids and bases.

Prerequisite: VCE chemistry.

Incompatible unit: CHE11BAS, CHE1BAS

Class requirements: Three 1-hour lectures and one 3-hour laboratory or workshop class per week.

Assessment: One 2-hour examination (70%), laboratory reports (20%), and workshops (10%). The laboratory course is compulsory and an attendance requirement applies.

Prescribed Reading:

Chang, R. *Chemistry* 9th edn, McGraw-Hill, 2007.

CHE2CWQ CHEMISTRY OF WATER QUALITY (15 CPs Sem. TE-SEM-2 BU.)Dr *Ian Potter*

This unit deals with some contamination and treatment problems related to the quality of drinking and river waters. Physical, chemical, and biological measures of water quality are discussed, along with sampling and storage procedures. Detailed methods for analysis of trace metal and organic pollutants in natural waters and hands-on experience with some of these modern instrumental techniques is a key feature of the lectures and laboratory classes. Other topics covered include wastewater treatment procedures and examples of documented EPA and public health authority standard methods.

Prerequisite: CHE1GEN or CHE1APL.

Incompatible unit: CHE2RWD

Class requirements: Two 1-hour lectures, one 1-hour tutorial per week, and one 3-hour laboratory class for 10 weeks.

Assessment: One 1.5-hour examination (60%), laboratory reports (25%) and two essays (15%).

Recommended Reading:

Harris, D.C. *Quantitative chemical analysis*, 7th edn. Freeman, 2007.

CHE2DEV DEVELOPMENTS IN CHEMISTRY (20 CPs Sem. TE-SEM-2 BU.)Dr *Andrew Hughes*

The choice of components in this unit is from a pool of six topics. Each student based on interest and other second year units being taken determines the choice of three lecture topics. The six lecture topics, which may vary from year to year, include environmental analytical chemistry, carbonyl and aromatic chemistry, water quality and the monitoring of contaminants, biological chemistry including drug design, nanochemistry, and medicinal chemistry.

Prerequisite: CHE1GEN or CHE1BAS and CHE1APL.

Incompatible unit: CHE2MEC

Class requirements: Three 1-hour lectures per week and one 4-hour practical (compulsory) per week and tutorials as arranged.

Assessment: Written exam papers as required, three 1.5-hour exams (80%) and continuous assessment of practical laboratory (compulsory) performance (20%).

Prescribed Reading:

McMurry, J. *Organic chemistry*, 7th edn, Thomson-Brooks/Cole Publishing, 2008.

 Harris, D.C. *Quantitative chemical analysis*, 7th edn, Freeman, 2007.

CHE2FND FUNDAMENTALS OF CHEMISTRY (20 CPs Sem. TE-SEM-1 BU.)

Dr Andrew Hughes

Students study aspects of carbonyl chemistry, spectroscopic methods, occupational health and safety and the chemistry of elements of the periodic table.

Prerequisite: CHE1GEN or CHE1BAS and CHE1APL.

Class requirements: Three 1-hour lectures per week and one 4-hour practical (compulsory) per week and tutorials as arranged.

Assessment: Written papers as required, three 1.5-hour examinations (80%) and continuous assessment of practical laboratory (compulsory) performance (20%).

CHE2MEC MEDICINAL CHEMISTRY (20 CPs Sem. TE-SEM-2 BU.)

Dr Andrew Hughes

This unit is available to students enrolled in Bachelor of Medicinal Chemistry. Other students will require the coordinator's approval to enrol into this unit.

In the core medicinal chemistry topic of this unit, students will be introduced to the fundamental concepts of the field of medicinal chemistry. This will include the definition and classifications of drugs, the historical perspectives of drug discovery and the role of the medicinal chemist today. The emphasis of this topic will be on the four main molecular targets of drugs, which are lipids, carbohydrates, nucleic acids, and proteins (particularly enzymes and receptors). The structure and function of these targets, the types of drugs and how they interact with their corresponding targets will be discussed, including the role of antagonists, agonists, and allosteric enhancers. Examples of relevant drugs will be used as appropriate. Students are free to choose two more topics from the pool described for CHE2DEV but students should be aware that the topics of Carbonyl Chemistry and Biological Chemistry are highly recommended.

Prerequisite: CHE2FND.

Incompatible unit:

Class requirements: Three 1-hour lectures and one 4-hour laboratory/workshop class per week.

This unit is not available for study abroad students.

Assessment: Three 1.5-hour examinations (80%) The laboratory/workshop program is compulsory and an attendance/satisfactory standard/progress applies (hurdle requirement), laboratory/workshop reports (20%)

Recommended Reading:

Patrick, G. *An introduction to medicinal chemistry*, 3rd. edn, Oxford University Press, 2005.

CHE2NAN NANO CHEMISTRY (10 CPs Sem. TE-SEM-2 BU.)

Dr Conor Hogan

This unit is available to students enrolled in the Bachelor of Nanotechnology/Bachelor of Science. Other students require the approval of the coordinator of the unit

Topics will include Colloids, Nanoparticles, Quantum Dots, Dendrimers; Self-Assembled Monolayers and Structures; Bucky Balls and Nanotubes; Supramolecular Chemistry; molecular electronics, drug-delivery systems and biological molecules.

Prerequisite: CHE1GEN and CHE1APL.

Co-requisite: CHE2DEV.

Class requirements: Twenty 1-hour lectures and one 4-hour laboratory per fortnight.

Assessment: One 1.5-hour examination and one 1-hour examination (80%), laboratory work (20%)

Recommended Reading:

Beer, P.D., Gale P.A. & Smith, D.K. *Super molecular Chemistry* Oxford, 1999.

CHE2RWD CHEMISTRY IN THE REAL WORLD (20 CPs Sem. TE-SEM-2 BU.)

Dr Andrew Hughes

The three lecture topics students choose for this course are those from the pool of six described under CHE2DEV. The associated laboratory program reinforces the lecture material and provides hands-on experience of the types of problems faced by practising chemists in Australia.

Prerequisite: 15 credit points of a first year physics or mathematics unit.

Co-requisite: CHE2DEV or CHE2MEC.

Incompatible unit: CHE2CWQ and ENV2AIR.

Class requirements: Three 1-hour lectures per week, tutorials as arranged and one 4-hour laboratory per week.

Assessment: Three 1.5-hour exams (80%) and continuous assessment of practical laboratory (compulsory) performance (20%).

Prescribed Reading:

Rodgers, G.E. *Descriptive inorganic coordination and solid-state chemistry*, 2nd edn. Thomson-Brooks/Cole, 2002.

Recommended Reading:

Mc Murry, J. *Organic chemistry*, 7th edn, Thomson-Brooks/Cole, 2008.
 Harris, D.C. *Quantitative chemical analysis*, 7th edn, Freeman, 2007.

CHE3ADA SELECTED TOPICS FOR A JOINT CHEMISTRY MAJOR (30 CPs Sem. TE-SEM-1 BU.)

Dr Andrew Hughes

Full details of each topic are available on the departmental web page at www.latrobe.edu.au/chemistry/. Topics may vary from year to year.

Students are required to take a selection of four topics from the following: fuels and energy, bonding, analytical mass spectrometry, separation science, organic synthesis, NMR and spectroscopy, and medical chemistry and special topics.

Prerequisite: Any two of CHE2FND, CHE2DEV, or CHE2RWD.

Class requirements: Four 1-hour lectures and eight hours of laboratory work per week.

Assessment: Four 1.5-hour examinations (80%), practical reports (20%). In order to pass the subject, students must obtain an overall pass grade of at least 40% in the practical component and pass the examinations.

Prescribed Reading:

McMurry, J. *Organic chemistry*, 7th edn, Thomson-Brooks/Cole, 2008
 Laidler, K.J., Meiser, J.H. & Sanctuary, B.C. *Physical chemistry*, 4th edn. Houghton Mifflin Company, 2003
 Harris, D.C. *Quantitative chemical analysis*, 7th edn, Freeman, 2007.

CHE3ADB MATERIALS AND METHODS FOR JOINT CHEMISTRY**MAJORS** (30 CPs Sem. TE-SEM-2 BU.)

Dr Andrew Hughes

Full details of each topic are available on the departmental web page at www.latrobe.edu.au/chemistry/ Topics may vary from year to year.

Students are required to take a selection of four topics from the following: heterocyclic chemistry, instrumental analytical chemistry, industrial chemistry, secondary metabolism, molecular design, electro analytical and materials chemistry, structures and energetics, medicinal chemistry and special topics.

Prerequisite: Any two of CHE2FND, CHE2DEV, and CHE2RWD.

Class requirements: Four 1-hour lectures and eight hours of laboratory work per week.

Assessment: Four 1.5-hour examinations (80%), practical reports (20%). In order to pass the subject, students must obtain an overall pass grade of at least 40% in the practical component and pass the examinations.

Prescribed Reading:

McMurry, J. *Organic chemistry*, 7th edn, Thomson-Brooks/Cole, 2008.
 Laidler, K. J., Meiser, J. H. & Sanctuary, B.H. *Physical chemistry*, 4th edn, Houghton Mifflin Company, 2003.
 Harris, D. C. *Quantitative chemical analysis*. 7th edn, Freeman, 2007.

CHE3EAA ADVANCED ENVIRONMENTAL ANALYTICAL CHEMISTRY (10 CPs Sem. TE-SEM-1 BU.) *Dr Ian Potter*

This unit is one semester of a two-semester program. It is highly recommended that students take both CHE3EAA and CHE3EAB in the one academic year

This unit provides students with an introduction to modern instrumental analytical chemistry techniques in separation science, which are relevant to problems arising in environmental, medicinal, and forensic chemistry. Topics include chromatographic theory, high performance liquid chromatography (HPLC), ion chromatography (IC), super critical fluid chromatography (SFC), and capillary electrophoresis (CE).

Prerequisite: Enrolment by Chemistry Course Adviser approval only.

Incompatible unit: CHE3SPA

Class requirements: One 1-hour lecture per week and 36 hours of laboratory classes.

This unit is not available for study abroad students.

Assessment: One 1.5-hour examinations (80%) and laboratory reports. (20%)

Prescribed Reading:

Harris, D.C. *Quantitative chemical analysis*, 7th edn, Freeman, 2007.

CHE3EAB ADVANCED ENVIRONMENTAL ANALYTICAL CHEMISTRY (5 CPs Sem. TE-SEM-2 BU.) *Dr Ian Potter*

This unit is one semester of a two-semester program. It is highly recommended that students take both CHE3EAA and CHE3EAB in the one academic year

This unit provides students with an introduction to modern instrumental analytical chemistry techniques, which are relevant to environmental, biological, and forensic chemistry. Topics include atomic absorption spectroscopy (AAS), inductively coupled plasma spectrometry (ICP), automation in analytical chemistry, chemical sensors, and miniaturisation in analytical chemistry.

Prerequisite: Enrolment by Chemistry Course Adviser approval only.

Incompatible unit: CHE3SPB

Class requirements: One 1-hour lecture per week.

This unit is not available for study abroad students.

Assessment: One 1.5-hour examination (100%)

Prescribed Reading:

Harris, D.C. *Quantitative chemical analysis*, 7th edn, Freeman, 2007.

CHE3MCC MEDICINAL CHEMISTRY C (30 CPs Sem. TE-SEM-1 BU.) *Dr*

Andrew Hughes

This unit is available to students enrolled in Bachelor of Medicinal Chemistry. Other students wishing to take the unit must obtain the coordinator's approval.

In the core medicinal chemistry topic of this unit, students will examine the pathway of drug discovery, design, and development. The sources of lead compounds, their isolation, and characterisation will be discussed. This will be followed by the strategies of drug design to optimise pharmacokinetic and pharmacodynamic properties, with structure-activity relationships (SAR) to be covered in detail. The development processes, which include commercialisation, manufacturing/production, clinical trials, and the importance of intellectual property, will be also considered. Case studies of the pathways taken to achieve selected drugs will be presented. Students are free to choose three more topics from the pool described for CHE3ADA but students should be aware that the topics of NMR and Molecular Spectroscopy, Synthesis and Analytical Mass Spectroscopy are highly recommended.

Prerequisite: CHE2MEC.

Class requirements: Four 1-hour lectures and eight hours of laboratory work per week.

This unit is not available for study abroad students.

Assessment: Four 1.5-hour examinations or equivalent (80%) The laboratory/workshop program is compulsory and an attendance/satisfactory standard/progress requirement applies (hurdle requirement), laboratory/workshop reports (20%)

Recommended Reading:

Patrick, G. *An introduction to medicinal chemistry*, 3rd edn, Oxford University Press, 2005.

CHE3MCD MEDICINAL CHEMISTRY D (30 CPs Sem. TE-SEM-2 BU.) *Dr*

Andrew Hughes

This unit is available to students enrolled in Bachelor of Medicinal Chemistry. Other students will require the coordinator's approval to enrol into this unit

In the core medicinal chemistry topic of this unit, students will study advanced aspects of medicinal chemistry. Key improvements in technology and techniques, which aid the medicinal chemist, will be examined. Examples of these will include the use of quantitative structure activity relationships (QSAR), combinatorial chemistry, and computer-aided drug design. Case studies of selected modern drugs will be presented.

Students are free to choose three more topics from the pool described for CHE3ADB but students should be aware that the topics of Heterocyclic Chemistry, Molecular Design, and Secondary Metabolism are highly recommended.

Class requirements: Four 1-hour lectures and eight hours of laboratory work per week.

This unit is not available for study abroad students.

Assessment: Four 1.5-hour examinations or equivalent (80%) The laboratory/workshop program is compulsory and an attendance/satisfactory standard/progress requirement applies (hurdle requirement), laboratory/workshop reports (20%)

Recommended Reading:

Patrick, G. *An introduction to medicinal chemistry*, 3rd edn, Oxford University Press, 2005.

CHE3MCE MEDICINAL CHEMISTRY E (30 CPs Sem. TE-SEM-S BU.) *Dr*

Andrew Hughes

This unit is available to students enrolled in the Bachelor of Medicinal Chemistry. Other students wishing to take the unit must obtain the coordinator's approval.

Students in this topic will undertake lecture or online instruction in the topics Heterocyclic chemistry, Molecular Design and Secondary Metabolism most closely related to medicinal chemistry. Advanced aspects of medicinal chemistry will be addressed through the substantial laboratory based research project students will undertake. The research project will involve working on and exposure to concepts of drug design and development. Through the research project, students will gain knowledge of case studies of selected modern drugs.

Prerequisite: CHE2MEC.

Class requirements: Eighteen hours of lectures or equivalent and twenty hours of laboratory work per week.

This unit is not available for study abroad students.

Assessment: Three 1.5-hour examinations or equivalent (60%), laboratory/research project report (equiv to 3000-4500 words) (40%)

Recommended Reading:

Patrick, G. *An introduction to medicinal chemistry*, 3rd edn, Oxford University Press, 2005.

CHE3SEN SENSORS AND DEVICES (15 CPs Sem. TE-SEM-2 BU.) *Dr Conor*

Hogan

This unit is only available to students enrolled in the Bachelor of Nanotechnology/Bachelor of Science.

In this unit, students will study many aspects of contemporary sensing theory and practice and the device technologies required for real world implementation. Unit themes include: (a) electrochemistry with a focus on electron transfer and mass transport and applications in batteries, fuel cells, solar conversion, microelectronics and sensors, (b) concepts of chemical, physical and biological sensing with electrochemical, optical and mass-based examples, (c) micro sensors and micro fluidics including 'lab-on-a-chip' designs and micro total analytical systems (mu-TAS), (d) biochips and micro arrays for DNA, protein and related large scale assays, and (e) nanostructured interfaces and molecular scale devices, examining the 'bottom-up' approach to fabrication. Students are not permitted to take the topics contained in this unit for credit in CHE3ADB.

Prerequisite: Third year of the Bachelor of Nanotechnology/Bachelor of Science degree.

Class requirements: Two 1-hour lectures and one 3-hour laboratory session per week.

This unit is not available for study abroad students.

Assessment: Two 1.5-hour examinations (80%), practical reports equivalent to 1500 words (20%). In order to pass the subject, students must obtain an overall pass grade of at least 40% in the practical component and pass the examinations.

CHE3SPA COMPLEMENTARY TOPICS FOR PURE CHEMISTRY MAJORS (30 CPs Sem. TE-SEM-1 BU.) *Dr Andrew Hughes*

Only available to students who are enrolled in, or who have passed, CHE3ADA.

Students are required to take a selection of four topics from the following: fuels and energy, bonding, analytical mass spectrometry, separation science, organic synthesis, NMR and spectroscopy, medicinal chemistry and special topics. Students are not permitted to take those topics taken for credit in CHE3ADA.

Prerequisite: Any two of CHE2FND, CHE2DEV, and CHE2RWD.

Co-requisite: CHE3ADA.

Incompatible unit: CHE3LAP, CHE3EAC

Class requirements: Four 1-hour lectures and eight hours of laboratory per week.

Assessment: Four 1.5-hour examinations (80%), practical reports (20%). In order to pass this subject, students must obtain an overall pass grade of at least 40% in the practical component and pass the examinations.

Prescribed Reading:

McMurry, J. *Organic chemistry*, 7th edn, Thomson-Brooks/Cole, 2008
Laidler, K. J., Meiser, J. H & Sanctuary, B.H. *Physical chemistry*, 4th edn, Houghton Mifflin Company, 2003
Harris, D. C. *Quantitative chemical analysis*, 7th edn, Freeman, 2007.

CHE3SPB STRUCTURES AND REACTIONS FOR A PURE CHEMISTRY MAJORS (30 CPs Sem. TE-SEM-2 BU.) *Dr Andrew Hughes*

Only available to students who are enrolled in CHE3ADB, or who have passed CHE3ADB.

Students are required to take a selection of four topics from the following: heterocyclic chemistry, instrumental analytical chemistry, industrial chemistry, secondary metabolism, molecular design, electroanalytical and materials chemistry, structure and energetics, medicinal chemistry and special topics. Students are not permitted to take those topics taken for credit in CHE3ADB.

Prerequisite: Any two of CHE2FND, CHE2DEV, and CHE2RWD.

Co-requisite: CHE3ADB.

Incompatible unit: CHE3CLP, CHE30EAC, CHE31EAC, CHE32EAC, CHE3EAA, CHE3EAB, and BNF3MOL

Class requirements: Four 1-hour lectures and eight hours of laboratory work per week.

Assessment: Four 1.5-hour examinations (80%), practical reports (20%). In order to pass the subject, students must obtain an overall pass grade of at least 40% in the practical component and pass the examinations.

Prescribed Reading:

McMurry, J. *Organic chemistry*, 7th edn, Thomson-Brooks/Cole, 2008
Laidler, K. J., Meiser, J. H. & Sanctuary, B.H. *Physical chemistry*, 4th edn, Houghton Mifflin Company, 2003
Harris, D. C. *Quantitative chemical analysis*, 7th edn, Freeman, 2007.

CHE4HNA HONOURS CHEMISTRY (60 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Conor Hogan*

This unit of study represents one semester of a year long program. Students commence their Honours program either in February for first semester or July for second semester

This unit comprises lectures that are more advanced and training in research. There are no formal or set experiments. Each student is required at the beginning of the course to choose the area of chemistry in which they wish to undertake a research investigation. The lecture units expected to be offered in the two areas of chemistry (instrumental and synthetic) comprise computational chemistry, computer interfacing, mass spectrometry, chemical sensors, modern electrochemistry, NMR, mechanistic organic chemistry, medicinal chemistry, and organometallic synthesis. The Department giving full details of all units offered will supply brochures.

Prerequisite: A grade average of at least 65% in at least 60 credit points of third year chemistry and a third year average of at least 60%.

Incompatible unit: CHE40HON, CHE41HON

Class requirements: Students commence their research project early in February or in July. Students select, (with the approval of the Head of Dept), nine lecture units from the list above, with the restriction that at least three must be from each of the two areas. Assessment is based on the best eight results. Students may, with the approval of the Head of Department, partly replace chemistry components with fourth year components offered by other relevant Departments. Students are required to present two seminars during the year and attend Departmental research seminars.

Assessment: The research project is assessed based on a thesis and by an oral examination (60%) The assessment components listed are the combined assessment for CHE4HNA and CHE4HNB, lecture units assessed by examination, or take-home project, in the first semester exam period (40%)

CHE4HNB HONOURS CHEMISTRY (60 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Conor Hogan*

This unit of study represents one semester of a year long program. Students commence their Honours program either in February for first semester or July for second semester

This unit comprises lectures that are more advanced and training in research. There are no formal or set experiments. Each student is required at the beginning of the course to choose the area of chemistry in which they wish to undertake a research investigation. The lecture units expected to be offered in the two areas of chemistry (instrumental and synthetic) comprise computational chemistry, computer interfacing, mass spectrometry, chemical sensors, modern electrochemistry, NMR, mechanistic organic chemistry, medicinal chemistry, and organometallic synthesis. Brochures will be supplied by the Department giving full details of all units offered.

Prerequisite: A grade average of at least 65% in at least 60 credit points of third year chemistry and a third year average of at least 60%.

Incompatible unit: CHE40HON, CHE42HON

Class requirements: Students commence their research project early in February or in July. Students select, (with the approval of the Head of Dept), nine lecture units from the list above, with the restriction that at least three must be from each of the two areas. Assessment is based on the best eight results. Students may, with the approval of the Head of Department, partly replace chemistry components with fourth year components offered by other relevant Departments. Students are required to present two seminars during the year and attend Departmental research seminars.

Assessment: Lecture units assessed by examination, or take-home project, in the first semester exam period (40%). The research project is assessed based on a thesis and by an oral examination (60%). The assessment components listed are the combined assessment for CHE4HNA and CHE4HNB.

COG2TOP TOPICS IN COGNITIVE SCIENCE (10. CPs Sem. TE-SEM-2 BU.)

Dr Edith Bavin

This unit is designed for students who have been admitted to the double degree course in cognitive science and computer science. Topics to be introduced will draw upon at least two approaches from the disciplines that contribute to the area of cognitive science. The focus is on integrating these approaches as well as practical applications. Topics include connectionist modelling of language processing and acquisition, neural mechanisms underlying cognitive functioning, the brain as a symbolic processor, the intentional stance and its alternatives and intelligent hybrid systems.

Prerequisite: Completion of a minimum of 135 credit points of the BCogScience/BCompScience degree, including PSY11PYA, PSY12PYB, CSE1100J, and CSE12IPJ.

Class requirements: One 2-hour seminar per week.

Assessment: One 3000-word essay (80%) and seminar participation (20%). one 3000-word essay (80%) and seminar participation (20%).

Prescribed Reading:

Thagard, P. *Mind: Introduction to cognitive science*. Cambridge, MA: MIT Press, 1996.

CSE1CES C PROGRAMMING FOR ENGINEERS AND SCIENTISTS (15. CPs Sem. TE-SEM-1 BU.) *Dr Zhen He*

Students study procedural programming using the C programming language. Topics include the C Compiler and pre-processor, functions and programme structures, pointers and arrays, structures, input/output and the UNIX interface.

Recommended Prior Studies: Year 12 Mathematical Methods or Specialist Mathematics is assumed.

Incompatible unit: CSE11SYS, CSE12SYS, CSE21CES

Class requirements: Two 1-hour lectures for 12-weeks of the semester, one 2-hour laboratory class per week for 9 weeks of the semester.

Assessment: One 3-hour end of semester examination (70%), programming assignments (equivalent to 750 words total) (20%), laboratory work (10%)

Prescribed Reading:

R. Johnsonbaugh & M. Kalin. *Applications programming in ANSI C* 3rd edn. Prentice-Hall, 1996

CSE1CPP OBJECT-ORIENTED PROGRAMMING USING C++ (15. CPs Sem. TE-SEM-2 BU.) *Mr Richard Tresider*

Note that students who have attempted, but not completed, their basic Java unit may still apply to the unit coordinator for admission to this unit.

C++ is one of the most widely used programming languages in industry. C++ is used extensively in games, operating systems, mobile devices, systems programming and application programming. Knowledge of C++ can also help when learning other object-oriented languages such as Java. CSE1CPP introduces students to the basics of C++ and progresses to an intermediate level, forming a solid basis for more advanced subjects in the areas of games, project, networks, and other areas. The topics studied include I/O streams and file I/O, classes, references, overloaded functions and operations, friend functions, inheritance, abstract classes, template classes and functions, exception handling, namespaces, memory management, the string class and an introduction to the Standard Template Library (STL). Also covered are the basics of systems programming.

Prerequisite: Must have attempted either CSE1OJA or CSE1OJA (from 2009 CSE1OOF or CSE1OFA)sss.

Incompatible unit: CSE1SYS, CSE12SYS, CSE11SYS

Class requirements: Two 1-hour lectures, one 2-hour laboratory, and one 1-hour practice class per week for 12 weeks.

Assessment: One 3-hour examination (70%), laboratory skills tests (5%), one computer programming assignment equivalent to 1000 words (25%). In order to pass the unit, students must obtain an overall pass grade, obtain at least 45% in the examination, and pass the combined non-examination components.

CSE1OO INTERMEDIATE OBJECT-ORIENTED PROGRAMMING (15 CPs Sem. TE-SEM-1 BE, BU. TE-SEM-2 BE, BU.) *BE: Ms Mary Martin, BU: Dr Julie Main*

The teaching of object-oriented concepts is continued while students gain more experience with the Java programming language and basic software engineering principles. Topics covered include inheritance (class hierarchies, abstract classes), input/output streams, file operations, exceptions, recursion, generics and dynamic data structures (linked lists). Software engineering principles are further developed, including parameters for characterising software quality, testing strategies, and debugging strategies.

Prerequisite: CSE1OFA or CSE1OOF, CSE1OOJ, CSE1OJA, CSE1OJA.

Incompatible unit: CSE12IPJ, CSE11IJA, CSE1IPJ, CSE1IJA, CSE12IJA.

Class requirements: Two 1-hour lectures, one 2-hour laboratory class, and one 1-hour practice class per week for 12 weeks.

Assessment: One 3-hour examination (70%), one computer programming assignment equivalent to 1500 words (30%). In order to pass the unit, students must obtain an overall pass grade, obtain at least 45% in the examination, and pass the non-examination component.

CSE1ITF INFORMATION TECHNOLOGY FUNDAMENTALS (15. CPs Sem. TE-SEM-1 BE, BU. TE-SEM-2 BE.) *BE: Dr John McCullagh, BU: Dr Richard Lai*

Bundoora students who have taken CSE1IS, are not permitted to take this unit.

In this unit, students will be provided with a general and practical introduction to information technology for students in all disciplines. It consists of two compulsory modules:

Theory one: fundamental principles of computer operation, the main hardware components of the computer, data storage and retrieval, Theory two: introduction to system software, introduction to data communications, hardware selection and evaluation;

And four elective two-week modules to be chosen from:

Theory three: operating systems, file management systems, memory management, and CPU scheduling, data communications and networking, hardware management, security and backup;

Application software modules: spreadsheets, database packages, the World Wide Web, applied IT modules.

Incompatible unit: BUS1MIS, INT1ITF

Class requirements: BE: two 1-hour lectures and two 1-hour tutorial/practical classes per week

BU: two 1-hour lectures, one 2-hour laboratory class, and one 1-hour practice class per week.

Assessment: BU: one 2.5-hour examination (70%) BE: one 2-hour examination (60%). Hurdle: To pass the unit, students must submit all assessment material and achieve at least 45% for the examination, BE: one 750-word practical assignment (15%) BE: one assignment equivalent to 500 words (10%), BE: five tutorial tasks equivalent to 50 words each (5%), BE: 30-minute test equivalent to 500 words (10%), BU: one 1000-word programming assignment (23%), BU: three 10-minute laboratory tests (7%)

Prescribed Reading:

BENDIGO CAMPUS: Shelly, Cashman & Vermaat. *Discovering computers 2007 (introductory)* Thomson, 7th edn.

BUNDOORA CAMPUS: Stair & Stair *Principles of information systems*, 8th edn, Thomson.

CSE1OFA OBJECT-ORIENTED PROGRAMMING FUNDAMENTALS (15 CPs Sem. TE-W05-07 BU. TE-W26-28 BU.) *Dr Kinh Nguyen*

This unit commences three weeks prior to the commencement of the semester and class requirements run until the start of the semester. The unit is taught full-time over five days per week for the three weeks

Students are introduced to computers, object-oriented concepts and programming using Java. Students also gain a working knowledge of the UNIX operating system. Topics covered include classes and objects; primitive data types; flow of control; methods; basic input/output and arrays. Software engineering principles are introduced, including coding standards, class design and testing strategies

Incompatible unit: CSE11OOJ, CSE1OOJ, CSE12OJA, CSE11OJA, CSE1OJA, CSE1OOF,

Class requirements: Eight 1-hour lectures, four 2-hour laboratory classes, and four 1-hour practice classes per week for three weeks.

Assessment: Computer programming assignments equivalent to 1500 words (40%), one 2.5-hour examination (60%). In order to pass the unit, students must obtain an overall pass grade, obtain at least 45% in the examination, and pass the combined non-examination components.

CSE1OOF OBJECT-ORIENTED PROGRAMMING FUNDAMENTALS (15 CPs Sem. TE-SEM-1 BE, BU. TE-SEM-2 BE.) *BE: Dr Chris Cope, BU: Dr Kinh Nguyen*

Students are introduced to computers, object-oriented concepts and programming using Java. Students also gain a working knowledge of the UNIX operating system. Topics covered include classes and objects, primitive data types, flow of control, methods, basic input/output and arrays. Software engineering principles are introduced, including coding standards, class design and testing strategies

Incompatible unit: CSE1OOJ, CSE1OJA, CSE11OOJ, CSE11OJA, CSE12OJA, CSE1OFA

Class requirements: Two 1-hour lectures, one 2-hour laboratory class, and one 1-hour practice class per week for 12 weeks.

Assessment: Computer programming assignments equivalent to 1500 words (40%), one 2.5-hour examination (60%). In order to pass the unit, students obtain an overall pass grade, obtain at least 45% in the examination, and pass the combined non-examination components.

CSE2ACG ADVANCED C++ FOR GAMES TECHNOLOGY (15 CPs Sem. TE-SEM-2 BU.) *Dr Zhen He*

The purpose of this unit is to teach advanced aspects of C++ programming needed in Games Technology. This unit starts with a review of basic C++ programming and then moves into the more advanced topics of using pre-processor directives, class templates, multiple inheritance, mutable members, overloading and overriding methods, string streams, STL containers and algorithms, iterators, exception handling, namespaces, RTTI, function pointers and functors, context sensitive help, creating and loading DLLs, components and packages and .NET programming.

Prerequisite: CSE1CCP or CSE1SYS.

Incompatible unit: CSE2CGT.

Class requirements: One 2-hour lecture per week for 12 weeks and one 2-hour laboratory class for per week for 10 weeks.

Assessment: One 3-hour examination (60%), one programming assignment equivalent to 1000 words (30%), laboratory work (10%)

CSE2AIF ARTIFICIAL INTELLIGENCE FUNDAMENTALS (15 CPs Sem. TE-SEM-2 BU.) *Dr Andrew Skabar*

This unit covers the fundamental areas of AI, focusing on knowledge representation and search. Main topics include historical foundations and applications areas; state-space search; game-playing; knowledge representation languages including predicate calculus, semantic networks, conceptual graphs and frames; rule-based expert systems; and an introduction to symbolic and connectionist machine learning.

Prerequisite: CSE1IPJ or CSE1IJA (from 2009 CSE1IOO).

Incompatible unit: CSE2AI, CSE3AI, CSE4FAI

Class requirements: Two one-hour lectures and one two-hour laboratory per week.

Assessment: One 3-hour examination (70%), one programming assignment equivalent to 1500 words (30%)

Prescribed Reading:

Luger, G. *Artificial intelligence: structures and strategies for complex problem solving*. 5th edn. Addison Wesley

Recommended Reading:

Russel, S. and Norvig, P. *Artificial intelligence: A modern approach*. 2nd edn. Prentice-Hall

CSE2ALG ALGORITHMS AND DATA STRUCTURES (15 CPs Sem. TE-SEM-1 BE, BU. TE-SEM-2 BE, BU.) *BE: Mr Tim Whitfort, BU: Dr Julie Main*

This unit covers a range of important algorithms and data structures. Data structures for implementing containers are covered and include linear structures, tree structures and hash tables. Algorithms for insertion and deletion of elements, and algorithms for searching and sorting on these structures are covered where appropriate. Graphs and graph algorithms are also covered. Students will learn the construction and workings of the data structures and algorithms covered. They will learn to analyse the effectiveness of each data structure and algorithm for specific problems and categories of problems. Students will also implement in programs a wide range of the structures and algorithms covered.

Prerequisite: CSE1IPJ or CSE1IJA or CSE1IOO and MAT1DM.

Incompatible unit: CSE21ADS, CSE22ADS, CSE41FAS, CSE42FAS, CSE21ADC, CSE22ADC, CSE41FAD, CSE42FAD, CSE2ADS, CSE4FAS

Class requirements: Two 1-hour lectures, one 2-hour laboratory class per week for twelve weeks.

Assessment: One 3-hour examination (70%), one computer-programming assignment equivalent to 1000 words (30%). In order to pass the unit, students must obtain an overall pass grade, obtain at least 45% in the examination, and pass the non-examination component.

CSE2CSA COMPUTER SYSTEM ARCHITECTURE (15. CPs Sem. TE-SEM-1 BU.) *Dr Naveen Chilamkurti*

In this unit students study the computer architecture component of Von Neumann Computer Architecture. They also learn about Instruction Cycle, Introduction to Real Computer, Fetch-Execute cycle, Classification of Processors, and Instruction sets. A Review of Numbering Systems and Addressing Modes are also included. Computer Organisation includes Basic operations of CPU, Micro code, Protection, and Processor Modes. The Micro coded Instructions, Advantages of Micro codes, types of Micro codes and Out-of-Order instructions are also discussed. Students will learn about Assembly Language, Programming Paradigm, Processor type, instruction set, Memory Storage, Memory Technologies, and Virtual Memory Technologies. Introduction to Operating System will include Physical Memory, Device Management, Input/Output devices, Busses and Bus Architecture. Programmed I/O, Interrupt Driven I/O, Polling, Hardware Interrupt Mechanism, and Direct Memory Access (DMA) will also be discussed.

Prerequisite: MAT1DM.

Incompatible unit: CSE21DMO, CSE21COR, CSE2COR, CSE2DMO

Class requirements: Two 1-hour lectures and one 2-hour practical class per week.

Assessment: One 3-hour examination (70%), two-practical class tests equivalent to 750 words (20%), practical class attendance (10%)

CSE2DBF DATABASE FUNDAMENTALS (15. CPs Sem. TE-SEM-1 BU.) *Dr Wenny Rahayu*

This unit starts with an overview of databases and the architecture of database systems. The introduction is followed by a discussion on different database models, where the Relational data model is described in detail. This unit will be useful as a preparation for units such as Software Engineering Project, which requires understanding of database design and implementation. The topics covered include relational algebra as the foundation of relational operations, Normalisation, and integrity constraints – SQL implementation of relational database queries; Advanced PL/SQL of stored procedures and triggers. In this subject, students are required to build a database application that meets the needs of a system requirement specification and implementation of the system with a selected commercial DBMS such as ORACLE 10g.

Prerequisite: CSE1IPJ or CSE1IJA (from 2009 CSE1IOO).

Incompatible unit: CSE31DB or CSE41FDB or CSE3DB or CSE4FDB

Class requirements: Two 1-hour lectures and one 2-hour laboratory class per week.

Assessment: One 3-hour examination (70%), one database development assignment (25%), one class test (5%). In order to pass the unit, students must obtain an overall pass grade, pass the examination, and pass the non-examination component.

CSE2DES SYSTEM DESIGN ENGINEERING FUNDAMENTALS (15. CPs Sem. TE-SEM-2 BU.) *Dr Kinh Nguyen*

This unit aims to introduce students to the concept of advanced object oriented conceptual modelling for software engineering and data modelling. It uses as its fundamental conceptual data model, the object-oriented model. Object-oriented ideas for modelling purposes are introduced and extensions of these for data modelling are discussed. The UML notation is adopted for graphical representation. The Rational Unified Process (RUP) is presented and its use for object-oriented data modelling is critically examined. Object Constraint Language (OCL) is presented as well as its uses in rigorous object-oriented data modelling. The unit also covers Data Flow Diagrams, Structure Charts, Finite-State Machines of different kinds and Petri-Nets, and their application to system modelling.

Prerequisite: CSE1IPJ or CSE1IJA (from 2009 CSE1IOO).

Incompatible unit: CSE2ODE, CSE2SDT, CSE3ODE, CSE4FOD, CSE4FSD

Class requirements: Two 1-hour lectures and one 2-hour laboratory class per week for 12 weeks.

Assessment: One 3-hour examination (70%), one 1000 word-assignment (30%)

CSE2ICE INTERNET CLIENT ENGINEERING (15 CPs Sem. TE-SEM-1 BU.)*Dr Seng Loke*

Topics covered in this unit include Web programming, audience-based web page/site development: HTML and DHTML links, images, Image Map, tables, frames, form; style sheets, JavaScript; logical design of web user interface; usability testing, web presence and visibility; XML, AJAX, and XSLT.

Prerequisite: CSE1IPJ or CSE1IJA (from 2009 CSE1IOO).

Corequisite: CSE2DB or CSE3DB or CSE2DBF.

Incompatible unit: CSE41FIC, BUS21BAD, BUS32EBS, CSE31ICC, CSE31UIE, BUS2BAD, BUS3EBS, CSE3ICC, CSE4FIC

Class requirements: Two 1-hour lectures and one 2-hour laboratory per week.

Assessment: One 3-hour examination (65%), one 750-word programming assignment (30%), one class test (5%)

CSE2NEF NETWORK ENGINEERING FUNDAMENTALS (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Naveen Chilamkurti*

In this unit students examine OSI 7-layer model, standards, definitions and terminology; data transmission, concepts and terminology, analogue and digital data transmission, transmission impairments and media; digital to analogue encoding algorithms, performance, efficiency and reliability measures/analysis; asynchronous and synchronous transmission techniques; multiplexing, frequency-division, synchronous time-division, statistical time division; error detection and correction approaches, 'flow control' at the physical layer; example physical layer protocol, role and issues in Data Link layer, flow control using simplex and more complex sliding window protocols, long propagation delay example; error detection and correction at the data link layer with reference to the sliding window protocol; Internet protocols-IPv4 and IPv6, including format, framing structure, sub netting, super netting, mobile IP. TCP-segment format and UDP protocol.

Prerequisite: C programming highly recommended.

Incompatible unit: CSE21NET, CSE22NET, CSE31NET, CSE32NET, CSE41FNT, CSE42FNT, CSE2NET, CSE3NET, CSE4FNT

Class requirements: Two 1-hour lectures and one 2-hour laboratory class per week for 12 or the 13 weeks of semester.

Assessment: One 3-hour examination (70%), two practical class tests (10% each) equivalent to 500 words each test (20%), practical class attendance (10%)

CSE2STQ SYSTEM TESTING AND QUALITY (15 CPs Sem. TE-SEM-1 BU.) *Mr Karl Reed*

Topics covered in this unit include testing of standalone, LAN based internet software, different forms of testing, test plan generation and execution, test coverage. Reliability estimates of software including error defect models, maintenance and modifiability effects. Introduction to software quality issues both process and product related and standards. Introduction to GQM. Factors influencing software quality, standards for software quality assurance, AS 3563, measures of quality, error rates, concept of a measurement environment for quality, design of experiments for quality measurement, use of metrics in quality control, reliability issues. A feature of this subject will be research preparation using extensive collections of readings.

Prerequisite: CSE1IPJ or CSE1IJA (from 2009 CSE1IOO).

Incompatible unit: CSE4FST, CSE3STR

Class requirements: Two 1-hour lectures and one 2-hour laboratory class per week for 12 weeks.

Assessment: One 1000-word programming assignment (30%), one 3-hour examination (70%)

CSE3ALR ARTIFICIAL INTELLIGENCE-LOGIC AND REASONING (15. CPs Sem. TE-SEM-1 BU.) *Dr Fei Liu*

In this unit, students are provided with the opportunity to study additional Artificial Intelligence topics to those studied in CSE2AIF. Topics covered in this unit focus on logic and reasoning, and include Inference in First-Order Logic; Logic Programming in PROLOG; Resolution, Natural Language Processing, Planning, and Artificial Agents.

Prerequisite: CSE2AI or CSE4FAI (from 2009 CSE2AIF).

Incompatible unit: CSE3AIL

Class requirements: Two 1-hour lectures for 13 weeks and one 2-hour laboratory class per week for 12 weeks.

Assessment: One 3-hour examination (70%), one programming assignment equivalent to 1000 words (30%)

CSE3CI COMPUTATIONAL INTELLIGENCE (15. CPs Sem. TE-SEM-2 BE, BU.)

BE: Mr Tim Whitfort, BU: Dr Dianhui Wang

This unit includes the main three components of computational intelligence, which are fuzzy logic, neural nets, and genetic algorithms (GA). The course provides students with concepts and fundamentals in intelligent systems design and applications. Technical aspects cover fuzzy inference mechanisms and applications, mapping neural networks, learning, functionality and applications in intelligent prediction and classification systems, and GA techniques for solving parameter optimisation problems. Students will work with real data to help consolidate their knowledge in this area.

Prerequisite: CSE2AI (from 2009 CSE2AIF).

Incompatible unit: CSE3ISE, CSE4FIS

Class requirements: One 2-hour lecture and one 2-hour laboratory class per week for 10 of the 13 weeks of semester.

Assessment: One 3-hour examination (70%), one programming assignment equivalent to 750 words (25%), and laboratory work. (5%)

CSE3DMS DATABASE MANAGEMENT SYSTEMS (15 CPs Sem. TE-SEM-1 BU.) *Dr Jinli Cao*

This unit covers the important knowledge and concepts of database management systems. The techniques of the multilevel indexes, B+ Trees, static and dynamic hashing used for database access structures and organisations are discussed. The algorithms for query processing and optimisation to improve the performance of the database system are detailed. Principles and theories of database management such as transaction management, serialisability, recoverability, concurrency control algorithms and recovery techniques are covered. This unit is also including the advanced database programming SQL such as advanced procedures, functions, triggers, packages, privileges, format models, transactions, and indexes. Oracle Forms Builder and Reports Builder will be used for creating user applications and providing reports. Database design tuning techniques are studied.

Prerequisite: CSE2DB or CSE3DB (from 2009 CSE2DBF).

Incompatible unit: CSE3DBP

Class requirements: Two 1-hour lectures and one 2-hour laboratory class per week.

Assessment: One 1000-word equivalent programming assignment (30%), one 3-hour examination (70%)

CSE3IBA INDUSTRY-BASED LEARNING A (30. CPs Sem. TE-SEM-1 BE, BU.)

BE: Dr Lorraine Staehr, BU: Dr Torab Torabi

Students undertake a 20-week full-time industry-based learning program. A member of the academic staff acting in the capacity of industry based learning coordinator liaises with the placement provider to formulate and structure a program of learning for each student. This program is normally project-based, with day-to-day supervision by the placement provider. Progress is monitored at regular intervals.

Prerequisite: Application to and selection by industry-based learning committee. Normally only applications from students who have completed two years of a degree offered by the department of Computer Science and Computer Engineering will be considered.

Incompatible unit: INT3MP1 or CSE3MP1, INT3MP2 or CSE3MP2, INT3IEA or CSE3IEA, INT3IEB or CSE3IEB, INT3IBA

Class requirements: Industry placement for 20 weeks.

This unit is not available for study abroad students.

Assessment: one page preliminary report (5%), reflective diary, submitted weekly by email (25%), one 10-minute mid-semester presentation (10%), one 2000-word written report and documentation of placement (40%), one 20-minute formal presentation at end of placement (20%)

CSE3IBB INDUSTRY-BASED LEARNING B (30. CPs Sem. TE-SEM-2 BE, BU.)

BE: Dr Lorraine Staehr; **BU:** Dr Torab Torabi

Students undertake a 20-week full-time industry-based learning program. A member of the academic staff acting in the capacity of industry-based learning coordinator liaises with the placement provider to formulate and structure a program of learning for each student. This program is normally project-based, with day-to-day supervision by the placement provider. Progress is monitored at regular intervals.

Prerequisite: INT3IBA or CSE3IBA, or approved by the Department of Computer Science and Computer Engineering.

Incompatible unit: INT3IBB

Class requirements: Industry placement for 20 weeks.

This unit is not available for study abroad students.

Assessment: one page preliminary report (5%), reflective diary, submitted weekly by email (25%), one 10-minute mid-semester presentation (10%), one 2000-word written report and documentation of placement (40%), one 20-minute formal presentation at end of placement (20%)

CSE3IGR INTERMEDIATE GRAPHICS PROGRAMMING (15 CPs Sem. TE-SEM-1 BU.) Dr John Rankin

Topics covered in this unit include: Graphics hardware characteristics, aspect ratios, coordinate systems, graphics primitives, windowing and view-ports, 2-D plotting functions, axes, grids, attributes, polylines, design and editing, general curves and splines, fractals, 2-D transformations, animation methods, file formats and metagraphics commands. Also studied are the operations on dynamic poly objects, set operations on and clipping of general 2D regions, vector fills, raster algorithms, graphics animation with sprites and sprite managers, interactive graphics game design, designing the user interface, co-ordinating sound and motion and 3-D rendering multimedia systems. This unit teaches students the theory and practical laboratory work for the design of editors and tools for generating quality precision graphics.

Prerequisite: CSE2ADS or CSE21ADC or CSE22ADC (from 2009 CSE2ALG).

Recommended Prior Studies: MAT2MCS and CSE2CGT (from 2009 MAT2MFC and CSE2ACG).

Incompatible unit: CSE31GRA, CSE32GRA, CSE41FGR, CSE42FGR, CSE3GRA, CSE4FGR

Class requirements: Two 1-hour lectures and one 2-hour laboratory class for 10 of the 13 weeks of the semester.

Assessment: One 2-hour examination (55%), one programming assignment equivalent to 2000 words (35%), 10 minute weekly laboratory programming tests. (10%)

CSE3IGT INTERMEDIATE GAMES TECHNOLOGY (15 CPs Sem. TE-SEM-2 BU.) Dr John Rankin

Topics covered include: The games specifications document, the game design document format, game architecture, and games assets; Visual Studio .NET versus version 6; Visual C++ Win32 programming versus MFC programming; games development software and tools; the game loop; accessing DirectDraw through the DirectX7 COM interface; DirectDraw and 2D graphics programming using Direct3D; loading backdrops and scrolling backdrops; programming sprites; programming HUD information, programming sound effects and continuous background music, both with GDI+ and Direct Sound; animating sprites; user input processing. Game AI methods contrasted with traditional AI. Game Physics for realistic object motions and interactions. Use of multithreading in games. Case studies of commercial games are also investigated. Students work in teams to develop full working platform games.

Prerequisite: CSE31GRA, CSE3GRA, CSE4FGA (from 2009 CSE3IGR).

Incompatible unit: CSE42FGA, CSE4FGA, CSE3GAM

Class requirements: One 1-hour lecture, one 1-hour workshop and

one 2-hour laboratory class per week.

Assessment: One 1500-word equivalent group programming assignment (40%), one 3-hour examination (55%), laboratory work (5%). To pass this unit, students must pass the laboratory component.

CSE3IMS INTELLIGENT MULTIMEDIA SYSTEMS (15. CPs Sem. TE-SEM-1 BU.) Dr Dianhui Wang

Students without the mathematics prerequisite must see the lecturer for approval to enrol in this unit

In this unit students focus on media coding and content processing, which includes an overview of multimedia systems, multimedia data representation, audio and video technologies, image processing, content-based multimedia information retrieval techniques and fundamentals of data compression techniques. Design issues on content-based image retrieval systems for visual information database will be addressed, which contain image feature extraction, indexing, similarity measure, and lower-bounding lemma and performance evaluations. Practice on content-based multimedia retrieval systems will be offered in Labs. Knowledge on HTML, PHP and MySQL, will be involved in labs as necessary tools to display content-based image retrieval systems.

Prerequisite: CSE2ICC or CSE3ICC or CSE4FIC and MAT1CFN (from 2009 MAT1CNS and CSE2ICE).

Incompatible unit: CSE31MS, CSE32MS, CSE41FMS, CSE42FMS, BUS32MMI, CSE3MS, CSE4FMS

Class requirements: One 2-hour lecture per week and one 2-hour laboratory class per week for 10 of the 13 weeks of the semester.

Assessment: Laboratory work. (5%), one assignment equivalent to 1000 words (25%), one 3-hour examination (70%)

Recommended Reading:

Drozdek, A. *Elements of data compression*. Brooks/Cole, Thomson Learning, 2002.

Li, Z.N. and Drew, M.S., *Fundamentals of multimedia*, Pearson, Prentice Hall, 2004

Steimmetz, R., Nahrstedt, K. *Multimedia fundamental* IMSC Press Multimedia Series, 2002

CSE3INE INTERMEDIATE NETWORK ENGINEERING (15. CPs Sem. TE-SEM-1 BU.) Dr Naveen Chilamkurti

In this unit, students will examine – X.25 networking standard and local area networking standards with emphasis on CSMA/CS techniques and IEEE 802 series of standards, introduction to the MAN/FDDI and ISDN based networks, ATM networks. Routing protocols like ARP/RARP, ICMP, RIP, OSPF, EGP, GEP, and their performance under different operating environments.

Prerequisite: CSE2NET, CSE3NET, CSE4FNT (from 2009 CSE2NEF).

Incompatible unit: CSE3LAN and CSE3PPR, CSE4FPP, CSE4FLN

Class requirements: Two 1-hour lectures and one 2-hour laboratory class per week for 12 weeks.

Assessment: One assignment equivalent to 750 words (15%), one 3-hour examination (70%), one mid-term test equivalent to 500 words (15%)

CSE3MQR METRICS, QUALITY AND RELIABILITY (15 CPs Sem. TE-SEM-1 BU.) Mr Karl Reed

This unit examines what is to be measured and what does the measurement mean. It covers measurement of software quality and complexity and the use of product and process metrics, and reliability issues for software. The use of metrics to improve software quality. Metrics considered include both traditional and Object Oriented metrics, relating to size, complexity, control flow, data flow, re-use coupling, cohesion, and modularity. Design and programming strategies for reliability software. Robustness, recovery techniques, rollback of various levels the relationship between software reliability and database reliability concepts. Reliability estimation, advanced issues in testing, test-based system, and drivers are examined in this unit. A feature of this subject will be research preparation using extensive collections of readings.

Prerequisite: CSE2SDT (from 2009 CSE2STQ).

Incompatible unit: CSE41FSM or CSE3SMM

Class requirements: Two 1-hour lectures and one 2-hour laboratory class per week for 12 weeks.

Assessment: One 1000-word programming assignment (40%), one 3-hour examination (60%)

CSE3NSW NETWORKS SYSTEMS AND WEB SECURITY (15. CPs Sem. TE-SEM-2 BU.) *Dr Ben Soh*

In this unit, students study secret key systems, the role of cryptography in EDP, elementary information theory, redundancy, data-compression, perfect secrecy, and data encryption standard (DES). Communication security and web security, public key cryptosystem, RSA cryptosystems, authentication systems, digital signatures and minimum knowledge user identification. Key management and security protocols are also examined. System security: intruders and viruses; firewalls.

Prerequisite: CSE2NET or CSE3NET or CSE4FNT (from 2009 CSE2NEF).

Incompatible unit: CSE42FNS, CSE3NSS, CSE4FNS

Class requirements: Two 1-hour lectures and one 2-hour practice class per week for 12 of the 13 weeks of the semester.

Assessment: One 3-hour examination (70%), one programming, and/or essay assignment equivalent to 1500 words. (30%)

CSE3OAD OBJECT-ORIENTED APPLICATION DEVELOPMENT (15 CPs Sem. TE-SEM-2 BE, BU.) *BE: Ms Mary Martin, BU: Dr Julie Main, BU: Dr Kinh Nguyen*

Students are introduced to advanced application development in Java. Topics covered include design patterns, event-driven programming, and graphical user interfaces (layout management, GUI components), applets, multithreading, socket programming, and various build utilities.

Prerequisite: CSE1IOO or CSE1IPJ or CSE1IJA.

Class requirements: Two 1-hour lectures and one 2-hour laboratory class per week for 12 weeks.

Assessment: One computer-programming assignment equivalent to 1000 words (30%), one 3-hour examination (70%). In order to pass the unit students must obtain an overall pass grade, obtain at least 45% in the examination, and pass the non-examination component.

CSE3OSS OPERATING SYSTEMS (15. CPs Sem. TE-SEM-2 BU.) *Dr Zhen He*

This unit has the following main goals: 1) understanding key operating system concepts and algorithms and their realization in several different modern operating systems; 2) applying those concepts and algorithms to write high performance concurrent programs. The operating systems studied include Windows XP, Linux, and operating systems for small devices such as PDA and mobile phones. The following key concepts will be covered: concurrency, advanced memory management, advanced file systems implementation, security, and operating systems issues for small devices. Some introductory compiler construction techniques will also be covered.

Prerequisite: CSE2ADS or CSE4FAS, and CSE1SYS (from 2009 CSE1CPP or CSE1CES and CSE2ALG).

Incompatible unit: CSE3OS, CSE4FOS

Class requirements: One 2-hour lecture for 12 weeks of the semester and one 2-hour laboratory class for 8 weeks of the semester.

Assessment: One 3-hour end of semester examination (70%), one programming assignment equivalent to 1000 words (20%), weekly laboratory work (10%)

CSE3PE PROFESSIONAL ENVIRONMENT (15. CPs Sem. TE-SEM-1 BE, TE-SEM-2 BE, BU.) *Dr Lorraine Staehr*

In this unit, students are introduced to the professional aspects of practising in the computing field, ethical and legal responsibilities of computing professionals, and are encouraged to consider the social implications of their work.

Prerequisite: Bendigo campus: Graduate Diploma students: permission of the coordinator – undergraduate students: for final year computing students only. Bundoora campus: no prerequisites required.

Incompatible unit: INT3PE, MGT2BCO, CSE2COM

Class requirements: One 3-hour session per week incorporating lectures, seminars and tutorials.

Assessment: Two 1000-word essays (each 25%) and two 10-minute presentations based on the essays (50%) To pass the unit, students must attempt all assessments, and must obtain an overall mark of at

least 50%., two 500-word equivalent assignments (each 15%) (30%), one 500-word equivalent reflective diary (10%), class participation (10%). Contributions to class discussions are noted

CSE3PRA SOFTWARE ENGINEERING PROJECT A (15 CPs Sem. TE-SEM-1 BU.) *Dr Torab Torabi*

This unit of study represents the first semester of a year long program. Students MUST complete both CSE3PRA and CSE3PRB in one academic year. All students must complete a 'Team Formation' form and submit this to the unit coordinator before the University closure date of the previous year. Deadline for enrolment in this unit is seven days prior to commencement of term.

The software engineering project enables students to experience real-life involvement in the planning and development of a medium sized software project. It utilises a teamwork approach to software engineering and integrates previously learned skills and knowledge relating to technical, social, and ethical issues. This unit covers project management, team organisation and communication, project estimation and planning, documentation and reporting and milestone presentation. Project teams must be finalised by the first week of the semester. The project is completed over the whole year, students will receive an X grade for CSE3PRA and must enrol in CSE3PRB in order to complete and receive a mark for this unit.

Prerequisite: CSE2ADS, CSE2DB or CSE3DB (from 2009 CSE2ALG and CSE2DES).

Co-requisite: CSE3SDM.

Incompatible unit: CSE30PRJ, CSE32PRO, BUS32EBS, CSE40PRJ, CSE41PRA, CSE42PRB, CSE42PRO

Class requirements: Two 1-hour lectures/workshop and one 2-hour laboratory class and project meeting for 12 weeks. Additional visiting lectures, site visits, and project supervision sessions are scheduled throughout the year.

This unit is not available for study abroad students.

Assessment: One 1-hour examination (25%) Hurdle requirement: Project Management Class Exercise, one team software engineering project (approx 7000 words per student) (75%). Complete details can be found in the Department of Computer Science Software Engineering Project Handbook. The assessment components listed are the combined assessment for CSE31PRA and CSE32PRB

CSE3PRB SOFTWARE ENGINEERING PROJECT B (15 CPs Sem. TE-SEM-1 BU.) *Dr Torab Torabi*

This unit of study represents the second semester of a year long program. Students MUST complete both CSE3PRA and CSE3PRB in the one academic year. Deadline for enrolment in this unit is seven days prior to commencement of first term.

The software engineering project enables students to experience real-life involvement in the planning and development of a medium sized team-based project. It utilises a teamwork approach to software engineering and integrates previously learned skills and knowledge relating to social and ethical issues. This unit follows on from CSE3PRA and covers project management, team organisation and communication, implementation, testing, integration, re-use, configuration management, user and system documentation, reporting, milestone and final presentation. The project is completed over the whole year – students will receive an X grade for CSE3PRA and must enrol in this unit in order to complete and receive a mark for the project.

Prerequisite: CSE3PRA.

Incompatible unit: CSE30PRJ, CSE32PRO, CSE40PRJ, CSE41PRA, CSE42PRB, CSE42PRO

Class requirements: Two 1-hour lectures/workshop and one 2-hour laboratory class and project meeting per week for 12 weeks. Additional visiting lectures, site visits, and project supervision sessions are scheduled throughout the year.

This unit is not available for study abroad students.

Assessment: One 1-hour examination (25%) Hurdle requirement: One Project Implementation Exercise, one team software engineering project (approx 7000 words per student) (75%). Complete details can be found in the Department of Computer Science Software Engineering Project Handbook. The assessment components listed are the combined assessment for CSE3PRA and CSE3PRB.

CSE3PRG PROGRAMMING PROJECT (30. CPs Sem. TE-SEM-2 BU.) *Dr John Rankin*

The programming project focuses on developing students skills in teamwork software design, implementation, testing and documentation. Students learn to design software for portability and re-use, as well as to take advantage of system utilities and standard libraries. The programming projects require students to work in small programming teams and result in the development of a small-scale industry-based software system. The laboratory work is designed to bring programmers, no matter what their previous programming language is, up to speed in good C++ programming skills and a working knowledge of Windows programming sufficient for industrial-type programming projects and integrates previously learned skills and knowledge relating to social and ethical issues.

Prerequisite: CSE21ADC or CSE22ADC or CSE21ADS or CSE22ADS or CSE2ADS (from 2009 CSE2DES and CSE2ALG)

Incompatible unit: CSE30PRJ, CSE31PRA, CSE32PRB, CSE40PRJ, CSE41PRA, CSE42PRB, CSE42PRO, CSE3PRO, CSE4PRO

Class requirements: Two 1-hour lectures, one 2-hour Windows programming laboratory class, one 2-hour project design laboratory class, one 1-hour group consulting session and one 1-hour problem-solving class per week for 12 weeks of the semester. A one 2-hour C++ refresher programming laboratory class also runs for 4 weeks. During the laboratory classes, students will learn fourth generation language programming which is required for their projects.

Assessment: Weekly laboratory work equivalent to 1000 words (10%), one 2-hour examination (30%), one 2000-word equivalent programming assignment – Project Part A (30%), one 1500-word equivalent programming assignment – Project Part B (20%), weekly tutorial tests equivalent to 1000 words (10%)

CSE3SDM SYSTEM DESIGN AND METHODOLOGIES (15 CPs Sem. TE-SEM-1 BU.) *Dr Seng Loke*

Topic covered in this unit include: Use Case analysis, UML design, User Interface and database design, design re-use, system architectures, Attribute-Driven Architectural Design, Architectural Styles and Patterns, Documenting Software Architectures (and Architecture Description Languages) Analysing Software Architectures, implementation, testing, integration, Software Product Lines, Service-oriented Architectures.

Prerequisite: CSE2SDT (from 2009 CSE2DES).

Incompatible unit: CSE4SAR, CSE4SPM

Class requirements: Two 1-hour lectures and one 2-hour laboratory class per week for 12 weeks.

Assessment: One engineering project equivalent to 1000 words (20%) This assessment task will be completed in a controlled laboratory class, one 3-hour examination (70%), and one 500-word programming assignment (10%)

CSE3TRA TRANSITIONAL UNIT A (5.0 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Ben Soh*

This unit is only available to students enrolled in a Computer Science, Computer Systems Engineering, or Information Systems degree, who require five credit points to complete their degree requirements.

In this unit, students undertake work from an existing computer science unit. The Department of Computer Science and Computer Engineering will provide a list of available units from which students will make their choice. Final approval of unit choices will be given within the Department. There is no examination component in the unit, submission of the assignment will complete the unit requirements.

Prerequisite: Requires Coordinator's approval/or Departmental approval.

Class requirements: Lectures and labs, as required for the unit being undertaken, until the assignment due date.

This unit is not available for study abroad students.

Assessment: Assignments equivalent to 1250 words (100%)

CSE3TRB TRANSITIONAL UNIT B (5.0 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Ben Soh*

This unit is only available to students enrolled in a Computer Science, Computer Systems Engineering, or Information Systems degree, who require five credit points to complete their degree requirements.

In this unit, students undertake work from an existing computer science unit. The Department of Computer Science and Computer Engineering will provide a list of available units from which students will make their choice. Final approval of unit choices will be given within the Department. There is no examination component in the unit, submission of the assignment will complete the unit requirements.

Prerequisite: Requires Coordinator's approval/or Department approval.

Class requirements: Lectures and labs, as required for the unit being undertaken, until the assignment due date.

This unit is not available for study abroad students.

Assessment: Assignments equivalent to 1250 words (100%)

CSE3WAE WEB APPLICATIONS ENGINEERING (15 CPs Sem. TE-SEM-2 BU.) *Dr Hongen Lu*

Topics in this unit include servlet fundamentals and overview of Java servlet; Java servlet architecture, JSP, JavaBeans, Enterprise JavaBeans properties, traditional session tracking techniques, servlet session tracking API, web application architecture and development.

Prerequisite: CSE2ICC or CSE3ICC and CSE1IPJ or CSE1IJA (from 2009 CSE2ICE and CSE1IOO).

Incompatible unit: CSE42FCS, CSE4FCS, CSE3ICS

Class requirements: One 2-hour lecture and one 2-hour laboratory class per week.

Assessment: One programming assignment equivalent to 1000 words (40%), one 3-hour examination (60%)

CSE4ADB ADVANCED DATABASES (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BE.) *Mr Noel McEwan, Dr Wenny Rahayu*

The concepts and implementations of next generation databases – object-oriented databases and object-relational databases are covered. Building a data warehouse, structuring and implementing OLAP (On-Line Analytical Processing) queries. Implementation of a Web/Internet database, XML database design and implementation, XPath and XQuery. Setting-up a Web database application, building a web database system that meets a system specification and implementation of the system on a selected commercial DBMS such as ORACLE10g application server.

Prerequisite: CSE21DB or CSE31DB or CSE41FDB.

Class requirements: One 2-hour lecture and one 2-hour laboratory per week.

Assessment: One 3-hour examination (65%), one programming assignment equivalent to 1500 words. (30%), one class test (5%)

CSE4AGR ADVANCED GRAPHICS (15. CPs Sem. TE-SEM-1 BE. TE-SEM-2 BU.) *BE: Dr Chris Cope, BU: Dr Richard Hall*

In this unit, studies will be focused on covering the theory and practice of advanced 3D graphics. The unit covers such topics as ray casting, local illumination, transformations, texture mapping, and Monte Carlo ray tracing. The laboratories will include exercises using popular 3D APIs such as OpenGL and Direct 3D.

Incompatible unit: CSE41AGR

Class requirements: One 2-hour lecture and one 3-hour laboratory class per week for 10 of the 13 weeks of the semester.

Assessment: One 3-hour examination (60%), one programming assignment equivalent to 1500 words. (30%), laboratory work. (10%)

CSE4AGT ADVANCED GAMES PROGRAMMING TECHNOLOGY (15 CPs Sem. TE-SEM-1 BU.) *Dr John Rankin*

Topics covered include games types, variety of games, team development skills, programming languages, platforms, console programming, target audience considerations, graphics theory, AI theory for games, games programmers' graphics techniques, digital artwork, animation and audio resources, games architecture, games design, packagings and development, games evaluation, sample case histories. Application of Direct X, Direct sound and Direct 3D programming to games. 3D meshes, 3D game worlds, and 3D programming considerations are also covered.

Prerequisite: CSE31GRA or CSE41FGR.

Class requirements: One 1-hour lecture, one 1-hour workshop and one 3-hour laboratory class per week.

Assessment: One programming assignment (equiv to 2500 words) (60%), one 2-hour examination (40%)

CSE4AQR ADVANCED QUALITY AND RELIABILITY (15. CPs Sem. TE-SEM-2 BU.) *Dr Torab Torabi*

Factors influencing software quality, standards for software quality assurance, Software Quality Models: six sigma, experience factory, Capability Maturity Model, measures of quality, error rates, models of failure, probabilistic models, concept of a measurement environment for quality, design of experiments for quality measurement, use of metrics in quality control, reliability issues, robustness, design strategies for reliable software, N-version programming, merits and demerits, recovery techniques, roll-back of various levels the relationship between software reliability and database, reliability estimation, advanced issues in testing, test-based system and drivers are examined in this unit.

Prerequisite: CSE3SMM (from 2009 CSE3MQR).

Incompatible unit: CSE4SQR

Class requirements: One 2-hour lecture and one 2-hour laboratory class per week.

Assessment: One 3-hour examination (60%), one programming assignment equivalent to 1500 words. (40%)

CSE4ASD ADVANCED SYSTEM DESIGN (15 CPs Sem. TE-SEM-1 BU.) *Dr Seng Loke*

This unit covers advanced topics in design including but not limited to (1) Aspect-Oriented Programming: cross-cutting concerns and design, aspects in object-oriented software, (2) Design patterns: pattern taxonomy — creational, structural and behavioural patterns, design pattern catalogues: e.g., Gamma et al. patterns, synergy between patterns, pattern application — anti-patterns and tool support, language-specific patterns. (3) Autonomic systems: introduction to self-management and adaptive middleware, issues in self-management, self-* properties, business drivers, approaches to modelling and software engineering for self-management.

Prerequisite: CSE4SAR, CSE4SPM (from 2009 CSE3SDM).

Class requirements: Two 1-hour lectures and one 2-hour laboratory class per week for 12 weeks.

Assessment: One programming assignment equivalent to 1500 words (40%), one 3-hour examination (60%)

CSE4AT1 ADVANCED TOPICS IN COMPUTER SCIENCE 1 (15. CPs Sem. TE-SEM-1 BE, BU. TE-SEM-2 BU.) *Dr Chris Cope*

This unit is offered from time-to-time as a seminar series. The majority of the seminars are conducted by external experts with an international reputation. Students should contact the department of Computer Science and Computer Engineering to confirm which topics will be available.

Class requirements: One 2-hour lecture and one 3-hour laboratory per week for 10 of the 13 weeks of semester.

This unit is not available for study abroad students.

Assessment: One 3-hour examination (70%), one assignment equivalent to 1500 words. (30%)

CSE4AT2 ADVANCED TOPICS IN COMPUTER SCIENCE 2 (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BE, BU.) *Dr Chris Cope*

This unit is offered from time-to-time as a seminar series. The majority of the seminars are conducted by external experts with an international reputation. Students should contact the department of Computer Science and Computer Engineering to confirm which topics will be available.

Incompatible unit: HUS20LBD/30LBD.

Quota: 50.

Class requirements: One 2-hour lecture and one 3-hour laboratory class per week for 10 of the 13 weeks of the semester.

Assessment: One 3-hour examination (60%), one assignment equivalent to 1500 words. (40%)

CSE4BIE BUSINESS INTELLIGENCE ENGINEERING (15. CPs Sem. TE-SEM-2 BU.) *Dr Jinli Cao*

Business Intelligence is an area of great interest to students in light of the huge job growth in the industry and its wide applicability to

numerous fields. The unit introduces engineering for business intelligence (BI) including the fundamental terms, concepts and practice associated issues. It also explores the role and values of business intelligence in supporting organisation goals. It presents a systematic guide for the entire BI project lifecycle. It covers engineering stages for business justification, infrastructure evaluation, BI project planning, business data analysis and modelling, application prototyping, data warehousing, extract/transform/load design and development, application implementation and evaluation. The unit also demonstrates how Dashboard, Business Scorecard, and Online Analytical Processing (OLAP) are used in the real world to support executives and business decision makers. The web services issues related to business intelligence are also explored.

Prerequisite: CSE2DB, CSE3DB or CSE4FDP (from 2009 CSE2DBF).

Class requirements: Two 1-hour lectures and one 2-hour laboratory class per week.

Assessment: One 1500-word programming assignment (30%), one 3-hour examination, (70%)

CSE4CPA MAJOR COMPUTER ENGINEERING PROJECT A (15 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Wenny Rahayu*

This unit represents the first semester of a two-semester program. This project is only available to students enrolled in the Bachelor of Computer Systems Engineering, Bachelor of Software Engineering, or Bachelor of Computer Network Engineering.

Students undertake a project that takes the equivalent of eight or nine months of continuous work under the supervision of a member of staff. Students are required to develop a major piece of software based on a set of user requirements. There will be two major milestones in this project. (1) Students are required to define a complete technical requirement and specification report. (2) The development and implementation of the system.

Prerequisite: Requires coordinator's approval.

Class requirements: Supervised research under the direction of a member of staff equivalent to five hours per week.

This unit is not available for study abroad students.

Assessment: First semester of enrolment: requirement definition and specification report, equivalent to 3000 words (25%), second semester of enrolment: software implementation, including documentation, equivalent to 10,500 words (75%)

CSE4CPB MAJOR COMPUTER ENGINEERING PROJECT B (30 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Wenny Rahayu*

This unit represents the second semester of a two-semester program. This project is only available to students enrolled in the Bachelor of Computer Systems Engineering, Bachelor of Software Engineering, or Bachelor of Computer Network Engineering.

Students undertake a project that takes the equivalent of eight or nine months of continuous work under the supervision of a member of staff. Students are required to develop a major piece of software based on a set of user requirements. There will be two major milestones in this project. (1) Students are required to define a complete technical requirement and specification report. (2) The development and implementation of the system.

Prerequisite: Requires coordinator's approval.

Class requirements: Supervised research under the direction of a member of staff equivalent to five hours per week.

This unit is not available for study abroad students.

Assessment: First semester of enrolment: requirement definition and specification report, equivalent to 3000 words (25%), Second semester of enrolment: software implementation, including documentation, equivalent to 10,500 words (75%)

CSE4CPE COMMUNICATION PROTOCOL ENGINEERING (15. CPs Sem. TE-SEM-2 BU.) *Dr Richard Lai*

Topics covered in this unit are Communication protocol development methodology, communication modelling and analysis, protocol verification, conformance testing, test architecture, types of test cases, test suite design, test notation TTCN, formal specifications, Formal Description Techniques, Extended Finite State Machine, Numerical Petri Nets, Coloured Petri Nets, reachability analysis, verification methodology, protocol properties, verification tool, Protocol

performance analysis, performance analysis tools, performance index.

Prerequisite: CSE2NET or CSE3NET or CSE4FN4 (from 2009 CSE2NEF).

Incompatible unit: CSE42PNE, CSE4PNE

Class requirements: Two 1-hour lectures and one 2-hour laboratory class per week, one 1-hour consulting session.

Assessment: One 3-hour examination (70%), one problem solving assignment equivalent to 1500 words. (30%)

CSE4DIR DIRECTED STUDY (15. CPs Sem. TE-SEM-1 BE, BU, TE-SEM-2 BE, BU.) *BE: Dr Chris Cope, BU: Dr Wenny Rahayu*

This is a unit, which enables students to carry out independent study supervised by a member of staff. Enrolment requires the approval of the supervising member of staff in the Department of Computer Science and Computer Engineering and the Head of Department.

Class requirements: Supervised research under the direction of a member of staff equivalent to four-hours of class contact per week. This unit is not available for study abroad students.

Assessment: One 4000-word technical report or equivalent (100%)

CSE4DIS DISTRIBUTED COMPUTING (15. CPs Sem. TE-SEM-1 BE, BU.) *BE:*

Dr Chris Cope, BU: Dr Samar Singh

Not available in 2008

CSE4DMI DATA MINING (15. CPs Sem. TE-SEM-2 BE, BU.) *BE: Dr Chris Cope, BU: Dr Dianhui Wang*

Data Mining refers to various techniques, which can be used to uncover hidden information from a database. The data to be mined may be complex data including multimedia, spatial and temporal. Data Mining has evolved from several areas including databases, artificial intelligence, algorithms, information retrieval, and statistics. This unit is designed to provide graduate students with a solid understanding of data mining concepts and tools. The unit covers classification rule extraction, clustering, and association rule mining techniques. Two domain applications, multimedia data mining for visual information retrieval and pattern discovery for bioinformatics, will be addressed in this unit.

Prerequisite: CSE3ISE (from 2009 CSE3CI).

Class requirements: One 2-hour lecture and one 3-hour laboratory class per week.

Assessment: One 3-hour examination (50%), one programming assignment equivalent to 1500 words. (50%)

Recommended Reading:

Dunham, M.H. *Data Mining: introductory and advanced topics*. Prentice-Hall, 2003.

Tan, P.N., Steinbach, M. and Kumar, V. *Introduction to Data Mining* Pearson Education, Inc. 2006

CSE4DSS DECISION SUPPORT SYSTEMS (15. CPs Sem. TE-SEM-1 BU.) *Dr Jinli Cao*

The unit covers the fundamental terms, concepts and theories associated with decision support systems (DSS), computerised decision aids, human decision-making processes, and types of DSS. It explores the role of DSS in supporting organisation goals and the impact of information systems on organisations. It also covers the development skills in analysis, design, and implementation of computerised DSS and data warehousing. The DSS architectures, DSS software tools, various models used in DSS such as static/dynamic models, mathematical models, and optimisation methods are studied. The modelling and analysis with technologies for decision support are detailed. The business intelligence/business analytics and how decision-making can be improved through data manipulation and analytics are examined. The role and the impact of data warehouse with the analysis tools such as OLAP and data mining are discussed.

Prerequisite: CSE3MIS or CSE4FMI.

Incompatible unit: CSE41DSS

Class requirements: One 2-hour lecture and one 2-hour tutorial class per week.

Assessment: One 3-hour examination (70%), one programming assignment equivalent to 1500 words. (30%)

CSE4ENT ENTREPRENEURSHIP IN I.T. (15 CPs Sem. TE-SEM-2 BU.) *Dr*

Mario Davoli

The purpose of this unit is to outline the basic principles of Entrepreneurship. It will examine the steps required in developing an idea into a business, and will explore the tools and necessary insights in order to make a successful venture. The unit will involve theory, case studies, and guest speakers from the I.T. industry on Hi-tech start-up issues, pitfalls, and ingredients for success.

Topics include Introduction to I.T. Entrepreneurship; Negotiation and Leadership Principles; Strategy and Culture; Writing a Business Plan; The Tornado Model; Protecting your I.T. Intellectual Property (Patent, Trademark, and Copyright) and I.T. Assignment Presentations.

Prerequisite: Nil.

Class requirements: One 2-hour lecture per week for ten weeks of the semester and one 3-hour laboratory class per week.

Assessment: One group assignment equivalent to 1500 words (40%), one 3-hour examination (60%)

CSE4MAS MULTI-AGENT SYSTEMS (15 CPs Sem. TE-SEM-1 BU.) *Dr*

Hongen LU

In this unit, students will develop advanced knowledge in – what is an agent; typical application areas for agent systems; architectures for agents; design of intelligent agents, multi-agent interactions, cooperation, negotiation, cooperative distributed problem solving (CDPS) and applications of agent systems.

Prerequisite: CSE1IPJ (from 2009 CSE1IOO).

Class requirements: Two 1-hour lectures and one 3-hour laboratory class per week.

Assessment: One programming assignment equivalent to 1500 words using a Java-based agent platform, such as JACK (40%), one 3-hour examination (60%)

Prescribed Reading:

M, Wooldridge. *An introduction to multi-agent systems* John Wiley & Sons, 2002

CSE4MPC MOBILE AND PERVASIVE COMPUTING (15 CPs Sem. TE-SEM-2 BU.) *Dr Seng Loke*

Six topics are covered in this unit. 1) Context-Aware Computing: location-based systems, services and positioning technologies, location/context dependent queries and service discovery; 2) RFID-Based Systems: technology and standards, software components, system architecture and business applications; 3) Sensing Technologies: programming models for sensors, uses and applications; 4) Smart Spaces: concept, realisation and examples; 5) New Interaction Models: interaction and design, technologies behind the vision of ubiquitous computing and novel user interfaces for embedded and mobile computers; 6) Pervasive Computing and Middleware, Frameworks and Toolkits.

Prerequisite: CSE1OOJ and CSE1IPJ or CSE1IJA and CSE1OJA, CSE2DB or CSE3DB or CSE4FDB and CSE2NET or CSE3NET or CSE4FNT (from 2009 CSE1IOO, CSE2DBF and CSE2NEF.)

Class requirements: Two 1-hour lectures and one 2-hour laboratory class per week.

Assessment: One 3-hour examination (60%), one programming assignment equivalent to 1500 words. (40%)

CSE4PCS PERFORMANCE ANALYSIS OF COMPUTER SYSTEMS (15. CPs Sem. TE-SEM-2 BU.) *Dr Somnath Ghosh*

Topics studied include performance modelling and measurement, probability theory, simulations, Markov models, M/M/I model, and recurrence times, continuous time systems, queuing theory, single queues, discrete time systems, performance indices, Markovian process, non-Markovian systems, networks of queues, mean value analysis, case studies, modelling and measurement tools.

Recommended Prior Studies: STA31PE.

Incompatible unit: CSE41PCS

Class requirements: One 2-hour lecture and one 3-hour laboratory per week.

Assessment: One 3-hour examination (70%), two-programming assignments equivalent to 1500 words. (30%)

CSE4PND PERVASIVE NETWORK DESIGN (15 CPs Sem. TE-SEM-2 BU.) *Dr**Prakash Veeragahavan*

Students will cover key issues in Ad hoc and Sensor network, challenges in designing routing protocols and wireless security, in this unit. The wireless security aspect will look at security in ad hoc and sensor networks, wireless personal area networks, and wireless metropolitan networks.

Prerequisite: CSE21NET or CSE22NET or CSE2NEF or CSE31NET or CSE41FNT or CSE42FNT and CSE32NSS.

Class requirements: One 2-hour lecture and one 2-hour laboratory class per week.

Assessment: One 3-hour examination (75%), one 1-hour mid-term test (25%)

CSE4PRA ADVANCED SOFTWARE ENGINEERING PROJECT A (15 CPsSem. TE-SEM-1 BU.) *Dr Torab Torabi*

The software engineering project enables students to experience real-life involvement in the planning and development of a medium sized software project. It utilises a teamwork approach to software engineering and integrates previously learned skills and knowledge relating to technical, social, and ethical issues. The unit covers project management, team organisation and communication, project estimation and planning, documentation and reporting and milestone presentation. Project teams must be finalised by the first week of term. The project is completed over the whole year, students will receive an X grade for CSE4PRA and must enrol in CSE4PRB in order to complete and receive a mark for this unit.

Prerequisite: CSE1OJA and CSE1IJA or CSE1OOF and CSE1IOO and CSE2DES. Requires coordinator's approval.

Incompatible unit: CSE3PRA and CSE3PRB or CSE3PRO or CSE4PRO or CSE4OPRJ or CSE3OPRJ

Class requirements: Two 1-hour lectures/workshop and one 2-hour laboratory class and project meeting per week for 12 weeks. Additional visiting lectures, site visits, and project supervision sessions are scheduled throughout the year.

This unit is not available for study abroad students.

Assessment: One 1-hour examination (25%) Hurdle requirement: Project Management Class Exercise, one team software engineering project (approx 7000 words per student) (75%). Complete details can be found in the Department of Computer Science Software Engineering Project Handbook. The assessment components listed are the combined assessment for CSE4PRA and CSE4PRB

CSE4PRB ADVANCED SOFTWARE ENGINEERING PROJECT B (15 CPsSem. TE-SEM-1 BU.) *Dr Torab Torabi*

The software engineering project enables students to experience real-life involvement in the planning and development of a medium-sized team-based project. It utilises a teamwork approach to software engineering and integrates previously learned skills and knowledge relating to social and ethical issues. This unit follows on from CSE4PRA and covers project management, team organisation and communication, implementation, testing integration, re-use, configuration management, user and system documentation, reporting, milestone and final presentation. The project is completed over the whole year, students will receive an X grade for CSE4PRA and must complete this unit in order to complete and receive a mark for the project.

Prerequisite: CSE4PRA.

Incompatible unit: CSE3PRA and CSE3PRB or CSE3PRO or CSE4PRO, CSE4OPRJ or CSE3OPRJ

Class requirements: Two 1-hour lectures/workshops and one 2-hour laboratory class and project meeting per week for 12 weeks. Additional visiting lectures, site visits, and project supervision sessions are scheduled throughout the year.

This unit is not available for study abroad students.

Assessment: One 1-hour examination (25%) Hurdle requirement: One Project Implementation Class Exercise, one team software engineering project (approx 7000 words per student) (75%). Complete details can be found in the Department of Computer Science Software Engineering Project Handbook. The assessment components listed are the combined assessment for CSE31PRA and CSE32PRB

CSE4PRN PATTERN RECOGNITION (15. CPs Sem. TE-SEM-1 BU.) *Dr**Andrew Skabar*

This unit provides students with advanced knowledge in neural networks and related pattern recognition techniques. Main topics include: introduction to pattern recognition; discriminative versus generative approaches; multilayer perceptrons; radial basis function networks; support vector machines; mixture models and the Expectation-Maximisation algorithm; Bayesian methods; support vector machines, and Kohonen Networks. Case studies in bioinformatics and document categorization are included. Assignments offer students a sufficiently large space to explore neural networks and related pattern recognition techniques in terms of both theoretical issues and applications in the real world.

Prerequisite: CSE3ISE (from 2009 CSE3CI).

Incompatible unit: CSE4NN

Class requirements: Two 1-hour lectures and one 2-hour laboratory class per week, one 1-hour consulting session.

Assessment: One 3-hour examination (70%), one programming assignment equivalent to 1500 words. (30%)

CSE4RFS REAL-TIME AND FAULT-TOLERANT SYSTEMS (15. CPs Sem. TE-SEM-1 BU.) *Dr Ben Soh*

This unit examines the concept of fault, error, failure, layered machines, classification of faults, provision of static and dynamic redundancy, hardware, software, time and information redundancy, N-version and roll-back and recovery methods, concepts of local and global clocks, time validity of information, real time systems and networks.

Prerequisite: CSE3OS (from 2009 CSE3OSS).

Class requirements: One 2-hour lecture and one 3-hour laboratory per week.

Assessment: One 3-hour examination (70%), one programming, and/or essay assignment equivalent to 1500 words. (30%)

CSE4THA THESIS A (30. CPs Sem. TE-SEM-1 BE, BU. TE-SEM-2 BE, BU.) *BE:**Dr Chris Cope, BU: Dr Wenny Rahayu*

The thesis is available to students enrolled in fourth year programs offered by the Department of Computer Science and Computer Engineering. The thesis is also available to Masters students who do not wish to undertake the major 90 credit point thesis. This unit together with CSE4THB must be completed consecutively over two semesters

Students undertake a project, across both CSE4THA and CSE4THB, which takes the equivalent of eight or nine months of continuous work under the supervision of a member of staff. Each project is written up as a minor thesis with all students presenting a seminar on their topic. A literature survey is required at the end of the first semester of enrolment as well as five small research-based exercises, which are a hurdle requirement for the unit. A list of prospective thesis topics is available from the Department of Computer Science and Computer Engineering.

Class requirements: One 1-hour lecture per week for 12 weeks of the semester. Supervised research under the direction of a member of staff equivalent to five-hours per week.

This unit is not available for study abroad students.

Assessment: Literature survey including a problem definition equivalent to 5000 words (25%) First semester: students submit the literature survey and the research-based exercises (which are a hurdle requirement), one-thesis equivalent to 10,000 words (60%), and one 30-minute oral presentation (5%). Second semester: students submit the 10,000-word thesis and deliver their oral presentation. , One research paper equivalent to 2000 words (10%). The assessment components listed are the combined assessment for CSE4THA and CSE4THB. A final grade will be awarded on CSE4THB.

CSE4THB THESIS B (30. CPs Sem. TE-SEM-1 BE, BU. TE-SEM-2 BE, BU.) *BE:**Dr Chris Cope, BU: Dr Wenny Rahayu*

This thesis is available to students enrolled in fourth year programs offered by the Department of Computer Science and Computer Engineering. The thesis is also available to Masters students who do not wish to undertake the major 90 credit point thesis. This unit together with CSE4THA must be completed consecutively over two semesters

Students undertake a project, across both CSE4THB and CSE4THC, which takes the equivalent of eight or nine months of continuous work under the supervision of a member of staff. Each project is written up as a minor thesis, with all students presenting a seminar on their topic. A literature survey is required at the end of the first semester of enrolment as well as five small research-based exercises, which are a hurdle requirement. A list of prospective thesis topics is available from the Department of Computer Science and Computer Engineering.

Class requirements: Supervised research under the direction of a member of staff equivalent to five-hours per week.

This unit is not available for study abroad students.

Assessment: Literature survey including a problem definition equivalent to 5000 words (25%) First semester: students submit the literature survey and the five research-based exercises (hurdle requirement), one-thesis equivalent to 10,000 words (60%), and one 30-minute oral presentation (5%). Second semester: students submit the 10,000-word thesis and deliver their oral presentation. One research paper equivalent to 2000 words (10%). The assessment components listed are the combined assessment for CSE4THA and CSE4THB. The final grade will be awarded on CSE4THB

CSE4WNE WIRELESS NETWORK ENGINEERING (15 CPs Sem. TE-SEM-2 BU.) *Dr Somnath Ghosh*

Topics covered in this unit include: basic cellular architecture for mobile phones and extensions, basic ideas of technology at the PHY level, MAC layer issues and techniques, overview of current mobile systems and standards and possible evolution paths, interaction with/connection-to wired internet, further issues relating to QoS guarantees, wireless LANs and MANs, ad-hoc mobile networks (MANETs) and security issues.

Prerequisite: CSE2NET or CSE3NET or CSE4FNT (from 2009 CSE2NEF).

Recommended Prior Studies: CSE3PPR or CSE4FPP.

Incompatible unit: CSE41WIR, CSE42WIR, CSE4WIR

Class requirements: One 2-hour lecture and one 3-hour laboratory per week.

Assessment: One 3-hour examination (75%), one 1-hour written mid-term test (25%)

CSE4WSE WEB SERVICES ENGINEERING (15. CPs Sem. TE-SEM-1 BU.) *Dr Kinh Nguyen*

In this unit, students are taught concepts, principles, and implementations of Web Services. Contents of the unit include models, standards and mechanisms of web services; enterprise architectures; supply chains; ePayment mechanisms; semantic web and ontology; security requirements and mechanisms; and implementation tools. By taking this unit students will have a general understanding of the area and should gain the knowledge and skills to design and implement a service-oriented web application.

Prerequisite: CSE3ICS (from 2009 CSE3WAE).

Incompatible unit: CSE4ENC and CSE4ECS

Class requirements: One 2-hour lecture and one 2-hour laboratory per week.

Assessment: One programming assignment equivalent to 1500 words (30%), one 3-hour examination, (70%). In order to pass the unit, students must obtain an overall pass grade, pass the examination, and pass the non-examination component.

ELE1CCT BASIC ELECTRONIC CIRCUITS (15. CPs Sem. TE-SEM-2 BU.) *Dr David Tay*

This unit builds on the material introduced in ELE1IEL and serves as a sound background for continuing studies in this discipline. This unit consists of two components, AC circuit analysis, and Analog electronics. The first component covers sinusoidal and non-sinusoidal waveforms, phasors, impedance, network theorems applied to AC circuits, measurement systems and instruments. The second component covers amplifier concepts, operational amplifiers, transistor models, and transistor amplifiers. All students will be required to sit for both components.

Recommended Prior Studies: ELE1IEL.

Class requirements: Three 1-hour lectures, one 1-hour problem class and an average of two hours laboratory class work per week.

Assessment: One 3-hour examination (70%), laboratory work equivalent to 1000 words (20%), assignments equivalent to 500 words (10%). In order to pass the unit students must obtain an overall pass grade, pass the examination, and pass the practical work.

Prescribed Reading:

Boylstad, R.L. *Introductory circuit analysis*, 9th edn, Merrill, 2000.
Sedra, A.S and Smith, K.C. *Microelectronic circuits*, 5th edn, Oxford University Press, 2004.

ELE1EDP ELECTRONIC ENGINEERING DESIGN PROJECT (15. CPs Sem. TE-SEM-2 BU.) *Mr Geoff Tobin*

The basics of the electronic engineering design and the process of design management and engineering professionalism are covered. The unit includes an introduction to project management and students gain hands-on experience by participating in the design and construction of a small electronic system. Students learn to generate circuit schematics and layouts in line with Australian and International standards. It will involve a discussion of issues relevant to engineers through the development of written and oral communication skills. The course includes mandatory lectures on professional ethics and conduct.

Recommended Prior Studies: A basic knowledge of Electronics, such as that covered in ELE1IEL.

Class requirements: Three 1-hour lectures, two hours of laboratory work and one 1-hour tutorial per week.

Assessment: One 2-hour examination (40%), assignment equivalent to 500-word (10%), laboratory work (approx 2000 words) (50%). In order to pass the unit students must obtain an overall pass grade, pass the examination, pass the project, and pass the laboratory work.

Prescribed Reading:

Australian Standard 1000, 1102 and 1103. Standards Association of Australia.

Tocci, R. J. and Widmer, N. S., *Digital systems, principles and applications*, 8th edn, Prentice-Hall, 2001.

ELE1IEL INTRODUCTORY ELECTRONICS (15. CPs Sem. TE-SEM-1 BU.) *Dr Brian Usher*

This introductory unit assumes no prior knowledge of electronics. The unit consists of two components. The first component is DC Circuit Analysis and Semiconductors, including basic electrical quantities and circuits, methods of analysing simple circuits and basic semiconductor theory including simple diode and transistor circuits. The second component, Introduction to Digital Electronics, covers Boolean algebra, binary number systems, logic gates, combinational circuits, sequential circuits, flip-flops, counters, registers, and arithmetic circuits.

Class requirements: Three 1-hour lectures, one 1-hour tutorial and an average of two hours laboratory class work per week.

Assessment: One 3-hour examination (70%), laboratory work (approx 1000 words) (20%), assignments (approx 500 words) (10%). In order to pass the unit students must obtain an overall pass grade, pass the examination, and pass the practical work.

Prescribed Reading:

Tocci, R. J. and Widmer, N. S., *Digital systems, principles and applications*, 7th edn, Prentice-Hall, 1998.

Boylstad, R. L. *Introductory circuit analysis*, 9th edn, Merrill, 2000.

ELE2ANI ANALOG CIRCUITS AND INTERFACING (15. CPs Sem. TE-SEM-2 BU.) *Mr Graeme Rathbone*

Students study semiconductor device theory, device ratings, and models for BJT, FET and MOST devices. Digital structures, device biasing and operating point analysis, small signal transistor amplifier design and analysis, frequency response of simple amplifiers; gain-bandwidth product, feedback and feedback topologies, input and output resistance, frequency response with feedback. Differential amplifier configurations, common and differential mode gain and common mode rejection ratio, current sources and operational amplifiers. Active filters, including normalised filter specification and scaling, the Sallen/Key circuit, Butterworth and Chebyshev filters and low-pass to high-pass transformations. Power semiconductors' thermal performance and safe operating area.

Prerequisite: ELE1CCT and MAT1CLA.

Recommended Prior Studies: MAT2VCA (previously MAT2AVC).

Incompatible unit: ELE2ACI.

Class requirements: Two 1-hour lectures, three hours of laboratory work and one 1-hour tutorial per week.

Assessment: One 2-hour examination (60%), laboratory work (approx 1500 words) (30%), assignments (approx 500-word equivalent) (10%). In order to pass the unit students must obtain an overall pass grade, pass the examination, and pass the practical work.

Prescribed Reading:

Sedra, A. S. and Smith, K. C. *Microelectronic circuits*, Oxford University Press, 5th edn, 2004.

ELE2CIR LINEAR CIRCUITS AND SIGNALS (15. CPs Sem. TE-SEM-1 BU.) *Dr Brian Usher*

Topics in this unit include methods of circuit analysis, time domain analysis of linear time-invariant networks, DC circuit analysis, steady-state AC analysis and phasor techniques, network parameters, resonant circuits, transient analysis, the state-space approach and definition of the Laplace transform. Also studied are transfer functions, poles and zeros, pole-zero plots in the s-plane, characteristics of the s-plane, stability in the s-plane and Bode plots. Frequency response of circuits and analysis and design of passive filters is introduced, as are analysis techniques applicable to 2-port networks.

Prerequisite: ELE1CCT and MAT1FEN (from 2009 ELE1CCT and MAT1CLA).

Co-requisite: MAT2AVC (from 2009 MAT2VCA).

Incompatible unit: ELE2LIN.

Class requirements: Two 1-hour lectures per week, three hours laboratory work per week, and one 1-hour tutorial per week.

Assessment: One 2-hour examination (60%), laboratory work (approx 1500 words) (30%), assignments (approx 500 words) (10%). In order to pass the subject students must obtain an overall pass grade, pass the examination, and pass the practical work.

Prescribed Reading:

Carlson, A.B. *Circuits. Engineering concepts and analysis of linear electric circuits*, Brooks/Cole 2000.

ELE2DDP DIGITAL DESIGN WITH PROGRAMMABLE LOGIC (15. CPs Sem. TE-SEM-2 BU.) *Mr Darrell Elton*

This unit is only available to students enrolled in degrees offered through the Department of Computer Science and Computer Engineering

This unit introduces programmable logic and VHDL. A strong emphasis is placed on reliable synchronous design. A modular, reusable approach is encouraged. A strong emphasis is placed on demonstrated, working hardware implementations in the weekly laboratory sessions using a Xilinx CPLD and ISE software.

Prerequisite: ELE1IEL and ELE1EDP.

Incompatible unit: ELE2DSD.

Class requirements: Two 1-hour lectures and four hours of laboratory work per week.

Assessment: One 2-hour examination (60%), laboratory work 1500-word equivalent) (30%), assignments (approx 500 words) (10%). In order to pass the unit students must obtain an overall pass grade, pass the examination, and pass the practical work.

Prescribed Reading:

Skahill, K. *VHDL for Programmable logic*, Addison-Wesley, 1996.

ELE2ELE ELECTRICAL SYSTEMS AND DESIGN (15. CPs Sem. TE-SEM-1 BU.) *Mr Jim Royston*

In this unit, students will focus on electrical power, including magnetic circuits and transformers, DC and AC machines, three-phase electricity, stepper motors, power electronics, rectifiers and inverters, and power generation and distribution. Also studied is simulation and design with Altium software.

Prerequisite: ELE1CCT.

Co-requisite: ELE2CIR (previously ELE2LIN).

Incompatible unit: ELE2ESD.

Class requirements: Two 1-hour lectures, 3 hours of laboratory work and one hour of tutorials per week.

Assessment: One 2-hour examination (60%), laboratory work (approx 1500 words) (30%), assignments (approx 500 words) (10%). In order to pass the unit students must obtain an overall pass grade, pass the examination, and pass the practical work.

Prescribed Reading:

Wildi, T. *Electrical machines, drives, and power systems*, 6th edn. Prentice Hall International, 2006.

ELE2MDD MICROPROCESSORS AND DIGITAL DESIGN (15. CPs Sem. TE-SEM-1 BU.) *Professor John Devlin*

In this unit, students are introduced to microprocessors and embedded processors. An overview of the internal structure of processors is combined with interfacing to memory and other external logic and circuits. Memory devices, analogue to digital and digital to analogue converters, buttons, and high current drivers are also covered. This unit is enhanced with extensive laboratories based on programming a Z8 embedded processor with C and interfacing it with a variety of external circuits.

Prerequisite: ELE1IEL.

Recommended Prior Studies: MAT1EN and MAT1FEN (from 2009 MAT1CPE and MAT1CLA).

Incompatible unit: ELE2DIG.

Class requirements: Two 1-hour lectures, three hours laboratory work, one 1-hour practical per week.

Assessment: One 2-hour examination (60%), laboratory work (approx 1500 words) (30%), assignments (approx 500 words) (10%). In order to pass the unit students must obtain an overall pass grade, pass the examination, and pass the practical work.

Prescribed Reading:

Tocci, R. J. *Digital systems, principles and applications*, 7th edn, Prentice Hall 1998.

ELE3BIO BIOMEDICAL ENGINEERING A (15. CPs Sem. TE-SEM-2 BU.) *Dr Jim Cameron*

Students study a selection of the following topics as they apply to the profession of biomedical engineering. Biomedical approaches to physiology, including the cell and its functions, protein synthesis, transport across cell membranes and receptor function together with the origin of biopotentials including the Nernst and Goldman equations. In addition, the functional, organisation and chemical composition of the human body, nerve conduction, muscle contraction, and neuromuscular transmission are studied. Other topics include cardiac function and the cardiovascular system, immune mechanisms, haematology, the central nervous system and respiratory physiology. Definitions and medical terminology as required for the practice of biomedical engineering are an important part of the course. Substantial reading and additional work is expected to be completed in the student's own time.

Recommended Prior Studies: MAT2LA or MAT2ELA, MAT2AVC and MAT2APD (from 2009 MAT2VCA and MAT2LAL).

Co-requisite: ELE3IES (previously ELE3INS).

Incompatible unit: ELE4FBE, ELE3BME.

Class requirements: Three 1-hour lectures, two 1-hour practical work, and one 1-hour tutorial per week.

Assessment: One 3-hour examination (70%), laboratory work (approx 1000 words) (20%), assignments (approx 500 words) (10%). In order to pass the unit students must obtain an overall pass grade, pass the examination, and pass the practical work.

Prescribed Reading:

Vander, Sherman and Luciano, *Human physiology*, McGraw-Hill 8th edn, 2001.

ELE3CMN COMMUNICATION SYSTEMS (15. CPs Sem. TE-SEM-1 BU.) *Dr David Tay*

In this unit students will focus on the properties of signals and noise, Fourier analysis, linear systems and lossless transmission, linear and exponential modulation techniques, typical communications systems, such as radio broadcasting, receivers, FM stereo and TV broadcasting. Other topics include pulse code modulation, time division multiplexing, and frequency division multiplexing. Also included is transmissionline theory including distributed circuit analysis, characteristic impedance, skin effect, transient waves and reflections,

zigzag diagrams, time-domain reflectometry, and sinusoidal waves on transmission lines.

Prerequisite: ELE2LIN and MAT2LA or MAT2ELA (from 2009 ELE2CIR and MAT2LAL).

Incompatible unit: ELE4FCO, ELE3COM.

Class requirements: Two 1-hour lectures, three hours of practical work and one 1-hour tutorial per week.

Assessment: Laboratory work (approx 1500 words) (30%), one 2-hour examination (60%), assignments (approx 500 words) (10%). In order to pass the unit students must obtain an overall pass grade, pass the examination, and pass the practical work.

Prescribed Reading:

Haykin, S. *An introduction to analogue and digital communications* Wiley, 1994.

Carlson, A.B. *Communications systems*, McGraw-Hill, 1986.

ELE3CON CONTROL SYSTEMS (15. CPs Sem. TE-SEM-1 BU.) *Dr Song Wang*

In this unit, students will focus on nonlinear control systems. This includes analysis and modelling of physical systems, characteristics, and performance of feedback control systems, stability analysis, root-locus techniques, and frequency response methods.

Prerequisite: ELE2ACI and MAT2APD (from 2009 ELE2ANI, ELE2CIR, MAT2LAL and MAT2VCA).

Incompatible unit: ELE4FCT, ELE3CTL.

Class requirements: Two 1-hour lectures, three hours of practical work and one 1-hour tutorial per week.

Assessment: One 2-hour examination (60%), laboratory work (approx 1500 words) (30%), assignments (approx 500 words) (10%). In order to pass the unit students must obtain an overall pass grade, pass the examination, and pass the practical work.

Prescribed Reading:

Ogata, K. *Modern control engineering*, Prentice Hall, 1997.

Dorf, R. C. and Bishop, R. H. *Modern control systems*, 10th edn, Addison and Wesley, 2005.

ELE3DCS DIGITAL COMMUNICATION SYSTEMS (15. CPs Sem. TE-SEM-2 BU.) *Dr Harvey Ye*

In this unit, students will focus on basic principles and techniques in digital communication systems. It covers digitisation techniques for analogue signals, base band transmission, and pass band transmission, an introduction to information theory, source coding, channel capacity, and channel coding. It also covers the fundamentals of optical fibre communication systems.

Prerequisite: ELE3CMN (previously ELE3COM), (from 2009 MAT2LAL and MAT2VCA).

Incompatible unit: ELE4FTE, ELE3TEL.

Class requirements: Two 1-hour lectures, three hours of laboratory work and one 1-hour tutorial per week.

Assessment: One 2-hour examination (60%), laboratory work (approx 1000 words) (20%), assignments (approx 1000-word equivalent) (20%). In order to pass the unit, students must obtain an overall pass grade, pass the examination, and pass the practical work.

ELE3DDE ELECTRONIC DESIGN AUTOMATION-TOOLS AND TECHNIQUE (15. CPs Sem. TE-SEM-2 BU.) *Mr Jim Whittington*

The increasing complexity of digital systems has led to development of modern methodologies in digital design, simulation, and production. Collectively known as electronic design automation (EDA), key elements include graphics-based design entry and verification, hardware description languages (HDLs), application specific integrated circuits (ASICs), complex programmable logic devices (CPLDs) and field programmable gate arrays (FPGAs). This subject introduces the electronic design automation process using the current technology in graphical tools for EDA. It will show how digital systems can be described as a hierarchical structure of block diagrams, state machines, flow charts, truth tables, and HDL code (VHDL). Designs can then be extensively simulated to check their integrity, and finally compiled and synthesized in a CPLD or FPGA. Hands-on practical work in laboratory classes, assignments and a team project form a major part of the learning in this unit.

Prerequisite: ELE2DSD (from 2009 ELE2DDP).

Incompatible unit: ELE4FED, ELE3EDA.

Class requirements: Two 1-hour lectures, three hours of laboratory work and one 1-hour tutorial per week.

Assessment: One 2-hour examination (40%), two assignments (600 words each) (30%). One design project (approx 1,200 words/ student equivalent) (30%). Project – completed by students normally working in teams of four students

Recommended Reading:

Lee, S. *Advanced digital logic design: using VHDL, state machines and synthesis for FPGAs*, Thomson, 2005.

Hamblen, J., & Furman, M. *Rapid prototyping of digital systems*, 2nd edn, Kluwer, 2003.

Skahill, K. *VHDL for programmable logic*, Addison-Wesley, 1996.

Yalamanchili, S. *VHDL starter's guide*, Prentice-Hall, 1998.

ELE5EMB EMBEDDED PROCESSORS (15. CPs Sem. TE-SEM-1 BU.)

Professor John Devlin

In this unit, students will focus on the real-world application of microprocessors to perform task-specific functions. Design architectures include systems based on 8-bit micro-controllers through to 64-bit processors. Topics include RISC/CISC architectures, parallel architectures, hardware design, and power management and embedded software considerations. The course includes practical applications and laboratory sessions that allow students to develop programs in C and assemble and run these programs on embedded systems. The laboratory work focuses on C applications for a Z8 encore microcontroller.

Prerequisite: ELE2DIG (from 2009 ELE2MDD).

Incompatible unit: ELE4FEM and ELE3EMP.

Class requirements: Two 1-hour lectures, three hours of laboratory work and one 1-hour tutorial per week.

Assessment: One 2-hour examination (60%), laboratory work (approx 1000 words) (20%), assignments (approx 1000 words) (20%). In order to pass the unit students must obtain an overall pass grade, pass the examination, and pass the practical work.

ELE3ETP ELECTRONICS TECHNOLOGY PROJECT (30. CPs Sem. TE-SEM-2 BU. TE-SEM-S BU.) *Mr Darrell Elton*

The aim of this project is to build a micro-controller based system that receives and transmits signals from analogue transducers. The system may display some outputs. Skills required include use of a Gantt chart, prototyping, simulations and calculations, design for testability and de-buggability, layout and construction of a PCB, and the writing of a report.

Prerequisite: ELE2DIG (from 2009 ELE2MDD).

Class requirements: Two 1-hour lectures and six hours of laboratory work per week.

Assessment: Assignment equivalent to 1500 words (15%), laboratory work equivalent to 1500 words (35%), thesis equivalent to 5000 words (50%)

Prescribed Reading:

Haynes, M. E. *Project management*, 2nd edn, Crisp Publications Inc. 1997.

ELE3IES INSTRUMENTATION ELECTRONICS AND SENSORS (15. CPs Sem. TE-SEM-1 BU.) *Mr Paul Junor*

This unit concerns electronic instrumentation and sensors for biomedical, industrial, and scientific applications:

Sensors/transducers; signal conditioning; signal processing; data presentation, single/multi-channel acquisition systems. Review of semiconductor devices. Design of single, compound and hybrid-transistor amplifiers, current sources, active loads, power semiconductor thermal performance, and safe operating area. Op amp circuit design and application, feedback amps, instrumentation amps. Power supplies: transformers, rectifiers, filters, regulators, protection circuits. Measurement characteristics and errors, interfering/modifying inputs. Inherent and external noise, interference and shielding, ground loops, sources of internal noise, s/n ratio, active filters for noise reduction. Sensors for measurement of flow, pressure, temperature, displacement, strain, motion, chemical/biomedical electrodes. Industrial/medical electrical safety, signal grounding and shielding, isolation.

Prerequisite: ELE2ACI (from 2009 ELE2ANI and ELE2CIR).

Recommended Prior Studies: MAT2LAL and MAT2VCA.

Incompatible unit: ELE4FIN, ELE3INS.

Class requirements: Two 1-hour lectures and an average of two hours practical and/or tutorial work per week.

Assessment: One 2-hour examination (60%), laboratory work (approx 1500 words) (30%), assignments (approx 500 words) (10%). In order to pass the unit, students must obtain an overall pass grade, pass the examination, and pass the practical work.

Prescribed Reading:

Pallas-Areny, R., Webster, J.G. *Sensors and signal conditioning*, 2nd edn. John Wiley & Sons, 2001.

ELE3PRO THIRD YEAR PROJECT (15 CPs Sem. TE-SEM-2 BU.) *Mr Darrell Elton*

The aim of this unit is to extend and reinforce embedded programming concepts taught in ELE3EMB. Analogue circuit design, schematic capture, and circuit board layout are also covered. Students are also given an opportunity to demonstrate practical project management skills by keeping a detailed logbook, which culminates in a small formal report.

Prerequisite: ELE2DIG and ELE3EMP (from 2009 ELE2MDD and ELE3EMB).

Incompatible unit: ELE3PRJ.

Class requirements: Two 1-hour lectures, three hours of laboratory work per week.

This unit is not available for study abroad students.

Assessment: Laboratory work 3000 words (70%), assignments 1500-word equivalent (30%)

Prescribed Reading:

Haynes, M.E. *Project management*, 2nd edn, Crisp Publications Inc. 1997.

ELE3IP DIGITAL SIGNAL PROCESSING (15. CPs Sem. TE-SEM-2 BU.) *Dr G Deng*

Components of this unit include representation of signals and linear shift-invariant systems in the time domain and in the frequency domain, analogue-to-digital and digital-to-analogue conversion, the z-transform, design methods and applications of digital recursive and non-recursive filters.

Prerequisite: ELE2MIC and ELE2ACI (from 2009 MAT2LAL and MAT2VCA).

Incompatible unit: ELE4FSP, ELE3DSP.

Class requirements: Two 1-hour lectures, three hours of laboratory work and one 1-hour tutorial per week.

Assessment: One 2-hour examination (60%), laboratory work (1000 words) (20%), assignments (1000-word equivalent) (20%). In order to pass this unit students must obtain an overall pass grade, pass the examination, and pass the practical work.

ELE3TRA TRANSITIONAL UNIT A (5.0 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr John Devlin*

This unit is only available to students enrolled in an Electronic Engineering degree, who require five credit points to complete their degree requirements.

In this unit, students undertake work from an existing electronic engineering unit. The Department of Electronic Engineering will provide a list of available units from which students will make their choice. Final approval of unit choices will be given within the Department. There is no examination component in the unit, submission of one or more assignments will complete the unit requirements.

Prerequisite: Requires coordinator's approval/or Department approval.

Class requirements: Lectures and labs, as required for the unit being undertaken, until the final assignment due date.

This unit is not available for study abroad students.

Assessment: Assignment/s equivalent to 1250 words (100%)

ELE3TRB TRANSITIONAL UNIT B (5.0 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr John Devlin*

This unit is only available to students enrolled in an Electronic Engineering degree, who require five credit points to complete their degree requirements.

In this unit, students undertake work from an existing electronic engineering unit. The Department of Electronic Engineering will provide a list of available units from which students will make their choice. Final approval of unit choices will be given within the Department. There is no examination component in the unit, submission of one or more assignments will complete the unit requirements.

Prerequisite: Requires Coordinator's approval/or Department approval.

Class requirements: Lectures and labs, as required for the unit being undertaken, until the final assignment due date.

This unit is not available for study abroad students.

Assessment: Assignment/s equivalent to 1250 words (100%)

ELE4AAE ADVANCED INSTRUMENTATION ELECTRONICS (15. CPs Sem. TE-SEM-2 BU.) *Mr Paul Junor*

Advanced Device Modelling and Simulation: small and large signal, switching and noise behaviour of passive components, diodes, BJTs and FETs. High Performance Linear Circuits: non-ideal behaviour, frequency response, noise characteristics and applications of diff amps and op amps; feedback circuit noise and stability; specialized linear (CSOA, PGA, OTA, and CFA) I.Cs; low noise/low interference design; programmable analogue design techniques. Filters: Butterworth, Chebyshev, Elliptic, and Bessel filter functions, design methods; passive, active, and switched capacitor filters. Non-Linear Circuits: analogue switches and multiplexers, sample/hold amps, comparators, precision rectifiers, peak detectors, log amps, analogue multipliers, PLLs. Linear/Non-Linear Waveform Generators: RC, LC, crystal and relaxation oscillators, multivibrators, waveform generator I.C.s, Power electronics: power devices, power amps and switching circuits, switching regulators, switch-mode power supplies.

Prerequisite: ELE4FAC or ELE3ACD (from 2009 ELE3DDE).

Class requirements: Two 1-hour lectures and one 2-hour practical/tutorial class per week.

Assessment: One 2-hour examination (60%), laboratory reports totalling 1000 words (20%), assignments totalling 1000 words (20%). In order to pass the unit, students must obtain an overall pass grade, pass the examination, and pass the laboratory work.

Gray, P. R. and Meyer, R. G. *Analysis and design of analogue integrated circuits*, 4th edn, Wiley, 2001.

Franco, S. *Design with operational amplifiers and analogue integrated circuits*, 3rd edn, McGraw Hill, 2002.

ELE4ACS ADVANCED COMMUNICATION SYSTEMS (15. CPs Sem. TE-SEM-2 BU.) *Mr Michael Feramez*

The unit continually evolves with time to reflect the current developments in the field of radio-based communication systems, including cellular mobile telecommunications, satellite, and global positioning systems. The topics include the mobile radio propagation environment and path loss models, coding and error control, cellular concept, multiple radio access, multiple division techniques, channel allocation, and management systems. After the successful completion of this unit, the student will gain systems knowledge in mobile communications and develop the ability to perform radio link calculations and performance assessment.

Prerequisite: ELE3COM (from 2009 ELE3CMN).

Class requirements: Two 1-hour lectures, two hours of laboratory work and one 1-hour tutorial per week.

Assessment: One two-hour examination (60%), laboratory reports

totalling 1000 words (20%), assignments totalling 1000 words (20%). In order to pass the unit, students must obtain an overall pass grade, pass the examination, and pass the practical work.

Prescribed Reading:

Dharma, P., Agrawal and Qing-An Zeng, *Introduction to wireless and mobile systems*, 2nd edn, Thomson, 2006.

ELE4ADD ADVANCED DIGITAL SYSTEMS DESIGN (15. CPs Sem. TE-SEM-1 BU.) *Mr Jim Whittington*

In this unit, students will focus on advanced design techniques and methodologies in digital system design. Students develop hands-on experience in design, simulation, verification, and implementation using industry standard CAD tools. The subject content includes: digital systems design methodology and design flow; programmable logic technology, architecture, design and synthesis issues; Register Transfer Level design, coding and synthesis; behavioural synthesis; sequential system design; binary arithmetic circuits; analysis and design of asynchronous systems; clocking and timing issues; design validation; design for test; boundary scan and build-in self test.

Prerequisite: A minimum grade of 65% in ELE32EDA (from 2009) a minimum grade of 65% in ELE3DDE).

Class requirements: Two 1-hour lectures, two hours laboratory work, and one 1-hour tutorial per week.

Assessment: One assignment (approx. 800 words) (20%), one design project (approx. 1600 words) (40%), one 2-hour examination (40%)

Prescribed Reading:

ELE4ANS ANTENNAS AND PROPAGATION (15. CPs Sem. TE-SEM-2 BU.)

Mr Michael Feramez

In this unit, students will focus on the fundamentals of radio wave propagation and antenna theory (Maxwell's equations) to equip the student with the knowledge to select and use antennas in radio site design. The unit commences with a formal review of the fundamentals of electromagnetic wave propagation and antenna theory. The unit includes a number of practical wire and aperture antenna types for mobile and fixed radio services covering the HF, VHF, UHF, and microwave frequency bands. An emphasis is placed on radiation patterns and antenna parameter interpretation. In addition, methods of antenna combing for mobile radio and an analysis of intermodulation are studied. The unit also introduces the concepts of EMI/EMC and discusses how to make circuit boards that minimise EMI.

Prerequisite: ELE3RMO (from 2009 ELE3CMN and ELE3DCS).

Incompatible unit: ELE4ANT.

Class requirements: Two 1-hour lectures, two hours of laboratory work and one 1-hour tutorial per week.

Assessment: One 2-hour examination (60%), laboratory reports totalling 1000 words (20%), assignments totalling 1000 words (20%). In order to pass the unit students must obtain an overall pass grade, pass the examination, and pass the practical work.

Prescribed Reading:

Balanis, C.A. *Antenna theory*, John Wiley, 1997.

Kraus, J.D. *Antennas*, McGraw Hill, 1988.

ELE4ASP ADVANCED SIGNAL PROCESSING (15. CPs Sem. TE-SEM-1 BU.)

Dr Guang Deng

Components of this unit include linear orthogonal transforms such as the fast Fourier transform and the discrete cosine transform, spectrum analysis, digital model of speech, linear predictive coding, polyphase filters, and multi-rate DSP, audio applications of DSP, communication system applications of DSP, implementation of FIR filters using digital signal processors.

Prerequisite: ELE3DSP (from 2009 ELE3SIP).

Class requirements: Two 1-hour lectures, two hours of laboratory work and one 1-hour tutorial per week.

Assessment: One 2-hour examination (50%), laboratory report equivalent to 750 words (15%), assignment equivalent to 750 words (15%), one programming project 1000 words (20%). In order to pass the unit students must obtain an overall pass grade, pass the examination, and pass the practical work.

Prescribed Reading:

Mitra, S. *Digital signal processing*, 2nd edn, McGraw Hill, 2001.

ELE4ATA ADVANCED TOPICS A (15. CPs Sem. TE-SEM-1 BU.) *Mr Graeme Rathbone*

Not available in 2008

ELE4ATB ADVANCED TOPICS B (15. CPs Sem. TE-SEM-2 BU.) *Mr Graeme Rathbone*

Not available in 2008

ELE4BME BIOMEDICAL ENGINEERING B (15. CPs Sem. TE-SEM-1 BU.) *Dr Jim Cameron*

Components of this unit examine advanced physiology and modelling, biomaterials and biomechanics. Students study special aspects relating to foetal, neonatal, paediatric and obstetric physiology, and neuromuscular modelling. An examination is also made of typical biomaterials (metals, ceramics, composites, carbons, and natural polymers), biological testing, biocompatibility, interaction with tissue, electrical, mechanical, and structural properties, implants, corrosion and absorbability, sterility and sterile packaging, rehabilitation devices and orthopaedic prosthesis and orthoses. Fundamentals of digital medical imaging are presented. Medical imaging modalities (radiography including X-ray, fluoroscopy, angiography and safety considerations), CT scanning principles, ultrasound imaging, MRI operating principles and image formation, developments in electrical impedance imaging and bio-magnetic imaging, PET and SPECT.

Prerequisite: ELE3BME or HBS2HPB (from 2009 ELE3BIO).

Class requirements: Two 1-hour lectures, two hours laboratory work, and one 1-hour tutorial per week.

Assessment: One 2-hour examination (60%), laboratory reports totalling 1000 words (20%), assignments totalling 1000 words (20%). In order to pass the unit, students must obtain an overall pass grade, pass the examination, and pass the practical work.

Recommended Reading:

Webster, J. G. (Ed.) *Medical instrumentation application and design*, 3rd edn, Wiley 1998.

ELE4CLN CLINICAL ENGINEERING (15. CPs Sem. TE-SEM-2 BU.) *Dr Jim Cameron*

In this unit students continue to study concepts introduced in the unit ELE41BME and cover a selection of the following components on cardiac assist devices (pacemakers, defibrillators and cardioverters), electro-surgery (modes, generators, wave shapes, accessories, safety issues and standards), drug delivery systems (active, passive, volumetric, rate-controllers, pumps, syringe drivers, automatic control), dialysis (renal function, artificial kidney, haemodialysis, peritoneal dialysis, dialysers, dialysate), central monitoring stations and ambulatory monitoring. Electrical safety and standards. Equipment for surgery, anaesthesia, intensive care, and neonatology.

Prerequisite: ELE4BME.

Recommended Prior Studies: ELE32INS or ELE41ASP (from 2009 ELE3IES and ELE3SIP).

Class requirements: Two 1-hour lectures, two hours of laboratory work and one 1-hour tutorial per week.

Assessment: One 2-hour examination (60%), laboratory work totalling 1000 words (20%), assignments totalling 1000 words (20%). In order to pass the unit students must obtain an overall pass grade, pass the examination, and pass the practical work.

Recommended Reading:

Webster, J. G. (Ed.) *Medical instrumentation application and design*, 3rd edn, Wiley, 1998.

ELE4DCT DIGITAL CONTROL THEORY (15. CPs Sem. TE-SEM-2 BU.) *Dr Song Wang*

In this unit, students will focus on input-output and state-space models of discrete-time systems, time response and stability analysis

of sampled-data control systems, digital controller design, optimal control, and digital implementations of control systems.

Prerequisite: ELE3CTL (from 2009 ELE3CON).

Class requirements: Two 1-hour lectures, two hours of laboratory work and one 1-hour tutorial per week.

Assessment: One 2-hour examination (60%), laboratory work totalling 1000 words (20%), assignments totalling 1000 words (20%). In order to pass the unit, students must obtain an overall pass grade, pass the examination, and pass the practical work.

ELE4DIR DIRECTED STUDY (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Brian Usher*

Students may enrol in this unit in either first semester or second semester.

In this unit students carry out independent study supervised by a member of staff. Enrolment in the unit requires the approval of either the Bachelor of Electronic Engineering Course Adviser or the Postgraduate Course Coordinator.

Class requirements: Supervised research of up to 4 hours per week under the direction of a staff member.

This unit is not available for study abroad students.

Assessment: Technical report of approximately 4000 words (100%)

ELE4EMT APPLIED MANAGEMENT FOR ENGINEERS (15. CPs Sem. TE-SEM-1 BU.) *Mr George Alexander*

The aim of this unit is to promote and foster business sense amongst engineering students, and to raise awareness of the commercial and legal aspects of conducting business. This is achieved in two stages. Stage one: provides students with the tools and knowledge necessary to conduct effective business planning, including principles of marketing, strategy, environmental forces, consumer behaviour, market segmentation, pricing and legal principles. Other topics such as meetings skills, business planning, and leadership, innovation, and Total Quality Management principles are also covered. Stage two requires students to apply this knowledge in developing a business plan from business concept to business proposal. This simulates the 'real-world' situation of working in teams to develop the plan, which is then presented orally, involving team presentation, and as a professionally presented document.

Class requirements: Three 1-hour lectures and one 1-hour tutorial per week.

Assessment: Submission and presentation of a team business plan equivalent to 2000 words (50%) Note that the team business plan will be differentially assessed, one 2-hour examination (40%), assignment equivalent to 500 words (10%)

Prescribed Reading:

ELE4EPA ENGINEERING PROJECT A (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Jim Cameron*

This unit represents the first semester of a year long program.

Students must take ELE4EPA and ELE4EPB in the one academic year.

Each student undertakes an engineering design project on a topic relevant to their chosen field of specialisation (biomedical, communication, electronic systems, or optical engineering) after selecting a topic in consultation with supervisors. The project may be a design of a system, including design computations, drawings and specifications, or it may take the form of a report of an industrial, laboratory investigation, or similar activity. The outcome of an investigation requires a project report of about 5000 words in length, excluding appendices, but supported by appropriate diagrams, charts, graphs and other illustrations.

Prerequisite: ELE32PRJ (from 2009 ELE3PRO).

Co-requisite: ELE4EMT and 30 credit points of fourth year level engineering units.

Incompatible unit: ELE4ENP.

Class requirements: The equivalent of six hours of laboratory time per week and weekly meetings with supervisor.

This unit is not available for study abroad students.

Assessment: One 1500-word plan (30%), one 2000-word report on the achievement of objectives (50%), one 10-minute oral presentation (20%)

ELE4EPB ENGINEERING PROJECT B (30. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Jim Cameron*

This unit represents the second semester of a year long program. Students must take ELE4EPA and ELE4EPB in the one academic year.

Each student undertakes an engineering design project on a topic relevant to their chosen field of specialisation (biomedical, communication, electronic systems, or optical engineering) after selecting a topic in consultation with supervisors. The project may be a design of a system, including design computations, drawings and specifications, or it may take the form of a report of an industrial, laboratory investigation, or similar activity. The outcome of an investigation requires a project report of about 5000 words in length, excluding appendices, but supported by appropriate diagrams, charts, graphs and other illustrations.

Prerequisite: ELE4EPA.

Co-requisite: 30 credit points of fourth year level engineering units.

Incompatible unit: ELE4ENP.

Class requirements: The equivalent of 12 hours of laboratory time per week and weekly meetings with supervisor.

This unit is not available for study abroad students.

Assessment: One 12-minute oral project presentation (20%), one 5000-word final thesis (50%), project demonstration, and achievement of objectives (30%)

ELE4IPC IMAGE PROCESSING AND CODING (15. CPs Sem. TE-SEM-2 BU.)

Dr Guang Deng

This unit is about fundamental concepts, techniques, and standards for the compression of digital images and video. Topics include information theory and entropy coding techniques such as, Huffman coding and arithmetic coding. Signal decorrelation techniques such as prediction, transformation, and sub-band coding. Digital image and video coding standards such as, JPEG, JPEG-LS, MPEG-1, and MPEG-2.

Prerequisite: ELE41ASP.

Class requirements: Two 1-hour lectures per week for nine weeks; one 2-hour practical class per week for three weeks.

Assessment: One 2-hour examination (50%), three laboratory reports (15%), three mathematical assignments (15%), one programming project (20%)

Prescribed Reading:

Rao, K. R., and Hwang, J. J. *Techniques and standards for image, video and audio coding* Prentice-Hall, 1996.

ELE4NET COMMUNICATION NETWORKS (15. CPs Sem. TE-SEM-2 BU.)

John Devlin

Students study network architecture (the OSI 7 layer mode), serial communication standards, termination of signal lines, driving CSMA/CD networks, the data link layer 9HDLC, SDLC and LAPB), the network or packet layer in X.25, routing techniques in computer communication networks, shortest path algorithms for routing, flow control, packet protocols for broadcast satellites, local area networks (Ethernet and token passing networks), introduction to queuing theory, simple queuing systems, polling in networks and reliability of networks, Wide Area Networks, ATM Networks, LANs Wireless networks, ISDN and Broadband ISDN, as well as computer to computer communications.

Prerequisite: ELE3TEL (from 2009 ELE3DCS).

Class requirements: Two 1-hour lectures, two hours of laboratory work and one 1-hour tutorial per week.

Assessment: One 2-hour examination (60%), laboratory reports totalling 1000 words (20%), assignments totalling 1000 words (20%). In order to pass the unit, students must obtain an overall pass grade, pass the examination, and pass the practical work.

Prescribed Reading:

Stallings, W. *Data and computer communications*, Prentice Hall, 6th edn, 2000.

ELE40FC OPTICAL FIBRE COMMUNICATION SYSTEMS (15 CPs Sem. TE-SEM-2 BU.) *Professor Laurie Cahill*

The aims of this unit are: (i) to gain an in-depth understanding of the principles of optical devices, circuits, and systems that are used in today's telecommunication systems, (ii) to be able to design and analyse real-life optical fibre communication systems and (iii) to study in detail the design and operation of optical networks. Topics covered include an introduction to optical waveguides and planar waveguide circuits, a detailed study of multimode and single mode optical fibres, the characteristics of semiconductor lasers and photodiodes, the design of modern optical communication systems (including both multimode and single mode systems) and optical networking using wavelength division multiplexing.

Prerequisite: ELE3RMO (from 2009 ELE3DCS).

Recommended Prior Studies: ELE3COM and ELE3TEL (from 2009 ELE3IES).

Incompatible unit: ELE5OPN.

Class requirements: Two 1-hour lectures, two hours of laboratory work and one 1-hour tutorial per week.

Assessment: One 2-hour examination (60%), laboratory reports totalling 1000 words (20%), assignments totalling 1000 words (20%). In order to pass the unit students must obtain an overall pass grade, pass the examination, and pass the practical work.

Prescribed Reading:

Palais, J.C. *Fibre optic communications*, Prentice Hall, 4th edn, 1998.
Senior, J. M. *Optical fibre communications: principles and practice*, 2nd edn, Prentice Hall, 1992.

ELE40FS OPTICAL FIBRE SENSORS (15 CPs Sem. TE-SEM-2 BU.) *Mr*

Darrell Elton

Not available in 2008

ELE4RCH RECONFIGURABLE COMPUTING HARDWARE (15 CPs Sem. TE-SEM-1 BU.) *Mr Graeme Rathbone*

Not available in 2008

ELE4RFD RADIO FREQUENCY DESIGN (15 CPs Sem. TE-SEM-1 BU.) *Mr*

Darrell Elton

The unit involves the practical design and simulation of several RF circuits including filters, couplers, and matched transistor amplifiers. Touchstone is used for simulation. Micro strip PCB implementation is extensively covered. Circuit simulation (Touchstone), board layout (Altium), construction, and analysis are covered in the laboratory.

Prerequisite: ELE3INS (from 2009 ELE3IES).

Class requirements: Two 1-hour lectures, two hours of laboratory work and one 1-hour tutorial per week.

Assessment: One 2-hour examination (60%), laboratory reports totalling 1500 words (30%), assignments totalling 500 words (10%). In order to pass the unit, students must obtain an overall pass grade, pass the examination, and pass the practical work.

ELE5ASA ADVANCED STUDIES IN TELECOMMUNICATIONS A (15 CPs Sem. TE-SEM-1 BU.) *Mr Michael Feramez*

Telecommunications is a very broad and rapidly changing field. This unit allows postgraduate students within the Master of Telecommunications Engineering course to tailor their studies to their own particular needs. Students will carry out a course of guided study supervised by a member of staff on an aspect of telecommunications. A very wide range of topics is available. Enrolment in this unit is subject to the approval of the course coordinator.

Class requirements: Directed study equivalent to four hours of class contact per week.

Assessment: Four 1000-word assignments (100%)

ELE5BDC BROADBAND DIGITAL COMMUNICATIONS (15 CPs Sem. TE-SEM-1 BU.) *Dr David Tay*

This unit will study principles and techniques of modern digital communication systems for wired and wireless applications. Topics will include advanced digital modulation and detection techniques, channel coding techniques for dealing with errors, and the trade-offs between modulation and coding. The effect of a fading channel on performance of wireless systems will also be studied. Techniques for

analysing system link budget will be covered. Other advanced topics include multiplexing, multiple access, and spread-spectrum techniques.

Prerequisite: ELE3COM or ELE4FCO (from 2009 ELE3CMN).

Class requirements: Two 1-hour lectures, one 1-hour tutorial, and an average of 1-hour laboratory per week.

Assessment: One 2-hour examination (50%), six 250-word laboratory reports (30%), two 500-word assignments (20%)

Recommended Reading:

Proakis, J.G., *Digital communications*, McGraw Hill, 2001.

Sklar, B., *Digital communications: fundamentals and applications*, Prentice Hall, 2001.

ELE5ETD EMERGING TOPICS IN IC DESIGN (15 CPs Sem. TE-SEM-2 BU.)

Professor Laurie Cahill

The unit contents are as follows: New technologies, such as: Silicon carbide high-power devices, Quantum based devices, quantum wells and quantum dots, nanometer MOSFETs, wide band gap materials and devices, plasma-wave electronics, ferroelectric devices, overview of new process technologies. Ultra-high-speed devices, including microwave and optical devices. New systems-level architectures, such as nanowire arrays, neuromorphic architectures, reconfigurable architectures, wafer-scale systems, memory systems. New EDA tools. Future technology projections. EMC: regulations, measurement and testing, EMC equipment, Design issues related to EMC. High-speed design. Deep sub-micron technology and noise.

Class requirements: Two 1-hour lectures and two hours of laboratory exercises and project per week.

Assessment: Two 500-word assignments (20%), one 2-hour examination

(50%), twelve 120-word laboratory reports (30%)

Recommended Reading:

The lecturer will advise appropriate references.

ELE5ICD INTEGRATED CIRCUIT DESIGN (15 CPs Sem. TE-SEM-1 BU.) *Mr*

Jim Whittington

Students are exposed to integrated circuit design techniques and methodologies in this unit. Topics covered include — Overview of MOS and sub-micron technology, scaling, and signal integrity, IC design techniques. CMOS cell design: device-level design constraints, gate design, pass transistor circuits, sequential circuits. Layout considerations, design rules and mask level design. Circuit optimisation techniques. ASIC and custom design. Timing issues in VLSI circuit design. Design of VLSI system sub-systems: Arithmetic and logic processing elements, I/Os, buffers, data path design and layout, . Chip floor planning. Basic analogue building blocks. Design tradeoffs-cost, power and performance. Testability and yield.

Prerequisite: ELE3EDA or ELE4FED or equivalent (from 2009 ELE3DDE).

Class requirements: One 2-hour lecture and one 2-hour practical class per week.

Assessment: One 750-word assignment (20%), one 1500-word project (40%), one 2-hour examination (40%)

Recommended Reading:

Rabaey, J.M. *Digital Integrated Circuits: A design Perspective*, Prentice Hall, 1996.

ELE5MAP MICROELECTRONIC MAJOR PROJECT (60 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Mr Jim Whittington*

To enrol in this unit, students must obtain approval from the Postgraduate Coursework Coordinator in the Department of Electronic Engineering.

Projects would be expected to demonstrate mastery in chip design and implementation at a level considered no less than that of an experienced practitioner in the field. Students must demonstrate their ability to integrate and draw upon their coursework studies relevant to the project. Industry-based students may undertake projects as part of

their normal employment, where relevant opportunities exist and suitable resources and supervision can be guaranteed. Collaboration with international partners will also be encouraged. Commercial in-confidence programs can be undertaken, with appropriate restrictions on publication and choice of examiners. Intellectual Property of projects initiated by a company and undertaken in that company will remain with the company. All other projects will be subject to the Intellectual Property policy of the university.

Prerequisite: Core units as prescribed in Master of Microelectronic Engineering.

Incompatible unit: ELE51MIP, ELE52MIP, ELE51MPA, ELE52MPA, ELE51MPB, ELE52MPB, ELE51MPC, ELE52MPC, ELE5MXA and ELE5MXB.

Class requirements: Sixteen hours laboratory time per week.

This unit is not available for study abroad students.

Assessment: A dissertation of no less than 15,000 to 18,000 words (100%) The dissertation will be examined by two examiners selected by an examining panel.

Recommended Reading:

Appropriate references will be advised by the lecturer.

ELE5MIP MICROELECTRONIC MINOR PROJECT (30 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Mr Jim Whittington*

To enrol in this unit, students must obtain approval from the Postgraduate Coursework Coordinator in the Department of Electronic Engineering.

It is expected that the majority of industry-based students will undertake projects as part of their normal employment where relevant opportunities exist and suitable resources and supervision can be guaranteed. Projects can be structured to be the equivalent of two units. The duration of the project is expected to be no less than the equivalent of 2 months full-time and would be expected to demonstrate a good working knowledge in chip design and implementation at a level considered no less than that of an experienced practitioner. Students must demonstrate their ability to integrate and draw upon their coursework studies relevant to the project. Commercial in-confidence programs can be undertaken with appropriate restrictions on publication and choice of examiners. Intellectual Property of projects initiated by a company and undertaken in that company will remain with the company. All other projects will be subject to the Intellectual Property policy of the relevant university partner.

Prerequisite: ELE4FED, ELE5ICD, and ELE5TDM.

Core subjects as prescribed in Master of Engineering (Microelectronics) document from the Australian Microelectronic Institute — these subjects may be from other Universities.

Incompatible unit: ELE51/52MIP, ELE51/52MAP, ELE51/52MPA, ELE51/52MPB and ELE51/52MPC.

Class requirements: Twelve hours laboratory time per week.

This unit is not available for study abroad students.

Assessment: A dissertation of between 7,500 and 9000 words (100%) The dissertation will be examined by two examiners selected by an examining panel.

Recommended Reading:

Appropriate references will be advised by the lecturer.

ELE5MPA ELECTRONIC ENGINEERING MAJOR PROJECT A (30. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Mr Jim Whittington*

To enrol in this unit, students must obtain approval from the Postgraduate Coursework Coordinator of the Department of Electronic Engineering

This is the first of two parts of the Electronic Engineering Major Project. In this section, students are required to complete a literature survey, develop a plan and implementation outline for the project, and give a formal presentation. In this Major Project, students are expected to demonstrate mastery in circuit or system design at the level of an experienced practitioner in the field. Students must demonstrate their ability to integrate and draw on their coursework studies relevant to the project. Industry-based students may undertake projects as part of their normal employment, where relevant opportunities exist and suitable resources and supervision can be guaranteed.

Incompatible unit: ELE51/52ERA, ELE51/52ERB, ELE51/52EDE, ELE51/52TDE.

Class requirements: Eight hours of directed study per week.

This unit is not available for study abroad students.

Assessment: One 6000-word literature survey (60%), one 1500-word project plan (20%), one 15-minute oral presentation (20%)

ELE5MPB ELECTRONIC ENGINEERING MAJOR PROJECT B (30. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Mr Jim Whittington*

To enrol in this unit, students must obtain approval from the Postgraduate Coursework Coordinator of the Department of Electronic Engineering.

This is the second part of the Electronic Engineering Major Project. In this section, students are required to undertake the practical section of their project. In this Major Project, students are expected to demonstrate mastery in circuit or system design at the level of an experienced practitioner in the field. Students must demonstrate their ability to integrate and draw on their coursework studies relevant to the project. Industry-based students may undertake projects as part of their normal employment, where relevant opportunities exist and suitable resources and supervision can be guaranteed.

Prerequisite: ELE51/52MPA.

Incompatible unit: ELE51/525ERA, ELE51/52ERB, ELE51/52EDE, ELE51/52TDE.

Class requirements: Eight hours per week of laboratory work.

This unit is not available for study abroad students.

Assessment: One thesis of approximately 7,500 words (80%), one 20-minute oral presentation, and demonstration (20%)

ELE5MXA MICROELECTRONIC MAJOR PROJECT A (30 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Mr Jim Whittington*

This is the first semester of a two-semester project to be taken over consecutive semesters. Students studying this unit must enrol in ELE5MXB in the following semester. To enrol in this unit, students must obtain approval from the Postgraduate Coursework Coordinator in the Department of Electronic Engineering.

Projects would be expected to demonstrate mastery in chip design and implementation at a level considered no less than that of an experienced practitioner in the field. Students must demonstrate their ability to integrate and draw upon their coursework studies relevant to the project. Industry-based students may undertake projects as part of their normal employment, where relevant opportunities exist and suitable resources and supervision can be guaranteed. Collaboration with international partners will also be encouraged. Commercial in-confidence programs can be undertaken, with appropriate restrictions on publication and choice of examiners. Intellectual Property of projects initiated by a company and undertaken in that company will remain with the company. All other projects will be subject to the Intellectual Property policy of the university.

Prerequisite: Core units as prescribed in Master of Microelectronic Engineering.

Incompatible unit: ELE51MIP, ELE52MIP, ELE51MPA, ELE52MPA, ELE51MPB, ELE52MPB and ELE5MAP.

Class requirements: Eight hours laboratory time per week.

This unit is not available for study abroad students.

Assessment: A dissertation of no less than 15,000 to 18,000 words (100%) The dissertation is the combined assessment for both ELE5MXA and ELE5MXB. At the completion of ELE5MXA, a mark of 'X' will be recorded. A final mark will be awarded at the completion of ELE5MXB.

Recommended Reading:

Appropriate references will be advised by the lecturer.

ELE5MXB MICROELECTRONIC MAJOR PROJECT B (30 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Mr Jim Whittington*

This is the second semester of a two-semester project to be taken over consecutive semesters. Students studying this unit must have enrolled in ELE5MXA in the preceding semester. To enrol in this unit, students must obtain approval from the Postgraduate Coursework Coordinator in the Department of Electronic Engineering.

Projects would be expected to demonstrate mastery in chip design and implementation at a level considered no less than that of an experienced practitioner in the field. Students must demonstrate their ability to integrate and draw upon their coursework studies relevant to the project. Industry-based students may undertake projects as part of

their normal employment, where relevant opportunities exist and suitable resources and supervision can be guaranteed. Collaboration with international partners will also be encouraged. Commercial in-confidence programs can be undertaken, with appropriate restrictions on publication and choice of examiners. Intellectual Property of projects initiated by a company and undertaken in that company will remain with the company. All other projects will be subject to the Intellectual Property policy of the university.

Prerequisite: Core units as prescribed in Master of Microelectronic Engineering.

Incompatible unit: ELE51MIP, ELE52MIP, ELE51MPA, ELE52MPA, ELE51MPB, ELE52MPB, ELE51MPC, ELE52MPC, and ELE5MAP.

Class requirements: Eight hours laboratory time per week.

This unit is not available for study abroad students.

Assessment: A dissertation of no less than 15,000 to 18,000 words (100%) The dissertation is the combined assessment for both ELE5MXA and ELE5MXB. A mark will be awarded at the completion of ELE5MXB.

Recommended Reading:

Appropriate references will be advised by the lecturer.

ELE5PMC PERSONAL MOBILE COMMUNICATIONS (15 CPs Sem. TE-SEM-1 BU.) *Mr Michael Feramez*

The focus of this unit is on aspects planning and design of cellular mobile radio communication networks. The unit covers channel multiple access and frequency assignment techniques, handover techniques, signalling protocol structures, traffic considerations, and network management.

Prerequisite: ELE31COM or ELE41FCO (from 2009 ELE3CMN).

Class requirements: Two 1-hour lectures, one 1-hour tutorial, and an average of 1-hour laboratory per week.

Assessment: One 2-hour examination (70%), six 250-word laboratory reports (20%), two 500-word assignments (10%)

Prescribed Reading:

Schwartz, M. *Mobile Wireless Communications*, Cambridge University Press, 2005.

Recommended Reading:

ELE5SEC SECURE COMMUNICATIONS (15 CPs Sem. TE-SEM-1 BU.) *Dr*

David Tay

Not available in 2008

ELE5SEL SPECIAL ELECTIVE IN MICROELECTRONIC ENGINEERING (15 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Mr Jim Whittington*

To enrol in this unit students must obtain approval from the Postgraduate Coursework Coordinator in the Department of Electronic Engineering

This unit is offered from time-to-time as a lecture series. The majority of the lectures are conducted by external experts with an international reputation. At the time of enrolment, information that is more specific should be obtained from the department.

Class requirements: One 2-hour lecture and one 2-hour tutorial/practical class per week.

This unit is not available for study abroad students.

Assessment: Four 1000-word assignments (100%)

ELE5TAV TEST AND VERIFICATION (15 CPs Sem. TE-SEM-2 BU.) *Mr Jim Whittington*

Enrolment in this unit requires the approval of the Postgraduate Coursework Coordinator.

Test and verification techniques for modern integrated circuit and digital system design. Topics covered include reliability and failure rates, reliability as affected by smaller dimensions and faster devices, thermal considerations. Redundancy and fault tolerance, functional and formal verification and fault modelling. Hardware/software co-design, co-verification, and co-simulation. Timing and power analysis. Design for testability and ATPG and fault coverage tools. Layout issues for testability. Testing methodologies: in-circuit, built-in self-test, boundary scan, memory testing, embedded system testing. Board-level interconnect testing. Test bench design.

Prerequisite: ELE32EDA or ELE42FED or equivalent.

Class requirements: One 2-hour lecture and one 2-hour practical class per week.

Assessment: One 750-word assignment (20%), one 1500-word project (40%), one 2-hour examination (40%)

Recommended Reading:

Lala, Parag K. *Digital Circuit Testing and Testability*, Academic Press, 1997.

ELE5TPA TELECOMMUNICATIONS MAJOR PROJECT A (30 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Mr Michael Feramez*

To enrol in this unit, students require the approval of the Postgraduate Coursework Coordinator in the Department of Electronic Engineering

This is the first of two parts of the Telecommunications Major Project. In this section, students are required to complete a literature survey, develop a plan and implementation outline for the project, learn to use the design tools and equipment required for the project and give a formal presentation. In the Telecommunication Major Project, students are expected to demonstrate mastery in telecommunication circuit or system design at the level of an experienced practitioner in the field. Students must demonstrate their ability to integrate and draw on their coursework studies relevant to the project. Industry-based students may undertake projects as part of their normal employment, where relevant opportunities exist and suitable resources and supervision can be guaranteed.

Class requirements: Eight hours per week of directed study.

This unit is not available for study abroad students.

Assessment: One 6000-word literature survey (60%), one 15-minute presentation (20%), one 1500-word project plan (20%)

ELE5TPB TELECOMMUNICATIONS MAJOR PROJECT B (30 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Mr Michael Feramez*

To enrol in this unit, students require the approval of the Postgraduate Coursework Coordinator in the Department of Electronic Engineering.

This is the second of two parts of the Telecommunications Major Project. In this section, students are required to undertake the practical section of their project.

In the Telecommunication Major Project, students are expected to demonstrate mastery in telecommunication circuit or system design at the level of an experienced practitioner in the field. Students must demonstrate their ability to integrate and draw on their coursework studies relevant to the project. Industry-based students may undertake projects as part of their normal employment, where relevant opportunities exist and suitable resources and supervision can be guaranteed.

Prerequisite: ELE51TPA or ELE52TPA.

Class requirements: Eight hours laboratory work per week.

This unit is not available for study abroad students.

Assessment: A thesis component of approximately 7,500 words (80%), one 20-minute oral presentation, and demonstration (20%)

ENV2ESA ENVIRONMENTAL ENQUIRY A (5.0 CPs Sem. TE-SEM-1 BU.) *Dr John Webb*

This unit represents the first semester of a year long program taken over ENV2ESA and ENV2ESB

In this unit, students are provided with a means of discussing environmental issues from different points of view and are introduced to the social, legal, and philosophical issues in environmental science. Students attend seminars covering topics relevant to the course, presented by a variety of speakers from the university and outside organisations. Students are required to write detailed reports on the material presented.

Class requirements: Six 1-hour seminars.

Assessment: Six seminar reports (100%)

ENV2ESB ENVIRONMENTAL ENQUIRY B (5.0 CPs Sem. TE-SEM-2 BU.) *Dr John Webb*

This unit represents the second semester of a year long program taken over ENV2ESA and ENV22ENB

In this unit, students are provided with a means of discussing environmental issues from different points of view and are introduced to the social, legal, and philosophical issues in environmental science. A particular environmental issue is considered, and students attend four seminars on the topic by outside speakers, presenting different points of view. Students are divided into groups and research a particular aspect of the topic, prepare a discussion paper and present a report, to the class.

Class requirements: Four 1-hour seminars.

Assessment: Group project oral presentation (5-minutes each student) (10%), individual written report of 1500 words (90%)

ENV3ENV ENVIRONMENTAL RESEARCH (10. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr John Webb*

This unit aims to introduce students to the problem of establishing scientific knowledge in environmental science. One afternoon per week is allocated and involves a project in which the student investigates an environmental problem and seeks a solution. The brief to acquire data, interpret it, and write a report is conducted under the supervision of a member of staff and possibly by an external organisation. A final verbal and visual presentation is made at the end of the semester.

Prerequisite: Second year of the Bachelor of Environmental Science degree or equivalent.

Incompatible unit: ENV30ENV, ENV31ENV, ENV32ENV

Class requirements: 3 hours per week.

Assessment: A project report equivalent to 2500 words (90%), one 10-minute verbal presentation (10%)

ENV3WRM WATER RESOURCE MANAGEMENT (10. CPs Sem. TE-SEM-1 BU.) *Dr John Webb*

This unit deals with water resource management, policies, practices and organisational arrangements aimed at the most effective and efficient use of the total water resource, while minimising adverse effects of water use on other natural resources. Topics include the history of water resource development in Australia, current government policy and the basic concepts of water resource management, data requirements, correction and analysis, allocation policies and practices, storage and distribution systems, irrigation, urban and industrial use, water quality, salinity and nutrient management and river and flood plain management.

Prerequisite: Second year of the Bachelor of Environmental Science degree or equivalent.

Class requirements: Two 1-hour lectures per week, one 3-hour practical class per fortnight and a one-day excursion.

Assessment: One 3-hour examination (60%), six practical reports (30%), and an excursion report (10%).

ENV4HNA HONOURS ENVIRONMENTAL SCIENCE (60 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr John Webb*

This unit of study represents one semester of a year long program. Honours degree students are selected based on their performance in the final year of the pass degree. There is no Department of Environmental Science so the Honours year and projects are carried out under the auspices of a department in the Faculty, usually agriculture, chemistry, geology, physics, or mathematics. The Honours year is structured according to principles applied to the other science discipline of the thesis supervisor and involves an extended scientific investigation into a scientific problem relating to the environment and some course-work relevant to the project. Approval of each fourth year enrolment must be given by the supervisor and the Environmental Science Coordinator.

Incompatible unit: ENV40HON

Class requirements: As determined by the relevant Honours department.

Assessment: Assessment determined by the relevant department's Honours program (100%)

ENV4HNB HONOURS ENVIRONMENTAL SCIENCE (60 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr John Webb*

This unit of study represents one semester of a year long program.

Honours degree students are selected based on their performance in the final year of the pass degree. There is no Department of Environmental Science so the Honours year and projects are carried out under the auspices of a department in the Faculty, usually agriculture, chemistry, geology, physics, or mathematics. The Honours year is structured according to principles applied to the other science discipline of the thesis supervisor and involves an extended scientific investigation into a scientific problem relating to the environment and some course-work relevant to the project. Approval of each fourth year enrolment must be given by the supervisor and the Environmental Science Coordinator.

Incompatible unit: ENV40HON

Class requirements: As determined by the relevant Honours department.

Assessment: Assessment determined by the relevant department's Honours program (100%)

GEN2EEG ECOLOGICAL AND EVOLUTIONARY GENETICS (20 CPs Sem. TE-SEM-2 BU.) *Dr Neil Murray*

Ideas and methods necessary for the study of animal, plant, and human populations are introduced and cover the following material. The nature and amounts of genetic variation in populations: protein and DNA variation, quantitative characters, mitochondrial, chloroplast, and nuclear genes. The genetic basis of micro evolutionary adaptation of organisms to their local environments, the distribution of genes in populations and molecular ecology. The use of DNA to determine evolutionary relationships in animals, plants, and humans. Also covered is application of these topics in the areas of plant and animal breeding, conservation biology and forensic science.

Prerequisite: BIO1GEN.

Quota: 160. Determined by results in BIO1GEN

Class requirements: Three 1-hour lectures and one 4-hour practical class per week.

Assessment: One 3-hour theory examination (70%), three practical assignments equivalent to 3000 words in total (30%)

GEN2HMG HUMAN AND MOLECULAR GENETICS (20 CPs Sem. TE-SEM-1 BU.) *Dr John Mitchell*

This unit introduces students to concepts and methods in human and molecular genetics. Topics covered may include: chromosome structure and function in eukaryotes; DNA synthesis and meiosis in eukaryotes; gene mapping in higher organisms; chromosome changes and their effects on meiosis; human chromosome abnormalities; chromosomes and cancer; the genetic basis of simple and complex traits in humans; the use of molecular techniques to identify polymorphisms of significance in human disease; micro evolutionary forces and genetic diversity; DNA in forensic sciences; human immunogenetics including genes controlling immune responses; immunogenetic markers in studies of disease and in anthropology; disease, immunity and lifestyle.

Prerequisite: BIO1GEN.

Quota: 160. Determined by academic performance in BIO1GEN

Class requirements: Three 1-hour lectures and one 4-hour practical class per week.

Assessment: One 3-hour theory examination (70%), practical assessment, and three tests equivalent to 3000 words in total (30%)

Recommended Reading:

Jobling, M.A., Hurler, M. and Tyler-Smith, C. *Human Evolutionary Genetics* Garland Science, New York, 2004.

Snustad, D.P. and Simmons, M.J. *Principles of Genetics (4th Ed)* John Wiley & Sons Inc., USA, 2006.

GEN3EEG ECOLOGICAL AND EVOLUTIONARY GENETICS (30 CPs Sem. TE-SEM-2 BU.) *Dr Yvonne Parsons*

This unit introduces students to advanced evolutionary and ecological genetics. The material is organized into four broad sections: (1) the origin, maintenance and distribution of genetic variation in natural populations; (2) evolutionary genetics of speciation and adaptation in natural populations incorporating quantitative genetics and the impact

of the change due to human disturbance; (3) human ecological and evolutionary genetics with a focus on human variation, disease and genomics; (4) population management for conservation and management of exploited populations. During the practical component, students will participate in the design and execution of a molecular research project aimed at providing useful skills for future studies and/or employment.

Prerequisite: GEN2EEG.

Recommended Prior Studies: GEN2HMG.

Quota: 100. Determined by results in GEN2EEG

Class requirements: Four 1-hour lectures and two 4-hour practical classes per week.

Assessment: Practical assignment (approx 4000 words) and assessments (40%), two 2-hour theory examinations (60%)

Recommended Reading:

Frankham, R., Ballou, J.D and Briscoe, D.A. *Introduction to conservation genetics* Cambridge University Press. 2002

GEN3HMG HUMAN AND MOLECULAR GENETICS (30 CPs Sem. TE-SEM-1 BU.) *Dr Mike Westerman*

This unit introduces students to more advanced concepts and methods in human and molecular genetics. Topics covered include: organisation of the genetic material, including molecular organisation of eukaryotic chromosomes, arrangement of chromosomes in the nucleus and mobile genetic elements in evolution; genetic structure of human populations; molecular evidence for human evolution; immunology — immunogenetics; differentiation, development and disease (including cancer and autoimmunity); interactions between culture and human biology; the Human Genome Project: its accomplishments; mapping of the human genome, implications and applications. The basis, identification, and diagnosis of single and multifactorial genetic diseases; gene therapy and stem cell therapy.

Prerequisite: GEN2HMG.

Recommended Prior Studies: GEN2EEG.

Quota: 100. Determined by performance in GEN2HMG

Class requirements: Four 1-hour lectures and two 4-hour practical classes per week.

Assessment: Practical assignments (30%), two 2-hour theory examinations (70%)

Recommended Reading:

GEN4HNA HONOURS GENETICS (60 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.)

Dr Graham Flannery

This unit of study represents one semester of a year long Honours program comprising GEN4HNA and GEN4HNB. This unit is available to students who have fulfilled the requirements of a science degree, provided their previous record be of a sufficient standard.

The Honours program lasts approximately nine months and usually commences in February each year, although it can commence in July. The program consists of a guided research project, a research essay on the area of the research project, two seminars on the topic of the research project and its findings, study units, and a thesis written at the completion of the research project. Potential students should contact the Honours coordinator in the Department for a full and comprehensive list of available research projects.

Class requirements: 40 to 60 contact hours per week.

This unit is not available for study abroad students.

Assessment: Semester 1: one 4000-word research essay (6%), two assignments, equivalent to 4500 words each (24%), Semester 2: one 15,000-word thesis (70%). The assessment components listed are the combined assessment for GEN4HNA and GEN4HNB

GEN4HNB HONOURS GENETICS (60 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.)

Dr Graham Flannery

GEO1ERS EARTH STRUCTURE, RESOURCES AND HISTORY OF LIFE (15

CPs Sem. TE-SEM-2 AW, BU.) *AW: Mr Martin Fussell, BU: Dr John Webb*

The first part of this unit covers the large-scale processes that deform the Earth's crust and cause earthquakes (plate tectonics), the faulting and folding that result, and the resources of the Earth (ore deposits, fossil fuels and groundwater) including their occurrence and formation. The following section describes the concept of geological time and the history of life on Earth, from microbes to humans, and the factors that have affected the evolution of plants and animals, including climate change and catastrophes like meteorite impacts. The practicals focus on the interpretation of geological maps and the study of fossils.

Class requirements: Three 1-hour lectures and one 3-hour practical period a week for 12 weeks and one one-day field excursion (weekend). Attendance at the practical classes and field excursions is essential and compulsory. The field excursion visits sites of particular geological interest and transport is provided.

Assessment: One 3-hour theory examination (60%), 1.5-hour practical examination (25%), five-practical assessments (equiv. to 500 words) (15%)

Prescribed Reading:

Marshak, S. *Essentials of geology*, Norton. 2007

GEO1PRO PROCESSES THAT SHAPE THE EARTH (15 CPs Sem. TE-SEM-1

AW, BU.) *AW: Mr Martin Fussell, BU: Dr John Webb*

In this unit, students are introduced to the study of planet Earth, its origin and evolution, its composition and the processes that have shaped it. After describing the planets of the solar system, the structure of the Earth, metamorphism and the composition of the Earth's crust are covered, particularly the different types of minerals and rocks that are present. Then the surface processes of volcanism, erosion, and deposition that shape the landscape are described, including the landforms and sediments produced in the various environments across the Earth's surface. The practical course focuses on mineral and rock identification.

Class requirements: Three 1-hour lectures and one 3-hour practical period a week and a one-day field excursion (weekend). Attendance at the practical classes and field excursion is essential and compulsory. The field excursion visits sites of particular geological interest and transport is provided.

Assessment: One 3-hour theory examination (60%), 1.5-hour practical examination (25%), five-practical reports (equiv. to 500 words) (15%)

Prescribed Reading:

Marshak, S. *Essentials of geology* Norton, 2007

GEO2EGL LANDSCAPE AND CLIMATE CHANGE (10 CPs Sem. TE-SEM-2

BU.) *Dr John Webb*

This unit may also be taken at third year level — refer to GEO3EGL. Students taking GEO3EGL will be expected to demonstrate a greater degree of subject understanding and discipline specific skills than students undertaking GEO2EGL do.

This unit covers the causes and effects of climate changes, particularly during the Quaternary glaciations over the last 2 million years, and discusses the impacts of these changes on the evolution of the Earth's landscape and on the people inhabiting it. The influence of tectonism (earth movements) on the landscape is also considered. Fundamental questions, including the formation and erosion of mountain ranges, the onset of aridity in Australia, and the impact of people on the landscape, are discussed. In addition, the soils and

regolith (weathered material) on the Earth's surface are described, along with the chemical and physical processes responsible for their formation, and related to climate history.

Class requirements: Two 1-hour lectures and one 3-hour practical session each week for nine weeks and one full-day excursion.

Assessment: One 2-hour examination (60%), five-practical reports (150 words each) and one-excursion assignment (equiv. to 250 words) (40%)

Recommended Reading:

Burroughs, W.J. *Climate change* Cambridge University Press, 2001.
Summerfield, M. A. *Global geomorphology* Longman 1991.

Williams, M. A. J. *Quaternary environments* Edward Arnold 1993.

GEO2EGR REMOTE SENSING AND GIS (10 CPs Sem. TE-SEM-2 BU.) *Dr John Webb*

This subject may also be taken at third year level, refer to GEO3EGR. Students taking GEO3EGR will be expected to demonstrate a greater degree of subject understanding and discipline specific skills than students taking GEO2EGR do.

This unit consists of several components, that cover the two main ways in which remotely sensed data can be collected (satellites and air photos), basic techniques of processing and interpreting the data, and how this data (and all other spatial data) can be plotted onto maps using GIS (geographic information systems) computer programs. In addition, GPS (global positioning systems) are discussed. The course introduces the basic theory of remote sensing, GIS and GPS, but focuses on the practical applications of the techniques, and the practical exercises cover a wide variety of topics.

Class requirements: Two 1-hour lectures and one 3-hour practical session each week.

Assessment: One 2-hour examination (60%), ten practical reports (100 words each) (40%)

Recommended Reading:

Lo, C. P. *Applied remote sensing* Longman Inc. 1986.

Lillesand, T. M. and Kiefer, R. W. *Remote sensing and image interpretation* 2nd edn, John Wiley and Sons 1987.

GEO2EGW SURFACE/GROUNDWATER FLOW AND CHEMISTRY (20 CPs Sem. TE-SEM-1 BU.) *Dr John Webb*

This unit may also be taken at third year level, refer to GEO3EGW. Students taking GEO3EGW will be expected to demonstrate a greater degree of subject understanding and discipline specific skills than students taking GEO2EGW do.

In this unit different aspects of water, in terms of surface flows (flooding, relationship to climate), groundwater (movement, recharge and discharge) and water geochemistry (chemical processes influencing the composition of surface and groundwater) are looked at. Problem-solving and data-interpretation practicals and a one-day excursion are used to illustrate these topics. There is a strong emphasis on environmental aspects, including land contamination (e.g., acid mine drainage), salinisation of the landscape, and estimation and sustainability of water resources.

Class requirements: Three 1-hour lectures, two 3-hour practical sessions per week and one full-day excursion.

Assessment: One 3-hour examination (60%), ten practical reports (150 words each) and one-excursion assignment (equiv to 500 words) (40%).

MAT1CFE CALCULUS AND FUNCTIONS FOR ECONOMICS (15 CPs Sem. TE-SEM-1 BU.) *Dr Brian Davey*

Mathematics 1CFE provides the mathematical foundation for all studies requiring knowledge of calculus. The focus is on the concepts and techniques of differentiation and integration. Topics studied include functions, limits, curve sketching, and techniques of

differentiation and integration. In addition, there is a segment on constrained optimisation, including the use of Lagrange multipliers. The teaching emphasis is on active student engagement in solving mathematical problems.

Recommended Prior Studies: VCE Mathematical Methods or Specialist Mathematics.

Incompatible unit: MAT11CFN, MAT11EN, ECO11QA, ECO12QA, MAT1CNS, MAT1CPE

Class requirements: Two 1-hour lectures, two 1-hour practice classes and one 1-hour lecture/workshop per week.

Assessment: Six fortnightly assignments (equivalent to 500 words) (10%), one 3-hour examination (80%), mid-semester tests (equivalent to 500 words) (10%)

MAT1CLA CALCULUS AND LINEAR ALGEBRA (15. CPs Sem. TE-SEM-2 AW, BU.) *Dr Grant Cairns*

In this unit, students will build on MAT1CNS/CFE/CPE to complete a coverage of the mathematics required for second year study in mathematics, engineering and mathematically-based disciplines. Approximately half the unit is about calculus, covering Taylor polynomials and first and second order differential equations. The other half contains a study of vectors, matrices, and systems of linear simultaneous equations. The teaching emphasis is on active student engagement in solving mathematical problems.

Prerequisite: MAT1CFN or MAT1CFE or MAT1CNS or MAT1CPE or MAT1EN.

Incompatible unit: MAT1FEN, MAT12CLA, MAT12FEN

Class requirements: Two 1-hour lectures, two 1-hour practice classes and one 1-hour lecture workshop per week.

Assessment: One 3-hour examination (80%), six fortnightly assignments (equivalent to 500 words) (10%), three diagnostic tests (equivalent to 500 words) (10%)

Prescribed Reading:

Printed unit text available from University Bookshop

MAT1CNS CALCULUS and NUMBER SYSTEMS (15. CPs Sem. TE-SEM-1 AW, BU.) *Dr Brian Davey*

Mathematics 1CNS is the foundation unit for all studies requiring a knowledge of mathematics. It reviews and extends material covered in VCE and introduces the ideas of mathematical reasoning with an overarching theme of clear communication skills in the mathematical sciences. The unit runs in two streams. One stream is dedicated to the concepts and techniques of differentiation and integration and, whilst there is much revision, there are many refinements and extensions of the ideas presented in VCE. as well as greater expectations of presentation of written material. The other stream commences with a review of algebra techniques and a formal treatment of sets and number systems and then proceeds to use these ideas, in the second half of the semester, in an introduction to mathematical logic and proof. The teaching emphasis is on active student engagement in solving mathematical problems.

Incompatible unit: MAT1CFE, MAT1EN, ECO11QA, MAT1CFN, MAT1CPE

Class requirements: Two 1-hour lectures, two 1-hour practice classes and one 1-hour lecture/workshop per week.

Assessment: One 3-hour examination (80%), six fortnightly assignments (equivalent to 500 words) (10%), three diagnostic tests (equivalent to 500 words) (10%)

Prescribed Reading:

Printed unit text available from University Bookshop

MAT1CPE CALCULUS and PROBABILITY FOR ENGINEERS (15. CPs Sem. TE-SEM-1 BU.) *Dr Brian Davey*

Mathematics 1CPE is the foundation unit for all engineering students. It reviews and extends material covered in VCE and introduces some of the ideas of mathematical reasoning with an overarching theme of clear communication skills in the mathematical sciences. This unit runs in two streams. One stream is dedicated to the concepts and techniques of differentiation and integration and, whilst there is much revision, there are many refinements and extensions of the ideas presented in VCE as well as greater expectations of presentation of written material. The other stream commences with a review of algebra techniques and a formal treatment of sets and number systems

and then, in the second half of the semester, uses these tools and calculus in a formal introduction to probability. The teaching emphasis is on active student engagement in solving mathematical problems.

Incompatible unit: MAT1CNS, ECO11QA, MAT1CFE, MAT1EN, MAT1CFN

Class requirements: Two 1-hour lectures, two 1-hour practice classes and one 1-hour problem solving class per week.

Assessment: One 3-hour examination (80%), six fortnightly assignments (equivalent to 500 words) (10%), three diagnostic tests (equivalent to 500 words) (10%)

Prescribed Reading:

Printed unit text available from University Bookshop

MAT1DM DISCRETE MATHEMATICS (15 CPs Sem. TE-SEM-1 BU.)

Coordinator to be advised

The unit is an introduction to discrete mathematics. In choosing the topics to be treated, particular attention has been paid to the important interface between mathematics and computer science. The underlying themes in the unit are introductions to algorithms and logic. Examples within each topic are chosen with a view to emphasising these underlying themes; wherever possible, examples are chosen to help develop students' problem-solving skills.

Recommended Prior Studies: VCE Mathematical Methods or VCE Specialist Mathematics or equivalent. MAT1CNS is highly recommended as a co-requisite.

Incompatible unit: CSE21DMO, MAT12DM, MAT11DM

Class requirements: Two 1-hour lectures, two 1-hour practice classes and one 1-hour tutorial per week.

Assessment: One 3-hour examination (80%), fortnightly assignments (10%), three short quizzes (equivalent to 500 words) (10%)

MAT1MCB MATHEMATICS AND COMPUTING FOR BIOLOGY (15. CPs Sem. TE-SEM-2 BU.) *Dr John Banks*

This unit is designed for students who do not have a strong background in mathematics. It provides the basic skills in algebra, calculus and computing that are required of students in the agricultural and biological sciences. Simple mathematical ideas are used to analyse examples drawn largely from agriculture and biology. This type of analysis is often useful in making predictions based on experimental data. In the mathematics tutorials, we use various software packages to extend the investigation of the mathematical models, which form the core of the unit. The computing component of the unit consists of lectures, practice classes, and programming work in the microcomputer laboratory. A bridging course for MAT1MCB students may be available if there is sufficient demand. **Recommended Prior Studies:** VCE Mathematical Methods, units 1 and 2.

Class requirements: Three 1-hour lectures, one 1-hour practice class and one 1-hour tutorial software laboratory per week.

Assessment: One 1.5-hour examination (40%), one 1.5-hour computer-based examination (35%), assignments equivalent to 1500 words (20%), regular quizzes (5%)

MAT2AAL APPLIED ALGEBRA (15. CPs Sem. TE-SEM-2 BU.) *Dr Brian Davey*

The study of algebraic structures, such as groups, fields, and vector spaces underpins a large amount of modern computer science. Group theory, the principal mathematical tool for analysing symmetry, is genuinely 20th century mathematics and has widespread applications in all areas of science. Field theory and linear algebra have important applications to coding theory, which is used to preserve the security of computer networks. This unit begins with some number theory then develops the basics of group theory, field theory and the axiomatic treatment of vector spaces. The material is presented with an emphasis on an understanding of the structures, and their applications.

Prerequisite: MAT1CLA.

Incompatible unit: MAT2PDM

Class requirements: Two 1-hour lectures and two 1-hour practice classes per week.

Assessment: One 3-hour examination (85%), six fortnightly assignments (equivalent to 750 words) (15%)

Prescribed Reading:

Printed unit text available from University Bookshop

MAT2ANA ANALYSIS (15. CPs Sem. TE-SEM-1 BU.) *Dr Jeffrey Brooks*

The limits of sequences and limits of functions are studied in this unit. Initially we study them in one-dimensional space and then in higher dimensions. We also study series and various tests are derived to determine the convergence or otherwise of these series. We then extend the basic idea of limit to include sequences of functions and sequences of sets. A powerful theorem called The Contraction Mapping Theorem will be derived. This theorem plays a fundamental role in analysis and its applications. We will use it to establish the existence and uniqueness of solutions to certain differential equations. We then use it together with the Hausdorff metric to study iterated function systems, which are used in computer graphics.

Prerequisite: MAT1CLA.

Incompatible unit: MAT2PAA

Class requirements: Two 1-hour lectures and two 1-hour practice classes per week.

Assessment: One 3-hour examination (85%), fortnightly assignments (equivalent to 750 words) (15%)

Prescribed Reading:

Printed unit text available from University Bookshop

MAT2LAL LINEAR ALGEBRA (15. CPs Sem. TE-SEM-2 BU.) *Dr Peter Stacey*

Linear algebra is one of the cornerstones of modern mathematics. Simple geometrical ideas, such as lines, planes, rules for vector addition and dot products arise in many places; including calculus, signal processing, mechanics, differential equations, and numerical analysis. This unit is an introduction to the mathematics, which allows these geometrical ideas to be applied in non-geometrical contexts, such as decomposing a signal into periodic components.

Prerequisite: MAT1CLA or MAT1FEN.

Incompatible unit: MAT21LA, MAT21ELA, MAT2LA, MAT2ELA

Class requirements: Two 1-hour lectures and two 1-hour practice classes per week.

Assessment: One 3-hour examination (85%), fortnightly assignments (equivalent to 750 words) (15%)

Prescribed Reading:

Printed unit text available from University Bookshop

MAT2MEC MECHANICS (15. CPs Sem. TE-SEM-2 BU.) *Professor E. Smith*

In this unit students deal with the kinematics and dynamics of a particle and systems of particles, and some of the types of differential equations, which arise in the mathematical descriptions of the motions, studied. The main mechanical topics emphasize the study of particle dynamics and conservation laws, rigid rotating bodies and the two-body problem with central forces, based on Newton's second law of motion. The new solutions of differential equations considered are solutions of second order differential equations with non-constant coefficients, with expansions about ordinary points and regular singular points. The main tools used are derived from concepts in MAT2VCA.

Prerequisite: MAT2VCA or MAT2AVC.

Incompatible unit: MAT2AM, MAT22AM

Class requirements: Two 1-hour lectures and two 1-hour practice classes per week.

Assessment: One 3-hour examination (85%), fortnightly assignments (equivalent to 750 words) (15%)

Prescribed Reading:

Printed unit text available from University Bookshop

MAT2MFC MATHS TOPICS FOR COMPUTER SCIENCE (15. CPs Sem. TE-SEM-2 BU.) *Mr Kevin Bickell*

In this unit students examine a number of mathematical topics of interest and use to computer science students. In particular, it is appropriate for students enrolled in the Bachelor of Computer Systems Engineering and Bachelor of Computer Science degrees and is a core subject for the former. The unit treats theoretical foundations and numerical aspects of topics including relational algebra, finite state machines, regular and context free languages, Turing machines and computability. Also covered are the Z-transform (generating functions), random number generators, cryptography, parameterised curves, and Bezier curves. These topics have applications to areas

such as databases, performance analysis and computer graphics.

Prerequisite: MAT1DM and (MAT1CNS or MAT1CPE or MAT1CFN).

Incompatible unit: MAT2MCS

Class requirements: Two 1-hour lectures and two 1-hour practice classes per week.

Assessment: One 3-hour examination (85%), fortnightly assignments (equivalent to 750 words) (15%)

Prescribed Reading:

Printed unit text available from University Bookshop

MAT2VCA VECTOR CALCULUS (15. CPs Sem. TE-SEM-1 BU.) *Dr Katherine Seaton*

Many quantities in the physical world can be represented by smoothly varying functions of position. This unit develops, with a computational flavour, the differential, and integral calculus of scalar and vector fields in Cartesian and curvilinear coordinates. Three important partial differential equations are introduced: the wave equation, the heat equation, and Laplace's equation; they are reduced to several ordinary differential equations by the technique of separation of variables. In another part of the unit, Laplace transforms are introduced as a technique for solving constant coefficient ordinary differential equations with discontinuous forcing terms.

Prerequisite: MAT12CLA OR MAT12FEN OR MAT1CLA OR MAT1FEN.

Incompatible unit: MAT2AVC

Class requirements: Two 1-hour lectures and two 1-hour practice classes per week.

Assessment: One 3-hour examination (85%), fortnightly assignments (equivalent to 750 words) (15%)

Prescribed Reading:

Printed unit text available from University Bookshop

MAT3AC ADVANCED CALCULUS AND COSMOLOGY (15 CPs Sem. TE-SEM-1 BU.) *Dr TBA*

This unit has a dual purpose. The first is to unify linear algebra and vector calculus from second year into the sort of calculus used in differential geometry and analysis. The second aim is to use this advanced calculus to model the evolution of the large-scale structure of the Universe using Einstein's theory of gravity. Topics include advanced calculus on curves and surfaces, implicit and inverse function theorems, the calculus of variations and geodesics, surfaces and curvature, introduction to space-time and its geometry, modelling the expansion of the Universe with general relativity. No background in physics is assumed.

Prerequisite: (MAT21LA and MAT21AVC) or (MAT2LAL and MAT2VCA).

Co-requisite: None.

Incompatible unit: None

Class requirements: Two 1-hour lectures and one 1-hour practice class per week.

Assessment: One 3-hour examination (80%), regular assignments (20%)

MAT3AMP APPLIED MATHEMATICS PROJECTS (15. CPs Sem. TE-SEM-2 BU.) *Dr TBA*

This unit introduces the student to mathematical modelling using some of the important computer-based tools available to the professional applied mathematician. Models in various areas of applied mathematics, such as heat and mass transport, financial mathematics, biomathematics, statistical mechanics and dynamic systems, are considered. The student will complete projects in these topics through integrated usage of FORTRAN programming for numerical analysis, Maple programming for symbolic computation and graphics, advanced spreadsheet use for data manipulation and a text-processing package for mathematical document preparation.

Prerequisite: (MAT2APD or MAT2VCA) and (MAT2AM or MAT2MEC) and (MAT3NA or MAT3SC).

Class requirements: One 1-hour lecture and two hours of computer laboratory sessions per week.

Assessment: One 1500-word literature survey (10%), and three programming projects (30% each) (90%)

MAT3CZ COMPLEX ANALYSIS (15. CPs Sem. TE-SEM-1 BU.) *Dr David McLaren*

The theory of functions of a complex variable aims at extending calculus to the complex domain. Both differentiation and integration acquire new depth and significance. After introducing complex functions of a complex variable, the course covers the differentiation, analyticity, and integration of such functions, including pole singularities and residues. Important integration theorems are followed by application to Fourier transforms and the use of the latter in solving ordinary differential equations. The discussion of complex functions includes branch points and branch cuts, and conformal mappings. The more advanced integration topics include a proof of Jordan's lemma, integration tricks for otherwise intractable real integrals, and the application of contour integration to find Laplace transforms.

Prerequisite: MAT21AVC and MAT22APD; or MAT21PAA; or MAT2ANA; or MAT2VCA.

Incompatible unit: MAT31CZE

Class requirements: Two 1-hour lectures and one 1-hour practice class per week.

Assessment: One 3-hour final examination (85%), regular assignments (15%)

MAT3DQ DYNAMICS AND QUANTUM MECHANICS (15 CPs Sem. TE-SEM-2 BU.) *Dr Peter Stacey*

The first component of this unit, dynamics, is concerned with the Hamiltonian description of classical mechanics (in contrast with MAT22AM, which looks at the Newtonian description). The approach due to Hamilton allows the dynamics to be derived from a scalar function (the Hamiltonian) and reveals more of the structure and underlying principles, which govern the dynamics. Topics include conservation laws and canonical transformations. The second component is quantum mechanics and we use the Hamiltonian treatment of the classical central force problem of gravity (the Kepler problem) and electrostatics (the Coulomb problem) to bridge the gap between classical and quantum mechanics. Topics include energy Eigen value problems in one, two, and three dimensions and the hydrogen atom is treated as the quantisation of the classical Coulomb problem.

Prerequisite: MAT2MEC.

Co-requisite: None.

Incompatible unit: None

Class requirements: Two 1-hour lectures and one 1-hour practice class per week.

Assessment: One 3-hour examination (85%), regular assignments (15%)

MAT3DS DISCRETE ALGEBRAIC STRUCTURES (15 CPs Sem. TE-SEM-2 BU.)

Dr Brian A. Davey

Assessment and class requirements depend upon number of students enrolled. If more than 16 students enrolled, assessment will be one 3-hour examination (80%), four assignments (20%), and *Class requirements:* three 1-hour lectures per week.

This unit is a continuation and expansion of MAT22PDM. Further applications of finite groups to counting problems will be given. Finite fields and their applications will be discussed. The applications of ring theory to the classification of cyclic codes will be presented. Approximately half the unit will be devoted to ordered sets, lattices, and Boolean algebras. Applications of lattices to concept analysis and applications of ordered sets to computer science will be discussed.

Prerequisite: MAT22PDM or MAT2AAL.

Class requirements: Three 1-hour problem sessions per week.

Assessment: One 2-hour examination (60%), six assignments (one per fortnight) equivalent to 1750 words in total (40%). To pass the unit students must obtain a pass grade in the examination, attend at least 80% of all classes, and pass all assignments.

Davey, B.A. and Priestley, H.A. *Introduction to lattices and order* Second Edition, Cambridge University Press, 2001

Recommended Reading:

N. Biggs *Discrete Mathematics* Oxford University Press, 1985

MAT3LPG LINEAR PROGRAMMING AND GAME THEORY (15 CPs Sem. TE-SEM-2 BU.) *Dr Grant Cairns*

Linear Programming and Game Theory are relatively new branches of mathematics. Linear Programming involves maximising and minimising a linear function subject to inequality and equality constraints. Such problems have many economic and industrial applications. Game Theory deals with decision making in a competitive environment. This unit studies the simplex technique for solving linear programming problems and introduces game theory and its applications.

Prerequisite: MAT21LA or MAT21ELA or MAT2LAL.

Incompatible unit: MAT3ALP

Class requirements: 26 lectures and 13 practice classes.

Assessment: One 3-hour examination (80%), 6 written assignments equivalent to 1000 words in total (20%)

MAT3MFM MATHEMATICAL FLUID MECHANICS (15 CPs Sem. TE-SEM-2 BU.) *Professor Ed Smith*

This subject is delivered in fully on-line mode. Each fortnight lecture notes will be posted on-line. There will be worked problems each fortnight with answers available in a separate format. A bulletin board discussion will be provoked twice weekly. All emails will be guaranteed a response within 48 hours of receipt. The examination will be supplied on-line with defined start and end times.

An introduction to incompressible fluid flow, with emphasis on the structure of basic approximations in the theory of fluids and solutions of problems using the approximations. The unit is fully online.

Prerequisite: MAT21AVC or equivalent, MAT31CZ or equivalent.

Class requirements: Online work equivalent to two 1-hour lectures and one 4-hour problem-solving session per week.

Assessment: One 3-hour examination (70%), two assignments (long problems) (30%)

MAT3SC SCIENTIFIC COMPUTING (15. CPs Sem. TE-SEM-1 BU.) *Professor Edgar Smith*

Numerical mathematics studies both the accuracy and stability of computations and thus plays a vital role whenever computers are used to solve quantitative problems. The main theme of this unit is an introduction to numerical computing, including floating-point arithmetic, sources of error, ill conditioning, and stability of algorithms. This theme is illustrated by developing and analysing algorithms for solving non-linear equations and differential equations and for evaluating integrals. The practice classes will be conducted using MATLAB as a computational environment. No previous experience with MATLAB is required.

Prerequisite: MAT1CLA or MAT1FEN.

Incompatible unit: MAT3NA, CSE31NC

Class requirements: Two 1-hour lectures and one 2-hour computer laboratory based practice class per week for thirteen weeks.

Assessment: One 3-hour examination (70%), two programming assignments (equivalent to 1250 words) (24%), software laboratory work (6%)

Prescribed Reading:

Printed unit text available from University Bookshop

MAT3TA TOPOLOGY AND ANALYSIS (15 CPs Sem. TE-SEM-1 BU.) *Dr John Banks*

The concept of the real numbers underpins a major part of mathematics, both pure and applied. This unit begins with a careful construction of the real numbers and a discussion of their properties. This is followed by a discussion of the theory of metric spaces. The most basic properties of open sets in metric spaces can be used to motivate a more generally applicable definition of open sets, which leads to the idea of a topological space. A study of fundamental concepts in the theory of topological spaces such as compactness and connectedness yields results of very general application. In particular, they can be applied to problems in the analysis of the real numbers. The unit concludes with a discussion of quotients and products of topological spaces.

Prerequisite: MAT22PAB or MAT2ANA.

Co-requisite: None.

Incompatible unit: None

Class requirements: Two 1-hour lectures and one 1-hour practice class per week.

Assessment: One 3-hour final examination (80%), regular assignments (20%)

MAT4AA ASYMPTOTIC ANALYSIS (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Coordinator to be advised*

This unit is offered subject to sufficient enrolments.

This unit examines how we can describe a function as its argument becomes large. We first define the language of asymptotics and then consider various techniques for obtaining asymptotic expansions. This unit also introduces or expands your knowledge of special functions, such as the Bessel functions and the Airy functions.

Prerequisite: MAT31CZ and requires coordinator's approval.

Incompatible unit: MAT41AA, MAT42AA

Class requirements: Two 1-hour seminars per week requiring extensive preparation for class presentations.

Assessment: Four assignments each equivalent to 1,100 words (100%)

MAT4AMP APPLIED MATHEMATICS PROJECT (15. CPs Sem. TE-SEM-2 BU.) *Coordinator to be advised*

Offered subject to sufficient enrolments.

This unit introduces students to mathematical modelling using some of the computer-based tools available to the professional applied mathematician. Models in various areas of application, such as heat and mass transport, financial mathematics, biomathematics, statistical mechanics and dynamic systems are considered. Students will complete projects in these topics through integrated use of FORTRAN programming for numerical analysis, Maple programming for symbolical computation and graphics, advanced spreadsheet use for data manipulations and a text-processing package for mathematical document preparation. This unit is an Honours version of the existing subject, MAT32AMP. A higher level of understanding will be expected.

Prerequisite: (MAT22AM and MAT22APD and MAT31NA) or (MAT22AM and MAT22APD and CSE11OOJ and CSE12IPJ) and requires coordinator's approval.

Incompatible unit: MAT32AMP

Class requirements: One 1-hour lecture and two hours of computer laboratory sessions per week.

Assessment: 1500 word literature survey (10%), Three 20 hour programming projects (90%)

MAT4ATM ADVANCED TOPICS IN MATHEMATICS (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr John Banks*

Offered subject to sufficient enrolments in 4th year Mathematics. Specific content may depend on preferences of 4th year mathematics students.

This unit is offered from time-to-time as a seminar series. The majority of the seminars are conducted by experts with an international reputation. Topics for 2005 will be available from the Department from December 2004.

Prerequisite: Dependent on the specific content and will be advised by the Mathematics Section Honours Coordinator. Requires coordinator's approval for enrolment into this unit.

Class requirements: Two 1-hour seminars per week requiring extensive preparation for class presentations.

Assessment: Five assignments each equivalent to 900 words (100%)

MAT4BA INTRODUCTION TO BANACH AND C^* -ALGEBRAS (15 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Peter Stacey*

Offered subject to sufficient enrolments.

C^* -algebras can be regarded both as infinite dimensional matrix algebras and 'non-commutative topological spaces'. This is because the commutative C^* -algebras are algebras of continuous functions on locally compact Hausdorff spaces and the finite dimensional C^* -algebras are direct sums of matrix algebras. This unit introduces both aspects, including the Gelfand-Naimark Theorem describing commutative C^* -algebras and the Gelfand-Naimark-Segal construction describing how to represent C^* -algebras as algebras of bounded operators on Hilbert space.

Prerequisite: MAT31CZ and MAT31TA and MAT32DS and requires coordinator's approval.

Class requirements: Two 1-hour lectures per week requiring extensive preparation.

Assessment: Five 900-word assignments (100%)

MAT4CG CONSTRUCTIONS IN GEOMETRY (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr John Strantzen*
Not available in 2008

MAT4CI COMPUTABILITY AND INTRACTABILITY (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Marcel Jackson*
Not available in 2008

MAT4DS CHAOS AND ORDER IN DYNAMICAL SYSTEMS (15 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Professor Reinout Quispel*

Offered subject to sufficient enrolments.

What is chaos? How does it arise in dynamical systems? What other dynamical phenomena exist, or to put it slightly differently: what are the different kinds of dynamical systems? If one has a differential equation that exhibits chaos, how should one solve it? These are some of the ingredients of this unit. The exact mix of ingredients is adjusted from year to year, depending on students' interest and background.

Prerequisite: At least 30 credit points of second or third year mathematics units and requires coordinator's approval.

Class requirements: Two 1-hour seminars per week requiring extensive preparation for class presentations.

Assessment: One 2000-word equivalent project (50%), one 2-hour examination (50%)

MAT4DT DUALITY THEORY (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Brian Davey*

Offered subject to sufficient enrolments.

The unit will begin with a primer on category theory, general algebra, and topology. The aim will be to emphasize the algebra and use, but downplay the category theory and topology. We shall cover the general theory of dualities (between classes of algebras and classes of topological relational structures). The theory will be applied to prove the classical dualities for Abelian groups and Boolean algebras, the neo-classical duality for distributive lattices and a host of other less familiar dualities as well. Applications of duality theory will also be presented.

Prerequisite: MAT32DS and MAT31TA and requires coordinator's approval.

Class requirements: Three 1-hour seminars per week requiring extensive preparation for class presentations.

Assessment: Six assignments each equivalent to 750 words (100%)

Prescribed Reading:

Clark and Davey *Natural Dualities for the Working Algebraist* CUP, 1998

MAT4GA GENERAL ALGEBRA (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Brian Davey*

Offered subject to sufficient enrolments.

General algebra, otherwise known as universal algebra, provides a theory within which to study the common features of all algebraic systems such as vector spaces, groups, rings, lattices and semi groups. The unit will present all of the basic results in the theory as well as introducing important recent developments. The close relationship between general algebra and lattice theory will be emphasised throughout.

Prerequisite: MAT32DS and requires coordinator's approval.

Recommended Prior Studies: MAT31TA.

Class requirements: Three 1-hour seminars per week requiring extensive preparation for class presentations.

Assessment: Six assignments each equivalent to 750 words (100%)

MAT4GG GROUP ACTIONS (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Grant Cairns*

Offered subject to sufficient enrolments.

This unit studies the foundations of the theory of group actions. In doing so, it touches on a selection of topics, which display interconnections between geometry, group theory, topology, and calculus.

Prerequisite: MAT31TA and MAT32DS and requires coordinator's approval.

Class requirements: Two 1-hour seminars per week requiring extensive preparation for class presentations.

Assessment: Ten assignments each equivalent to 450 words (100%)

MAT4GM GEOMETRIC METHODS FOR DIFFERENTIAL EQUATIONS (15.

CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Geoff Prince*

Not available in 2008

MAT4MFM MATHEMATICAL FLUID MECHANICS (15. CPs Sem. TE-SEM-1

BU. TE-SEM-2 BU.) *Professor Edgar Smith*

Offered subject to sufficient enrolments.

An introduction to incompressible fluid flow, with emphasis on the structure of basic approximation in the theory of fluids. Solution of problems using the approximations. This unit is fully online. This unit is a substantial extension of the third year subject, MAT32MFM. A higher level of understanding will be expected.

Prerequisite: MAT21AVC and MAT31CZ and requires coordinator's approval.

Incompatible unit: MAT40HON, MAT32MFM

Class requirements: Online work equivalent to two 1-hour lectures and one 4-hour problem solving session per week.

Assessment: Two assignments each equivalent to 750 words (30%), One take-home examination (equivalent to one 3-hour examination) (70%)

MAT4NT NUMBER THEORY (15 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.)

Professor Reinout Quispel

This unit will be offered subject to sufficient enrolments.

We will commence this unit with an introduction to number theory. In the later parts of the unit, we will treat topics such as congruences, residues, continued fractions, Diophantine equations, transcendental numbers, and/or primality and factoring. Depending on student interest and time constraints, we may also touch on tantalising connections to cryptography and/or one or more of the recent analytic and algorithmic advances in the areas of Mersenne primes, the Riemann hypothesis, and primality proving. This unit will be accessible and interesting to a varied audience, including students with interests in applied mathematics, pure mathematics, or computer science.

Prerequisite: MAT11DM and MAT22PDM and MAT12CLA, or 30 credit points of second year units or any third year mathematics unit and requires coordinator's approval.

Class requirements: Two 1-hour lectures per week requiring extensive preparation.

Assessment: Two – four assignments (equivalent to 3000 words) (65%) The number of assignments is subject to negotiation with students on an individual basis, one oral examination (approximately 30 minutes) (35%)

MAT4TD TOPOLOGY AND DYNAMICS (15 CPs Sem. TE-SEM-1 BU.) *Dr*

John Banks

This unit will only be available subject to sufficient enrolments.

We commence with some ideas of very general application in point set topology that lead to proofs of the Alexander lemma and Tychonoff's theorem. These ideas underpin an exploration of the theory of topological dynamics, where we study the behaviour of dynamical systems using topological concepts. In particular, we consider the way in which open sets evolve dynamically and other concepts underlying the definition of chaos.

Prerequisite: Requires coordinator's approval.

Class requirements: Two 1-hour seminars per week requiring extensive preparation for class presentations.

Assessment: A project equivalent to 2700 words (60%), two assignments each equivalent to 900 words (40%)

Prescribed Reading:

Dr. John Banks Printed notes will be supplied

MAT4THA MATHEMATICS THESIS A (15 CPs Sem. TE-SEM-1 BU. TE-SEM-2

BU.) *Dr John Banks*

This unit is part of a 45 credit point thesis program. Students will not be given a final mark until they complete MAT4THB

Students commence a project that takes the equivalent of six months of continuous work under the supervision of a member of staff. The project is completed and written up as a thesis when the student completes the unit MAT4THB. All students are required to present a seminar outlining the proposed project at a time to be determined by the mathematics Honours coordinator. It is strongly recommended that students who wish to complete the total requirements of the thesis in one semester (45 credit points) should commence preliminary reading for the project no later than the end of second semester in the previous year. A list of prospective topics and supervisors is available from the Mathematics Section.

Prerequisite: A pass in 60 credit points of third year Mathematics subjects with at least a B average. Enrolment requires coordinator's approval.

Incompatible unit: MAT41THA

Class requirements: Supervised research under the direction of a member of staff equivalent to a total of 150 hours.

Assessment: A thesis equivalent to 13,000 words (100%) This is the combined assessment for MAT4THA and MAT4THB

MAT4THB MATHEMATICS THESIS B (30 CPs Sem. TE-SEM-1 BU. TE-SEM-2

BU.) *Dr John Banks*

This unit is part of a 45 credit point thesis program.

Students complete the project commenced in MAT4THA, writing up the results as a thesis. All students are required to present a seminar on their project after the thesis has been submitted. It is strongly recommended that students who wish to complete the thesis requirements in one semester by taking both this unit and MAT4THA commence preliminary reading for the project no later than the end of second semester in the previous year. A list of prospective topics and supervisors is available from the Mathematics Section.

Prerequisite: Enrolment requires coordinator's approval.

Class requirements: Supervised research under the direction of a member of staff equivalent to a total of 450 hours.

Assessment: A thesis equivalent to 13,000 words (100%) Combined assessment for MAT4THB and MAT4THA

MED2IMM IMMUNOLOGY (20. CPs Sem. TE-SEM-2 BU.) *Dr Peter*

Cartwright, Mr Steve Jones

This unit will be offered subject to staff availability

This unit introduces Immunology, a field that now covers genetics, cell biology, protein chemistry, biotechnology, and medicine. Topics include the production and structure of the antibody molecules; vaccine development; the factors, which influence immune responsiveness; the development of allergies and autoimmune disease such as multiple sclerosis and rheumatoid arthritis and the maintenance of physiological function during invasion by 'foreign' organisms or the development of cancerous cells within the body.

Prerequisite: BCH2BMA or GEN2HMG or MIC2IM.

Quota: 50. Academic merit based on marks in prerequisite units.

Places will be allocated to Bachelor of Medical Science students in the first instance.

Class requirements: Three 1-hour lectures and one 3-hour practical class per week.

Assessment: Practical assignments equivalent to 2500 words (25%), one 3-hour examination (70%), practical test (5%)

Recommended Reading:

Janeway, C.A., Travers, P., Walport, M., Schlomchik, M.J. *Immunobiology* 6th edn, Garland Science Publishing, 2005

MED3MSA ADVANCED TOPICS IN MEDICAL SCIENCE A (30. CPs Sem.

TE-SEM-1 BU.) *Professor Don Phillips, Dr Elizabeth Johnson*

This unit consists of components in neuroscience and cognitive disorders and human genome metabolism and metabolic disorders, and genetic disease. The first component examines human cognitive disorders (e.g., multiple sclerosis, Alzheimer's disease, Parkinson's disease, schizophrenia) studied in terms of the underlying neurological disturbance. The second component covers proteases,

proteinase inhibitors and human health, and the role of mitochondria in cell function. The third component examines the human genome project, identifying and characterising disease genes, diagnosis, treatment, and ethics.

Prerequisite: 80 credit points at second year of the Bachelor of Medical Science course.

Incompatible unit: NUT31ATN

Quota: 40. This subject is only available to students enrolled in the Bachelor of Science (Medical Science).

Class requirements: Four 1-hour lectures per week and an average of 10 hours of practicals/tutorials/workshops per week.

Assessment: Case studies and assignments equivalent to 2250 words (15%), two 2-hour end of semester written examinations (60%), reports and class performance in practicals equivalent to 2500 words (25%)

MED3MSB ADVANCED TOPICS IN MEDICAL SCIENCE B (30. CPs Sem. TE-SEM-2 BU.) *Professor Don Phillips, Dr Elizabeth Johnson*

This unit consists of components in neuromuscular disorders, infectious diseases, and cancer biology. The first component examines topics such as normal structure and function of skeletal muscle, disturbances of neuromuscular transmission, surface membrane excitability and excitation-contraction-relaxation cycle, muscular dystrophies, inflammatory myopathies and congenital myopathies. Topics in the second component comprise major human bacterial and viral diseases (characteristics, symptoms and methods of spread), control of infectious diseases (vaccines, antibiotics and new technologies), and emerging infectious diseases. The final component examines the origins of cancer, cell cycle control and cell death, metastasis and angiogenesis, tumour immunology and molecular pharmacology and therapeutics.

Prerequisite: 80 credit points at second year of the Bachelor of Medical Science course.

Quota: 40. This subject is available only to students enrolled in the Bachelor of Medical Science

Class requirements: Four 1-hour lectures per week and an average of 10 hours of practicals/tutorials/workshops per week.

Assessment: two 2-hour end of semester written examinations (60%), reports and class performance in practicals equivalent to 2500 words (25%), case studies and assignments equivalent to 2250 words (15%)

MED4HNA HONOURS MEDICAL SCIENCE (60 CPs Sem. TE-SEM-1 BU.)

Professor Don Phillips

Honours degree students are selected based on their performance in the final year of the pass degree. This unit of study represents the first semester of a year long program. Students MUST complete both MED4HNA and MED4HNB in the one academic year.

The Honours year will comprise a project related to Medical Science plus associated coursework. Students will normally be based in one of the Departments, which contribute to MED3MCG and MED3NIC.

The project will contribute to the final result in the proportion applying to all Honours students in that Department. With the approval of the Departmental Honours Coordinator, the coursework component may include work undertaken in another Department. Overall assessment will be the same as for the existing Honours program offered by that Department. A consolidated ranking of Honours students in the Department will be produced. Each fourth year program requires approval by the supervisor and the relevant Departmental Honours Coordinator. The Medical Science Course Adviser may facilitate this process.

Incompatible unit: MED40HON, MED41HON

Class requirements: As prescribed by the relevant Department.

This unit is not available for study abroad students.

Assessment: Assessment determined by the relevant Department Honours program (100%)

MED4HNB HONOURS MEDICAL SCIENCE (60 CPs Sem. TE-SEM-2 BU.)

Professor Don Phillips

Honours degree students are selected based on their performance in the final year of the pass degree. This unit of study represents the second semester of a year long program. Students MUST complete both MED4HNA and MED4HNB in the one academic year.

The Honours year will comprise a project related to Medical Science

plus associated coursework. Students will normally be based in one of the Departments, which contribute to MED3MCG and MED3NIC.

The project will contribute to the final result in the proportion applying to all Honours students in that Department. With the approval of the Departmental Honours Coordinator, the coursework component may include work undertaken in another Department. Overall assessment will be the same as for the existing Honours program offered by that Department. A consolidated ranking of Honours students in the Department will be produced. Each fourth year program requires approval by the supervisor and the relevant Departmental Honours Coordinator. The Medical Science Course Adviser may facilitate this process.

Incompatible unit: MED40HON, MED42HON

Class requirements: As prescribed by the relevant Department.

This unit is not available for study abroad students.

Assessment: Assessment determined by relevant Department Honours program (100%)

MIC1IEP INFECTIONS AND EPIDEMICS. (15 CPs Sem. TE-SEM-1 BU.) *Dr Vilma Stanisich*

This unit is a first year elective to students whose degree structures allow them to undertake such electives. Students whose current degree rules require them to take four first year core biology (BIO code) units will not be permitted to enrol in this unit, as their unit distribution would then be too heavily biological.

Throughout history, microbial infections and epidemics have threatened human well being and survival. New infectious agents continually emerge, old foes become resistant to treatment, and constant surveillance is needed to ensure public safety. In this unit, humanity's battle against infectious microorganisms is portrayed through discussion of a variety of specific diseases, both ancient and modern, from the plague in mediaeval Europe to AIDS in modern times. Selected bacterial (eg. meningococcal disease), viral (eg. influenza, SARS), fungal (eg. thrush) and protozoal (eg. malaria) infections are used to illustrate the principles behind their treatment and prevention (eg. antibiotics, vaccines, public health measures). Note: A pass in this unit is not sufficient to meet the prerequisites for enrolment in second Year Microbiology subjects.

Students are required to wear laboratory coats and shoes in teaching laboratories.

Quota: 48. Students ranked by ENTER score

Class requirements: Three 1-hour lectures, one 2-hour practical class/tutorial per week.

Assessment: One 3-hour examination (75%), one 1000-word assignment (25%)

MIC2IM INTRODUCTORY MICROBIOLOGY (20. CPs Sem. TE-SEM-1 BU.)

Dr Christian Barth

Students are required to wear laboratory coats and shoes in teaching laboratories.

Unit topics include introduction to microbiology, microbial genetics, and diversity of the microbial world.

Prerequisite: BIO1IOF (previously BIO1IOF).

Incompatible unit: AGR31ANP, AGR3ANH

Quota: 215. Enrolment based on academic merit in the first year.

Class requirements: Three 1-hour lectures and one 3-hour practical period per week.

Assessment: One 3-hour written examination (65%), one 1-hour practical examination (15%), three 400-word practical reports (20%)

Prescribed Reading:

Madigan, M. T. Martinko, J. M. and Parker, J. Brock: *Biology of Microorganisms* 10th edn, Prentice Hall 2002 or Prescott, L., Harley, J. and Klein, D.A. *Microbiology* 6th edn, 2004.

MIC2MVM MEDICAL AND VETERINARY MICROBIOLOGY (20. CPs Sem. TE-SEM-2 BU.) *Dr Christian Barth*

Students are required to wear laboratory coats and shoes in teaching laboratories.

Unit topics include medical and veterinary microbiology, virology, epidemiology, and molecular pathogenesis.

Prerequisite: Satisfactory performance in MIC2IM, (or AGR3ANH for Bachelor of Animal and Vet Biosciences students) or BIO1IOF for

Bachelor of Medical Science or Bachelor of Nutrition students who have completed at least 90 first year credit points.

Quota: 215. Enrolment based on academic merit in the first year.

Class requirements: Three lectures and one 3-hour practical class a week.

Assessment: One 3-hour written examination (65%), one 1-hour practical examination (15%), three 400-word practical reports (20%)

Prescribed Reading:

Madigan, M. T. Martinko, J. M. and Parker, J. Brock: *Biology of Microorganisms* 10th edn, Prentice Hall 2002 or
Prescott, L., Harley, J. and Klein, D. A. *Microbiology* 6th edn, 2004.

MIC3AMM ADVANCED MEDICAL AND VETERINARY MICROBIOLOGY (30. CPs Sem. TE-SEM-1 BU.) *Dr Christian Barth*

This unit comprises components in virology, medical microbiology, and molecular pathogenesis. The first component includes the biology and replication of animal viruses, viral pathogenicity, and the control and treatment of virus diseases. The medical microbiology component includes topics on the normal body flora, oral pathology, respiratory, enteric and sexually transmitted diseases, mechanisms of pathogenicity, hypersensitivity, and identification of disease and nosocomial infections. Molecular pathogenesis topics include a detailed analysis of how various bacteria (e.g., *Helicobacter*, *Listeria*, *Legionella*, and *Chlamydia*), protozoa, and fungi cause diverse diseases. The unit also includes topics on microorganisms causing contamination in food and those used in food production.

Prerequisite: MIC2IM or AGR3ANH and MIC2MVM except for Bachelor of Medical Science students who have passed MIC2MVM.

Quota: 120. Enrolment based on academic merit.

Class requirements: Four 1-hour lectures and three 3-hour practical classes per week.

Assessment: One 3-hour written examination and one 2-hour written examination (70%), four 650-word practical reports or equivalent oral presentations (30%)

MIC3AGM ADVANCED GENERAL MICROBIOLOGY (30. CPs Sem. TE-SEM-2 BU.) *Dr Christian Barth*

This unit comprises components of applied plasmid biology, microbial genetics, and microbial cell biology. Plasmid biology encompasses the principles and procedures relevant to plasmid detection; characterization; subunit determination; applications in molecular biology; evolution and significance to the bacterial host. Microbial genetics topics include the regulation of gene expression and transcript processing. The microbial cell biology component deals with how prokaryotes and eukaryotes process information in the DNA and in extracellular signals (signal transduction).

Prerequisite: MIC2IM or AGR3ANH and MIC2MVM except for Bachelor of Medical Science students who have passed MIC2MVM.

Incompatible unit: MIC3EPM

Quota: 120. Enrolment based on academic merit.

Class requirements: Four 1-hour lectures and three 3-hour practical classes per week.

Assessment: One 3-hour written examination and one 2-hour written examination (70%), four 650-word practical reports or equivalent oral presentations. (30%)

MIC4HNA HONOURS MICROBIOLOGY (60 CPs Sem. TE-SEM-1 BU.)

Professor Paul R. Fisher

This unit of study represents the first semester of a year-long program. Students MUST complete both MIC4HNA and MIC4HNB in the one academic year.

The Honours course consists of a one year supervised research project and a relatively minor course work component. Microbiological research is as varied in its nature as the microbial world itself and the research interests of the Department of Microbiology reflect this diversity. Programs are potentially available within the Department in the areas of microbial physiology, microbial biochemistry, molecular biology, and epidemiology of human and animal viruses, the molecular genetics of bacterial plasmids and of bacterial synthesis of polysaccharides and the molecular biology of signal transduction and mitochondrial disease using slime moulds as models for higher organisms. More details can be found at www.latrobe.edu.au/microbiology/honours.html.

Incompatible unit: MIC40HON, MIC41HON

Class requirements: An average of 30 contact hours per week over the 40 weeks of the Honours year.

This unit is not available for study abroad students.

Assessment: one 10,000-word thesis (65%), one 5000-word literature review (15%), one 3000-word essay (7%), seminar and lecture presentations totalling approx. 1 hour (8%), Laboratory and research skills assessment (5%). The assessment components listed are the combined assessment for MIC41HON and MIC42HON.

MIC4HNB HONOURS MICROBIOLOGY (60 CPs Sem. TE-SEM-2 BU.)

Professor Paul R. Fisher

This unit of study represents the second semester of a year long program. Students MUST complete both MIC4HNA and MIC4HNB in the one academic year.

The Honours course consists of a one year supervised research project and a relatively minor course work component. Microbiological research is as varied in its nature as the microbial world itself and the research interests of the Department of Microbiology reflect this diversity. Programs are potentially available within the Department in the areas of microbial physiology, microbial biochemistry, molecular biology, and epidemiology of human and animal viruses, the molecular genetics of bacterial plasmids and of bacterial synthesis of polysaccharides and the molecular biology of signal transduction and mitochondrial disease using slime moulds as models for higher organisms. More details can be found at www.latrobe/microbiology/honours.html.

Incompatible unit: MIC40HON, MIC42HON

Class requirements: An average of 30 contact hours per week over the 40 weeks of the Honours year.

This unit is not available for study abroad students.

Assessment: one 10,000-word thesis (65%), one 5000-word literature review (15%), one 3000-word essay (7%), seminar and lecture presentations totalling approx. 1 hour (8%), Laboratory and research skills assessment (5%). The assessment components listed are the combined assessment for MIC41HON and MIC42HON.

NANTISA ISSUES IN NANOTECHNOLOGY A (5 CPs Sem. TE-SEM-1 BU.) *Dr Paul Pigram*

This unit is only available to students enrolled in the Bachelor of Nanotechnology/Bachelor of Science.

Students taking 'Issues in Nanotechnology' will be expected to demonstrate a degree of subject understanding and discipline specific skills commensurate with the year level of the unit. Six seminars will be presented to students each semester of this program by practitioners in the area of nanotechnology from academia, research organisations, and industry. These will cover significant areas and new developments. Students will be required to provide a written response to the seminars. The response will grade from simple summaries and to more detailed analysis of the ideas presented and the inclusion of supplementary material to support a commentary or projected development. The assessment is by way of these reports, which represent a significant time commitment by the students outside the assigned contact hours.

Class requirements: Six 2-hour seminars. Speaker availability will determine the schedule.

This unit is not available for study abroad students.

Assessment: Six reports each equivalent to 500-2000 words maximum. (100%) The reports will depend on the material presented at the seminar and will only require limited external sources.

NANTISB ISSUES IN NANOTECHNOLOGY B (Five CPs Sem. TE-SEM-2 BU.) *Dr Paul Pigram*

This unit is only available to students enrolled in the Bachelor of Nanotechnology/Bachelor of Science.

Students taking 'Issues in Nanotechnology' will be expected to demonstrate a degree of subject understanding and discipline specific skills commensurate with the year level of the unit. Six seminars will be presented to students each semester of this program by practitioners in the area of nanotechnology from academia, research organisations, and industry. These will cover significant areas and new developments. Students will be required to provide a written response to the seminars. The response will grade from simple

summaries and to more detailed analysis of the ideas presented and the inclusion of supplementary material to support a commentary or projected development. The assessment is by way of these reports, which represent a significant time commitment by the students outside the assigned contact hours.

Class requirements: Six 2-hour seminars. Speaker availability will determine the schedule.

This unit is not available for study abroad students.

Assessment: Six reports each equivalent to 500-2000 words maximum. (100%) The reports will depend on the material presented at the seminar and will only require limited external sources.

NAN2ISA ISSUES IN NANOTECHNOLOGY A (Five CPs Sem. TE-SEM-1 BU.)

Dr Paul Pigram

This unit is only available to students enrolled in the Bachelor of Nanotechnology/Bachelor of Science.

Students taking 'Issues in Nanotechnology' will be expected to demonstrate a degree of subject understanding and discipline specific skills commensurate with the year level of the unit. Six seminars will be presented to students each semester by practitioners in the area of nanotechnology from academia, research organisations, and industry. These will cover significant areas and new developments. Students will be required to provide written reports on the seminars, which will grade from summaries and assessments of the seminars, to detailed analysis of the ideas presented supported by supplementary material. The assessment is by way of these reports, which represent a significant time commitment by the students outside the assigned contact hours.

Prerequisite: Completion of first year of the Bachelor of Nanotechnology/Bachelor of Science.

Class requirements: Six 2-hour seminars. Speaker availability will determine the schedule.

This unit is not available for study abroad students.

Assessment: Six reports each equivalent to 500-2000 words maximum (100%) The reports will depend on the material presented at the seminar and will only require limited external sources.

NAN2ISB ISSUES IN NANOTECHNOLOGY B (Five CPs Sem. TE-SEM-2 BU.)

Dr Paul Pigram

This unit is only available to students enrolled in the Bachelor of Nanotechnology/Bachelor of Science

Students taking 'Issues in Nanotechnology' will be expected to demonstrate a degree of subject understanding and discipline specific skills commensurate with the year level of the unit. Six seminars will be presented to students each semester by practitioners in the area of nanotechnology from academia, research organisations, and industry. These will cover significant areas and new developments. Students will be required to provide written reports on the seminars, which will grade from summaries and assessments of the seminars, to detailed analysis of the ideas presented supported by supplementary material. The assessment is by way of these reports, which represent a significant time commitment by the students outside the assigned contact hours.

Prerequisite: NAN1ISA and NAN1ISB.

Class requirements: Six 2-hour seminars. Speaker availability will determine the schedule.

This unit is not available for study abroad students.

Assessment: Six reports each equivalent to 500-2000 words maximum (100%) The reports will depend on the material presented at the seminar and will only require limited external sources.

NAN3ISA ISSUES IN NANOTECHNOLOGY A (Five CPs Sem. TE-SEM-1 BU.)

Dr Paul Pigram

This unit is only available to students enrolled in the Bachelor of Nanotechnology/Bachelor of Science.

Students taking 'Issues in Nanotechnology' will be expected to demonstrate a degree of subject understanding and discipline specific skills commensurate with the year level of the unit. Six seminars will be presented to students each semester by practitioners in the area of nanotechnology from academia, research organisations, and industry. These will cover significant areas and new developments. Students will be required to provide written reports on the seminars, which will grade from summaries and assessments of the seminars, to detailed

analysis of the ideas presented supported by supplementary material. The assessment is by way of these reports, which represent a significant time commitment by the students outside the assigned contact hours.

Prerequisite: Completion of second year of the Bachelor of Nanotechnology/Bachelor of Science.

Class requirements: Six 2-hour seminars. Speaker availability will determine the schedule.

This unit is not available for study abroad students.

Assessment: Six reports each equivalent to 500-2000 words maximum (100%) The reports will depend on the material presented at the seminar and will only require limited external sources.

NAN3ISB ISSUES IN NANOTECHNOLOGY B (Five CPs Sem. TE-SEM-2 BU.)

Dr Paul Pigram

This unit is only available to students enrolled in the Bachelor of Nanotechnology/Bachelor of Science.

Students taking 'Issues in Nanotechnology' will be expected to demonstrate a degree of subject understanding and discipline specific skills commensurate with the year level of the unit. This unit is not available for study abroad students.

Assessment: Six reports each equivalent to 500-2000 words maximum (100%) The reports will depend on the material presented at the seminar and will only require limited external sources.

NAN3ISC ISSUES IN NANOTECHNOLOGY C (Five CPs Sem. TE-SEM-1 BU.)

Dr Paul Pigram

This unit is only available to students enrolled in the Bachelor of Nanotechnology/Bachelor of Science.

Students taking 'Issues in Nanotechnology' will be expected to demonstrate a degree of subject understanding and discipline specific skills commensurate with the year level of the unit. Six seminars will be presented to students each semester by practitioners in the area of nanotechnology from academia, research organisations, and industry. These will cover significant areas and new developments. Students will be required to provide written reports on the seminars, which will grade from summaries and assessments of the seminars, to detailed analysis of the ideas presented supported by supplementary material. The assessment is by way of these reports, which represent a significant time commitment by the students outside the assigned contact hours.

Prerequisite: Completion of third year of the Bachelor of Nanotechnology/Bachelor of Science.

Class requirements: Six 2-hour seminars. Speaker availability will determine the schedule.

This unit is not available for study abroad students.

Assessment: Six reports each equivalent to 500-2000 words maximum (100%) The reports will depend on the material presented at the seminar and will only require limited external sources.

NAN3ISD ISSUES IN NANOTECHNOLOGY D (Five CPs Sem. TE-SEM-2 BU.)

Dr Paul Pigram

This unit is only available to students enrolled in the Bachelor of Nanotechnology/Bachelor of Science.

Students taking 'Issues in Nanotechnology' will be expected to demonstrate a degree of subject understanding and discipline specific skills commensurate with the year level of the unit. Six seminars will be presented to students each semester by practitioners in the area of nanotechnology from academia, research organisations, and industry. These will cover significant areas and new developments. Students

will be required to provide written reports on the seminars, which will grade from summaries and assessments of the seminars, to detailed analysis of the ideas presented supported by supplementary material. The assessment is by way of these reports, which represent a significant time commitment by the students outside the assigned contact hours.

Prerequisite: Completion of third year of the Bachelor of Nanotechnology/Bachelor of Science.

Class requirements: Six 2-hour seminars. Speaker availability will determine the schedule.

This unit is not available for study abroad students.

Assessment: Six reports each equivalent to 500-2000 words maximum (100%) The reports will depend on the material presented at the seminar and will only require limited external sources.

NAN3PRJ NANOTECHNOLOGY RESEARCH PROJECT (20 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU. TE-W26-33 BU. TE-W48-09 BU.) *Dr Paul Pigram*

This unit is only available to students enrolled in the Bachelor of Nanotechnology/Bachelor of Science.

This unit provides students with the opportunity to undertake a laboratory-based nanotechnology research project under the supervision of La Trobe University staff or jointly with La Trobe University staff and appropriate outside organisations. Students are encouraged to develop their own interests and may gain experience in leading nanofabrication or characterisation technologies, and tackle problems of fundamental or applied nature. The project outcomes will be presented in a seminar at the end of the semester.

Prerequisite: Completion of third year of the Bachelor of Nanotechnology/Bachelor of Science.

Incompatible unit: NAN3PRX

Class requirements: 8-hours research work and associated activities per week if taken in Semester 1 or 2. If taken over the summer or winter break 104 hours of research and associated activities.

This unit is not available for study abroad students.

Assessment: A project report equivalent to 5000 words (90%), one 30-minute seminar presentation per student (10%)

NAN3PRX NANOTECHNOLOGY EXTENDED RESEARCH PROJECT (40 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU. TE-W26-33 BU. TE-W48-09 BU.) *Dr Paul Pigram*

This unit is only available to students enrolled in the Bachelor of Nanotechnology/Bachelor of Science.

This unit provides students with an extended opportunity to undertake a laboratory-based nanotechnology research project under the supervision of La Trobe University staff or jointly with La Trobe University staff and appropriate outside organisations. Students are encouraged to develop their own interests and may gain experience in leading nanofabrication or characterization technologies, and tackle problems of fundamental or applied nature. The project outcomes will be presented in a seminar at the end of the semester.

Prerequisite: Completion of third year of the Bachelor of Nanotechnology/Bachelor of Science.

Incompatible unit: NAN3PRJ

Class requirements: 16-hours research work and associated activities per week if taken in Semester 1 or two. If taken over the summer or winter break 208 hours of research and associated activities.

This unit is not available for study abroad students.

Assessment: a research thesis equivalent to 10,000 words (90%), one 30-minute seminar presentation per student (10%)

NAN3PXA NANOTECHNOLOGY EXTENDED RESEARCH PROJECT A (20 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU. TE-W26-33 BU. TE-W48-09 BU.) *Dr Paul Pigram*

This unit is only available to students enrolled in the Bachelor of Nanotechnology/Bachelor of Science. This unit represents the first semester of a year long program.

This unit provides students with an extended opportunity to undertake a laboratory-based nanotechnology research project under the supervision of La Trobe University staff or jointly with La Trobe University staff and appropriate outside organisations. Students are encouraged to develop their own interests and may gain experience in leading nanofabrication or characterization technologies, and tackle

problems of fundamental or applied nature. The project outcomes will be presented in a seminar at the end of the year.

Prerequisite: Completion of third year of the Bachelor of Nanotechnology/Bachelor of Science.

Incompatible unit: NAN3PRJ, NAN3PRX

Class requirements: 208 hours research work and associated activities across the year.

This unit is not available for study abroad students.

Assessment: A research thesis equivalent to 10,000 words (90%), one 30-minute seminar presentation per student (10%). The listed assessment components are the combined assessment for NAN3PXA and NAN3PXB

NAN3PXB NANOTECHNOLOGY EXTENDED RESEARCH PROJECT B (20 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU. TE-W26-33 BU. TE-W48-09 BU.) *Dr Paul Pigram*

This unit is only available to students enrolled in the Bachelor of Nanotechnology/Bachelor of Science. This unit represents the second semester of a year long program.

This unit provides students with an extended opportunity to undertake a laboratory-based nanotechnology research project under the supervision of La Trobe University staff or jointly with La Trobe University staff and appropriate outside organisations. Students are encouraged to develop their own interests and may gain experience in leading nanofabrication or characterization technologies, and tackle problems of fundamental or applied nature. The project outcomes will be presented in a seminar at the end of the year.

Prerequisite: Completion of third year of the Bachelor of Nanotechnology/Bachelor of Science.

Incompatible unit: NAN3PRJ, NAN3PRX

Class requirements: 208 hours research work and associated activities across the year.

This unit is not available for study abroad students.

Assessment: A research thesis equivalent to 10,000 words (90%), one 30-minute seminar presentation per student (10%). The listed assessment components are the combined assessment for NAN3PXA and NAN3PXB

NUT3ATN ADVANCED TOPICS IN NUTRITION (30. CPs Sem. TE-SEM-1 BU.) *Dr Mark Jois*

Emphasis in this unit is on the interdisciplinary nature of nutrition. The unit is based on prior core offerings in the Bachelor of Human Nutrition degree, namely basic sciences, biochemistry, physiology, health sciences, and behavioural science. This unit specialises in utilisation of metabolic fuels for different tissues and activities, molecular basis of digestion, balance, pathophysiology of nutrition, exercise physiology, nutrition through the life cycle, and applied nutrition.

Prerequisite: At least four of AGR21PNU, BCH21BMA, BCH22BMB, HBS21HPA, HBS22HPB.

Incompatible unit: MED31MCG.

Class requirements: Four 1-hour lectures and six hours of practical work per week.

Assessment: Two 2-hour examinations including assessment of a problem-based learning module (70%), and continuous assessment of practical work. (30%)

NUT3CPN COMMUNITY AND CROSS CULTURAL PERSPECTIVES ON HUMAN NUTRITION (30. CPs Sem. TE-SEM-2 BU.) *Dr Mark Jois*

This unit is designed to provide research-informed teaching of community and cultural perspectives on human nutrition. Topics include nutritional anthropology, particularly relating to the nutritional health of indigenous Australians, genetic and environmental aspects of nutrition, diet, and disease, and public health aspects such as health policy and clinical applications.

Prerequisite: at least four of, AGR21PNU, BCH21BMA, BCH22BMB, HB21HPA, HB22HPB.

Incompatible unit: GEN32EEG

Class requirements: Four 1-hour lectures and six hours of practical work per week.

Assessment: Two 2-hour written examinations (70%) and continuous assessment of practical work (30%).

NUT4HNA HONOURS NUTRITION (60 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Mark Jois*

Honours degree students are selected based on their performance in the final year of the pass degree. This unit of study represents one semester of a year long program

The Honours year will comprise a project related to Nutrition plus associated coursework. However, because there is no Department of Nutrition, students will be based in one of the participating departments. The project will contribute to the final result in the proportion applying to all Honours students in that Department. With the approval of the Departmental Honours Coordinator, the coursework component may include work undertaken in another Department. Overall assessment will be the same as for the existing Honours unit offered by that Department. A consolidated ranking of Honours students in the Department will be produced. Each fourth year program requires approval by the supervisor and the relevant Departmental Honours Coordinator. The Nutrition Course Adviser may facilitate this process.

Incompatible unit: NUT40HON, NUT41HON

Class requirements: As prescribed by the relevant Department.

This unit is not available for study abroad students.

Assessment: Assessment determined by relevant Department Honours program (100%)

NUT4HNB HONOURS NUTRITION (60 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.) *Dr Mark Jois*

Honours degree students are selected based on their performance in the final year of the pass degree. This unit of study represents one semester of a year long program

The Honours year will comprise a project related to Nutrition plus associated coursework. Incompatible unit: NUT40HON, NUT42HON

Class requirements: As prescribed by the relevant Department.

This unit is not available for study abroad students.

Assessment: Assessment determined by relevant Department Honours program (100%)

PHY1AST ASTRONOMY AND SPACE: THE INFINITE FRONTIER (15. CPs Sem. TE-SEM-2 BU.) *Coordinator to be advised*

This introduction to contemporary astronomy and our developing understanding of the universe is appropriate for students from any background. The single prerequisite is a curiosity as to the nature of our universe and how we go about investigating it. Topics discussed range from our own solar system and the individual planets, through the galaxy to the distant features of the universe, exotic objects such as quasars and black holes, cosmology and the big bang and astronomical instruments. Extensive use is made of multimedia presentations. The practical work includes hands-on sessions and daytime and evening viewing sessions. In computer-based laboratories, students simulate the role of practising astronomers and have the opportunity to explore resources on the internet.

Class requirements: Two 1-hour lectures per week, practical observational and tutorial sessions with an average of three hours per week.

Assessment: Practical reports (40%), one poster project (10%), one 2-hour examination (50%)

Recommended Reading:

Palen, S. *Astronomy* McGraw-Hill, 2002

Comins, N.F. and Kaufmann, W.J. *Discovering the universe* 7th edn, Freeman, 2005

PHY1LSA PHYSICS FOR LIFE SCIENCES A (15. CPs Sem. TE-SEM-1 AW, BU.)

Coordinator to be advised

The generation of sufficient energy to meet the massive demands of a modern technological society, without impacting adversely on the environment, is an important issue. While the problems of environmental pollution, resource depletion, greenhouse effect, ozone hole, are well known, they are not necessarily well understood. It is important that discussion of these issues be well informed. The physical principles central to the range of conventional and alternative energy technologies is discussed, and on completion, students should understand the advantages and disadvantages of the various technologies and some of the techniques used to monitor and analyse any hazardous effects. This is an introductory course with minimal mathematical content and no specific science background or previous experience of the above topics is assumed. The unit may be taken independently or in conjunction with PHY1LSB.

Incompatible unit: PHY10SCI, PHY11SCA, PHY11PAA, PHY1SCA

Class requirements: Three 1-hour lectures, one 1-hour tutorial, and one 3-hour laboratory session per week.

Assessment: Laboratory reports (25%), one 3-hour examination (50%), tutorial problem sets (25%)

Prescribed Reading:

Giancoli, D. C. *Physics: principles with applications (with WWW pack)* 6th edn, Prentice-Hall 2005.

PHY1LSB PHYSICS FOR LIFE SCIENCES B (15. CPs Sem. TE-SEM-2 AW, BU.)

Coordinator to be advised

This unit is a natural sequel to PHY1LSA, but may be taken independently. Fundamental concepts and techniques in the broad range of topics appropriate for a proper study of the physical environment are introduced. Application of these ideas to systems of biological interest is emphasised. Topics include mechanics, properties of matter, heat and thermodynamics, electric circuits and introductory electronics, atomic physics and radioactivity, fluids and flow, atmospheric physics, light and sound and soil physics. On completion, students should have a basic understanding of measurement techniques as well as familiarity with the fundamental principles in the above topics. No previous study of physics is assumed and mathematical methods are limited to basic algebra.

Incompatible unit: PHY10SCI, PHY12AGR, PHY12SCB, PHY11PAB, PHY1SCB

Class requirements: Three 1-hour lectures, one 1-hour tutorial, and one 3-hour laboratory session per week.

Assessment: Laboratory reports (25%), one 3-hour examination (50%), tutorial problem sets (25%)

Prescribed Reading:

Giancoli, D. C. *Physics: principles with applications (with www pack)*. 6th edn, Prentice-Hall 2005.

Recommended Reading:

Crowder, B. *The wonders of the weather* Bureau of Meteorology, 2nd edn. Griffin Press 2000

PHY1SCA PRINCIPLES OF PHYSICS A (15 CPs Sem. TE-SEM-1 BU.) *Dr*

Narelle Brack

On completion of this unit, students should comprehend a broad range of physics which provides the basis for further study in physics, engineering or another science, should have acquired a basic level of skill in the use of physical laboratory instrumentation and should have developed problem solving skills appropriate to the course material and involving the use of and thermodynamics based methods. Topics covered include waves, mechanics, and electricity. The laboratory component consists of a mix of experiments and tutorial-style instruction closely related to the lectures. This unit and the second semester unit PHY1SCB together constitute a mainstream course in Physics at the first year level.

Recommended Prior Studies: A pass in VCE physics and mathematics or equivalent.

Knowledge and competence in the material in VCE physics is assumed.

Incompatible unit: PHY11ENG, PHY11PAA, PHY12AGR, PHY12PAB, PHY10SCI, PHY1LSA

Class requirements: Three 1-hour lectures, one 1-hour problem-solving class, and one 3-hour laboratory session per week.

Assessment: One 3-hour examination (75%), laboratory reports (10%), tutorial problem sets (15%)

Prescribed Reading:

Knight, R.D. *Physics for scientists and engineers*. Pearson Addison Wesley (2004)

PHY1SCB PRINCIPLES OF PHYSICS B (15 CPs Sem. TE-SEM-2 BU.) Dr

Narelle Brack

On completion of this unit, students should comprehend a broad range of physics which provides the basis for further study in physics, engineering or another science, should have acquired a basic level of skill in the use of physical laboratory instrumentation and should have developed problem solving skills appropriate to the course material and involving the use of elementary calculus-based methods. Topics covered include energy, materials, and modern physics. The laboratory component consists of a mix of experiments and tutorial-style instruction closely related to the lectures. This unit and the first semester unit PHY1SCA together constitute a mainstream course in Physics at the first year level

Recommended Prior Studies: A pass in VCE physics and mathematics or equivalent.

Knowledge and competence in the material in VCE physics is assumed.

Incompatible unit: PHY11PAA, PHY12AGR, PHY12PAB, PHY10SCI, PHY1LSB

Class requirements: Three 1-hour lectures, one 1-hour problem-solving class, and one 3-hour laboratory session per week.

Assessment: One 3-hour examination (75%), laboratory reports (10%), tutorial problem sets (15%)

PHY2ASA ASTRONOMY AND ASTROPHYSICS (15 CPs Sem. TE-SEM-1 BU.)

Coordinator to be advised

In this unit, students will examine concepts in astrophysics and extra-galactic astronomy. Observations will be interpreted in terms of models of the evolution and underlying dynamical processes taking place in such diverse objects as planetary systems, stars, supernovas, neutron stars, black holes, and galaxies. Because of the finite speed of light, we observe other galaxies and exotic objects such as quasars as they were long ago. By looking further into space, we observe conditions in the universe closer to the time of the Big Bang. These observations lead naturally to discussion of the large-scale structure of the universe and key ideas in cosmology such as the Hubble recession, the curvature of space-time, and the Big Bang itself. Laboratory work includes realistic, computer-based analysis of astronomical data.

Prerequisite: PHY11AST or PHY12AST and PHY10SCI or PHY11SCI or MAT11CFN. MAT1CFN or MAT11CFE or MAT1CFE or ECO11IQA or ECO11QA.

Incompatible unit: PHY21ASB, PHY31ASB, PHY21ASC, PHY31ASC

Class requirements: Two 1-hour lectures per week and three hours of practical and project work per week.

Assessment: Four computer-based labs (equiv. to 600 words) four problem sets (40%), one 3-hour examination (60%)

Recommended Reading:

Carroll, B. W. and Ostlie, D. A. *An introduction to modern astrophysics* Addison-Wesley 1994.

Zelik, M. and Gregory, S. A. *Introductory Astronomy and Astrophysics* 4th Edition, Saunders 1998.

PHY2ASB ASTRONOMY DECODED — A BEGINNER'S GUIDE TO ASTROPHYSICS (5.0 CPs Sem. TE-SEM-1 BU.) Coordinator to be advised

Whereas astronomy is the general study of the observable universe, astrophysics probes even deeper in order to make sense of astronomical observations by modelling the physical processes taking place in the formation, evolution, and eventual demise of star systems. This course forms an introduction to astrophysics, drawing on many examples of the latest discoveries and theories concerning our own solar system and the stars and nebulae within the Milky Way galaxy. It assumes a basic level of physics and mathematics, but no

previous knowledge of astronomy. Laboratory work includes realistic, computer-based analysis of astronomical data.

Prerequisite: First year mathematics and one of PHY10SCI or PHY1SCA or Units 3 and 4, VCE Physics and requires coordinator's approval.

Class requirements: Two 1-hour lectures, one 6-hour laboratory study, and one problem set during the first six weeks of semester.

Assessment: One 1-hour examination (70%), laboratory reports equivalent to 250 words (15%), assignments equivalent to 250 words (15%)

Recommended Reading:

Carroll, B. W. and Ostlie, D. A. *An introduction to modern astrophysics* Addison-Wesley 1996.

Zelik, M. and Gregory, S. A. *Introductory astronomy and astrophysics* 4th edn. Saunders BHJ 1998.

PHY2ASC LOOKING BACK IN TIME — INTRODUCTORY EXTRA-GALACTIC ASTRONOMY (5.0 CPs Sem. TE-SEM-1 BU.) Coordinator to be advised

Because of the finite speed of light, when we observe other distant galaxies and exotic objects such as quasars, we are seeing them as they were long ago. This course starts by discussing the astrophysics of normal galaxies and the likely presence of massive black holes in the nuclei of the most active and distant galaxies, plus the possible link between galaxy to galaxy interactions and active galactic nuclei. This leads naturally to a discussion of the large-scale structure of the universe and introduction of key ideas in cosmology such as the Hubble recession, the curvature of space-time, the 'Big Bang' and the early evolution of the universe. Laboratory work includes realistic, computer-based analysis of astronomical data.

Prerequisite: PHY12AST and Requires coordinator's approval.

Class requirements: Two 1-hour lectures, one 6-hr lab study, and one problem set in the last 6 weeks of the semester.

Assessment: One 1-hour examination (70%), laboratory reports equivalent to 250 words (15%), assignments equivalent to 250 words (15%)

Recommended Reading:

Carroll, B. W. and Ostlie, D. A. *An introduction to modern astrophysics* Addison-Wesley 1996.

Zelik, M. and Gregory S. A. *Introductory astronomy and astrophysics* 4th edn. Saunders BHJ 1998.

PHY2EPB PHYSICS FOR ENGINEERING (15 CPs Sem. TE-SEM-2 BU.) Dr

Roman Makarevich

Two lecture components: modern materials and electromagnetic theory, plus a laboratory component. The two components focus on fundamental areas of engineering physics. In electromagnetic theory component students develop understanding of the interaction of charges with electric and magnetic fields; the mathematical descriptions of these interactions and their generalisations which lead to Maxwell's equations; and the students' ability to use vectors and differential calculus to describe physical phenomena. In modern materials students develop their understanding of crystalline materials and the physics of conductors and semiconductors including valence and bonding, crystal structures, dislocations, binary phase diagrams, conduction in metals and semiconductors, and semiconductor devices. In the laboratory component an extensive selection of experiments, relate to the components.

Prerequisite: PHY1SCA and PHY1SCB or approval from the Department of Physics adviser of studies.

Incompatible unit: PHY20ENG, PHY22ENG, PHY20SCI, PHY21SCA, PHY22SCB, PHY2ENG, PHY2SCB, PHY2SCA

Class requirements: two 1-hour lectures per week, six 1-hour tutorials per semester and four hours of laboratory per week for seven weeks.

Assessment: Ten problem sets (weekly) equivalent to 1000 words (20%), practical laboratory reports equivalent to 1000 words (20%), two 1-hour examinations (60%)

Prescribed Reading:

PHY2GAM PHYSICS FOR GAMES TECHNOLOGY (15 CPs Sem. TE-SEM-2 BU.) *TBA*

This course is for students in the Games Technology course and aims to provide sufficient physics background to permit the simulation of kinematic and optical phenomena required for computer games. The motion of large objects will be analysed and include friction and air resistance to enable realistic simulations to be programmed. The interaction of light with a material will provide an understanding of image formation, reflection, both specular and diffuse, to enable realistic simulations of objects and surfaces.

Prerequisite: PHY1SCA.

Incompatible unit: PHY2SCA

Class requirements: Two 1-hour lectures, one 1-hour tutorial and six 4-hour laboratory classes.

Assessment: Ten tutorial problem sets (weekly) equivalent to 1000 words (20%), practical laboratory reports equivalent to 1500 words (20%), two 1-hour examinations (60%)

PHY2IMC IMAGING AND MATERIALS CHARACTERISATION (10 CPs Sem. TE-SEM-2 BU.) *Dr Paul Pigram*

Chemical and structural properties of materials using the techniques of optical microscopy, electron microscopy, x-ray diffraction, x-ray fluorescence, and image analysis are characterised in this unit. Materials investigated will range from earth assemblages (minerals and soils) to technological materials such as semiconductors and integrated circuits.

Prerequisite: A first year unit in Physics or Chemistry.

Class requirements: Two 1-hour lectures per week and six 3-hour laboratory sessions in weeks 2, 4, 6, 8, 10 and 12.

This unit is not available for study abroad students.

Assessment: One 2-hour examination (75%), six laboratory reports equivalent to 1000 words (25%)

Recommended Reading:

PHY2SCA PRINCIPLES OF PHYSICS A (20 CPs Sem. TE-SEM-1 BU.) *Dr Roman Makarevich*

The four components taught in this unit are quantum mechanics; optics; relativity and classical mechanics. The four components focus on a number of fundamental areas of physics and specialist areas including materials and surface science and space physics. By completion, students should comprehend fundamental tenets of the theory of physics, have acquired additional experimental skills related to a practical exploration of the topics and have developed problem-solving skills and the ability to construct useful mathematical models for physical situations. In the laboratory component an extensive selection of experiments, relate to the components, as well as a selection of specialist experiments.

Prerequisite: PHY1SCA and PHY1SCB and MAT11CFN and MAT12CLA (from 2009 PHY1SCA and PHY1SCB and MAT1CNS and MAT1CLA) or approval from a Department of Physics adviser of studies.

Incompatible unit: PHY20ENG, PHY20SCI, PHY2ENG, PHY2EPB

Class requirements: Four 1-hour lectures, one tutorial, and four hours of laboratory per week.

Assessment: Four 1-hour examinations (70%), tutorial problem sets (10%), practical laboratory reports (20%)

PHY2SCB PRINCIPLES OF PHYSICS B (20 CPs Sem. TE-SEM-2 BU.) *Dr Roman Makarevich*

The four components taught in this unit are modern materials; electromagnetic theory; heat and thermodynamics and nuclear physics. The four components focus on a number of fundamental areas of physics and specialist areas including materials and surface science and space physics. By completion, students should comprehend fundamental tenets of the theory of physics, have acquired additional experimental skills related to a practical exploration of the topics and have developed problem-solving skills and the ability to construct useful mathematical models for physical situations. In the laboratory component an extensive selection of experiments, relate to the components, as well as a selection of specialist experiments.

Prerequisite: PHY1SCA and PHY1SCB and MAT1CFN and MAT1CLA (from 2009 PHY1SCA and PHY1SCB and MAT1CNS and MAT1CLA) or approval from a Department of Physics adviser of studies.

Incompatible unit: PHY20ENG, PHY20SCI, PHY22ENG, PHY2ENG, PHY2EPB

Class requirements: Four 1-hour lectures, one tutorial, and four hours of laboratory per week.

Assessment: Four 1-hour examinations (70%), tutorial problem sets (10%), practical laboratory reports (20%)

PHY2SPI SPACE SCIENCE INSTRUMENTS (15 CPs Sem. TE-SEM-2 BU.)

Coordinator to be advised

In this unit, students will study the underlying principles of various space science instruments including optical and radio telescopes, and wave and particle instruments flown on satellites and interplanetary space probes. Specifically the course will cover seven topics including: Optical Telescopes and related Optical Systems such as Schmidt systems, and zoom lenses; Radio Telescopes; Satellite Direct Measurement Probes, including plasma probes and mass spectrometers; Satellite Magnetometers; Satellite Optical Instruments; Satellite Radio Instruments, such as ionospheric and magnetospheric sounders; The Global Positioning System and its application. Through laboratory work and projects, students will investigate the design and operation of specific space instruments.

Prerequisite: Either PHY10SCI or PHY1SCA and PHY1SCB, and PHY11AST or PHY12AST.

Class requirements: Two 1-hour lectures and one laboratory session per week.

Assessment: One 2-hour examination (40%), one 500-word laboratory report (10%), one 2000-word essay (50%)

Recommended Reading:

PHY2SPM SCANNING PROBE MICROSCOPY (15 CPs Sem. TE-SEM-2 BU.)

Dr Paul Pigram

This unit is only available to students enrolled in the Bachelor of Nanotechnology/Bachelor of Science.

In this unit, students will study the principle of operation of scanning probe microscopes (SPMs), in particular, scanning tunnelling microscopy (STM) and atomic force microscopy (AFM), and the instrumentation and probes required to implement these techniques. Non-contact AFM, low temperature SPM, dynamic force microscopy, and molecular recognition force microscopy will also be considered. Students will be introduced to the concepts and practice of nanolithography and electrochemical SPM.

Prerequisite: PHY1SCA and PHY1SCB.

Class requirements: Two 1-hour lectures and one laboratory session per week.

Assessment: One 2-hour examination (40%), six 400-word laboratory reports (60%)

PHY2SYN SYNCHROTRON SCIENCE AND TECHNOLOGY (15 CPs Sem. TE-SEM-1 BU.) *Dr Paul Pigram*

This unit is only available to students enrolled in the Bachelor of Nanotechnology/Bachelor of Science.

In this unit, students will study the design, underlying physical principles, operation, and applications of modern synchrotron light sources. Specifically, this unit will include an introduction to accelerator physics and the production of synchrotron light, discussion of electron generation, booster, and storage ring systems found in modern synchrotron facilities, and the design and function of insertion devices, monochromators, and beam lines. A wide range of synchrotron-based experimental techniques and their applications will be explored including spectroscopy, microscopy, and imaging techniques, diffraction, crystallography, lithography, and fabrication.

Prerequisite: PHY1SCA and PHY1SCB.

Class requirements: Two 1-hour lectures and one laboratory session per week.

Assessment: One 2-hour examination (40%), six 400-word laboratory reports (60%)

PHY3GRE GREENHOUSE EFFECT AND CLIMATE CHANGE (10. CPs Sem. TE-SEM-2 BU.) *Coordinator to be advised*

Physical processes involved in the greenhouse effect and climate change are studied and then applied in the contexts of: how do humans change the composition of the atmosphere? How will climate change? What is the impact on terrestrial ecosystems and society? Specific topics include emission of CO₂ and other greenhouse gases into the atmosphere, climate models and empirical studies and International and Australian policies.

Recommended Prior Studies: ENV22AIR.

Class requirements: Two 1-hour lectures and practical sessions averaging two hours per week. Students will be required to attend two excursions within laboratory hours.

Assessment: One 2-hour examination (50%), two 500-word essays and weekly lab class reports (50%). Lab class reports may comprise some written reports or some class presentations

Recommended Reading:

PHY3NMF NANOMATERIALS AND FABRICATION (15 CPs Sem. TE-SEM-1 BU.) *Dr Paul Pigram*

In this unit, students will study many aspects of the structure and function of nanomaterials and small-scale devices, together with contemporary fabrication techniques. Unit themes include: (a) nanomaterials synthesis and applications, carbon nanotubes, and nanowires, (b) quantum effects in nanostructured materials, layered semiconductors and devices, (c) nanostructured interfaces and small-scale devices, examining the 'top-down' approach to fabrication, (d) introductory concepts in micro fabrication, (e) MEMS and NEMS, (f) advanced lithographic techniques including photolithography, electron beam lithography, interference lithography, micro-contact printing and nano imprint lithography.

Prerequisite: PHY2SCA and PHY2SCB.

Co-requisite: PHY3SCA.

Class requirements: Two 1-hour lectures and one 3-hour laboratory session per week.

Assessment: One 2-hour examination (40%), six 400-word laboratory reports (60%)

PHY3POM PHYSICS OF MATERIALS (10. CPs Sem. TE-SEM-2 BU.)

Coordinator to be advised

This unit is an introduction to the basic concepts of the physics of condensed matter with a strong emphasis on semiconductors. Topics to be covered include crystal lattices; reciprocal lattice; diffraction; concepts of para- and ferro-magnetism. Nearly free electron model; Cyclotron resonance; Hall effect; intrinsic and extrinsic semiconductors; p-n junctions, carrier concentrations in equilibrium and non-equilibrium cases; optical properties of semiconductors; heterojunctions; superlattices.

Prerequisite: Either PHY20MEC and PHY20ENG or PHY2ENG.

Incompatible unit: PHY32SCB

Class requirements: One 2-hour lecture and one 2-hour laboratory class per week.

Assessment: One 2-hour examination (70%), two 500-word laboratory reports (30%)

Prescribed Reading:

PHY3REM REMOTE SENSING (10. CPs Sem. TE-SEM-2 BU.) *Coordinator to be advised*

The introduction to the principles of techniques used in remote sensing is appropriate for students who have taken a basic first year physics course. Remote sensing refers to the study of the Earth's surface and atmosphere, particularly (but not exclusively) from satellites. Remote sensing systems can be classified into active and passive devices and into imaging and non-imaging systems. This course discusses the principles of electromagnetic, thermal, atomic, and molecular radiation and their application in remote sensing techniques. Laboratory work comprises computer and WWW based applications using data from remote sensing satellites.

Prerequisite: PHY1LSA and PHY1LSB (previously PHY11PAA and PHY12PAB) or PHY1SCA and PHY1SCB.

Class requirements: Two lectures and practical sessions averaging two hours per week.

Assessment: One 2-hour examination (60%), two 500-word laboratory reports (40%)

Recommended Reading:

Cracknell, A. P. and Hayes, L. W. B. *Introduction to remote sensing* Taylor and Francis 1993.

Rees, W. G. *Physical principles of remote sensing* CUP 1990.

PHY3SCA PRINCIPLES OF PHYSICS A (30 CPs Sem. TE-SEM-1 BU.) *Dr Chris Pakes*

This unit is the first of two semester-length units, which together constitute a mainstream course in Physics at the third year level and an excellent preparation for Honours and post-graduate studies in Physics. This unit incorporates optics, quantum mechanics, electromagnetic theory, statistical mechanics, and computational physics. Students enhance their practical skills with a range of laboratory experiments. An assignment relating to computational physics is part of the assessment.

Prerequisite: Either PHY20SCI or PHY2SCA and PHY2SCB, and MAT21AVC, and MAT21LA (from 2009 PHY2SCA and PHY2SCB and MAT2VCA and MAT2LAL).

Class requirements: Five 1-hour lectures, six hours of laboratory and one 1-hour tutorial per week.

Assessment: Four 1.5-hour examinations (66%), one 1500-word assignment (17%), four 500-word laboratory reports (17%). To pass the subject students must pass the laboratory component.

PHY3SCB PRINCIPLES OF PHYSICS B (30 CPs Sem. TE-SEM-2 BU.) *Dr Chris Pakes*

This unit is the second of two semester-length subjects, which together constitute a mainstream course in Physics at the 3rd year level and are an excellent preparation for Honours and post-graduate

studies in Physics. This unit incorporates lecture courses in atomic physics, plasma physics, solid-state physics, and surface and materials physics. Students enhance their practical skills with a range of laboratory experiments, and complete a review essay on a topic chosen in conjunction with a staff member. An oral presentation on the essay topic is compulsory.

Prerequisite: Either PHY20SCI or PHY2SCA and PHY2SCB, and MAT21AVC and MAT21LA.

Incompatible unit: PHY31POM, PHY32POM

Class requirements: Four 1-hour lectures, 6 hours laboratory work, and one 1-hour tutorial per week.

Assessment: Four 1.5-hour examinations (66%), one 1500-word assignment (17%), four 500-word laboratory reports (17%). To pass the subject students must pass the laboratory component.

PHY4HNA HONOURS PHYSICS (60 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.)

Coordinator to be advised

This unit of study represents one semester of a year long program. By the completion of the Honours program, a student should have developed a thorough working knowledge of some of the major fundamental topics in physics together with specialised knowledge in one of the main research interests of the Department namely: materials and surface science or space science. Details of the lectures and research project topics offered each year are available from the Department of Physics each December. The Honours program is an excellent preparation for postgraduate studies leading to the award of an MSc or PhD and is characterised by small class sizes and individual supervision of a research project by internationally recognised senior staff. Lectures are generally given in the first semester leaving the second semester free for concentration on the individually selected research project.

Prerequisite: At least 65% in PHY31SCA and PHY32SCB and an overall score of 60% in the third year or an equivalent performance at another University. Students who do not satisfy the above conditions may be permitted to enrol in the Postgraduate Diploma in Physics (PHY4PGA and PHY4PGB) following application to the Head of Department.

Incompatible unit: PHY40HON, PHY41HON

Class requirements: Ninety-six 1-hour lectures. Students are expected to be present during normal working hours each day and to use the remaining time for personal study and for work on their research project.

This unit is not available for study abroad students.

Assessment: Six 3-hour examinations (50%), one 20,000-word thesis (45%), one oral examination (5%). The assessment components listed are the combined assessment for PHY4HNA and PHY4HNB

PHY4HNB HONOURS PHYSICS (60 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.)

Coordinator to be advised

This unit of study represents one semester of a year long program. PSY1BNA INTRODUCTION TO BEHAVIOURAL NEUROSCIENCE A (15

CPs Sem. TE-SEM-1 AW, BE, BU.) **AW:** Dr Brad Wright, **BE:** Dr Anna Kokavec, **BU:** Dr Stephen Kent

In this unit, students are introduced to the language of neuroscience and in particular, to the nomenclature that is fundamental to an understanding of the relationship between the biological processes of the brain and behaviour. The unit is designed to link knowledge and techniques from traditional biological disciplines, such as genetics, with those of psychology as a behavioural science. Topic areas centre on study of the neuron as the basic cellular unit of the nervous systems and include ultra structural and neurophysiologic approaches to excitable membranes, neurotransmitters, and psychopharmacology.

Quota: 250. Subject to laboratory space constraints

Class requirements: Three 1-hour lectures and one 3-hour laboratory class per week.

Assessment: One 1000-word essay (20%), one 1000-word work book (15%), one 100-word equivalent in-class practical examination (15%), one 2-hour examination (50%)

Prescribed Reading:

Bear, M.F., Connors, B.W., & Paradiso, M.A. (2006) *Neuroscience: Exploring the brain* 3rd edn. Baltimore: Williams & Wilkins

PSY1BNB INTRODUCTION TO BEHAVIOURAL NEUROSCIENCE B (15

CPs Sem. TE-SEM-2 AW, BE, BU.) **AW:** Dr Brad Wright, **BE:** Dr Anna Kokavec, **BU:** Dr Stephen Kent

In this unit, students are introduced to the mechanisms of sensory (input) information and motor processing and the intrinsic factors affecting brain development and behaviour such as, hormones, learning, and memory. Lectures are organised into four streams, neuroscience of sensory and motor systems, brain development, Neuro endocrinology, and introduction to the neuroscience of learning and memory.

Quota: 250. Resource constraints

Class requirements: Three 1-hour lectures and one 3-hour laboratory class per week.

Assessment: One oral poster presentation (10%), one 1000-word laboratory report (20%), one 2-hour examination (50%), one 1000-word work book (20%)

Prescribed Reading:

Bear, M.F., Connors, B.W., & Paradiso, M.A. (2006) *Neuroscience: Exploring the brain* 3rd edn. Baltimore: Williams & Wilkins

PSY1PSA PSYCHOLOGY STUDIES A (15. CPs Sem. TE-SEM-1 AW, BE, BU, HK, MI, SH.) **Dr Sandra Tunley**

BU: **AW:** **BE:** **MI:** **SH:** Available only to students enrolled in the Bachelor of Social Work and the Bachelor of Social Work/Bachelor of Human Services. **BU:** **AW:** **BE:** Not available to students enrolled in the Bachelor of Psychological Science. This is not part of an APAC-accredited course of study and completion cannot be counted towards membership of the APS, or registration as a psychologist.

In this unit, students are introduced to psychology as a science. The aim is to assist students to understand behaviour in terms of current theories of psychology. The content is presented in several core areas of the discipline. These areas are examined from both a theoretical and an applied perspective. Methods of studying behaviour in these content areas are examined and there is a focus on developing a variety of academic abilities such as the group work, library, and writing skills of students.

Incompatible unit: PSY11PYA, PSY1PYA

Quota: 100.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: one 1,250-word essay (25%), one 1.5-hour examination (40%), one 500-word library and referencing assignment (10%), and one 750-word research report (20%), tutorial participation (5%)

Prescribed Reading:

PSY1PSB PSYCHOLOGY STUDIES B (15. CPs Sem. TE-SEM-2 AW, BE, BU, HK, MI, SH.) *Dr Sandra Tunley*

BU: AW: BE: MI: SH: Available only to students enrolled in the Bachelor of Social Work and the Bachelor of Social Work/Bachelor of Human Services. BU: AW: BE: Not available to students enrolled in the Bachelor of Psychological Science. This is not part of an APS-accredited course of study and completion cannot be counted towards membership of the Society, or registration as a psychologist.

In this unit, students are introduced to psychology as a science. The aim is to further assist students to understand behaviour in terms of current theories of psychology. The content is presented in several core areas of the discipline. These areas are examined from both a theoretical and an applied perspective. Methods of studying behaviour in these content areas are examined and there is a focus on further developing a variety of academic abilities such as the group work, library, and writing skills of students.

Incompatible unit: PSY12PYB, PSY1PYB

Quota: 100.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 1,250-word essay (25%), one 30-minute group tutorial presentation (20%), one 500-word report (10%), one 1.5-hour examination (40%), tutorial participation (5%)

Prescribed Reading:

Westen, D., Burton, L., & Kowalski, R. *Psychology: Australian and New Zealand edition*. Milton, Qld: John Wiley and Sons Australia, Ltd. 2006

PSY1PYA PSYCHOLOGY A (15. CPs Sem. TE-SEM-1 AW, BE, BU.) *AW: Ms Sharon Zakhary, BE: Dr Tim Godber, BU: Dr Mary Omodei*

In this unit and its companion PSY1PYB, students are introduced to the scientific study of psychology and gain a foundation for higher-level units in psychology. The curriculum introduces the discipline and initiates the study of several key fields of psychology, the formal terms and theories associated with those fields as well as the scientific methods used to gather the relevant knowledge. Students will also be taught the skills of writing research reports to communicate their investigations and will participate in activities that foster group work skills.

Prerequisite: Enrolment in this unit is restricted. Therefore, students enrolled in courses for which this unit is not core must obtain the approval of the course adviser prior to enrolment.

Incompatible unit: PSY11PSA, PSY1PSA

Quota: 450.

Class requirements: Three 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 2000-word tutorial workbook (50%), one 2-hour examination (50%)

PSY1PYB PSYCHOLOGY B (15. CPs Sem. TE-SEM-2 AW, BE, BU.) *AW: Ms Sharon Zakhary, BE: Dr Tim Godber, BU: Dr Mary Omodei*

The work in this unit complements the content of PSY1PYA. The formal terms and theories associated with those fields, as well as the scientific methods used to gather the relevant knowledge, will be presented. PSY1PYB will also further develop student skills in the writing of research reports and essays; the conduct of library research and participation in-group work.

Incompatible unit: PSY12PSB, PSY1PSB

Quota: 450.

Class requirements: Three 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 2000-word tutorial workbook (50%), one 2-hour examination (50%)

PSY2PYA PSYCHOLOGY A (20. CPs Sem. TE-SEM-1 AW, BE, BU.) *AW: Dr Brad Wright, BE: Dr Anna Kokavec, BU: Dr Ben Ong*

In this unit, students are expected to study, in detail and at a more advanced level, the major content areas of experimental psychology introduced in first year. The aim is to consolidate theoretical knowledge and methodological skills for conducting psychological research. Together with PSY2PYB, this unit forms the second year of the APAC-accredited major sequence and covers the following content areas: cognitive psychology, social neuroscience, perception, individual differences and psychological research methods.

Prerequisite: PSY11PYA and PSY12PYB, STA12PSY or STA12OCT.

Class requirements: Three 1-hour lectures and one 1-hour tutorial per week.

Assessment: Two 1500-word tutorial workbooks (50%), one 2-hour examination (50%)

PSY2PYB PSYCHOLOGY B (20. CPs Sem. TE-SEM-2 AW, BE, BU.) *AW: Dr Brad Wright, BE: Dr Anna Kokavec, BU: Dr Ben Ong*

In this unit, students are expected to study, in detail and at a more advanced level, the major content areas of experimental psychology introduced in first year. The aim is to consolidate theoretical knowledge and methodological skills for conducting psychological research. Together with PSY2PYA, this unit forms the second year of the APAC-accredited major sequence and covers the following content areas: abnormal psychology, history of psychology, social psychology, language and child development, and psychological research methods.

Prerequisite: PSY11PYA and PSY12PYB and STA12PSY or STA12OCT.

Class requirements: Three 1-hour lectures and one 1-hour tutorial per week.

Assessment: Two 1500-word tutorial workbooks (50%), one 2-hour examination (50%)

PSY3ANA APPLIED NEUROSCIENCE A (20 CPs Sem. TE-SEM-1 AW, BE, BU, MI, SH.) *Dr Richard Weisinger*
Not available in 2008

PSY3CDB COGNITIVE AND DEVELOPMENT PSYCHOLOGY B (20 CPs Sem. TE-SEM-2 AW, BE, BU, MI, SH.) *Dr Sheila Crewther*
Not available in 2008

PSY3CFA COUNSELLING AND FAMILY PSYCHOLOGY A (20 CPs Sem. TE-SEM-1 AW, BE, BU, MI, SH.) *Dr Anthony Love*

This is one of four elective units offered in the second or third year of the Psychological Science degree. In this unit students study topics related to counselling skills, theories of attachment and family functioning.

Prerequisite: PSY1PYA and PSY1PYB or PSY1PSA and PSY1PSB or approval of the Course Adviser.

Incompatible unit: PSY21TOP, PSY22TOP, PSY31TOP, PSY32TOP, PSY30APP, PSY31APP, PSY32APP

Quota: 300.

Class requirements: Three 1-hour lectures and one 1-hour tutorial per week.

Assessment: Two 1500-word case studies (50%), one 2-hour examination (50%). one oral poster presentation, hurdle requirement only

PSY3PYA PSYCHOLOGY A (20. CPs Sem. TE-SEM-1 AW, BU, BE.) *BU: Dr Emiko Kashima, AW: Dr Michael Halloran, BE: Dr Anna Kokavec*

This unit of study is usually taken as the first semester of a year long program. These are the final units in the major sequence of psychology and are part of the sequence accredited by APAC.

Upon completing PSY3PYA/3PYB, students will be able to demonstrate further knowledge of both theory and research in key areas in psychology, including cognition, cultural psychology, developmental psychology, language, neuropsychology, social psychology, and ethics and professional practice. Students will also have developed skills in the analysis of the philosophical

underpinning of psychological theories, quantitative and qualitative psychological research methods, applied psychometric theory, and evaluation of psychological tests and assessment methods. Students should also have integrated and advanced their understanding of scientific research methods.

Prerequisite: PSY21PYA and PSY22PYB.

Incompatible unit: PSY30PY

Class requirements: Three 1-hour lectures, one 1-hour tutorial per week.

Assessment: Two 2000-word assignments (50%), one 2-hour examination (50%)

PSY3PYB PSYCHOLOGY B (20 CPs Sem. TE-SEM-2 AW, BU, BE.) *BU: Dr*

Emiko Kashima, AW: Dr Michael Halloran, BE: Dr Anna Kokavec

These are the final units in the major sequence of psychology and are part of the sequence accredited by the APS.

Upon completing PSY3PYA/3PYB, students will be able to demonstrate further knowledge of both theory and research in key areas in psychology, including cognition, cultural psychology, developmental psychology, language, neuropsychology, social psychology, and ethics and professional practice. Students will also have developed skills in the analysis of the philosophical underpinning of psychological theories, quantitative and qualitative psychological research methods, applied psychometric theory, and evaluation of psychological tests and assessment methods. Students should also have integrated and advanced their understanding of scientific research methods.

Prerequisite: PSY21PYA and PSY22PYB.

Incompatible unit: PSY30PY

Class requirements: Three 1-hour lectures, one 1-hour tutorial per week.

Assessment: Two 2000-word assignments (50%), one 2-hour examination (50%)

PSY3RSA RESEARCH PROJECT A (20 CPs Sem. TE-SEM-1 AW, BE, BU.) *BU:*

Dr Emiko Kashima, AW: Dr Michael Halloran, BE: Dr Anna Kokavec

This is the first part of a supervised research project, which provides training in research methods as required by the Australian Psychology Accreditation Council. The supervised research project runs over both PSY3RSA and PSY3RSB. PSY3RSA is comprised of conducting a literature review, a rationale for the research project, design of a suitable study, application for ethics approval, and the writing of a research proposal. These activities are supported by a block of thirteen 1-hour seminars and thirteen 3-hour tutorials.

Prerequisite: PSY21PYA or PSY2PYA and PSY22PYB or PSY2PYB.

Quota: 160. Approval of Adviser of Studies required

Class requirements: Blocks of seminars equivalent to one 1-hour lecture per week and one 3-hour tutorial per week.

Assessment: A 2000-word draft ethics application (10%) The draft ethics application is a hurdle requirement., one 3000-word project proposal (80%), project participation (10%)

PSY3RSB RESEARCH PROJECT B (20 CPs Sem. TE-SEM-2 AW, BE, BU.) *BU:*

Dr Emiko Kashima, AW: Dr Michael Halloran, BE: Dr Anna Kokavec

This is the second part of a supervised research project, which provides training in research methods, as required by the Australian Psychology Accreditation Council. The supervised research project runs over both PSY3RSA and PSY3RSB. PSY3RSB is comprised of collecting research data, conducting statistical analyses of these data, understanding the implications of the data for the original research question, and writing a research report describing the whole of the study. These activities are supported by a block of thirteen 1-hour seminars and thirteen 3-hour tutorials.

Prerequisite: PSY21PYA or PSY2PYA and PSY22PYB or PSY2PYB and PSY3RSA.

Quota: 160. Approval of Adviser of Studies required

Class requirements: Blocks of seminars equivalent to one 1-hour lecture per week and one 3-hour tutorial per week.

Assessment: One 4000-word project report and one 1000-word display and discussion poster presentation (90%) The poster presentation is a hurdle requirement, project participation (10%)

PSY3SCB SOCIAL AND COMMUNITY PSYCHOLOGY B (20 CPs Sem. TE-SEM-2 AW, BE, BU.) *Dr Art Stukas*

This is one of four elective units offered in the second or third year of the Psychological Science degree. In this unit students study topics related to Social Psychology and Community Psychology.

Prerequisite: PSY1PYA and PSY1PYB or PSY1PSA and PSY1PSB or approval of the Course Adviser.

Incompatible unit: PSY21TOP, PSY22TOP, PSY31TOP, PSY32TOP, PSY30APP, PSY31APP, PSY32APP

Quota: 250

Class requirements: Three 1-hour lectures and one 1-hour tutorial per week.

Assessment: Two 1500-word case studies (50%), one 2-hour examination (50%). one oral poster presentation, hurdle requirement only

PSY4HNA HONOURS PSYCHOLOGY (60 CPs Sem. TE-SEM-1 BU.) *Dr*

Michael Halloran

This unit of study represents the first semester of a year long program designed to prepare students for postgraduate studies. Students MUST complete both PSY4HNA and PSY4HNB in the one academic year. Part-time study over two years may be granted. For La Trobe students from all campuses, admission is by application only and is dependent on staff availability for thesis supervision

External applicants with excellent results in a three-year psychology sequence accredited by the Australian Psychology Accreditation Council and La Trobe graduates from earlier years with the accredited 3-year sequence in psychology, apply through the School. The main components of the course are several seminars, three major pieces of written work, and an exam. Two of these pieces of work, the research thesis and the theory essay, provide opportunities for students to specialise in particular areas of study. A psychological research methods assignment ensures an understanding of issues involved in research methodology and analysis. The supervised Honours research projects are often closely related to ongoing staff research projects.

Prerequisite: All requirements for the Bachelor of Psychological Science, a minimum average of 70% in PSY1PYA and PSY1PYB, PSY2PYA and PSY2PYB and PSY3PYA and PSY3PYB and PSY3RSA and PSY3RSB and a high standard in other units .

Incompatible unit: PSY40HON, PSY41HON

Class requirements: Three 1-hour research colloquia per month and preparation of abstracts of selected colloquia; 2-hour weekly seminars in theory and one 3-hour weekly seminar in psychological research methods in the first semester and oral and written presentation of a research proposal, including a review of the area of research, the rationale, the method, the proposed data analysis and implications of the expected findings. Hurdle requirements also include an ethics application, funding application and class presentation in semester one and an ethics report in semester 2. A series of 12 2-hour contemporary issues seminars covering current issues in psychology, interviewing skills, psychological assessment, professional issues and evidence-based practice. One full-day research presentation conference.

This unit is not available for study abroad students.

Assessment: Combined assessment for PSY4HNA and PSY4HNB; one theory essay equivalent to 5600 words (25%), an empirical research thesis equivalent to 12,000 words (50%), a psychological research methods assignment equivalent to 5000 words (15%), 3-hour examination (10%). Hurdle requirements: Research proposal (5000 words), Conference summary (750 words) and presentation (10 mins), Ethics Application and report (1600 words) and six Colloquia summaries (2100 words)

PSY4HNB HONOURS PSYCHOLOGY (60 CPs Sem. TE-SEM-2 BU.) *Dr*

Michael Halloran

This unit of study represents the second semester of a year long program designed to prepare students for postgraduate studies. Students MUST complete both PSY4HNA and PSY4HNB in the one academic year. Part-time study over two years may be granted. For La Trobe students from all campuses, admission is by application only and is dependent on staff availability for thesis supervision.

External applicants with excellent results in a three-year psychology sequence accredited by the Australian Psychology Accreditation

Council and La Trobe graduates from earlier years with the accredited 3-year sequence in psychology, apply through the School. One full-day research presentation conference.

This unit is not available for study abroad students.

Assessment: Combined assessment for PSY4HNA and PSY4HNB; one theory essay equivalent to 5600 words (25%), an empirical research thesis equivalent to 12,000 words (50%), a psychological research methods assignment equivalent to 5000 words (15%), 3-hour examination (10%). Hurdle requirements: Research proposal (5000 words), Conference summary (750 words) and presentation (10 mins), Ethics Application and report (1600 words) six 6 Colloquia summaries (2100 words)

SCIOICP INDUSTRY CADETSHIP (60 CPs Sem. TE-SEM-1 AW, BE, BU. TE-SEM-2 AW, BE, BU.) *Ms Jill Mullen*

Students enrolled in this unit are involved in the Industry Cadetship Program. The program enables students to spend a training period within a specific Industry. The program is competitive with each position requiring a formal application and interview process. Final selection is made by the Industry partner involved.

Prerequisite: Enrolment in an undergraduate program of the Faculty of Science, Technology and Engineering.

Class requirements: The placement is carried out during semester as agreed between the industry partners the student and the ICP office of the Faculty.

This unit is not available for study abroad students.

Assessment: NONE (100%)

SCIOICS INDUSTRY CADETSHIP (0 CPs Sem. TE-W47-06 AW, BE, BU.) *Ms Jill Mullen*

Students enrolled in this unit are involved in the Industry Cadetship Program. The program enables students to spend a training period within a specific Industry. The program is competitive with each position requiring a formal application and interview process. Final selection is made by the Industry partner involved.

Prerequisite: Enrolment in an undergraduate program of the Faculty of Science, Technology and Engineering.

Class requirements: The placement is carried out during the summer break as agreed between the industry partners the student and the ICP office of the Faculty.

This unit is not available for study abroad students.

Assessment: NONE (100%)

SCIOICW INDUSTRY CADETSHIP (0 CPs Sem. TE-SEM-2 AW, BE, BU.) *Ms Jill Mullen*

Students enrolled in this unit are involved in the Industry Cadetship Program. The program enables students to spend a training period within a specific Industry. The Industry Cadetship Program is competitive with each position requiring a formal application and

interview process. Final selection is made by the Industry partner involved.

Prerequisite: Enrolment in an undergraduate program of the Faculty of Science, Technology and Engineering.

Class requirements: The placement is carried out during the winter break as agreed between the industry partners the student and the ICP office of the Faculty.

This unit is not available for study abroad students.

Assessment: NONE (100%)

STA1LS STATISTICS FOR LIFE SCIENCES (15. CPs Sem. TE-SEM-1 BU. TE-SEM-2 AW, BU.) *AW: Dr Warren Paul, BU: Dr Luke Prendergast, MI: Dr Michael Schooneveldt*

This unit can be taken at first year level in either first or second semester or at second year level (STA2LS) where one extra one-hour project class is required. Only available in Albury-Wodonga in semester two.

In this unit, students will be introduced to the basic statistical methods that are very useful for students in biological sciences, medical sciences, agricultural sciences, nutrition, and health sciences. For example, this unit will cover essential skills for students to analyse data from experiments and write reports. It is specifically designed for students who do not have a strong background in mathematics, and further, it does not assume any previous training in statistics or probability. The unit covers descriptive statistics, estimation, hypothesis testing, test for proportions and means, analysis of variance, regression analysis, and analysis of cross-classified data. The use of the statistical computing package Minitab or SPSS is an integral part of this unit. Successful completion qualifies students for the second year level units in statistics STA2AS, STA2MS, STA2BS, and STA2RSP.

Incompatible unit: STA11LS, STA12LS, STA21LS, STA22LS, STA2LS, ECO10BES, ECO11BES, ECO12BES, ECO11ISB, ECO12ISB, STA12PSY, STA1PSY, STA12OCT, STA1OCT

Class requirements: Three 1-hour lectures, one 1-hour problem class, and one 1-hour computer laboratory class per week.

Assessment: One 2.5-hour examination (60%), two 45-minute computer-based tests (30%), ten 100-word assignments (10%)

Recommended Reading:

Johnson, R. and Kubey, P. *Elementary statistics* 10th edn. Duxbury, 2007.

STA1OCT STATISTICS FOR OCCUPATIONAL THERAPY (10 CPs Sem. TE-W29-37 BU.) *Ms Mitra Jazayeri*

This unit is designed to introduce students undertaking the major stream of occupational therapy subjects within the Health Sciences to a range of statistical methods used in contemporary psychological and health research. Topics include: descriptive statistics, data entry and manipulation, exploratory data analysis, basic probability models and sampling, estimation and confidence intervals, hypothesis testing and its relation to confidence intervals; the power of a test and its relation to sample size; effect sizes and an introduction to meta-analysis; analysis of single and two group designs; correlation and simple linear regression. The statistical computing package SPSS is an integral part of this unit with weekly tutorials held in a computing laboratory.

Co-requisite: For students enrolled in the Faculty of Health Sciences, STA1OCT is normally a co-requisite for PSY1PYB.

Incompatible unit: STA11LS, STA12LS, STA1LS, STA21LS, STA22LS, STA2LS, STA12PSY, STA1PSY

Class requirements: Three 1-hour lectures, one 1-hour practice class and one 1-hour computer laboratory class per week for the first eight weeks of the semester.

Assessment: One 2-hour examination (60%), eight 80-word assignments (20%), one 50-minute computer test (20%)

Prescribed Reading:

Francis, G. *Introduction to SPSS for Windows*, 5th edn. Prentice Hall, 2007.

STA1PSY STATISTICS FOR PSYCHOLOGY (15 CPs Sem. TE-SEM-2 AW, BU.)

AW: Dr Warren Paul, BU: Ms Mitra Jazayeri

This unit is designed to introduce students undertaking the major stream of psychology to a range of statistical methods used in contemporary psychological research. Topics include: descriptive statistics, data entry and manipulation; exploratory data analysis, basic probability models and sampling, estimation and confidence intervals, hypothesis testing and its relation to confidence intervals; the power of a test and its relation to sample size; effect sizes and an introduction to meta-analysis; analysis of single and two group designs; correlation and simple linear regression; analysis of categorical data; non-parametric statistical methods; multiple regression and related methods.

The statistical computing package SPSS is an integral part of this unit with weekly tutorials held in a computing laboratory.

Co-requisite: For students in the Faculty of Science, Technology and Engineering, this subject is normally a co-requisite for PSY1PYB.

Incompatible unit: STA11SS, STA1SS, STA11LS, STA12LS, STA1LS, STA21LS, STA22LS, STA2LS, STA12OCT, STA21SS, STA2SS

Class requirements: Three 1-hour lectures, one 1-hour practice class and one 1-hour computer laboratory class per week.

Assessment: One 2-hour examination (50%), two 50-minute computer tests (40%), ten 100-word assignments (10%)

Prescribed Reading:

Francis, G. *Introduction to SPSS for Windows* 5th edn. Prentice Hall, 2007

Aron, A., Aron, E. and Coups, E.J. *Statistics for the behavioural and social sciences. A brief course.* 4th edn. Prentice Hall. 2008.

STA1SS STATISTICAL SCIENCE (15 CPs Sem. TE-SEM-1 BU.) Dr Ajay

Chandra

Students who complete this unit qualify for all second year statistics units. Objectives include providing a working knowledge of exploratory data analysis, hypothesis tests, and parameter estimates, as well as a working knowledge of the statistical computer software, Minitab. Simulation studies and real world data are used to gain familiarity with random sampling and probability models. Statistical methods to be learned include inference for a binomial parameter, difference of two proportions, population means, and measure of association, fitting a straight line by the method of least squares, test of homogeneity and exact test for independent classification in a two by two contingency table.

Prerequisite: Year-12 mathematics or STA1LS or STA11LS.

Incompatible unit: ECO11BES, ECO12BES, ECO11SB, ECO12ISB, ECO11BSW, ECO12BSW, STA21SS, STA2SS, STA11SC, STA21SC.

Class requirements: Three 1-hour lectures, one 1-hour practical class, and one 1-hour computer laboratory class per week.

Assessment: One 2-hour examination (60%), one 1-hour computer-based test (20%), ten 80-word assignments (20%)

Recommended Reading:

Utts, J.M. and Heckard, R.F. *Mind on Statistics* 3rd edn. Thomson, 2007.

STA2AS MODERN APPLIED STATISTICS (15 CPs Sem. TE-SEM-1 BU.) Dr

Robert Staudte

Building on the understanding of applied statistical methods developed in first year statistics units, this unit provides an understanding of these methods at an intermediate level. This unit does not require knowledge of calculus and is ideally suited to students with a strong interest in applications of statistics in fields such as biological, medical, and psychological science. The statistical computer package used in the tutorials is Minitab. However, this unit also introduces the open source statistical computing package R. This unit forms part of the accredited major in statistics and so it is important for students wishing to take this major.

Prerequisite: STA1SS or STA2LS or STA1LS or STA1PSY or STA1OCT or ECO11BES or ECO12BES or ECO11SB.

Incompatible unit: STA2MS, STA2MAS, STA2RSP, STA2BS

Class requirements: Two 1-hour lectures, one 1-hour computer laboratory, and one 1-hour tutorial per week.

Assessment: ten written exercises equivalent to 500 words (20%), one

2.5-hour final examination (50%), minor assignment equivalent to 225 words (3%), major assignment equivalent to 525 words (7%), one 45-minute-computer test (20%)

Prescribed Reading:

Rosner, B. *Fundamentals of biostatistics* 6th edn. Thomson, 2006.

STA2BS BIOSTATISTICS (20. CPs Sem. TE-SEM-1 BU.) Dr Robert Staudte

This unit consists of two streams: the Modern Applied Statistics stream (see STA2AS) and a stream covering a range of topics of interest to biological science and environmental science students. Building on the understanding of applied statistical methods developed in first year statistics, this unit provides an understanding of these methods at an intermediate level, with a special emphasis on biological and environmental science applications. This unit does not require knowledge of calculus. An introduction to the open source statistical computing package R is included.

Prerequisite: STA11LS or STA12LS or STA11SS or STA21LS or STA22LS or STA12OCT or STA12PSY or STA1LS or STA2LS or STA1SS or STA2SS or ECO11BES or ECO12BES or ECO11SB.

Incompatible unit: STA2RSP, STA2AS, STA2MS

Class requirements: Three 1-hour lectures, one 1-hour computer laboratory, and one 1-hour tutorial per week.

Assessment: One 3-hour final examination (50%), ten written exercises equivalent to 500 words (20%), minor assignment equivalent to 225 words (3%), major assignment equivalent to 525 words (7%), one 45 minute computer test (20%)

Prescribed Reading:

Rosner, B. *Fundamentals of biostatistics*, 6th edn. Thomson, 2006.

STA2LS STATISTICS FOR LIFE SCIENCES (20. CPs Sem. TE-SEM-1 BU. TE-

SEM-2 BU.) Dr Luke Prendergast

This is the same as STA1LS with an additional one-hour project class per week in which students are guided in writing reports on studies they design, conduct, and analyse.

Recommended Prior Studies: Year 11 mathematics.

Incompatible unit: STA11LS, STA12LS, STA21LS, STA22LS, ECO11BES, ECO12BES, ECO11SB, ECO12ISB, STA21PR, STA22PR, STA12PSY, STA12OCT, STA1LS, STA2PR, STA1PSY, STA1OCT

Class requirements: Three 1-hour lectures per week, two 1-hour practice classes and one 1-hour computer laboratory class per week.

Assessment: One 2.5-hour examination (50%), two 45-minute computer-based tests equivalent to 1000 words (20%), two 750-word projects (20%), and ten 100-word assignments (10%)

STA2MD MODELS FOR DATA ANALYSIS (15 CPs Sem. TE-SEM-2 BU.) Dr

Andriy Olenko

The analysis of scientific, engineering, and economic data makes extensive use of probability models. This unit describes the most basic of these models and their properties. Applications of these models are illustrated with examples from digital communication systems, expert systems, financial risk assessment, and bioinformatics. Specific topics covered in this unit include a wide range of discrete and continuous univariate distributions; joint distributions; conditional expectation; mean and variance of linear combinations of random variables; Chebyshev's inequality; moment generating functions; the law of large numbers; the Central Limit Theorem; the method of moments; maximum likelihood and confidence interval construction using pivots.

Prerequisite: STA1SS or STA11SC or STA1LS or STA2LS or STA1PSY or STA1OCT or STA2SS.

Recommended Prior Studies: Mathematical Methods units 3 and 4 or MAT1CFN or MAT1CNS or MAT1EN or MAT1CFE.

Incompatible unit: STA2MDA

Class requirements: Three 1-hour lectures and one 1-hour tutorial per week.

Assessment: Ten written exercises equivalent to 1250 words (20%), one 2.5-hour examination (80%)

Prescribed Reading:

Rice, J.A. *Mathematical Statistics and Data Analysis* 3rd edn. Duxbury, 2007.

STA2MS MEDICAL STATISTICS (20 CPs Sem. TE-SEM-1 BU.) *Dr Robert Staudte*

This unit consists of two streams: the Modern Applied Statistics stream (see STA2AS) and a stream covering a range of topics in medical statistics. Building on the understanding of applied statistical methods developed in first year statistics units, this unit provides an understanding of these methods at an intermediate level, with a special emphasis on medical statistics applications. This unit does not require knowledge of calculus. An introduction to the open source statistical computing package R is included.

Prerequisite: One of STA11LS/STA12LS, STA21LS, STA11SC, STA21SC, STA12OCT, STA12PSY, STA11SS, STA1LS, STA2LS, STA1SS, STA2SS, ECO11BES or ECO12BES, ECO11SB.

Incompatible unit: STA31MS, STA21MAS, STA2RSP, STA2AS, STA2BS

Class requirements: Three 1-hour lectures, one 1-hour computer laboratory, and one 1-hour tutorial per week.

Assessment: two 3-hour final examination (50%), ten written exercises equivalent to 500 words (20%), minor assignment equivalent to 225 words (3%), major assignment equivalent to 525 words (7%), one forty five minute-computer test (20%)

Prescribed Reading:

Rosner, B. *Fundamentals of biostatistics*, 6th edn. Thomson, 2006.

STA2PR STATISTICS PROJECTS (Five CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.)

Dr Luke Prendergast

Students are guided through the design, collection of data, statistical analysis, and report writing for two projects.

Prerequisite: STA11LS, STA12LS, STA11SS, ECO11SB, ECO12ISB, ECO11BES, ECO12BES, STA1SS, or STA1LS.

Incompatible unit: STA21LS, STA21SC, STA21SS, STA21PR, STA22PR, STA22LS, STA2SS, STA2LS.

Class requirements: One 1-hour tutorial per week.

Assessment: Two 750-word project reports (100%)

STA2RSP R STATISTICAL PROGRAMMING (Five CPs Sem. TE-SEM-1 BU.)

Dr Luke Prendergast

This unit introduces the statistical computing package R. This package is open source and available free of charge. R is a very powerful computing package that includes many excellent graphical displays.

Prerequisite: STA1LS or STA1SS or STA1PSY or STA1OCT or STA2SS or STA2LS.

Incompatible unit: STA2AS, STA2MS, STA2BS

Class requirements: One 1-hour computer laboratory per week.

Assessment: Minor assignment equivalent to 225 words (15%), major assignment equivalent to 525 words (35%), one 45 minute computer test (50%)

STA2SS STATISTICAL SCIENCE (20 CPs Sem. TE-SEM-1 BU.) *Dr Ajay Chandra*

Chandra

This is the same as STA1SS, with an additional one-hour project class per week in which students are guided in writing reports on practical problems.

Incompatible unit: STA11SS, STA21LS, STA22LS, STA22PR, ECO11SB, ECO12ISB, ECO11BES, ECO12BES, STA21PR, STA1SS, STA2LS, STA2PR

Class requirements: Three 1-hour lectures per week, two 1-hour practice classes and one 1-hour computer laboratory per week.

Assessment: One 2-hour examination (45%), one 45-minute computer-based test (20%), two 750-word projects (20%), ten 80-word assignments (15%)

STA3AP APPLIED PROBABILITY FOR COMPUTER SYSTEMS ENGINEERS (15 CPs Sem. TE-SEM-2 BU.) *Dr Luke Prendergast*

This unit is designed for students taking one of the Computer Systems Engineering degrees, but is also available to any student who has completed either STA2MDA or STA2MD.

The aim of this unit is to introduce important probability models frequently encountered in areas related to the engineering sciences. In particular, students will be provided with fundamental tools in the areas of system reliability and queuing theory. Topics include series-parallel system reliability, analysis of system functionality via Markov

chain modelling, and analysis of queues and networks of queues with emphasis on the Poisson process in time. This unit may also be useful to students with an interest in applications of statistical modelling.

Prerequisite: MAT1EN and MAT1FEN (from 2009 MAT1CPE and MAT1CLA) or STA2MDA or STA2MD.

Incompatible unit: STA31PM, STA3PE

Class requirements: Three 1-hour lectures and one 1-hour practice class per week.

Assessment: One 2.5-hour examination (80%), ten assignments equivalent to 1250 words (20%)

STA3AS APPLIED STATISTICS (15. CPs Sem. TE-SEM-2 BU.) *Dr Luke Prendergast*

Prendergast

This unit provides advanced-level introductions to the topics of sample surveys, multivariate analysis, and time series analysis. These topics are very important in applied statistics. The unit also includes an introduction to statistical consulting.

Prerequisite: STA2MDA or STA2MD.

Recommended Prior Studies: STA3LM.

Class requirements: Three 1-hour lectures and one 1-hour tutorial per week.

Assessment: Two 250-word assignments (5%), one 3-hour examination (70%), ten 80-word assignments (25%)

Recommended Reading:

Johnson, R.A. and Wichern, D.W. *Applied Multivariate Statistical Analysis* 5th edn. Pearson, 2002

Rice, J.A. *Mathematical Statistics and Data Analysis* 3rd edn. Duxbury, 2007.

Box, G.E.P. and Jenkins, G.M. *Time Series Analysis: Forecasting and Control* Revised Ed., Holden-Day, 1976.

STA3BS BIOSTATISTICS (15. CPs Sem. TE-SEM-1 BU.) *Dr Luke Prendergast*

Students will learn to design and analyse experiments in the life sciences and agriculture. The topics covered in this unit include a brief review of non-parametric methods; randomisation, blocking and randomised block designs; one-way and two-way layouts; multiple comparison procedures; fixed and random effects; mixed models; multiple linear regression; analysis of covariance; factorial designs; and an introduction to fractional factorial designs

Prerequisite: one of STA22LM, STA21AS, STA22BS, STA21MAS or STA22MDA or one of STA2MAS, STA2BS, STA2MS, STA2MDA, STA2MD.

Incompatible unit: AGR41EXP, AGR4AED

Class requirements: Two 1-hour lectures, one 1-hour tutorial, and one 1-hour problem solving laboratory session per week.

Assessment: One 3-hour final examination (80%), ten 100-word equivalent assignments (20%)

STA3LM ANALYSES BASED ON LINEAR MODELS (15. CPs Sem. TE-SEM-2 BU.) *Dr Robert Staudte*

Linear models are the most commonly used class of models in applied statistics. They are used to relate a response variable to one or more explanatory variables to both determine the form of this relationship and make predictions. The methods are widely used in many areas of application including agricultural science, biological science, economics, engineering, health science, medical science, and psychological science. Topics covered in this unit include the simple linear regression model, derivation and properties of the ordinary least squares estimators, inference, diagnosis and prediction in the simple linear regression model, the multiple linear regression model, inference in the multiple linear regression model, the use of dummy variables and general regression models when the classical regression assumptions are violated. This unit has a combined flavour of both theoretical derivations and practical application using a software package.

Prerequisite: One of STA2MAS, STA2BS, STA2MS, STA2MDA, STA22LM, STA22BS, STA2AS, STA2MD, STA2LM.

Incompatible unit: ECO31EME, ECO3EME

Class requirements: Three 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 1-hour mid-term test equivalent to 800 words (20%), one 2-hour final examination (45%), fifteen 90-word assignments (35%)

STA3SI STATISTICAL INFERENCE (15. CPs Sem. TE-SEM-1 BU.) *Dr Andriy Olenko*

This unit comprises components in estimation, testing hypotheses and distribution-free methods. Topics in the first component include method of moments and maximum likelihood, reduction by sufficiency and invariance, unbiasedness, consistency, efficiency and robustness. The second component examines size and power of tests, Neyman-Pearson lemma, and optimality of tests, the likelihood ratio test, and relationship to confidence interval estimation. The final component includes topics on one- and two-sample methods based on signs and ranks and permutation tests.

Prerequisite: STA22PM or STA22MDA or STA2MDA or STA2MD.

Class requirements: Three 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 3-hour examination (70%), ten 100-word assignments (30%)

Recommended Reading:

Bain, L.J. and Engelhardt, M. *Introduction to Probability and Mathematical Statistics* 2nd edn, PWS — Kent, 1987.

STA4HNA HONOURS STATISTICS (60 CPs Sem. TE-SEM-1 BU.) *Dr Luke Prendergast*

This unit of study represents one semester of a year long program. Honours students normally select five units from those offered by the Key Centre for Statistical Sciences and listed in the Master of Statistical Sciences section of the Postgraduates section of the Handbook. A limited number of third year units and/or a limited number of units in related disciplines (such as mathematics or econometrics) may be taken subject to the approval of the Head of Statistics Section. In addition, every student is required to write an Honours thesis, supervised by a staff member. A thesis topic may be selected from a list of topics provided by the Statistics Section, but can be on any other approved topic, subject to approval by the Head of Statistics Section.

Prerequisite: A grade average of at least 70% for STA3BS, STA3LM, STA3AS and STA3SI and a third year average of at least 60%.

Recommended Prior Studies: MAT1CFN (or MAT1CNS) and MAT1CLA and MAT2LA (or MAT2LAL).

Class requirements: Attendance at lectures for chosen units.

Assessment: One research thesis equivalent to 12,000 words (38%), coursework (62%). The assessment components listed are the combined assessment for STA4HNA and STA4HNB

STA4HNB HONOURS STATISTICS (60 CPs Sem. TE-SEM-2 BU.) *Dr Luke Prendergast*

This unit of study represents one semester of a year long program. Honours students normally select five units from those offered by the Key Centre for Statistical Sciences and listed in the Master of Statistical Sciences section of the Postgraduates section of the Handbook. A limited number of third year units and/or a limited number of units in related disciplines (such as mathematics or econometrics) may be taken subject to the approval of the Head of Statistics Section. In addition, every student is required to write an Honours thesis, supervised by a staff member. A thesis topic may be selected from a list of topics provided by the Statistics Section, but can be on any other approved topic, subject to approval by the Head of Statistics Section.

Prerequisite: A grade average of at least 70% for STA3BS, STA3LM, STA3AS and STA3SI and a third year average of at least 60%.

Recommended Prior Studies: MAT1CFN (or MAT1CNS) and MAT1CLA and MAT2LA (or MAT2LAL).

Class requirements: Attendance at lectures for chosen units.

Assessment: One research thesis equivalent to 12,000 words (38%), coursework (62%). The assessment components listed are the combined assessment for STA4HNA and STA4HNB

ZOO2AE ANIMAL ECOLOGY (10. CPs Sem. TE-SEM-1 BU.) *Dr Michael Clarke*

This unit is taught over the second half of first semester and examines the ecology of animals at the level of the individual, the population, the community, and the ecosystem, within an evolutionary framework. Topics include ecological methods,

predator-prey and host-parasite interactions, the concepts of niche and habitat, over-exploitation of natural populations, competition and disturbance and processes threatening Australian ecosystems. The practical classes associated with this unit are based almost entirely in the field within Reserves managed by the University. They will introduce students to field survey techniques used in terrestrial and aquatic habitats, experimental design, and the analysis of data. They will include studies of animal behaviour, competition between species, and the composition of freshwater invertebrate communities in the presence and absence of an introduced species or predator.

Prerequisite: BIO11AD and BIO11OF.

Co-requisite: Students enrolled in the Bachelor of Biological Sciences or Bachelor of Conservation Biology and Ecology are required to enrol in both ZOO2AE and ZOO2ENT.

Quota: 150. Places are allocated based on academic merit

Class requirements: Three 1-hour lectures per week and one 4-hour practical session per week for the second half of the semester.

Assessment: Two assignments (750 words each) (40%) based on work during practical classes, one 1.5-hour examination (60%)

Prescribed Reading:

Attiwill, P., Wilson, B. *Ecology: an Australian perspective* 2nd edn. Oxford University Press 2006

ZOO2ENT ENTOMOLOGY (10. CPs Sem. TE-SEM-1 BU.) *Professor Tim New*

This unit is taught over the first half of the first semester. This unit examines insect biology and evolution. Topics include aspects of insect morphology, classification, reproduction, ecology and the importance of insects in agriculture and medicine. The evolution of insects covers their origins and fossil record, the origin of flight, adaptive radiation and the relationships of the insect orders. A wide range of insect groups is examined and each student is expected to make a representative collection of at least 15 different orders of insects. Students will be required to dissect dead insects and to work with living insects under supervision.

Prerequisite: BIO11AD and BIO11OF.

Co-requisite: Students enrolled in Bachelor of Biological Sciences or Bachelor of Conservation Biology and Ecology are required to enrol in both ZOO2AE and ZOO2ENT.

Quota: 150. Places are allocated based on academic merit

Class requirements: Three 1-hour lectures per week and one 4-hour practical session per week.

Assessment: Performance in fieldwork and the laboratory (20%), a submitted insect collection (20%), a 1.5-hour examination (60%)

Prescribed Reading:

New, T. R. *Introductory entomology for Australian students* NSW UP 2000, or

Gullan, P., Cranston, P. *The insects*, Blackwell Science 2004.

ZOO2VMP VERTEBRATE MORPHOLOGY, EVOLUTION AND COMPARATIVE PHYSIOLOGY (20. CPs Sem. TE-SEM-2 BU.) *Coordinator to be advised*

This unit is divided into two components. The first component (vertebrate morphology, evolution, and systematics) involves the study of fish, amphibians, reptiles, birds, and mammals. The second component (comparative physiology) examines the way in which animals function and respond to environmental factors, such as oxygen supply, food and energy, temperature and water; mechanisms of animal movement, sensory systems and neural integration. Practical work in morphology involves a study of the bones and some of the soft anatomy and tissues of vertebrates, and will involve some dissection of dead animals, none of which is killed specifically for the dissections. In physiology, students will be required to dissect dead animals or to work with living animals under supervision. The course includes an introduction to animal ethics.

Prerequisite: BIO11AD and BIO11OF.

Quota: 150. Places are allocated based on academic merit.

Class requirements: Three 1-hour lectures per week and one 4-hour practical session per week.

Assessment: One 3-hour theory examination (65%), laboratory performance, including assignment and practical reports equivalent to 2000 words (35%)

Prescribed Reading:

Schmidt-Nielsen, K. *Animal physiology* 5th edn, Cambridge U., 1997.
 Randall, D., Burggren, W. and French, K. *Eckert: animal physiology - mechanisms and adaptations* 5th edn, Freeman 2002.
 Kardong, K. V. *Vertebrates — comparative anatomy, function, and evolution* 4th edn. WCB/McGraw-Hill 2001

ZOO3EPA ZOOLOGY A (30. CPs Sem. TE-SEM-1 BU.) *Dr Richard Zann*

When enrolling, students MUST check full details of dates and costs of field trips and enter their component choices via www.latrobe.edu.au/zoo (third year icon). Please note: not all listed components may be offered. Laboratory coats, dissecting kits and hand lenses are required. Students will be required to dissect dead animals and to work with living tissue under supervision.

Students must pass three components in order to complete the requirements for the unit. Six components are normally offered and students may choose any three providing that a component common to another unit is not already used for credit. Three components are based in the field and three components are based in the laboratory. Each laboratory component consists of lecture/tutorial work and practical work. Component 1: Kangaroo Island Field Course. Component 2: Mallee Field Course. Component 3: Heron Island Field Course. Component 4: Behavioural Ecology. Component 5: Animal Behaviour. Component 6: Environmental Physiology

Prerequisite: ZOO21ENT and ZOO21AE or ZOO22VMP or AGR22PDA.

Class requirements: Lab-based components: four 1-hour lectures and two 4-hour practical classes per week. Field based components: equivalent to five 12-hour days.

Assessment: Three 1,250-word practical reports (45%), three 1.5-hour examinations (55%). This is the combined assessment for three lab-based components. Students undertaking field-based components submit a literature review/practical report/examination equivalent to 3000 words per component.

Prescribed Reading:

Coates, S. *SPSS: analysis without anguish* John Wiley, 2007

ZOO3EPB ZOOLOGY B (30. CPs Sem. TE-SEM-2 BU.) *Dr Richard Zann*

When enrolling, students MUST check full details of dates and costs of field trips and enter their component choice via www.latrobe.edu.au/zoo (third year icon). Please note: not all listed components may be offered. Laboratory coats, dissecting kits and hand lenses are required. Students will be required to dissect dead animals and to work with living tissue under supervision.

Students must pass three components in order to complete the requirements for the unit. Six components are offered and students must choose any three providing that a component common to another unit is not already used for credit. Components 1-3 are based in the field and components 7-9 are based in the laboratory. Each component consists of lecture/tutorial work and practical work. Component 1: Kangaroo Island Field Course. Component 2: Mallee Field Course. Component 3: Heron Island Field Course. Component 7: Coastal Marine Ecology. Component 8: Excitable Tissues. Component 9: Freshwater Ecology.

Prerequisite: ZOO21ENT and ZOO21AE or ZOO22VMP or AGR22PDA.

Incompatible unit: ZOO31EPB, ZOO32EPB, ZOO3EPC

Class requirements: Lab-based components: four 1-hour lectures and two 4-hour practical classes per week. Field-based components: equivalent to five 12-hour days in the field.

Assessment: Three 1,250-word practical reports (45%), three 1.5-hour examinations (55%). This is the combined assessment for three lab-based components. Students undertaking field-based components submit a literature review/practical report/examination equivalent to 3000 words per component.

Prescribed Reading:

Boulton, A.J., Brock, M. *Australian freshwater ecology. Processes and management* Gleneagles, 1999.

 Aidley, D. J. *The physiology of excitable cells* 4th edn, Cambridge U., 1995

ZOO3EPC ZOOLOGY C (30. CPs Sem. TE-SEM-1 BU.) *Dr Richard Zann*

Only available to students enrolled in the Bachelor of Animal and Veterinary Bioscience. When enrolling, students MUST check full details of dates and costs of field trips and enter their component choice via www.latrobe.edu.au/zoo (third year icon). Please note: not all listed components may be offered.

Students must pass three components in order to complete the requirements for the unit. Six components are offered and students must choose two components from 1, 2 or 3 and must choose one component from 7, 8 or 9. Components 1-3 are based in the field and components 7-9 are based in the laboratory. Each component consists of lecture/tutorial work and practical work. Component 1: Kangaroo Island Field Course. Component 2: Mallee Field Course. Component 3: Heron Island Field Course. Component 7: Coastal Marine Ecology. Component 8: Excitable Tissues. Component 9: Freshwater Ecology. Laboratory coats, dissecting kits and hand lenses are required. Students will be required to dissect dead animals and to work with living tissue under supervision.

Prerequisite: ZOO21ENT and ZOO21AE or ZOO22VMP or AGR22PDA.

Incompatible unit: ZOO3EPB

Class requirements: Lab-based components: four 1-hour lectures and two 4-hour practical classes per week. Field-based components: equivalent to five 12-hour days in the field.

Assessment: Three 1,250-word practical reports (45%), three 1.5-hour examinations (55%). This is the combined assessment for three lab-based components. Students undertaking field-based components submit a literature review/practical report/examination equivalent to 3000 words per component.

ZOO4HNA HONOURS ZOOLOGY (60 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.)

Professor Tim New

This unit of study represents one semester of a year long program. Honours students are required to undertake a research project under supervision, prepare essays on selected topics, attend, and give seminars. Students who do not have qualifications in statistics may be required to complete a statistics unit during their Honours year. Students may commence their studies in either February or August. They should see the Head of Department of Zoology during their final year for a discussion of possible research topics available in the Department.

Class requirements: There is no formal course of lectures and hours of study are unlimited.

Assessment: Research topic report (70%), essays throughout the year (30%). The assessment components listed are the combined assessment for ZOO4HNA and ZOO4HNB.

ZOO4HNB HONOURS ZOOLOGY (60 CPs Sem. TE-SEM-1 BU. TE-SEM-2 BU.)

Professor Tim New

This unit of study represents one semester of a year long program. Honours students are required to undertake a research project under supervision, prepare essays on selected topics, attend, and give seminars. Students who do not have qualifications in statistics may be required to complete a statistics unit during their Honours year. Students may commence their studies in either February or August. They should see the Head of Department of Zoology during their final year for a discussion of possible research topics available in the Department.

Incompatible unit: ZOO40HON, ZOO42HON

Class requirements: There is no formal course of lectures and hours of study are unlimited.

Assessment: Research topic report (70%), essays throughout the year (30%). The assessment components listed are the combined assessment for ZOO4HNA and ZOO4HNB.

General Information about the Albury-Wodonga campus

The Albury-Wodonga campus is located in the City of Wodonga, with the City of Albury just over the Murray River in NSW. The cities offer a wide range of leisure and cultural activities and employment opportunities. Situated on the Hume Highway, with easy access to train, plane and bus services, the campus is ideally located on the Melbourne-Canberra-Sydney corridor.

The campus caters for nearly 1200 students on an attractive 26 hectare site adjacent to the Wodonga Institute of TAFE, with which it shares some resources and facilities.

The campus has several newly-developed facilities, including the David Mann library, sporting grounds and an Environmental Science complex. During 2000/07, new developments will include a bookshop/café complex and also a fitness centre attached to the Student Association building. Planning for additional on-campus accommodation for La Trobe students is underway.

The campus offers a variety of undergraduate and postgraduate courses, some unique to the campus; the student cohort is diverse, with many non-school leavers and international students.

Studying at Albury-Wodonga offers small classes and personalised support and tuition from our academic and support staff, along with access to the resources of the wider La Trobe network.

All five faculties of the University deliver courses on the campus, with several courses being unique to the campus.

La Trobe University is a joint venture partner in The Murray-Darling Freshwater Research Centre, with CSIRO and the Murray-Darling Basin Commission, giving La Trobe University enhanced capacity to increase research in freshwater ecology for the benefit of the whole Murray-Darling Basin.

The Murray-Darling Freshwater Research Centre

The Murray-Darling Freshwater Research Centre (MDFRC) is an unincorporated joint venture between CSIRO (through its Division of Land and Water), the Murray-Darling Basin Commission and La Trobe University. Additional investment is provided by the Australian Government through the Department of Agriculture, Fisheries and Forestry.

The MDFRC is a multi-disciplinary centre which undertakes research into environmental flows, biological and chemical monitoring, nutrient ecology and algal blooms, fish and invertebrate ecology, macro- and micro invertebrate taxonomy and water quality assessment. MDFRC operates two regional laboratories, strategically based in the Murray-Darling Basin, at Albury-Wodonga (established for 21 years) and Mildura (established for 11 years). Both laboratories are co-located on the campuses of La Trobe University. MDFRC employs over 30 scientific and support staff and has within its structure: an established NATA accredited chemical laboratory, an invertebrate taxonomy voucher collection housing approximately 2500 species, an interactive guide and resource for the identification and ecology of Australian freshwater invertebrates, a microbiological laboratory (enumeration and identification of bacteria using both traditional and molecular techniques) in aquatic ecosystems and waste treatment plants.

The Centre's Director is Dr Ben Gawne and further information can be obtained from the website at www.mdfrc.org.au/

Access

A range of schemes is available to applicants to ensure equitable access to the University. Contact the Admissions Officer on (+61 2) 6024 9790 for further information or visit the website: www.latrobe.edu.au/access

Access by public transport

A bus service operates from the Wodonga town centre to the Albury-Wodonga Campus and vice versa, with regular connections to the Albury town services. Further information is available from Mylon Motorways on (+61 2) 6056 3100. Three train and coach services per weekday, to and from Melbourne, are operated by V/Line. Trains to and from Sydney operate from the Albury Railway Station.

Academic Skills Unit

The Academic Skills Unit (ASU) assists students with academic concerns, such as essay writing, effective reading, examination preparation, note taking and time management on an individual or group basis. Support is provided to students from non-English-speaking backgrounds. During second semester of each year, the unit runs a University Bridging Program for mature-age students who are intending to commence a University course in the following year. Places in this program are available for Aboriginal and Torres Strait Islander students. Other short-term preparatory programs are conducted from time to time.

For further information contact ASU, tel: (+61 2) 6024 9772.

Accommodation

On campus: Information regarding on campus accommodation can be obtained by contacting +61 2 60 249627.

Off campus: La Trobe University shares an off-campus accommodation register with Wodonga Institute of TAFE, Charles Sturt University and Riverina TAFE, Albury. Students wishing to secure a rented room or board and lodging arrangement within the Albury-Wodonga area can apply through the Accommodation Officer or contact: Tertiary Students Accommodation Register, PO Box 789, Albury, NSW 2640, tel: (+61 2) 6041 8942, website: www.latrobe.edu.au/otd/aw/support.html

Computing facilities

The campus computer laboratories are well equipped with modern facilities and are refurbished every three years. Both black-and-white and full-colour laser printing are available and all students are provided with email and Internet access for study-related purposes. The laboratories are open for extended hours during the teaching semester and for office hours during the breaks. One laboratory is always reserved for students' occasional use.

Kids on Campus

Kids on Campus offers students, staff and the community access to quality childcare through a 60-place facility providing part-time, full-time and pre-school sessions for children aged between six weeks and six years. The Centre is open from 7.30 am to 6.00 pm, Monday to Friday for 50 weeks a year and operates on a fee-for-service basis. All government subsidies are available. For further information, tel: (+61 2) 6055 6653 or visit the website: www.latrobe.edu.au/otd/aw/childcarectr.html

Careers and Employment

The Careers and Employment office offers a range of resources and services to help you plan your career. The Careers Counselling service is also available to prospective students would like to assess the potential career possibilities of a particular course. For further information or an appointment, phone (+61 2) 60249 9627 or 04005 83779.

You can also access a wealth of information online via Career Hub, the online careers centre and job-posting service for all La Trobe students. To look for a job or to use the online career library, simply go to www.latrobe.edu.au/careers, register and start your search.

Chaplaincy

An ecumenical Christian chaplain is available to assist students and staff. The chaplain will refer students to clergy of other faiths on request. Tel: (+61 2) 60 249753, Mob: 0431664505 or email chaplain.aw@latrobe.edu.au

Counselling service

Confidential counselling is available to all students regarding any issues which arise and present difficulties during a course of study. Counselling services include personal counselling and educational counselling. The service is free to students and staff. Issues, which may arise, include adjustment to living away from home, personal and relationship problems, health issues, study motivation and financial stress. Tel: (+61 2) 6024 9627 or mobile 04005 83779 for an appointment.

Disability Liaison Officer

The DLO assists students who may suffer an impediment to study by virtue of a disability. Any student may enquire as to the availability of assistance for permanent or temporary disabilities, tel: (+61 2) 6024 9628.

Equal Opportunity

The Equity Officer assists students with any issues associated with equity, access and social justice, tel: (+61 2) 6024 9628.

Aboriginal Liaison Officer

Office of the Director, Indigenous Education
The Indigenous Student Service Unit at Albury/Wodonga is:
Aboriginal Liaison Officer
Building 4, Room 4224, Level 1
Albury/Wodonga Campus
Tel: (+61 2) 6024 9796
Email: indigenous_enquiries@latrobe.edu.au

Support and guidance is available to students who are Australian Aboriginal and/or Torres Strait Islanders. Please refer to the Office of the Director, Indigenous Education entry in this handbook for details.

Library

The David Mann Library is a modern building, opened in July 2002, which supports the teaching and learning of students and staff of La Trobe University and Wodonga Institute of TAFE, as well as the research interests of the staff of the Murray Darling Freshwater Research Centre. Facilities within the building include computer workstations, photocopying and printing, group study rooms and private study carrels.

Students have access to a wide range of electronic, print and audiovisual resources and may request books, videos and journal articles held at other campus libraries. In addition, the Library website provides a gateway to the ever-increasing collection of information resources in electronic format which benefit the University community across all its campuses.

To assist staff and students to make the most of the available services and resources, the Library offers regular information skills training sessions. Individual assistance is also offered in the Library, by phone, via email and the 'Ask Us' facility on the Library web page: www.lib.latrobe.edu.au/

Police checks

Some courses require applicants to undergo police checks before undertaking placement. Details are available from course coordinators.

Scholarships

Check the website at www.latrobe.edu.au/scholarships/ for information for the following year.

Student Association

The Association organises social and sporting activities and student support services. The Student Association has its own building adjacent to the campus in University Court, tel: (+61 2) 6055 6641 or visit the website: www.latrobe.edu.au/otd/aw/support.html

Student Welfare Service

Student Services aims to assist students to maintain a healthy and productive lifestyle. Assistance includes information on Austudy and Social Security, student loans, on- and off-campus accommodation, health promotion and referrals to appropriate welfare agencies, tel: (61 2) 6024 9627 or mobile 0400583779.
www.latrobe.edu.au/otd/aw/support.html

Uniforms

Nursing students are required to purchase uniforms to wear while attending hospitals and other health agencies.

Hospitality Management students are required to purchase a La Trobe uniform for practical classes held in the University Hotel School in Beechworth and whenever students are representing the University at functions.

Details of requirements are given to students at the start of the course.

University Bookshop

The Bookshop has a large range of texts, stationery and academic, resource and general books. Computer software is also available, some of which can be purchased at academic prices, tel: (02) 6024 9899 or visit the website: www.bookshop.latrobe.edu.au/about.html

Programs of study at Albury-Wodonga

The programs offered at the campus are controlled by the faculties of the University and are delivered, in most instances, by staff located at the campus. In some cases visiting staff from other campuses deliver lectures, tutorials and other programs for students. In the following sections the programs offered at the campus are listed under the relevant faculties and schools. The names of contact people at the campus are provided for those seeking information about particular courses.

A list of units taught at the Albury-Wodonga Campus appears at the end of each Faculty section. The units are in alphabetical order by unit code, indicating unit name, credit points, teaching period, campus/location, unit coordinator, class requirements, assessment, prerequisites and reading.

Students should note that units published in the hardcopy Handbook are subject to change and should refer to the Unit Database for more up-to-date information www.latrobe.edu.au/udb_public.

For an explanation of teaching periods and campus codes see the foreword at the beginning of this *Handbook*.

Programs of the Faculty of Education

General information about the Faculty of Education

The Faculty of Education caters for a wide range of interests in areas related to education and the environment including undergraduate and graduate teaching programs; TESOL and applied linguistics; outdoor education and environment; nature tourism and natural resources education; and specialist graduate programs for professionals at graduate certificate, graduate diploma and Masters degree levels. The faculty also provides the opportunity for research at both Masters and Doctoral level. The faculty provides professional development activities and programs for teachers on a range of educational issues across all curriculum areas. Students from other faculties of the university may apply to enrol in some individual education units.

The faculty comprises two schools: the School of Education, Outdoor Education and Environment and the School of Learning, Teaching and Professional Studies. Programs are offered at Melbourne (Bundoora) and at the regional campuses of Bendigo, Albury-Wodonga, Mildura and Shepparton. Some programs are also offered offshore.

School of Education

Locations: Bendigo and Mildura Campuses

Enquiries: (03) 5051 4009

Email: mildura@latrobe.edu.au

The School of Education offers programs at the Bendigo and Mildura campuses and is committed to providing a rich learning environment for students and staff through innovative programs and services in areas related to education. The School's focus is on pre-service, in-service and postgraduate courses for teachers and other professionals with an interest in education. The school is committed to research and other scholarly activities that advance the teaching profession. Programs offered are informed by current research and are designed to meet the needs of the university's regional and international communities. Students have an opportunity to explore widely with leaders in their particular field of interest.

Specialist areas of study include:

- curriculum and policy
- gifted education
- health education
- information and communication technology
- language and literacy
- middle years
- multimedia education
- physical education

- pre-service teacher education
- rural education
- science and mathematics education
- special education
- student welfare and guidance
- technology education
- vocational education and training.

School of Outdoor Education and Environment

Location: Bendigo Campus
Enquiries: (03) 5444 7285
Email: outdoor.bendigo@latrobe.edu.au

The School offers undergraduate programs in Outdoor Education and Environment including Nature Tourism and Natural Resources Education as well as graduate programs in research (Masters and PhD) and postgraduate coursework at Graduate Diploma and Masters levels. The School's focus is on developing knowledge about nature, building relationships with the land and understanding place, culture, language and experience. Students have an opportunity to explore widely with leaders in their particular field of interest.

Studies in outdoor education and the environment include:

- environmental studies: bush, rock, local, river, winter alpine
- leadership
- natural resources education
- naturalist studies
- nature tourism
- outdoor education
- outdoor and physical education
- outdoor recreation education.

School of Educational Studies

Locations: Melbourne (Bundoora) Campus
Education Buildings 1 and 2
Tel: (03) 9479 2546
Albury-Wodonga Campus
Tel: (02) 6024 9865
Shepparton Campus
Tel: (03) 5833 2589 Email: Education@latrobe.edu.au

The School of Educational Studies offers Education (including TESOL and Applied Linguistics) programs in Melbourne (Bundoora), Albury-Wodonga and Shepparton. Some programs are also offered offshore. The School supports the development of educational communities both within and outside Australia; encourages the development and application of new knowledge and ideas through research, teaching and community engagement; promotes open discourse and intellectual integrity in all interactions between staff, students and the wider community; and values interdisciplinary perspectives on education and the reflective development of knowledge and practice.

Specialist studies include:

- pre-service teacher education
- adult education
- applied linguistics (including TESOL and LOTE teaching)
- cross-cultural communication
- multicultural education
- counselling
- student welfare and guidance
- curriculum and policy
- educational administration and leadership
- information and communication technology
- multimedia education
- language and literacy
- science and mathematics education
- technology education
- industry training
- vocational education and training.

General course enquiries

Enquiries about prerequisites, admission requirements and requests for applications for coursework degrees, by both current and prospective students, should be directed to the relevant campus and school office. Local students apply through VTAC for undergraduate courses.

International students

Admission of international students is coordinated by the university's International Programs Office. For information on application procedures, accommodation, visa requirements, fees, etc. contact the office on +61 3 9479 1199 or write to International Programs Office, La Trobe University, Victoria, 3086, Australia or visit the website: www.latrobe.edu.au/international

Course regulations

All courses offered by the Faculty of Education are governed by a university regulation that specifies the entrance and other requirements of the course. These are supplemented by information contained in this *Handbook* and by other faculty and school policies. Each course has its own rules of progression and most schools produce specific procedures that operate under the authority of the university regulations and faculty guidelines.

Professional placements

Some courses require students to undertake unpaid professional teaching practice placements. Placements may be located in either metropolitan or rural areas. In most courses that require students to undertake placements, the placement involves being assigned to a school, or other approved educational setting, on a full-time basis over a period of days or weeks. In some cases students undertake placement interstate or overseas.

The university maintains insurance policies to protect students undertaking outside practical placement (practicum) as a compulsory course requirement, or fieldwork or other work undertaken off campus as part of a course or approved research work. Further information is available from the La Trobe University Insurance Office (website: www.latrobe.edu.au/insurance/) or Faculty or School Office.

Working with children checks

The Victorian Department of Education and Training requires a satisfactory criminal record check for all teacher education students undertaking practicum requirements in Victorian Department of Education and Training schools. It is expected that equivalent requirements will exist for all other Victorian schools. Upon first enrolling in teacher education courses, students will be required to complete a 'Working with Children Check' form available at Australia Post offices. Students must provide a certified copy of their valid 'Working with Children' card prior to undertaking teaching placements. Confirmation of a criminal record may jeopardise a student's ability to gain access to a suitable, or any, practicum placement(s) and may therefore delay or prevent completion of the course.

Fees

Both 'Commonwealth supported' and 'fee-paying' places are available. Australian citizens and holders of Permanent Humanitarian visas offered either a Commonwealth supported place or a fee-paying place are eligible to defer the tuition fees by using the HECS-HELP or Fee-HELP Commonwealth Government loan schemes. Further information on HECS-HELP and Fee-HELP can be found at www.goingtouni.gov.au

Further information on Faculty of Education courses and fees is available on the website: www.latrobe.edu.au/education/courses and www.latrobe.edu.au/education/courses/fees

Flexible teaching arrangements

In order to accommodate student needs, some units are taught in a mode different from the normal regular weekly classes. For example, modes may include block mode (i.e., intensive weekend or week-long classes), classes taught outside of normal semester dates, classes taught via web-based teaching or a combination of online learning and face-to-face classes.

Units offered by the Faculty of Education

A full list of undergraduate units offered by the Faculty of Education appears at the end of this chapter, in alphabetical order. Students should note that units published in the hardcopy *Handbook* are subject to change and should refer to the Unit Database for up-to-date information: www.latrobe.edu.au/udb_public

Unit timetable

Unit timetables are available on the La Trobe website: www.latrobe.edu.au/students/timetables.html or from the Education enquiries office on the campus of enrolment.

Bachelor of Educational Studies – (EDBEW)

The course is designed for people professionally concerned with education. It is structured to meet a variety of needs of teachers or other professionals who wish to pursue education studies in their field of interest. The course is a pathway to further studies in education but unless it is preceded by a three year recognised primary teaching course, it is not accredited for registration as a teacher in Victoria, Australia. The Bachelor of Educational Studies provides sound foundation studies in education for those wishing to progress to the Graduate Diploma in Education (Primary) which is recognised by the Victorian Institute of Teaching as a one year postgraduate teacher training course for graduates.

Admission requirements

A bachelor degree or a recognised two year tertiary diploma or equivalent.

Course structure

The course consists of 120 credit points of study which may be taken as 15 or 20 credit point units over one year full-time or part-time equivalent. With the approval of the course convenor, units of study may be selected from those available in the Bachelor of Education, the Graduate Diploma in Educational Studies or other undergraduate or postgraduate programs relevant to the course of study.

Suggested units of study include:

At the Albury-Wodonga Campus

Teaching period	Unit title	Unit code
TE-SEM-S	'At Risk' Students: critical considerations ¹	EDU5ARS
TE-SEM-S	Approaches to Pastoral Care	EDU4APC
TE-SEM-1	Developments in Literacy Education ¹	EDU5DLE
TE-SEM-1	Approaches to Humanistic Psychology ¹	EDU5AHS
TE-SEM-1	Counselling Workshop ¹	EDU4CWS
TE-SEM-1	Interpersonal Skills ¹	EDU4IS
TE-SEM-1	Issues in Special Education	EDU5SEI
TE-SEM-1	Leadership and Supervision Skills	EDU5LSS
TE-SEM-1	Managing Organisational Change ¹	EDU5MOC
TE-SEM-1	Methods of Teaching (adult)	EDU4MTA
TE-SEM-1	Pedagogical Principles and Practice ¹	EDU5PP
TE-SEM-1	Person-centred Approach in Teaching, Counselling and Nursing ¹	EDU5PCA
TE-SEM-1 or TE-SEM-2	Reading Subject	EDU5RS
TE-SEM-1	Research Methods in Education	EDU5RME
TE-SEM-1 or TE-SEM-2	Research Practicum	EDU4RP
TE-SEM-2	Adult Education: theory, practice and change ¹	EDU5AED
TE-SEM-2	Art Education	EDU4AE2
TE-SEM-2	Classroom Discipline and Student Responsibility	EDU4CSD
TE-SEM-2	Curriculum Design and Implementation	EDU5CDI
TE-SEM-2	Curriculum Development and Design	EDU5CDD
TE-SEM-2	Gender and Education	EDU5GE
TE-SEM-2	Holistic Education ¹	EDU4HE
TE-SEM-2	Using Multimedia for Learning	EDU4UML
TE-SEM-2	Introduction to Research Methods	EDU4IRM
TE-SEM-2	Research Methods in Education	EDU5MRE

Key: ¹ Not available in 2008. Classes with less than 10 students may not run.

Note: Students may select alternative units available at Bendigo or Melbourne (Bundoora) campuses with the approval of the course advisor. Please refer to the Faculty of Education section for a full list of available units.

Double degrees

Bachelor of Science/Bachelor of Science Education – (STBSSW)

This innovative double degree has been developed in response to the Federal Government's 'Innovation Statement' and aims to integrate full science degree studies with a complete teaching qualification, with a particular emphasis on mathematics, statistics (taught as part of mathematics in secondary schools), physics, chemistry and/or information technology. Graduates of this double degree will have a deepened understanding of their teaching units and will be equipped to adapt their teaching to engage with the needs of their teaching settings, including their own students and the nature of the areas of knowledge and behaviour that constitute the discipline. In this program, emphasis is placed on the teacher's ability to adapt teaching to continuously changing circumstances while fostering deep understanding of relevant areas of scientific disciplines.

Please note: students must complete a 'Working with Children' check form, available from Australia Post offices. Students must provide a certified copy of their valid 'Working with Children' card prior to undertaking teaching placements in schools.

Albury-Wodonga Campus: Only the first year of this degree is available at the Albury-Wodonga campus. Students who successfully complete the first year of the degree transfer to the Melbourne (Bundoora) campus to complete the remaining three years. Students who enrol in the Bachelor of Science/Science Education at the Albury-Wodonga campus can only select Chemistry and Mathematics as their major units of study.

Scholarships

Some scholarships may be available for this degree. Prospective applicants should contact the Faculty of Science, Technology and Engineering Faculty office.

Course structure

This double degree is of four and a half years' full-time or equivalent part-time duration and requires the completion of 540 credit points overall. Students may complete this double degree in four years as part of an accelerated study program.

Students will gain a foundation in science in the first year. Combined studies in science and education will commence in the second year and continue during the third year. Two science disciplines must be studied through to third year: the 'major' discipline comprising units to the value of 60 credit points in the third year and the 'minor' discipline 30 credit points. The 'major' discipline must be one of mathematics, statistics, physics and chemistry or computer science. (Note that the first year statistics discipline requirement may be satisfied by enrolling in STA1SS and one of STA1LS or MAT1DM.) The 'minor' discipline may also be chosen from among the 'major' discipline areas or from any other science discipline offered by the Faculty of Science, Technology and Engineering. The science disciplines are those defined for the Bachelor of Science degree. The final year will consist of full teacher training, including the practicum requirement and will include a combined science and education project. Normally, students would be expected to have satisfactorily completed all of the requirements for the first three years before progressing to the fourth year.

Notes:

- Your unit choices at first and second year must ensure that one of mathematics, physics, chemistry, statistics or computer science can be taken as a 'major' at third year level. You cannot have a major/minor combination of mathematics and statistics as double mathematics method is not offered in the fourth year.
- You will be qualified to teach subjects corresponding to your chosen major and minor disciplines, but not subjects corresponding to your terminating first year science discipline. If your major or minor is in physics or chemistry, you will also be qualified to teach secondary school general science. As general science also covers biology, such students should consider taking a first year biology unit as a first year level elective.
- The research project must relate to science education or mathematics education.
- All units must be chosen in consultation with and approved by the course advisor.

First year (120 credit points)

Unit title	Credit points
30 credit points in each of three different science disciplines	90
First year level electives (education units excluded)	30
Note: the maximum number of credit points in any one science discipline is 45.	

Second year (140 credit points)

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Teaching Practice A	EDU2TPA	20
	40 credit points in each of two different science disciplines		80
	20 credit points second year level elective(s) (chosen from any discipline and which may be a further science or education unit)		20
	20 credit point education unit (chosen from the list below)		20

Third year (140 credit points)

Teaching period	Unit title	Unit code	Credit points
TE-SEM-S	Issues in Education	EDU4IIE	20
TE-SEM-1 or TE-SEM-2	Science Education Mentoring ²	EDU3SEM	10
TE-SEM-2	Teaching Practice B	EDU3TPB	20
	60 credit points chosen from one of the disciplines: mathematics, physics, chemistry, statistics, computer science		60
	30 credit points chosen from a single science discipline (which differs from that already chosen as the 'major' discipline)		30

Fourth year (140 credit points)

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Context of Learning	EDU4COL	20
TE-SEM-1	Teaching Practice and Skills	EDU4TPS	20
TE-SEM-1 or TE-SEM-2	Research Practicum	EDU4RP	20
TE-SEM-2	Issues in Secondary Education	EDU4SEI	20
TE-SEM-2	Teaching Practice and Models	EDU4TPM	20

Plus two method units to be chosen from the following

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1 and TE-SEM-2	Chemistry Teaching Method	EDU4CHA	10
TE-SEM-1 and TE-SEM-2	IT Teaching Method	EDU4ITB	10
TE-SEM-1 and TE-SEM-2	Mathematics Teaching Method	EDU4MAA	10
TE-SEM-1 and TE-SEM-2	Physics Teaching Method	EDU4PHA	10
TE-SEM-1 and TE-SEM-2	Science Teaching Method	EDU4SCA	10
TE-SEM-2		EDU4SCB	10

List of education units available at the Bundoora Campus

Note that units may vary from year to year according to availability.

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1 and TE-SEM-2	Issues in Science Education 1 ¹	EDU4SC1	15
TE-SEM-2	Issues in Science Education 2 ¹	EDU4SC2	15
TE-SEM-1	Approaches to Pastoral Care	EDU4APC	20
TE-SEM-1	Intercultural Communication and Education	EDU5CCU	20
TE-SEM-1	Enhancing Teaching and Learning with ICT and Multimedia	EDU4ITM	15
TE-SEM-1	Interpersonal Skills	EDU4IS	20
TE-SEM-1	Learning Technologies in Education 1	EDU4LTE	20
TE-SEM-1	Science, Technology and Society in Education	EDU4STS	15
TE-SEM-1	Science and Technology in Contemporary Society	EDU5STC	20
TE-SEM-1 or TE-SEM-2	Studies in Technology: Materials and Systems	EDU4TMS	20
TE-SEM-2	'At Risk' Students: Critical Considerations	EDU5ARS	20
TE-SEM-2	Curriculum Development and Design	EDU4CDD	20
TE-SEM-2	Education and Cultural Diversity	EDU5ECD	20

TE-SEM-2	Holistic Education	EDU4HE	20
TE-SEM-2	Working With Different Learning Needs	EDU5WWD	20
TE-SEM-S	Classroom Discipline	EDU4CSD	20

Key: ¹ Not available in 2008.

² Students taking EDU3SEM in first semester must be available to commence the training session mid-late February 2008.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this chapter. For the most recent descriptions of units, students should access the Unit Database at www.latrobe.edu.au/udb_public

FACULTY OF HEALTH SCIENCES

The Faculty offers the Advanced Diploma in Nursing, Bachelor of Nursing (pre-registration) and Bachelor of Nursing (Division 2 Conversion) through the Division of Nursing and Midwifery. General information on these courses is available from Anne Bowran, Student Services Officer, tel: (02) 6024 9730 or email nursing.aw@latrobe.edu.au

The Bachelor of Social Work (Advanced Standing), the Bachelor of Social Work/Bachelor of Human Services and the Bachelor of Human Services are offered through the School of Social Work and Social Policy (Albury-Wodonga), within the Division of Allied Health. General information on this course may be obtained by phoning (02) 6024 9802, or emailing socialwork.aw@latrobe.edu.au

Students should ensure they are aware of the physical components and location requirements of the course. If you have a disability, medical condition or any concerns that may affect your potential participation, please contact the relevant School to discuss any possible course modifications.

Units Offered by the Faculty

A full description of Health Sciences units appears at the end of this chapter, in alphabetical order by unit code. Students should note that units published in the hardcopy *Handbook* are subject to change and should refer to the unit database for up-to-date information: www.latrobe.edu.au/udb_public

COURSES OFFERED BY THE FACULTY**DIVISION OF ALLIED HEALTH**

- Bachelor of Human Services
- Bachelor of Social Work
- Bachelor of Social Work/Bachelor of Human Services
- Bachelor of Social Work (Advanced Standing)
- Bachelor of Social Work (Honours)
- Bachelor of Social Work (Honours)/Bachelor of Human Services (offered subject to University approval)

DIVISION OF NURSING AND MIDWIFERY

- Advanced Diploma in Nursing
- Bachelor of Nursing (Pre-registration)
- Bachelor of Nursing (Post-registration)
- Bachelor of Nursing (Honours)
- Bachelor of Nursing (Division 2 Conversion)

Course structures are outlined below.

COURSES OFFERED BY THE DIVISION OF ALLIED HEALTH**Bachelor of Human Services (HBHSVW)**

Enquiries: (02) 6024 9802

Email: socialwork.aw@latrobe.edu.au

Duration: 3 years

This course is designed to prepare graduates for work in welfare agencies in service provision, research and administrative roles. Students will develop the knowledge, values and skills appropriate for

understanding the welfare needs of individuals, families, groups and communities and methods of responding to these needs. Students will develop the capacity for analysing and working effectively within welfare organisations, including work in interdisciplinary teams. Elective studies are available in social policy, community work and a range of fields of practice.

The curriculum of the course is based on a philosophy of social justice and is taught within an adult-learning model.

Degree requirements

The course is offered as a three year degree for post-VCE/HSC entry. Advanced standing may be offered to suitably qualified applicants. After successful completion of one year of this degree students may apply to transfer to the Bachelor of Social Work/Bachelor of Human Services.

After successful completion of two years of this degree students may apply to transfer to the two year degree Bachelor of Social Work (Advanced Standing).

Course structure

Students are required to undertake a course of studies equivalent to that listed below. Some unit codes differ depending upon the campus of offer. Electives, subject to approval, may be chosen from the complete range of units offered on this campus. From time to time students may be required to attend some lectures and seminars in block mode and/or out of normal university hours.

For the purpose of the Commonwealth Supported Places Scheme (CSP), a full-time enrolment is 120 credit points per year or 60 credit points per teaching period.

First year

Teaching period	Unit code	Unit title	Credit points
TE-SEM-1	PSY1PYA	Psychology A	15
TE-SEM-1	SOC1ISA	Introduction to Sociology A	15
TE-SEM-1	SWP1ITP	Introduction to Social Work A	15
TE-SEM-1		Elective	15
TE-SEM-2	PSY1PYB	Psychology B	15
TE-SEM-2	SOC1ISB	Introduction to Sociology B	15
TE-SEM-2	SWP1SPP	Social Policy and Practice A	15
TE-SEM-2		Elective	15

Second year

Teaching period	Unit code	Unit title	Credit points
TE-SEM-1	SWP2DLC	Development Across the Life Course in Social Contexts	20
TE-SEM-1	SWP2PPH	Professional Practice: History and Values	30
TE-SEM-1		Elective	20
TE-SEM-2	SWP2OCP	Organisation Contexts of Social Work Practice	20
TE-SEM-2	SWP2REC	Social Work and Reflective Communication	20
TE-SEM-2	SWP2RES	Research for Social Work Practice A	10

Third year

Teaching period	Unit code	Unit title	Credit points
TE-SEM-1		Elective	20
TE-SEM-1		Elective	20
TE-SEM-1	SWP3LER	Social Work Practice: Law Ethics and Human Rights	15
TE-SEM-2	HLT3IPA	Interdisciplinary Professional Practice	15
TE-WK29-35	SWP3FOP	Fields of Social Work Practice A	15
TE-WK29-35	SWP3RES	Research for Social Work Practice B	15

Bachelor of Social Work (HSBSWW)

Enquiries: (02) 6024 9802

Email: socialwork.aw@latrobe.edu.au

Duration: 4 years

Note: This program is only available to continuing students.

The course entitles graduates entry into the profession of social work and the degree is recognised by the Australian Association of Social Workers (AASW). Part-time study is available. Students will develop the knowledge, values and skills appropriate to understanding the needs commonly experienced by individuals, families, groups and communities and the appropriate responses for aiding personal and social adjustment and social development.

The degree prepares students to practise in a wide range of social work roles, including direct service, research, administration and social policy and planning. Study areas include social welfare history, social work practice methodologies, socio-personal systems, community organisation, research methods, social policies and programs, laboratory work and field studies.

The curriculum of the course is based on a philosophy of social justice and is taught within an adult-learning model. Students are encouraged to relate their relevant experiences to the theories and practice knowledge presented in the program.

Degree requirements

The course is not offered to new students in 2008.

Course structure

Continuing students are required to undertake a course of studies equivalent to that listed below. From time to time students may be required to attend some lectures and seminars in block mode and/or out of usual university hours. For the purpose of Higher Education Contribution Scheme (HECS) this course is valued at 120 credit points per year or 60 credit points per teaching period.

Third year

Teaching period	Unit code	Unit title	Credit points
TE-SEM-1	SWP3COM	Social Work Practice in Communities	15
TE-SEM-1	SWP3IFG	Social Work Practice with Individuals, Families and Groups A	20
TE-SEM-1	SWP3LER	Social Work Practice: Law Ethics and Human Rights	15
TE-WK36-49	SWP3FEA	Field Education A	40
TE-WK29-35	SWP3FOP	Fields of Social Work Practice A	15
TE-WK29-35	SWP3RES	Research for Social Work Practice B	15

Fourth year

Teaching period	Unit code	Unit title	Credit points
TE-SEM-1	HLT3IPA	Interdisciplinary Professional Practice	15
TE-SEM-1	SWP4IFG	Social Work Practice with Individuals, Families and Groups B	20
TE-SEM-1	SWP4SPP	Social Policy and Practice B	20
TE-WK29-35	SWP4DIV	Diversity in Social Work Practice	10
TE-WK36-49	SWP4FEB	Field Education B	40
TE-WK29-35	SWP4FOP	Fields of Social Work Practice B	15

Bachelor of Social Work (Advanced Standing) (HBSWAW)

Enquiries: (02) 6024 9802

Email: socialwork.aw@latrobe.edu.au

Duration: 2 years

The course qualifies graduates for entry into the profession of social work. The degree is recognised by the Australian Association of Social Workers (AASW). Students will develop the knowledge, values and skills appropriate to understanding the needs commonly experienced by individuals, families, groups and communities and the appropriate responses for personal and social adjustment and social development.

The degree prepares students to practise in a wide range of social work roles, including direct service, research, administration and social policy and planning. Units offered are a mix of theoretical, practical and field-based studies. This reflects the nature of social work within contemporary society, which demands that a competent social work graduate understands their practice in terms of ideas about individuals, groups and communities, knowledge of how society operates, the values of the profession; and has a range of practice skills. The course includes 70 days (in each year) of placement in a professional social work agency.

The curriculum of the course is based on a philosophy of social justice and is taught within an adult-learning model. Students are encouraged to relate their relevant experiences to the theories and practice presented in the program.

Degree requirements

The course is offered as a two year (advanced standing) degree for applicants with at least two years of approved university study. Further advanced standing may be offered to suitably qualified applicants.

Course structure

Students are required to undertake a course of studies equivalent to that listed below.

From time to time students may be required to attend some lectures and seminars in block mode and/or out of normal university hours.

For the purpose of the Commonwealth Supported Places Scheme (CSP) a full-time enrolment is 120 credit points per year or 60 credit points per teaching period.

First year

Teaching period	Unit code	Unit title	Credit points
TE-SEM-1	SWP3COM	Social Work Practice in Communities	15
TE-SEM-1	SWP3IFG	Social Work Practice with Individuals, Families and Groups A	20
TE-SEM-1	SWP3ITP	Introduction to Social Work	10
TE-SEM-1	SWP3LER	Social Work Practice: Law Ethics and Human Rights	15
TE-WK36-49	SWP3FEA	Field Education A	40
TE-WK29-35	SWP3FOP	Fields of Social Work Practice A	15
TE-WK29-35	SWP3RES	Research for Social Work Practice B	15

Bachelor of Social Work/Bachelor of Human Services (HZSWHW)

Enquiries: (02) 6024 9802

Email: socialwork.aw@latrobe.edu.au

Duration: 4 years

The course qualifies graduates for entry into the profession of social work and equips graduates to work effectively in complex organisations and in the policy environment of human services. The Bachelor of Social Work is recognised by the Australian Association of Social Workers (AASW). Students will develop the knowledge, values and skills appropriate to understanding the needs commonly experienced by individuals, families, groups and communities and the appropriate responses for personal and social adjustment and social development. Students will develop the knowledge and skills for analysing the organisational and policy context of social work and human service practice.

This double degree prepares students to practise in a wide range of social work roles and to perform these roles effectively in the complex organisation setting that is characteristic of contemporary social work practice. These roles include direct service, research, administration and social policy and planning. Units offered are a mix of theoretical, practical and field-based studies. This reflects the nature of social work within contemporary society, which demands that a competent social work graduate understands their practice in terms of ideas about individuals, groups and communities, knowledge of how society operates, the values of the profession; and has a range of practice skills. Students will be prepared for effectively integrating theory into practice and to work effectively in complex and changing organisations. The course includes 70 days of placement (in each of the third and fourth years) in a professional social work agency.

The curriculum of the course is based on a philosophy of social justice and is taught within an adult-learning model. Students are encouraged to relate their relevant experiences to the theories and practice presented in the program.

Degree requirements

The course is offered as a four year degree for post-VCE/HSC entry. Advanced standing may be offered to suitably qualified applicants.

Course structure

Students are required to undertake a course of studies equivalent to that listed below. Electives, subject to approval, may be chosen from the range of units offered on the campus. From time to time students

may be required to attend some lectures and seminars in block mode and/or out of normal university hours.

For the purpose of the Commonwealth Supported Places Scheme (CSP), a full-time enrolment is 120 credit points per year or 60 credit points per teaching period.

Bachelor of Social Work with Honours (HSHSWW)

An Honours program is offered in the final year of the Bachelor of Social Work and the Bachelor of Social Work (Advanced Standing) degrees.

Admission requirements

Honours will be offered to those students who have achieved results of a high academic standard at the end of year three of the Bachelor of Social Work and at the end of year one of the Bachelor of Social Work (Advanced Standing) on the basis of that year's study. In addition to specified unit requirements, Honours students are required to prepare a research proposal and then write and submit an Honours thesis by the end of the Honours years.

Course structure

Students are required to undertake a course of studies equivalent to that listed below. From time to time students may be required to attend some lectures and seminars in block mode and/or out of normal university hours.

For the purposes of the Commonwealth Supported Places Scheme (CSP) a full-time enrolment is 120 credit points per year or 60 credit points per teaching period.

First year

Teaching period	Unit code	Unit title	Credit points
TE-SEM-1	HLT3IPA	Interdisciplinary Professional Practice	15
TE-SEM-1	SWP4HOA	Social Work Honours A	20
TE-SEM-1	SWP4IFG	Social Work Practice with Individuals, Families and Groups B	20
TE-SEM-1	SWP4SPP	Social Policy and Practice B	20
TE-WK36-49	SWP4FEB	Field Education B	40
TE-SEM-2	SWP4HOB	Social Work Honours B	20

Grades awarded to students successfully completing Honours are H1, H2A, H2B or H3.

Bachelor of Social Work (Honours)/Bachelor of Human Services – Albury-Wodonga (H2HSWW), Bendigo (H2HSWB), Melbourne (Bundoora) (H2HSW)

Note: This course will be offered subject to University approval.

An Honours program is offered in the final year of the Bachelor of Social Work/Bachelor of Human Services Degree.

Admission requirements

Honours will be offered to those students who have achieved results of a high academic standard at the end of the third year of the Bachelor of Social Work/Bachelor of Human Services on the basis of that year's study. In addition to specified unit requirements, Honours students are required to prepare a research proposal and then write and submit an Honours thesis of 10,000–12,000 words by the end of the Honours year.

Course structure

Students are required to undertake a course of studies equivalent to that listed below. From time to time students may be required to attend some lectures and seminars in block mode and/or out of normal university hours.

For the purposes of the Commonwealth Supported Places Scheme (CSP) a full-time enrolment is 120 credit points per year or 60 credit points per teaching period.

COURSES OFFERED BY THE DIVISION OF NURSING AND MIDWIFERY

Advanced Diploma in Nursing (HDIANW)

Enquiries: (02) 6024 9730

Duration: 1 year part-time

This is a part-time course offered over two semesters with a limited number of places available. The course may be available full-time over one semester if there is sufficient demand. This course is offered across the Albury-Wodonga, Bendigo and Melbourne (Bundoora) campuses.

Application is by direct admission. The applicant should be a previously registered nurse on the Division 1 register but who has allowed his or her registration to lapse or an international registered nurse wishing to obtain registration in Victoria. The application form should include a copy of the lapsed registration certificate plus a letter of approval to undertake the course, obtained from the Nurses Board

of Victoria. Applications close end of October. Late applications may be considered, if places are available.

Professional recognition

Graduates are eligible for registration as Division 1 nurses with the Nurses Board of Victoria. After registration, graduates are eligible for membership of the Royal College of Nursing Australia.

Course structure

Teaching period	Unit code	Unit title	Credit points
TE-SEM-1	NSG1HAS	Health Assessment for Nurses	15
TE-SEM-1	NSG2MED	Medication Management for Nurses	15
TE-SEM-2	NSG2AUA	Acute Nursing Practice A	15
TE-SEM-2	NSG2MHL	Mental Health Nursing Practice	15

Bachelor of Nursing (Pre-registration) (HBNPRW)

Enquiries: (02) 6024 9730

This comprehensive course leads to registration as a Division 1 nurse with the Nurses Board of Victoria. It is offered across the Albury-Wodonga, Bendigo, Melbourne (Bundoora), Mildura and Shepparton campuses. Students are required to undertake a course of studies equivalent to that listed below. Some unit codes differ depending upon the campus of offer. The following course structure is that of the Albury-Wodonga, Melbourne (Bundoora), Mildura and Shepparton campuses. For further information regarding Melbourne (Bundoora), Mildura and Shepparton and the structure of courses offered at the Bendigo campus, please refer to those campus entries elsewhere in this *Handbook*. Note that the teaching period in which a unit is offered may change.

The Bachelor of Nursing (pre-registration) is a three year pass degree. An Honours year is also available for candidates who meet the entrance requirements. The philosophy of the course views students as active participants in the learning process. This enhances the development of critical thinking and problem-solving skills, which enables the graduate to respond to the changing demands of health care services. The course involves study in nursing theory, practice and research, human biosciences and public health. The on-campus nursing development centre enables students to practise and develop clinical nursing skills in a simulated and supportive environment. For enrolled students, the clinical learning component occurs in hospitals and health care agencies within regional and metropolitan areas (depending on your campus of enrolment).

This course is offered on a full-time basis. Part-time study is not recommended but may be considered at the discretion of the Undergraduate Course Coordinator. It is also offered as a two year, full-time graduate entry program at the Melbourne (Bundoora) campus, with one year of advanced standing being granted to selected applicants with an Australian Bachelor degree or equivalent.

An additional year of study is available at Honours level for students who have achieved an outstanding academic record. Students who enrol in the Honours stream may apply for registration as a Division 1 nurse at the completion of pass degree studies.

Professional recognition

Graduates are eligible to apply for registration as Division 1 nurses with the Nurses Board of Victoria. After registration, graduates are eligible to apply for membership of the Royal College of Nursing, Australia.

Bachelor of Nursing (Post-registration) (HSBNW)

Enquiries: (02) 6024 9730

Duration: 1 year full-time or 2 years part-time

This course enables registered nurses to expand and practically apply their knowledge base. This course is available across the Albury-Wodonga, Bendigo and Melbourne (Bundoora) campuses. It aims to provide students with academic and practical skills and the attitudes required to comprehend, critically analyse and evaluate new knowledge in nursing. Graduates of the course will have a strong discipline base for postgraduate study.

Consistent with the rationale of the course, the School of Nursing and Midwifery aims to prepare qualified nurses to:

- develop further a discipline perspective through the study of relevant literature
- acquire the ability to interpret and utilise nursing research findings
- critically examine issues related to health-care delivery systems and the implications for nursing and recipients
- broaden and deepen their knowledge of nursing practice in order to expand their role in a selected practice setting
- demonstrate commitment to learning as a life-long process.

Admission requirements – Stream A

This course is open to nurses who hold a diploma from a college or university or who hold a nursing certificate from a hospital-based program. Applicants must be eligible for registration as Division 1 nurses with the Nurses Board of Victoria.

Advanced standing

Holders of a three year Australian Diploma in Nursing may apply for advanced standing.

Course structure

Teaching period	Unit code	Unit title	Credit points
TE-SEM-1 or TE-SEM-2	NSG1HAS	Health Assessment for Nurses	15
TE-SEM-2	NSG2EBP	Evidence Based Nursing	15

Plus six electives chosen with the agreement of the undergraduate course coordinator.

Admission requirements – Stream B

This course is designed for nurses who hold a diploma or degree in nursing from a college or university or who hold a nursing certificate from a hospital-based program and are not currently registered with the Nurses Board of Victoria. This course is available across the Albury-Wodonga, Bendigo and Melbourne (Bundoora) campuses. Applicants must have been previously registered as Division 1 or Division 3 nurses with the Nurses Board of Victoria and wish to re-enter the nursing profession. Applicants are required to provide the University with a letter from the Nurses Board of Victoria granting

permission to undertake the course with the intention of applying for re-registration.

Professional recognition

Graduates are eligible for membership of the Royal College of Nursing, Australia.

Course structure

Teaching period	Unit code	Unit title	Credit points
TE-SEM-1	NSG1HAS	Health Assessment for Nurses	15

Bachelor of Nursing (Honours) (HSHNW)

An Honours stream, normally undertaken on a part-time basis over two years, is available as the fourth year of the Bachelor of Nursing course.

This course is available across the Albury-Wodonga, Bendigo and Melbourne (Bundoora) campuses. To be eligible students should have achieved a B grade average or above in third year studies. Students with a Bachelor of Nursing from another institution may be considered for entry.

Students are assisted to demonstrate academic and investigative skills in critical review and analysis of data, which are at a higher level than normally expected of pass level students and to broaden and deepen their theoretical knowledge in the discipline of nursing as a preparation for graduate study.

Course structure

Honours students take four units, participate in research seminars and submit a research essay or project comprising 10,000 to 12,000 words or equivalent. Both first and second year are based on part-time study. Study mode includes attendance at research seminars.

Advanced Standing

Students undertaking an approved graduate year program while enrolled in the Honours course may apply for credit for the Nursing Practicum elective. To receive the credit students need to have completed a minimum of 52 days of clinical practice and provide a satisfactory report of their clinical progress from the graduate year program coordinator.

Teaching period	Unit code	Unit title	Credit points
TE-SEM-1	NSG4RHP	Research Honours Preparation	15
TE-SEM-1		Nursing Practicum Elective	15
TE-SEM-2	NSG4NTP	Thesis Preparation	15

TE-SEM-1	NSG4NTH	Thesis	30
TE-SEM-2	NSG4NTH	Thesis	30

Bachelor of Nursing (Division 2 Conversion) (HSBNCW)

Enquiries: (02) 6024 9730

Duration: 2 years full-time

The Bachelor of Nursing (Division 2 Conversion) is a two year course available to students who hold a current Division 2

Registration and wish to upgrade their qualification to Division 1. It is offered across the Albury-Wodonga, Bendigo, Melbourne (Bundoora), Mildura and Shepparton campuses. Successful completion of this course prepares graduates to Division 1 registration. This course requires all students to successfully complete a short course in human anatomy and physiology prior to the commencement.

Professional recognition

Graduates are eligible for registration as Division 1 nurses with the Nurses Board of Victoria. After registration, graduates are eligible for membership of the Royal College of Nursing Australia.

First year

Teaching period	Unit code	Unit title	Credit points

UNIT DESCRIPTIONS

HBS1AON ANATOMY: ORGANS (5 CPs Sem. TE-SEM-2 AW, BU, MI, SH.)

Dr Jodi Sita

In this unit, the principles of anatomy which began in HBS1API will be developed and applied to the location and physical relationships between major organ systems of the head and trunk. Emphasis will be placed on cardiovascular, respiratory, digestive, renal and reproductive systems, paralleling the functional approach to these in HBS1HBF. Lectures will be supported by practical sessions, including surface anatomy and examination of cadaver specimens.

Co-requisite: HBS1HBF, HBS1API.

Class requirements: Eighteen 1-hour lectures and four 2-hour practical classes per semester.

This unit is not available for Study Abroad students.

Assessment: One 10-minute multiple choice test (equivalent to 200 words) (10%), one 300-word assignment (20%), one 1-hour written examination (70%). Hurdle requirement: student must participate in all components of the assessment.

Recommended Reading:

Blackhouse KM and Haching RT. *Clinical surface anatomy*. Mosby, 1998.
Moore LM and Agur AMR. *Essential clinical anatomy*. 2nd edn. Lippincott, Williams and Wilkins, 2002.
HBS1AON Current edn. *student manual*.

HBS1API INTRODUCTION TO THE HUMAN BODY (15 CPs Sem. TE-SEM-1

AW, BU, MI, SH.) *AW: Dr Charu Mishra, BU: Dr Susan Malcolm, BU:*

Dr Jodi Sita

In this unit, students will be introduced to basic physiological and anatomical concepts that will be further developed in semester two. Physiology lectures will cover homeostasis, body fluids, the cell and plasma membrane, mechanisms by which substances cross the membrane, the nervous system and skeletal muscle. Anatomy lectures will cover anatomical terminology, tissues, skin, the musculoskeletal system, nerves and regional anatomy. Lectures are supported by practical classes and tutorials.

Incompatible unit: HBS1APH, HBS1HFU

Class requirements: Four 1-hour lectures per week, nine 1-hour practical classes and five 1-hour tutorials over the semester.

Assessment: Two short multiple question tests (10%). Hurdle requirement: participation in all components of the assessment, one 2-page diagram-based assignment (10%), one 350-word assignment (10%), one 1.5-hour written anatomy exam (35%), one 1.5-hour written physiology exam (35%).

Recommended Reading:

HBS1API – Anatomy Current edn. student manual.
HBS1API – Marieb E and Hoehn K. Physiology
Human Anatomy and Physiology. 7th edn. Pearson, 2007.

HBS1HBF HUMAN BODY FUNCTION (10 CPs Sem. TE-SEM-2 AW, BU, MI, SH.)

AW: Dr Charu Mishra, BU: Ms Jane McCooey

In this unit, students' understanding of the functioning human body, introduced in semester one is extended. Begins with an overview of how the endocrine system contributes to regulation of body functioning and hence to homeostasis. Descriptions of selected hormones and their functions illustrate the general principles. Most of the unit is devoted to the study of body systems, including the cardiovascular system, respiratory system, renal system, digestive system and metabolism, reproductive system. Interactions between the systems to meet challenges to normal functioning imposed by changes within and external to the body are discussed. Concludes by considering changes in body functioning with development from a neonate to a very old person.

Co-requisite: HBS1API, HBS1APH, HBS1HFU, or BIO1OF.

Class requirements: Four 1-hour lectures and one 1-hour tutorial (voluntary attendance) per week.

Assessment: One 40-minute written examination mid-semester (20%), one 2-hour examination at the end of the semester (80%).

Prescribed Reading:

Marieb E and Hoehn K. *Human anatomy and physiology*. 7th edn. Pearson, 2007.

HBS2PAT PATHOPHYSIOLOGY IN NURSING (15 CPs Sem. TE-SEM-1 AW,

BE, BH, BU, HK, MI, SH, SI.) *AW: Dr Charu Mishra, BE: Dr Terri*

Meehan-Andrews, BE: Dr Adrian Verrinder, BU: Mr Robert Paine

In this unit, students will examine disorders, which may be experienced by individuals over the life span, emphasising the underlying biological mechanisms that produce signs and symptoms and the risk factors and contributing causes of disorders. Specifically, general pathological processes will be discussed with emphasis on disturbed function, adaptation to injury, inflammation, tissue healing, immunological disorders, neoplasia, fluid imbalance, thrombosis, embolism and vascular disorders. In addition to general pathological processes, emphasis will be given to relevant disorders of the respiratory, cardiovascular, renal gastrointestinal, endocrine, skeletal and nervous systems.

Prerequisite: HBS1HBF, except for students enrolled in the HSBNC, HSBNCW, BEBND2, HBNCM, HBNC, HBNPRG, HBNPGW.

Class requirements: Four 1-hour lectures per week and one 1-hour seminar or tutorial per week. Some lectures will be given via WebCT.

Assessment: One 45-minute mid-semester test (20%), one 3-hour final examination (80%).

Prescribed Reading:

Porth CM. *Pathophysiology Concepts of altered health states*. New York: Lippincott, 2005.

HLT3IPA INTERDISCIPLINARY PROFESSIONAL PRACTICE (15 CPs Sem.

TE-SEM-1 AW BE, BU, DE, MI, SH. TE-SEM-2 AW, BE, BU, DE, MI.)

Dr Helen Cleak, Ms Dianne Williamson

In this web-based unit, students across the Faculty of Health Sciences study together in interdisciplinary groups in preparation for professional practice. This unit consists of four online modules: Professional Development, Provision of Care within the Context of Human Service Systems and Implementing a Plan to Improve Service Quality, Professional Accountability and Organisational Dynamics – Working Effectively in Health and Human Service Organisations. Through guided activities, students will be encouraged to critically reflect on the structure and influences on the human services organisation, develop interdisciplinary awareness and explore the

contribution of other professions, consider the rights and expectations of service consumers and apply the key issues of ethical decision making within the context of relevant law.

Prerequisite: Bachelor of Health Sciences students must have completed at least 240 credit points. All other courses must have completed one of the following units: NSG2EBP, HIM2HCC, ORT3CLI, OCT3PRD, PTY32CPC, PTY32MPC, PTY32NPC, PTY32SSP, POD3PCP, POR2CEB, POR2CEB, HCS30CLI, HCS30PPR, SWP3FEA, ORH33CPE.

Bachelor of Health Sciences students must have completed at least 240 credit points. All other co.

Incompatible unit: HLT32IPA, HLT31IPA

Class requirements: Eight hours of lectures/seminars over two days during Orientation Week plus a flexible learning package equivalent to three hours of classroom contact per week. Students have regular contact with lecturers via the unit coordinator using telephone, fax and e-mail.

Assessment: Three 500-word online group tasks (30%). Hurdle requirements: students are required to participate in all online tasks and must pass all assessment components in order to pass this unit, one 1500-word online assignment (40%), participation/contribution to online discussions as per guidelines provided to students (10%), one 750-word online group tasks (20%), one 1500-word group online assignment (40%), participation/contribution to online discussions as per guidelines provided to students (10%).

Prescribed Reading:

Duckett SJ. *The Australian Health Care System*. Melbourne: Oxford, 2000.

NSG1AAS NURSING ART AND SCIENCE (15 CPs Sem. TE-SEM-1 AW, BE, BU, MI, SH.) AW: Ms Yolanta McLaughlin, BE: Ms Gamble Kerrie, BU: Mr Bill McGuiness

In this unit, students will be provided with an introduction to the theoretical framework of the curriculum as an underpinning for professional nursing practice. The foundations of the program are discussed in the context of nursing as a discipline and a profession. Creative and scientific processes and concepts that underlie and guide nursing practice are explored from a historic, holistic and global perspective. Students are introduced to various nursing roles in health care by examination of professional nursing practice. The concepts of nursing as an art, nursing as a science and of care and caring within a professional, legal and ethical framework are examined. Students will explore dimensions of the nurse–patient relationship. In particular, they will develop skill in initiating, maintaining and concluding effective therapeutic and professional communication. Students will also be expected to maintain a reflective journal and to engage in-group discussions.

Class requirements: 26 hours of lectures, 13 hours of problem-based learning (fortnightly class based tutorials and 7 hours of web based tutorials) and 16 hours of clinical placement over the semester. This unit will have an online component and may be offered in block mode (two consecutive 6-hour days, three times over the semester). There may be variations to this structure on difference campuses.

Assessment: One 1800-word assignment (40%). Hurdle requirement: Completion of a clinical learning activity related to communication skill and professional development, one 2200-word written essay (60%). Students must pass both the theoretical and clinical components to pass the subject.

Recommended Reading:

Crisp J and Taylor C. (Eds) *Potter and Perry's Fundamentals of Nursing*. 2nd edn. Sydney: Elsevier Mosby, 2005.

NSG1FUN FUNDAMENTALS OF NURSING PRACTICE (15 CPs Sem. TE-SEM-1 AW, BU, TE-SEM-2 AW, BE, BU, MI, SH.) AW: Ms Yolanta McLaughlin, BE: Ms Kerrie Gamble, BU: Dr Michael Bauer

In this foundation unit, students will learn how to assist clients to meet their activities of daily living. Students will study the effect of immobility on the individual's ability to self-care. Using an issues-based learning approach, students are introduced to therapeutic nursing practices, which are designed to promote, maintain and improve health status and provide comfort. Emphasis will be placed on fundamental nursing skills including basic life support. Related topics include alterations in comfort, hygiene, nutrition, elimination, respiration, circulation, body temperature and infection control.

Students will also develop skills in individualised care as a beginning member of the nursing team with awareness of legal, ethical and professional responsibilities. Students are introduced to the interactions between micro organisms and humans including the roles of microbes in health maintenance and in infectious diseases.

Co-requisite: NSG1HAS and students must be enrolled in one of the following: HBNPRG, HBNPGW, BEBN2, RBN, HBNM, HBNPRW, HBNUP, HBNSCW, RBNS, HBNS, HZNM, HBN or BIO1LS1, HBS1API or equivalent.

Class requirements: One 2-hour lecture and one 2-hour laboratory practice session (weeks 1-10), one 2-hour tutorial (weeks 1-6) plus an 80-hour clinical placement. This unit will have an online component. Block mode: two consecutive 7-hour days four times across the semester plus an 80-hour clinical placement. There may be variation to the structure on different campuses.

Assessment: One 2-hour end of semester examination (50%). Hurdle requirement: successful completion of clinical practicum, one 2000-word written project (50%). Students must pass the theoretical and the clinical components to pass the unit.

NSG1HAS HEALTH ASSESSMENT FOR NURSES (15 CPs Sem. TE-SEM-1 AW, BE, BU, MI, SH. TE-SEM-2 AW, BE, BU, MI, SH. TE-W34-43 BH. TE-W47-06 SI.) Ms Yolanta McLaughlin, Ms Sharon Kendall, Ms TBA, Ms Bev Blanch, Ms Bernadette Griffiths, Dr Beverley Wood

In this unit, students will focus on the knowledge, techniques and skills needed by the nurse to perform comprehensive health assessments of individuals across the life span. Students are provided with information on normal findings of assessment and will be able to use this in identification of healthy individuals. Students are introduced to a variety of Health Assessment frameworks, including the Functional Health Assessment framework to facilitate a comprehensive health assessment. Critical thinking skills will be developed in order to assist students to synthesise collected data. Emphasis will be placed on assessment techniques and documentation of findings. The use of technology and supervised practice on campus and clinical facilities will facilitate the development of skills required for assessment of clients. Laboratory experiences, focusing on selected psychomotor and interpersonal skills, are designed to support the development of relevant health assessment skills.

Prerequisite: Students must be enrolled in HBN, HBNPRW, RBN, HBNM, HBNPRG, HSBNC, HSBNCW, BEBND2, HBNCM, HBNUP, HBNCP, HBNSCW, RBNS, HBNS, HDIAN, HZNM, RDN, HDIANW or have passed HBS1LS1, BIO1LS1, HBS1API or equivalent.

Class requirements: 24 hours of lectures, 12 hours of tutorials, 12 hours of laboratory sessions and 40 hours of clinical practice. This unit will have an online component and may be offered in block mode (two consecutive 6-hour days four times over the semester).

This unit is not available for Study Abroad students.

Assessment: One 1500-word health assessment report (25%). Students must pass both the theoretical and clinical components to pass the subject, one 1500-word clinical reasoning exercise (25%), 40 minute practical clinical skills examination (50%).

NSG1LIL INFORMATION LITERACY FOR NURSES (15 CPs Sem. TE-SEM-1 AW, BE, BU, MI, SH.) AW: Ms Eileen Clark, BE: Dr Julie Ellis, BU: Dr TBA, MI: Ms Bev Blanch

In this unit, the students will be assisted to develop the information literacy and written communication/documentation skills required of a nurse in the 21st century. Informatics and Evidence Based Practice

are key aspects of that contemporary nursing practice. Students will be assisted to meet the CAUL information literacy standards, develop an understanding of the role of written communications/documentation and information technology in the practice of nursing and a beginning appreciation of the role of evidence as it informs nursing practice. Further, the students will be provided with a foundation on information management and processing principles used to support the data, information and knowledge needs in the provision and delivery of nursing and health care. In this unit, students will become practised in the use of both electronic media and traditional written and oral communication skills in the communication of a well-developed argument.

Class requirements: 13 hours of lectures plus directed activities equivalent to 26 hours of classroom contact across the semester. This unit will have an online component.

Assessment: One 2500-word assignment (60%), one 1500-word assignment (40%).

Recommended Reading:

Higgs J. (Ed) *Communicating in the Health and Social Sciences*. South Melbourne: Oxford University Press, 2005.

NSG2AUA ACUTE NURSING PRACTICE A (15 CPs Sem. TE-SEM-1 AW, BE, BU, MI, SH. TE-SEM-2 AW, BE, BU, MI.) AW: Ms Nanette Lundie, BE: Ms Adele Callaghan, BU: Mrs Robin Ray

In this unit, students will be offered the opportunity to gain the knowledge, techniques and skills needed by the nurse to care for the person experiencing episodic illness in a hospital. Using a problem-based learning approach the focus will be on the effect of episodic illness on skin integrity (wounds), nutritional status and elimination. Further themes for exploration include pain management, fluid and electrolyte balance and issues surrounding hospitalisation. Students will be introduced to beginning technical skills as well as the knowledge necessary for planning and implementing individualised care while considering cultural, social, psychological, ethical and legal aspects of care.

Prerequisite: NSG1HAS, NSG1FUN. If student enrolled in HBNPRG, HBNPGW, BEBN2 then must have passed NSG1HAS, NSG1FUN, NSG2MED, HBS2PAT. If student enrolled in HSBNC, HSBNCW, RBN2, BEBND2, HBNCM, HBNCN then must have passed NSG1HAS, NSG2MED, HBS2PAT.

Co-requisite: NSG2MED, HBS2PAT.

Class requirements: Bundoora/Albury-Wodonga/Mildura campus: two 2-hour lectures per week over five weeks, one 2-hour problem-based learning group per week over five weeks, one 2-hour laboratory session per week over five weeks plus clinical practicum of 15 days over three or four weeks (105 hours). Bendigo campus: As above, except with a 105-hour clinical practicum of 35 hours per week over three weeks. Or alternatively two consecutive 5-hour seminar days four times across the semester plus a 105-hour clinical practicum of 35 hours per week over three weeks. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 2000-word case study (50%). Students must pass the theoretical and clinical component to pass the unit, one 2-hour examination (50%). Hurdle requirement: clinical assessment of clinical reasoning, psychomotor and communication skills and professional development in line with the ANCI competencies using the Bondy scale.

NSG2CAF CHILD AND FAMILY NURSING PRACTICE (15 CPs Sem. TE-SEM-2 AW, BE, BH, BU, HK, MI, SH, SI.) AW: Ms Nanette Lundie, BE: Ms Diana Guzys, BU: Ms Sharon Gan, MI: Ms Bev Blanch

In this unit, students will be offered the opportunity to gain knowledge and skills to work in a respectful and collaborative partnership with families to identify and manage health concerns and provide quality care for children and families in a variety of settings. Students will investigate and critically appraise issues related to socio-cultural, structural, developmental and emotional perspectives, as well as specific knowledge and skills to assess health status of families. The effects of disadvantages on the child and family, with emphasis on families of children with special needs will be explored. Using more developed interpersonal skills, students will develop evidence-based family focused initiatives to promote optimal family functioning and health.

Prerequisite: NSG1FUN, NSG1HAS, PHE1PHB or HLT1HAS, HBS1AON, HBS1HBF or BIO12LS2 or HBS1LS2.

Class requirements: 20 hours of lectures, 10 hours of tutorials, 6 hours of directed learning activities online and 3 hours of self-directed learning across the semester. This unit may have an online component.

Assessment: One 2000-word scenario based clinical decision-making exercise (50%). Hurdle requirement: All assessment requirements must be completed to be eligible for a pass grade in this unit. You must obtain a mark of 50% to pass this unit, one 2000-word family assessment assignment (50%)

Prescribed Reading:

NSG2EBP EVIDENCE BASED NURSING (15 CPs Sem. TE-SEM-1 AW, BE, BU, HK, SI. TE-SEM-2 AW, BE, BU, MI, SH, SI.) AW: Ms Eileen Clark, BE: Ms Fran Sheehan, BH: Dr Beverley Wood, BU: Dr Simon Black, HK: Dr Beverley Wood, MI: Ms Bev Blanch, SI: Dr Beverley Wood

In this unit, students will be offered the opportunity to examine the nature and sources of evidence for nursing practice and the processes through which this evidence is generated. Information on the research process and the methods for obtaining and evaluating the application of evidence to practice will be provided. Exploration of the research process includes conceptual basis, methodology, data collection, data analysis and presentation and utilisation of research and the development of evidence based practice.

Prerequisite: NSG1FUN.

Class requirements: Bundoora/Albury-Wodonga campus: two 1-hour lectures per week over seven weeks, one 1-hour lecture per week over two weeks, one 2-hour tutorial per week over seven weeks and seven hours of self-directed learning equivalent to one hour of class contact per week over seven weeks. Bendigo campus: as above or alternatively two consecutive 5-hour seminar days four times across the semester. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 1-hour tutorial test (25%), one 2000-word critical appraisal of published research (50%), one discussion and interaction, equivalent to 1000 words (25%).

Prescribed Reading:

Trinder L and Reynolds S. *Evidence based practice: a critical appraisal*. Oxford: Blackwell Science, 2000.

NSG2LEA LAW, ETHICS AND ACCOUNTABILITY FOR NURSES (15 CPs Sem. TE-SEM-1 HK, SI. TE-SEM-2 AW, BE, BH, BU, HK, MI, SH, SI. TE-SEM-3 AW, BH, HK, SI. TE-W01-08 BH. TE-W45-03 SI.) Ms Nanette Lundie, Mr Ron Picard, Mr Les Fitzgerald, Ms Kathleen Tori, Dr Beverley Wood, Ms Susan Hunter, Dr Beverley Wood

In this unit, students will be assisted to examine the legal, ethical and accountability issues which impact on the practice of nursing. Individual responsibility of the nurse is emphasised through investigation of professional ethical and legal accountability and forms of regulation. Current models for ethical decision-making are

explored and applied in the analysis of selected ethical problems in nursing practice. The students are encouraged to examine and clarify personal and professional values and beliefs and develop a reflective approach to their practice.

Class requirements: 16 hours of lectures, 16 hours of tutorials (comprising fact-to-face and tutor-facilitated online activity) and seven hours of self-directed learning equivalent to one hour of class contact. Lectures and face-to-face tutorials are conducted in the first 5–8 weeks of semester (the number of weeks depending on the campus), while online and self-directed learning occurs across the semester. This may vary in offshore programs.

This unit is not available for Study Abroad students.

Assessment: One 1000-word scenario based ethical decision-making exercise (30%) (individual assessment), one 2500-word written assignment (60%) (individual assessment), one online discussion and interaction, equivalent to 500 words (10%).

Recommended Reading:

NSG2MED MEDICATION MANAGEMENT FOR NURSES (15 CPs Sem. TE-SEM-1 AW, BE, BU, MI, SH. TE-W09-21 BU.) *Ms Nanette Lundie, Dr Sharon Kendall, Ms Gayle McKenzie, Ms Bev Blanch*

In this unit, students will be offered the opportunity to develop knowledge of safe and ethical practice in medication administration. Information will be provided to students on pharmacologic, pharmacokinetic and pharmacodynamic principles essential for clinical practice and the basic principles of pharmacotherapeutics and pharmacological interventions in nursing including the related nursing responsibilities will be introduced. Emphasis will be placed on clinical aspects including dosing regimes and compliance, paediatric and geriatric pharmacology, adverse drug reactions and interactions, post-surgical care and polypharmacy. An overview of the clinical application of classifications of drugs on human systems will be provided.

Prerequisite: NSG1HAS, NSG1FUN, HBS1AON, HBS1HBF, HBS1LS2, or Students must be enrolled in HBNPRG, HBNPGW, BEBN2, HSBNC, HSBNCW, BEBND2, HBNCM, HBNCN.

Class requirements: 26 hours of lectures and 13 hours of facilitated small group sessions across the semester. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 2-hour written examination (60%), one 1500-word assignment (30%), one 30-minute drug calculation examination (10%). Hurdle requirement: must achieve mastery of 80% in the drug calculation examination to pass the unit.

NSG2MHL MENTAL HEALTH NURSING PRACTICE (15 CPs Sem. TE-SEM-1 AW, BU. TE-SEM-2 AW, BE, BU, MI, SH.) *AW: Ms Eileen Petrie, BE: Ms Susan Kidd, BU: Mr Alan Robins*

In this unit, students will be offered the opportunity to discuss the general principles and practices of psychiatric/mental health nursing and their impact on the individual and their family. Theoretical explanations of mental health and mental illness, the manifestation and classification of mental illness and major treatment modalities will be explored. Therapeutic and psychosocial interventions are discussed within the context of the broad socio-cultural environment. Topics will include current debates on mental health and illness,

psychiatric disorders, populations at risk, continuity of care and cross-cultural perspectives on mental health and illness. Students will also be offered the opportunity to examine the framework for mental health service delivery in Victoria.

Prerequisite: NSG2AUA, NSG2MED, HBS2PAT.

Co-requisite: NSG2AUA if student enrolled in HSBNC, HSBNCW, RBN2, BEBND2, HBNCM, HBNCN, HBNPRG, HBNPGW, BEBN2.

Class requirements: 30 hours of lecture/tutorial across the semester. Content to be delivered in flexible lecture and tutorial combination. This unit may be offered block mode across the semester in the format of seminar days. In addition a 140-hour clinical practicum of 35 hours per week over four weeks. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 1750-word written assignment (40%). Hurdle requirement: clinical assessment of clinical reasoning, psychomotor and communication skills and professional development in line with the ANCI competencies using the Bondy scale, one 2-hour written examination (60%).

Prescribed Reading:

Meadows G, Singh B and Grigg M. *Mental Health in Australia*. 2nd edn. Australia: Oxford University Press, 2006.

NSG2PMH PROMOTING MENTAL HEALTH A (15 CPs Sem. TE-SEM-1 AW, BE, BU.) *AW: Ms Eileen Petrie, BE: Ms Sue McConnachie, BU: Mr Alan Robins*

In this unit, students will be assisted to explore the role of the nurse in assessing individuals, family and group needs. Students are introduced to theories and models for health promotion and health education and the principles of planning, implementing and evaluating programs in a variety of health related settings. Students will develop their own health education strategies appropriate to cultural and lifespan needs. The mental health promotion needs of individuals, families and communities will be explored in diverse cultures and in various settings.

Class requirements: Two 1-hour lectures per week over ten weeks, one 1-hour tutorial per week over ten weeks, self-directed learning equivalent to one hour of class contact per week over ten weeks plus 70 hours of clinical practicum of 35 hours per week over two weeks and two hours of clinical supervision per week over 10 weeks. The unit may be offered in block mode: one 5-hour seminar day four times across the semester, self-directed learning equivalent to one hour of class contact per week over ten weeks plus a 70-hour clinical practicum of 35 hours per week over two weeks and two hours of clinical supervision per week over 10 weeks. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 3000-word health education session (70%). Hurdle requirement: while the clinical assessment is ungraded, students must achieve at a designated level, one 30 minutes group presentation (10-minutes per member) (20%). Interaction with and contribution to online discussion equivalent to 500 words (10%).

NSG2PRH PROMOTING HEALTH IN NURSING PRACTICE (15 CPs Sem. TE-SEM-1 AW, BE, BH, BU, HK, MI, SH, SL.) *AW: Ms Eileen Petrie, BE: Ms Kerrie Gamble, BE: Ms Di Guzys, BU: Ms Sandra Lucas*

In this unit, students will be assisted to explore the role of the nurse in assessing individuals, family and group needs. Students are introduced to theories and models for health promotion and health education and the principles of planning, implementing and evaluating programs in a variety of health related settings. Students will develop their own health education strategies appropriate to cultural and lifespan needs.

Prerequisite: NSG1HAS, PHE1PHB.

Class requirements: 13 hours of lectures and 13 hours of tutorials per semester, plus a 35-hour clinical practicum. This unit may have an online component.

Assessment: One 40-minute group presentation of a health education session – 10 minutes per member (40%). Hurdle requirement: clinical assessment of clinical reasoning, psychomotor and communication skills and professional development in line with the ANMC competencies using the Bondy scale, one 3000-word health promotion assignment (60%). Students pass the theoretical and clinical components to pass the unit.

NSG3AUB ACUTE NURSING PRACTICE B (15 CPs Sem. TE-SEM-1 AW, BE, BH, BU, MI, SI.) AW: Ms Ann Kuypers, BE: Ms Helen Aikman, BU: Ms Elizabeth Watt, MI: Ms Bev Blanch

In this unit, students will be offered the opportunity to further develop their knowledge and skills by caring for people experiencing complex health problems requiring nursing intervention. Previously learnt technical, interpersonal and decision-making skills are further developed while aspects of health education and legal and ethical aspects are incorporated to provide individualised care. Using a problem-based learning approach students will be offered the opportunity to study the effect of complex acute and chronic illness by focusing on patient situations that involve conditions that seriously alter absorption and utilisation of food and fluids, metabolism and endocrine function, elimination of bodily waste. The students will also be offered the opportunity to study the effect that these have on other body systems.

Prerequisite: NSG2AUA, NSG2MED, HBS2PAT.

Class requirements: Five 3-hour lectures, ten 1-hour problem-based learning groups and ten 1-hour laboratory sessions across the semester. A 105-hour clinical practicum of 35 hours per week over three weeks. Communication and discussion via WebCT.

This unit is not available for Study Abroad students.

Assessment: One 2-hour written examination (50%). Students must pass the theoretical and clinical components to pass the subject, one 2500-word case study (50%). Hurdle requirement: clinical assessment of clinical reasoning, psychomotor, communication skills and professional development in line with the ANCI competencies using the Bondy scale.

NSG3AUC ACUTE NURSING PRACTICE C (15 CPs Sem. TE-SEM-2 AW, BE, BH, BU, HK, MI, SI.) AW: Ms Ann Kuypers, BE: Ms Helen Aikman

In this unit, students will be provided with the opportunity to consolidate knowledge and skills in order to effectively prioritise care for a group of clients experiencing a range of complex co-morbidities. Using a problem-based learning approach students will be offered the opportunity to study the effect of complex acute and chronic illness by focusing on patient situations involving serious alterations in cardiac, respiratory and neurological function and the effect that these have on other body systems. A feature of this unit is the development of the student's ability to incorporate therapies involved in the helping role of the nurse while managing a caseload of patients.

Prerequisite: NSG3AUB.

Class requirements: Five 2-hour lectures, ten 1-hour problem-based learning session and ten 1-hour laboratory sessions across the

semester plus 140-hour clinical practicum of 35 hours per week over four weeks.

This unit is not available for Study Abroad students.

Assessment: One 2000-word case study (50%). Hurdle requirement: clinical assessment of clinical reasoning, psychomotor and communication skills and professional development in line with the ANCI competencies using the Bondy scale, one 2000-word assignment (50%). Students must pass the theoretical and clinical component to pass the subject.

NSG3CAC CANCER NURSING THEORY (15 CPs Sem. TE-SEM-1 AW, BE, BU, MI, SH. TE-SEM-2 AW, BE, BU, MI, SH.) AW: Ms Yolanta McLaughlin, BE:

Dr Sharon Kendall, BU: Ms Rosaleen Rudd, MI: Ms Bev Blanch

In this unit, students will be offered the opportunity to develop a beginning knowledge about the nature of nursing a client with cancer. Students will be provided with the opportunity to acquire knowledge pertaining to the nature of cancer and aspects of cancer prevention, treatment and rehabilitation, with particular emphasis on cancer nursing. Information on aspects of epidemiology in relation to cancer, the physiology of cancer and oncology emergencies will be provided.

Prerequisite: NSG1HAS

Class requirements: One 2-hour lecture and one 1-hour tutorial per week for ten weeks; one 3-hour laboratory session during the semester, plus six hours of self-directed learning activities equivalent to one hour of classroom contact per week for six weeks. This unit may be offered in block mode: two consecutive 6-hour seminar days three times across the semester and six hours of self-directed learning activities equivalent to one hour of classroom contact per week for six weeks. This unit may have an online component.

Assessment: One 1000-word scenario based assessment (25%), one 2500-word participation portfolio (50%), one 1000-word critical reasoning exercise (25%).

Langhorne M, Fulton J and Otto S. *Oncology Nursing*. 5th edn. St Louis: CV. Mosby, 2004.

NSG3CAD MENTAL HEALTH NURSING PRACTICE: CHILD AND

ADOLESCENT (15 CPs Sem. TE-SEM-2 AW, BE, BU.) AW: Ms Eileen Petrie,

BE: Ms Susan McConnachie, BU: Mr Alan Robins

In this unit, students will develop skills relevant to the health of infants, children and adolescents within a variety of settings, including children and adolescents from diverse cultural and geographic backgrounds. Critical appraisal of issues related to child and family health from a socio-cultural, structural, developmental and emotional perspective will occur. A major focus is on children and families and the development of specific evidence based knowledge, skill and interventions necessary to assess health status, promote health and well-being and to prevent or manage illness, injury and/or disability.

Prerequisite: NSG2PMH.

Class requirements: Two 1-hour lectures per week over ten weeks, one 2-hour tutorial per week over eight weeks, self-directed learning equivalent to 1-hour of class contact per week over four weeks plus 70-hour clinical practicum of 35 hours per week over two weeks and two hours of clinical supervision per week over 10 weeks. Or alternatively, two consecutive 5-hour seminar days four times across the semester plus a 70-hour clinical practicum of 35 hours per week over two weeks and two hours of clinical supervision per week over 10 weeks. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 2000-word family case study report (50%), one 2000-word scenario based clinical decision-making exercise (50%). Hurdle requirement: While the clinical assessment is ungraded, students must achieve at a designated level.

NSG3CAN CANCER NURSING IN PRACTICE (15 CPs Sem. TE-SEM-1 AW, BE, BU. TE-SEM-2 AW, BE, BU.) AW: Ms Yolanta McLaughlin, BE: Ms Sharon Kendall, BU: Ms Kathy Swift
 Not available in 2008

NSG3CAR CARDIAC REHABILITATION NURSING IN PRACTICE (15 CPs Sem. TE-SEM-1 AW, BE, BU. TE-SEM-2 AW, BE, BU.) AW: Ms Jan Berry, BE: Mr Leigh Kinsman, BU: Ms Nikki Phillips

This subject may not be offered every year.

In this practice-based subject, students will be offered the opportunity to explore the role of cardiac rehabilitation in the recovery from cardiac problems and the prevention of disease progress. The aims of cardiac rehabilitation will be explored according to the best available evidence. Barriers and enablers to the cardiac rehabilitation process will be investigated. Patient education models, risk factor management, social support and the role of diet and exercise will be explored.

Prerequisite: NSG1HAS.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week for ten weeks; one 3-hour laboratory session during the semester, six hours of self-directed learning activities equivalent to one hour of classroom contact per week for six weeks; plus a one week 35-hour clinical practicum. This unit may be offered in block mode: two consecutive 6-hour seminar days three times across the semester; six hours of self-directed learning activities equivalent to one hour of classroom contact per week for six weeks; plus a one-week 35-hour clinical practicum. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 1000-word scenario based assessment (25%). Hurdle requirement: while the clinical assessment is ungraded, students must achieve at a designated level, one 1750-word participation portfolio (50%). Students must successfully pass both the theoretical and practical component to pass the subject, one 1000-word clinical reasoning exercise (25%).

Recommended Reading:

NSG3CAT CHILD AND ADOLESCENT NURSING THEORY (15 CPs Sem. TE-SEM-2 AW, BE, BU, MI.) Ms Sharon Gan

This subject may not be offered every year.

In this unit, students will be offered the opportunity to extend their knowledge of paediatric nursing building on the information presented in Child and Family Nursing Practice. The focus will be on the acquisition of knowledge and skills required to assist the child and the family in times of health deviation. Information will be provided on nursing interventions that assist in promoting, maintaining and restoring health of infants, children and adolescents.

Prerequisite: NSG2CAF

NSG1HAS.

Class requirements: 20 hours of lectures, 10 hours of online tutorials, 3 hours of laboratory sessions and six hours of self-directed learning across the semester. This unit will have an online component.

This unit is not available for Study Abroad students.

Assessment: One 2500-word participation portfolio (50%), one 2000-word critical reasoning exercise (50%).

 Not available in 2008

NSG3COG CONTROVERSIES IN GERONTIC NURSING (15 CPs Sem. TE-SEM-2 AW, BE, BU, MI.) AW: Ms Yolanta McLaughlin, BE: Dr Amanda Kenny, BU: Dr Susan Koch

This unit may not be offered every year.

In this unit, students will be challenged to consider issues that raise ethical and moral challenges for nurses and society. Lifestyle choices and social stereotypes will be explored. Case study examples will be used to highlight the complexity of delivering care that involves personal lifestyle choices and contexts.

Prerequisite: NSG1HAS.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week for ten weeks during the semester plus nine hours of self-directed learning activities equivalent to one hour of classroom contact per week for nine weeks. This unit may be offered in block mode: two consecutive 6-hour seminar days three times across the semester and 6 hours of self-directed learning activities equivalent to one hour of classroom contact per week for six weeks. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 20-minute case study presentation (25%), one 2500-word evidenced based practice assignment (50%), one 1000-word critical reasoning exercise (25%).

NSG3COM COMPLEMENTARY PRACTICES IN NURSING (15 CPs Sem. TE-SEM-2 AW, BE, BU.) AW: Ms Yolanta McLaughlin, BE: Ms Amanda Kenny, BU: Dr Pauline McCabe
 Not available in 2008

NSG3CPC COMMUNITY PSYCHIATRIC NURSING IN PRACTICE (15 CPs Sem. TE-SEM-1 AW, BE, BU. TE-SEM-2 AW, BE, BU.) AW: Ms Maureen Cuskelly, BE: Ms Susan Kidd, BU: Ms TBA
 Not available in 2008

NSG3CPR COMMUNITY NURSING PRACTICE (15 CPs Sem. TE-SEM-2 AW, BE, BH, BU, HK, MI, SI.) AW: Ms Eileen Petrie, BE: Ms Kerrie Gamble, BE: Ms Di Guzys, BU: Ms Sandra Lucas

In this unit, students will be offered the opportunity to analyse the role of the nurse in facilitating health with individuals and groups in the community. An issues based learning approach will be utilised, allowing students to apply theories and models for community development, social marketing and primary health care to practice situations. In analysing community practice roles, students will be asked to critique their own values relating to lifespan, culture and social issues that impact health and be accountable (both ethically and legally) for their contribution to health service provision. Students will be able to build on knowledge gained in Information Literacy for Nurses to develop a multimedia package.

Prerequisite: NSG1LIL, NSG2AUA, NSG2PRH and NSG3AUB or students must be enrolled in HZNM. If students enrolled in HBNPRG, HBNPGW, BEBN2, HSBNC, HSBNCW, BEBND2, HBNCM, HBNCNCP then must have passed NSG2AUA, NSG3AUB.

Class requirements: 16 hours of lectures, 14 hours of problem-based learning and seven hours of self-directed learning plus a 105-hour clinical practicum of approximately 35 hours per week. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 2000-word equivalent multimedia package based on a community assessment (50%). Hurdle requirement: clinical assessment of clinical reasoning, psychomotor and communication skills and professional development in line with the ANMC competencies using the Bondy scale, one 2000-word community development practice analysis (50%). Students must pass the theoretical and clinical components to pass the unit.

NSG3CPS COMMUNITY PSYCHIATRIC NURSING THEORY (15 CPs Sem. TE-SEM-1 AW, BE, BU. TE-SEM-2 AW, BE, BU.) AW: Ms Maureen Cuskelly, BE: Ms Susan Kidd, BU: Ms TBA
 Not available in 2008

NSG3CRE CARDIAC REHABILITATION NURSING THEORY (15 CPs Sem. TE-SEM-1 AW, BE, BU. TE-SEM-2 AW, BE, BU.) AW: Ms Janet Berry, BE: Mr Leigh Kinsman, BU: Ms Nicole Phillips
 This subject may not be offered every year.

In this unit, students will be offered the opportunity to explore the role of cardiac rehabilitation in the recovery from cardiac problems and the prevention of disease progress. The aims of cardiac rehabilitation will be explored according to the best available evidence. Barriers and enablers to the cardiac rehabilitation process will be investigated. Patient education models, risk factor management, social support and the role of diet and exercise will be explored.

Prerequisite: NSG1HAS

Class requirements: One 2-hour lecture and one 1-hour tutorial per week for ten weeks; one 3-hour laboratory session during the semester; plus six hours of self-directed learning activities equivalent to one hour of classroom contact per week for six weeks. This unit may be offered in block mode: two consecutive 6-hour seminar days three times across the semester and six hours of self-directed learning activities equivalent to one hour of classroom contact per week for six weeks. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 1000-word scenario based assessment (25%), one 2500-word participation portfolio (50%), one 1000-word critical reasoning exercise (25%).

Recommended Reading:

LeMone P, Burke KM. *Medical-surgical nursing: critical thinking in client care*. 2nd edn. Sydney: Prentice-Hall Inc, 2000.

NSG3DDA MENTAL HEALTH NURSING PRACTICE: DRUG AND ALCOHOL (15 CPs Sem. TE-SEM-2 AW, BE, BU.) AW: Ms Eileen Petrie, BE: Ms Sue McConnachie, BU: Mr Alan Robins

In this unit, students are provided with the opportunity to integrate theory and practice in implementing strategies to deal with drug and alcohol misuse. Exploration will take place of the theoretical explanations for drug and alcohol misuse in society and the implications of substance misuse on individuals, families and communities. Competencies will be developed in primary prevention, early and acute intervention, rehabilitation and harm minimisation. Examination will take place of the particular needs and challenges of working with individuals, families and communities from diverse cultural groups and from a range of geographical and practice settings.

Prerequisite: NSG2PMH, NSG3CAD, NSG2MHL, NSG3MOP, NSG3IMS.

Class requirements: Two 1-hour lectures per week over ten weeks, one 1-hour problem-based learning group per week over ten weeks, one 1-hour laboratory session per week over ten weeks plus a 70-hour clinical practicum of 35 hours per week over two weeks and two hours of clinical supervision per week over 10 weeks. Or alternatively one 6-hour seminar day five times across the semester plus a 70-hour clinical practicum of 35 hours per week over two weeks and two hours of clinical supervision per week over 10 weeks. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 3000-word clinical case study (50%). Hurdle requirement: While the clinical assessment is ungraded, students must achieve at a designated level, one online assessment equivalent to 1500 words (50%).

Prescribed Reading:

Elders R, Evans K and Nizzett D. *Psychiatric and Mental Health Nursing*. Australia: Marrickville Elsevier, 2005.

NSG3GER GERONTIC NURSING PRACTICE (15 CPs Sem. TE-SEM-1 AW, BE, BH, BU, HK, MI, SI.) AW: Ms Yolanta McLaughlin, BE: Ms Julie Ellis, BU: Dr Susan Koch

In this unit, students will be offered the opportunity to consider the health needs of older people in diverse settings. The examination of the social, psychological and biological aspects of ageing; demographics of ageing, health and ageing, ageing in place, acute care and the principles of long-term care and of rehabilitation will be included. The importance of the nurses' roles in promoting, maintaining and restoring the health of older adults will be stressed. The students will be encouraged to focus on the independent role of the nurse and an interdisciplinary approach to the planning and implementation of client care and development skills in management, teamwork, delegation and prioritising care. As part of the clinical experience, students may be required to undertake evening and weekend work in this unit.

Prerequisite: NSG2AUA, NSG2MED, HBS2PAT.

Class requirements: 40 hours – 20 hours of lecturers, 10 hours of tutorials, 10 hours of self-directed learning. A 140-hour clinical practicum. This may include weekends and evenings work. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 2500-word evidence-based case management review (60%). Hurdle requirement: clinical assessment of clinical reasoning, psychomotor and communication skills and professional development in line with the ANCI competencies using the Bondy scale, one 1500-word written assignment (40%). Students must pass the theoretical and clinical components to pass the subject.

NSG3IMS MENTAL HEALTH NURSING: INTERVENTION MODALITIES (15 CPs Sem. TE-SEM-1 AW, BE, BU.) AW: Ms Eileen Petrie, BE: Ms Sue McConnachie, BU: Mr Alan Robins

In this unit, students are provided with the skills and competencies needed to select, apply and evaluate selected intervention modalities – psychopharmacology, case management, group therapy and rehabilitation – for use with individuals and families experiencing mental illness and disorder. Examination will take place of the theoretical underpinnings and clinical application of these modalities. Interventions will be based on a comprehensive assessment of needs and will be informed by an understanding of evidence-based practice. Analysis will be undertaken of the particular intervention modality needs of consumers from diverse cultures. At all times, critical reflection on practice will be emphasised, with a focus on the need to develop strategies to maintain the well-being of self and fellow workers.

Prerequisite: NSG2PMH, NSG2MHL, NSG3CAD.

Class requirements: One 1-hour lectures per week over ten weeks, one 1-hour problem-based learning group per week over ten weeks, one 1-hour laboratory session per week over ten weeks, plus a 70-hour clinical practicum of 35 hours per week over two weeks and two hours of clinical supervision per week over 10 weeks. Or alternatively one 6-hour seminar day five times across the semester plus a 70-hour clinical practicum of 35 hours per week over two weeks and two hours of clinical supervision per week over 10 weeks. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: Small group presentation (20-minutes per member) (40%), one 2500-word assignment (60%).

Prescribed Reading:

Elders R, Evans K and Nizzette D. *Psychiatric and mental health nursing*. Marrickville, Australia: Elsevier, 2005.

NSG3INT MANAGING COMPLEX INTERACTIONS IN NURSING (15 CPs Sem. TE-SEM-1 HK, TE-SEM-2 AW, BE, BU, HK, MI, TE-SEM-3 HK.) *Ms Ann Kuypers, Ms Sharon Kendall, Ms Elizabeth Pascoe, Dr Beverley Wood*

In this unit, students are placed in situations that are unique to professional nursing practice, and that require a complex range of knowledge, skill and awareness. Engagement in complicated, often stressful and distressing encounters require the nurse to be equipped with a sophisticated repertoire of skills, including 'awareness' of self and others. Effective intervention on a variety of levels is seen as an essential role of the professional nurse. The students will be given a theory base for understanding human behaviour and basic mental health concepts are introduced. Emphasis will be placed on theory-based strategies to improve interaction and coping with individuals, families and other health care professionals. The unit focuses on the complex events and interactions that occur in health care settings.

Prerequisite: NSG3AUB or students must be enrolled in HZNM

Co-requisite: NSG3AUC or students must be enrolled in HZNM.

Class requirements: Two hours of lectures six times over the semester and two hours of problem-based learning activities seven times over the semester as well as thirteen hours of directed activities over the semester. This may vary in offshore programs.

This unit is not available for Study Abroad students.

Assessment: One 2000-word critical reflective portfolio (50%), one 2000-word online assessment (50%).

NSG3NSN NEUROSCIENCE NURSING IN PRACTICE (15 CPs Sem. TE-SEM-1 AW, BE, BU, TE-SEM-2 AW, BE, BU.) *AW: Ms Jan Berry, BE: Mr Jim Kevin, BU: Ms Nicole Phillips*

This subject may not be offered every year.

In this practice-based subject, the focus will be on the nursing management of people with both acute and chronic conditions related to disturbances in neurological function. Students will be provided with the opportunity to develop the knowledge and skills necessary to care effectively and efficiently for people experiencing neurological disorders.

Prerequisite: NSG1HAS.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week for ten weeks; one 3-hour laboratory session during the semester; six hours of self-directed learning activities equivalent to one hour of classroom contact per week for six weeks; plus a one week 35-hour clinical practicum. This unit may be offered in block mode: two consecutive 6-hour seminar days three times across the semester; six hours of self-directed learning activities equivalent to one hour of classroom contact per week for six weeks, plus a one-week 35-hour clinical practicum. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 1000-word scenario based assessment (25%). Hurdle requirement: While the clinical assessment is ungraded, students must achieve at a designated level.

One 1750-word participation portfolio (50%). Students must successfully pass both the theoretical and practical component to pass the subject, one 1000-word clinical reasoning exercise (25%).

Prescribed Reading:

NSG3NTF NURSING THE FUTURE (15 CPs Sem. TE-SEM-1 AW, BE, BH, BU, HK, MI, SI, TE-SEM-2 BH, HK, SI.) *AW: Ms Ann Kuypers, BE: Ms Fran Sheean, BU: Ms Helen Forbes, BU: Ms Elizabeth Pascoe*

In this unit, students will be assisted to focus on directions for professional development. The influence of research and evolving nursing knowledge on professional roles will be examined and students will be introduced to frameworks for analysing selected contemporary issues and trends in health care that will shape future nursing practice. Contemporary strategies for managing the delivery of nursing care will be explored and the associated role requirements in nursing analysed. In addition, each student will have the opportunity to reflect on professional development, consider future career directions and prepare a curriculum vitae. Pre-registration students will focus on transition to the registered nurse role and preparation of applications for graduate positions, while post-registration students will concentrate on career planning and exploration of expanded nursing roles.

Prerequisite: NSG2AUA, NSG2LEA, NSG2EBP.

Class requirements: One 2-hour lecture eight times over the semester and one 2-hour tutorial five times over the semester. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 2000-word portfolio (50%), one 2000-word professional issues case study (50%).

NSG3OCH OCCUPATIONAL HEALTH NURSING THEORY (15 CPs Sem. TE-SEM-2 AW, BE, BU, MI.) *Ms Robin Ray*

Not available in 2008

NSG3PEO PERIOPERATIVE NURSING THEORY (15 CPs Sem. TE-SEM-1 BE, BU. TE-SEM-2 AW, BE, BU, MI.) *AW: Ms Ann Kuypers, BU: Ms Deb Fleckner*

This subject may not be offered every year.

In this unit, students are introduced to fundamental theoretical aspects of perioperative nursing, including nursing in the context of the operating room and associated environments. Content will be provided that will extend students knowledge of aspects of infection and its control in the operating suite. The students are given insight into the variety of roles of the nurse in the operating suite. The principles of surgical intervention and wound management are discussed. Information on the operating room environment, including design and patient and staff safety will be provided. An emphasis is placed on the care of the patient in the operating suite.

Prerequisite: NSG1HAS.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week for ten weeks; one 3-hour laboratory session during the semester, plus six hours of self-directed learning activities equivalent to one hour of classroom contact per week for six weeks. This unit may be offered block mode: two consecutive 6-hour seminar days three times across the semester and six hours of self-directed learning activities equivalent to one hour of classroom contact per week for six weeks. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 2000-word assignment (50%), one 2000-word portfolio (50%).

NSG3PSE PSYCHIATRIC NURSING THEORY (15 CPs Sem. TE-SEM-1 BE. TE-SEM-2 AW, BE, BU, MI.) *AW: Ms Eileen Petrie, BE: Ms Sue McConnachie, BU: Mr Alan Robins*
This unit may not be offered every year.

In this unit, students will be provided with the opportunity to build on their knowledge of mental health nursing. Students will be asked to examine the phenomena of psychiatry and psychiatric nursing from various points of view that have, as their common focus, the impact of psychiatric disorders and psychiatric health interventions on the person and groups of people.

Prerequisite: NSG1HAS, NSG2MHL

Class requirements: One 2-hour lecture and one 1-hour tutorial per week for ten weeks; one 3-hour laboratory session during the semester, plus six hours of self-directed learning activities equivalent to one hour of classroom contact per week for six weeks. This unit may be offered block mode: two consecutive 6-hour seminar days three times across the semester and six hours of self-directed learning activities equivalent to one hour of classroom contact per week for six weeks. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 1000-word scenario based assessment (25%), one 2500-word participation portfolio (50%), one 1000-word critical reasoning exercise (25%).

NSG3WMT WOUND MANAGEMENT NURSING THEORY (15 CPs Sem. TE-SEM-1 AW, BE, BU. TE-SEM-2 AW, BE, BU.) *AW: Ms Jan Berry, BE: Mr Les Fitzgerald, BU: Mr Bill McGuinness*

This subject may not be offered every year.

An important aspect of nursing work is to care for a person's integument by preventing or minimising tissue damage and providing effective wound management. Appropriate management of a person with a wound requires specific knowledge of wound healing processes, an awareness of factors that influence healing outcomes and the skill to select and implement relevant interventions. In this unit, the student will be provided with information to facilitate knowledge and skill development in these key areas. Students will be encouraged to explore contemporary evidence and knowledge, actively participate in the discussion of the clinical management of clients requiring wound management and contribute to case discussions.

Prerequisite: NSG1HAS.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week for ten weeks; one 3-hour laboratory session during the semester, plus six hours of self-directed learning activities equivalent to one hour of classroom contact per week for six weeks. This unit may be offered in block mode: two consecutive 6-hour seminar days three times across the semester and six hours of self-directed learning activities equivalent to one hour of classroom contact per week for six weeks. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 2500-word case study (50%), one 1000-word critical reasoning exercise (25%), one online activity, equivalent to 500 words (12%), one online activity, equivalent to 500 words (13%).

NSG4CPA CLINICAL NURSING PROJECT A (15 CPs Sem. TE-SEM-1 AW, BE, BU. TE-SEM-2 AW, BE, BU.) *AW: Ms Eileen Clark, BE: Dr Amanda Kenny, BU: Ms Eileen Clark*

In this unit, students will be assisted to plan a clinical nursing project under the guidance of a supervisor who is associated with one of the School or Department's research groups. Generally, the clinical projects will be directed at quality improvement or clinical audit and provide the students with the skills to engage in these activities as part of their professional practice. The research-based skills needed to

undertake quality improvement or clinical audit would be covered in this planning unit.

Prerequisite: NSG2EBP.

Class requirements: Individual supervision and attendance at seminars equivalent to 1-3 hours per week. Must have contact no less than the equivalent of 13 hours across the semester.

This unit is not available for Study Abroad students.

Assessment: One 2000-word rationale (45%), one 2500-word detailed plan for clinical project (55%).

NSG4HIA HIGH ACUITY NURSING PRACTICE (15 CPs Sem. TE-SEM-1 AW, BE, BH, BU, HK, SI.) **AW:** Ms Jan Berry, **BE:** Ms Kathleen Tori, **BU:** Ms Helen Forbes

In this unit, students will be provided with the opportunity to participate in the nursing care of clients with multiple and/or complex health care needs or multi-system failure. Students will be encouraged to focus on the nurse's role in caring for the critically ill patient, particularly the interface of technology and caring roles. The effect of critical illness on the patient, family and the nurse will be examined. Emphasis will also be placed on the nurse's role as coordinator of care.

Prerequisite: NSG21AUC.

Class requirements: Two consecutive 5-hour seminar days twice across the semester and six hours of self-directed learning equivalent to one hour of class contact per week over six weeks plus a 140-hour clinical practicum of 35 hours per week for four weeks. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 2000-word assignment (40%). Students must pass both the theoretical and clinical components to pass the unit. One 3-hour examination (60%). Hurdle requirement: While the clinical assessment is ungraded students must achieve at a designated level.

Prescribed Reading:

NSG4HRP HONOURS RESEARCH PROJECT (30 CPs Sem. TE-ALL-YR AW, BU, TE-SEM-1 AW, BU, TE-SEM-2 AW, BU.) **AW:** Ms Eileen Clark, **BU:** Ms Nicole Phillips

Not available in 2008

NSG4NTH THESIS (30 CPs Sem. TE-SEM-1 AW, BE, BH, BU, HK, SI, TE-SEM-2 AW, BE, BH, BU, HK, SI.) **AW:** Ms Eileen Clark, **BE:** Ms Julie Ellis, **BH:** Dr Beverley Wood, **BU:** Dr Bill Koch, **HK:** Dr Beverley Wood

In this unit, students will complete a total of 60 credit points in order to successfully complete the thesis component of Honours. Students are required to undertake a nursing research project associated with one of the research interests of the School or Discipline under the guidance of a supervisor. Students are required to attend regular research seminars designed to provide peer and academic support and guidance. Regular contact with the project supervisor is required.

Prerequisite: NSG2EBP, NSG3RHP, NSG4RHP.

Class requirements: Individual supervision and attendance at seminars equivalent to 1-3 hours per week. Must have contact no less than the equivalent of 13 hours across the semester.

This unit is not available for Study Abroad students.

Assessment: One 15000-word thesis (100%). Students are expected to enrol in and successfully complete 60 credit points of this unit in order to complete the thesis.

NSG4NTP THESIS PREPARATION (15 CPs Sem. TE-SEM-1 AW, BE, BU, TE-SEM-2 AW, BE, BU.) **AW:** Ms Eileen Clark, **BE:** Ms Julie Ellis, **BU:** Dr Bill Koch

In this unit, students are provided with a forum to explore research methodologies while assisting them to select a topic and a framework for their research. Students are also provided with an opportunity to defend and refine their plan for the research project. Students are required to attend regular research seminars designed to provide peer and academic support and guidance. Regular contact with the project supervisor is required.

Prerequisite: NSG2EBP, NSG3RHP, NSG4RHP.

Class requirements: Individual supervision and attendance at seminars equivalent to 1-3 hours per week. Must have contact no less than the equivalent of 13 hours across the semester.

This unit is not available for Study Abroad students.

Assessment: One 20-minute seminar presentation on research topic (20%), one 3000-word research proposal (80%).

Minichiello V, Sullivan G, Greenwood K and Axford R. *Research Methods for Nursing and Health Sciences*. Sydney: Pearson, 2003.

NSG4PCO NURSING PRACTICE CONSOLIDATION (15 CPs Sem. TE-SEM-2 AW, BE, BH, BU, HK, SI.) **BE:** Ms Kathleen Tori, **BH:** Dr Beverley Wood, **BU:** Ms Elizabeth Watt, **HK:** Dr Beverley Wood

In this unit students will be provided with further opportunity to synthesise and consolidate knowledge and skills acquired throughout the course in the delivery of patient centred care for a group of clients, a major focus is on the development of leadership skills. The students will be provided with the opportunity to further develop discharge planning skills as well as developing their role as a professional nurse by supporting and directing care provided by other health care team members and responding to the needs of patients, their families and their colleagues in relation to patient, family and nurse education.

Prerequisite: NSG4HIA.

Class requirements: One 1-hour seminar per week over six weeks, one 1-hour problem-based learning session per week over the semester, seven hours of self-directed learning equivalent to one hour of class contact per week across seven weeks plus a 200-hour clinical practicum of 40 hours per week for five weeks. This unit may have an online component.

This unit is not available for Study Abroad students.

Assessment: One 4000-word clinically based learning contract (100%). Students must pass both the theoretical and clinical components to pass the subject. Hurdle requirement: While the clinical assessment is ungraded, students must achieve at a designated level.

Recommended Reading:

Andre K and Heartfield M. *Professional Portfolios: evidence of Competency for Nurses and midwives*. NSW: Elsevier, 2007.

NSG4RHP RESEARCH HONOURS PREPARATION (15 CPs Sem. TE-SEM-1 AW, BE, BH, BU, HK, SI.) **AW:** Ms Eileen Clark, **BE:** Ms Julie Ellis, **BU:** Dr Bill Koch

In this unit, students will be given content and guidance to prepare them to undertake an Honours project. Students will be offered the opportunity to be introduced to the predominant research paradigms and students will attain the knowledge and skills to plan and implement a research study using one research approach. An overview of different research processes; discussing the ethical issues in conducting research using human subjects will be presented.

Prerequisite: NSG2EBP.

Class requirements: Three 4-hour seminars across the semester. This unit has an online component equivalent to 27 hours of learning.

This unit is not available for Study Abroad students.

Assessment: One 2000-word assessment (50%), one 2000-word assessment (50%).

Prescribed Reading:

Minichiello V, Sullivan G, Greenwood K and Axford R. *Research Methods for Nursing and Health Sciences*. Sydney: Pearson, 2003.

NSG4RIN READINGS IN NURSING (15 CPs Sem. TE-SEM-2 AW, BE, BU.) **AW:** Ms Eileen Clark, **BE:** Dr Julie Ellis, **BU:** Dr Bill Koch

Offered subject to sufficient enrolments. Enrolment must be approved by Course Coordinator.

In this unit, students are provided with the opportunity to select an area within nursing they wish to investigate fully. It is envisaged that the chosen topic will be investigated thoroughly through examination of the current literature.

Class requirements: Negotiated with individual supervisors – equivalent to 39 hours per semester. This unit will have an online component.

This unit is not available for Study Abroad students.

Assessment: One 3000-word essay (60%), one 20-minute class presentation (40%).

PHE1PHA INTRODUCTION TO PUBLIC HEALTH A (15 CPs Sem. TE-SEM-1 AW, BU, MI, SH.) AW: Dr TBA, BU: Ms Janet Carnegie, BU: Dr Paul O'Halloran

Albury/Wodonga campus: available only to Bachelor of Nursing students.

Public Health practice operates at individual, social and structural levels. That is, public health knowledge is acquired from these multiple sources and public health interventions can be targeted at the individual, social, or structural level. In this unit, students will predominately address public health at the individual level. The principal aim of the unit is to provide foundation knowledge pertaining to preventive work with individuals at multiple levels in the health care system. Topics are organised into the broad groupings related to health (e.g. learning), regulatory systems (obesity, motivation and developmental) and social influences on health (development, communication processes) and personality, stress and mental health.

Incompatible unit: PHE1PHC

Class requirements: Three 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 1.5-hour examination (50%), four 300-word short answer questions (20%), one 1200-word essay (20%), tutorial participation (10%).

Prescribed Reading:

McMurray A. *Community health and wellness: a socioecological approach*. 2nd edn. NSW: Marrickville, Mosby, 2007
Passer MW and Smith RE. *Psychology: the science of mind and behaviour*. 3rd edn. Boston, MA: McGraw-Hill, 2007.

PHE1PHB INTRODUCTION TO PUBLIC HEALTH B (15 CPs Sem. TE-SEM-2 AW, BU, MI, SH.) AW: Ms Eileen Clark, BU: Ms Prue Bagley

In this unit, students are introduced to social understandings of health and health care practice. Changing definitions of health and illness are examined, inequalities in health and health care are analysed from different sociological perspectives and some key political and ethical issues are explored. The aim is to develop students' capacity to view current health concerns in a public health perspective and to understand how this relates with other professional practice perspectives.

Incompatible unit: PHE1PHD

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 1-hour examination (30%), one 2500-word tutorial assignment (40%), one 10min tutorial presentation (30%).

PHE2RHC RESEARCH IN HEALTH CARE (15 CPs Sem. TE-SEM-1 BU, DE, MI, OS. TE-SEM-2 AW, BE, BU, DE, MI.) AW: Ms Eileen Clark,

BU: Mr Stephen Polgar

Not available in 2008

PHE4THA THESIS PREPARATION (15 CPs Sem. TE-SEM-1 AW, BU.) AW: Dr Guin Threlkeld, BU: Mr Steve Polgar, BU: Ms Dianne Williamson

This unit must be taken in conjunction with PHE4THB or equivalent. In this unit, students identify a significant research issue and, under supervision conduct a critical review of the literature relevant to the area of study. Students derive appropriate research questions, develop an appropriate research methodology and prepare a project proposal and Ethics Committee submission. This unit must be taken in conjunction with PHE4THB or equivalent.

Co-requisite: PHE4THB.

Class requirements: Students participate in Project Committee meetings and meet with thesis supervisor on a regular basis.

Assessment: Ethics Committee submission (50%). This unit is graded as a pass or fail, one 3000-word research project proposal (50%).

PHE4THB THESIS (60 CPs Sem. TE-SEM-1 AW, BU. TE-SEM-2 AW, BU.) AW:

Dr Guin Threlkeld, BU: Mr Steve Polgar, BU: Ms Dianne Williamson

This unit must be taken in conjunction with PHE4THA.

In this unit, students conduct and report on an original research project that addresses a significant research issue. Under supervision, students are required to conduct the planned study, select and conduct appropriate analyses and write a report on the project. This unit must be taken in conjunction with PHE4THA.

Prerequisite: PHE4THA.

Class requirements: Students complete the project under supervision.

Assessment: One 10,000-12,000-word thesis (100%). This unit is taken in conjunction with PHE4THA.

SWP1ITP INTRODUCTION TO SOCIAL WORK A (15 CPs Sem. TE-SEM-1 AW, BE, BU. TE-SEM-2 MI.) Dr Sue Hodgkin, Ms Grace Brown, Dr

Christine Bigby, Ms Paula Bruce

In this unit, students will be orientated to a university mode of study. They will be introduced to the complex and often contested nature of social work and the diverse knowledge base that informs social work practice. Students will gain an understanding of the core values, the history and current orientation of social work. Ideas that social problems are constructed and understood differently across time and in accordance with different value and theoretical perspectives are explored. Using selected examples, the impact of societal organisation on individuals and social problems will be examined.

Class requirements: One 2-hour lecture and one 1.5-hour tutorial per week.

Assessment: One study skills and library assignment equivalent to 1250 words (30%), one 1500-word essay (40%), one group class presentation equivalent to 500 words (10%), one individual write up equivalent to 1000 words (20%).

SWP1OPW ORGANISATIONAL APPROACHES TO POLICY WORK (10 CPs Sem. TE-WO6-11 AW, BE, BU.) AW: Ms Robyn Mortlock, BE: Ms Di Cox, BU: Ms Maureen Long

In this unit students learn about the policies organisations develop to alleviate poverty in society and the approach they take to implement these policies through their services, research, advocacy and social action. Students explore and analyse the history, mission, values, policies and actions of one Australian organisation involved in poverty alleviation.

Class requirements: Five hours of seminars and 30 hours of self-directed study.

Assessment: One oral presentation equivalent to 1000 words (10%), one 2000-word essay (organisational analysis) (90%).

Recommended Reading:

SWP1PPI POLICY, POVERTY AND INEQUALITY (25 CPs Sem. TE-SEM-2 AW, BE, BU.) AW: Ms Robyn Mortlock, BE: Ms Di Cox, BU: Ms Maureen Long

In this unit, students are introduced to various historical, contemporary and comparative understandings of poverty and

inequality. Students examine various definitions and ways to measure poverty and explore the impact of poverty and inequality on individuals and society. Australian social policy approaches to the alleviation of poverty are discussed in relation to various groups at particular risk of poverty. Students learn about the policies organisations develop to alleviate poverty in society and the approach they take to implement these policies through their services, research, advocacy and social action. Students analyse the history, mission, values, policies and actions of one Australian organisation involved in poverty alleviation.

Class requirements: Two 1-hour lectures per week for 13 weeks, seven 1-hour tutorials per semester, five 2-hour tutorials per semester and 30 hours of self-directed study.

Assessment: One 2000-word essay (organisational analysis) (30%), one 2500-word essay (policy analysis) (40%), one 1500-word fact sheet (20%), one presentation equivalent to 1000 words (10%).

SWP1SPPP SOCIAL POLICY AND PRACTICE A (15 CPs Sem. TE-SEM-2 AW, BE, BU.) AW: Ms Robyn Mortlock, BE: Ms Di Cox, BU: Ms Maureen Long

In this unit, students are introduced to various historical, contemporary and comparative understandings of poverty and inequality. Students examine various definitions and ways to measure poverty and explore the impact of poverty and inequality on individuals and society. Australian social policy approaches to the alleviation of poverty are explored in relation to various groups at particular risk of poverty.

Class requirements: Two 1-hour lectures for 13 weeks and one 1-hour tutorial per week for 12 weeks.

Assessment: One 1500-word statistical commentary (30%), one 2500-word essay (70%).

Preliminary Reading:

Australian Senate Communities Affairs Committee. *A hand up not a hand out*. AGPS, 2004.
McClelland A and Smyth P (Eds). *Social Policy in Australia, Understanding for Action*. Melbourne: Oxford University Press, 2005.

SWP2DLC DEVELOPMENT ACROSS THE LIFE COURSE IN SOCIAL CONTEXTS (20 CPs Sem. TE-SEM-1 AW, BE, BU.) AW: Dr Judith Gibbs, BE: Dr Jennifer Lehmann, BU: Dr John McCormack

In this unit, students will build on first year psychological studies and explore human development within a social context, drawing out implications for social work practice. It focuses on human development across the life course and the key roles played by relationships in influencing development. It considers the challenges to individual and social functioning of non-normative factors such as illness, impairment and disability during the life course. It covers particular implications for social work practice when development becomes problematic as well as in normal development transitions.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 2000-word essay (40%), one 3000-word essay (60%).

Prescribed Reading:

Peterson C. *Looking forward through the life span*. 4th edn. Pearson Education, 2004.

SWP2HSO SOCIAL WORK IN HUMAN SERVICE ORGANISATIONS A (10 CPs Sem. TE-SEM-2 AW, BE, BU.) AW: Ms Virginia Mansel Lees, BE: Dr Jennifer Lehmann, BU: Ms Margarita Frederico

In this unit, students are introduced to the organisational context of social work practice. In the context of the interface of policy and practice, students will explore the role of human service organisations in the delivery of social services and the practice of social work. Through lectures, seminars and required visits to organisations the student will examine the organisational knowledge and skills necessary to practice effectively in the organisational context of welfare.

Class requirements: One 1-hour lecture and one 1-hour tutorial per week. Three of the tutorial hours will be allocated as time for students to undertake organisational visits.

Assessment: One 2000-word paper on organisational case study (66%), one 1-hour examination (for Albury-Wodonga and Bundoora) (34%). In Bendigo the examination will be substituted by one structured investigative journal of approximately 2000 words

Recommended Reading:

SWP2ITP INTRODUCTION TO SOCIAL WORK B (20 CPs Sem. TE-SEM-1 AW, BE, BU.) AW: Ms Virginia Mansel Lees, BE: TBA, BU: Dr Helen Cleak

In this unit, students will be provided with an understanding of the theoretical foundations and values of social work and social work practice. This unit will examine what social workers need to know, the values and ideology that frames social work and then what they do in practice. This will enable students to develop an overall map of the knowledge and skills required for social work, with a particular emphasis on the systems theory and an approach to practice that is known as the ecosystem perspective. The student will be introduced to the major contexts in which a generalist social worker operates and the different forms and levels of intervention, namely the micro, mezzo and macro levels and the role of social workers in these different settings.

Class requirements: One 2-hour lecturer per week and 14 hours of tutorials over the semester.

Assessment: One 1500-word research essay (40%), one 3500-word essay (60%).

Prescribed Reading:

Payne M. *Modern social work theory*. 3rd edn. Palgrave, 2005.

SWP2OCP ORGANISATIONAL CONTEXTS OF SOCIAL WORK PRACTICE (20 CPs Sem. TE-SEM-2 AW, BE, BU.) AW: Ms Virginia Mansel Lees, BE: Dr Jennifer Lehmann, BU: Ms Margarita Frederico

In this unit, students will explore the role of human service organisations in the delivery of social services and the practice of social work. Through lectures and tutorials, or seminars, student will examine organisation theory and the organisational knowledge and skills necessary to practice effectively in the organisational context of social and community services, which is characterised by complex developments in policy, practice interventions and accountability. Student will complete an investigatory assessment task of an organisation, as approved by the unit coordinator.

Prerequisite: SWP2PPH.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week for Bundoora and Albury-Wodonga students, one 3-hour seminar per week for Bendigo students, 10 hours of self-directed learning per semester, two hours of tutorial time will be allocated for students to undertake organisational visits.

Assessment: One 2000-word paper on organisational case study (35%), one structured investigative journal of approximately 2000 words (30%), one 2-hour examination (for Albury-Wodonga and

Bundoora) (35%). In Bendigo, the examination will be substituted by one 2000-word essay).

SWP2PPH PROFESSIONAL PRACTICE: HISTORY AND VALUES (30 CPs Sem. TE-SEM-1 AW, BE, BU.) AW: Ms Virginia Mansel Lees, BE: TBA, BU: Dr Helen Cleak

In this unit, students will be provided with an understanding of the theoretical foundations and values of social work and social work practice. This unit will examine what social workers need to know, the values and ideology that frames social work and then what they do in practice. This will enable students to develop an overall map of the knowledge and values required for social work, with a particular emphasis on the systems theory and an approach to practice that is known as the ecosystem perspective. The student will be introduced to the major contexts in which a generalist social worker operates and the different forms and levels of intervention, namely the micro, mezzo and macro levels and the role of social workers in these different settings. Throughout the unit, students will be encouraged to explore, articulate and share their experiences and relate them to their ongoing development as social work students.

Class requirements: One 2-hour lecture per week, one 2-hour tutorial per week and 15 hours of self-directed learning.

Assessment: One 3500-word essay (40%), one 4000-word research essay (60%). Hurdle requirement: Students must present one 10-minute individual poster presentation.

Prescribed Reading:

Chenoweth L and McAuliffe D. *The road to social work and human service practice*. Thompson Learning, 2005

SWP2REC SOCIAL WORK AND REFLECTIVE COMMUNICATION (20 CPs Sem. TE-SEM-1 MI. TE-SEM-2 AW, BE, BU.) AW: Ms Robyn Mortlock, BE:

Dr Jennifer Lehmann, BU: Dr Trish McNamara, MI: Ms Paula Bruce

In this unit, students are encouraged to critically examine how their values and beliefs shape emotional and behavioural responses. Students are helped to develop a foundation for effective interpersonal communication based on conscious use of self and critical self-reflection. Students are exposed to human communication issues relevant to social work from the micro systems level to the macro level of society. Students will study different models of communication emphasising the importance of understanding social diversity. Largely experiential seminars will encourage students to become aware of their own interactional style in one to one situations and in groups and to become increasingly self-confident communicators.

Class requirements: One 2-hour lecture and one 2-hour seminar per week.

Assessment: One 2500–3000-word essay (50%), one group presentation (15 minutes per member) (25%), one 1500-word individual write up of presentation (25%).

Prescribed Reading:

Adler R and Rodman G. *Understanding human communication*. 9th edn. Oxford University Press, 2006.

SWP2RES RESEARCH FOR SOCIAL WORK PRACTICE A (10 CPs Sem. TE-SEM-2 AW, BE, BU.) AW: Dr Suzanne Hodgkin, BE: Ms Pascal Janice, BU: Dr Martin Ryan

In this unit, students will be introduced to core concepts in the research process as it applies to social work practice. There will be an overview of both quantitative and qualitative approaches to research. Students will explore the key concepts involved in planning, designing and implementing a social work research study. This

knowledge of these concepts will be developed through the preparation of a literature review and a research proposal.

Class requirements: One 1-hour lecture and one 1-hour tutorial per week.

Assessment: One 2000-word essay (60%), one 1000-word essay (40%).

Prescribed Reading:

Bouma G and Ling R. *The research process* 5th edn. Melbourne: Oxford University Press, 2004.

Recommended Reading:

Bryman A. *Social research methods*. 2nd edn. Oxford University Press, 2004.

SWP3COM SOCIAL WORK PRACTICE IN COMMUNITIES (15 CPs Sem.

TE-SEM-1 AW, BE, BU, MI.) AW: Ms Robyn Mortlock, BE: Ms Dianne Cox, BU: Dr Carmel Laragy, MI: Ms Paula Bruce

In this unit, students will focus on social work practice at the community and societal levels. It covers conceptual and theoretical underpinnings of community development including principles, such as active citizenship and participatory democracy. It has a broad focus in that it covers social, economic, political, cultural, environmental and personal development. It will examine community development as a framework to facilitate people, communities and organisations to engage in the change process and to promote social well-being and community building.

Class requirements: Two 1-hour lectures and one 1-hour seminar per week.

Assessment: One 2000-word essay (40%), one group 3000-word essay (40%), one group presentation (5-minutes per member) (20%).

Prescribed Reading:

Kenny S. *Developing communities for the future: community development in Australia*. 3rd edn. Australia: Thomson, 2006.

SWP3FEA FIELD EDUCATION A (40 CPs Sem. TE-W36-49 AW, BE, BU, MI.)

AW: Mr Jerry Sweeting, BE: Ms, BU: Dr Helen Cleak, MI: Ms Paula Bruce

This unit will offer students the opportunity to integrate different theoretical perspectives and skills by undertaking a supervised fieldwork practicum. Students are placed in a range of human service organisations and are required to become experiential learners who can reflect critically on their practice and who can demonstrate beginning skills in appropriate social work skills. SWP3FEA is the first and SWP4FEB the second of two fieldwork placements to be undertaken by the students under the supervision of a qualified social worker with the liaison support of an academic staff member. Each placement period is 14 weeks full-time as required by the AASW and is normally taken in second semester (September to December) each year. As part of the practicum, students will be required to attend 10 hours of preparatory seminars (held in both first and second semester) and 10 hours of seminars throughout the practicum to integrate theory with the practicum experience.

Prerequisite: SWP3IFG, SWP3LER.

Class requirements: Field placement of fourteen weeks full-time (70 days) and eight hours of preparatory lectures/seminars.

Assessment: Learning agreement, mid placement and final placement reports as per *BSW Field Education Handbook* (100%). Assessed as pass or fail grade.

Recommended Reading:

Bogo M and Vayda E. *The practice of field instruction in social work*. New York: Columbia University Press, 1998.

SWP3FEP WELFARE PRACTICE FIELD EDUCATION PRACTICUM (20 CPs

Sem. TE-SEM-1 AW.) Ms Virginia Mansel Lees

Not available in 2008

SWP3FOA FIELD EDUCATION AND ORGANISATIONAL ANALYSIS (55 CPs Sem. TE-W36-49 AW, BE, BU.) AW: Mr Jerry Sweeting, BE: TBA, BU: Dr Helen Cleak

In this unit, students will have the opportunity to integrate different theoretical perspectives and skills by undertaking a supervised and supported fieldwork practicum. Students are placed in a human service organisation and encouraged to become experiential learners who can reflect critically on their practice and who can demonstrate beginning skills in appropriate social work tasks and roles. Students explore the nature of the placement as a learning experience and the organisational context of field education. Students undertake a 14-week full-time fieldwork placement under the supervision of a qualified social worker with regular contact and support directly and online from an academic staff member. The unit has additional explicit focus on the organisational context's impact on practice.

Prerequisite: SWP2OCP, SWP3IFG, SWP3LER.

Class requirements: Field placement of 14 weeks full-time (70 days); 10 hours of preparatory lectures/seminars in semester 1 and 2–18 hours of integrative lectures/seminars and guided reading.

Assessment: One 1500-word essay on reflective preparation for placement (10%), all evaluation documentation as per *BSW Field Education Handbook* equivalent to 9000 words (70%). Also involves presentations at integrative seminars, one 2000-word essay on an organisational analysis (20%). Unit is assessed as pass or fail grade only.

Recommended Reading:

Cooper L and Briggs L. *Fieldwork in the human services*. Allen and Unwin, 2000.
Cleak H and Wilson J. *Making the most of field placement*. Thompson, 2004.

SWP3FOP FIELDS OF SOCIAL WORK PRACTICE A (15 CPs Sem. TE-W29-35 AW, BE, BU, MI.) AW: Dr Guinever Threlkeld, BE: Ms Di Cox, BU: Ms Maureen Long, MI: Ms Paula Bruce

In this unit, students are introduced to the practice of social work in diverse fields exploring context, policies, programs and practice in various fields. The content helps to integrate social work knowledge and builds on core social work knowledge and skills, introducing further knowledge and skills specific to the field being studied. Specific fields are selected by the School each year and may include social work practice and mental health; children and families; ageing; grief and loss; disability; protective services, health; addiction studies; child protection; poverty and inequality; and international social work.

Class requirements: Five hours of seminars/lectures per week for six weeks plus self-directed learning activities equivalent to nine hours of classroom contact across the semester.

Assessment: One 1000-word essay (25%). one 20-minute verbal presentation may be undertaken in lieu of the 1000-word essay, one 3000-word essay (75%).

Recommended Reading:

SWP3IFG SOCIAL WORK PRACTICE WITH INDIVIDUALS, FAMILIES AND GROUPS A (20 CPs Sem. TE-SEM-1 AW, BE, BU, MI.) BE: Ms Jan Pascal, BE: Dr TBA, BU: Mr Mark Furlong, MI: Ms Paula Bruce

In this unit, students will be introduced to a basic understanding of theories and models of social work practice with individuals, families and groups integrated with structured opportunities to develop and refine self-knowledge – critical reflection and casework interview skills. Students will also develop skills in undertaking casework assessment and interventions. As such, this unit aims to integrate theoretical models with direct casework practice. Throughout, this unit encourages active participation in role-plays, value clarification exercises, exploring social and personal assumptions, as well as developing an awareness of relationship between social and personal issues. The expected outcome for this unit is the achievement of a

level of competence in social work practice sufficient for entry into a first supervised fieldwork placement.

Recommended Prior Studies: SWP2ITP, SWP2REC.

Class requirements: Two 1-hour lectures and one 3-hour seminar per week.

Assessment: One 1000-word personal reflection (15%), one 1000-word case formulation (15%), one 2000-word follow-on case study (50%), simulated casework interviews equivalent to a 20-minute verbal presentation (20%). Hurdle requirement: students must obtain a pass standard in the simulate casework interviews and attend 80% of seminars/tutorials in order to obtain a pass in this unit.

SWP3ITP INTRODUCTION TO SOCIAL WORK (10 CPs Sem. TE-SEM-1 AW, BE, BU, MI.) AW: Ms Virginia Mansel Lees, BE: Dr Jennifer Lehmann, BU: Mr David Green, MI: Ms Paula Bruce

This unit is available to Bachelor of Social Work (Advanced Standing). Students only.

In this unit, two year BSW (Advanced Standing). Students are provided with opportunities to relate prior learning and experiences to the key values and orientation, the knowledge base and the skills of social work, including its multilevel analytic and interventive nature. They will cover aspects of the Social Work profession, the historical and contemporary construction of social problems and the welfare state (with a particular focus on the contemporary restructuring of the welfare state) and key defining issues for contemporary social work practice.

Class requirements: One 1-hour lecture per week for twelve weeks and one 2-hour seminar per fortnight during semester.

Assessment: One 1000-word exploratory learning essay (40%), one 1500-word essay investigating a social work issue (60%).

SWP3LER SOCIAL WORK PRACTICE: LAW ETHICS AND HUMAN RIGHTS (15 CPs Sem. TE-SEM-1 AW, BE, BU, MI.) AW: Dr Guinever Threlkeld, BE: Ms Grace Brown, BU: Dr Carmel Laragy, MI: Ms Paula Bruce

In this unit students explore the foundations of legal and ethical decision-making, the implications of working within the Australian legal system and address concepts of moral philosophy that underpin the AASW Code of Ethics and AASW Practice Standards. Students examine the human rights regime, its relevance to social work and the role of ethics from various perspectives in social work practice. They explore a process for ethical decision-making. There is an examination of the legal contexts within which social workers function and which they are expected to understand in their practice.

Class requirements: Two 1-hour lectures (weeks 1–5), one 1-hour lecture (weeks 6–13), one 1-hour tutorial per week for 12 weeks plus an additional eight hours for two court visits during semester.

Assessment: One 1750-word court report (40%), one 2000-word essay (60%).

SWP3RES RESEARCH FOR SOCIAL WORK PRACTICE B (15 CPs Sem. TE-W29-35 AW, BE, BU, MI.) AW: Dr Guinever Threlkeld, BE: Ms Grace Brown, BU: Dr John McCormack, MI: Ms Paula Bruce

In this unit, students will build on previous research education to provide research skills and knowledge for direct application in social work practice. A range of approaches to social work practice research will be explored including evidence-based research, clinical research and qualitative methods. There will also be significant input on data analysis, both qualitative and quantitative in the unit.

Recommended Prior Studies: SWP2RES.

Class requirements: Two 2-hour lectures and one 1-hour computer laboratory/seminar per week for six weeks plus self-directed learning activities equivalent to three hours of classroom contact across the teaching period.

Assessment: One 2500-word research proposal (65%), one 1500-word data analysis exercise (35%).

SWP4DIV DIVERSITY AND SOCIAL WORK PRACTICE (10 CPs Sem. TE-W29-35 AW, BE, BU, MI.) AW: Ms Virginia Mansel Lees, BE: Ms Di Cox, BE: Dr Jennifer Lehmann, BU: Mr Mark Furlong, MI: Ms Paula Bruce

This unit will particularly emphasise social work practice methods in a diverse society. In order to introduce and develop the concept of 'diversity and social work practice' three broad arenas of 'difference' will be featured from among the many forms of social and cultural diversity. These arenas are not exclusive but will in this instance be Indigenous Australians, sexuality, and migration and culture. As social workers are expected to practice within a framework of social and cultural difference, the aim of the unit is to introduce students to and to promote values and skills for, 'difference-competent practice' and 'anti-oppressive practice'.

Class requirements: One 2-hour lecture, one 1-hour lecture and one 1-hour tutorial per week for six weeks across the semester.

Assessment: One 1000-word essay (40%), one 1500-word essay (60%).

Recommended Reading:

SWP4FEB FIELD EDUCATION B (40 CPs Sem. TE-W26-39 BE, TE-W36-49 AW, BE, BU, MI.) AW: Mr Jerry Sweeting, BE: Ms, BU: Dr Helen Cleak, MI: Ms Paula Bruce

In this unit, students will undertake a supervised fieldwork practicum, which will provide opportunities to integrate theoretical knowledge with practice and develop competencies to the standard required by AASW. Students are placed in a range of human service organisations to demonstrate their knowledge and skills and further develop their practice knowledge. SWP3FEA is the first and SWP4FEB the second of two fieldwork placements to be undertaken by students under the

supervision of a qualified social worker with the liaison support of an academic staff member. Each placement period is 14 weeks full-time as required by the AASW and is normally taken at the end of second semester (September to December) each year. As part of the practicum, students will be required to attend six hours of preparatory seminars (held in both first and second semester) and ten hours of seminars throughout the practicum to integrate theory with the practicum experience.

Prerequisite: SWP3COM, SWP3FEA, SWP4IFG, SWP4SPP, SWP4DIV, SWP4FOP.

Class requirements: Field placement of 14 weeks full-time (70 days) and six hours of preparatory lectures/seminars.

Assessment: Learning agreement, mid-placement and final placement reports as per *BSW Field Education Handbook* (100%). Assessed on pass or fail grade.

Recommended Reading:

SWP4FOP FIELDS OF SOCIAL WORK PRACTICE B (15 CPs Sem. TE-W29-35 AW, BE, BU, MI.) AW: Dr Guinever Threlkeld, BE: Ms Di Cox, BU: Ms Maureen Long, MI: Ms Paula Bruce

In this unit, students are introduced to the practice of social work in diverse fields exploring context, policies, programs and practice in various fields. The content helps to integrate social work knowledge and builds on core social work knowledge and skills, introducing further knowledge and skills specific to the field being studied. Specific fields are selected by the School each year and may include social work practice and mental health; children and families; ageing; grief and loss; disability; protective services, health; addiction studies; child protection; poverty and inequality; and international social work.

Prerequisite: SWP3FOP, SWP3FEA.

Class requirements: Five hours of seminars/lectures per week for six weeks plus self-directed learning activities equivalent to nine hours of classroom contact across the semester.

Assessment: One 1000-word essay (25%), one 20-minute verbal presentation may be undertaken in lieu of the 1000-word essay, one 3000-word essay (75%).

SWP4FPP FIELD EDUCATION AND PROGRAM PLANNING (55 CPs Sem. TE-W37-50 AW, BE, BU.) AW: Mr Jerry Sweeting, BE: TBA, BU: Dr Helen Cleak

In this unit, students will have the opportunity to integrate different theoretical perspectives and skills by undertaking a supervised and supported fieldwork placement. Students are placed in a human service organisation and are required to be experiential learners who can reflect critically on their practice and can demonstrate graduate level skills in a range of social work roles and tasks. In first semester students focus on program design and evaluation. In second semester students commence a 14-week placement under the supervision of a qualified social worker with regular contact and support directly and on line from an academic staff member. They also complete a program plan or program evaluation.

Prerequisite: SWP3COM, SWP3FOA, SWP4IFG, SWP4SPP, HLT3IPA, SWP4FOP, SWP4DIV.

Class requirements: Six hours pre-placement seminars, 15 hours of integrative seminars, field placement of 14 weeks full-time (70 days), and participation in On-line forum throughout placement.

Assessment: One 3000-word essay on integration of theory and practice and critical reflections (30%). All assessment is calculated as pass or fail grade only. Students must submit all documentation to

pass the unit, all evaluation documentation as per *BSW Field Education Handbook* equivalent to 9000 words (70%). This assessment includes participation in On-line discussion throughout the placement.

SWP4HOA SOCIAL WORK HONOURS A (20 CPs Sem. TE-SEM-1 AW, BE, BU.) AW: Dr Guinever Threlkeld, BE: Dr Jennifer Lehmann, BU: Professor Allan Borowski

Available only to BSW Honours students. Successful completion of Year 3 of the BSW degree and a high level of academic performance. In addition, honours students must enrol in all BSW Year 4 units except Diversity in Social Work Practice and Fields of Practice B. This unit represents one semester of a yearlong program and must be taken in conjunction with SWP4HOB.

In this unit the major tasks for honours students are: (1) the satisfactory completion of a research proposal and (2) a seminar presentation of their research topic. Please note that this unit is to be undertaken with SWP4HOB.

Prerequisite: SWP3COM, SWP3IFG, SWP3LER, SWP3FOP, SWP3RES, SWP3FEA.

Class requirements: One 2-hour seminar per week in semester 1 and attendance at regular thesis supervision sessions as required by the supervisor.

This unit is not available for Study Abroad students.

Assessment: One 30-minute seminar presentation of research proposal (20%) assessed as pass/fail grade only. Students must pass both components to pass unit, one 3000-word (approximately) research proposal (80%).

Recommended Reading:

Bryman A. *Social Research Methods*. 2nd edn. Oxford University Press, 2004.

SWP4HOB SOCIAL WORK HONOURS B (20 CPs Sem. TE-SEM-2 AW, BE, BU.) AW: Dr Guinever Threlkeld, BE: Dr Jennifer Lehmann, BU: Professor Allan Borowski

Available only to BSW Honours students. Successful completion of Year 3 of the BSW degree and a high level of academic performance. In addition, honours students must enrol in all BSW Year 4 units except Diversity in Social Work Practice and Fields of Practice B. This unit represents one semester of a yearlong program and must be taken in conjunction with SWP4HOA.

Available only to BSW Honours students.

In this unit the major tasks for honours students is the completion, under supervision, of an honours research thesis of 10,000-12,000 words that addresses a meaningful research question. Please note that this unit is to be undertaken with SWP4HOA.

Prerequisite: SWP4HOA.

Class requirements: Four 2-hour seminars in semester 2 and attendance at regular thesis supervision sessions as required by the supervisor.

This unit is not available for Study Abroad students.

Assessment: One 10,000-12,000-word thesis (100%). This assessment is taken in conjunction with that of SWP4HOA.

Recommended Reading:

Bryman A. *Social research methods*. 2nd edn. Oxford University Press, 2004.

SWP4IFG SOCIAL WORK PRACTICE WITH INDIVIDUALS, FAMILIES AND GROUPS B (20 CPs Sem. TE-SEM-1 AW, BE, BU, MI.) AW: Ms Virginia Mansel Lees, BE: Dr TBA, BU: Dr Noel Renouf, MI: Ms Paula Bruce
In this unit, the aim is to build on the content of SWP3IFG and to

develop for students a more advanced level of knowledge, values and skill in relation to social work practice with individuals, families and groups. In addition, there will be coverage of key areas of contemporary practice such as case management, multi-cultural service users and the tension between structural and post-structural perspectives. Throughout, this unit encourages active participation in skills training using role-plays, value clarification exercises, exploring social and personal assumptions, as well as developing an awareness of the relationship between social and personal issues. The expected outcome for this unit is the achievement of a level of competence in social work practice sufficient for entry into the final supervised fieldwork placement.

Prerequisite: SWP3IFG, SWP3FEA.

Class requirements: Two 1-hour lectures and one 3-hour seminar per week.

Assessment: One 1000-word essay (20%), one major 2000-word critical reflection (35%), one 1500-word follow-on case study (25%), simulated casework interviews equivalent to a 20-minute verbal presentation (20%). Hurdle requirement: students must obtain a pass standard in the simulate casework interviews and attend 80% of seminars/tutorials in order to obtain a pass in this unit.

SWP4SPP SOCIAL POLICY AND PRACTICE B (20 CPs Sem. TE-SEM-1 AW, BE, BU, MI.) AW: Dr Guinever Threlkeld, BE: Ms Di Cox, BU: Professor Allan Borowski, MI: Ms Paula Bruce

In this unit students are enabled to be policy practitioners through the development of skills and knowledge about how the social policy contexts affects social work practice and how to intervene effectively in the policy process. It introduces students to the meaning of social policy and its concepts and frameworks for understanding and developing policies. This unit covers material about the welfare state, how it operates in Australia and in other countries and how it is changing.

Class requirements: Three 1-hour lectures per week for 13 weeks and one 1-hour tutorial per week for 10 weeks.

Assessment: One 2500-word essay (40%), one 3500-word essay (60%).

Programs of the Faculty of Humanities and Social Sciences

Bachelor of Arts (HUSBAW)

The Faculty of Humanities and Social Sciences offers the Bachelor of Arts at the University Drive, Wodonga campus. This course involves completion of units giving a total of 360 credit points, normally over three years of full-time study or the part-time equivalent. Units from several different disciplines are offered by the faculty. These are

currently: Asian studies, English, history, philosophy, social sciences, sociology and theatre and drama. Students may take a limited number of units from disciplines outside the faculty including business, education, environmental management and ecology, psychology and social welfare. Some units may be offered through flexible delivery mode. Enquiries of a general nature about the course may be directed to Ms Jenni Carter, tel: (02) 6024 9827.

Course structure

To qualify for the Bachelor of Arts degree students must complete 360 credit points, 120 credit points at each year level. This normally means eight first year units, six second year units and six third year units.

These units must include either:

- A major of 130 credit points in a single discipline offered by the faculty, or in combined disciplines to constitute a social sciences major. A major consists of two units at first year level, two units at second year level and three units at third year level in the discipline or combined disciplines. The remaining credit points can be chosen from other disciplines.

Or

- A double major of 130 credit points in each of two different disciplines offered by the faculty. A double major consists of two units at first year level, two units at second year level and three units at third year level in each discipline or area of study. The remaining credit points can be chosen from other disciplines.

The units chosen should be such that:

- there are no more than 135 credit points of units at first year level
- there are no more than 30 credit points in any area in first year and
- no more than two units at each year level are taken from units offered outside the faculty.

On completing the course of study, which would lead to the award of the Bachelor of Arts, students may be eligible for entry into the program for the Bachelor of Arts with Honours. Enquiries about eligibility and potential study programs should be directed to the Head of the relevant School in the Faculty of Humanities and Social Sciences.

The following units are available at Albury-Wodonga for students entering the Bachelor of Arts.

First year (15 credit points)

Teaching period	Unit title	Unit code

ARHIAGR ART FROM GREECE TO THE RENAISSANCE (15 CPs Sem. TE-SEM-1 AW.) Ms Margaret Leddin

Offered subject to sufficient enrolments

In this unit we will explore the major styles in European art and architecture from ancient Greece to the Renaissance. Students will study such artists as Giotto, Raphael and Michelangelo and such buildings as the Parthenon and Chartres Cathedral. Emphasis is given to the representation, in painting and sculpture, of the human form. The unit introduces students to the methods of visual analysis and the meaning of images. Where possible, first-hand study is required of selected works available in Melbourne. Together with one or both of the other first year art history subjects, this unit serves as an introduction to second year offerings in the discipline.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 1000-word essay (25%), one 2000-word essay (50%), one 1-hour slide test (25%).

Prescribed Reading:

Fleming J and Honour, H. *A world history of art*. Laurence King, 1995.

Paoletti J and Radke, G. *Art in Renaissance Italy*. Laurence King, 2005.

Boardman J. *Greek art* Thames and Hudson, 1996.

ARHIARW ART FROM RENAISSANCE TO VAN GOGH (15 CPs Sem. TE-SEM-2 AW.) Coordinator to be advised

Offered subject to sufficient enrolments

In this unit, major movements, styles and artists in Europe from the Renaissance to the end of the nineteenth century are studied. Students will be introduced to the methods of visual analysis, to the meaning of images and to the recent theories of art. We will also consider issues of patronage, conceptions of the role of the artist and the function of art and its relationship to the market. Together with other first year art history subjects, this unit serves as an introduction to second year offerings in the discipline.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 1000-word essay (25%), one 2000-word essay (50%), one 1-hour slide test (25%).

Prescribed Reading:

ARH2AOB ART OF BYZANTIUM (20 CPs Sem. TE-SEM-1 AW, BU, MI.)

Coordinator to be advised

This unit is offered at third year level also. Offered subject to sufficient enrolments.

Beginning with art from the reign of Emperor Constantine (312–337), students will study major works of early Christian art and architecture in Constantinople and Rome, as well as in the Byzantine capitals Milan and Ravenna from c. 312–726. They will explore the different attitudes to iconoclasm in the East and in Rome before analysing Byzantine art and architecture in centres such as Hosios Lukas, Daphni and Nea Moni. They will also consider the transformation of Byzantine art in medieval Italy, in Rome, Venice and Sicily.

Prerequisite: Any first year Art History subject.

Class requirements: Fully on line subject: students listen to one 1-hour recorded and illustrated lecture, read an online presentation and engage in a discussion forum each week.

This unit is not available for Study Abroad students.

Assessment: Two 2000-word essays (80%), five 200-word short assignments (20%). Third year students are expected to show greater levels of achievement of discipline-specific skills than second year students.

Preliminary Reading:

ARH2MAM MAKING AMERICA: FROM POCAHONTAS TO JAZZ AND PROHIBITION (20 CPs Sem. TE-SEM-2 AW, BU.) *Dr Diane Kirkby*

This unit is offered at third year level also.

How did the US produce such memorable figures as gangster Al Capone, movie-mogul Walt Disney and blues singer Billie Holiday? In this unit, we examine the intersection of art, politics and social history. Starting with the republican culture of the post-Revolutionary era, we ask what place did women; wilderness and Indians have in the 'New World' vision and manifest destiny of the new republic? How did slavery create new arts forms, lead to the Civil War and connect with feminist politics? In the wealth and power generated by industrialisation, immigration and urbanisation there existed conflict, oppression and political resistance that was the source of a uniquely dynamic modern culture shaped by race and gender.

Prerequisite: 30 credit points of first year History and/or 30 credit points of first year Art History.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 2500-word essay (40%), one short answer test (25%), one 1-hour exam (35%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

Preliminary Reading:

Woloch N. *Women and American experience*. 3rd edn. McGraw Hill, 2000.

ARH2MEU MEDIEVAL EUROPE C 600–C 1200 (20 CPs Sem. TE-SEM-2 AW, BU, MI.) *Coordinator to be advised*

This unit is offered at third year level also. Offered subject to sufficient enrolments.

This subject is only available as a fully online subject.

In this unit students consider the art and architecture of Europe in the Middle Ages starting in the Dark Ages, when the Roman Empire had declined, in the face of barbarian invasions. We analyse selected examples of the art of these barbarian peoples. The career of Gregory

the Great spans the end of the ancient Roman world and the early middle Ages. The rise of Islam in the seventh century led to the Muslim conquest of Spain and the subsequent campaigns of reconquest. From the tenth century the pilgrimage to Santiago de Compostela was most popular. The monks of Cluny promoted the pilgrimage. Students will look in detail at the Romanesque and early Gothic art and architecture to be found along the pilgrim routes through France and Spain and at the art and architecture associated with monasteries.

Prerequisite: 15 credit points of first year art history or coordinators approval.

Class requirements: Students complete the equivalent of thirteen 3-hour sessions online via WebCT. This includes one presentation and one lecture online each week, with fortnightly exercises.

Assessment: Two 2000-word essays (80%), five online exercises (1000 words equivalent) (20%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

ASTIICI INTRODUCTION TO ASIA: CHINA AND INDIA (15 CPs Sem. TE-SEM-2 AW, BU.) *Dr James Leibold*

Successful completion of this unit may be counted towards first year requirements for Asian studies, politics, sociology and anthropology. In this unit students are introduced to India and China. To ensure a systematic approach, we focus on how countries are run (government) how people connect with each other (society) and how people perceive themselves and how outsiders perceive them (culture) The unit is both contemporary and historical. We examine pre-European history, the arrival and ejection of European imperialists and the condition of these countries today. With ASTIICI, the unit prepares students for more detailed study of Asia and for further study in Politics, History, Sociology and Anthropology. It provides sound background for the study of Asian languages.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Tutorial-based tasks (500 words equivalent) (15%), one 500-word exercise (15%), one 1500-word essay (35%), one 1.5-hour final examination (35%).

Recommended Reading:

ASTIICI INTRODUCTION TO ASIA: JAPAN AND INDONESIA (15 CPs Sem. TE-SEM-1 AW, BU, MI.) *Dr Kaori Okano*

Successful completion of this unit may be counted towards first year requirements for Asian studies, politics, sociology and anthropology. Students are introduced to two of Australia's Asian neighbours, Japan and Indonesia. To ensure a systematic approach, we focus on how countries are run (government), how people connect with each other (society) and how people perceive themselves and how outsiders perceive them (culture). The unit is both contemporary and historical. We examine pre-European history, the impact of European imperialists and the condition of these countries today. With ASTIICI, students are prepared for more detailed study of Asia and for further study in Politics, History, Sociology and Anthropology. They are provided with a sound background for the study of Asian languages. A required workbook of readings may be purchased from the University Bookshop and is also available from the Library.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: Tutorial exercises (500-word equivalent) (15%), one 500-word exercise (15%), one 1500-word essay (35%), one 1.5-hour final examination (35%).

Recommended Reading:

Cribb R and Brown C. *Modern Indonesia: a history since 1945* Longman, 1995.

Hunter J. *The emergence of modern Japan*. Longman, 1989.

Sugimoto Y. *An introduction to Japanese society*. Cambridge University Press, 1997.

DRA1BPB PROCESS BASED PERFORMANCE (15 CPs Sem. TE-SEM-2 AW, BU.) *Ms Meredith Rogers*

Students will engage in theatre practice and performance processes. These will involve the development of group presentations in a range of models, including group-devised performance and play script interpretation, leading to studio performance for an invited audience. This provides an introduction to foundation skills in performance, theatre production, performance-audience interactions, group-devised scripts, design and technical operation. Students will be expected to analyse and write about the elements of professional theatre productions that correspond with their own production work through theatre reviewing.

Recommended Prior Studies: DRA1TKP.

Quota: 100. Implementation based on assessment in DRA1TKP

Class requirements: Two 2-hour workshops.

Assessment: One group-devised performance (20 minutes) and two performed studio exercises (each 15 minutes) (80%), one 800-word review of professional productions (20%).

Preliminary Reading:

Oddey A. *Devising theatre*. Routledge, 1994.

DRA1TKP THEATRE KNOWLEDGES AND PRACTICE (15 CPs Sem. TE-SEM-1 AW, BU.) *Professor Peta Tait*

In this unit, students are introduced to theatre and its knowledges, acting theory, theatre history and dramatic criticism. Studies of the actor, director, playwright and critic and their work in theatre companies, will be approached using well-known examples from twentieth-century theatre history and practice. Knowledges of theatre involve understanding its dynamic and interactive processes and the considerable changes in professional roles over time. While the focus is on the dominant forms of modern Western theatre, consideration will be given to challenges from the innovative work of contemporary Australian and overseas practitioners.

Class requirements: One 1-hour lecture and one 2-hour seminar/workshop.

Assessment: One 800-word short written exercise (20%), one 2000-word essay (50%), contribution to practical class work (10%), one group research presentation (800 words equivalent) (20%).

Preliminary Reading:

Hodge A. *Twentieth century actor training*. Routledge, 1999.

DRA2AUD AUSTRALIAN DRAMA FROM 1955 TO THE PRESENT DAY

(20 CPs Sem. TE-SEM-1 AW, BU.) *Mr Geoffrey Milne*

This unit is offered at third year level also.

This is a study of the development of Australian drama and theatre over the last 40 years, in the context of past and current policy and practice in the professional theatre. Students are engaged upon course work based on a representative selection of texts from the period and Australian plays in performance.

Prerequisite: 30 credit points of first year drama.

Quota: 30. Places are allocated on academic merit, with preference being given to third year students majoring in Drama.

Class requirements: One 2-hour lecture or seminar and one 3-hour workshop per week. Students are expected to attend a number of theatre performances in Melbourne during the year.

Assessment: One 1500-word performance review exercise (30%), one seminar presentation (2000 words equivalent) (40%), practical class work contributions (30%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Preliminary Reading:

DRA2PEM PERFORMANCE MAKING (20 CPs Sem. TE-SEM-2 AW, BU.) *Ms Meredith Rogers*

In this unit students develop and enhance skills in performance and performance making. Class-work covers aspects of voice, movement and improvisation. Students generate performance text based on some of the following: music-theatre, visual and design-based performance work, physical transformational performance techniques and the study of a range of performance languages. There are public performances at the end of semester.

Prerequisite: 30 credit points of first year drama.

Quota: 20 Places will be allocated on the basis of lecturers' recommendations and audition and interview in first semester.

Class requirements: Two 3-hour practical workshops per week.

Assessment: Logbook and 1500-word exercise (33%), Workshop and rehearsal toward group public performance (50 minutes maximum) (67%). The criteria used in assessing practical work are set out in the unit study guide.

DRA3APM ADVANCED PERFORMANCE MAKING (20 CPs Sem. TE-SEM-2 AW, BU.) *Ms Meredith Rogers*

This unit is aimed specifically at students interested in directing for the theatre and is intended to develop and extend the skills in performance making acquired through DRA2PEM by giving students the opportunity for individual, self-directed work. In this sense it is similar to an independent studies program. Students undertaking the unit research, devise and present solo or small group performance pieces. Students wishing to take this unit must have demonstrated a capacity for independent creative work. A project proposal must be submitted in the last week of semester one and a contract negotiated with the coordinator before the commencement of the second semester. There will be public performances at the end of semester.

Prerequisite: DRA2PEM or equivalent.

Quota: 10. Places will be allocated on the basis of lecturers' recommendations and interview.

Class requirements: Three 2-hour practical workshops per week, plus weekly consultations with the coordinator.

Assessment: Log book and 1500-word exercise (33%), Workshop and rehearsal toward group public performance (30 minutes maximum) (67%). The criteria used in assessing practical and performance work are set out in the unit study guide.

DRA3PRO DRAMA PROJECT: GROUP PRODUCTION OR INDIVIDUAL RESEARCH (20 CPs Sem. TE-SEM-2 AW, BU.) *Mr Geoffrey Milne*

In this unit students develop and complete a full-length group production based on an existing contemporary Australian drama script and assume the roles associated with the professional theatre industry. Students will perform for a public audience either on campus or in the community. Alternatively, students may undertake a research project into the work of one or more Australian dramatists.

Prerequisite: DRA2/3AUD.

Quota: 24. Selection based on academic merit and interview.

Class requirements: Two 3-hour workshops per week plus regular meetings with staff and public performances.

Assessment: Consistent, inventive and cooperative effort towards rehearsals and production tasks (35%), one 1500-word log-book and project report (30%), clarity, consistency and expressiveness in performance (35%). The criteria used in assessing the production work are outlined in the subject's handout.

ENG1TCV TEXT, CRITICISM AND THE VISUAL (15 CPs Sem. TE-SEM-2 AW, BU, MI.) *Professor Sue Thomas*

Students study a range of novels and plays, together with film adaptations of them. Topics covered in discussions include the ways texts tell stories and present personality, gender and genre, issues of representation in contemporary culture and what might be meant by describing some of the texts and films as 'popular' and some as 'classic'. The films will be studied as interpretations of literary texts. Prescribed texts must be purchased before the beginning of the semester.

Class requirements: One 1-hour lecture and one 1-hour tutorial per week and six 2-hour film screenings.

Assessment: One 1500-word essay (35%), one 1500-word essay (35%), class tests (1000 words equivalent) (30%).

Prescribed Reading:

Fest J. *Inside Hitler's bunker*. Macmillan Paperback.

James H. *Washington Square*. Penguin.

Leonard E. *Rum Punch*. Penguin.

Melville H. *Billy Budd and other stories*. Pearson.

Shakespeare W. *Richard III*. Any edn.

ENG1TOT TEXTS OVER TIME: INTRODUCTION TO LITERATURE (15 CPs Sem. TE-SEM-1 AW, BU, MI.) *Mr Chris Palmer*

This unit is an introduction to the discussion and analysis of a range of literary texts, including plays, poems and novels. Its aim is to develop awareness of the possibilities of constructing meaning and significance in texts. In addition to the set texts, there will be a subject reader for poetry.

Class requirements: One 1-hour lecture, one 1-hour online workshop and one 1-hour tutorial per week.

Assessment: Two 1500-word essays (80%), tutorial exercises (1000 words equivalent) (20%).

Prescribed Reading:

Atwood M. *Alias Grace*. Virago.

Conrad J. *Heart of darkness*. Norton.

Austen J. *Mansfield Park*. Penguin.

Shakespeare W. *The merchant of Venice*. Penguin.

Fugard A. *The township plays – the Island*. Oxford.

ENG2BAR BRITISH AND AMERICAN ROMANTICISM (20 CPs Sem. TE-SEM-1 AW, BU, MI.) *Dr Iain Topliss*

This unit is offered at third year level also.

In this unit we an introduction to poetry of the period 1790–1870, from William Blake to Emily Dickinson. Emphasis is placed on close reading of poems. Classes give attention to the social, religious and political context. The poets' own critical writings are considered along with contemporary and academic criticism.

Prerequisite: 30 credit points of first year English.

Class requirements: One 1-hour lecture or seminar per week and one 2-hour tutorial per week.

Assessment: One 2000-word exercise (40%), one 3000-word essay (60%).

Prescribed Reading:

Wu D (ed.). *Romanticism: an anthology*. Blackwell, 2005.

ENG2CAN CONTEMPORARY AUSTRALIAN NOVELS (20 CPs Sem. TE-SEM-2 AW.) *Dr Damien Barlow*

This unit is offered at third year level also.

In this unit students will explore contemporary Australian novels from the 1990s and the present day. First, we will consider the way contemporary Australian fiction seems preoccupied with rewriting or engaging with issues in Australian history through the popularity of the historical novel. Second, students will explore novels that focus on the urban environment, especially the ways in which Melbourne, Sydney and Brisbane are fictionalised. Students will also be asked to consider the ways contemporary Australian novels critically engage with themes concerning nationality, identity, race, ethnicity, gender, sexuality and class.

Prerequisite: 30 credit points of first year English or Coordinator's approval.

Class requirements: One 1-hour lecture and one 2-hour seminar per week.

Assessment: One 1500-word essay (30%), one 500-word class paper/oral presentation (10%), one 3000-word essay (60%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

Prescribed Reading:

Castro B. *The garden book*. Giramondo, 2005.

Jones G. *Sixty lights*. Vintage 2004.

Malouf D. *Remembering Babylon* Vintage, 1993.

Porter D. *The monkey's mask*. Hyland House, 1994.

Tiffany C. *Everyman's rules for scientific living*. Picador, 2005.

Tsiolkas C. *Loaded*. Vintage, 1995.

Wright A. *Plains of promise*. UQ Press, 1997.

ENG2SAC SHAKESPEARE AND CONTEMPORARIES (20 CPs Sem. TE-SEM-2 AW, BU, MI.) *Mr Chris Palmer*

This unit is offered at third year level also.

A study of various forms of tragedy and tragi-comedy in Shakespeare and the drama of his age. Discussion of these plays will also give attention to their historical context, their importance at the present time and to current critical approaches.

Prerequisite: 30 credit points of first year English.

Class requirements: One 1-hour tutorial and one 2-hour lecture/seminar per week.

Assessment: One 2000-word essay (40%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students, one 2000-word essay (40%), one 1000-word exercise (20%).

Prescribed Reading:

Marlowe C. *Doctor Faustus*. Oxford.

Salgado. (ed.) *Three Jacobean Tragedies*. Penguin.

Shakespeare W. *Hamlet*. Everyman.

Shakespeare W. *Macbeth*. Oxford.

Shakespeare W. *Measure for measure*. Penguin.

HIS1AHC AUSTRALIAN HISTORY: COLONIAL (15 CPs Sem. TE-SEM-1 AW.)

Dr Susan Gilbert

Is Australian society distinctive? Russel Ward's classic book, *The Australian Legend* (1958), stresses the importance of the Australian environment and settlement patterns in laying the foundations of Australian identity. But what does Ward overlook? We will also consider the migrants and the ideologies and culture they brought, the continuing connections with the outside world and the processes by which a new Australian identity emerged as settlers defined themselves in relation to the Aborigines they had displaced and the mother country they had left.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Two 30-minute tests (30%), one 1000 word exercise (30%), one 2000 word essay (40%).

Prescribed Reading:

Ward R. *The Australian legend*. Oxford University Press, (any year).

HIS1MEB MODERN EUROPE B: THE TWENTIETH CENTURY (15 CPs Sem. TE-SEM-2 AW, BU, MI.) *BU: Dr Philip Bull, BU: Dr Adrian Jones*

In this unit, students study the turbulent twentieth century in Europe, beginning with the industrial, national and imperial rivalries, which culminated in the First World War. The revolutions and revolutionary pressures, which arose out of that war, are examined as a background to the emergence of the ideologies of Fascism and Communism and the totalitarian regimes of Nazism and Stalinism. Post-war European prosperity and integration and the collapse of Communism are studied. Through this unit, students will gain a deeper understanding of the crises, which have characterised European history in the twentieth century.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Essay/exercises (2000 words equivalent) (60%), one 2-hour examination (40%). Alternatively, students may choose to reverse the percentage weightings of the two assessment components.

Preliminary Reading:

Joll J. *Europe since 1870: an international history*. 4th edn. Penguin, 1990.

Thomson D. *Europe since Napoleon*. Penguin, 1966.
Wiskemann E. *Europe of the dictators, 1919–1945* Fontana, 1966.

Prescribed Reading:

Derfler L and Kollander P. *An age of conflict*. 3rd edn. Harcourt Brace, 2002.

HIS2CHA COMMUNITY AND HISTORY IN AUSTRALIA (20 CPs Sem. TE-SEM-2 AW.) *Dr Susan Gilbert*

This unit is offered at third year level also.

Not available in 2008

HIS2EUU THE EUROPEAN UNION (20 CPs Sem. TE-SEM-1 AW, BE, BU, MI.)

BU: Dr Stefan Auer, BU: Dr Philip Bull, BU: Dr Anthony Jarvis

This unit is offered at third year level also.

Within the history of the integration process and with a particular focus on the European Union (EU), students will evaluate the extent to which integration has changed the lives of citizens and relations between nation-states in Europe; critique EU policies and processes; analyse the EU's role as an international actor; and apply insights derived from integration theory. The lecture program for the unit will capitalise on the availability in Australia of many experts associated with the EU and its institutions, as well as providing more general contextual lectures on its history, functioning and place in the contemporary world. Tutorials will be focused on ensuring that students develop an adequate understanding of how the EU functions, its relationships with member nations and the ways in which it is important to the rest of the world, including Australia.

Prerequisite: Any first year history or politics subject.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One seminar presentation (equivalent 500 words) (10%), two WebCT quizzes (10%), one 2000-word research essay (40%), one 2-hour examination (40%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

Recommended Reading:

Cini M (ed). *European Union politics*. 2nd edn. OUP, 2003.

HIS2GAH GENOCIDES AND THE HOLOCAUST: EUROPE, ASIA, AFRICA

(20 CPs Sem. TE-SEM-2 AW, BU.) *Dr Shannon Woodcock*

This unit is offered at third year level also.

In this unit, students examine the origins, course and consequences of the Nazi Holocaust in Europe, together with genocidal conflicts in Asia (Cambodia), Europe (former Yugoslavia) and Africa (Rwanda 1959 to 1997). Questions discussed include: In what ways was the Nazi Holocaust unique? Are genocides and holocausts different phenomena? How does gender influence genocide? In the Holocaust and genocides who were the victims and who were the perpetrators? Were perpetrators significantly different from 'ordinary' citizens? How are genocides remembered in film, testimonies and in public monuments? We will draw on case studies of concentration camp life, autobiographical and testimonial literature and pictorial and cinematic representations.

Prerequisite: 30 credit points of first year History.

Class requirements: One 1-hour lecture and one 2-hour workshop per week.

Assessment: Ten reading control tests (1000 words equivalent) (20%), one 1500-word bibliographical exercise (30%), one 2500-word research essay (50%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

Preliminary Reading:

Browning C. *Ordinary men*. Harper Perennial, 1993.

HIS2LWC LIVING WITH COLONIALISM: RESISTANCE AND

ACCOMMODATION (20 CPs Sem. TE-SEM-2 AW, BU.) *Dr Tracey*

Banivanua-Mar

This unit is offered at third year level also.

In this unit students will examine the nature of resistance and accommodation in the late colonial era. With a concentration on movements in Australia, New Zealand and the islands of the Pacific during the twentieth century, we look at such ambiguously resistant cultural movements as 'cargo-cults' and millenarian movements; expressions of protest in music, sport, theatre or dance; the emergence of nationalism and other local and transnational social movements;

and the impact of civil wars. We will span a period from the beginning of the twentieth century and the post-war decline of colonialism, to the long era of decolonisation, neo-colonialism and the entrenchment of international relations of dependency. Students will critique the meanings of 'resistance', 'accommodation' and 'decolonisation'. They will gain access to perspectives of Indigenous peoples and will examine the philosophies and theories that accompanied the rise of local and global indigenous rights movements.

Prerequisite: 30 credit points of first year history.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 1500-word critical essay (30%), one 3000-word research essay (50%), tutorial and/or WebCT-based exercises (500 words equivalent) (20%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

Preliminary Reading:

Denoon, D., Mein Smith P, Wyndham M. *A history of Australia, New Zealand and the Pacific*. Blackwell, 2000.

PHI1CRT CRITICAL THINKING (15 CPs Sem. TE-SEM-2 AW, BU, MI.) *Dr*

Norva Y.S. Lo

PHI1CRT semester two is taught entirely online. There will be one 90-minute mediated online discussion per week plus learning activities as specified online (equivalent to 90-minutes attendance per week). For more information contact the unit Coordinator or visit www.latrobe.edu.au/philosophy/resources ug/handout_crt.html Thinking and reasoning are essential components of human life. But much of our thinking and reasoning is biased, distorted and uninformed. Yet the quality of our life and that of what we produce, make or build depends precisely on the quality of our thoughts and reasons. In this unit, you will learn how to reason well, to think clearly and independently and also to engage fairly with others in discussions and debates. Many students find the experience gained in this unit immensely valuable, both within the University and later in employment whatever their subsequent areas of specialisation.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 3-hour examination (55%), three short exercises (2000 words equivalent) (45%).

Prescribed Reading:

Phillips R and Oakley T. *Reason and argument*. Monash, 1996.

PHI1FMV FREEDOM, MIND AND HUMAN NATURE (15 CPs Sem. TE-SEM-1 AW, BU.) *Dr Toulia Nicolacopoulos*

In this unit we explore three big questions: What am I? Am I free to make choices? How should justice figure in my life? We turn to Rene Descartes whose work is famously linked to the origins of the Enlightenment project. He ascribes to humans very special powers of mind on which we base a scientific understanding of the world. This raises questions about our relationship to deterministic physical reality. Are we as much slaves of physical causes and effects as other things in the universe? Might a genius at physics or a smart computer predict all our behaviours? If so, can we be said to be free? We address this intriguing question in the second part of the unit. The idea that we are self-directing and should live free of others' unjust interferences is central to Western liberal democracies. But what do we mean by 'justice'? The final part of the unit focuses on some major Western thinkers like Mill, Marx and Foucault to ask whether our human nature makes justice a universal value.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 550-word essay (15%), one 1200-word essay (30%), one 1-hour essay exam (30%), one 1-hour short answer exam (20%), one 250-word exercise (5%).

Preliminary Reading:

Phillips R and Oakley T. *Reason and argument*. 2nd ed. Monash Distance Education Centre, 1996.

Prescribed Reading:

Descartes R. *'Meditations' in Discourse on methods and meditations*. Dover Philosophical Classics, 2003.

PHI1TAS EXISTENCE, VALUE AND GOD (15 CPs Sem. TE-SEM-2 AW, BU.)

Dr Philipa Rothfield

Dostoevsky famously wrote: If God does not exist, then everything is permitted. What are we to make of this? Jean-Paul Sartre stated that we are abandoned in the sense that there is no God to tell us what to do. Humans create their own sense of right and wrong through their actions, through exercising an inherent freedom. Some ethical theories would dispute this, suggesting that notions of right and wrong have an objective status independent of individuals' upbringing or cultural background. Can we even ask these questions without determining whether there is a God who oversees issues of right and wrong, good and evil? This unit will progress from questions of life and freedom, towards ethical responsibility and the ultimate issue of whether or not God exists.

Class requirements: Two 2-hour lectures and one 1-hour tutorial per week.

Assessment: One 1200-word essay (30%), one 800-word essay (20%), one 1-hour examination (30%), one 1-hour short answer exam (20%).

Preliminary Reading:Feinberg J. *Social philosophy*. Prentice-Hall, 1973.**PHI2PAM PLATO AND THE MEANING OF BEING** (20 CPs Sem. TE-SEM-2

AW.) Dr George Vassilacopoulos, Dr Toulia Nicolacopoulos

This unit is offered at third year level also.

It has been said that all Western philosophy is a footnote to Plato. In his masterpiece *The Republic*, Plato addresses some of the most fundamental questions of human existence – what is it to be? What is the place of human beings in the world? What does it mean to know? What is the nature of reality? Surprisingly, Plato's strategy is to invite us to participate, along with his teacher Socrates, in a thought experiment aimed at designing a just society. In the process of asking what justice is we discover answers to the meaning and conditions of our being in the cosmos. In this unit, we will follow Plato's philosophical journey and trace some connections between his ideas, contemporary feminist thought and the philosophies of Hegel, Heidegger and Derrida.

Prerequisites: 30 Credit points of Philosophy

Class requirements: One 2-hour seminar and one 1-hour tutorial per week.

Assessment: One 2500-word essay (50%), one 2500-word essay or one 2.5-hour examination (50%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Prescribed reading:Plato. *The Republic*. any edition.**PHI2HUR HUMAN RIGHTS: FUNDAMENTAL ISSUES** (20 CPs Sem. TE-

SEM-1 AW.) Dr Janna Thompson

This unit is offered at third year level also.

In this unit we examine the philosophical issues raised by human rights. In the first part we look at the theory of rights and consider what sort of thing a right is, what it means to claim one's rights and have them protected, whether they should be justified by an appeal to an agency, basic needs or human flourishing and whether they can be adopted by people of non-Western cultures. In the second part of the unit we examine the meaning justification and application of particular rights claims and consider what rights ought to be regarded as basic and whether some appeals to rights can be dismissed as illegitimate. We will investigate the controversies over the meaning of particular rights such as – the right to liberty, free speech, privacy and the right to subsistence. We will discuss communitarian and feminist criticisms of human rights and problems of applying theories of rights to minority or disadvantaged groups.

Prerequisite: Any first year philosophy unit

Class requirements: One 2-hour lecture/seminar and one 1-hour tutorial per week

Assessment: One 2000-word essay (40%), one 2500-word essay (50%), one 500-word tutorial assignment (10%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Preliminary Reading:Jones P. *Rights* St Martins, 1994. Orend B. *Human rights: concept and context*. Broadview Press, 2002.**Recommended Reading:**Nickel J *Making sense of human rights*. University of California Press, 1987.Shue H *Basic Rights: subsistence, affluence and US foreign policy*. 2nd edn. Princeton University Press, 1996.Waldron, J (Ed) *Theories of rights*. Oxford University Press, 1984.Shute S and Hurley S (Eds). *On human rights*. Basic Books, 1993.**POL2CAP CONTEMPORARY AUSTRALIAN POLITICS AND PUBLIC**

POLICY (20 CPs Sem. TE-SEM-1 AW, BU.) Professor Judith Brett

This unit is offered at third year level also.

In this unit we focus on Australian politics and public policy since 1983, in particular the issues arising from changed ideas about the role of government and radical changes to the organisation of the economy. Topics covered will include: the restructuring of the Australian economy; employment policy and welfare reform; the varying fates of the parties; the reform of the public sector and the new public management; regional and rural politics; federalism; and environmental politics. Tutorials and assessment focus on the development of skills in the research and analysis of policy issues and conflicts in contemporary Australian politics. While not all students will have done POL1RAP or POL1AUP, prior knowledge of the institutional structure of Australian politics is assumed.

Prerequisite: 30 credit points from first year politics, AST11JI, AST11CI, or unit Coordinator's approval.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 1500-word research assignment (30%), one 2000-word research essay (40%), one 1.5-hour examination (30%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students

Preliminary Reading:Smyth P and Cass B (Eds). *Contesting the Australian way: states, markets and civil society*. Cambridge University Press, 1998.Macfarlane I. *The search for stability*. Boyer Lectures ABC Books, 2006.**Prescribed Reading:**Fenna A. *Introduction to Australian public policy*. 2nd ed. Longman, 2004.**POL2NAS NATIONS AND STATES** (20 CPs Sem. TE-SEM-2 AW, BU.) AW: Dr

David Envall, BU: Professor Judith Brett, BU: Professor John

Fitzgerald, BU: Dr James Leibold, BU: Professor Robert Manne

This unit is offered at third year level also.

Students are introduced to fundamental questions in the study of politics. What is a state? What is a nation? What are the origins of nationalism? Students examine how state building and industrialisation have influenced the formation of national identity and how nationalist movements and international factors have influenced the formation of states. In this unit, we draw on at least two case studies, selected from European, Asian and Australian examples and link the case studies to theoretical discussion of states and nationhood. This unit is particularly recommended for students in second year.

Prerequisite: 30 credit points from first year politics, AST11JI, AST11CI, or approval of the unit Coordinator.

Class requirements: Two 1-hour lectures per week and one 1-hour tutorial per week.

Assessment: One 1000-word assignment (20%), one 2000-word research essay (40%), one 1.5-hour sighted examination (30%), tutorial exercises (10%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

SOC1ISA INTRODUCTION TO SOCIOLOGY A (15 CPs Sem. TE-SEM-1 AW.)*Dr Pauline Savy*

In this students are introduced to the study of contemporary society, its social constitution through structures, processes and everyday practices. The unit is organised around three main areas of study: the sociological perspective, self-identity in modern society and the practices and regulation of everyday social life. The first module introduces sociology as a field of study distinguished by particular approaches to understanding the world. In the second module we examine the social nature of selfhood and identity within topics such as family, gender and ethnicity. The third module dwells on the order and regulation of social life as it is lived and experienced in situations everyday.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 500-word written assignment (15%), one 2000-word essay (50%), one 1.5-hour examination (35%).

Prescribed Reading:

Holmes D, Hughes K and Julian R *Australian Sociology: a changing society*. Pearson Longman, 2003.

SOC1ISB INTRODUCTION TO SOCIOLOGY B (15 CPs Sem. TE-SEM-2 AW.)*Ms Pam Wallace*

This unit follows on from Introduction to Sociology A. Students are introduced to contemporary Australian society, subject to both global forces and local issues. Basic sociological concepts and methodologies are applied to explain social order and divisions in Australian society – its regions, cities and institutions – and beyond. The unit is organised around the following themes: societal change and globalisation; inequalities, poverty and wealth; power, politics and protest.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 500-word written assignment (15%), one 2000-word major essay (50%), one 1.5-hour examination (35%).

Prescribed Reading:

Holmes D, Hughes K and Julian R. *Australian Sociology: a changing society*. Pearson Longman, 2003.

SOC2CAI CLASS AND INEQUALITY (20 CPs Sem. TE-SEM-1 AW.) *Ms**Pamela Wallace*

This unit is offered at third year level also.

Not available in 2008

SOC2MSR INTRODUCTION TO SOCIAL RESEARCH METHODS (20 CPs Sem. TE-SEM-1 AW, BU.) *Professor Evan Willis BU, Ms Pamela Wallace AW*

This unit is offered at third year level also.

Students are introduced to a range of current methods of social inquiry. These include both quantitative and qualitative research methods such as surveys, interviews, observation, content analysis, the analysis of historical and policy documents and records and other unobtrusive methods. The objective is for students to become familiar with these techniques and to gain some understanding of when best to employ particular strategies while being aware of strengths and weaknesses of each approach.

Prerequisite: 30 credit points of first year sociology or anthropology, or AST1IJI and AST1ICI, or unit Coordinator's approval.

Class requirements: One 2-hour lecture per week and one 2-hour workshop per fortnight. A portion of the lecture material may be given in block mode.

Assessment: One 1500-word research essay (25%), one 2000-word research proposal (50%), one 1.5-hour end of semester class test (25%). Third year students are expected to show a higher level of discipline-specific skills in their written work than second year students.

Prescribed Reading:

Bryman A. *Social research methods*. 2nd edn. OUP, 2004.

SOC2RUS RURAL SOCIOLOGY (20 CPs Sem. TE-SEM-2 AW.) *Dr Brian**Furze*

This unit is offered at third year level also.

Not available in 2008

SOC2SCH SOCIAL CHANGE IN RURAL AND REGIONAL COMMUNITIES(20 CPs Sem. TE-SEM-2 AW.) *Mr Brian Furze*

This unit is offered at third year level also.

In this unit students are introduced to the study of community life and the relevance of community studies in understanding processes of rural social change and regional development. Theoretical perspectives on community are introduced along with approaches to the study of community life. These theoretical and methodological insights are applied to the analysis of change in rural and regional areas through such topics as class, gender, race, ethnicity, marginality and socio-economic power in rural communities. Students will develop an understanding of the micro-level effects of social, economic and political changes occurring in rural and regional areas.

Prerequisite: SOC1IISA.

Class requirements: One 3-hour workshop per week.

This unit is not available for Study Abroad students.

Assessment: One 1000-word tutorial paper (25%), one 3000-word research essay (50%), one 1000-word reflective essay (25%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

SOC2SED SOCIOLOGY OF EDUCATION (20 CPs Sem. TE-SEM-1 AW.) *Ms**Pamela Wallace*

This unit is offered at third year level also.

In this unit students are introduced to the sociological study of education and its role in contemporary society. Themes to be examined include the sources of change in education; the organisational contexts of educational institutes/schools; the impact of education on 'life chances'; the relationships between the educational system and other social institutions such as the workplace and the family; and policy implications of current debates and research.

Prerequisite: 30 credit points of first year sociology subjects.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

This unit is not available for Study Abroad students.

Assessment: One 2000-word research paper (40%), one 1000-word paper (20%), one 2-hour examination (40%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

Prescribed Reading:

SOC2SEM SOCIOLOGY OF EMOTIONS (20 CPs Sem. TE-SEM-2 AW.) *Ms**Pauline Savy*

This unit is offered at third year level also.

Not available in 2008

SOC2SHI SOCIOLOGY OF HEALTH AND ILLNESS (20 CPs Sem. TE-SEM-2AW, BU.) *AW: Ms Pauline Savy, BU: Professor Evan Willis*

This unit is offered at third year level also.

In this unit we aim to familiarise students with the sociological analysis of issues related to health and illness. We argue that health and health behaviour cannot be adequately explained by simply looking at individual, biological or environmental factors. Sociological questions about both mental and bodily health and illness concern not only the broad organisation of society but also how everyday human experience is given local and personal meaning.

Prerequisite: 30 credit points of first year sociology or anthropology or AST1IJI or AST1ICI or unit coordinator's approval.

Class requirements: One 2-hour lecture or equivalent per week and one 2-hour workshop per fortnight. A portion of the lectures may be given in block intensive mode.

Assessment: One 2000-word research essay (40%), one 2-hour examination (40%), one 1000-word tutorial presentation and paper (20%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

Prescribed Reading:

Germov J. *Second opinion: an introduction to health sociology*. Oxford University Press, 2004.

SOC2SHM SOCIOLOGY OF HEALTH AND MEDICINE (20 CPs Sem. TE-SEM-2 AW, BU.) *Professor Evan Willis*
This unit is offered at third year level also.
Not available in 2008

SOC2SOE SOCIOLOGY OF THE ENVIRONMENT (20 CPs Sem. TE-SEM-1 AW, BU.) *Dr Brian Furze*
This unit is offered at third year level also.

Students are introduced to the ways sociological knowledge can be used to understand contemporary environmental issues. In this unit we explore the state of sociological debate about the environment, how it can be used to understand contemporary environmental issues and how it can be used to intervene in existing socio-economic and political relations to develop more socially and ecologically just outcomes. Students are offered a number of specific pathways within the unit to cater for a diversity of interests and applications: environment and development; global political ecology; European environmental issues; Asian environmental issues; environmental problems as social problems. Some content in this unit may be delivered via WebCT.

Prerequisite: 30 credit points of first year sociology, politics or anthropology.

Class requirements: Albury/Wodonga: one 2-hour lecture and one 1-hour tutorial per week. Bundoora: one 4-hour seminar per fortnight and additional classes as arranged within the group.

Assessment: One 1000-word tutorial paper (20%), one 2000-word major essay, (40%), one 2-hour examination (40%). Third year students will be expected to show a greater achievement of discipline specific skills in their written work than second year students.

SOC2SOW SOCIOLOGY OF WORK (20 CPs Sem. TE-SEM-2 AW.) *Ms Pamela Wallace*
This unit is offered at third year level also.

In this unit, we aim to familiarise students with an overview of the sociological perspective on work; paid, unpaid and marginal. While students will become familiar with classical theories of work, the emphasis is on current trends in the organisation and social relations of work. We focus on three broad areas: the social organisation of work; the changing contexts and current work trends and challenges for the 21st century; and inequalities at work.

Prerequisite: 30 credit points of first year sociology.

Class requirements: One 2-hour lecture and one 2-hour tutorial per week.

Assessment: One 2000-word paper (40%), one 1000-word paper (20%), one 2-hour examination (40%). Third year students will be expected to show a greater achievement of discipline-specific skills in their written work than second year students.

Prescribed Reading:

Hodson R and Sullivan TA. *The social organisation of work*. 3rd edn. Wadsworth: Thompson, 2003.

Watson T. *Sociology, work and industry*. 4th edn. Barnes and Noble, 2003.

SOC3RST READING IN SOCIAL THEORY (20 CPs Sem. TE-SEM-1 AW.) *Dr Brian Furze*

In the first section of this unit students are familiarised with the classic works of Karl Marx, Max Weber and Emile Durkheim. Students will read a selection of the original writings, as well as contemporary interpretations of this trio. In the second section we will discuss contemporary social theorists and theories and in the third section we will apply this theoretical understanding to contemporary issues.

Prerequisite: 30 credit points of first year sociology.

Class requirements: One 3-hour session per week.

This unit is not available for Study Abroad students.

Assessment: One 3000-word paper (60%), two 1000-word papers (40%).

Programs of the Faculty of Law and Management

The School of Business offers the Bachelor of Business and the Bachelor of Commerce.

Enquiries of a general nature about these courses should be directed to the Faculty Academic Services Officer, tel: (02) 6024 9850.

Through the School of Sport, Tourism and Hospitality Management, the faculty offers the Bachelor of Business (Hospitality Management).

General information about this course may be obtained from the Faculty Academic Services Officer, tel: (02) 6024 9850.

Each of these programs is offered at the campus on University Drive. Outlines of the courses available follow.

SCHOOL OF BUSINESS

Bachelor of Business (ECBBW)

Admission requirements

Students study modern theories of management and business. Applicants must have completed VCE Units 1 and 2 General Mathematics or Mathematical Methods; Units 3 and 4 English with a study score of at least 20; NSW HSC – year-11 Maths and year-12 English. Applicants with comparable qualifications will be considered. A limited number of students may also be considered under Special Entry Schemes.

Degree requirements

Students must complete a course of units accumulating a minimum total of 360 credit points, of which at least 255 must be units offered in the School of Business. The course is designed to be completed within three years of full-time study, although part-time study is possible. Maximum course duration is ten years.

Students should undertake 120 credit points at each year level and must undertake at least 120 credit points at third year level including 90 credit points at third year level from the School of Business. Variations to this structure are subject to approval by a School of Business course adviser.

The degree is designed to allow completion of two majors or one major and elective units. At least one major must be in a business discipline. A business major will consist of eight units.

Course structure

The course is structured as follows. All units are worth 15 credit points.

Teaching period	Unit title	Unit code
TE-SEM-1	Accounting for Management Decisions	ACC1AMD
TE-SEM-1	Management Information Systems	BUS1MIS
TE-SEM-1	Microeconomics	ECO1IMI
TE-SEM-1	Elective (Major Study) Management Communications	MGT2MCB
TE-SEM-2	Introductory Statistics for Business	ECO1ISB
TE-SEM-2	Foundations of Management	MGT1FOM
TE-SEM-2	Macroeconomics	ECO1IMA
TE-SEM-2	Business Law	LST1BSL

Second year

In second year, students will focus their studies on units within their choice of major. Students must study three electives from their major study plus a further five electives.

Third year

In third year, students will again focus on units in their major. Students must study four electives from their major study plus a further four electives.

Electives

The following units are available as electives and highlight major studies within the degree program.

Management

Teaching period	Unit title	Unit code
TE-SEM-1	Management Communications	MGT2MCB
TE-SEM-1	Human Resource Management	MGT2HRM
TE-SEM-1	Organisational Behaviour	MGT2OBE
TE-SEM-1	International Business Environment	ECO3IBC
TE-SEM-1	Technology and Organisational Change	BUS3TOC
TE-SEM-2	Entrepreneurship	MGT3ENC
TE-SEM-2	Marketing Research	MKT3MRE
TE-SEM-2	Finance	FIN2FIN

Marketing

Teaching period	Unit title	Unit code
TE-SEM-1	Management Communications	MGT2MCB
TE-SEM-1	Marketing Principles and Practice	MKT2MPP
TE-SEM-1	Electronic Marketing	MKT3ELM
TE-SEM-2	Sales Management	MKT2SMB
TE-SEM-2	Consumer Behaviour	MKT2CBE
TE-SEM-2	Strategic Marketing	MKT3SMK
TE-SEM-2	International Marketing	MKT3IMK
TE-SEM-2	Marketing Research	MKT3MRE

Bachelor of Commerce (LBCW)

Admission requirements

Applicants must have completed VCE Units 3 and 4 English (any) and mathematics (any) with a minimum study score of at least 20 in each NSW HSC –year-12 English (Band 2) and mathematics. Applicants with comparable qualifications will be considered. A limited number of students may also be considered under Special Entry Schemes.

Degree requirements

To be eligible for the award of the degree students must complete units totalling 360 credit points, normally over three years of full-time study, though part-time study options are available. At least 285 credit points should be derived from units offered by the School of Business. Students must undertake no more than 120 credit points at first year level and at least 120 credit points at third year level, including a minimum of 90 credit points from the School of Business. All units are worth 15 credit points. Variations to this structure are subject to approval by a School of Business Course Adviser. The normal sequence of units undertaken by students is:

First year

Teaching period	Unit title	Unit code
TE-SEM-1	Accounting for Management Decisions	ACC1AMD
TE-SEM-1	Management Communications #	MGT2MCB #
TE-SEM-1	Management Information Systems	BUS1MIS
TE-SEM-1	Microeconomics	ECO1IMI

TE-SEM-2	Macroeconomics	ECO1IMA
TE-SEM-2	Introductory Statistics for Business	ECO1ISB
TE-SEM-2	Foundations of Management	MGT1FOM
TE-SEM-2	Business Law	LST1BSL

Second year

Teaching period	Unit title	Unit code
TE-SEM-1	Introductory Financial Accounting	ACC1IFA
TE-SEM-1	Law of Business Association	LST2LBA
TE-SEM-1	Introductory Management Accounting	ACC2IMA
TE-SEM-1	Elective	
TE-SEM-2	Finance	FIN2FIN
TE-SEM-2	Corporate Reading	ACC2CRE
TE-SEM-2	Intermediate Management Accounting	ACC2IMB
TE-SEM-2	Elective	

Third year

Teaching period	Unit title	Unit code
TE-SEM-1	Advanced Financial Accounting	ACC3AFA
TE-SEM-1	International Accounting*	ACC3IAC
TE-SEM-1	Elective	
TE-SEM-1	Elective	
TE-SEM-2	Auditing	ACC3AUD
TE-SEM-2	Taxation	ACC3TAX
TE-SEM-2	Elective	
TE-SEM-2	Elective	

Key: * This unit is not core to the Bachelor of Commerce. However, it is strongly recommended that students undertake this unit in their first year of study as it provides a useful foundation for subsequent units.

* Alternative third year accounting units may be substituted for ACC3TTX at the discretion of the Professor of Accounting.

Electives

Electives are available through the School of Business. Students must apply to the course adviser for electives offered outside of the School of Business.

SCHOOL OF SPORT, TOURISM AND HOSPITALITY MANAGEMENT

Bachelor of Business (Hospitality Management) (LBBHM)

Students study modern theories of management and business. Applicants must have completed VCE Units 1 and 2 General Mathematics or Mathematical Methods; Units 3 and 4 English with a study score of at least 20; NSW HSC – year-11 Maths and year-12 English. Applicants with comparable qualifications will be considered. A limited number of students may also be considered under Special Entry Schemes.

A Personal Profile Questionnaire, available from the Faculty Academic Services Office or at www.latrobe.edu.au/tourism/aw/ must be completed by applicants and returned by 13 November 2007 to PO Box 821, Wodonga Vic 3690. Please note this form is an essential requirement of entry. After this date, please contact the Faculty Academic Services Officer on (02) 6024 9850. On the basis of information provided, an interview may be required.

Students must complete the core and elective units with a total value of 360 credit points. This three year degree can be completed in two and a half years through the inclusion of block delivery of 'hands-on' units at La Trobe at Beechworth. All pass degree units offered by the school are worth 15 credit points.

Course structure

Information below is correct at time of printing but could be subject to change.

First year

Teaching period	Unit title	Unit code
TE-SEM-1	Food and Beverage Operations 1A*	THS1FAB
TE-SEM-1	Accounting for Management Decisions	ACC1AMD
TE-SEM-1	Management Communications	MGT2MCB
TE-SEM-1	Management Information Systems 1	BUS1MIS

TE-SEM-1	Microeconomics	ECO1IMI
TE-SEM-2	Principles of Tourism	THS2PTB
TE-SEM-2	Food and Beverage Operations 1B	THS1FOB
TE-SEM-2	Foundations of Management	MGT1FOM
TE-SEM-2	Business Law	LST1IBL
TE-SEM-2	Macroeconomics	ECO1IMA

Key: * THS1FAB block is delivered at Albury – Wodonga campus and La Trobe at Beechworth

FandB 1A: 7 – 18 July 2008

FandB 1B: 24 November – 5 December 2008

Second year

Teaching period	Unit title	Unit code
TE-SEM-S	Accommodation Management*	THS2ACM
TE-SEM-1	Tourism and Hospitality Marketing	THS2THM
TE-SEM-1	Introductory Business Statistics	ECO1ISB
TE-SEM-1	Food Services Management**	THS2FSM
TE-SEM-1	Introductory Management Accounting	ACC2IMA
TE-SEM-2	Hospitality Facilities Development and Management	THS3FDM
TE-SEM-2	Banquet and Convention Catering Management	THS2BCB
TE-SEM-2	Special Events, Conferences and Meetings	THS2SEC
TE-SEM-2	Elective	

Key: * Summer block unit will be delivered at Wodonga campus and La Trobe at Beechworth in February 2008.

** Some components of practical based unit will be delivered at La Trobe at Beechworth during second year.

TE-SEM-S = Summer block

11 – 22

February 2008

Third year

Teaching period	Unit title	Unit code
TE-SEM-1	Resort Management	THS3RMA
TE-SEM-1	Hotel Operations Management	THS3HOM
TE-SEM-1	Directed Readings in Hospitality Business Management	THS3DRH
TE-SEM-1	Human Resources Management	MGT2HRM
TE-SEM-1	One approved elective	

Electives

Teaching period	Unit title	Unit code
TE-SEM-1	Global Environment of Tourism 2	THS2GET
TE-SEM-2	Tourism and Hospitality Promotions	THS2TPB

Students may choose from electives offered by School of Business – consult course adviser.

UNIT DESCRIPTIONS

ACC1AMD ACCOUNTING FOR MANAGEMENT DECISIONS (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-1 AW, BE, BU, MI, SH. TE-SEM-2 BU. TE-SEM-S BU. TE-W13-26 NI. TE-W31-46 NI.) *Dr Liz Duncan,*

Mrs Selina Lim, Ms Kathie Stirling, Mr Petrus Usmanij,

Mrs Susan Nalder

This unit is designed to introduce undergraduate students from all disciplines to the nature of accounting and its role in business. Topics covered provide an overview of key financial and managerial accounting concepts and include: the recording of business transactions; the calculation and measurement of profit; the preparation of financial statements; the analysis and interpretation of financial statement data; cost accounting and reporting systems; and cost analysis for planning, control and decision-making.

Class requirements: Two 1-hour lecture and one 1-hour tutorial per week.

Assessment: Tutorial assessment (10%), mid-semester test (20%), one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, major assignment (30%). AW: Comprising of practical problem and report – 1000-word (equivalent), one 3-hour final examination (70%). AW: Hurdle requirement. Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass this unit.

Prescribed Reading:

Boland G. AW: *Accounting – Study Guide*.

Chambers B. AW: *Accounting Business Reporting for Decision Making*.

ACC1IFA INTRODUCTORY FINANCIAL ACCOUNTING (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TE-SEM-1 AW, BU. TE-SEM-2 BE, BU, MI, SH. TE-W13-26 NI. TE-W31-46 NI.) *Mr Greg Ellis, Mr Glenn Hill, Ms Sue Nalder*

This unit introduces students to accounting information systems, which record financial events and provide information to management. The unit begins with the accounting equation, accounting cycle, accrual accounting concepts and the preparation of financial statements. Attention is then given to application of generally accepted accounting principles and selected accounting standards to specific financial elements and transactions.

Prerequisite: ACC1AMD.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One computerised practice set (10%), one manual practice set (20%), one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, one 1/2-hour take-home examination (10%). AW: based on assignment tutorial questions, one 1-hour mid-semester test (20%). AW: One 3-hour final examination (70%). AW: Hurdle Requirement. Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit.

Prescribed Reading:

Horngren C, Harrison, Bamber, Best, Fraser, Willett AW: *Financial Accounting*. 5th edn. Pearson Education, 2006.

ACC2CRE CORPORATE REPORTING (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TE-SEM-1 BE, BU, SH. TE-SEM-2 AW, BU, MI. TE-W13-26 NI. TE-W31-46 NI.) *Dr Liz Duncan, Mr Greg Ellis, Dr Xu-Dong Ji*

This unit covers corporate financial accounting and reporting at an intermediate level. It provides students with an understanding of the corporate reporting environment in Australia and the economic implications of accounting numbers. The unit incorporates evaluation and application of selected accounting standards, as well as the preparation of corporate group financial reports which satisfy professional and regulatory requirements.

Prerequisite: ACC1IFA.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

This unit is not available for Study Abroad students.

Assessment: One 500-word assignment (15%), one 1-hour mid-semester test (15%), one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, one 30-minute mid-semester test (30%). AW and SH: One 3-Hour final examination (70%). AW and SH: Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit.

Prescribed Reading:

Deegan C. *Australian financial accounting*. 5th edn. McGraw-Hill/Irwin, 2007.

ACC2IMA INTRODUCTORY MANAGEMENT ACCOUNTING (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TE-SEM-1 AW, BE, BU, MI, SH. TE-SEM-2 BU. TE-W13-26 NI.) *Mr Sunil Dahanayake, Mr Greg Ellis,*

Ms Dianne Harvey, Dr Prem Yapa

This unit is offered in another teaching period

Managerial accounting provides organisations with internal financial and non-financial information required for the three functions of planning, controlling and decision-making. This unit enables students to develop an understanding of the elements of management accounting and the way in which cost information is used in undertaking these functions within the context of a modern business concern. The unit examines the nature and behaviour of product cost information and students should be able to apply their understanding of this to decision-making situations using both a quantitative and a qualitative approach.

Prerequisite: ACC1AMD.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One tutorial presentation (10%) equivalent to 1000 words, one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, one 45-minute mid-semester test (20%).

Prescribed Reading:

Langfield-Smith Thorne, Hilton AW: *Management Accounting* McGraw Hill.

ACC2IMB INTERMEDIATE MANAGEMENT ACCOUNTING (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TE-SEM-1 BU. TE-SEM-2 AW, BE, BU, MI, SH. TE-W31-46 NI.) *Mr Sunil Dahanayake, Ms Katherine Stirling,*

Ms Suzanne Salmon, Mr Petrus Usmanij

Intermediate Management Accounting further develops the concepts of management accounting and provides analytical methods for both short-term and long-term managerial decisions. Topics include budgeting standard costing and variance analysis, capital budgeting, inventory management, performance measurement and contemporary developments in management accounting.

Prerequisite: ACC2IMA / ACC2IIMA/ACC22IMA.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 45-minute mid-semester test (20%), one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, one 10-minute class presentation (10%).

Prescribed Reading:

Langfield-Smith K, Thorne H and Hilton RW. *Management accounting: an Australian perspective*. 4th edn. McGraw-Hill, 2006.

ACC3AFA ADVANCED FINANCIAL ACCOUNTING (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TE-SEM-1 AW, BU. TE-SEM-2 BE, BU, MI, SH. TE-W31-46 NI.) *Dr Liz Duncan, Dr Jane Hamilton, Dr Kamran Ahmed*

This unit aims to promote an understanding of some of the major contemporary issues associated with the measurement and reporting of the operating results and financial position of modern reporting entities. Topics on foreign currency transaction and translation, superannuation, financial instruments, construction contracts and other topical issues will be covered within the context of recent recommendations of the Australian accounting profession. The role of theory in accounting will also be covered.

Prerequisite: ACC2CRE.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 45-minute mid-semester test (30%), one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, AW: SH: one 3-Hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit. AW and SH: One major practical problem (30%). Involving accounting for superannuation.

Prescribed Reading:

CPA Australia *Accounting Handbook 2008*. Pearson, Education Australia.

Deegan C. *Australian financial accounting*. 5th edn.

ACC3AUD AUDITING (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TE-SEM-1 BE, BU, SH. TE-SEM-2 AW, BU. TE-SEM-S MI. TE-W13-26 NI.) *Ms Jane Hamilton, Ms Biserka Siladi, Mr Larry O'Connor*

This unit covers Auditing theory and practice and is designed to meet the preliminary requirements of the Institute of Chartered Accountants in Australia and CPA Australia. Auditing is designed to give students an understanding of the concepts involved in the auditing process. The unit aims to integrate these concepts with practical application including reference to appropriate accounting and auditing standards.

Prerequisite: ACC2CRE.

Class requirements: One 2-hour lectures and one 1-hour tutorial per week.

Assessment: One 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall 50% for the unit, one 1-hour mid-semester test (20%), tutorial exercises/assignment, equivalent to 500 words (10%).

Prescribed Reading:

Gay G, Simmet R. *AW: Auditing and assurance services in Australia*. Rev. edn. McGraw-Hill Irwin.
ICAA or CPA *Auditing and assurance Handbook* John Wiley and Sons or Pearson Education, Current Edition.
Leung *BE: Auditing and assurance services*. 3rd edn. John Wiley and Sons.

ACC3IAC INTERNATIONAL ACCOUNTING (15 CPs Sem. TE-SEM-1 BU, SH. TE-SEM-2 AW.) *Mr Jahangir Ali, Mrs Susan Nalder*

The development of accounting systems and disclosure practices in the USA, UK, Australia, France, Germany and selected Asia-Pacific countries is examined. Various international accounting agencies, such as the IASB in international harmonisation are reviewed, along with a critical analysis of international accounting research methodology and contemporary issues. A number of multinational reporting and accounting issues are also discussed.

Prerequisite: ACC21IFA/ACC22IFA.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: tutorial presentations (5%), one 2,500-word assignment (25%), one 2-hour final examination (70%).

Prescribed Reading:

Lee H. Radebaugh, Sidney J. Gray *International Accounting and Multinational Enterprises*. 6th edn. New York : J. Wiley, c2006.

ACC3TAX TAXATION (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TE-SEM-1 BE, BU, MI. TE-SEM-2 AW, BU, SH. TE-W13-26 NI. TE-W31-46 NI.) *Ms Dianne Harvey, Mr Les Nethercote*

This unit develops an understanding of Commonwealth income tax legislation and the implications of income tax on the individual and business enterprise. A practical approach is taken to the unit matter and topics include objectives of taxation, the general concepts of assessable income and allowable deductions, determination of taxable income and tax payable, special classes of taxpayers, returns and assessments, objections and appeals, collection and recovery of tax, substantiation provisions and an introduction to capital gains and fringe benefits tax.

Prerequisite: ACC1IFA and LST2LBA.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Tutorial participation (5%), one 1500-word assignment (25%), one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

BUS1MIS MANAGEMENT INFORMATION SYSTEMS (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-1 AW, BE, BU, MI, SH. TE-SEM-2 BE, BU. TE-W13-26 NI. TE-W31-46 NI.) *Dr Liz Duncan, Dr John McCullagh, Mr Liam Lenten, Mrs Selena Lim*

This unit introduces students to some basic information systems (IS) ideas and concepts as IS are the key to business functions today. It will provide students with an overview of the entire IS discipline as well as a solid preparation for further study in information systems units. In addition, students will also gain an appreciation for business-related packages. This will give them a competitive edge in the job marketplace.

Incompatible unit: CSE111S

Class requirements: Two 1-hour lectures and one 2-hour computer laboratory session/tutorial per week.

Assessment: BU: SH: NI: lab exercises (15%) equal to 500 words, online quizzes (15%) equivalent to 1000 words over the semester, one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the examination as well as an overall total of 50% to pass the unit. A/W: presentation and report (15%). equivalent to 500 words, one excel spreadsheet assignment (15%). equal to 500 words, one 3-hour final exam (70%). Hurdle requirement: Students must achieve at least 40% in the examination as well as an overall total of 50% to pass the unit, BE: online quizzes (15%). equivalent to 1000 words over the semester, one practical assignment (15%). equivalent to 500 words, one 3-hour final exam (70%). Hurdle requirement: Students must achieve at least 40% in the examination as well as an overall total of 50% to pass the unit.

BUS3TOC TECHNOLOGY AND ORGANISATIONAL CHANGE (15 CPs Sem. TE-SEM-1 AW. TE-SEM-2 SI. TE-SEM-S AW.) *Dr Sue O'Keefe*

This unit is offered in another teaching period

The strategic management of technology and change has assumed increased importance within the business context. This unit introduces students to strategic change management in an environment of rapidly advancing technology. It examines a range of organisational settings and identifies various change management models, focussing in particular on the extent of their applicability to the electronic commerce environment.

Prerequisite: MGT1FOM/MGT11FOM/MGT12FOM.

Class requirements: One 3-hour seminar per week.

This unit is not available for Study Abroad students.

Assessment: AW: One 500-word presentation (10%), AW: one 2000-word written assignment (30%), AW: one 2-hour final examination (60%). Hurdle requirement: Students must achieve at least 50% in the final examination as well as an overall total of 50% to pass the subject. ACN: One 2500-word assignment (30%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject.

ECO11MI MICROECONOMICS (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-1 AW, BE, BU, SH. TE-SEM-2 BU, MI. TE-W01-08 NI. TE-W13-26 NI.) *Dr Lin Crase, Mr Earl Jobling, Professor Gary Magee*

Microeconomics implies a focus on the individual elements and components of an economy rather than on its aggregate nature. Students are introduced to the economic way of thinking in this context and to the broad subject matter of microeconomics. Topics include consumer behaviour and demand, firm behaviour, costs and supply, price determination and the operation of markets, including imperfect markets. Analysis extends to the elementary theory of factor markets and distribution, the nature of the market system and microeconomic policy.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: BU: ACN: NILAI: in-term tests, assignments, tutorial performance (30%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, BE: one 3-hour final examination (60%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit. BE: in-term tests, assignments, tutorial performance (40%), AW: SH: one 2-hour final examination (60%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit. AW: SH: weekly tutorial papers (10%), AW: SH: two 40-minute tests (30%).

ECO11SB INTRODUCTORY STATISTICS FOR BUSINESS (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-1 AW, BE, BU. TE-SEM-2 AW, BE, BU, MI, SH. TE-W01-08 NI. TE-W31-46 NI.) *Dr Warren Paul, Dr Christopher Lenard, Dr Suzanne Sommer*

In this unit students consider how to communicate and interpret commercial and economic information in terms of statistical measures. The probability approach is introduced, with applications to inferential statistics and hypothesis testing using sampling distributions in the realms of economics and commerce. Simple linear regression and testing for various hypotheses in business, economics and finance is also covered.

Incompatible unit: ECO11IBS/ECO12IBS

Class requirements: Two 1-hour lectures, one 1-hour workshop and one 1-hour tutorial per week.

This unit is not available for Study Abroad students.

Assessment: Assignments and project (15%), tutorial participation (5%), one mid-semester test (10%), one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, ten 100 word tutorials (15%). Albury-Wodonga. Submitted weekly, one 2-hour examination (55%). Albury-Wodonga: Open Book exam. Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit, two 750-word assignments (30%). Albury-Wodonga: SPSS based Assignment 1 – Descriptive Statistics Assignment 2 – Inferential Statistics

Selvanathan A et al. *Australian Business Statistics*. 3rd edn. Nelson, 2004.

ECO3IBC INTERNATIONAL BUSINESS ENVIRONMENT (15 CPs Sem. TE-SEM-1 AW. TE-SEM-S AW.) *Mr Peter Lamb*

This unit examines the changing patterns of world trade and international business institutions and managerial responses of these institutions to their dynamic and complex environment. This framework forms the basis for analysis of the factors affecting international business decision-making. The multinational enterprise is a particular focus of study, while significant aspects of the environment such as financial, cultural, economic and political, are

examined and their influence assessed in relation to current and future performance. Emphasis is also on discussion of current developments in the global economy.

Prerequisite: ECO11MI/ECO11IMI/ECO12IMI, ECO11MA/ECO11IMA/ECO12IMA and MGT2OBE/MGT21OBE.

Incompatible unit: ECO2IBE/ECO21IBE/ECO23IBE

Class requirements: One 3-hour seminar per week.

This unit is not available for Study Abroad students.

Assessment: One 15-minute seminar presentation (15%), one 1500-word assignment (35%), one 2-hour final examination (50%).

FIN2FIN FINANCE (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-1 BU, SH, VI. TE-SEM-2 AW, BU. TE-SEM-S BU. TE-W13-26 NI. TE-W31-46 NI.) *Dr Liz Duncan, Ms Sue Nalder*

This is the foundation unit in finance on which all later studies depend and covers financial decisions, valuation and the capital market. In this unit students will also cover an introduction to portfolio theory and the capital asset pricing model, interest rates and the mathematics of finance, efficient market hypotheses, investment evaluation and option pricing.

Prerequisite: ECO11MI/ECO12IMI.

Incompatible unit: FIN21BPF

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit, short weekly assessment tasks (10%). Equivalent to 1000 words over the semester, one 50-minute mid-semester multiple-choice test (20%). AW: one 1000-word major assignment (30%) involves practical problem and 1000 word report, AW: one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit.

LST1BSL BUSINESS LAW (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-1 BE, BU, MI, SH. TE-SEM-2 AW, BU, CH. TE-W31-46 NI.)

Dr Chris Chadien, Professor Vivien Goldwasser, Mr Keith Kendall, Mr Terry Reid

This unit is not available to Bachelor of Laws students as a law elective nor to students who have completed LAW21/22CNT.

This unit is offered in another semester.

Bachelor of Business Students should enrol in this subject.

In this unit students examine legal institutions and practices such as law making and interpretation of laws. The law of contract and its place in commercial law, notably the law of the sale of goods, comprise the body of the unit. Other kinds of civil liability such as fault liability are compared. Students examine the economic and political factors, which have influenced the development of this law and assess the impact of the law on business and industrial activity.

Incompatible unit: LAW21/22CNT, LST11/12LCC, LST11/12IBL

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 1500-word essay (30%), one 3-hour examination (70%). Students must achieve at least a mark of 40% for the final examination.

Prescribed Reading:

Ciro T and Goldwasser VR. *Casebook TBA Law and Business*. 2nd edn. OUP, 2006.

LST2LBA LAW OF BUSINESS ASSOCIATION (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TE-SEM-1 AW. TE-SEM-2 BE, BU, MI, SH. TE-W31-46 NI.) *Dr*

Chris Chadien, Mr David Wishart

This unit is offered at third-unit level also.

Not available to Bachelor of Laws students as a law elective.

In this unit students deal with the key features of the legislation and cases which govern the formation and regulation of business associations (particularly corporations) and the operation of securities markets in Australia. There is an explanation of how these laws operate on the economy and society and on persons and institutions within society, along with how persons and institutions may best utilise these laws. Students completing the unit should be able to apply rules and principles extracted from the legislation and cases to resolve disputes arising from the operations and functioning of business associations and the workings of securities markets.

Prerequisite: Completion of LST11/12LCC or LST11/12IBL or LST11/12BSL.

Incompatible unit: LST12LBA, LAW41COR

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 1000-word assignment (20%), 3-hour open book examination (70%), tutor's assessment (10%). AW: 500 word assignment.

Prescribed Reading:

MGT2HRM HUMAN RESOURCE MANAGEMENT (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-1 AW, BE, BU. TE-SEM-2 BU, MI, SH, VI. TE-W31-46 NI.) *Dr Sue O'Keefe, Dr John Pacher, Dr Darcy McCormack, Dr Apollo Nsubuga-Kyobe*

The unit explores the operational and strategic issues of managing staff in the workplace. It examines the challenges facing human resource managers in contemporary Australian organisations and seeks to develop an understanding of human resource management practices in our continually changing social, economic, industrial relations and organisational environments.

Prerequisite: MGT1FOM.

Class requirements: Onshore students: One 2-hour lecture and one 1-hour tutorial per week.

Offshore students: This unit is offered as a three- or four-month distance education program. Students are provided with text and study guide and are supported by email, telephone and web.

Assessment: Tutorial participation (5%), one 20-minute individual presentation (10%), one 1200-word essay (15%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at

least 40% in the final examination as well as an overall total of 50% to pass the subject, BE: one 2000-word assignment (30%), BE: One 2.5-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit.

Prescribed Reading:

BE: Dessler *Human resource management*. 2nd edn. Pearson Education.

MGT2MCB MANAGEMENT COMMUNICATIONS (15 CPs Sem. TE-SEM-1 AW, MI.) *Dr Lin Crase*

The importance of communication both within and outside the organisation from a management perspective is emphasised. Students examine how managers communicate with individuals and groups and their need for significant oral and written skills. Topics include

effective communication, intercultural communication conflict resolution and, negotiation, gaining and imparting information and written communications, oral presentations. Practical skills are developed throughout the course.

Incompatible unit: MGT21BCO/MGT22BCO, THS11MCO

Class requirements: One 1-hour lecture and one 2-hour tutorial per week.

This unit is not available for Study Abroad students.

Assessment: ACN: tutorial attendance and evidence of work done between tutorials (10%), one 15-minute oral presentation (10%), one 1000-word essay (10%), one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, AW: In Class Exercises (30%), one 15-minute oral presentation and report (15%), one 2-hour final examination (40%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, 1000-word assignment (15%).

Prescribed Reading:

Baker E, Barrett M and Roberts L. *Working Communication*. Wiley and Son.

MGT2OBE ORGANISATIONAL BEHAVIOUR (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-1 AW, BE, BU, MI. TE-SEM-2 BU, SH. TE-W13-26 NI.) *Dr Sue O'Keefe, Mr Max Mollard, Dr Nick Djurkovic, Dr George Sansbury, Dr Apollo Nsubuga-Kyobe*

Organisational behaviour aims at understanding the management of people at work in order to improve an organisation's effectiveness. It is a multidisciplinary examination of what people do in organisations and has four levels of analysis: individual, group, organisation and culture. This unit explores all four levels of analysis and emphasises the psychological aspects of organisational behaviour.

Prerequisite: MGT1FOM.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 1500-word essay (20%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, one class presentation (10%) equivalent to 1000 words, BE: one 2000-word essay (30%), BE: one 2-hour final examination (60%), submission of sample examination answers (equivalent to 200 words) (10%), AW: one 1500-word essay (25%), AW: one 2-hour final examination (60%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit, AW: weekly tutorial exercises (15%).

MGT3ENC ENTREPRENEURSHIP (15 CPs Sem. TE-SEM-2 AW, MI.) *Dr Jayanath Ananda*

This unit examines the planning approach required to fulfil the

function of entrepreneurship. The unit analyses the role of the entrepreneur and introduces entrepreneurship, i.e. the notion of entrepreneurial spirit employed within the context of existing organisations. The unit begins by introducing the various theoretical dimensions to entrepreneurship before examining the planning process. Skills in the application of various analytical tools for evaluating business opportunities are also developed.

Prerequisite: MGT1FOM.

Class requirements: One 3-hour seminar per week.

Assessment: One 30-minute mid-semester test (15%), one 2000-word project brief (35%), one 2-hour final examination (50%).

Prescribed Reading:

MKT2MPP MARKETING PRINCIPLES AND PRACTICE (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEM2 SY. TA-ACNSEMS SY. TE-SEM-1 AW, BU, MI. TE-SEM-2 BE, BU, SH. TE-W31-46 NI.) *Mr Peter Lamb, Dr Marthin Nanere, Dr Outi Niininen, Ms Elaine Plant*

This is an introductory unit to marketing principles and practice as applied to mainly fast moving consumer goods. The unit is designed to give you a broad understanding of the formal discipline of marketing and of the key marketing activities in business. Topics cover the marketing concept, the marketing environment, buying behaviour in consumer and organisational markets, customer segmentation, targeting and positioning, developing the marketing mix (product, price, promotion and distribution) and the implementation and control of marketing programs. As a prerequisite to further study in marketing, it is intended to provide a sound foundation upon which more advanced skills and applications can be built.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: BU: ACN: One team oral presentation (5%), one individual assignment/test (10%) equivalent to a 1000-word assignment, one group assignment (15%) 1500 words per student, one 2-hour final examination (70%).
Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject.
WO: tutorial exercises and case studies totalling 500 words (10%), one group assignment (40%). 1500 words per student, one 2-hour final examination (50%).
Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject.
BE: One 3-hour examination (70%).
Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject.
BE: One 1500-word case assignment (30%).

MKT2SMB SALES MANAGEMENT (15 CPs Sem. TE-SEM-2 AW.)

Mr Peter Lamb

This unit is designed to develop a student's knowledge of personal selling and sales management from a marketing perspective. The nature of the personal selling process is examined in detail and the manner in which a firm's sales efforts are organised is discussed, together with the implementation and control of the sales force and programs. Ethical considerations of selling and legal and implications are evaluated. Contemporary developments in sales methods are examined and their impact evaluated against the organisation's marketing objectives and strategy.

Co-requisite: MKT21MPP/MKT22MPP.

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: Tutorial presentations and interactive exercises and group presentations (10%). 500-word equivalent, one 20-minute sales presentation (15%). Group presentation, major assignment of 1000 words (25%) and one 2-hour final examination (50%).

Prescribed Reading:

MKT3IMK INTERNATIONAL MARKETING (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEMS SY. TE-SEM-1 FR, SH. TE-SEM-2 AW, BE, BU, FR. TE-SEM-S AW. TE-W31-46 NI.) *Mr Peter Lamb, Dr Wenbing Guo, Dr Clare D'Souza*

This unit focuses on the nature of the international marketplace and the problems and decisions facing managers of international marketing. It is comprehensive and practical covering marketing goods and services across national boundaries, as well as within different national markets. Major topic areas covered are the international marketing imperative, analysis of foreign environments, development of international marketing strategies and the implementation of marketing programs across different nations and within nations.

Prerequisite: MKT2MPP OR THS2THM OR THS2IMT.

Class requirements: Onshore students: one 2-hour lecture and one 1-hour tutorial per week

Offshore students: France – This unit is offered as a semester-long online program, with email, telephone and chat room support provided by staff.

Assessment: Class participation (10%). AW: one 20-minute seminar presentation (10%). AW: one 1-hour mid-semester test (10%), one 2000-word individual assignment (20%), one 2-hour final examination (70%).
Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, one group assignment (30%). AW: 1000 words per student, one 2-hour final examination (50%). AW: **Hurdle requirement:** Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass this unit.

MKT3MRE MARKETING RESEARCH (15 CPs Sem. TA-ACNSEM1 SY. TA-ACNSEMS SY. TE-SEM-1 BE. TE-SEM-2 AW, BU, SH, VI. TE-W13-26 NI.) *Dr Marthin Nanere, Professor Geoffrey Crouch*

Business managers request, assess, purchase and use marketing research to make a wide number of informed decisions. To be able to do this competently, they need to know what marketing research can provide, what research methods are appropriate for different types of problems and how results should be interpreted. The aim of this unit is to give you the knowledge and skills, as either a future business manager or a marketing research practitioner, to make intelligent

decisions in your specification, evaluation and application of marketing research.

Prerequisite: MKT2MPP or THS2IMT and either ECO1ISB or ECO1IBS (or equivalent first year statistics unit)

Incompatible unit: MKT2MRB

Class requirements: One 2-hour lecture and one 1-hour tutorial per week.

Assessment: One 1500-word major case study assignment (30%), one 3-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject

MKT3SMK STRATEGIC MARKETING (15 CPs Sem. TA-ACNSEM2 SY. TE-SEM-2 AW, BU, SH, VI. TE-W31-46 NI.) Mr Peter Lamb, Dr John Gountas

This unit available at Shepparton campus in 2007.

This is the final unit in the marketing major sequence. The unit provides a comprehensive and practical understanding of strategic management of the marketing process in a competitive environment. A central focus is the preparation of a marketing plan for a specific product or service and/or alternatively, a detailed marketing audit. Skills of strategy formulation, implementation and control, as well as reporting and presentation of marketing initiatives are developed in this unit. A review of advanced issues in marketing, including the current state of the discipline, is a further focus.

Prerequisite: MKT2MPP.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 1-hour mid-semester test (10%), one group project equivalent to 1500 words per student (20%), one 2-hour final examination (70%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the subject, AW: class participation (8%), AW: one 20-minute group presentation (12%), AW: one group assignment (30%). 1000 words per student, AW: one 2-Hour final examination (50%). Hurdle requirement: Students must achieve at least 40% in the final examination as well as an overall total of 50% to pass the unit.

THS1FAB FOOD AND BEVERAGE OPERATIONS (15 CPs Sem. TE-W27-43 AW.) Mrs Eleanor Fitz

You will be introduced to the planning, preparation and service of food and beverages. Students have the opportunity to acquire an understanding of the nature of commodities used in the preparation and service of food and beverages and the constraints these materials impose on menu planning and operational activities. Concepts of hygiene, menu planning, quality control, selection and purchasing of commodities and nutritional qualities of food are addressed. Students have the opportunity to gain an acceptable level of competence in food production and service techniques and to develop the ability to operate standard catering activities efficiently and effectively.

Class requirements: Five 6-hour lectures at the Wodonga campus and five 5-hour blocks of practicum at the Beechworth campus over a ten-day period (July). A further ten hours of supervised practicum will be completed at functions held during the following semester at Wodonga or Beechworth campus.

This unit is not available for Study Abroad students.

Assessment: One 1.5-hour examination (50%), practicum (30%), 1500 words assignment (20%).

THS1FOB FOOD AND BEVERAGE OPERATIONS 1B (15 CPs Sem. TE-W47-06 AW.) Mrs Eleanor Fitz

This unit is to introduce students to the management of food and beverage services, with focus on the principles of purchasing, storing and transforming food and beverages. Students also examine the emergence of ethnic cuisines and their implications for all food service in the Australian hospitality industry. Factors underlying trends and eating patterns are identified and the socio-economic and cultural aspects of food and beverages are examined. Students have the opportunity to extend their understanding of the critical alignment of cost controls and purchasing strategies, for menu engineering and additionally the importance of quality control and quality management is addressed.

Co-requisite: THS1FAB.

Class requirements: Five 6-hour lecture/seminars delivered and five 6-hour of tutorial at Wodonga campus over a ten day period (November 26 – December 7). A further ten hours of supervised practicum will be completed at functions held during the following semester at Wodonga or Beechworth campus.

This unit is not available for Study Abroad students.

Assessment: 18 hours of food production tutorials at Beechworth campus (25%). Foundation food preparation and the application of transformation systems. 3* research tutorial quizzes

Hurdle requirement: student must complete and pass each component of assessment, one 1.5-hour final examination (50%). Hurdle requirement: students must complete and pass each component of assessment, one 2000-word assignment (25%). Hurdle requirement: student must complete and pass each component of assessment.

THS2ACM ACCOMMODATION MANAGEMENT (15 CPs Sem. TE-W06-22 AW.) Mr Paul Strickland

Foundations of Management provides the basis of managerial knowledge for Accommodation Management and needs to be completed prior to commencing Accommodation Management.

Accommodation Management is a core subject that is focused on the theoretical and practical applications of hospitality industry lodging operations and front office management. Study in the unit is by intensive block delivery for the lectures and laboratory programs at the Albury-Wodonga Campus. The practical training component is undertaken at the Beechworth Campus the following week. Work experience will be undertaken throughout the semester by roster.

Prerequisite: MGT11FOM / MGT12FOM

Class requirements: Four x 3-hour lectures, four x 3-hour laboratories, one x 5-hour practical: delivered during 2-week block in February, 25 hours of practical work placement to be completed during semester one.

Assessment: One 2-hour computer laboratory test on hotel operation system (15%), One 2.5-hour exam (45%) examination to be sat at completion of block, two x 1500-word case study (20%). Part A of case study due four weeks after completion of block: approx 1500 words in length. Part B due end of April: approximately 1000-1500 words in length, one 1500-word placement participation journal and report (20%). Report due at end of semester one.

THS2BCB BANQUET AND CONVENTION CATERING MANAGEMENT 2(15 CPs Sem. TE-SEM-2 AW.) *Mr Brian Millar*

The unit introduces students to the business of Banquet and Convention Service Management for the 21st century. It aims to further enhance the knowledge and skills developed and studied by students in Food Services Management. The definition of the specific market, the relationship of the sales divisions and market teams of a specific range of properties will be evaluated with a focus on future and return business. The complexities of operative and supervisory job characteristics will be determined to enable more effective human resource recruitment and maintenance. The processes of inquiry and conversion, (using a range of sales tools) will be examined and applied with the use of the Opera Systems Sales and Catering module. The processes of evaluation and guest satisfaction will also be studied.

Prerequisite: THS1FAB / THS11FAW / THS11FAB, THS1FOB / THS12FBW / THS12FOB, THS2FSM / THS21FSW / THS21FSM, ACC1AMD / ACC11AMD, LST1BSL / LST12LCC, ACC2IMA / ACC12MAW / ACC21MAA / ACC21ASA.

Class requirements: One 2-hour lecture/seminar session and one 1-hour lab per week, 15 hours of convention operational experience and an excursion to a large convention operation in Melbourne.

This unit is not available for Study Abroad students.

Assessment: One 2-hour examination (50%), one 1500-word assignment (30%), weekly tutorials and quizzes based on Opera software package (10%), group presentation (10%). Hurdle requirement: Students must gain a minimum of 50% for the presentation, 20 minutes per group.

THS2FSM FOOD SERVICES MGT 2 (15 CPs Sem. TE-SEM-1 AW.) *Mrs**Eleanor Fitz*

This unit introduces students to the principles of management of food service operations and the range of systems utilised in Food Services industries. The unit builds upon the knowledge gained in Food and Beverage Operations 1A and 1B and leads students to more detailed understanding of the complexities of this vibrant and challenging arm of Hospitality. Additionally students undertake revisionary and extended application training at La Trobe at Beechworth.

Prerequisite: THS1FAB / THS11FAW / THS11FAB and THS1FOB / THS12FBW / THS12FOB.

Class requirements: One 1-hour seminar and one 5-hour practical per week at the bistro of the international Hotel School at the Beechworth Campus.

This unit is not available for Study Abroad students.

Assessment: Practicum performance and management of restaurant operations (20%), one 2000-word major case study report (cost analysis and control project) (30%). Hurdle requirement: Students must pass 50% of report, one 2-hour examination (50%). Hurdle requirement: Students must pass 50% of the examination.

THS2PTB PRINCIPLES OF TOURISM 2 (15 CPs Sem. TE-SEM-2 AW.) *Mrs**Eleanor Fitz*

The unit explores major concepts in tourism, what makes tourism possible, the economic, socio-cultural and environmental impacts of tourism development and how tourism can become an important

factor in the wealth of nation. The aims of the unit are to review the historical development of tourism, the structure of the industry and its operational environment, to develop an understanding of the role tourism plays in modern society and to evaluate the growth, development and emerging trends of tourism in Australia. The unit provides knowledge of the participants in the tourism industry and examines their roles and inter-relationships. It provides an understanding of the principles of planning, promoting and structuring of the tourism industry and key destinations within Australia.

Co-requisite: THS21THM.

Class requirements: Two 2-hour seminars per week.

Assessment: One 2000-word assignment (30%), one 1/2-hour mid-semester test (20%), one 2-hour examination (50%).

Prescribed Reading:

Weaver and Lawton *Tourism Management*. 3rd edn. Australia: John Wiley and Sons, 2002.

THS2SEC SPECIAL EVENTS, CONFERENCES, MEETINGS (15 CPs Sem. TE-SEM-2 AW.) *Mrs Eleanor Fitz*

Students are introduced to the dynamic conference, meeting and special event (CME) industry. It examines the role of CME within the Australian tourism and hospitality industries. Students will examine and gain first-hand experience in the organisation, planning, marketing, facility design and management of conferences, meetings and special events. The role of the professional conference organiser (PCO) and the impact of hallmark events in Australia will be of particular importance.

Prerequisite: THS21PTW / THS21PTB / THS22PTB and/or THS21THM.

Class requirements: 3-hour seminar per week.

This unit is not available for Study Abroad students.

Assessment: Practicum of event organisation and deliver presentation (20%). 500 word equivalent, one 2000-word case study (30%), one 3-hour final examination (50%).

Recommended Reading:

McDonnell I, Allen J, O'Toole W. *Festivals and special event management*. 3rd edn. Australia: J. Wiley and Sons.

THS2THM TOURISM AND HOSPITALITY MARKETING (15 CPs Sem. TE-SEM-1 AW.) *Mrs Eleanor Fitz*

Assessment may differ between campuses. Please check with a course adviser.

Students will be introduced to the principles of marketing and their application to the unique characteristics of the tourism and hospitality industry. The unit will emphasise an understanding of tourism consumer behaviour, the role of the travel industry, the distinguishing features of the tourism-hospitality product, the pivotal role of a destination and the importance of a strategic planning perspective to tourism marketing operations.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Tutorial participation and assessment (25%) equivalent to 500 words, one 3000-word group project (30%), 1000 words per student, one 2-hour final examination (45%).

Prescribed Reading:

Kotler P, Bowen J and Makens J. *Marketing for Hospitality and Tourism*. 4th edn. Upper Saddle River: NJ, Prentice-Hall, 1999.

THS2TPB TOUR AND HOSP PROMOTIONS 2 (15 CPs Sem. TE-SEM-2 AW.)*Mrs Eleanor Fitz*

This unit provides students with the practical skills and theoretical knowledge necessary to confidently prepare tourism and hospitality promotions. The preparation of press release and promotional materials, basic brochure design, fundamental graphic design principles, radio and television advertising and interview protocol, flyer and printed material compilation, photographic basics, design of briefs for suppliers and the preparation of editorial will all be examined. Practical experience and exercises in each are provided. Students will be introduced to a wide range of promotional techniques and exposed to a range of industry professionals in each field. Students will also learn the basics of media theory and future ramifications for communications.

Prerequisite: MGT21MCW / MGT21MCB or MGT21BCO/22BCO, THS21THM.

Class requirements: One–3-hour seminar per week.

This unit is not available for Study Abroad students.

Assessment: One 3-hour examination (50%), class presentation (working in pairs) on media assessment (20%). Presentation 10 – minutes duration. Group report 3000 words (30%), approximately 750 words per person, based on four persons in group.

Recommended Reading:

Kotler. *Marketing for Hospitality and Tourism*. 4th edn. Prentice Hall

THS3DRH DIRECTED READINGS IN HOSPITALITY BUSINESS

MANAGEMENT (15 CPs Sem. TE-SEM-1 AW. TE-SEM-2 AW.) *Mrs ELEANOR FITZ*

In this unit students are provided with an expanded understanding of critical aspects of hospitality business management such as immediacy demands and the most appropriate responses utilising key management theories, concepts and techniques.

In this unit, students will gain information sourcing skills, reflective analysis skills, researching skills (including reading, note taking and writing), effective utilisation of referencing systems and time management.

The content of the assessment piece (review, exercises and report submission) will show direct correlation to the student's staged academic, laboratory and compulsory industry placement learning.

Prerequisite: THS1FAB / THS11FAB, THS1FOB / THS12FOB, THS2FSM / THS21FSM, THS2ACM / THS23ACM, THS2BCB / THS22BCB and the completion of 550 hours of approved Hospitality Industry Experience.

Recommended Prior Studies: THS11FAB, THS12FOB, THS21FSM, THS23ACM, THS22BCB.

Co-requisite: None.

Incompatible unit: THS31HII

Class requirements: One 2-hour lecture per week and one 1-hour tutorial per week.

This unit is not available for Study Abroad students.

Assessment: One 4500-word reflective report (100%).

THS3FDM FACILITY DEVELOP AND MGT (15 CPs Sem. TE-SEM-2 AW.) *Mrs Eleanor Fitz*

This unit enables students to acquire an understanding of the process of hospitality facilities development and asset management. Planning principles, including feasibility analysis, design issues, environmental matters and controls are studied in conjunction with the character, demands, operational issues and business function of facilities management.

Prerequisite: THS2FSM / THS21FSW / THS21FSM, THS2ACM / THS23AMW / THS23ACM.

Class requirements: One three-hour seminar per week.

This unit is not available for Study Abroad students.

Assessment: One 2500-word major assignment report (50%). Hurdle requirement: 50% of assignment, one 2-hour examination (50%).

Hurdle requirement: 50% of examination

Prescribed Reading:

Ransley ED, Hayden J, Hayden I. *Developing hospitality properties and facilities*. 2nd edn. Butterworth Heinemann.

THS3GET GLOBAL ENVIRONMENT OF TOURISM (15 CPs Sem. TE-SEM-1 AW.) *Mr Anthony Lindner*

A working knowledge of the geography of the world, as it relates to tourism, will be developed by considering the cultural, physical and tourism characteristics of various regions and countries. The main aim, however, is to comprehensively analyse the geographical dimensions of tourism in order to understand the importance of this growing industry and to show how a geographical perspective can contribute to the planning, development and management of a tourism area. World travel patterns, including the origin, characteristics, numbers and seasonality of travel to particular regions will be studied as will the inter-relationships between geography and tourism to provide a comprehensive understanding of the character of major tourism regions of the world.

Prerequisite: THS21PTW / THS21PTB / THS22PTB

Class requirements: One 3-hour seminar per week.

This unit is not available for Study Abroad students.

Assessment: One 2000-word assignment (30%), one 2-hour final examination (50%), one 30-minute tutorial presentation based on your major research assignment (20%).

THS3HOM HOTEL OPERATIONS MANAGEMENT (15 CPs Sem. TE-SEM-1 AW.) *Ms Eleanor Fitz*

This unit introduces students to the operational specifics of hotel management theory and practice in a competitive environment. The unit addresses hotel business performance and performance measurement. Through a focus of hospitality operations management that specifically examines organisational structures and strategic planning and analysis in terms of the hospitality operations cycle, both short and long-term. Service styles, quality, standardisation, production processes and systems implementation are studied with a production operations management approach.

Prerequisite: MGT11FOW / MGT12FOM, ECO10MIW / ECO11IMI, ECO10MAW, ECO12IMA.

Co-requisite: THS32FDM.

Class requirements: One 2-hour seminar and one 2-hour tutorial per week.

Assessment: One 2500-word report, major assignment (50%). Hurdle requirement: 50% of assignment, one 3-hour examination (50%).

Hurdle requirement: 50% of examination.

Prescribed Reading:

Hayes D and Meinemeir J. *Hotel Operations Management*. Pearson/Prentice Hall.

School of Tourism and Hospitality, LTU, Albury-Wodonga. *Printer Notes / Handouts*. Student notes.

THS3NTM NEW TOURISM AND LEISURE BUSINESS MARKETING (15 CPs Sem. TE-SEM-1. TE-SEM-2, BU, OS.) *AW: Dr TBA, BU:*

Dr Aaron Smith

Assessment may differ between campuses. Please check with a course adviser

This unit builds on core skills in marketing in first and second year and is designed to complement the other units in the entrepreneurship specialisation. A major element of the unit involves developing skills in the conduct of marketing research to support the development of new tourism business ideas. In addition, the unit examines the tourism and leisure marketing process with a particular emphasis on the technology associated with promotional methods suited to the needs of small tourism, hospitality or sport enterprises.

Prerequisite: THS21ETI/22ETI, THS21THM, THS12LTM, or equivalents.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 2-hour final examination (50%), tutorial participation (10%), one 4000-word project (40%).

Prescribed Reading:

Godin S. *Unleashing the Idea virus*. New York: Hyperion Books, 2001.

Recommended Reading:

Fink, A and Kosecoff J. *How to Conduct Surveys: A step-by-Step Guide*. Thousand Oaks, CA: Sage Publications, 1993.

THS3RMA RESORT MANAGEMENT (15 CPs Sem. TE-SEM-1 AW.)

Mrs ELEANOR FITZ

This unit demonstrates and explores the special management skills associated with operating a year round resort. Business concepts, along with the need to work with local communities and industry partners are also covered.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Assignment research presentation (10%), a 4000-word major research project (40%). Group assignment, 1000-1500 words per student. Hurdle requirement: Students must gain a pass mark in report, one 2-hour final examination (50%). Hurdle requirement: Students must pass exam.

Prescribed Reading:

School of Sport, Tourism and Hospitality Management *Book of Readings*. Student notes.

Programs of the Faculty of Science, Technology and Engineering

The Department of Environmental Management and Ecology offers the three year Bachelor of Science in Environmental Management and Ecology degree and associated Honours program. In addition, the first year (only) of the Bachelor in Biological Sciences, Bachelor of Science, Bachelor of Agricultural Science, Bachelor of Chemical Science and the double degree Bachelor of Science/Bachelor of Science Education is offered. Students undertaking these latter programs transfer to the Melbourne (Bundoora) campus at the end of year one to complete their degrees. All of these programs are delivered from the campus at University Drive. General enquiries about these courses should be directed to the Administrative Officer, tel: (02) 6024 9885.

The School of Psychological Sciences of the faculty offers units leading to the award of the Bachelor of Psychological Science and the corresponding Honours degree, as well as some psychology service units. These are offered from the campus at University Drive. General enquiries should be directed to the Administrative Officer, tel: (02) 6024 9895.

Bachelor of Science in Environmental Management and Ecology (SBSEME)

Enquiries: (02) 6024 9885 – Department of Environmental Management and Ecology

Fax: (02) 6024 9888

Email: deme.aw@latrobe.edu.au

This three year course is designed to provide training in both environmental management and ecology and is undertaken against the background of the Murray-Darling River Basin. A wide range of environmental and ecological issues is covered, including wastewater treatment and disposal, air quality control, population ecology, community ecology, environmental policy and legislation, conservation ecology, forest and agricultural resources, wildlife and fisheries management and soil science. For suitably qualified students, further study is available at Honours level. Research scientists from the Murray Darling Freshwater Research Centre are involved in the teaching and research program.

Applicants for entry into the bachelor degree must have a study score of 20 in Units 3 and 4 of VCE English or HSC English (Standard, Advanced, or ESL), Band 2 or above or equivalent. Applicants who have successfully completed any of the following studies will be deemed to have an ENTER 2 aggregate points higher for VCE (maximum 4 aggregate points) or a bonus of 1.5 UAI for HSC (maximum 3 points) for each study: biology, chemistry, mathematical methods, specialist mathematics (VTAC), Mathematics Extension 1 and Mathematics Extension 2 (UAC) and physics.

The pass degree consists of units with a value of 120 points at each year level. The Dean of the Faculty of Science, Technology and Engineering must approve variations from this course structure.

First year units are all 15 credit points, second year units are all 20 credit points and third year units are all 30 credit points.

First year (120 credit points)

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Genetics, Human Biology and Evolution	BIO1GEN	15
TE-SEM-1	Organisation and Function of Cells and Organisms	BIO1OF	15
TE-SEM-2	Animal Diversity, Ecology and Behaviour	BIO1AD	15
TE-SEM-2	Plant Science	BIO1PS	15
TE-SEM-2 <i>either</i>	Statistics for Life Sciences	STA1LS	15
TE-SEM-1 <i>or</i>	General Principles of Chemistry	CHE1GEN	15
TE-SEM-1	Basic Chemistry	CHE1BAS	15

Plus two of:

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Physics for Life sciences A	PHY1LSA	15
TE-SEM-1	Processes that Shape the Earth	GEO1PRO	15
TE-SEM-1	Calculus and number systems	MAT1CNS	15
TE-SEM-2	Earth Environments and Resources	GEO1ERS	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15

TE-SEM-2	Physics for Life Sciences B	PHY1LSB	15
TE-SEM-2	Calculus and linear algebra	MAT1CLA	15

Or other approved first year units.

Second year (120 credit points)

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Biostatistics	STA2BIO	20
TE-SEM-2	Origin and Evolution of Australian Biota	WEM2OEB	20

Plus two of:

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Theoretical and Applied Ecology	WEM2TAE	20
TE-SEM-1	Environmental Pollution Control	WEM2EPA	20
TE-SEM-2	Ecological Genetics & Evolutionary Ecology	WEM2EGE	20
TE-SEM-2	Water and Air Quality	WEM2EPB	20

Plus 40 credit points selected from the above or from other approved second year units.

Third year (120 credit points)

Two of:

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Waste Management and Treatment	WEM3WMA	30
TE-SEM-1	Sustainable Resource Management	WEM3RMA	30
TE-SEM-2	Conservation Biology & Environmental Law	WEM3RMB	30
TE-SEM-2	Environmental Assessment	WEM3WMB	30

Plus 60 credit points from the above or other approved third year units.

Honours

Students wishing to enter the Honours program must obtain a minimum average of 60% across all of their third year units and obtain at least 65% in 60 credit points of units germane to the Honours discipline area and should consult the Head of Department to determine early requirements and study programs.

Bachelor of Science (STBSW)

Enquiries: (02) 6024 9885 – Department of Environmental Management and Ecology

Fax: (02) 6024 9888

Email: deme.aw@latrobe.edu.au

Only the first year of this degree is available at the Albury-Wodonga campus. Students who successfully complete the first year of the degree transfer to the Melbourne (Bundoora) campus to complete the remaining two years.

The Bachelor of Science is a general degree program that provides students with flexibility to combine studies in their chosen areas of science (subject to satisfying the relevant prerequisites) or to follow one of the specialist streams offered. Areas of study available in the faculty are:

- agricultural science
- biochemistry
- botany
- chemistry
- computer science and computer engineering
- electronics
- genetics
- mathematics
- microbiology
- physics
- psychology¹
- statistics
- zoology.

Key: ¹ Enrolment in psychology is subject to students achieving the minimum ENTER requirement for entry into the Bachelor of Behavioural Science degree.

After a broad first year of study, students may take major studies in any of these areas through to third year. Students who qualify for entry are eligible to proceed to an Honours year in their relevant area of science.

Course structure

To qualify for the Bachelor of Science, students must complete units

to the value of 360 credit points, normally 120 credit points at each of first, second and third year levels. Up to a total of 110 credit points may be taken outside the faculty. Specific requirements for each year level are given below.

First year

Students choose units to the value of 90 credit points from science units with the remaining 30 credit points selected from first year units offered by the Faculty of Science, Technology and Engineering, or by other faculties of the university. Students must choose units at first year level that will lead to the completion of a major area of study in science (60 credit points) at third year level.

Specialisations

For details, see the Bachelor of Science (SBS). Structure, in the Melbourne (Bundoora). Section of this *Handbook*. Students may wish to discuss the possibility of taking a 'specialisation' with the Albury-Wodonga Course Coordinator.

Bachelor of Agricultural Science (SBASW)

Enquiries: (02) 6024 9885 – Department of Environmental Management and Ecology

Fax: (02) 6024 9888

Email: deme.aw@latrobe.edu.au

Only the first year of this degree is offered on the Albury-Wodonga campus. Students transfer to the Melbourne (Bundoora) campus to complete the remainder of the degree.

This course is designed to encourage a basic understanding of the relationships between soils, plants, animals, economics and the environment. It should be emphasised that the degree is in agricultural science, not in farming. Agriculture is not only an important component of our environment; it reacts with and affects the non-agricultural components. The emphasis in the course is, therefore, on the sciences relevant to an understanding of primary production, resource management and on agribusiness.

The course concentrates on the sciences concerned with soil productivity, plant and animal production and on agribusiness and marketing. These include soil science, plant and animal nutrition, physiology and biochemistry, plant and animal health, pest ecology and management, agribusiness, statistics and experimental design and case studies in agricultural production and its impact on the environment.

The applied science and agribusiness studies, which are the foundations of the Bachelor of Agricultural Science, have a highly successful record in leading to a wide variety of careers in agricultural, industrial, research and commercial organisations.

Industry experience

Twelve weeks of approved industry experience taken during the vacations is an essential requirement of the degree.

Course structure

The course requires the completion of 480 credit points over four years of full-time or equivalent part-time study. This is a fixed content course.

A new stream in agribusiness is taught in conjunction with Monash University and consists of four units (MKF1230, MKF2761, MKF3761 and MKF3961). This stream will be taken during the winter and summer semester breaks as one-week residential units. The units comprise a disciplinary stream in agribusiness and can be used as prerequisites for the Monash Masters in Agribusiness program.

First year (120 credit points)

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Genetics, Human Biology and Evolution	BIO1GEN	15
TE-SEM-1	Organisation and Function of Cells & Organisms	BIO1OF	15
TE-SEM-2	Applications of Chemistry	CHE1APL	15
Winter	Introduction to Agribusiness ¹	MGF1240	15
TE-SEM-2	Animal Diversity, Ecology and Behaviour	BIO1AD	15
TE-SEM-2	Statistics for Life Sciences	STA1LS	15
TE-SEM-2	Plant Science	BIO1PS	15

Choose one first semester chemistry unit. Students who have passed

VCE Chemistry, Units 3 & 4 or equivalent, must choose CHE11GEN.

TE-SEM-1 or	Basic Chemistry	CHE1BAS	15
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15

Key¹ For students enrolled in first year Agricultural Science at Albury-Wodonga. The advantage of this option is that students who complete all four Agribusiness units (which include MKF1230) will graduate with a Professional Diploma in Agribusiness, in addition to the Bachelor Degree in Agricultural Science. The visit to Bundoora in July will also enable the Albury-Wodonga students to meet all other first year Agricultural Science students from the other three campuses in a social setting and will allow them to get a feel for the Bundoora campus environment. College accommodation will be available during the weeklong session.

Bachelor of Biological Sciences (STBBSW)

Email: deme.aw@latrobe.edu.au

Only the first year of this degree is available at the Albury-Wodonga campus. Students who successfully complete the first year of the degree transfer to the Melbourne (Bundoora) campus to complete the remaining two years.

Course structure

The course is of three years full-time or equivalent part-time duration and requires the completion of 360 credit points. Students must complete units with a total value of at least 120 credit points in each of the first, second and third years of study, with a minimum of 60, 80 and 60 credit points in the first, second and third years respectively from units offered by the Biological Science departments (Biochemistry, Botany, Genetics, Microbiology and Zoology).

First year (120 credit points)

The first year consists of:

- 60 credit points of biology (see core units below)
- 30 credit points from the Faculty of Science, Technology and Engineering including at least 15 credit points of chemistry (see core units below) and
- 30 credit points of elective units.

Core units (75 credit points)

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Genetics, Human Biology and Evolution	BIO1GEN	15
TE-SEM-1	Organisation & Function of Cells & Organisms	BIO1OF	15
TE-SEM-2	Animal Diversity, Ecology and Behaviour	BIO1AD	15
TE-SEM-2	Plant Science	BIO1PS	15

Choose one first semester chemistry unit.*

TE-SEM-1 or	Basic Chemistry	CHE1BAS	15
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15

Key: * Students who have passed VCE chemistry Units 3 and 4 or equivalent must choose CHE11GEN.

Electives (45 credit points)

The remaining 45 credit points may be selected from other units offered by the faculty or, with the approval of the course adviser, from units offered by other Faculties, but must include at least one 15-credit point science unit.

Bachelor of Chemical Sciences (SBCHSW)

Enquiries: (02) 6024 9885 – Department of Environmental Management and Ecology

Fax: (02) 6024 9888

Email: deme.aw@latrobe.edu.au

Only the first year of this degree is available at the Albury-Wodonga campus. Students who successfully complete the first year of the degree transfer to the Melbourne (Bundoora) campus to complete the remaining two years.

This course will produce graduates trained in areas relevant to the needs of the chemical industry in Australia. It provides students with a modern education in chemistry and skills in areas where there is a

high demand from industry, e.g. analytical chemistry, surface science and the synthesis of biologically active organic compounds. Consultation with industry confirms that there is a continuing demand for well-qualified chemistry graduates, particularly at the Honours level. The course is accredited by the Royal Australian Chemical Institute. Accreditation means that it is an acceptable qualification for membership of the Institute often required by employers.

Course structure

The course is of three years full-time or equivalent part-time duration and requires the completion of 360 credit points. Students complete units to the value of 120 credit points each year.

The table below summarises the credit point requirements.

Year level	Chemistry	Science units	Other units	Total
1	30	60 – 90 ¹	0 – 30	120
2	60	20 – 60	0 – 40	120
3	60 – 120	0 – 60	0 – 40	120

Key: ¹ Including 15 credit points of mathematics or physics units.

First year (120 credit points)

Core units (30 credit points)

Choose one first semester and one second-semester chemistry unit:

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Basic Chemistry	CHE1BAS	15
or			
TE-SEM-1	General Principles of Chemistry	CHE1GEN	15
and			
TE-SEM-2	Applications of Chemistry	CHE1APL	15

Electives (90 credit points)

Students must choose first year science units to the value of 60 points, which must include at least 15 credit points of mathematics or physics units. The remaining 30 credit points may be chosen from first year units offered by any faculty.

Bachelor of Psychological Science (BVBBBSW)

Enquiries: (02) 6024 9895 – Psychology

Fax: (02) 6024 9867

Email: psych.aw.@latrobe.edu.au

The Bachelor of Psychological Science (BPsySc) is a coherent program of core areas of study in psychology that includes other units, such as biological and social aspects of behaviour deemed desirable to a broad education in behavioural science.

The course prepares students for careers in a range of settings including personnel, management and mental health and human services. It is accredited by the Australian Psychology Accreditation Council (APAC).

It is important to emphasise that the Bachelor of Psychological Science does not qualify a graduate to work as a psychologist. Further education, training and supervised experience is required for registration as a professional psychologist with the Psychologists' Registration Boards of Victoria and New South Wales and also for membership of the Australian Psychological Society (APS).

Course structure

The BPsySc may be undertaken in three years of full-time or equivalent part-time study. Students intending to study part-time should note that this means enrolling in a lesser workload, rather than studying after hours, as BPsySc units are not available as evening classes.

The degree requires the completion of 360 credit points, consisting of 120 credit points accrued from units taken at each of the first, second and third year levels.

An additional requirement is that students must successfully complete a minimum of 150 credit points of psychology units across the three years of the degree, with no less than 120 credit points of psychology accrued from units at second and third year level.

Note that the four third year psychology units PSY3ANA, PSY3CDB, PSY3CFA and PSY3SCB (each worth 20 credit points) will be available in alternate years. PSY3CFA and PSY3SCB will be

available in 2008, PSY3ANA and PSY3CDB will be available in 2009.

Units taught by the School of Psychological Science and which are normally components of the degree are PSY1PYA, PSY1PYB, PSY1BNA, PSY1BNB, PSY2PYA, PSY2PYB, PSY3PYA, PSY3PYB, PSY3RSA and PSY3RSB.

(Full details of the units offered by the School of Psychological Science are available in the unit handbooks produced by the School in February of each year and the School website at www.latrobe.edu.au/psy)

First year (120 credit points)

Core units (75 credit points)

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Psychology A	PSY1PYA	15
TE-SEM-2	Psychology B	PSY1PYB	15
TE-SEM-2	Statistics for Psychology	STA1PSY	15
Either			
TE-SEM-1	Introduction to Behavioural Neuroscience A	PSY1BNA	15
and			
TE-SEM-2	Introduction to Behavioural Neuroscience B	PSY1BNB	15
or			

any other first year biological science units totalling not less than 30 credit points.

Electives (45 credit points)

At least 30 credit points must be chosen from other units available at the campus.

The remaining 15 credit points would normally be selected from other science units. However, with the approval of the Course Adviser, students may choose units offered by other Faculties.

Second year (120 credit points)

Core units (40 credit points)

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Psychology A	PSY2PYA	20
TE-SEM-2	Psychology B	PSY2PYB	20

Electives (80 credit points)

Second/third year level units to the value of 80 credit points chosen from units offered by any department.

Highly Recommended units:

TE-SEM-1	Applied Neuroscience A ¹	PSY3ANA	20
TE-SEM-1	Counselling and Family Psychology A	PSY3CFA	20
TE-SEM-2	Cognitive and Developmental Psychology B ¹	PSY3CDB	20
TE-SEM-2	Social and Community Psychology B	PSY3SCB	20

Third year (120 credit points)

Core units (80 credit points)

Teaching period	Unit title	Unit code	Credit points
TE-SEM-1	Psychology	PSY3PYA	20
TE-SEM-1	Research Project A	PSY3RSA	20
TE-SEM-2	Psychology	PSY3PYB	20
TE-SEM-2	Research Project B	PSY3RSB	20

Electives (40 credit points)

Students choose third year level units for which prerequisite requirements have been met.

Highly Recommended units:

TE-SEM-1	Applied Neuroscience A ¹	PSY3ANA	20
TE-SEM-1	Counselling and Family Psychology A	PSY3CFA	20
TE-SEM-2	Cognitive and Developmental Psychology B ¹	PSY3CDB	20
TE-SEM-2	Social and Community Psychology B	PSY3SCB	20

Key: ¹ Not available in 2008.

Honours

Students who perform at a high standard may apply to undertake a further year of psychology study in honours (PSY4HNA and PSY4HNB), which is a prerequisite for most postgraduate courses of study. Following the successful completion of the honours year, these students will graduate with a Bachelor of Psychological Science (Honours). The honours course is presently offered only at the Melbourne (Bundoora) campus although students from the Bendigo and Albury-Wodonga campus may apply.

Bachelor of Science/Bachelor of Science Education (STBSSW)

Enquiries: (02) 6024 9885 – Department of Environmental Management and Ecology
 Fax: (02) 6024 9888
 Email: deme.aw@latrobe.edu.au

Only the first year of this degree is available at the Albury-Wodonga campus. Students who successfully complete the first year of the degree transfer to the Melbourne (Bundoora) campus to complete the remaining three years. Students who enrol in the Bachelor of Science/Science Education at the Albury-Wodonga campus can only select Chemistry and Mathematics as their major units of study.

This innovative double degree has been developed in response to the Federal Government's 'Innovation Statement' and aims to integrate full science degree studies with a complete teaching qualification, with a particular emphasis on mathematics, statistics (taught as part of mathematics in secondary schools), physics, chemistry and/or information technology. Graduates of this double degree will have a deepened understanding of their teaching units and will be equipped to adapt their teaching to engage with the needs of their teaching settings, including their own students and the nature of the areas of knowledge and behaviour that constitute the discipline. In this program, emphasis is placed on the teacher's ability to adapt teaching to continuously changing circumstances while fostering deep understanding of relevant areas of scientific disciplines.

Please note: students must complete a 'Working With Children' check form, available from Australia Post offices. Students must provide a certified copy of their valid 'Working with Children' card, prior to undertaking teaching placements in schools.

Scholarships

Some scholarships may be available for this degree. Prospective applicants should contact the Faculty of Science, Technology and Engineering faculty office.

Course structure

This double degree is of four and a half years full-time or equivalent part-time duration and requires the completion of 540 credit points overall. Students may complete this double degree in four years as part of an accelerated study program.

Students will gain a foundation in science in the first year. Combined studies in science and education will commence in the second year and continue during the third year. Two science disciplines must be studied through to third year: the 'major' discipline comprising units to the value of 60 credit points in the third year and the 'minor' discipline, 30 credit points. The 'major' discipline must be one of mathematics, statistics, physics and chemistry or computer science. (Note that the first year statistics discipline requirement may be satisfied by enrolling in STA1SS and one of STA1LS or MAT1DM). The 'minor' discipline may also be chosen from among the 'major' discipline areas or from any other science discipline offered by the Faculty of Science, Technology and Engineering. The science disciplines are those defined for the Bachelor of Science degree. The final year will consist of full teacher training, including the practicum requirement and will include a combined science and education project. Normally, students would be expected to have satisfactorily completed all of the requirements for the first three years before progressing to the fourth year.

Notes:

- Your unit choices at first and second year must ensure that one of mathematics, physics, chemistry, statistics or computer science can be taken as a 'major' at third year level. You cannot have a major/minor combination of mathematics and statistics as double mathematics method is not offered in the fourth year.
- You will be qualified to teach subjects corresponding to your chosen major and minor disciplines but not subjects corresponding to your terminating first year science discipline. If you major or minor in physics or chemistry, you will also be qualified to teach secondary school general science. As general science also covers biology, such students should consider taking a first year biology unit as a first year level elective.
- The research project must relate to science education or mathematics education.

- All units must be chosen in consultation with and approved by, the course adviser.

First year (120 credit points)

30 credit points in each of three different science disciplines 90
 First year level electives (education units excluded) 30
 Note: the maximum number of credit points in any one science discipline is 45.

UNIT DESCRIPTIONS

BIO1AD ANIMAL DIVERSITY, ECOLOGY AND BEHAVIOUR (15 CPs Sem. TE-SEM-1 BU. TE-SEM-2 AW.) Dr Dennis Black, Dr Brian Malone

Students should obtain from the University Bookshop a copy of the *Biology 1AD Unit Guide and Laboratory Manual*, an A4 sketchpad, laboratory coat and dissecting kit before the first practical, which is held during the first week of the semester.

This is an introductory unit for students wishing to pursue advanced studies in biology units in subsequent years. It may also serve as a one-semester terminal unit. It consists of an introduction to animal diversity, ecology and behaviour. The unit provides an introduction to the biology of animals, including the origin of animals and an evolutionary approach to the study of the protozoa, sponges, cnidarians and flatworms, as well as the two major lines of coelomate animals, the annelid-arthropod-mollusc line and the echinoderm-chordate line, including a treatment of the origin of our own phylum, the Chordate and of the vertebrate classes; and concepts in animal ecology, such as the ecosystem, community, food web, energy flow, predation, parasitism and competition. The study of animal behaviour covers instinctive behaviour, learning and memory, social behaviour and the development of behaviour in an individual.

Class requirements: Three 1-hour lectures per week and one 3-hour practical class per week. The practical component includes dissections of dead animals and experiments using live animals.

Assessment: One 3-hour examination (70%), practical work (15%), practical reports (15%).

Prescribed Reading:

Hickman CP, Roberts LS and Larson A. *Integrated principles of zoology*. 13th edn. Mc Graw-Hill, 2006.

BIO1GEN GENETICS, HUMAN BIOLOGY AND EVOLUTION (15 CPs Sem. TE-SEM-1 AW. TE-SEM-2 BU.) Dr Susan Lawler, Ms Tania Blanksby

This is an introduction to general genetics and human biology suitable for students intending to pursue further studies in these areas or as a one-semester terminal subject. Included is the history and importance of genetics in understanding human nature and in improving quality of life. Topics include the nature and functioning of the genetic message, the mechanics of inheritance, developmental and quantitative genetics, genes in populations, conservation and ecological genetics, human behavioural genetics and the significance of human genetic variation, genetics in larger evolutionary patterns, the origin of life, speciation, macro-evolution and the origins of modern humans.

Prerequisite: Students from other faculties require the approval of the unit coordinator.

Class requirements: Three 1-hour lectures and one 3-hour practical or workshop per week.

Assessment: One 3-hour examination (70%), practical reports (10%), two 300-word assignments (taken as tests) (10%), two scientific reports (equivalent to 800 words) (10%).

Prescribed Reading:

ALBURY/WODONGA CAMPUS: Starr C and Taggart R *Biology: The unity and diversity of life*. 10th edn. Thomson Learning.
 BUNDOORA CAMPUS: Brooker RJ, *Genetics: analysis and principles*. 2nd edn. Mc Graw-Hill, 2005.

BIO1OF ORGANISATION AND FUNCTION OF CELLS AND ORGANISMS (15 CPs Sem. TE-SEM-1 AW, BU.) AW: Dr Peter Pridmore, BU: Dr Tony Gendall

The practical component of this unit includes dissections of dead animals and working with live animals.

This unit comprises a study of cells and their molecular organisation, including methods for studying cells, cell structure, structure and

function of sub-cellular organelles and components, features of prokaryotic and eukaryotic cells, the activities of cells, including production of energy, cell cycle, the role of proteins in cells, the role of DNA and RNA in the synthesis of proteins and gene control in prokaryotes and eukaryotes. Also studied is the structure and function of various systems and their coordination in animals, from cells to multicellular organisms, basic concepts underlying animal design and the interaction of animals with their environment.

Prerequisite: Students from other faculties require approval by a Subject Adviser.

Class requirements: Three 1-hour lectures per week and one three-hour practical class per week. Students are required to purchase a special manual for use in conjunction with practical work. The manual (and other equipment necessary for the practical classes) is available before the beginning of the academic year. Details will be made available to students at enrolment. Laboratory attendance is compulsory.

Assessment: One 3-hour examination (75%), pre-practical tests and practical assignments (25%).

Prescribed Reading:

Knox R, Ladiges P, Evans B and Saint R. *Biology*. 3rd edn. Roseville, NSW: Mc Graw-Hill, 2004.

Recommended Reading:

Schmidt-Nielsen K. *Animal Physiology*. 5th edn. Cambridge University Press, 1997.

BIOTIPS PLANT SCIENCE (15 CPs Sem. TE-SEM-2 AW, BU.) *AW: Dr Roger Croome, BU: Dr Philip Keane*

Students are required to purchase a special manual for use in conjunction with practical work. The practical manual (and other equipment necessary for the practical component) is available before the beginning of the semester. Details will be made available to students at enrolment.

In this unit students will be introduced to the biology of plants, their role in natural landscapes and their use by human societies, with particular emphasis on the distribution and adaptation of vegetation, especially desert vegetation, grasslands and tropical rainforests; the origin and adaptation of the unique Australian flora; the structure and functioning of plants in the Australian environment and in agriculture; and the diversity, evolution and ecological importance of bacteria, fungi, algae and land plants. Two case studies are used to introduce students to plant biotechnology. Students are introduced to the diversity of plants through visits to the wildlife reserves of the university and the Botanic Gardens and the observation and experimental study of plants in practical classes.

Prerequisite: Students from other faculties require approval by a Subject Adviser.

Class requirements: Three 1-hour lectures per week and one 3-hour practical class per week.

Assessment: One 3-hour examination (70%), nine 15-minute pre-practical tests equivalent to 1500 words (30%). To pass the laboratory component, it is advisable that students attend every laboratory class.

Prescribed Reading:

Knox RB, Ladiges P, Evans B and Saint R. *Biology*. 3rd edn. Mc Graw-Hill, 2004.

CHE1APL APPLICATIONS OF CHEMISTRY (15 CPs Sem. TE-SEM-2 AW, BU.)

AW: Mr Martin Fussell, BU: Dr Jeff Rowe

Subjects studied include chemistry of solutions, equilibrium, entropy and free energy, acid-base equilibria, electrochemistry and chemical kinetics. The unit also examines chemicals in our environment, such as soaps, detergents, cleaning agents, water treatment to remove hardness and bacteria, pesticides and their analysis using chromatography. Chemistry of life: acid derivatives, food chemistry, amino acids and proteins, carbohydrates and synthetic polymers are also covered, along with metals in our environment, coordination compounds and the analysis of the metallic elements using spectroscopy.

Prerequisite: CHE11GEN or CHE11BAS.

Class requirements: Three 1-hour lectures and one 3-hour laboratory or workshop class per week.

Assessment: One 2-hour examination (70%), laboratory reports (20%) and workshops (10%). The laboratory course is compulsory and an attendance requirement applies.

Prescribed Reading:

Chang R. *Chemistry*. 9th edn. McGraw-Hill, 2007.

CHE1BAS BASIC CHEMISTRY (15 CPs Sem. TE-SEM-1 AW, BU.) *AW: Mr Martin Fussell, BU: Dr Jeff Rowe*

This unit is for students who have not taken VCE Chemistry. Students study the chemistry of atoms and molecules, atoms, molecules and ions, quantum theory and the electronic structure of the atom, periodic relationships among the elements, chemical bonding and molecular geometry. Also studied is the chemistry of carbon compounds, hydrocarbons, delocalised bonding and aromatics, alkyl halides, hydroxyl compounds, aldehydes and ketones and acids. In addition, gases and liquids, the properties of gases, thermochemistry, intermolecular forces, physical properties of solutions and acids and bases.

Incompatible unit: CHE11GEN

Class requirements: Three 1-hour lectures and one 3-hour laboratory or workshop class per week.

Assessment: One 2-hour examination (64%), laboratory reports (20%), workshops and class tests (16%). The laboratory course is compulsory and an attendance requirement applies as per study guide.

Prescribed Reading:

Chang R. *Chemistry*. 9th edn. McGraw-Hill, 2007.

CHE1GEN GENERAL PRINCIPLES OF CHEMISTRY (15 CPs Sem. TE-SEM-1 AW, BU.) *AW: Mr Martin Fussell, BU: Dr Jeff Rowe*

Students study the chemistry of atoms and molecules, atoms, molecules and ions, quantum theory and the electronic structure of the atom, periodic relationships among the elements, chemical bonding and molecular geometry. Also studied is the chemistry of carbon compounds, hydrocarbons, delocalised bonding and aromatics, alkyl halides, hydroxyl compounds, aldehydes and ketones and acids. In addition, gases and liquids, the properties of gases, thermochemistry, intermolecular forces, physical properties of solutions and acids and bases.

Prerequisite: VCE chemistry.

Incompatible unit: CHE11BAS

Class requirements: Three 1-hour lectures and one 3-hour laboratory or workshop class per week.

Assessment: One 2-hour examination (70%), laboratory reports (20%). The laboratory course is compulsory and an attendance requirement applies and workshops (10%).

Prescribed Reading:

Chang R. *Chemistry*. 9th edn. McGraw-Hill, 2007.

GEOTERS EARTH STRUCTURE, RESOURCES AND HISTORY OF LIFE (15 CPs Sem. TE-SEM-2 AW, BU.) *AW: Mr Martin Fussell, BU: Dr John Webb*

The first part of this unit covers the large-scale processes that deform the Earth's crust and cause earthquakes (plate tectonics), the faulting and folding that result and the resources of the Earth (ore deposits, fossil fuels and groundwater) including their occurrence and formation. The following section describes the concept of geological time and the history of life on Earth, from microbes to humans and the factors that have affected the evolution of plants and animals, including climate change and catastrophes like meteorite impacts. The practicals focus on the interpretation of geological maps and the study of fossils.

Class requirements: Three 1-hour lectures and one 3-hour practical period a week for 12 weeks and one 1-day field excursion (weekend). Attendance at the practical classes and field excursions is essential and compulsory. The field excursion visits sites of particular geological interest and transport is provided.

Assessment: One 3-hour theory examination (60%), 1.5-hour practical examination (25%), five-practical assessments (equivalent to 500 words) (15%).

Prescribed Reading:

Marshak S. *Essentials of geology*. Norton, 2007.

GEO1PRO PROCESSES THAT SHAPE THE EARTH (15 CPs Sem. TE-SEM-1 AW, BU.) AW: Mr Martin Fussell, BU: Dr John Webb

In this unit students are introduced to the study of planet Earth, its origin and evolution, its composition and the processes that have shaped it. After describing the planets of the solar system, the structure of the Earth, metamorphism and the composition of the Earth's crust are covered, particularly the different types of minerals and rocks that are present. Then the surface processes of volcanism, erosion and deposition that shape the landscape are described, including the landforms and sediments produced in the various environments across the Earth's surface. The practical course focuses on mineral and rock identification.

Class requirements: Three 1-hour lectures and one 3-hour practical period a week and a one day field excursion (weekend). Attendance at the practical classes and field excursion is essential and compulsory. The field excursion visits sites of particular geological interest and transport is provided.

Assessment: One 3-hour theory examination (60%), 1.5-hour practical examination (25%), five-practical reports (equivalent to 500 words) (15%).

Prescribed Reading:

Marshak S. *Essentials of geology*. Norton, 2007.

MAT1CLA CALCULUS AND LINEAR ALGEBRA (15 CPs Sem. TE-SEM-2 AW, BU.) Dr Grant Cairns

In this unit, students will build on MAT1CNS/CFE/CPE to complete a coverage of the mathematics required for second year study in mathematics, engineering and mathematically based disciplines. Approximately half the unit is about calculus, covering Taylor polynomials and first and second order differential equations. The other half contains a study of vectors, matrices and systems of linear simultaneous equations. The teaching emphasis is on active student engagement in solving mathematical problems.

Prerequisite: MAT1CFN or MAT1CFE or MAT1CNS or MAT1CPE or MAT1EN.

Incompatible unit: MAT1FEN, MAT12CLA, MAT12FEN

Class requirements: Two 1-hour lectures, two 1-hour practice classes and one 1-hour lecture workshop per week.

Assessment: One 3-hour examination (80%), six fortnightly assignments (equivalent to 500 words) (10%), three diagnostic tests (equivalent to 500 words) (10%).

Prescribed Reading:

Printed unit text available from University Bookshop.

MAT1CNS CALCULUS AND NUMBER SYSTEMS (15 CPs Sem. TE-SEM-1 AW, BU.) Dr Brian Davey

Mathematics 1CNS is the foundation unit for all studies requiring a knowledge of mathematics. It reviews and extends material covered in VCE and introduces the ideas of mathematical reasoning with an overarching theme of clear communication skills in the mathematical sciences. The unit runs in two streams. One stream is dedicated to the concepts and techniques of differentiation and integration and, while there is much revision, there are many refinements and extensions of the ideas presented in VCE, as well as greater expectations of presentation of written material. The other stream commences with a review of algebra techniques and a formal treatment of sets and number systems and then proceeds to use these ideas, in the second half of the semester, in an introduction to mathematical logic and proof. The teaching emphasis is on active student engagement in solving mathematical problems.

Incompatible unit: MAT1CFE, MAT1EN, ECO11QA, MAT1CFN, MAT1CPE

Class requirements: Two 1-hour lectures, two 1-hour practice classes and one 1-hour lecture/workshop per week.

Assessment: One 3-hour examination (80%), six fortnightly assignments (equivalent to 500 words) (10%), three diagnostic tests (equivalent to 500 words) (10%).

Prescribed Reading:

Printed unit text available from University Bookshop

PHY1LSA PHYSICS FOR LIFE SCIENCES A (15 CPs Sem. TE-SEM-1 AW, BU.)

Coordinator to be advised

The generation of sufficient energy to meet the massive demands of a modern technological society, without impacting adversely on the environment, is an important issue. While the problems of environmental pollution, resource depletion, greenhouse effect, ozone hole etc, are well known, they are not necessarily well understood. It is important that discussion of these issues be well informed. The physical principles central to the range of conventional and alternative energy technologies is discussed and on completion, students should understand the advantages and disadvantages of the various technologies and some of the techniques used to monitor and analyse any hazardous effects. This is an introductory course with minimal mathematical content and no specific science background or previous experience of the above topics is assumed. The unit may be taken independently or in conjunction with PHY1LSB.

Incompatible unit: PHY10SCI, PHY11ENG, PHY11SCA, PHY11PAA

Class requirements: Three 1-hour lectures, one 1-hour tutorial and one 3-hour laboratory session per week.

Assessment: Laboratory reports (25%), one 3-hour examination (50%), tutorial problem sets (25%).

Prescribed Reading:

Giancoli DC. *Physics: principles with applications (with WWW pack)*. 6th edn. Prentice-Hall, 2005.

PHY1LSB PHYSICS FOR LIFE SCIENCES B (15 CPs Sem. TE-SEM-2 AW, BU.)

Coordinator to be advised

This unit is a natural sequel to PHY1LSA, but may be taken independently. Fundamental concepts and techniques in the broad range of topics appropriate for a proper study of the physical environment are introduced. Application of these ideas to systems of biological interest is emphasised. Topics include mechanics, properties of matter, heat and thermodynamics, electric circuits and introductory electronics, atomic physics and radioactivity, fluids and flow, atmospheric physics, light and sound and soil physics. On completion, students should have a basic understanding of measurement techniques as well as familiarity with the fundamental principles in the above topics. No previous study of physics is assumed and mathematical methods are limited to basic algebra.

Incompatible unit: PHY10SCI, PHY11ENG, PHY12AGR, PHY12SCB, PHY11PAB

Class requirements: Three 1-hour lectures, one 1-hour tutorial and one 3-hour laboratory session per week.

Assessment: Laboratory reports (25%), one 3-hour examination (50%), tutorial problem sets (25%).

Prescribed Reading:

Giancoli DC. *Physics: principles with applications (with www pack)*. 6th edn. Prentice-Hall, 2005.

Recommended Reading:

Crowder B. *The wonders of the weather*. 2nd edn. Bureau of Meteorology, Griffin Press, 2000.

PSY1BNA INTRODUCTION TO BEHAVIOURAL NEUROSCIENCE A (15 CPs Sem. TE-SEM-1 AW, BE, BU.) AW: Mr Richard Brown, BE: Dr Anna Kokavec, BU: Dr Stephen Kent

In this unit students are introduced to the language of neuroscience and in particular to the nomenclature that is fundamental to an understanding of the relationship between the biological processes of the brain and behaviour. The unit is designed to link knowledge and techniques from traditional biological disciplines, such as genetics, with those of psychology as a behavioural science. Topic areas centre on study of the neuron as the basic cellular unit of the nervous systems and include ultra structural and neurophysiological approaches to excitable membranes, neurotransmitters and psychopharmacology.

Quota: 250. Subject to laboratory space constraints

Class requirements: Three 1-hour lectures and one 3-hour laboratory class per week.

Assessment: One 1000-word essay (20%), one 1000-word work book (15%), one 100-word in-class practical examination (15%), one 2-hour examination (50%).

Prescribed Reading:

Bear MF, Connors BW and Paradiso MA. *Neuroscience: Exploring the brain*. 3rd edn. Baltimore: Williams and Wilkins, 2006.

PSY1BNB INTRODUCTION TO BEHAVIOURAL NEUROSCIENCE B (15

CPs Sem. TE-SEM-2 AW, BE, BU.) AW: Mr Richard Brown, BE: Dr Anna Kokavec, BU: Dr Stephen Kent

In this unit students are introduced to the mechanisms of sensory (input) information and motor processing and the intrinsic factors affecting brain development and behaviour such as, hormones, learning and memory. Lectures are organised into four streams: neuroscience of sensory and motor systems, brain development, neuro endocrinology and introduction to the neuroscience of learning and memory.

Prerequisite: PSY11BNA.

Quota: 250. Resource constraints

Class requirements: Three 1-hour lectures and one 3-hour laboratory class per week.

Assessment: One-oral poster presentation (10%), one 1000-word laboratory report (20%), one 2-hour examination (50%), one 1000-word work book (20%).

Prescribed Reading:

Bear MF, Connors BW and Paradiso MA. *Neuroscience: Exploring the brain*. 3rd edn. Baltimore: Williams and Wilkins, 2006.

PSY1PSA PSYCHOLOGY STUDIES A (15 CPs Sem. TE-SEM-1 AW, BE, BU, HK, MI, SH.) Dr Sandra Tunley

BU:AW:BE:MI: Available only to students enrolled in the Bachelor of Social Work and the Bachelor of Social Work/Bachelor of Human Services. BU: AW: BE: Not available to students enrolled in the Bachelor of Behavioural Science. BU: AW: BE: MI: SH: This is not part of an APAC-accredited course of study and completion cannot be counted towards membership of the APS, or registration as a psychologist.

In this unit students are introduced to psychology as a science. The aim is to assist students to understand behaviour in terms of current theories of psychology. The content is presented in the core areas of: nature and history of psychology, research methods, intelligence, learning theory, motivation and emotion, personality theory, social psychology and health psychology. These areas are examined from both a theoretical and an applied perspective. Methods of studying behaviour in these content areas are examined and there is a focus on developing a variety of academic abilities such as the group work, library and writing skills of students.

Incompatible unit: PSY11PYA

Quota: 100.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 1250-word essay (25%), one 1.5-hour examination (40%), one 500-word library and referencing assignment (10%) and one 750-word research report (20%), tutorial participation (5%).

Prescribed Reading:

PSY1PSB PSYCHOLOGY STUDIES B (15 CPs Sem. TE-SEM-2 AW, BE, BU, HK, MI, SH.) Dr Sandra Tunley

BU:AW:BE:MI: Available only to students enrolled in the Bachelor of Social Work and the Bachelor of Social Work/Bachelor of Human Services. BU: AW: BE: Not available to students enrolled in the Bachelor of Behavioural Science. BU: AW: BE: MI: SH: This is not part of an APS-accredited course of study and completion cannot be counted towards membership of the Society, or registration as a psychologist.

In this unit, students are introduced to psychology as a science. The aim is to further assist students to understand behaviour in terms of current theories of psychology. The content is presented in the core areas of: behavioural neuroscience, sensation and perception, states of consciousness, memory and cognition, lifespan development, thinking and language, and psychopathology and therapy. These areas are examined from both a theoretical and an applied perspective. Methods of studying behaviour in these content areas are examined and there is

a focus on further developing a variety of academic abilities such as the group work, library and writing skills of students.

Incompatible unit: PSY12PYB

Quota: 100.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 1250-word essay (25%), one 30-minute group tutorial presentation (20%), one 500-word report (10%), one 1.5-hour examination (40%), tutorial participation (5%).

Prescribed Reading:

Westen, D, Burton, L and Kowalski, R *Psychology: Australian and New Zealand edition*. Milton. Qld: John Wiley and Sons Australia, Ltd, 2006.

PSY1PYA PSYCHOLOGY A (15 CPs Sem. TE-SEM-1 AW, BE, BU.) AW: Ms

Sharon Zakhary, BE: Dr Robert Jamieson, BU: Dr Tom Matyas

In this unit and its companion PSY1PYB, students are introduced to the scientific study of psychology and gain a foundation for higher-level units in psychology. The curriculum provides an introduction to the discipline and initiates the study of several key fields of psychology, the formal terms and theories associated with those fields as well as the scientific methods used to gather the relevant knowledge. Students will also be taught the skills of writing research reports to communicate their investigations and will participate in activities that foster group work skills.

Prerequisite: Enrolment in this unit is restricted. Therefore, students enrolled in courses for which this unit is not core must obtain the approval of the Course Adviser prior to enrolment.

Incompatible unit: PSY11PSA

Quota: 450.

Class requirements: Three 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 2000-word tutorial workbook (50%), one 2-hour examination (50%).

PSY1PYB PSYCHOLOGY B (15 CPs Sem. TE-SEM-2 AW, BE, BU.) AW: Ms

Sharon Zakhary, BE: Dr Robert Jamieson, BU: Dr Tom Matyas

The work in this unit complements the content of PSY1PYA. The formal terms and theories associated with those fields, as well as the scientific methods used to gather the relevant knowledge, will be presented. PSY1PYB will also further develop student skills in: the writing of research reports and essays; the conduct of library research and participation in group work.

Prerequisite: PSY11PYA.

Incompatible unit: PSY12PSB

Quota: 450.

Class requirements: Three 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 2000-word tutorial workbook (50%), one 2-hour examination (50%).

PSY2PYA PSYCHOLOGY A (20 CPs Sem. TE-SEM-1 AW, BE, BU.) AW: Dr

Michael Halloran, BE: Dr Graeme Galloway,

BU: Dr Emiko Kashima

In this unit, students are expected to study, in detail and at a more advanced level, the major content areas of experimental psychology introduced in first year. The aim is to consolidate theoretical knowledge and methodological skills for conducting psychological research. Together with PSY2PYB, this unit forms the second year of the APAC-accredited major sequence and covers the following content areas: cognitive psychology, social neuroscience, perception, individual differences and psychological research methods.

Prerequisite: PSY11PYA and PSY12PYB, STA12PSY or STA12OCT.

Class requirements: Three 1-hour lectures and one 1-hour tutorial per week.

Assessment: Two 1500-word tutorial workbooks (50%), one 2-hour examination (50%).

PSY2PYB PSYCHOLOGY B (20 CPs Sem. TE-SEM-2 AW, BE, BU.) AW: Dr

Michael Halloran, BE: Dr Graeme Galloway,

BU: Dr Emiko Kashima

In this unit, students are expected to study, in detail and at a more advanced level, the major content areas of experimental psychology introduced in first year. The aim is to consolidate theoretical knowledge and methodological skills for conducting psychological research. Together with PSY2PYA, this unit forms the second year of the APAC-accredited major sequence and covers the following content areas: abnormal psychology, history of psychology, social psychology, language and child development and psychological research methods.

Prerequisite: PSY11PYA and PSY12PYB and STA12PSY or STA12OCT.

Class requirements: Three 1-hour lectures and one 1-hour tutorial per week.

Assessment: Two 1500-word tutorial workbooks (50%), one 2-hour examination (50%).

PSY3ANA APPLIED NEUROSCIENCE A (20 CPs Sem. TE-SEM-1 AW, BE, BU.)

Dr Richard Weisinger

Not available in 2008

PSY3CDB COGNITIVE AND DEVELOPMENT PSYCHOLOGY B (20 CPs

Sem. TE-SEM-2 AW, BE, BU.) *Dr Sheila Crewther*

Not available in 2008

PSY3CFA COUNSELLING AND FAMILY PSYCHOLOGY A (20 CPs Sem. TE-

SEM-1 AW, BE, BU.) *Dr Anthony Love*

This is one of four elective units offered in the second or third year of the Psychological Science degree. In this unit students study topics related to counselling skills, theories of attachment and family functioning.

Prerequisite: PSY1PYA and PSY1PYB.

Incompatible unit: PSY21TOP, PSY22TOP, PSY31TOP, PSY32TOP, PSY30APP, PSY31APP, PSY32APP

Quota: 300.

Class requirements: Three 1-hour lectures and one 1-hour tutorial per week.

Assessment: Two 1500-word case studies (50%), one 2-hour examination (50%), one oral poster presentation, hurdle requirement only.

PSY3PYA PSYCHOLOGY A (20 CPs Sem. TE-SEM-1 AW, BU.)

Dr Helen Skouteris

This unit of study is usually taken as the first semester of a yearlong program. These are the final units in the major sequence of psychology and is part of the sequence accredited by APAC.

Upon completing PSY3PYA/3PYB, students will be able to demonstrate further knowledge of both theory and research in key areas in psychology, including cognition, cultural psychology, developmental psychology, language, neuropsychology, social psychology and ethics and professional practice. Students will also have developed skills in: the analysis of the philosophical underpinning of psychological theories, quantitative and qualitative psychological research methods, applied psychometric theory and evaluation of psychological tests and assessment methods. Students should also have integrated and advanced their understanding of scientific research methods.

Prerequisite: PSY21PYA and PSY22PYB.

Incompatible unit: PSY30PY

Class requirements: Three 1-hour lectures, one 1-hour tutorial per week.

Assessment: Two 2000-word assignments (50%), one 2-hour examination (50%).

PSY3PYB PSYCHOLOGY B (20 CPs Sem. TE-SEM-2 AW, BU.)

Dr Helen Skouteris

These are the final units in the major sequence of psychology and are part of the sequence accredited by the APS.

Upon completing PSY3PYA/3PYB, students will be able to demonstrate further knowledge of both theory and research in key areas in psychology, including cognition, cultural psychology, developmental psychology, language, neuropsychology, social psychology and ethics and professional practice. Students will also have developed skills in the analysis of the philosophical

underpinning of psychological theories, quantitative and qualitative psychological research methods, applied psychometric theory and evaluation of psychological tests and assessment methods. Students should also have integrated and advanced their understanding of scientific research methods.

Prerequisite: PSY21PYA and PSY22PYB.

Incompatible unit: PSY30PY

Class requirements: Three 1-hour lectures, one 1-hour tutorial per week.

Assessment: Two 2000-word assignments (50%), one 2-hour examination (50%).

PSY3RSA RESEARCH PROJECT A (20 CPs Sem. TE-SEM-1 AW, BE, BU.)

Dr Helen Skouteris

This is the first part of a supervised research project, which provides training in research methods as required by the Australian Psychology Accreditation Council. The supervised research project runs over both PSY3RSA and PSY3RSB. PSY3RSA is comprised of: conducting a literature review, a rationale for the research project, design of a suitable study, application for ethics approval and the writing of a research proposal. These activities are supported by a block of thirteen 1-hour seminars and thirteen 3-hour tutorials.

Prerequisite: PSY21PYA or PSY22PYA and PSY22PYB or PSY22PYB.

Quota: 160. Approval of Adviser of Studies required

Class requirements: Blocks of seminars equivalent to one 1-hour lecture per week and one 3-hour tutorial per week.

Assessment: A 2000-word draft ethics application (10%). The draft ethics application is a hurdle requirement, one 3000-word project proposal (80%), project participation (10%).

PSY3RSB RESEARCH PROJECT B (20 CPs Sem. TE-SEM-2 AW, BE, BU.)

Dr Helen Skouteris

This is the second part of a supervised research project, which provides training in research methods, as required by the Australian Psychology Accreditation Council. The supervised research project runs over both PSY3RSA and PSY3RSB. PSY3RSB is comprised of: collecting research data, conducting statistical analyses of these data, understanding the implications of the data for the original research question and writing a research report describing the whole of the study. These activities are supported by a block of thirteen 1-hour seminars and thirteen 3-hour tutorials.

Prerequisite: PSY21PYA or PSY22PYA and PSY22PYB or PSY22PYB and PSY3RSA.

Quota: 160. Approval of Adviser of Studies required.

Class requirements: Blocks of seminars equivalent to one 1-hour lecture per week and one 3-hour tutorial per week.

Assessment: One 4000-word project report and one 1000-word display and discussion poster presentation (90%). The poster presentation is a hurdle requirement, project participation (10%).

PSY3SCB SOCIAL AND COMMUNITY PSYCHOLOGY B (20 CPs Sem. TE-

SEM-2 AW, BE, BU.) *Dr Anthony Love*

This is one of four elective units offered in the second or third year of the Psychological Science degree. In this unit students study topics related to Social Psychology and Community Psychology.

Prerequisite: PSY1PYA and PSY1PYB.

Incompatible unit: PSY21TOP, PSY22TOP, PSY31TOP, PSY32TOP, PSY30APP, PSY31APP, PSY32APP

Class requirements: Three 1-hour lectures and one 1-hour tutorial per week.

Assessment: Two 1500-word case studies (50%), one 2-hour examination (50%), one oral poster presentation, hurdle requirement only.

SCIOICP INDUSTRY CADETSHIP (60 CPs Sem. TE-SEM-1 AW, BE, BU. TE-SEM-

2 AW, BE, BU.) *Ms Jill Mullen*

Students enrolled in this unit are involved in the Industry Cadetship Program. The program enables students to spend a training period within a specific industry. The program is competitive with each position requiring a formal application and interview process. Final selection is made by the industry partner involved.

Prerequisite: Enrolment in an undergraduate program of the Faculty of Science, Technology and Engineering.

Class requirements: The placement is carried out during semester as agreed between the industry partners, the student and the ICP office of the Faculty.

This unit is not available for Study Abroad students.

Assessment: NONE (100%).

SCIOICS INDUSTRY CADETSHIP (CPs Sem. TE-W47-06 AW, BE, BU.)

Ms Jill Mullen

Students enrolled in this unit are involved in the industry Cadetship Program. The program enables students to spend a training period within a specific industry. The program is competitive with each position requiring a formal application and interview process. Final selection is made by the industry partner involved.

Prerequisite: Enrolment in an undergraduate program of the Faculty of Science, Technology and Engineering.

Class requirements: The placement is carried out during the summer break as agreed between the industry partners, the student and the ICP office of the Faculty.

This unit is not available for Study Abroad students.

Assessment: NONE (100%).

SCIOICW INDUSTRY CADETSHIP (CPs Sem. TE-SEM-2 AW, BE, BU.)

Ms Jill Mullen

Students enrolled in this unit are involved in the industry Cadetship Program. The program enables students to spend a training period within a specific industry. The industry Cadetship Program is competitive with each position requiring a formal application and interview process. Final selection is made by the industry partner involved.

Prerequisite: Enrolment in an undergraduate program of the Faculty of Science, Technology and Engineering.

Class requirements: The placement is carried out during the winter break as agreed between the industry partner, the student and the ICP office of the Faculty.

This unit is not available for Study Abroad students.

Assessment: NONE (100%).

STA1LS STATISTICS FOR LIFE SCIENCES (15 CPs Sem. TE-SEM-1 BU, TE-SEM-2 AW, BU.) *AW: Dr Warren Paul, BU: Dr Luke Prendergast, MI: Dr Michael Schooneveldt*

This unit can be taken at first year level in either first or second semester (STA11LS/STA12LS) or at second year level (STA21LS/STA22LS) where one extra one-hour project class is required. Only available in Albury/Wodonga in semester two.

In this unit students will be introduced to the basic statistical methods that are very useful for students in biological sciences, medical sciences, agricultural sciences, nutrition and health sciences. For example, this unit will cover essential skills for students to analyse data from experiments and write reports. It is specifically designed for students who do not have a strong background in mathematics and further, it does not assume any previous training in statistics or probability. The unit covers descriptive statistics, estimation, hypothesis testing, test for proportions and means, analysis of variance, regression analysis and analysis of cross-classified data. The use of the statistical computing package Minitab or SPSS is an integral part of this unit. Successful completion qualifies students for the second year level units in statistics STA2AS, STA2MS, STA2BS and STA22RSP.

Recommended Prior Studies: year-11 mathematics.

Incompatible unit: STA11LS, STA12LS, STA21LS, STA22LS, STA2LS, ECO10BES, ECO11BES, ECO12BES, ECO11ISB, ECO12ISB, STA12PSY, STA1PSY, STA12OCT, STA1OCT

Class requirements: Three 1-hour lectures, one 1-hour problem class and one 1-hour computer laboratory class per week.

Assessment: One 2.5-hour examination (60%), two 45-minute computer-based tests (30%), ten 100-word assignments (10%).

Recommended Reading:

Johnson R and Kubly P. *Elementary statistics*. 10th edn. Duxbury, 2007.

Utts JM, Heckard RF. *Mind of statistics*. 3rd edn. Thomson, 2007

STA1PSY STATISTICS FOR PSYCHOLOGY (15 CPs Sem. TE-SEM-2 AW, BU.)

AW: Dr Warren Paul, BU: Ms Mitra Jazayeri

This unit is designed to introduce students undertaking the major stream of psychology to a range of statistical methods used in contemporary psychological research. Topics include: descriptive statistics, data entry and manipulation; exploratory data analysis, basic probability models and sampling, estimation and confidence intervals, hypothesis testing and its relation to confidence intervals; the power of a test and its relation to sample size; effect sizes and an introduction to meta-analysis; analysis of single and two group designs; correlation and simple linear regression; analysis of categorical data; non-parametric statistical methods; multiple regression and related methods.

The statistical computing package SPSS is an integral part of this unit with weekly tutorials held in a computing laboratory.

Corequisite: For students in the Faculty of Science, Technology and Engineering, this subject is normally a corequisite for PSY1PYB.

Incompatible unit: STA11SS, STA1SS, STA11LS, STA12LS, STA11LS, STA21LS, STA22LS, STA2LS, STA12OCT, STA21SS, STA2SS

Class requirements: Three 1-hour lectures, one 1-hour practice class and one 1-hour computer laboratory class per week.

Assessment: One 2-hour examination (50%), two 50-minute computer tests (40%), ten 100-word assignments (10%).

Prescribed Reading:

Aron A, Aron E and Coups EJ. *Statistics for the behavioural and social sciences. A brief course*. 4th edn. Prentice Hall, 2008.

Francis G. *Introduction to SPSS for Windows*. 5th edn. Prentice Hall, 2007

STA2BIO BIOSTATISTICS (20 CPs Sem. TE-SEM-1 AW.) *Dr Warren Paul*

In this unit students practice with the techniques commonly used in biostatistics chosen from: chi-squared tests, regression methods, one and two way analysis of variance and bioassay. Students are introduced to the important experiment design principles of randomisation and blocking. Extensive experience with a major statistical package is gained, with some of the data sets being provided by biological science staff.

Prerequisite: STA11LS, STA12OCT or STA12PSY.

Class requirements: Three 1-hour lectures, one 1-hour problem-solving class and two 1-hour computer tutorials per week.

Assessment: One 3-hour final examination (60%), one computer-based assignment (20%), ten 100-word assignments (20%).

WEM2EGE ECOLOGICAL GENETICS AND EVOLUTIONARY ECOLOGY

(20 CPs Sem. TE-SEM-2 AW.) *Dr Susan Lawler*

The aim of this unit is to provide an understanding of ecology, ecological genetics and evolutionary ecology by consideration of the following topics: the maintenance and distribution of genetic variation, the measurement of inbreeding, the impact of natural selection, the evolutionary history of species' distributions, co-evolutionary processes, speciation and extinction.

Prerequisite: BIO11GEN or BIO12GEN.

Class requirements: Three 1-hour lectures, one 3-hour practical class per week and one 1-hour tutorial.

Assessment: One 3-hour written examination (70%), a taxonomic collection equivalent to 2000 words (20%), two 500-word practical reports (10%).

WEM2EPA ENVIRONMENTAL POLLUTION CONTROL (20 CPs Sem. TE-SEM-1 AW.) *Dr Roger Croome*

The aim of this unit is to provide an understanding of environmental pollution and its control. The fundamental concepts of nutrient cycling (carbon, nitrogen and phosphorus) in the environment are discussed together with the sub-cycles of these macro-nutrients in the hydrosphere and lithosphere. Bacteria, algae and invertebrates are used in the demonstration of ecological processes and pollutants are discussed in terms of their perturbation effects on nutrient dynamics and organisms. Water quality is discussed with particular reference to river health and soil quality is discussed with special reference to agricultural production. The unit overall emphasises sustainable environmental management.

Prerequisite: CHE11GEN or CHE11BAS or CHE12APL.

Class requirements: Three 1-hour lectures and one 4-hour practical class per week.

Assessment: One 2-hour written examination (60%), four 1000-word assignments (40%).

WEM2EPB WATER AND AIR QUALITY (20 CPs Sem. TE-SEM-2 AW.)

Dr Ewen Silvester

The aim of this unit is to develop a strong understanding of physical and chemical processes in natural waters (rivers, lakes, estuaries and oceans) and the atmosphere and the impact of human activities on these systems. Topics covered will include: the hydrology of inland streams, lakes and estuaries, water quality parameters, analytical methods, chemical speciation (complexation, precipitation and adsorption), redox and biogeochemical processes, organic carbon in aquatic systems and energy flow. The unit will also cover the impacts and management of point and diffuse source pollution, discharges to rivers and oceans, storm water management, water treatment engineering and atmospheric pollution control.

Class requirements: Three 1-hour lectures and one 4-hour practical class per week.

Assessment: One 2-hour written examination (60%), four 1000-word practical reports (40%).

WEM2OEB ORIGIN AND EVOLUTION OF THE AUSTRALIAN BIOTA (20 CPs Sem. TE-SEM-2 AW.) *Dr Peter Pridmore*

This unit introduces the student to the Australian environment and its biota. The continent's history as part of Gondwana – its geological structure, climate, soils and biogeography are studied to explain the development and distribution of Australian biota and ecosystems. Several framework areas will be reviewed, including geology and biogeography, major features of the Australian landscape, their origin and history, the climatological determinants and distribution of weather patterns, soil science and origins, properties of soils, hydrological variables within aquatic systems and catchment theory. This framework is used to examine selected plant and animal groups that contribute significantly to the past or present biota of Australia and to review the distribution and evolution of biological communities, fire and human impacts.

Recommended Prior Studies: BIO12AD and BIO12PS.

Class requirements: Three 1-hour lectures, one 1-hour tutorial and one 3-hour practical class per week.

Assessment: One 3-hour written examination (60%), five 100-word practical assignments (15%), one 10-minute verbal presentation (5%), 2000 word essay on an Australian plant or animal group (20%).

Prescribed Reading:

Berra TM. *A Natural History of Australia*. UNSW. Press, 1998.

White, ME. *After the Greening, the Browning of Australia*. Kangaroo Press, 1997.

WEM2TAE THEORETICAL AND APPLIED ECOLOGY (20 CPs Sem. TE-SEM-1 AW.) *Dr Dennis Black*

This unit provides an understanding of ecology through studies of population ecology, community ecology and applied ecology. The topics considered include population ecology, types of competition, dynamics of simple competition systems, competition models and real systems, types of predation, dynamics of simple predator–prey systems, predator–prey models and real systems, decomposers, parasitism and mutualism. Other topics include community ecology, transfer of energy and materials within communities, abiotic and biotic determinants of community structure, food web stability and complexity, applied ecology principles and dynamics of biological control, application of island biogeography and dynamics of agricultural and managed forest ecosystems.

Prerequisite: BIO11AD or BIO12AD.

Class requirements: Three 1-hour lectures, one 4-hour practical class per week and one 1-week field course.

Assessment: One 3-hour written examination (60%), one, 1500-word essay (20%), one 1500-word practical report (20%).

WEM3RMA SUSTAINABLE RESOURCE MANAGEMENT (30 CPs Sem. TE-SEM-1 AW.) *Dr Catherine Meathrel*

In this unit students are provided with an understanding of natural resource management within an ecological context. Three major areas are reviewed including the following topics: water resources descriptive and quantitative hydrology, availability and utilisation of Australia's water resources, planning and technology of water resource development projects, forest and agricultural resources, Australia's native and softwood forest resources and their management, factors influencing agricultural production and sustainable farm management practices.

Prerequisite: STA21BS and WEM21TAE.

Class requirements: Four 1-hour lectures and two 4-hour practical classes per week.

Assessment: One 2-hour written examination and one 3-hour examination (60%), preparation of a 3000-word technical report (20%), two 500-word practical assignments (20%).

WEM3RMB CONSERVATION BIOLOGY AND ENVIRONMENTAL LAW (30 CPs Sem. TE-SEM-2 AW.) *Dr Catherine Meathrel*

This unit aims to provide an understanding of natural resource management within an ecological context, by consideration of the following topics. Conservation biology identification and restoration of threatened ecosystems, management of invading or pest species, design of ecosystem reserves, single species and whole community conservation, managing community change and succession, environmental policy and legislation, the structure of environmental law in Australia and the management of renewable and non-renewable resources.

Prerequisite: WEM21TAE and WEM22OEB.

Class requirements: Four 1-hour lectures and two 4-hour practical classes per week.

Assessment: One 3-hour written examination (60%), one 3000-word essay (20%), one 2000-word practical report (15%), one 15-minute verbal presentation (5%).

WEM3WMA WASTE MANAGEMENT AND TREATMENT (30 CPs Sem. TE-SEM-1 AW.) *Dr Ewen Silvester*

The aim of this unit is to provide an understanding of the principles and practice of waste management and pollution control relating to wastewater and solid wastes, with an emphasis on the recovery of water, nutrients, resources and energy. Topics covered in wastewater management include: the characteristics of municipal and industrial wastewaters, unit processes in wastewater treatment plants, design and modelling of wastewater treatment systems, constructed wetlands, remote wastewater systems and wastewater disposal/reuse. Solid waste management topics include: solid waste collection systems, recycling, composting, energy recovery (incineration) and the design and operation of sanitary landfills. Also covered are some aspects of environmental management systems, cleaner production methods and industrial ecology.

Prerequisite: WEM22EPB.

Class requirements: Four 1-hour lectures and two 4-hour practical classes per week.

Assessment: Two 2-hour written examinations (60%), one 3000-word major essay (20%), three 1000-word minor essays (20%).

WEM3WMB ENVIRONMENTAL ASSESSMENT (30 CPs Sem. TE-SEM-2 AW.) *Dr Phil Suter*

The aims of this unit are to provide an understanding of the principles and practices of environmental impact assessment, toxicology, risk assessment and environmental audits. Topics considered include concepts and principles of toxicology, risk analysis, hazard analysis, Geographical Information System (GIS), environmental audits and impact assessment including policy, legislation and administration at national, state and local level and case studies of environmental audits and impact assessment studies. A ten-week industrial work placement is a compulsory component of this unit.

Prerequisite: WEM22EPB.

Class requirements: Four 1-hour lectures and a ten-week work placement (two days per week) equivalent to 160 hours in local industry.

Assessment: One 3-hour written examination (60%), one 5000-word work placement report and one 15-minute oral seminar (40%).

Prescribed Reading:

Harvey N. *Environmental Impact Assessment Procedures, Practice and Prospects in Australia*. Melbourne: Oxford University Press, 1998.

WEM4HNA HONOURS A ENVIRONMENTAL MANAGEMENT AND ECOLOGY (60 CPs Sem. TE-SEM-1 AW.) *Dr Peter Pridmore*

This unit of study represents one semester of a yearlong program. This unit is available to students who wish to undertake an honours program and who have fulfilled the requirements of the BSc at La Trobe or another University, provided their previous academic record be of sufficient standard. The unit consists of a supervised research project, attendance at a lecture series and participation in regular discussion groups. Students can commence honours in either February or July (this unit code is for students needing to enrol during first semester of any given year). Students should consult with potential supervisors during the final year to discuss possible research topics available within the Department.

Prerequisite: An average of not less than 60% across the full third year of study and an average of at least 65% in 60 credit points of units relevant to the honours discipline area.

Incompatible unit: WEM40HON, WEM41HON

Class requirements: Individual research.

This unit is not available for Study Abroad students.

Assessment: Contribution towards one thesis equivalent to 22500 words supported by one oral presentation (70%), contribution towards one literature review equivalent to 2500 words (10%), contribution towards essays and assignments equivalent to 5000 words (20%). The assessment components listed are the combined assessment for WEM4HNA and WEM4HNB.

WEM4HNB HONOURS B ENVIRONMENTAL MANAGEMENT AND ECOLOGY (60 CPs Sem. TE-SEM-2 AW.) *Dr Peter Pridmore*

This unit of study represents one semester of a yearlong program. This unit is available to students who wish to undertake an honours program and who have fulfilled the requirements of the BSc at La Trobe or another University, provided their previous academic record be of sufficient standard. The unit consists of a supervised research project, attendance at a lecture series and participation in regular discussion groups. Students can commence honours in either February or July (this unit code is for students needing to enrol during second semester of any given year). Students should consult with potential supervisors during the final year to discuss possible research topics available within the Department.

Prerequisite: An average of not less than 60% across the full third year of study and an average of at least 65% in 60 credit points of unit relevant to the honours discipline area.

Incompatible unit: WEM40HON, WEM42HON

Class requirements: Individual research.

This unit is not available for Study Abroad students.

Assessment: contribution towards one thesis equivalent to 22500 words supported by one oral presentation (70%), contribution towards one literature review equivalent to 2500 words (10%), contribution towards essays and assignments equivalent to 5000 words (20%). The assessment components listed are the combined assessment for WEM4HNA and WEM4HNB.

In December 1996 La Trobe University purchased the former Mayday Hills hospital in the historic town of Beechworth, North East Victoria, with a view to creating a unique campus of the University. The campus comprises over 100 hectares and, with its heritage gardens and many classified buildings dating back to the 1860s, offers a special educational environment.

The primary focus of the campus is as a professional and personal development centre facilitating conferences and conventions, post-initial education and short course programs, and residential retreats and activities. La Trobe at Beechworth is now the largest professional development and conference centre in regional Victoria with a capacity for up to 350 delegates.

Accommodation options on campus range from 3.5 to 4 star standard to cater not only for incoming delegates, but also to offer hands-on experience to students enrolled in Tourism and Hospitality programs.

The International Hotel School located in the centre of the campus, incorporates all the features of a quality hotel property including the George Briscoe Kerferd conference centre, bar, bistro, pool, business centre and quality accommodation. The fully operational hotel provides real-life experiences for students studying hotel operations, accommodation management and a range of associated subjects, while assisting practical skills development in food and beverage studies. The Hotel School offerings are integrated into the international exchange and partnership programs that La Trobe University has with universities in Asia, America and Europe.

In alliance with the Beechworth Arts Council, the University has established an Arts Precinct on campus utilising the workshop and exhibition space in and around the historic Bijou Theatre. The Arts Precinct features exhibitions, workshops, artists-in-residence and festival activities.

Beechworth Child Care Centre, Beechworth Kindergarten and Beechworth Montessori Kindergarten and Primary School are also conveniently located on campus.

Details of all campus activities can be obtained from the Conference, Sales and Events Manager.

General information about the Bendigo Campus

Introduction

La Trobe University's Bendigo Campus is a multidisciplinary campus offering a wide range of undergraduate and postgraduate programs from all faculties of the University. The Faculty of Education, which is a multi-campus faculty, has its administration located at the Bendigo Campus. The Faculty offers education courses at Bendigo, as well as Albury-Wodonga, Melbourne (Bundoora), Mildura and Shepparton.

The following information relates to services available at the Bendigo Campus. For details on services available at other campuses, please refer to the relevant campus entries.

Academic Skills Unit

The Academic Skills Unit offers students the opportunity to improve their language and learning skills. In particular, students are provided with help in their writing of essays and reports and their understanding of critical and analytical texts. The unit also offers specialist assistance in mathematics and English as a second language (ESL).

Subject to approval, students may also enrol in a credit-bearing one-semester unit, Academic Skills for Tertiary Study (ENG1ASA or ENG1ASB (for ESL students)), attend academic skills workshops, or seek one-to-one assistance. The unit also works closely with academic staff across all faculties and conducts a number of classes on discipline-specific language and learning skills.

Accommodation

Off-campus

Off-campus accommodation is administered by the Bendigo Student Association, which maintains a listing on its website of private board, flats and houses to share or rent in the Bendigo area. Visit www.bsabendigo.com.au or phone (03) 5444 7354 for more information.

On-campus

The Residential Services Office (Bendigo) is situated in the Student Services Centre. It is responsible for the administration and operation of all on-campus housing and the residential life aspect of students in the residences. Its mission is to make a difference – lifestyles, living, learning. Students will find numerous social, academic and leadership opportunities available that will assist in academic success and overall personal development.

There are various styles of high quality self-catered accommodation including apartments, as well as world class catering available at the Halls of Residence.

All applications are processed directly online. See the website for more information on the application process and relevant closing dates. Students are expected to remain in residence for the entire academic year and penalties apply for early departure.

Residential Services Office (Bendigo)

Tel: (03) 5444 7425

Fax: (03) 5444 7827

Email: residences-bendigo@latrobe.edu.au

Web: www.latrobe.edu.au/residentialservices/

Bendigo Student Association (BSA)

The Bendigo Student Association is a not-for-profit organisation based on the Bendigo Campus. The BSA helps make student life better by providing services, events, activities, representation and opportunities for students at the University. The diverse range of services and events offered by the BSA includes academic assistance, financial and administrative support for student clubs, representation

of student interests, advocacy services, free publications such as the *Student Diary*, orientation week entertainment, trips, tours and events throughout the year.

To help provide facilities on campus, the BSA also operates Sweeney's Café and Runes Student Association Shop, both located in the Student Union Building and Evolution Sports and Fitness Centre. All of these businesses put their profits back into projects to benefit students.

The BSA is run by a Board of Management comprised entirely of students and membership of the organisation is open to all La Trobe University Bendigo Campus students. Membership details are available from the BSA. Application forms are available from the BSA Information Centre, located on the ground floor of the Student Union Building.

For more information about the BSA visit the Centre during business hours. Tel. (03) 5444 7514; web: www.bsabendigo.com.au.

Campus Nurse

The Campus Nurse, who is located in the Student Services Centre, is available to assist in providing information, referral or professional care and advice relating to many health issues such as physical health, diet and nutrition, sexual health and contraception options, overseas travel, referral to other alternative health services or general health check-ups. The Campus Nurse facilitates a number of immunisation programs and health promotion activities on campus throughout the year and provides some clinical support to the Campus General Practitioner. The Campus Nurse is also available for emergency first aid treatment, minor wound management, nursing procedures or professional clinical advice.

The Campus Nurse is available for free consultation with students, generally by appointment, Monday to Friday from 9.00am to 5.00pm. Tel: (03) 5444 7390. Please note however, that reception is closed between 12:30 and 1:30pm daily.

Careers and Employment

The Careers and Employment office offers a range of resources and services to help you plan your career. It offers workshops and information sessions for specific groups, as well as a wide range of publications. A Careers Consultant is also available to provide information and advice on courses, employment opportunities and preparation for job applications and interviews. For further information or an appointment, phone Student Support Services on (03) 5444 7223.

You can also access a wealth of information online via Career Hub, the online careers centre and job-posting service for all La Trobe students. To look for a job or to use the online career library, simply go to www.latrobe.edu.au/careers, register and start your search.

Chaplains

The members of the Chaplaincy Pastoral Care Team are on campus four and a half days per week during semester and are available at the Drop In Centre located in the Student Services Centre. They offer a listening ear, support, encouragement, friendship, networking and practical help whenever possible for students and staff. A free cuppa, refreshments or nibbles are always available. Interfaith services are held occasionally during the year. Appointments can be made at Student Support Services reception or telephone (03) 5444 7223.

Child Care Centre

A new, 90-place Centre that will open November 2007 is currently under construction. We will be introducing a four-year-old Kinder program, offering a vegetarian menu, providing a contemporary setting with a sensory garden in an architect-designed building. The Centre will be open to everyone including students and staff from La Trobe. Prospective places may fill quickly. Email booksandblocks@impulse.net.au or phone 54447215 for more information.

Counselling Service

Student and staff can talk to the Counsellors about anything. The services they provide are free, professional and confidential. Among other things, they can help with personal and relationship issues, mental health issues, academic or financial problems, study and motivational difficulties and course and career planning. They can provide information on various forms of financial assistance and help with budgeting.

Appointments are available between 9.00am and 5.00pm, Monday to Friday (however, the reception desk is closed from 12.30pm to 1.30pm). Out-of hours consultations are available by negotiation. Counsellors run a variety of groups throughout the year, which are advertised around the campus. Appointments can be made at Student Support Services reception or telephone (03) 5444 7223.

Disability Support

La Trobe University aims to meet the needs of any student with disabilities, impairments or medical conditions, which may affect their studies. The Disability Liaison Officer is available to discuss special needs and to assist prospective students.

Tel. (03) 5444 7410

Employment – Part-time and Casual

Assistance with part-time and casual employment is provided by the Careers and Employment service. The Careers and Employment Officer works with local employers to generate casual and part-time employment for students and to assist students in obtaining these positions. Students seeking part-time or casual employment can register on Career Hub via the Careers website or make an appointment through Student Support Services reception. Tel: (03) 5444 7223.

English Language Courses

The Language Centre at La Trobe University International College, Bundoora campus, offers English Language Intensive Courses for Overseas Students (ELICOS) to students with offers for their principal course at the Bendigo campus. Courses are offered at intermediate, upper intermediate and advanced levels in the English for Further Study stream. English for Further Study is designed to provide students with the language and academic English skills required for successful participation in undergraduate and postgraduate courses offered by the University. Each level develops students' abilities in areas crucial to academic success. Subjects include reading comprehension, note-taking and summary writing, grammar, critical evaluation, academic writing skills and research essay writing and presentations skills.

Language Centre students have access to the computer lab and other language resources, which supplement the formal classes. Provided students meet all other prerequisites for particular courses, satisfactory completion of Advanced Level English for Further Study (Stage 5) will normally allow students entry into the University's academic programs.

Short Course and Study Tours

Short courses and study tour programs for groups of 15 or more students are arranged by La Trobe University International College to be delivered at the Bendigo campus to suit the group's interests and requirements. These courses can include English language training, professional training, educational excursions and activities, school familiarisation, visits, guest lecturers and recreational excursions and activities. Short courses and study tour group students enjoy the full range of services and facilities at the Bendigo campus. Additional services can also be provided.

Financial Assistance and Student Loans

Centre link Benefits

Youth Allowance, AUSTUDY and ABSTUDY forms and information about the schemes are available in the Student Services Centre. Centrelink representatives regularly attend the campus to provide information on government assistance schemes and help with the

speedy processing of applications. When on campus, they can be consulted in the Student Services Centre.

Student Loans

The University can provide financial support (loans) to needy students for course-related expenses during the period they are enrolled. The loans are normally up to \$2500 (with a maximum of \$4000 in special circumstances). There is no application fee and they are interest-free. A guarantor is usually required and the loans are subject to policy and an approval process. On the Bendigo Campus, students are encouraged to consult a counsellor about loans greater than \$50.00.

Further information can be obtained by calling (03) 5444 7500 or (03) 5444 7955 or by making an appointment to see a counsellor at Student Support Services on (03) 5444 7223.

Emergency loans up to \$50.00, repayable within a month, are available on application.

Office of the Director, Indigenous Education

The Indigenous Student Service Unit at Bendigo is:

Jimbeey Boondjil Unit
Engineering Building, Ground Level
Bendigo Campus
Tel: (03) 5444 7812
Fax: (03) 5444 7382
Email: k.walker@latrobe.edu.au

Support and guidance is available to students who are Australian Aboriginal and/or Torres Strait Islanders. Please refer to the Office of the Director, Indigenous Education entry in this handbook for details.

International Programs Office (Regional campuses)

The International Programs Office (Regional campuses) located in Bendigo is responsible for the admission of international students to La Trobe University's regional campuses; it manages that process from application to enrolment. This includes the provision of pre-departure information, airport reception and orientation programs aimed at helping students to adjust to their new environment. The office liaises closely with Faculties and Schools, Student Services, Residential Services and the Language Centre to ensure that international students have access to a complete range of services and support necessary for their academic success and to ease students' adjustment to living and studying in Bendigo, Australia.

The staff in the International Programs Office provide ongoing support and appropriate referral to students in a wide range of areas including visas, overseas student health cover, academic progress, financial issues (including tuition fees) and social events run by the Bendigo International Students Club (BISC). The office remains a place on campus where students are welcome to come for advice, information and support at all times throughout their study.

In addition, the International Programs Office promotes exchange opportunities for students, with more than eighty exchange partners around the world.

International Short Courses

International Short Courses provide professional training programs for groups from overseas at La Trobe University campuses. Programs vary from three weeks to three months.

Conducted by La Trobe professors and lecturers and local expertise, the training programs cover English Language, Education, English Teaching, Management, Finance and Economics, Law, Public Health, Environment, Agriculture, Media, Hospitality, Social Science, Information Technology and Science and Engineering.

Library

The Heyward Library provides access to a wide range of information resources in a variety of formats. The locally held collection comprises over 160,000 books and 661 print journal titles and a large collection of multimedia resources including CD-ROMs, DVDs, sound recordings, videocassettes and microfilm. The collections are tailored to meet student needs for courses taught at the Bendigo Campus. The resources are supplemented by access to a wide and

expanding range of electronic information that includes approximately 33,000 electronic databases and journals. Most of the electronic resources are now accessible from campus and home desktops, as well as from within the Library. These collections and the library holdings at the libraries at Melbourne (Bundoora) Campus and Albury-Wodonga Campus can be accessed through the Library's web-based catalogue at www.lib.latrobe.edu.au/. Required material held at other campus libraries can be obtained through the inter-campus loans and document delivery service. For approved borrowers, resources held by national and international libraries are available through the library's document delivery service.

Library staff provide advice and assistance in locating required print and electronic information and a range of training programs is available for clients to develop the information skills. Guides to the library collection and information resources in particular disciplines are also available. The Library has 59 computer workstations for accessing library information, electronic resources and services and the Internet, with self-service printing and photocopying facilities. Many of the workstations also provide access to the Microsoft suite of software and a wireless network operates within the Library. A range of study facilities and relaxed reading areas are provided in pleasant surroundings.

Medical Clinic

Dr Albert Chan operates a private medical practice on campus located in the Student Services Centre. The practice offers a full range of general services, including professional clinical support from the Campus Nurse. The Medical Clinic offers professional and confidential health consultations with Dr Chan, on-site pathology testing, sexual health screening, wound dressings, minor surgical procedures and referrals to specialist health services. The Medical Clinic offers Medicare Bulk Billing services to all students and Health Care Cardholders within the University community and is open Monday to Thursday from 9.00am to 5.00pm and Friday mornings. Appointments to see Dr Chan are essential and can be made at the Medical Clinic reception or telephone (03) 5444 7770. Please note however, the Medical Clinic reception is closed from 12:30 to 1:30pm daily.

The Medical Clinic is closed most public holidays and over the period between Christmas and New Year.

Ombudsman

The University Ombudsman visits on a regular basis. Contact the Office of the Director, Bendigo Campus to arrange an appointment. Tel. (03) 5444 7811.

Professional Education Program

The Professional Education Program works in collaboration with industry and other education providers to develop and deliver a range of professional development courses to suit the needs of business and industry and individuals interested in specific learning objectives. Courses will be offered in-house, at campuses and online to provide flexibility in access to learning. This will be achieved by linking academic expertise with consultancy opportunities, liaising with employers to identify possible partnerships concerning training and professional development in all aspects of the industry and liaising with professional associations regarding possible partnerships for program delivery to ensure high quality outcomes.

Public Transport

The Bendigo bus system provides an integrated network of public transport within Bendigo and surrounding suburbs. For further information about the Kangaroo Flat, West Bendigo, North Bendigo, Eaglehawk, Kangaroo Flat West and Maiden Gully routes, call (03) 5447 2222. For the Eaglehawk (via Eaglehawk Road), Epsom/Huntly, East Bendigo, Spring Gully, South Bendigo, Quarry Hill and Strathdale routes, call (03) 5443 9333. The website for bus routes is www.christiansbus.com.au.

V/Line services operating from Bendigo are the InterCity trains to Melbourne, the Northerner InterCity express train to Kerang and Swan Hill, the Sunlink coach service to Swan Hill and Mildura and

the Midland Link coach-train service to Shepparton and Albury-Wodonga. Other V/Line coach services from Bendigo service Echuca-Moama, Cohuna-Barham, Charlton-Sea Lake, Ballarat and Geelong and St Arnaud-Donald. For further information, contact V/Line Bendigo on (03) 5440 2765, or visit www.vlinepassenger.com.au.

Research and Higher Degrees

Staff from the University's Research and Higher Degrees Office attend the Bendigo Campus on a regular basis. Students and staff may make an appointment through the Student Administration Reception.

Residential Services Office

The Residential Services Office (Bendigo) is situated in the Student Services Centre. It is responsible for the administration and operation of all on-campus housing and the residential life aspect of students in the residences. Its mission is to make a difference – lifestyles, living and learning. There are a number of various styles of self-catered operations, including apartments. The campus is reputed to have some of the best styles and quality of accommodation and meals. (See also Accommodation)

Resource Centre

The Resource Centre, located in Student Support Services, includes printed, computer-based and audiovisual information on careers, employers of graduates, postgraduate courses and awards, study skills, preparing for job applications and interview techniques, physical and mental health, legal aid, tenancy rights, HECS – HELP and FEE – HELP, scholarships and awards and Centrelink payments. Web access is available to access handbooks of those tertiary institutions that are not available in hard copy.

Scholarships

Information and advice is available about a variety of undergraduate scholarships available in all faculties and at all campuses.

Applications for many undergraduate scholarships usually close around the end of September. Check the website at www.latrobe.edu.au/scholarships in early August for information for the following year. Contact the University Scholarships Unit for up-to-date information. Email: scholarships@latrobe.edu.au.

Security Escort Service

A security escort service normally operates during the academic year, Monday to Friday from 5.00 pm to 10.00 pm. The security officer is available during these times to escort staff and students to car parks, campus residences and other related venues on campus.

There is security on campus 24 hours a day, 365 days a year. Security also patrols the residences throughout the year.

Sporting and Recreational Facilities

Evolution Sports and Fitness Centre is the home of sporting facilities at the Bendigo Campus. Managed by the Bendigo Student Association, Evolution features up-to-date gym and aerobics facilities, a comprehensive group fitness program, including yoga and Pilates and a well-maintained stadium. With fully qualified staff and personalised programs tailored to individual needs, Evolution offers a range of memberships and fitness services to students, staff and the general community throughout the year. The stadium is fully equipped for a variety of sports including volleyball, basketball, badminton and netball.

Evolution Sports and Fitness Centre is located on the Edwards Road Campus beside the sports field on (03) 5444 7446. Other sporting facilities on the campus cater for tennis, cricket, netball and squash. An Olympic-sized swimming pool is also situated close by.

For more information about sport and recreation facilities available at the Bendigo Campus, visit Evolution Sports and Fitness Centre or visit www.bsabendigo.com.au.

Student Services Centre

The Student Services Centre is located in the west wing of the Engineering Building near the sports field on the northern side of the campus. Situated in the centre you will find Student Support Services reception, the Counselling Service, the Careers and Employment Service, the Medical Clinic reception, the Campus Nurse, the General Practice, the Chaplaincy, the Equity and Access Office, Residential Services, the Academic Skills Unit, the Aboriginal Tertiary Support Unit, the University Scholarships Unit and the Muslim prayer room. The International Office is located in the east wing of the same building.

Academic Organisational Structure

The academic structure of the campus is as follows:

Faculty of Education

- Education
- Outdoor Education and Environment

Faculty of Health Sciences

Division of Allied Health

- Oral Health
- Physiotherapy
- Social Work/Human Services

Division of Health Studies

- Public Health

Division of Nursing and Midwifery

Faculty of Humanities and Social Sciences

- Arts
- Visual Arts

Faculty of Law and Management

- Business
- Graduate School of Management
- Law
- Sport, Tourism and Hospitality Management

Faculty of Science, Technology and Engineering

- Civil Engineering and Physical Sciences
- Computer Science and Computer Engineering
- Mathematics and Statistics
- Pharmacy and Applied Science
- Psychological Sciences

Availability of Units and Courses

All of the units and courses listed in this *Handbook* are offered subject to the availability of staff. While every effort is made to provide full and accurate information, no absolute guarantee of the structure or manner of teaching or of availability is implied in the listing of a unit or course for this or any subsequent year.

The university reserves the right not to offer any unit for which the number of enrolments or the resources available are insufficient and it reserves the right to restrict the number of enrolments in any unit.

Students should ensure they are aware of the physical components and location requirements of some courses. If you have a disability, medical condition or any concerns that may affect your potential participation, please contact the appropriate school to discuss possible course modifications.

Unit Descriptions

A list of units taught at the Bendigo Campus appears at the end of each Faculty section. The units are in alphabetical order by unit code, indicating unit name, credit points, teaching period, campus/location, unit coordinator, class requirements, assessment, prerequisites and reading.

Students should note that units published in the hardcopy *Handbook* are subject to change and should refer to the Unit Database for more up-to-date information www.latrobe.edu.au/udb_public.

For an explanation of teaching periods and campus codes see the General Information at the beginning of this *Handbook*.

Confirmation of Enrolment

Enrolments must be confirmed by prescribed dates in each academic period. The procedure involves students confirming enrolment (as advised via Student-online) indicating their individual unit enrolment details and checking these details to ensure that they are correct and notifying of any required amendments.

The purpose of the procedure is to establish a firm base for students' permanent academic records and to provide an accurate basis for the planning of mid-year and end-of-year examinations. Failure to comply with these procedures could result in an incorrect entry on student records and, in cases where a student has not been attending classes initially enrolled in, the recording of a failure in that unit.

Academic Progress

Every undergraduate course offered by the University must be completed within a specified period. Typically, three year courses must be completed in five years of full-time study or nine years of part-time study.

Each year, after completion of the annual examinations, faculty boards review the progress of their students. Those whose academic progress is unsatisfactory may be required to 'show cause' why their enrolment should be permitted and they may have their re-enrolment options limited.

Honours Degrees and Postgraduate Studies

Honours degrees and postgraduate courses are also available and are designed to provide students with greater depth in a specialised subject area and skills in research by way of preparation for higher degree studies.

Introduction to course outlines

Courses offered on the Bendigo campus are described under the following headings:

- Faculty of Education, including outdoor education and environment
- Faculty of Health Sciences, including dentistry, nursing, oral health, physiotherapy, public health and social work
- Faculty of Humanities and social sciences, including arts, planning and visual arts
- Faculty of Law and Management, including business, commerce, sport, tourism and hospitality management; double degrees in law; and Graduate School of Management programs
- Faculty of Science, Technology and Engineering, including science, civil engineering, information technology, pharmacy and psychology

Courses are described alphabetically at each level under their applicable faculties. Some descriptions refer to regulations and assessment details that are specific to that course. These references supplement those in the student entry and progress regulations and those in the individual course regulations. Any questions concerning the interpretation of regulations by faculties should be referred to the relevant course administrator.

All undergraduate courses are developed and maintained through a rigorous approval, accreditation and review process. This involves both internal and external scrutiny and consultation with appropriate professional registration authorities to ensure the continuing quality and relevance of the programs and awards.

Bachelor degree courses provide a systematic and coherent introduction to a body of knowledge, underlying principles and concepts and associated problem-solving techniques. Students are expected to develop the academic skills and attitudes needed to comprehend and evaluate new information, concepts and evidence from a range of sources. Such courses usually include the provision of major studies in which course content is taken to a significant depth and knowledge is developed to a high level, which provides a basis for postgraduate studies. Minor studies and elective units may also be taken in addition to the major studies to provide a broadening of knowledge. The undergraduate courses available are:

Advanced Diploma in Nursing – RDN 1 semester full-time, part-time not available
Bachelor of Agricultural Science – SBASB 4 years full-time, part-time by arrangement

Research

La Trobe University is one of Australia's leading research universities, as demonstrated by the national and international recognition afforded many of its staff, its ability to attract major competitive research grants, its publication rate and the wide range of strong postgraduate research programs offered.

As part of its research development program, La Trobe University Bendigo has three established research centres to focus and foster research in areas of excellence. The centres are generally multidisciplinary, involving academics from a wide range of backgrounds. They work closely with industry and community groups in the region and have established a number of regional collaborative research projects.

Centre for Sustainable Regional Communities

The Centre for Sustainable Regional Communities (CSRC) in the Faculty of Law and Management was established to support the University's regional strategy by developing partnerships with regional communities, companies, organisations, agencies and individuals that serve to deliver mutual benefits to both the University and its regional partners; and by fostering, enabling and undertaking collaborative cross-disciplinary research that contributes to

sustainable regional socioeconomic growth and development.

In these ways, the CSRC aims to improve understanding of what contributes to and ensures, sustainable regional communities and to be an internationally recognised leader in the scholarly discovery, preservation, transmission and application of knowledge of benefit to regional communities and their environments.

Students and staff who are interested in becoming involved in current and proposed projects, or who wish to develop partnerships to support an area of research interest, should contact the Director, Professor John Martin on (03) 5444 7804; email: csrc@latrobe.edu.au or website www.latrobe.edu.au/csrc.

Biotechnology Research Centre

The Biotechnology Research Centre in the Faculty of Science, Technology and Engineering focuses on two main areas of research: fermentation technology and wastewater treatment.

Fermentation technology research includes investigation of the factors influencing exopolysaccharide production in fungi; fungal growth kinetics; the role of fermenter configuration on microbial metabolite production; and the physiology of overproduction of metabolites.

Wastewater treatment research involves both chemical and microbiological studies aimed at improving understanding of the operation of activated sludge systems, particularly those that remove nitrogen and phosphorus. Laboratory studies using sequencing batch reactors are carried out to identify the role of bacterial biopolymers in wastewater organisms. Analysis of the storage of these materials under operational conditions is used in process modelling and design. Grants from industry and government bodies have supported this work.

Staff from the centre have presented specialist courses for the wastewater industry in Australia and Europe and work collaboratively with other Australian and overseas research groups.

Additional Research Areas

In addition to research carried out in connection with research centres, many staff are involved in either individual or group research in departments and schools. Examples of current projects are listed over:

Biological sciences

- biosynthesis of natural products
- fermentation technology
- fungal genetics
- fungal physiology
- microbiology of activated sludge and fermentation
- muscle physiology
- neural circuits in the visual system
- plant–animal interactions
- soil–root interactions
- systematics and adaptation of frogs
- tumour biology and metastasis
- wastewater treatment
- blood platelet inhibitory substances in snake venoms

Business

- accounting and finance: the market for audit services; issues in taxation; international financial reporting standards; corporate social responsibility
- administrative law
- agricultural marketing channel dynamics
- consumer perceptions of genetically modified foods
- developments in online teaching and learning in Chinese studies
- events research, contemporary Australian monetary policy, financial deregulation and bank behaviour
- electronic commerce in the Asia-Pacific region
- factors influencing the formation of research and development consortia
- history of economic thought
- international business links between Asia and Australia
- Internet developments in China
- management: human resource management and industrial relations, strategic management, international management, health care management
- marketing and management of services

- marketing of tourism destinations
- organisational behaviour
- public policy

Chemistry

- chemotaxonomic analysis
- chromatography
- colloid and surface science
- critical properties of pure substances
- environmental chemistry
- environmental monitoring of rivers
- organic analysis
- organic synthesis
- soil science
- thermodynamic properties of binary mixtures
- wastewater treatment

Education

- refer to the Faculty of Education section

Engineering

- concrete structures
- cartography
- electronic instrumentation
- environmental engineering
- environmental geomorphology
- environmental impact assessment
- extractive metallurgy of gold
- finite elements
- geomechanics
- hydrology and water resources
- numerical methods in structural engineering
- transition metal metallurgy
- properties and processing of materials

Geology

- economic geology
- geoconservation assessment
- geomorphology and environmental management
- igneous petrology
- mountain and coastal geomorphology of Victoria
- geoconservation assessment of proposed development sites (coal mine extension, wind farms)

Health and human sciences

- high-risk adolescents, in particular juvenile offenders
- drug and alcohol education/prevention for young people
- impact of critical care nursing on patient outcomes
- clinical learning
- evidence-based health promotion practice
- mental health promotion
- women's health
- health promotion workforce development
- health promotion in general practice
- health issues for older people in rural areas
- environmental management systems
- Listeria awareness
- food- and water-borne infectious diseases
- telephone consultation
- cardiac rehabilitation
- men's health
- needs analysis of rural communities
- nurses, caring and the elderly
- psychiatric disability
- rural health services, rural nursing and nurses' education
- history of nursing
- program evaluation methodology

Information technology

- application of artificial intelligence techniques to problem-solving
- ERP systems
- improving the retention rates of first year female computing students
- improving the teaching and learning of information systems
- improving teaching and learning of threshold concepts in IT
- understanding the successful development of information systems
- improving the ability of IT consultants to construct effective

- conversations with clients
- jobs skills in the IT discipline
- music information retrieval

Law

- access to justice
- legal aid
- legal profession
- community legal centres
- law of torts
- water law and policy
- universities and the law

Mathematics

- approximation theory, numerical analysis
- graph theory, foundations of geometry and space-time
- mathematical models in health care
- modelling internal migration in a regional context

Psychology

- assessment issues in the clinical diagnosis of children
- humour (theories of humour, humour and personality, humour and mental health)
- psychology of tourism
- response bias and environmental attitudes
- theories of human cognition
- emotional responses and trauma after accidents and physical injury
- chronic pain experience from inception to adjustment
- alcohol psychopharmacology, migraine prevention
- the psychology of community life
- health promotion

Physics

- acoustics
- agricultural instrumentation
- materials characterisation using electronic microscopy techniques

Sport, tourism and hospitality management

- nature-based tourism
- community tourism
- environmental learning
- tourism marketing
- festivals and events
- regional tourism development

Links with Business and Industry

A number of research activities are carried out in collaboration with business and industry in areas such as geology, home brewing, fine arts, market research, rural ageing, cardiac rehabilitation, disability support, stabilised mine fills and wastewater treatment and management. For information about research areas not listed here, contact the relevant faculty office.

Course Outlines

Courses offered at the Bendigo Campus are described under the following faculty headings:

- Faculty of Education
- Faculty of Health Sciences
- Faculty of Humanities and Social Sciences
- Faculty of Law and Management
- Faculty of Science, Technology and Engineering

Within the faculties, courses are listed alphabetically at each level*. Some descriptions refer to regulations and assessment details that are specific to that course. These references are supplementary to those detailed in the student academic progress regulations and individual course regulations. Any questions concerning the interpretation of regulations by faculties should be referred to the relevant course administrator.

* Note that the courses offered in the Faculty of Health Sciences are listed alphabetically, under their respective Divisions.

FACULTY OF EDUCATION

General Information about the Faculty of Education

The Faculty of Education caters for a wide range of interests in areas related to education and the environment including undergraduate and graduate teaching programs: TESOL and applied linguistics; outdoor education and environment; nature tourism and natural resources education; and specialist graduate programs for professionals at graduate certificate, graduate diploma and Masters degree levels. The Faculty also provides the opportunity for research at both Masters and Doctoral level. The Faculty provides professional development activities and programs for teachers on a range of educational issues across all curriculum areas. Students from other Faculties of the University may apply to enrol in some individual education units. The Faculty consists of three schools: the School of Education, the School of Outdoor Education and Environment and the School of Educational Studies. Programs are offered at Melbourne (Bundoora) and at the regional campuses of Bendigo, Albury-Wodonga, Mildura and Shepparton. Some programs are also offered offshore.

School of Education

Locations: Bendigo
Enquiries: (03) 5444 7907
Email: bendigoeducation@latrobe.edu.au

Mildura campuses
Enquiries: (03) 5051 4009

The School of Education offers programs at the Bendigo and Mildura campuses and is committed to providing a rich learning environment for students and staff through innovative programs and services in areas related to education. The School's focus is on pre-service, in-service and postgraduate courses for teachers and other professionals with an interest in education. The school is committed to research and other scholarly activities that advance the teaching profession. Programs offered are informed by current research and are designed to meet the needs of the university's regional and international communities. Students have an opportunity to explore widely with leaders in their particular field of interest.

Specialist areas of study include:

- curriculum and policy
- gifted education
- health education
- information and communication technology
- language and literacy
- middle years
- multimedia education
- physical education
- pre-service teacher education
- rural education
- science and mathematics education
- special education
- student welfare and guidance
- technology education
- vocational education and training.

School of Outdoor Education and Environment

Location: Bendigo Campus
Enquiries: (03) 5444 7285
Email: outdoor.bendigo@latrobe.edu.au

The School offers undergraduate programs in Outdoor Education and Environment including Nature Tourism and Natural Resources Education as well as graduate programs in research (Masters and PhD) and postgraduate coursework at Graduate Diploma and Masters levels. The School's focus is on developing knowledge about nature, building relationships with the land and understanding place, culture, language and experience. Students have an opportunity to explore widely with leaders in their particular field of interest.

Studies in outdoor education and the environment include:

- environmental studies: bush, rock, local, river, winter alpine
- leadership

- natural resources education
- naturalist studies
- nature tourism
- outdoor education
- outdoor and physical education
- outdoor recreation education

School of Educational Studies

Locations:

Melbourne (Bundoora) Campus
Education Buildings 1 and 2

Tel: (03) 9479 2546

Albury-Wodonga Campus

Tel: (02) 6024 9865

Shepparton Campus

Tel: (03) 5833 2589

Email: education@latrobe.edu.au

The School of Educational Studies offers Education (including TESOL and Applied Linguistics) programs in Melbourne (Bundoora), Albury-Wodonga and Shepparton. Some programs are also offered offshore. The School supports the development of educational communities both within and outside Australia; encourages the development and application of new knowledge and ideas through research, teaching and community engagement; promotes open discourse and intellectual integrity in all interactions between staff, students and the wider community; and values interdisciplinary perspectives on education and the reflective development of knowledge and practice.

Specialist studies include:

- pre-service teacher education
- adult education
- applied linguistics (including TESOL and LOTE teaching)
- cross-cultural communication
- multicultural education
- counselling
- student welfare and guidance
- curriculum and policy
- educational administration and leadership
- information and communication technology
- multimedia education
- language and literacy
- science and mathematics education
- technology education
- industry training and
- vocational education and training.

General course enquiries

Enquiries about prerequisites, admission requirements and requests for applications for coursework degrees, by both current and prospective students, should be directed to the relevant campus and school office. Local students apply through VTAC for undergraduate courses.

International students

Admission of international students is coordinated by the university's International Programs Office. For information on application procedures, accommodation, visa requirements, fees, etc. contact the office on +61 3 9479 1199 or write to International Programs Office, La Trobe University, Victoria, 3086, Australia. Website: www.latrobe.edu.au/international.

Course regulations

All courses offered by the Faculty of Education are governed by a university regulation that specifies the entrance and other requirements of the course. These are supplemented by information contained in this *Handbook* and by other faculty and school policies. Each course has its own rules of progression and most schools produce specific procedures that operate under the authority of the university regulations and faculty guidelines.

Professional placements

Some courses require students to undertake unpaid professional teaching practice placements. Placements may be located in either metropolitan or rural areas. In most courses that require students to undertake placements, the placement involves being assigned to a

school, or other approved educational setting, on a full-time basis over a period of days or weeks. In some cases students undertake placement interstate or overseas.

The university maintains insurance policies to protect students undertaking outside practical placement (practicum) as a compulsory course requirement, or fieldwork or other work undertaken off campus as part of a course or approved research work. Further information is available from the La Trobe University Insurance Office website: www.latrobe.edu.au/insurance/ or Faculty or School Office.

Working with children check

The Victorian Department of Education and Training requires a satisfactory criminal record check for all teacher education students undertaking practicum requirements in Victorian Department of Education and Training schools. It is expected that equivalent requirements will exist for all other Victorian schools. Upon first enrolling in teacher education courses, students will be required to complete a 'Working With Children Check' form available at Australia Post offices. Students must provide a certified copy of their valid 'Working With Children' card prior to undertaking teaching placements. Confirmation of a criminal record may jeopardise a student's ability to gain access to a suitable, or any, practicum placement(s) and may therefore delay or prevent completion of the course.

Fees

Both 'Commonwealth supported' and 'fee-paying' places are available. Australian citizens and holders of Permanent Humanitarian visas offered either a Commonwealth supported place or a fee-paying place are eligible to defer the tuition fees by using the HECS-HELP or Fee-HELP Commonwealth Government loan schemes. Further information on HECS-HELP and Fee-HELP can be found at www.goingtouni.gov.au.

Further information on Faculty of Education courses and fees is available on the website: www.latrobe.edu.au/education/courses and www.latrobe.edu.au/education/courses/fees.

Flexible teaching arrangements

In order to accommodate student needs, some units are taught in a mode different from the normal regular weekly classes. For example, modes may include block mode (i.e. intensive weekend or week-long classes), classes taught outside of normal semester dates, classes taught via web-based teaching or a combination of online learning and face-to-face classes.

Units offered by the Faculty of Education

A full list of undergraduate units offered by the Faculty of Education appears at the end of this chapter, in alphabetical order. Students should note that units published in the hardcopy *Handbook* are subject to change and should refer to the Unit Database for up-to-date information: www.latrobe.edu.au/udb_public.

Unit Timetable

Unit timetables are available on the La Trobe website: www.latrobe.edu.au/students/timetables.html or from the Education enquiries office on the campus of enrolment.

Single degrees

Bachelor of Education – Bendigo (RBED)

Bachelor of Education – Mildura (RBEDM)¹

Note: ¹ First year and fourth year only are offered at Mildura. Students in first year at Mildura must transfer to Bendigo for second and third years and have the option of completing fourth year at Mildura or Bendigo.

Note: This course is currently being reaccredited and may vary slightly in 2008.

The course is a four-year full-time program. It consists of 480 credit points of study. Units are categorised as Teaching Studies, Curriculum Studies, Discipline Studies and Electives. Practicum and Field Experience units provide essential school-based experiences that contextualise the theoretical components of Teaching and Curriculum Studies. All students, by the end of the course, must have demonstrated the ability or the potential to meet the professional expectations of a beginning teacher. The course is structured so that students may satisfy other specialist teaching requirements, which may then be noted on their formal academic transcript. Possible pathways are:

- Languages Other Than English (LOTE)
- Middle Years P–9
- Catholic Education
- Honours.

Professional recognition

The course is recognised by the Victorian Institute of Teaching (VIT). Graduates from the course are eligible for employment in government, Catholic and independent schools in Victoria, other Australian states or overseas. Graduates may also pursue a range of careers in the human services and training sectors.

Admission requirements

Applicants must satisfy the University's normal entrance requirements, including a study score of at least 25 in Units 3 and 4 of English. Applicants who have a study score of at least 20 in a LOTE will be deemed to have an ENTER up to 3.0 percentage points higher.

A special entry provision exists for Aboriginal applicants. Applicants should, in the first instance, consult the Coordinator of the Aboriginal Tertiary Support Unit.

The Victorian Department of Education and Training requires a satisfactory criminal record check for all teacher education students undertaking practicum requirements in Victorian Department of Education and Training schools. It is expected that equivalent requirements will exist for all other Victorian schools. Prior to commencing the course, students will be required to complete a 'Working With Children Check' form available at Australia Post offices. Students must provide a certified copy of their valid 'Working With Children' card prior to undertaking teaching placements. Confirmation of a criminal record may jeopardise a student's ability to gain access to a suitable, or any, practicum placement(s) and may therefore delay or prevent completion of the course.

Course structure

(Note: This course is currently being reaccredited and the course structure listed below is subject to change).

Teaching Studies (7 units)

All students will study seven units in preparation for teaching.

Year	Teaching period	Unit name	Unit code	Credit points
1	TE-SEM-1	Introduction to Teaching	EDU1ITT	15
1	TE-SEM-2	Theories of Learning	EDU1TL	15
1	TE-SEM-2	Inclusive Education	EDU1IE	15
2	TE-ALLYR	Practicum B	EDU2PRB	15
2	TE-ALLYR	Practicum C	EDU3PRC	15
4	TE-SEM-1	Field Experience A	EDU4FEA	15
4	TE-SEM-2	Field Experience B	EDU4FEB	15

These units provide the professional orientation and the practical perspectives that complement the curriculum studies.

Curriculum Studies (11 units)

All students will study 11 units in curriculum and methods of teaching in the Key Learning Areas of the primary school.

Year	Teaching period	Unit name	Unit code	Credit points
1	TE-SEM-1	Mathematics Teaching	EDU1MT	15
1	TE-SEM-2	Learning Language	EDU1LL	15
1	TE-SEM-1	Science Teaching	EDU2ST	15
2	TE-SEM-2	Art and Music Education	EDU2AME	15
2	TE-SEM-2	Studies of Soc and Environment	EDU2SOS	15
3	TE-SEM-1	Health and Physical Education	EDU3HPE	15
3	TE-SEM-1	Literacy Teaching	EDU3LT	15

3	TE-SEM-2	Mathematics Learning	EDU3ML	15
3	TE-SEM-2	Science Learning	EDU3SL	15
4	TE-SEM-1	Literacy for All	EDU4LFA	15
4	TE-SEM-2	Numeracy for All	EDU4NFA	15

These units address the dimensions described as the content knowledge and skills for teaching. They include issues such as appropriate content, methods of teaching and strategies for supporting and assessing pupils' learning.

Discipline Studies (minimum 8 units)

All students are required to study a three-unit sequence in a discipline area. Students will be encouraged to choose at least four units in an area that can satisfy the requirements for a minor. The purpose of the discipline studies is to broaden teachers' background knowledge.

Education Discipline Studies

There is also a four-unit sequence in the discipline of education:

Year	Teaching period	Unit name	Unit code	Credit points
1	TE-SEM-1	Learning Technologies	EDU1LT	15
2	TE-SEM-1	The Contemporary Child	EDU2TCC	15
2	TE-SEM-2	Indigenous Studies	EDU2IS	15
3	TE-SEM-1	Education in a Network Society	EDU3ENS	15

These units address the theoretical perspective of education. The thinking and learning undertaken within the units can be generalised to non-school educational contexts.

Electives (6 units)

Students can choose up to six other electives from discipline studies or, in their third and fourth years, advanced teaching and curriculum studies. Students may use their six elective units to satisfy a major in these disciplines, or begin a second minor or major. These electives allow students to pursue their own areas of interest.

Pathways

The course will be structured so that students may satisfy other specialist teaching requirements in particular fields. These will be noted on their formal academic transcript.

Languages Other Than English (LOTE)

Specialist languages include Bahasa Indonesia and Auslan.

LOTE pathway – beginners

Indonesian

Year	Teaching period	Unit name	Unit code	Credit points

4	TE-SEM-1 and TE-SEM-2	Outdoor Education Teaching Method	EDU4OEA/ EDU4OEB	10 10
---	-----------------------	-----------------------------------	---------------------	----------

Key: * LOTE Teaching Method includes vacation classes.

Catholic Education Pathway

This pathway qualifies teachers for accreditation in Religious Studies and Catholic teaching. It includes four elective units that must be completed:

Year	Teaching period	Unit name	Unit code	Credit points
3	TE-SEM-1	Teaching Scripture in Catholic Schools	EDU3TSC	15
3	TE-SEM-2	Learning for Catholic religious education	EDU3LRE	15
4	TE-SEM-1	Catholic religious education Principles and Method	EDU4REP	15
4	TE-SEM-2	Spirituality and Values in Catholic Education	EDU4SVE	15

Honours Pathway

This is a research based pathway for students interested in developing a deeper understanding of a specific topic. It includes a compulsory curriculum unit at year 4. Entry is by invitation only.

Year	Teaching period	Unit name	Unit code	Credit points
4	TE-ALLYR	Education Thesis	EDU4THE	60

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this chapter. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Educational Studies – Bendigo (RBES)

The course is designed for people professionally concerned with education. It is structured to meet a variety of needs of teachers or other professionals who wish to pursue education studies in their field of interest. The course is a pathway to further studies in education but unless it is preceded by a three year recognised primary teaching course, it is not accredited for registration as a teacher in Victoria, Australia. The Bachelor of Educational Studies provides sound foundation studies in education for those wishing to progress to the Graduate Diploma in Education (Primary) which is recognised by the Victorian Institute of Teaching as a one year postgraduate teacher training course for graduates.

Admission requirements

A Bachelor's Degree or a recognised two year tertiary diploma or equivalent.

Course structure

The course consists of 120 credit points of study which may be taken as 15 or 20 credit point units over one-year full-time or part-time equivalent. With the approval of the course convenor, units of study may be selected from those available in the Bachelor of Education, the Graduate Diploma in Educational Studies or other undergraduate or postgraduate programs relevant to the course of study.

Suggested units of study include:

At Bendigo Campus

Year	Teaching period	Unit name	Unit code	Credit points
1	TE-SEM-1	Learning Technologies	EDU1LT	15
2	TE-SEM-1	The Contemporary Child	EDU2TCC	15
2	TE-SEM-2	Indigenous Studies	EDU2IS	15
3	TE-SEM-1	Education in a Network Society	EDU3ENS	15
2	TE-SEM-1	Science Teaching	EDU2ST	15
2	TE-SEM-2	Art and Music Education	EDU2AME	15
2	TE-SEM-2	Studies of Soc and Environment	EDU2SOS	15
3	TE-SEM-1	Health and Physical Education	EDU3HPE	15
3	TE-SEM-1	Literacy Teaching	EDU3LT	15
3	TE-SEM-2	Mathematics Learning	EDU3ML	15
3	TE-SEM-2	Science Learning	EDU3SL	15

4	TE-SEM-1	Literacy for All	EDU4LFA	15
4	TE-SEM-2	Numeracy for All	EDU4NFA	15

Note: Students may select alternative units from those available at the Albury-Wodonga or Melbourne (Bundoora) campuses with the approval of the course advisor.

Bachelor of Physical and Health Education – Bendigo (EBPHEB)

The course provides a qualification to teach in both primary and secondary schools. It combines studies in primary education with specialist studies in physical education, health, welfare and social work. The course is taken over four years full-time and consists of 31 units of study. These units are categorised as Teaching Studies, Curriculum Studies and Discipline Studies. Practicum and Field Experience units provide essential school-based and practical experiences that contextualise the theoretical components of the course. By the end of the course all students must have demonstrated the ability or the potential to meet the professional expectations of a beginning teacher.

Professional recognition

The course provides graduates with accreditation to register with the Victorian Institute of Teaching (VIT) as specialist physical education and health teachers in the years Prep to year-12 and as generalist teachers in primary schools. Students completing this degree will also undertake four units in social work. This allows them to complete a sub-major in welfare studies and equips them to take on welfare positions in schools. Students completing this degree are eligible for employment in government, Catholic and independent schools in Victoria, other Australian states or overseas.

Admissions requirements

Applicants must satisfy normal university entry requirements: completion of VCE or mature age entry. Students require a study score of at least 25 in Units 3 and 4 of English and a study score of 25 or higher in one of Physical Education or Health and Human Development. Special entry provision for NONYR12 is available. The Victorian Department of Education and Training requires a satisfactory criminal record check for all teacher education students undertaking practicum requirements in Victorian Department of Education and Training schools. It is expected that equivalent requirements will exist for all other Victorian schools. Prior to commencing the course, students will be required to complete a 'Working With Children Check' form available at Australia Post offices. Students must provide a certified copy of their valid 'Working With Children' card prior to undertaking teaching placements. Confirmation of a criminal record may jeopardise a student's ability to gain access to a suitable, or any, practicum placement(s) and may therefore delay or prevent completion of the course.

Course structure

The course is a four year full-time program. It consists of 480 credit points of study.

Teaching Studies (5 units)

Students will study five units in preparation for teaching:

Unit name	Unit code	Credit points
Introduction to Teaching	EDU1ITT	15
Theories of Learning	EDU1TL	15
Practicum B	EDU2PRB	15
Practicum C	EDU3PRC	15
Middle Yrs: Num, Lit and Welfare	EDU4NLW	20

Curriculum Studies (7 units)

Students will study seven units in curriculum and methods of teaching in the Key Learning Areas of the primary school:

Unit name	Unit code	Credit points
Mathematics Teaching	EDU1MT	15
Learning Language	EDU1LL	15
Science Teaching	EDU2ST	15
Art and Music Education	EDU2AME	15
Studies of Soc and Environment	EDU2SOS	15

Physical Education: P to 12	EDU2PEM	15
Health Education: P to 12	EDU2HEM	15

Education Discipline Studies (Sub-major)

Students will study a four-unit sequence in the discipline of education:

Unit name	Unit code	Credit points
Learning Technologies	EDU1LT	15
The Contemporary Child	EDU2TCC	15
Indigenous Studies	EDU2IS	15
Education in a Network Society	EDU3ENS	15

Physical Education (Major)

Students will study 12 units in curriculum and methods of teaching in the area of physical education:

Unit name	Unit code	Credit points
Introduction to Outdoor Education	OED1IOE	15
Human Body Systems	EDU1HBS	15
The Contemporary Child	EDU2TCC	15
Exercise and Performance	EDU2EXP	15
Active Lifestyles	EDU4AL	15
Movement Perspectives	EDU2MP	15
Skill Learning	EDU3SKL	15
Social Psychology of Sport	EDU3SPS	15
Sport and Skill Analysis	EDU3SSA	15
Inclusive Sport Education	EDU4INS	15
Sport Injury Management	EDU4SIM	15
Public Health Nutrition	HLT3PHN	15

Health Education (Sub-major)

Students will study four units in curriculum and methods of teaching in the area of health education:

Unit name	Unit code	Credit points
The Contemporary Child	EDU2TCC	15
Relationships, Gender and Sexuality	EDU3RGS	15
Public Health Nutrition	HLT3PHN	15
Human Body Systems	EDU1HBS	15

Social Work Units (Sub-major Welfare Studies)

Students will study four units in social work:

Unit name	Unit code	Credit points
Introduction to Social Work A	SWP1ITP	15
Introduction to Social Work B ¹	SWP2ITP	20
Relationships, Gender and Sexuality	EDU3RGS	15
Social Work Practice with individuals, families and groups	SWP3IFG	20

¹ Should SWP2ITP not be available, the unit SWP1PPI – Policy, Poverty and Inequality shall substitute

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this chapter. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Physical and Outdoor Education – Bendigo (EBPOEB)

The program provides a qualification to teach in secondary schools in the specialist areas of Physical Education and Outdoor Environmental Studies. The course consists of 32 units. These units are categorised as Teaching Studies, Curriculum Studies, Discipline Studies and Electives. Practicum and Field Experience units provide essential school-based and practical experiences that contextualise the theoretical components of the course. By the end of the course, all students must have demonstrated the ability or the potential to meet the professional expectations of a beginning teacher.

Professional recognition

The course entitles graduates to apply for registration with the Victorian Institute of Teaching (VIT) as specialist teachers of years-7 to-12 Outdoor Environmental Studies and Physical Education. VIT-registered graduates are eligible for employment in government,

Catholic and independent schools in Victoria, other Australian states or overseas.

Admissions requirements

Applicants must satisfy the normal University entrance requirements: completion of VCE or alternate mature age entry. Students will also be required to have gained a study score of 25 or higher in one of Physical Education, Health and Human Development or Outdoor Environmental Studies at VCE units 3 and 4 level. (Please note that from 2009, applicants must have VCE mathematics at units 1 and 2 (excluding Foundation maths). For 2007 and 2008 entry, students who have not satisfactorily completed VCE mathematics at units 1 and 2 (excluding Foundation maths) will be required to complete a bridging mathematics program in the first year of the course. Non year-12 applicants must submit a supplementary application form. Those meeting admission requirements but without a year 12 completion in the last three years are required to complete a Special Tertiary Admissions Test (STAT) in numeracy and literacy.

The Victorian Department of Education and Training requires a satisfactory criminal record check for all teacher education students undertaking practicum requirements in Victorian Department of Education and Training schools. It is expected that equivalent requirements will exist for all other Victorian schools. Prior to commencing the course, students will be required to complete a 'Working With Children Check' form available at Australia Post offices. Students must provide a certified copy of their valid 'Working With Children' card prior to undertaking teaching placements. Confirmation of a criminal record may jeopardise a student's ability to gain access to a suitable, or any, practicum placement(s) and may therefore delay or prevent completion of the course.

Course structure

The course is a four year full-time program. It consists of 480 credit points of study.

First year

Teaching period	Unit name	Unit code
TE-SEM-1	Reading Australian Landscapes	OED1RAL
TE-SEM-1	Skill Learning	EDU3SKL
TE-SEM-1	Outdoor Living and Travel Skills	OED1AOL
TE-SEM-1	Sport and Recreation A	OED1SRA
TE-SEM-2	Naturalist Studies	OED1NS
TE-SEM-2	Human Body Systems	EDU1HBS
TE-SEM-2	Worldviews and the Environment	OED1WE
TE-SEM-2	Sport and Recreation B	OED1SRB

Second year

Teaching period	Unit name	Unit code
TE-SEM-1	Bush Environments	OED2BE
TE-SEM-1	Outdoor Leadership A	OED2OLA
TE-SEM-1	Social Psychology of Sport	EDU3SPS
TE-SEM-1	Movement Perspectives	EDU2MP
TE-SEM-2	Environments elective*	
TE-SEM-2	Outdoor Leadership B	OED2OLB
TE-SEM-2	Exercise and Performance	EDU2EXP
TE-SEM-2	Sport and Skill Analysis	EDU3SSA

Third year

Teaching period	Unit name	Unit code
TE-SEM-1	Education in the Outdoors	OED3EO
TE-SEM-1	Learning and Communication Technologies	EDU3LCT
TE-SEM-1	Inclusive Sport Education	EDU4INS
TE-SEM-1	Teaching in Environments elective**	
TE-SEM-2	Field Experience E	OED3FEE
TE-SEM-2	Public Health Nutrition	HLT3PHN
TE-SEM-2	Active Lifestyles	EDU4AL
TE-SEM-2	Indigenous Studies	EDU2IS

Fourth year

Teaching period	Unit name	Unit code
TE-SEM-1	Teaching Practice and Skills (20cp)	EDU4TPS
TE-SEM-1	Outdoor Education Teaching Method (10cp)	EDU4OEA
TE-SEM-1	The Context of Learning (20cp)	EDU4COL
TE-SEM-1	Physical Education Method (10cp)	EDU4PEB

TE-SEM-2	Teaching Practice and Models (20cp)	EDU4TPM
TE-SEM-2	Outdoor Education Teaching Method (10cp)	EDU4OEB
TE-SEM-2	Issues in Secondary Education(20cp)	EDU4SEI
TE-SEM-2	Physical Education Method (10cp)	EDU4PEB

Electives

* Environment electives are selected from: OED2WAE Winter Alpine Environments, OED2RE River Environments and OED2R Rock Environments.

** Teaching in Environments electives are selected from: OED3TWA Teaching in Winter Alpine Environments, OED3TRE Teaching in River Environments, OED3TR Teaching in Rock Environments.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this chapter. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Arts (Natural Resources Education) – Bendigo (EBNRE)

The course provides a comprehensive introduction to outdoor environmental education in community and government organisations, community environmental education, land management and environmental studies. Graduates of the three year course will have a comprehensive mix of natural sciences and natural resources management. Employment opportunities for graduates will be in areas of land management, environmental education and environmental interpretation outside the formal education sector. The course provides a pathway to further studies in the environment or education at the postgraduate level.

Admission requirements

Students should satisfy the normal University entrance requirements, including a study score of at least 20 in Units 3 and 4 of English.

Special requirements

Special entry applicants or students who have completed year-12 more than 12 months prior to application may be invited to attend a selection interview and must complete a Supplementary Information Form. Special entry applicants may also be required to sit for the Special Tertiary Admissions Test (STAT).

Students should ensure they are aware of the physical components and location requirements of the course. Students with a disability, medical condition or any concerns which may affect potential participation in some of the practical components of the course are invited to discuss their options with the course coordinator.

Course structure

The course is a three year full-time program. It consists of 360 credit points of study.

First year

Teaching period	Unit name	Unit code
TE-SEM-1	Biology of the Cell and Organism	BIOICO
TE-SEM-1	Ways of Knowing Nature	OED1WKN
TE-SEM-1	Reading Australian Landscapes	OED1RAL
TE-SEM-1	Outdoor Living and Travel Skills	OED1AOL
TE-SEM-2	Materials Geology	GEO1MG
TE-SEM-2	Naturalist Studies	OED1NS
TE-SEM-2	World Views and the Environment	OED1WE
TE-SEM-2	Outdoor Environments	OED1OEE

Second year

Teaching period	Unit name	Unit code
TE-SEM-1	Ecology	BIO2ECO
TE-SEM-1	Regional Catchment Studies	OED2RCS
TE-SEM-1	Environmental Interpretation	OED2EI
TE-SEM-1	Elective (see below)	
TE-SEM-2	Australian Culture and Land	OED2ACL
TE-SEM-1	Local Environs Study	OED2LES
TE-SEM-2	Environmental Law	LST2EL
TE-SEM-2	Elective (see below)	

Third year

Teaching period	Unit name	Unit code
TE-SEM-1	Teaching Natural History	OED3TNH
TE-SEM-1	Parks and Wildlife Management	OED3PWM
TE-SEM-1	Naturalist Studies: Interpretation	OED3NSI
TE-SEM-1	Elective (see below)	
TE-SEM-2	Politics of Land Management	OED3PLM
TE-SEM-2	Education for Sustainability	OED3ES
TE-SEM-2	Elective (see below)	
TE-SEM-2	Elective (see below)	

Electives

Units available from other courses may be taken as electives, subject to timetable considerations and the meeting of prerequisites. Where possible, core units are timetabled to enable students to have access to selected electives in the following disciplines: biology, economics, geology, marketing, photojournalism and sociology and cultural studies.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this chapter. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Arts (Nature Tourism) – Bendigo (RBANT)

Nature tourism involves the study of natural environments, human-nature relationships and the practice of nature guiding and environmental interpretation. The course features a three year sequence of environmental studies, nature tourism, education theory about leading and guiding groups in the outdoors and outdoor and field naturalist practice. Students undertake at least 90 days of practical work, specialist studies in nature tourism, environmental studies and land management. They also take elective studies from other disciplines such as economics, marketing, geography, or biology.

Graduates may gain work as nature guides and planners in the nature tourism industry, land management agencies and in other settings such as school camps and nature centres. They may undertake further training in business to work as owner-operators of nature tourism businesses. When combined with a Graduate Diploma in Education the course leads to a teaching qualification in either primary or secondary schools.

Admission requirements

Students should satisfy the normal University entrance requirements, including a study score of at least 20 in Units 3 and 4 of English.

Special requirements

Special entry applicants or students who have completed year-12 more than 12 months prior to application may be invited to attend a selection interview and must complete a Supplementary Information Form. Special entry applicants may also be required to sit for the Special Tertiary Admissions Test (STAT).

Students should ensure they are aware of the physical components and location requirements of the course. Students with a disability, medical condition or any concerns, which may affect potential participation in some of the practical components of the course, are invited to discuss their options with the course coordinator.

Course structure

The course is a three year full-time program. It consists of 360 credit points of study.

First year

Teaching period	Unit name	Unit code
TE-SEM-1	Ways of Knowing Nature	OED1WKN
TE-SEM-1	Outdoor Living and Travel Skills	OED1AOL
TE-SEM-1	Reading Australian Landscapes	OED1RAL
TE-SEM-1	Elective (see below)	
TE-SEM-2	Worldviews and the Environment	OED1WE
TE-SEM-2	Naturalist Studies	OED1NS
TE-SEM-2	Outdoor Environments	OED1OEE
TE-SEM-2	Elective (see below)	

Second year

Teaching period	Unit name	Unit code
TE-SEM-S	River and Wetland Environments	OED2RWE
TE-SEM-1	Regional Catchment Studies	OED2RCS
TE-SEM-1	Environmental Interpretation	OED2EI
TE-SEM-1	Elective (see below)	
TE-SEM-2	Australian Culture and Land	OED2ACL
TE-SEM-2	Bush Environments	OED2BE
TE-SEM-2	Sustainable Nature Tourism	OED2SNT
TE-SEM-2	Elective (see below)	

Third year

Teaching period	Unit name	Unit code
TE-SEM-1	Education in Outdoors	OED3EO
TE-SEM-1	Parks and Wildlife Management	OED3PWM
TE-SEM-1	Naturalist Studies: Interpretation	OED3NSI
TE-SEM-1	Elective (see below)	
TE-SEM-2	Politics of Land Management	OED3PLM
TE-SEM-2	Education for Sustainability	OED3ES
TE-SEM-2	Nature Tourism Practicum	OED3NTP
TE-SEM-2	Elective (see below)	

Electives

Units available from other courses may be taken as electives, subject to timetable considerations and the meeting of prerequisites. Where possible, core units are timetabled to enable students to have access to selected electives in the following disciplines: biology, economics, geology, marketing, photojournalism and sociology and cultural studies.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this chapter. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Arts (Outdoor Education) – Bendigo (RBAOE)

Outdoor education is the study of the relationships humans have with nature through outdoor experiences. The program is designed for motivated students who seek careers in outdoor education, adventure guiding, environmental education or related fields. A strong emphasis is placed on environmental knowledge and gaining practical experience. The course combines practical fieldwork outdoor activities with theoretical studies. Core fieldwork units include: bushwalking, paddling, cross-country skiing, rock climbing and naturalist studies. The academic perspective centres on how knowledge is shaped by new environments and how the environment, in turn, is shaped by our thoughts and practices. The theoretical aspects of the program include: environmental science studies and outdoor education concepts drawn from psychology, education, eco-psychology, environmental ethics and eco-philosophy. Students undertake a minimum of 130 days of practical work over three years. Graduates from the course are employed by schools, at camps, in outdoor travel and by land management authorities and commercial outdoor companies. When combined with the Graduate Diploma in Education (Primary or Secondary) the course leads to a teaching qualification in either primary or secondary schools. Graduates may also go on to the Bachelor of Arts (Honours) (Outdoor Education) and/or to Masters and Doctoral study.

Professional recognition

The Bachelor of Arts (Outdoor Education). Has been accepted by the Victorian Institute of Teaching for recognition as preparation for teaching in primary and secondary schools when combined with a fourth year Graduate Diploma in Education.

Admission requirements

Students should satisfy the normal university entrance requirements, including a study score of at least 20 in Units 3 and 4 of English.

Special requirements

Special entry applicants or students who have completed year-12 more than 12 months prior to application may be invited to attend a selection interview and must complete a Supplementary Information Form. Special entry applicants may also be required to sit for the Special Tertiary Admissions Test (STAT). Applicants must ensure that they are physically fit to undertake course activities.

Students should ensure they are aware of the physical components and location requirements of the course. Students with a disability, medical condition or any concerns which may affect potential participation in some of the practical components of the course are invited to discuss their options with the course coordinator.

Course structure

The course is a three year full-time program. It consists of 360 credit points of study.

First year

Compulsory units:

Teaching period	Unit name	Unit code
TE-SEM-1	Ways of Knowing Nature	OED1WKN
TE-SEM-1	Outdoor Living and Travel Skills	OED1AOL
TE-SEM-1	Field Experience A	OED1AFE
TE-SEM-1	Reading Australian Landscapes	OED1RAL
TE-SEM-2	Worldviews and the Environment	OED1WE
TE-SEM-2	Naturalist Studies	OED1NS
TE-SEM-2	Field Experience B	OED1BFE
TE-SEM-2	Outdoor Environments	OED1OEE

Second year

Compulsory units:

Teaching period	Unit name	Unit code
TE-SEM-S	Field Experience C	OED2FEC
TE-SEM-1	Outdoor Leadership A	OED2OLA
TE-SEM-1	Environment Elective 1 *	
TE-SEM-1	Elective (not environment elective)	
TE-SEM-2	Australian Culture and Land	OED2ACL
TE-SEM-2	Outdoor Leadership B	OED2OLB
TE-SEM-2	Environment Elective 2*	
TE-SEM-2	Elective (not environment elective)	

*Outdoor Environment Electives:

TE-SEM-1	Bush Environments	OED2BE
TE-SEM-1	Rock Environments	OED2RE
TE-SEM-2	Local Environs Study	OED2LES
TE-SEM-2	River Environments	OED2RE
TE-SEM-2	Winter Alpine Environments	OED2WAE

Third year

Compulsory units:

Teaching period	Unit name	Unit code
TE-SEM-1	Education in the Outdoors	OED3EO
TE-SEM-1	Field Experience D	OED3FED
TE-SEM-1	Teaching Environment Elective 1*	
TE-SEM-1	Elective (not environment elective)	
TE-SEM-2	Teaching and Program Development	OED3TPD
TE-SEM-2	Field Experience E	OED3FEE
TE-SEM-2	Teaching Environment Elective 2*	
TE-SEM-2	Elective (not environment elective)	

*Teaching Environment Electives:

TE-SEM-1	Teaching in Bush Environments	OED3TBE
TE-SEM-1	Teaching in Rock Environments	OED3TR
TE-SEM-2	Teaching in River Environments	OED3TRE
TE-SEM-2	Teaching in Winter Alpine Environments	OED3TWA

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this chapter. For the most recent descriptions of units students should access the Unit Database www.latrobe.edu.au/udb_public.

Bachelor of Arts (Outdoor Environmental Education) – Bendigo (EBOEE)

The course prepares students for teaching and leading in fields relevant to outdoor environmental education with emphasis on natural history, environmental studies and social and cultural aspects of the environment. The course is similar to the Bachelor of Arts (Outdoor Education) but provides the opportunity for students to become more specialised in fewer environments with a focus on environmental education studies. Graduates are employed in formal and informal education settings, local government agencies and commercial providers of outdoor environmental education or outdoor education. Teaching in government schools requires an additional one year Graduate Diploma in Education (Primary or Secondary).

Admission requirements

Students should satisfy the normal university entrance requirements, including a study score of at least 20 in Units 3 and 4 of English.

Special requirements

Special entry applicants or students who have completed year-12 more than 12 months prior to application may be invited to attend a selection interview and must complete a Supplementary Information Form. Special entry applicants may also be required to sit for the Special Tertiary Admissions Test (STAT). Applicants must ensure that they are physically fit to undertake course activities.

Students should ensure they are aware of the physical components and location requirements of the course. Students with a disability, medical condition or any concerns, which may affect potential participation in some of the practical components of the course, are invited to discuss their options with the course coordinator.

Course structure

The course is a three year full-time program. It consists of 360 credit points of study.

First year

Compulsory units:

Teaching period	Unit name	Unit code
TE-SEM-1	Ways of Knowing Nature	OED1WKN
TE-SEM-1	Outdoor Living and Travel Skills	OED1AOL
TE-SEM-1	Field Experience A	OED1AFE
TE-SEM-1	Reading Australian Landscapes	OED1RAL
TE-SEM-2	Worldviews and the Environment	OED1WE
TE-SEM-2	Naturalist Studies	OED1NS
TE-SEM-2	Field Experience B	OED1BFE
TE-SEM-2	Outdoor Environments	OED1OEE

Second year

Teaching period	Unit name	Unit code
TE-SEM-1	River and Wetland Environments	OED2RWE
TE-SEM-1	Outdoor Leadership A	OED2OLA
TE-SEM-1	Environmental Interpretation	OED2EI
TE-SEM-1	Elective	
TE-SEM-2	Australian Culture and Land	OED2ACL
TE-SEM-2	Local Environs Study	OED2LES
TE-SEM-2	Bush Environments	OED2BE
TE-SEM-2	Elective (Not Outdoor Leadership B)	

Third year

Teaching period	Unit name	Unit code
TE-SEM-1	Education in the Outdoors	OED3EO
TE-SEM-1	Field Experience D	OED3FED
TE-SEM-1	Teaching Natural History	OED3TNH
TE-SEM-1	*Elective	
TE-SEM-2	Teaching and Program Development	OED3TPD
TE-SEM-2	Education for Sustainability	OED3ES
TE-SEM-2	Field Experience E	
TE-SEM-2	*Elective	OED3FEE

* Electives cannot be Outdoor Environment units or Teaching Environment units

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements,

assessment, prerequisites and readings, appears at the end of this chapter. For the most recent descriptions of units students should access the Unit Database www.latrobe.edu.au/udb_public.

Bachelor of Arts (Outdoor Recreation Education) – Bendigo (EBORE)

The course prepares students for teaching and leading in fields relevant to outdoor recreation education with an emphasis on environmental and social responsibility and cultural aspects of outdoor recreation. The course is similar to the Bachelor of Arts (Outdoor Education) but provides the opportunity for students to become expert at activities in a wider range of environments. Graduates are employed in informal education settings, by youth at risk agencies, local government agencies and commercial outdoor recreation providers. The course involves 160 days of practical experience throughout the course. Elective study units include: bushwalking, rock climbing, cross-country skiing, cycling, paddling and naturalist studies. Teaching in government schools requires additional completion of a one year Graduate Diploma in Education (Primary or Secondary).

Professional recognition

The Bachelor of Arts (Outdoor Recreation Education). Has been accepted by the Victorian Institute of Teaching for recognition as preparation for teaching in primary and secondary schools when combined with a fourth year Graduate Diploma in Education.

Admission requirements

Students should satisfy the normal university entrance requirements, including a study score of at least 20 in Units 3 and 4 of English.

Special requirements

Special entry applicants or students who have completed year-12 more than 12 months prior to application may be invited to attend a selection interview and must complete a Supplementary Information Form. Special entry applicants may also be required to sit for the Special Tertiary Admissions Test (STAT). Applicants must ensure that they are physically fit to undertake course activities.

Students should ensure they are aware of the physical components and location requirements of the course. Students with a disability, medical condition or any concerns which may affect potential participation in some of the practical components of the course are invited to discuss their options with the course coordinator.

Course structure

The course is a three year full-time program. It consists of 360 credit points of study.

First year

Compulsory units:

Teaching period	Unit name	Unit code
TE-SEM-1	Ways of Knowing Nature	OED1WKN
TE-SEM-1	Outdoor Living and Travel Skills	OED1AOL
TE-SEM-1	Field Experience A	OED1AFE
TE-SEM-1	Reading Australian Landscapes	OED1RAL
TE-SEM-2	Worldviews and the Environment	OED1WE
TE-SEM-2	Naturalist Studies	OED1NS
TE-SEM-2	Field Experience B	OED1BFE
TE-SEM-2	Outdoor Environments	OED1OEE

Second year

Teaching period	Unit name	Unit code
TE-SEM-S	Field Experience C	OED2FEC
TE-SEM-1	Outdoor Leadership A	OED2OLA
TE-SEM-1	Bush Environments or	OED2BE
TE-SEM-1	Local Environs study	OED2LES
TE-SEM-1	Rock Environments	OED2R
TE-SEM-2	Australian Culture and Land	OED2ACL
TE-SEM-2	Outdoor Leadership B	OED2OLB
TE-SEM-2	Winter Alpine Environments	OED2WAE
TE-SEM-2	River Environments	OED2RE

Third year

Compulsory units:

Teaching period	Unit name	Unit code
TE-SEM-1	Education in the Outdoors	OED3EO
TE-SEM-1	Field Experience D	OED3FED
TE-SEM-1	Teaching Environment Elective 1*	
TE-SEM-1	Teaching Environment Elective 2*	
TE-SEM-2	Teaching and Program Development	OED3TPD
TE-SEM-2	Field Experience E or elective**	OED3FEE
TE-SEM-2	Teaching Environment Elective 3*	
TE-SEM-2	Outdoor Environmental Education Practical Extension	OED3OPE

*Teaching Environment Electives:

TE-SEM-1	Teaching in Bush Environments	OED3TBE
TE-SEM-1	Teaching in Rock Environments	OED3TR
TE-SEM-2	Teaching in River Environments	OED3TRE
TE-SEM-2	Teaching in Winter Alpine Environments	OED3TWA

** Year-3 elective: To permit those who wish to be teachers to be eligible for geography teaching method.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this chapter. For the most recent descriptions of units students should access the Unit Database www.latrobe.edu.au/udb_public.

Double degrees

Bachelor of Science/Bachelor of Science Education – Bendigo (SZSSEB)

This innovative double degree has been developed in response to the Federal Government's 'Innovation Statement' and aims to integrate full science degree studies with a complete teaching qualification, with a particular emphasis on mathematics, statistics (taught as part of mathematics in secondary schools), physics, chemistry and/or information technology. Graduates of this double degree will have a deepened understanding of their teaching units and will be equipped to adapt their teaching to engage with the needs of their teaching settings, including their own students and the nature of the areas of knowledge and behaviour that constitute the discipline. In this program, emphasis is placed on the teacher's ability to adapt teaching to continually changing circumstances while fostering deep understanding of relevant areas of scientific disciplines.

Please note: students must undertake a 'Working with Children' check form, available from Australia Post offices. Students must provide a certified copy of their valid 'Working with Children' card, prior to undertaking teaching placements in schools.

Course structure

This double degree is of four and a half years full-time or equivalent part-time duration and requires the completion of 540 credit points overall. Students may complete this double degree in four years as part of an accelerated study program.

Students will gain a foundation in science in the first year. Combined studies in science and education will commence in the second year and continue during the third year. Two science disciplines must be studied through to third year: the major discipline comprising units to the value of 60 credit points in the third year and the minor discipline, 30 credit points. The major discipline must be one of mathematics, statistics, physics, chemistry or information technology. The minor discipline may also be chosen from among the major discipline areas or from any other science discipline offered by the Faculty of Science, Technology and Engineering. The science disciplines are those defined for the Bachelor of Science degree. The final year will consist of full teacher training, including the practicum requirement and will include a combined science and education project. Normally, students would be expected to have satisfactorily completed all of the requirements for the first three years before progressing to the fourth year.

Note:

- Your unit choices at first and second year must ensure that one of mathematics, physics, chemistry, statistics, or information technology can be taken as a major at third year level. Physics is available as a minor discipline only at Bendigo.

- Note that students taking physics or computer science may need to transfer to the Bundoora campus for the second and third year levels of their degree.
- Note also that the major and the minor cannot be both mathematics and statistics as double mathematics method is not offered in Education.
- You will be qualified to teach units corresponding to your chosen major and minor disciplines but not units corresponding to your terminating first year science discipline. If you major or minor in physics or chemistry, you will also be qualified to teach secondary school general science. As general science also covers biology, such students should consider taking a first year biology unit as a first year level elective.
- The research project must relate to science education or mathematics education.
- All units must be chosen in consultation with and approved by, the course coordinator
- In some cases core education units might not be available on the Bendigo campus. In which case, equivalent units will be offered.

First year (120 credit points)

30 credit points in each of three different science disciplines (with regard to the above requirement) 90
 first year level electives (Education units excluded) 30
 Note: the maximum number of credit points in any one science discipline is 45.

Second year (140 credit points)

at least 40 credit points in each of two different science disciplines 80
 up to 20 credit points second year level elective(s) (chosen from any discipline and which may be a further science or education unit) 20
 TE-SEM-1 Teaching Practice A EDU2TPA 20
 TE-SEM-1 Science and Technology in Contemporary Society EDU5STC 20

Third year (140 credit points)

TE-SEM-1 or Science Education Mentoring EDU3SEM 10
 TE-SEM-2
 60 credit points chosen from one of the following disciplines: mathematics, physics, chemistry, statistics, computer science or information technology 60
 30 credit points chosen from a single science discipline (which differs from that already chosen as the major discipline) 30
 TE-SEM-S Issues in Education EDU4IIE 20
 TE-SEM-2 Teaching Practice B EDU3TPB 20

Fourth year (140 credit points)

TE-SEM-1 Context of Learning EDU4COL 20
 TE-SEM-1 Teaching Practice and Skills EDU4TPS 20
 TE-SEM-1 or Research Practicum 1 EDU4RP 20
 TE-SEM-2
 TE-SEM-2 Issues in Secondary Education EDU4SEI 20
 TE-SEM-2 Teaching Practice and Models EDU4TPM 20
Plus two method units to be chosen from the following list:
 TE-SEM-1 and Chemistry Teaching Method A EDU4CHA 10
 TE-SEM-2 Chemistry Teaching Method B EDU4CHB 10
 TE-SEM-1 and IT Teaching Method A EDU4ITA 10
 TE-SEM-2 IT Teaching Method B EDU4ITB 10
 TE-SEM-1 and Mathematics Teaching Method A EDU4MAA 10
 TE-SEM-2 Mathematics Teaching Method B EDU4MAB 10
 TE-SEM-1 and Physics Teaching Method A EDU4PHA 10
 TE-SEM-2 Physics Teaching Method B EDU4PHB 10
 TE-SEM-1 and Science Teaching Method A EDU4SCA 10
 TE-SEM-2 Science Teaching Method B EDU4SCB 10

Elective units may be chosen from the newly accredited Bachelor of Education course, the Graduate Diploma of Technology Education or the Graduate Diploma of Special Education. Electives should be chosen in consultation with the appropriate Course Administrator in the School of Education.

Honours degrees**Bachelor of Education with Honours – Bendigo (RBED)**

Please refer to the Honours Pathway in the entry for Bachelor of Education.

Bachelor of Arts (Honours) (Nature Tourism) – Bendigo (RHANT)

This course provides a fourth year of theoretical and practical studies for high-achieving students. The year has a research focus and is intended to provide a basis for further study at the Masters and Doctoral levels. In addition to writing an Honours thesis, each student must undertake a specialised coursework program.

Admission requirements

Applicants must have achieved highly in the Bachelor of Arts (Nature Tourism) with a performance at B level demonstrated in substantial parts of the course, with an overall average of C or above. Third year and second year results are weighted more heavily than first year results. Normally, students will not be permitted to enrol more than two years after completing a pass degree.

Course structure

The course can be undertaken by full-time study for one year or part-time study for two years. It is valued at 120 credit points.

Teaching period	Unit name	Unit code
TE-ALLYR	Research Thesis (Outdoor Education and Nature Tourism Honours)	OED4TON
TE-SEM-1	Outdoor Education and Nature Tourism Honours Seminar A	OED4SEA
TE-SEM-1	Research Methods in Outdoor Education and Nature Tourism Honours	OED4RM

Electives

Students must take two additional units which may be chosen from the following or from other units offered in the School or in other schools or universities, with approval from the Honours Coordinator.

Teaching period	Unit name	Unit code
TE-SEM-1	Regional Catchment Studies	OED2RCS
TE-SEM-1 or	Readings Outdoor Education Honours	OED4RD
TE-SEM-2	Outdoor Education and Nature Tourism Honours Seminar B	OED4SEB

Regulations

The Chief Examiners' Meeting has specific responsibility for determining an appropriate degree classification for each candidate, based on the weightings of grades allocated to the Seminar A, Research Methods, two elective units (12.5% each) and the research project (50%). A candidate must satisfactorily complete the research project in order to graduate. Normally, a candidate who fails to satisfy the examiners will not be permitted to repeat the course or to write supplementary examinations.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this chapter. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public.

Bachelor of Arts (Honours) (Outdoor Education) – Bendigo (RHAOE)

This course provides a fourth year of theoretical and practical studies for high-achieving students. The year has a research focus and is intended to provide a basis for further study at the Masters and Doctoral levels. In addition to writing an Honours thesis, each student must undertake a specialised coursework program.

Admission requirements

Applicants must have achieved highly in a Bachelor of Arts (Outdoor Education) with a performance at B level demonstrated in substantial parts of the course, with an overall average of C or above. Third year and second year results are weighted more heavily than first year results. Normally, students will not be permitted to enrol more than two years after completing a pass degree.

Course structure

The course can be undertaken by full-time study for one year or part-time study for two years. It is valued at 120 credit points.

Teaching period	Unit name	Unit code
TE-ALLYR	Research Thesis (Outdoor Education and Nature Tourism Honours)	OED4TON
TE-SEM-1	Outdoor Education and Nature Tourism Honours Seminar A	OED4SEA
TE-SEM-1	Research Methods in Outdoor Education and Nature Tourism Honours	OED4RM

Electives

Students must take two additional units, which may be chosen from the following or from other units offered in the School or in other schools or universities, with approval from the Honours Coordinator.

Teaching period	Unit name	Unit code
TE-SEM-1	Regional Catchment Studies	OED2RCS
TE-SEM-1 or TE-SEM-2	Readings Outdoor Education Honours	OED4RD
TE-SEM-2	Outdoor Education and Nature Tourism Honours Seminar B	OED4SEB

Regulations

The Chief Examiners' Meeting has specific responsibility for determining an appropriate degree classification for each candidate, based on the weightings of grades allocated to the Seminar A, Research Methods, two elective units (12.5% each) and the research project (50%). A candidate must satisfactorily complete the research project in order to graduate. Normally, a candidate who fails to satisfy the examiners will not be permitted to repeat the course or to write supplementary examinations.

A full description of units, including the unit name, unit code, credit points, campus/location, unit coordinator, class requirements, assessment, prerequisites and readings, appears at the end of this chapter. For the most recent descriptions of units students should access the Unit Database at www.latrobe.edu.au/udb_public.

EDU1GCL GENRES IN CHILDREN'S LITERATURE (15. CPs Sem. TE-SEM-1 BE, MI.) *BE: Mr David Beagley, MI: Ms Deb Neal*

In this unit, students study current theories of genres relating to children's literature as a form of social practice. Topics covered include modernist and post modern picture books, traditional European folk and fairy tales, fantasy and realistic fiction and poetry.

Class requirements: Two 1-hour lectures and one 2-hour tutorial-workshop per week.

Assessment: One 1500-word written assignment (30%), one weekly readings diary – equivalent to 1000 words (20%), evidence of tutorial preparation through participation (10%), one 2-hour written examination (40%)

Recommended Reading:

Anstey, M and Bull, G. (2000) *Reading the Visual: Written and Illustrated Children's Literature* Sydney: Harcourt Australia

EDU1HBS HUMAN BODY SYSTEMS (15. CPs Sem. TE-SEM-2 BE.) *Dr Ashley Woodcock*

This subject is a prerequisite for the second year general studies subjects, Biomechanics and Exercise Physiology as well as the fourth-year subject, Sports Medicine.

This unit aims to provide students with a basic knowledge of the structure, functions and interrelationships of the major anatomical and physiological systems of the human body directly related to movement. Through a series of interactive lectures and laboratory classes students will investigate basic terminology and the basis of structure and function of the skeletal, muscular, circulatory and respiratory systems.

Class requirements: One 2-hour lecture and one 2-hour laboratory session per week.

Assessment: Weekly practical work (40%), one 1.5-hour mid-semester test (30%), one 1.5-hour end of semester examination (30%)

Prescribed Reading:

Marieb, EN. (2003) *Anatomy and physiology colouring workbook* (7th edn. San Francisco, Cal: Benjamin Cummings
Marieb, EN. (2003) *Essentials of human anatomy and physiology* (7th) San Francisco, Cal: Benjamin Cummings

EDU1HCL HISTORY OF CHILDREN'S LITERATURE 1 (15 CPs Sem. TE-SEM-2 BE, MI.) *BE: Mr David Beagley, MI: Ms Debbie Neal*

In this unit, students investigate the influence of traditional literature on themes and genres in nineteenth and early twentieth century texts for children. Topics covered include myths, legends, folk and fairy tales and their influence on the emergence of the genres of fantasy and realism.

Prerequisite: EDU11GCL.

Class requirements: Two 1-hour lectures and one 2-hour tutorial per week.

Assessment: One set of WebPages, with research notes (equivalent to a 1500–2000 word essay) (30%), one annotated bibliography (equivalent to a 1000-word essay) (10%), evidence of tutorial preparation through participation (10%), one 2-hour final examination (40%)

Recommended Reading:

EDU1IE INCLUSIVE EDUCATION: STUDENT DIVERSITY, WELFARE AND INCLUSION (15 CPs Sem. TE-SEM-2 BE, MI.) *BE: Ms Cherry Rattue, MI: Mrs Debra Neal*

In this unit, students are provided with an introduction to the philosophy and concepts underlying the well-being of all students with specific focus on inclusive education and student welfare. As part of this unit students will consider the functional implications of student diversity and the pedagogical process and practical adaptations that enable teachers to include students with additional learning, behavioural, emotional and environmental needs. The provision of challenging learning activities through the effective differentiation of the curriculum will be explored.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 2-hour examination (40%), One 1250-word assignment (30%), Attendance, class participation and Practicum observation report – equivalent to a 1250-word essay (30%)

Prescribed Reading:

As detailed annually in the anthology *Anthology of Readings: Welfare, Disability and Inclusion* Bendigo: La Trobe University

Recommended Reading:

Ashman, A and Elkins, J (Eds) (2002) *Educating Children with Diverse Abilities* Australia: Prentice Hall

EDU1ITT INTRODUCTION TO TEACHING PRACTICE (15 CPs Sem. TE-SEM-1 BE, MI.) *Mr Wilf Savage*

In this unit, students will engage in a lecture–tutorial program combined with school-based activities to study how students learn and what teachers must do so that learning can be maximised. The focus for the unit is primarily upon the role of the teacher in the learning experience and the content of the lecture–tutorial program draws upon, yet simultaneously illuminates the experiences of students in the concurrent practicum program.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week 12 days of school experience.

Assessment: One 10-minute tutorial presentation (20%), one 750-word essay (15%), a 1250-word essay (25%), practicum reports (performance assessed by reports from practicum supervisors) (10%). 12 days of (compulsory) supervised teaching practice – hurdle requirement. Satisfactory participation and performance to defined exit standards are required to meet the compulsory hurdle assessment, one 1-hour examination (30%)

EDU1LL LEARNING, LANGUAGE AND ENGLISH/LITERACY (15 CPs Sem. TE-SEM-2 BE, MI.) *BE: Ms Debra Edwards, MI: Ms Deb Neal*

In this unit students will be involved in the development of self knowledge including an understanding of the influence of their identities and cultures on their development as English/Literacy teachers. Personal competencies including an explicit knowledge about language codes and conventions and the use of technologies to enhance personal learning and as a way of ensuring currency of curricular policies, programs and resources will be considered. Students will be introduced to the developmental nature of language and literacy learning and knowledge of a range of language and literacy learning theories and associated approaches and programs with a focus on the early years of schooling.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 1500-word assignment (30%), one 2-hour examination (40%), Attendance, participation and completion of weekly class activities, equiv to 1000-word essay (30%). Students will be expected to keep a 'Learning Language Notebook' recording reading and preparation for lectures and tutorials, tutorial and WebCT activities and lecture notes.

EDU1LT LEARNING TECHNOLOGIES – INFORMATION/COMMUNICATION (15 CPs Sem. TE-SEM-1 BE, MI.) *Ms Chris Campbell*

In this unit students develop information literacy knowledge, skills and values required for both the application of technology in teaching and learning as well as learning to teach about technology. Topics for

this unit include the Internet, software applications for educators, integrating multimedia and educational software applications as well as creating curriculum materials. Issues to be addressed will include those related to ethics, sociology, psychology and communications theory. This unit provides an introduction to practical computing skills and the integration of technology into the classroom. Students will be assisted to achieve the learning outcomes endorsed by the Victorian Institute for Teaching.

Class requirements: Two 1-hour lectures and one 1-hour tutorial-workshop per week.

Assessment: Computer laboratory set activities including online activities – equivalent to a 2000-word essay (40%), Multi-page educational website equivalent to 1000-word essay (25%), individual task, digital portfolio equivalent to one 1500-word essay (35%), individual task

Prescribed Reading:

EDU1MT THE TEACHING OF NUMBER, CHANCE AND DATA AND ALGEBRA (15 CPs Sem. TE-SEM-1 BE, MI.) *Dr Dona Martin*

Using concepts drawn from the topics of number, chance and data and algebra, the structure of mathematics, the goals of mathematics teaching, the nature of the mathematics curriculum and ways of engaging pupils in mathematics learning are explored. Students will be given the opportunity to broaden their personal understandings of and attitudes to, these key mathematical concepts using problem-solving and investigative approaches. The students will examine how understanding of these key mathematical concepts contributes to the development of numerate citizens and how such approaches contribute to their own learning and the implications for their mathematics teaching.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: One 15-minute content assignment (10%). It is a hurdle requirement that all students demonstrate appropriate understanding of relevant mathematical content for primary teaching, one 2-hour examination (40%), one 1000-word assignment (30%), one 15-minute tutorial presentation and one 1000-word assignment (20%).

EDU1MUA INTRODUCTION TO MUSIC LANGUAGE AND CULTURE (15 CPs Sem. TE-SEM-1 BE.) *Mr Peter Butler***PART A Lecture series**

This unit is a general introduction to music using both formal lectures and practical 'hands on' experiences designed to give the student a personal and developing insight into the music of western and non-western societies. The program includes theoretical fundamentals – meter including rhythmic note grouping, rests, scales and keys along with practical vocal and instrumental classroom exercises for developing aural and rhythmic discrimination. In-class and individual weekly practice on the ear-training Program Auralia in the computer Lab will also be undertaken.

PART B Piano laboratory

Chordal piano playing method. Major, minor and seventh chords in all of their inversions on the keyboard. Techniques for providing a pianistic accompaniment to any song in which only the melody and chords are given. A variety of playing styles will be taught.

Class requirements: One 2-hour lecture and one 1-hour piano laboratory per week.

Assessment: One 1000-word assignment (15%), one 10-minute seminar presentation (15%), one 10-minute individual piano examination (40%), one 2-hour final examination (30%)

Prescribed Reading:

Alberts *Adult All-in-One Level 1 Piano Course* Alberts

EDU1MUB MUSIC B (15 CPs Sem. TE-SEM-2 BE.) *Mr Peter Butler*

PART A Lecture series

The History unit aims to familiarise students with the key aspects of musical form and style during the Baroque, Rococo, Classical and Romantic periods, 1700–1900. Theoretical Studies continues on from Music A in building the students' knowledge of music theory in terms of both aural recognition and written notation – scales, intervals and triads. Aural training and sight-singing builds on Music A in developing reading fluency and the aural discrimination of rhythm, intervals, scales, chords and melodic dictation.

PART B Instrumental Tuition

Students undertake ten weeks of instrumental tuition on any instrument outside of the university. Students may continue with a pre-existing instrument or commence with a new instrument.

Prerequisite: EDU1MUA.

Class requirements: One 2-hour lecture, one 30-minute individual instrumental lesson and one 30-minute individual aural practice (Auralia Program) per week.

Assessment: One 1000-word assignment (15%), one 10-minute individual instrumental examination (30%), one 1.5-hour final examination (40%), one 1000-word assignment (15%)

Prescribed Reading:

Butler, P. *Music B Readings and Lecture Notes* Bendigo: La Trobe University, Media Services

EDU1TL THEORIES OF LEARNING (15 CPs Sem. TE-SEM-2 BE, MI.) *Dr*

Craig Deed

A lecture–tutorial program based on the second half of a full-year study associated with how students learn and what teachers must do so that learning can be maximised. The unit is designed to familiarise students with established theories, which attempt to explain the nature of learning, how it happens and the forces which influence human motivation.

Prerequisite: EDU11ITT, EDU1ITT.

Class requirements: Two 1-hour lectures and one 1-hour tutorial per week.

Assessment: Tutorial participation and one oral tutorial presentation equivalent to a 1000-word essay (20%), one 1500-word essay (30%), Completion of two Online modules-equivalent to 1000-word essay (20%), one practicum journal (reflective) of 2000 to 3000 words (equivalent to a 1000-word essay) (20%), school practicum supervisors report (10%), 8 day practical work hurdle (compulsory). Satisfactory participation and performance to defined exit standards are required to meet the compulsory hurdle assessment

EDU2ACL AUSTRALIAN CONTEMPORARY CHILDREN'S LITERATURE (15

CPs Sem. TE-SEM-1 BE.) *Mr David Beagley*

In this unit, students analyse recent trends in and critical perspectives on, contemporary Australian children's literature including print and non-print texts.

Prerequisite: EDU1GCL

EDU1HCL.

Class requirements: Two 1-hour lectures per week and one 2-hour tutorial-workshop per week.

Assessment: One 1500 to 2000-word assignment (30%), commentaries and reviews – equivalent to a one 1000-word assignment (20%), evidence of tutorial preparation through participation (10%), one 2-hour final examination (40%)

EDU2AME ART AND MUSIC EDUCATION (15 CPs Sem. TE-SEM-2 BE.) *Dr*

Penelope Collet

This unit provides an introduction to teaching the arts with focus on contemporary directions in early childhood and primary education. The focus on visual art and music curricula includes practical and arts appreciation skills, teaching strategies and activities appropriate for the classroom. The music and art components examine arts frameworks from across Australia and overseas, aesthetics, middle years, indigenous cultures and current research into art education. The unit aims to equip the students with an understanding of the constantly evolving nature of and philosophy of the arts and its implications on curriculum design.

Class requirements: Two 1-hour lectures per week two 1-hour tutorials per week.

Assessment: One 1250-word essay (25%), 10 folio reports equally 1250 words in total (25%), one 15-minute practical test (15%), one 1000-word assignment (20%) and one 1-hour examination (15%)

Prescribed Reading:

Butler, P. (2003) *Book of Readings for Music Education* Bendigo: La Trobe University

Penelope Collet

Not available in 2008

EDU2EXP EXERCISE AND PERFORMANCE (15 CPs Sem. TE-SEM-2 BE.) *Mr*

Ashley Woodcock

Through a series of interactive lectures and practical laboratory classes students will examine the physiological changes which occur in the human body when subjected to exercise and environmental stress. Concepts such as the energy continuum, nutrition, performance and the benefits of active lifestyles are investigated so that students can apply such knowledge in terms of physical fitness assessment and exercise prescription.

Prerequisite: EDU1HBS.

Class requirements: One 2-hour lecture and one 2-hour laboratory class per week.

Assessment: Weekly laboratory assignments – equivalent of 2000 words (40%), One 1-hour mid-semester test (25%), one 1.5-hour final examination (35%)

Prescribed Reading:

Wilmore, JH and Costill, DL. (2006) *Physiology of Sport and Exercise* 3rd. edn. Human Kinetics, Champaign, Ill

EDU2HEM HEALTH EDUCATION METHOD: PREP TO 12 (15 CPs Sem. TE-

ALL-YR BE.) *Ms Cathleen Farrelly*

In this unit students undertake a practical and theoretical study in Health Education curriculum from Prep to year-12. Lectures and tutorials focus on the issues impacting on the design and implementation of health education curriculum, teaching and learning strategies including assessment and evaluation strategies. Students are introduced to the concepts, framework and learning outcomes, of the physical, personal and social learning strands of the Victorian Essential Learning Standards. Students are also introduced to the structure and content of the VCE Health and Human Development study design. Current texts and resources used in schools will be examined.

Students will implement and critically evaluate the teaching of health education lessons while they are on teaching practicum.

Class requirements: Two hours per week.

This unit is not available for Study Abroad students.

Assessment: One 1200-word literature review (30%), One 1500-word curriculum project (35%), evaluation and presentation of teaching resource (equivalent to 500 words) (10%), implementation and evaluation of health lessons (equivalent to 1000 words) (25%)

EDU2IS INDIGENOUS STUDIES (15 CPs Sem. TE-SEM-2 BE.) *Mr Ray*

Nichol

In this unit, students address historical perspectives on interactions between indigenous Australians, governments and non-indigenous Australians. Students examine the origins, diversity and history of indigenous peoples; contemporary perspectives relevant for teaching, including awareness of indigenous cultures; reconciliation; impact of current political movements; strategies for combating racism; communication; and sensitivities and protocols. The unit introduces culturally and linguistically inclusive strategies and general terminology appropriate for teaching indigenous students. The emphasis is on understanding of and respect for, indigenous cultures and their political, cultural, social and educational aspirations.

Class requirements: Two 1-hour lectures and one 2-hour tutorial per week.

Assessment: One 1000-word critical document review (15%), specific details of assessment requirements available in first lecture, one 1500-word research essay (40%), one 10-minute tutorial presentation (15%) and one 1000-word assignment (30%)

EDU2MP MOVEMENT PERSPECTIVES (15 CPs Sem. TE-SEM-1 BE.) *Dr*

Ashley Woodcock

In this unit students will be able to develop a theoretical understanding of and the application of, biomechanical principles related to human movement. Through a series of lectures and practical laboratory classes students are provided with an opportunity to devise, trial and evaluate strategies related to efficient human performance in sport.

Class requirements: One 2-hour lecture and one 2-hour laboratory class per week.

Assessment: One 750-word practical assignment (20%), one 2000-word assignment (50%), one 1.5-hour final examination (30%)

EDU2PEM PHYSICAL EDUCATION METHOD: PREP TO 12 (15 CPs Sem. TE-ALL-YR BE.) *Dr Ashley Woodcock*

In this unit students will be introduced to a theoretical basis and skill foundation in teaching physical education in a school setting. Emphasis will be on qualities of an effective physical education teacher and physical teaching practices. Students will be provided with the opportunity to apply a range of knowledge and skills to

development and evaluation of a P-10 physical education curriculum. The curriculum will be linked to the concepts, framework and learning outcomes contained in the physical, personal and social learning strand of the Victorian Essential Learning Standards. This unit will prepare beginner teachers to teach post-compulsory physical education. Students will be introduced to the structure and content of the VCE Physical Education Study Design and will be provided with the knowledge and skills to plan, teach, assess and resource physical education.

Class requirements: Two hours per week.

This unit is not available for Study Abroad students.

Assessment: School-Based Component and dialogue journal (1200 words) (30%), curriculum project (1500 words) (35%), course outline and time-line for units 1 and 2 in VCE Physical Education (1000 words) (20%), developing school assessed coursework in physical education units 3 and 4 (800 words) (15%)

EDU2PRB PRACTICUM B – FOCUS ON CLASSROOM MANAGEMENT

(15 CPs Sem. TE-ALL-YR BE.) *Dr Jennifer O'Shannessy, Mr Wilf Savage*

Students will undertake two separate three-week teaching rounds during the year, one in each semester and each in a different school. The accompanying lecture-tutorial program seeks both to feed upon and inform the student's school experiences and encourage critical reflection upon several key issues: lesson planning and preparation, alternative instructional approaches, the developing of productive working relationships in the classroom and the establishment and maintenance of a classroom management plan.

Prerequisite: EDU11ITT, EDU12TL.

Class requirements: Two 1-hour lectures and one 2-hour tutorial per week (semester 2 only), plus 30 days of school experience (15 days each semester).

Assessment: One 2000-word assignment (30%), one 2-hour examination (30%), practicum performance (as assessed by supervisors' reports) (40%). To pass this subject, students must successfully complete 30 days of supervised teaching practice. Criteria for assessment will be supplied with subject outline.

EDU2SOS STUDIES OF SOCIETY AND ENVIRONMENT (15 CPs Sem. TE-SEM-2 BE.) *Mr Raymond Nichol*

In this unit, students are provided with opportunities to develop knowledge and appreciation of Australian society, particularly contemporary social issues and their significance for educators. Students examine the history and role of social studies, social education and Studies of Society and Environment (SOSE) in school programs and develop the ability to plan, implement and evaluate SOSE programs in schools, particularly primary schools.

Class requirements: One 2-hour lecture and one 1-hour tutorial-seminar per week.

Assessment: One 30-minute seminar presentation and one 500-word summary (30%), one 3-4 lesson teaching task and evaluation equivalent to 500 words (10%), one 2500-word curriculum project – unit development, resource folder and reflective journal (50%), attendance and participation (10%)
